Mr. Wiener: We have a preliminary survey covering about twenty-eight miles. We have ten milees that we expect to build in the next ten or twelve months, if the arrangements which we have with the people ahead are put through.

Examiner Burchmore: What will it open up?

Mr. Wiener: That will afford a market for the town of Chireno and give a market outlet for five thousand bales of cotton.

Examiner Burchmore: Where will the twenty-eight miles run?

Mr. Weiner: To the Santa Fe, at San Augustine.

Examiner Burchmore: Is this lumber company negotiat-
2081 ing for the acquisition of any timber rights along that section?

Mr. Wiener: No, the lumber company own a very small proportion of the timber in that direction. They expect to develop some timber, but on the particular ten miles a very small portion of it is on land owned or controlled by the lumber company.

Examiner Burchmore: That may be true, but how about the stumpage right?

Mr. Wiener: On that particular line, the stumpage rights, only a very small proportion belong to the lumber company.

Examiner Burchmore: Have you stated the extent of timber holdings or stumpage rights of this lumber company in this territory?

Mr. Wiener: At Nacogdoches County, the lumber company owns approximately 12,000 acres of land and about 28,000 acres additional timber rights.

Examiner Burchmore: Have you any questions you desire to ask in this particular connection, Judge Cowan, as to timber lands and timber rights?

Mr. Cowan: No.

Mr. Wiener: I will state in connection with that, however,
2082 that that is only a portion, considerably less than half of the timber in that immediate section.

Examiner Burchmore: The rest of the timber is not being cut?

Mr. Wiener: Some of it is owned by another lumber company and considerable of it is owned by small farmers and settlers in there.

Examiner Burchmore: What is this other lumber company?

Mr. Wiener: The Frost-Johnson Lumber Company of Nacogdoches.

Examiner Burchmore: Do they have any mills in that vicinity?

Mr. Wiener. Their mill in Nacogdochees is twenty miles from the end of our track.

Examiner Burchmore: How do they get logs from that timber?

Mr. Wiener: Within a few miles of us there they are operating a road from Nacogdoches south into that territory.

Examiner Burchmore: What is the name of that road?

Mr. Wiener: The Nacogdoches & Southeastern.

Examiner Burchmore: Is there any further statement you wish to make with respect to the nature and extent of your freight traffic?

2083 Mr. Wiener: Only as to the future possibilities of it, as we see them.

Examiner Burchmore: I presume Mr. Walter can bring that out more fully than I could. Now, with respect to the rate, have you any joint rates with these connecting lines covering class traffic?

Mr. Wiener: We are concurring or participating carriers in practically every southwestern line tariff I believe issued by Mr. Leland, and we are also a concurring carrier in some tariffs issued by some other agent or lines of roads.

Examiner Burchmore: Do the Texas common point rates apply to stations on your line?

Mr. Wiener: We think they do.

Examiner Burchmore: You are in Texas?

Mr. Wiener: We are in Texas, and we think the Texas Commission rates should apply.

Examiner Burchmore: From St. Louis——

Mr. Wiener: The Texas common point rates apply. I do not think there is an exception. I think every rate is the same to points on our line that it is to our connection with the main line.

2084 Examiner Burchmore: You have on file with the Commission an index of all your tariffs?

Mr. Wiener: We have.

Examiner Burchmore: I have a copy of that before me dated February 1, 1910, bearing your I. C. C. No. 3.

Mr. Wiener: Here is one——

Examiner Burchmore: There may be a subsequent issue of a new one, but if so it would be substantially the same?

Mr. Wiener: There may be some changes. Here is one issued November 1st, and we have a still later one issued December 1st.

Examiner Burchmore: Those are on file with the Commission?

Mr. Wiener: Those are on file with the Commission.

Examiner Burchmore: It will not be necessary to refer to them further. How about joint rates on lumber?

Mr. Wiener: We have joint rates on lumber with both the Cotton Belt and Southern Pacific system, the Houston East & West Texas.

Examiner Burchmore: To points all over the country?

Mr. Wiener: To points all over the country.

Examiner Burchmore: I mean to any territory to which you might wish to carry shipments.

2085 Mr. Wiener: I think they cover practically the entire country with the exception of some individual exceptions, points in New Mexico on the Santa Fe and some individual exceptions in other portions of the country.

Examiner Burchmore: You do not have any rates to Santa Fe local points, do you?

Mr. Wiener: We have rates from points on our lines to nothing on the Santa Fe.

Examiner Burchmore: What are your divisions in connection with the Cotton Belt system on lumber?

Mr. Wiener: Two and four cents.

Examiner Burchmore: The highest division you receive is four cents from the Cotton Belt?

Mr. Wiener: The highest division we receive is four cents.

Examiner Burchmore: Two cents is the lowest division?

Mr. Wiener: Via the Cotton Belt, yes, sir.

Examiner Burchmore: Have you ever received a higher division than four cents from the Cotton Belt?

Mr. Wiener: I do not think so, in my recollection.

Examiner Burchmore: Is there any traffic that you interchange with the Cotton Belt on which you receive no division

2086 of a joint rate? For example, where the Cotton Belt takes the whole rate or where there are no joint rates on your line, so you charge the local?

Mr. Wiener: I think about the only application of that would be the Santa Fe.

Examiner Burchmore: You have some traffic to Santa Fe local points?

Mr. Wiener: No, I do not think we ever have any to Santa Fe local points.

Examiner Burchmore: I am not talking about points to which you have no divisions, but about traffic which actually moves on which you earn no division.

Mr. Wiener: Speaking of an interstate basis?

Examiner Burchmore: Yes.

Mr. Wiener: I do not recollect. There might have been an exceptional car, but I do not remember.

Examiner Burchmore: You get divisions out of joint rates on shipments of lumber to points in Texas?

Mr. Wiener: We are not getting them, no.

Examiner Burchmore: Why not.

Mr. Wiener: Well, on account of a little misunderstanding with the Texas Railroad Commission of some long standing.

2087 Examiner Burchmore: Have you ever had any application on file with the Texas Railroad Commission to give you the necessary status which would entitle you to such a division?

Mr. Wiener: Yes, sir; and they at that time stated there were certain requirements, they seemed to require certain physical facts

8511

which would cause the expenditure of more money than we had or could borrow.

Examiner Burchmore: When did you make that application?

Mr. Wiener: One application was made several years ago; I do not remember the date.

Examiner Burchmore: When was the other made?

Mr. Wiener: I was just going to explain. The Commission changed its status or rather made a public declaration that it believed it had the authority to regulate railroads and did not intend to recognize any more.

Mr. Mantooth: That is, formally recognize them.

Mr. Wiener: That is, formally recognize them. The majority of the Commission made the statement they did not expect to recognize a railroad, but when one was chartered they expected to see it obey the law. Following that opinion we equipped ourselves as we thought in compliance with the law and so stated to the
2088 Commission and some of our connections we made applications for some joint rates which were not covered by railroad commission tariffs, and in reply to that the Commission notified us to be there on the 10th of next month, apparently to overrule their former opinion, and stated that on January 10th they would take up the matter.

Mr. Walter: That is a joint application by you with other lines?

Mr. Wiener: That is a joint application for some special rate.

Examiner Burchmore: Did you have any difficulty in getting the Cotton Belt to join in that application?

Mr. Wiener: The application was made with the St. Louis Southwestern system. The Cotton Belt rates did not require any application. There was some special joint rates with the St. Louis Southwestern which required a special order of the Commission to make it effective.

Examiner Burchmore: You make one statement as to the Cotton Belt and another as to the St. Louis Southwestern——

Mr. Wiener: I mean the Southern Pacific. The application was made with the Southern Pacific system.

2089 Mr. Walter: Let me suggest that a copy of that application be put in the record now.

Examiner Burchmore: Has it a material bearing on the case?

Mr. Walter: Yes, it shows the joint action of the Southern Pacific system and the Angelina & Neches River Railroad.

Examiner Burchmore: Have you a copy of it?

Mr. Wiener: I have an unsigned copy.

(The paper so offered and identified was received in evidence and thereupon marked Angelina & Neches River Exhibit No. 2, Witness Wiener, December 15, 1910, and is attached hereto.)

Examiner Burchmore: But as a matter of fact, speaking of the present date and without regard to the possibility of any different action or position in the future, the Texas Railroad Commission does not recognize and has not recognized so far the Angelina & Neches River Railroad as being a common carrier railroad?

Mr. Wiener: It has not issued any public order to that effect.

Examiner Burchmore: Well, whether its action is correct or not is another matter, but as a matter of fact it has not recognized
2090 it as a common carrier.

Mr. Wiener: It has not recognized it.

Examiner Burchmore: Are there any other short timber roads in that vicinity which have been recognized by the Texas Railroad Commission?

Mr. Wiener: I think there are a number which have been recognized; there are some short railroads in Texas which are doing business without any such formal recognition.

Examiner Burchmore: Is this action of the Texas Railroad Commissioner apparently an arbitrary one or do they assign reasons for their position?

Mr. Wiener: I cannot answer that question.

2091 Examiner Burchmore: You never heard any reasons assigned?

Mr. Wiener: As I stated, at one time several years ago they requested that we get our road in as good shape as the big systems like the Katy which have been in operation with heavy traffic, and we could not spend the money.

Mr. Garwood: Your Honor, would you permit me to make a statement with relation to that matter at this time?

Examiner Burchmore: Certainly.

Mr. Garwood: For a long time, quite a number of years, the Railroad Commission pursued the formal policy of issuing a formal order recognizing some and not recognizing others. There was, so far ase I am advised, no special statutory authority conferring upon them the right or power to recognize or not to recognize, but they pursued that policy for a number of years. Within the last few years they have concluded it was not their province to pass upon the question whether a railway was or was not a common carrier in so far as issuing a formal order to that effect, and they have discontinued that policy and have done so for the past year or two, and they are not now issuing any formal orders to that effect. But I understand that they will pass upon and undertake to determine whether joint rates shall be made as in the case indicated
2092 by the witness, his own application having been set down for a formal hearing on an order.

Examiner Burchmore: What divisions do you receive from the Houston, East & West Texas?

Mr. Wiener: I think the minimum is about one cent; it is a percentage basis; and the maximum is four cents.

Examiner Burchmore: How long have you been receiving as much as four cents from the Houston, East & West Texas?

Mr. Wiener: Since some time last February.

Examiner Burchmore: What prompted the Houston, East & West Texas to increase their maximum divisions from three to four cents?

Mr. Wiener: That particular division applies on traffic routed only through one gateway, one way, and was, I understand, caused

by their making favorable traffic arrangements with one of their connections which would permit them to pay that division.

Examiner Burchmore: That increase in division was not the result of any negotiation that you initiated with them?

Mr. Wiener: I had talked to them, and had talked to their connections. I think though that the same division was put in with
2093 some of their other connections which had not mentioned the matter to them. It was the result of some very favorable arrangements with some of their connections.

Examiner Burchmore: You interchanged the major portion of your lumber with the Cotton Belt?

Mr. Wiener: There have been some months when the car supply from the Southern Pacific was short, I believe they have received the major portion; it is simply now depending solely upon the question of car supply.

Examiner Burchmore: Does it not depend largely upon markets in which you happen to sell your lumber?

Mr. Wiener: Yes, sir, it depends upon the routings applicable and their tariffs; when we turn over a car, the intermediate routing is usually left to the railroad company and they naturally route it via the route paying the best rates, paying them the best revenue.

Examiner Burchmore: When lumber does move out over the Houston, East & West Texas for interstate destinations which could be reached by the St. Louis Southwestern and its connections, you are really receiving a less division and rendering a greater service?

Mr. Wiener: In a good many instances we receive the same division from either line.

2094 Examiner Burchmore: But you render a very much greater service?

Mr. Wiener: Yes, we render a greater service on the finished product.

Examiner Burchmore: You do not render any service at all on the finished product when it moves over the Cotton Belt?

Mr. Wiener: Yes, sir, some we do and some we do not.

Examiner Burchmore: What instances?

Mr. Wiener: In the movement of rough lumber from the sawmills, we do some switching service on handling a portion of the Cotton Belt shipments.

Examiner Burchmore: I questioned you with respect to the manner the lumber moved out, did I not?

Mr. Wiener: Somewhat.

Examiner Burchmore: The empty car is set at the mill by the St. Louis Southwestern?

Mr. Wiener: It is partially set in on the loading track by the Cotton Belt. The Cotton Belt refused to build a foot of their track off the right of way. They own the track so far as their right of way extends.

Examiner Burchmore: Their engine sets the car and takes the loaded car away?

2095 Mr. Wiener: If the loading tracks happen to be so full with cars they may set them and sometimes our engine goes up and switches the track.

Examiner Burchmore: Are the rates published from your line on lumber on a milling in transit basis?

Mr. Wiener: With the Cotton Belt the rate provides that the rate covers movement of the log to the mill and the lumber from the mill.

Examiner Burchmore: But the movement of the log is not performed by your company at all?

Mr. Wiener: Not now, but this has been the Cotton Belt milling in transit tariff, and we have taken it up and notified them we want to change it for that reason.

Examiner Burchmore: Has this company paid any dividends?

Mr. Wiener: It has not.

Examiner Burchmore: Accumulated any surplus?

Mr. Wiener: It has not. It has accumulated a deficit.

Examiner Burchmore: Losing money every year?

Mr. Wiener: No, it made some last year. For the year ending June 30th, 1910, it made about $700.

Examiner Burchmore: On the whole, however, it has been a losing venture?

2096 Mr. Wiener. For the ten years' operation it shows something like $7,000 or something over $7,000 loss.

Examiner Burchmore: Then the sum of the annual deficits has exceeded the sum of the annual balances?

Mr. Wiener: By something over $7,000, yes, sir.

Examiner Burchmore: Who has paid that $7,000?

Mr. Wiener: It is an indebtedness of the railroad company.

Examiner Burchmore: To the lumber company?

Mr. Wiener: Part of it, yes. It stands as an indebtedness. All of the indebtedness of the railroad company, today however, is not to the lumber company.

Examiner Burchmore: Examiner Boyle will take up at this point the Zwelle & Eastern Railway in the adjoining room. Do the officers of this railroad receive any interstate passes?

Mr. Wiener: Yes, sir.

Examiner Burchmore: Do they use those passes?

Mr. Wiener: I do mine, yes, sir.

Examiner Burchmore: Do the other officers of the railroad company receive passes?

Mr. Wiener: I think we receive three annuals.

Examiner Burchmore: And they are used?

2097 Mr. Wiener: I presume so.

Examiner Burchmore: Well, you do not think those gentlemen pay fare when they have passes?

Mr. Wiener: No, when they travel they use their passes unless there is something seriously the matter with their minds.

Examiner Burchmore: I think that is all.

Mr. Walter: This line of railroad of yours is a permanent railroad?

Mr. Wiener: Yes, sir.

Mr. Walter: Intended to remain there indefinitely?

Mr. Wiener: Intended to remain there indefinitely.

Mr. Walter: You serve anybody and everybody that offers you business?

Mr. Wiener: Yes, sir.

Mr. Walter: This proposed extension to Chereno, what sort of a country is that?

Mr. Wiener: That is going into a country, we expect for several miles to traverse a country on which there is no timber. It is going into one of the oldest settled farming communities of East Texas.

Mr. Walter: How does it rank in quality as to a farming
2098 community?

Mr. Wiener: Very high. The quality of the soil is very good.

Mr. Walter: Their agricultural and farming products rank with any part of Texas?

Mr. Wiener: With any part of the State, I think.

Mr. Walter: That railroad is under process of contract to the people along the line?

Mr. Wiener: You mean the building of it?

Mr. Walter: Yes.

Mr. Wiener: It has not been contracted yet.

Mr. Walter: But you have an arrangement with the people in process of arrangement so you expect to build the railroad?

Mr. Wiener: We expect to build the railroad, yes, sir.

Mr. Walter: That railroad is to be built whether it goes to Chereno or not?

Mr. Wiener: It will be built either near or to Chereno, yes, whether it goes to Chereno or not it will be built.

Mr. Walter: That is, in the immediate future?

Mr. Wiener: That is in the immediate future. We expect to complete about ten miles of it.

Mr. Walter: Has action been taken toward an amendment
2099 of your charter?

Mr. Wiener: The charter has been amended to include that extension.

Mr. Walter: Very recently?

Mr. Wiener: This year.

Mr. Walter: About how many people now live in the immediate territory along your line, what is the population?

Mr. Wiener: That is a hard question to answer. The immediate territory along our line has considerable farming territory. Some of the oldest farms in the county are along the line, and there is one track of about 90,000 acres which is being colonized, owned by colonization people, and we go something like two or three miles through that particular tract.

Mr. Walter: Would you say there are as many as 3000 or 4000 people who could use your railroad?

Mr. Wiener: I would consider it at least that many.

Mr. Walter: All this land after the timber is removed is agricultural land, is it not?

Mr. Wiener: Yes, sir, very good agricultural land, some of it.

Mr. Walter: If you reach Chereno or near enough for
2100 them to use your line that will aid several thousand more people.

Mr. Wiener: That will aid several thousand more people. There

are, I presume, 20,000 acres or more in cultivation in that immediate neighborhood, and quite a heavy population, several thousand people.

Mr. Walter: The railroad company furnishes the railroad for all logs that come out, under a contract arrangement with the lumber company?

Mr. Wiener: It furnishes the railroad, yes.

Mr. Walter: You spoke a moment ago of the requirement by the Texas State Commission made some years ago. I would ask you if your railroad now in the condition in which it is meets all that requirement?

Mr. Wiener: I think it does. We so consider it. We are complying with all the laws and orders of the Texas Commission today.

Mr. Walter: That is all.

Mr. Cowan: Just one question. As I understand the result of your situation, you were handling simply the logs and lumber of the Angelina County Lumber Company until you began to make these improvements and changed your relations as to the manner of hauling the logs, operating the cars and getting a passenger car
2101 and the like, and that since the rejuvenation of this road, you are now in a position to speak to the public that you are going to operate a railroad for public purposes, and are doing it now?

Mr. Wiener: We are operating a railroad every day.

Mr. Cowan: And doing it now?

Mr. Wiener: And doing it now.

Mr. Cowan: And the object of operating that railroad is for the compensation you get out of doing it?

Mr. Wiener: Yes, sir.

Mr. Cowan: And that compensation will come for the present, at least, mostly and almost altogether from the lumber business?

Mr. Wiener: I think that our total compensation for the entire month of November on lumber was only about 80 per cent of the total revenues received, and the other revenues were only received for part of the month.

Mr. Cowan: The revenues for the other traffic than lumber, however, are on traffic that is handled for the lumber company?

Mr. Wiener: Only a portion of it.

Mr. Cowan: Well, a portion of it is.

2102 Mr. Wiener: A portion of it is.

Mr. Cowan: You cannot operate and could not operate that railroad as a railroad for the public unless you operated it by getting the divisions on the rates on the lumber?

Mr. Wiener: We could not operate it except at a loss without getting a part of the revenue on all the traffic we handle.

Mr. Cowan: My friend, Mr. Henderson, the President of Angelina County, is the president of this railroad company?

Mr. Wiener: He is Vice-President of the railroad company.

Mr. Cowan: Well, he is the financial end of the company?

Mr. Wiener: Yes, sir.

Mr. Cowan: And he is not in the habit of doing business at a loss if he can help it?

Mr. Wiener: Well, he has done it, to my personal knowledge, in a good many instances.

Mr. Cowan: Well, that may have been on account of his employés or something like that. What is the object in going to San Augustine?

Mr. Wiener: The opening up of a section of country that will give our railroad tonnage in the days when the lumber business is a thing of the past in Texas.

2103 Mr. Cowan: San Augustine is the place which Governor Roberts mentioned in his book as being the centre of the surrounding country.

Mr. Wiener: I do not know, but it is.

Mr. Andrews: That is Nacogdoches.

Mr. Garwood: And it is, is it not?

Mr. Wiener: It is. I have been there.

Examiner Burchmore: What is the total movement of logs into your mill at the present time?

Mr. Wiener: Expressed in what terms?

Examiner Burchmore: Any terms you can express it.

Mr. Wiener: The total movement at the present time, I suppose, would be about 100,000 feet per day.

Examiner Burchmore: What does it cost the lumber company to move that 100,000 feet into the mill?

Mr. Wiener: I could not answer that question, because I have not the statement detailed that close, but it cost-, the service of the train crew and the operation of that train, and the maintenance of their equipment besides the trackage they pay us.

Mr. Garwood: If you get to San Augustine, what railway system will you reach then?

2104 Mr. Wiener: The Santa Fe.

Mr. Garwood: Then the Santa Fe penetrates through and reached the lumber district in East Texas?

Mr. Wiener: It does.

Mr. Garwood: How far northward from Beaumont does it go?

Mr. Wiener: I do not know the mileage. It goes through San Augustine to Center and across up to Longview which I believe is the northern terminus at present.

Mr. Garwood: The general tendency of railroad construction in East Texas is eastward toward the pine forests now served by the Santa Fe, is it not?

Mr. Wiener: I do think the general tendency is in that direction.

Mr. Garwood: Yes. The Texas railroads are pointing in that direction. Now if through routes and joint rates are not afforded to the railroads that are thus penetrating that section of Texas, is it not a fact that that tonnage will be tied up to the Santa Fe and it will move it throughout its entire length.

Mr. Wiener: I think so. That is my understanding.

Mr. Garwood: Is it not also the fact that the forest products
2105 of that section of Texas will be denied the right and privilege of moving to the markets of the world out through the northern Texas gateways via these roads that are now penetrating

that section and will be compelled to move over the entire route of the Santa Fe in that section?

Mr. Wiener: That is correct.

Mr. Garwood: Then I will ask you the question if *if* it is not directly to the interests of East Texas and the citizens and inhabitants thereof that through routes and joint rates be provided by the carriers that are now penetrating that section?

Mr. Wiener: It is.

Examiner Burchmore: That is your judgment. Do you think other people might have a different opinion?

Mr. Wiener: I do not think there are very many of the citizens of East Texas but would consider the building of railroads through that section is opening up the country that is at present undeveloped and which will stay undeveloped until that country is penetrated by some system of railroads.

Examiner Burchmore: Are not the trunk lines rather thick in that country?

Mr. Wiener: *There* are not—there is not a main trunk line within 19 miles of the town of Chereno which we are
2106 going to.

Mr. Walter: Have not the trunk lines been pretty generally made up of the small lines which were originally constructed to carry lumber?

Mr. Wiener: The trunk lines to a great extent have been made up by the acquisition and extension of short lines of railroads in recent years. The Cotton Belt extension from Lufkin south has been by the acquisition of roads built and operated and connected with lumber companies; and other systems have been extended on the same basis.

Mr. Garwood: Was not the Santa Fe a road made up from the Kirby Road which the Santa Fe bought from Mr. Kirby, the intervenor in this case?

Mr. Wiener: That is my understanding, that the present Santa Fe Road in East Texas was built out of Beaumont by Mr. Kirby, and afterwards acquired by the Santa Fe.

Mr. Garwood: Is it not a fact that the Houston, East & West Texas which runs from Houston to Logansport and then in connection with the Houston & Shreveport to Shreveport, was originally a narrow gauge road built into the pine forests for the main purpose of accommodating that lumber tonnage, and was it not afterwards changed to a standard gauge road?

2107 Mr. Wiener: When I first came to Texas it was a narrow gauge road, and the principal tonnage of which was lumber, and a sawmill every few miles on the road, and very little else moving. Since that time it has been broadened to standard gauge.

Mr. Garwood: And it is not part of the Sunset Central System?

Mr. Wiener: It is now part of the Sunset Central System.

Examiner Burchmore: Was it formerly owned by lumber people?

Mr. Wiener: I do not know. I have been there 20 years and it was there before I was.

Mr. Garwood: It was projected by private citizens in Houston.

Whether they owned any timber or not I do not know. It was before my day. You will have to ask Mr. Bonner as to that question.

Mr. Cowan: It is your understanding that that road was projected by parties who were not the owners of timber?

Mr. Garwood: I do not know. Paul Dumont was one of the original movers in that enterprise. As to whether he was interested in lumber I do not know.

Mr. Cowan: Old man Bonner says he never heard of his being interested in lumber.

2108 Mr. Garwood: Mr. Bonner is one of our oldest inhabitants, and if he says so, it is no doubt correct.

Mr. Greer: Is it not your information that the present Santa Fe out of Beaumont reaching northward to San Augustine was built primarily and largely subscribed to by four mills at Beaumont, Mr. Kirby projecting it, and these mills assisting him in it to serve those mills?

Mr. Wiener: My understanding was it served the mills at Beaumont, that its original traffic was the service of those mills and logs.

Mr. Greer: When it extended up to Jasper, a distance of about seven miles, was not its tonnage entirely of lumber and logs?

Mr. Wiener: That would be a presumption. I presume so, from my general knowledge.

Mr. Greer: That does actually penetrate the best pine forest in East Texas, or did at that day?

Mr. Wiener: It did at that day.

Examiner Burchmore: Did it receive any divisions out of joint rates at that time?

Mr. Wiener: My understanding is it did.

Mr. Greer: I do not know about the question of divisions,
2109 but as a matter of fact do you know whether the owners of that mill contributed largely by way of contributing stock or other assistance to build that road for the purpose of getting logs to their mills and serving the mills of Beaumont?

Mr. Wiener: I do not know that. That was out of my immediate vicinity at that time, and I know nothing of the details of the building of that road.

Mr. Greer: Do you know whether the Commissioner authorized a logging rate of about $4.00 into Beaumont for a number of years for the benefit of those mills over that road?

Mr. Wiener: My understanding is there was a logging rate authorized by the Commission.

Examiner Burchmore: This may be applicable to this case, but I do not see its application unless the road received tap line divisions. If it was an expense to build the road and an expense to the builders and they received no compensation from the railroads to partially take care of that expense, what is the application to this particular case, unless to show that the Santa Fe was originally constructed in that manner.

Mr. Greer: My understanding is that a mill man's money can build a railroad the same as anybody's else money, and if it is a fair compensation it is immaterial who owns it, and
2110 if these mill men did build this railroad at a considerable expense——

Examiner Burchmore: At their own expense?

Mr. Greer: Well, Mr. Kirby was not the original owner, but he contributed largely to it.

Examiner Burchmore: Do you mean the Santa Fe paid for this road?

Mr. Greer: The Santa Fe had nothing in the world to do with it, the object being to show that these roads grow into real trunk line railroads.

Examiner Burchmore: The Commission understands that that is a fact, that short lines of lumber roads have in very many instances become integral parts of these great systems.

Mr. Walter: Let us have the information furnished us by the Santa Fe whether there was divisions paid when the line was originally constructed?

Mr. Cowan: The Santa Fe had nothing to do with it. The Southern Pacific would know if there were any divisions.

Examiner Burchmore: Does anyone know?

Mr. Coleman: There has not been any proof to indicate that the sawmill men at Beaumont owned the road. The Santa Fe bought the road from John H. Kirby.

2111 Mr. Greer: Is Mr. Kirby here?

Mr. Coleman: My remembrance is that when the Santa Fe acquired the road, John H. Kirby had no sawmills on the line. Now it seems to me——

Examiner Burchmore: We are dealing with the distant past, and this investigation concerns primarily the present, and if this past history of the Santa Fe's present line has a direct bearing on the issues in this case, I should be glad to hear any questions that would bring it out.

Mr. Greer: As to the Santa Fe's practices, I am sure since they got the road this division has not existed. I am a citizen of Beaumont, and it is my understanding the road was originally built in the interests of those men and the Texas Commission authorized rates on which the logs came in, of the character of a milling in transit proposition, a certain amount of refund on the number of cars. I may be mistaken about it, but if Mr. Kirby is here he can inform us.

Mr. Andrews: He is not here today.

Examiner Burchmore: Is it your thought that a part of the present Santa Fe main line used to be made up of tap lines which received divisions in about the same manner that these tap lines today receive divisions?

2112 Mr. Greer: I just stated the extent of my information. It is the extent of my information that the logs were hauled into Beaumont on a milling in transit rate, and that a certain amount was refunded on the milling in transit basis. I do not know the exact terms, but to that extent it was similar in character.

Mr. Cowan: That information can be obtained.

Mr. Bonner: I was associated with Mr. Kirby in a way. I was not actively connected with the road. I happen to know that Boston capital put up most of the building of that road and developed what was then a very much undeveloped country. I believe one or two

lumber companies in Beaumont or some of their officers held some bonds, very few and only for a short period, but I cannot state positively; but it is my recollection they did not own a dollar of stock in the road, unless perhaps a qualifying share as a director. Boston capital put up the money for the construction of that road.

Mr. Greer: Didn't they have a milling in transit rate?

Mr. Bonner: They put in a milling in transit rate later on, but Mr. Kirby did not own any sawmill or any interest in a sawmill when he built the road, and the Kirby Lumber Company was organized after he sold the road.

Mr. Greer: Did he own any timber?

2113 Mr. Bonner: He owned some interest in timber at that time, but he bought most of it after that.

Examiner Burchmore: Does not this discussion relate more particularly to the whole question, if it has any bearing? It has no bearing on the Angelina & Neches River Railroad.

Mr. Greer: No.

Mr. Bonner: I merely wanted to tell what I knew.

Mr. Garwood: In that connection I intended to make the inquiry at a later point. I would like to be advised as to when the intervenor's case and that branch of the case will be taken up. Our witnesses are leaving, and we would like to be advised definitely as to whether they will be put on their case at this time, and whether in case they do not intend to put on their case, we will be expected to take up that branch of the inquiry ourselves at this hearing, and in that event we wish to be advised as to whether the intervenors, Mr. Kirby and Mr. Bonner and Mr. Hancock—and I would also like to ask if Mr. Coleman, of the Santa Fe, will remain here until the end of this hearing. I would request that information through counsel.

Mr. Cowan: Well, I have very little information on the subject to communicate, but I will say that whatever information I have I will be glad to communicate.

2114 The understanding was that it was going to take all the time that the Commission could devote to the matter to hear the tap line side of the case here. I asked Judge Harlan about that, and spoke to counsel in regard to it. It seems that the progress that is being made would require all the time that could be devoted to this hearing to hearing the tap line side of the case, and on that account it was understood that we would not be expected, and in fact the opportunity would not exist for us to undertake to put in our side of the case nor for the trunk lines to undertake to put in their side of it. I do not know whether Judge Harlan communicated that to the Examiner or not, but I suppose he did. And therefore I notified you, Judge Garwood, at the request of Judge Harlan, that such would be the case, according to the way the matter appeared to me then.

Mr. Garwood: That is correct, that was probably the case at that time.

Mr. Cowan: And it was by his authority, and I presume the Examiner understands it as I understood it. That is all the information I have about it, and on that account I supposed we would not at-

tempt to put in any testimony at this hearing, hoping we can
2115 even get through with the tap lines at this hearing.

Mr. Walter: Do you expect to put in testimony?

Mr. Cowan: Hereafter?

Mr. Walter: Yes.

Mr. Cowan: Certainly.

Mr. Garwood: That is the point we want to be definitely advised about. We have testimony we wish to put in this record. Some of this testimony we will expect our friends upon the other side to furnish us, which I have no doubt they will gladly do. We also have independent testimony that ought to go into the record, and from our standpoint we wish to have it placed in the record. We do not wish to be placed in the attitude of having this hearing closed with that expectation, confining ourselves merely to the salient points involved in each individual tap line case and not have these general features go into the record. We wish to be absolutely certain that there will be at an early date and in time for it to be thoroughly considered by the Commission this general line of testimony which we assume will be taken up by the intervenors in the case. If they do not take it up, we want our own testimony in the record. And that is now, that we wish to be definitely advised about
2116 whether there will be at an early date another hearing and in full time to give the Commission time to investigate the testimony adduced prior to the final hearing upon all these matters.

Examiner Burchmore: It is my understanding that at the present session each and every tap line that is a party to this whole record will be given the fullest opportunity to present any facts that it has to present, and the effort will be made to develop all the facts that will shed any light on the methods and practices of these so-called tap lines or on the question of their status as common carriers. I have not received any instructions to go farther than to call all the tap lines and hear each case presented. I do not think the Commission would enter any final order in a matter of this importance without affording every party in interest the fullest opportunity to present their case and bring out all the testimony; and so it is my general understanding that the Commission will hold a further hearing in this matter at which the intervenors, perhaps, will put in their case, if they have one to put in, and if the Southern Pacific or any other interests in this case have further facts they want to bring out, I understand they have an opportunity to bring out those facts. All I can say authoritatively is that I understand that at the
2117 present sessions this week we will take up only the case of each individual tap line and go no further. If when we go that far, any one wishes to present further facts immediately, I will wire the Commission and find out whether I can hear it. But I have an idea we will not complete this phase of the investigation before Saturday night, and we will be doing very well if we do that.

Mr. Garwood: It appears now to be likely——

Examiner Burchmore: It can be noted in the record, however, that the interests you represent desire to have a further hearing in connection with this case, in some relation.

Mr. Garwood: We wish to be advised definitely whether there will be another hearing. I have understood from the intervenors that they expected to——

Mr. Cowan: I have stated that Judge Harlan told me that and told me to tell you so.

Examiner Burchmore: It is my impression there will be a further hearing.

Mr. Cowan: But he did not care at that time to make any public announcement about it, because he did not know how far some of the individual parties might want to call some of the wit-
2118 nesses who might leave upon making such an announcement. But so far as the subsequent hearing is concerned, there was no question at all that he told me there would be a subsequent hearing at which the intervenors and trunk lines would be accorded the opportunity to put in whatever evidence they pleased; but he wanted to try to close the tap line end of it here if he could. That hearing to be at as nearly a convenient date as would suit the business of the Commission and yet expedite the proceeding. That was the definite understanding, and I not only told you gentlemen but some other lawyers when they asked me about it, that that was my understanding.

Mr. Garwood: I had not understood that testimony at such further hearing would be limited to the intervenors and trunk lines.

Mr. Cowan: He did not so state. I said they would be given an opportunity.

Examiner Burchmore: But I do understand at that further hearing no opportunity will be given to any tap line that appears at this hearing and states its case here, to present any further facts in relation to its particular case. We are supposed to clean up this part of the investigation at this session.

2119 Mr. Garwood: No. One reason why I am raising this inquiry now, in addition to being certain that will be the case, is to confine this inquiry as closely as possible to that.

Examiner Burchmore: I think this inquiry should be confined to the investigation as closely as possible, of the particular lines before us.

Mr. Jeffrey: I wish to call attention to this. I have a list of 20 Iron Mountain tap lines which have not been called yet.

Examiner Burchmore: Do they all receive divisions?

Mr. Jeffrey: Unfortunately they do. Suppose I hand this list up to you.

Examiner Burchmore: I wish you would. I have seven or eight, but the rest have been called and have not answered.

Mr. Cowen: There have been a good many called while you have been out.

Examiner Burchmore: Is this all with the Angelina & Neches River?

Mr. Walter: We want to make one reservation, as to the necessity for rebuttal in some particular lines.

Examiner Burchmore: Your request will be noted.

2120 Mr. Cowan: The law gives you that, I think.

Mr. Walter: Yes, and I know we will get it.

Mr. Coleman: In regard to Judge Garwood's inquiry, and whether the Santa Fe would be represented here, I may say it will be represented by either myself or some one else. Now if he has any special purpose in asking whether I personally would be here, I can arrange to be here or have any one for the Santa Fe that the defendants or Mr. Garwood may wish to have testify.

Examiner Burchmore: We will take a recess until two o'clock.

Whereupon, at 1:00 P. M. a recess was taken until 2:00 P. M.

2121 After Recess.

Examiner Burchmore: The Mississippi Valley Railway has been referred to Examiner Boyle.

The Blythville, Leachville & Arkansas Southern will be heard by Examiner Boyle.

The Black Bayou Railroad will be heard in the adjoining room. Is anyone present for that road?

(No response.)

Examiner Burchmore: Is anyone present for the Jefferson & Northwestern?

(No response.)

Examiner Burchmore: Is the Bodcaw Valley Railroad present?

(No response.)

Examiner Burchmore: The Bodcaw Valley Railroad apparently is not present. It is my understanding that the officers of that company have been present at this hearing. Whether they are here now or not I do not know, but apparently there is no following up of the matter

The Durham Transportation Company?

(No response.)

2122 Examiner Burchmore: The England & Clear Lake Railroad. Is there any appearance for the England & Clear Lake Railroad?

(No response.)

Examiner Burchmore: The Freeo Valley Railroad?

Mr. Walter: I appear for that railroad.

2123 *Freeo Valley Railroad.*

EDWARD BOWER, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Are you an officer of the Freeo Valley Railroad?

Mr. Bower: I am Vice President and Manager.

Examiner Burchmore: Are you an officer of the Eagle Lumber Company?

Mr. Bower: Yes, sir.

Examiner Burchmore: The line of the Freeo Valley Railroad connects with the St. Louis Southwestern Railway, as I understand, at Eagle Mills, Arkansas?

Mr. Bower: It does.

Examiner Burchmore: Is that the terminus of the line?

Mr. Bower: Yes, sir.

Examiner Burchmore: In what direction and for what distance does it extend?

Mr. Bower: It extends in a northeasterly direction about 22 miles, not 22 miles exact, but a fraction under 22 miles, to what is known as Princeton Junction.

Examiner Burchmore: Where is this road located with
2124 reference to Little Rock or Texarkana?

Mr. Bower: It is south of Pine Bluff, about 60 miles, and north of Texarkana about 90 miles.

Examiner Burchmore: Does it connect with the line of any other common carrier?

Mr. Bower: No, sir.

Examiner Burchmore: The other terminus of the line is known as Princeton Junction?

Mr. Bower: Princeton Junction.

Examiner Burchmore: The word junction suggests the connection with some other line of railroad.

Mr. Bower: With the logging road.

Examiner Burchmore: A private logging road of the Eagle Lumber Company extends, as I understand it, from that point. What is the length of that road, and in what direction does it run?

Mr. Bower: It runs almost due west, and is approximately 17 miles, a little in excess of 17 miles.

Examiner Burchmore: How closely does the line of the Freeo Valley Railroad run to the line of any other common carrier besides the St. Louis Southwestern?

2125 Mr. Bower: The nearest point is 5¼ miles from the Rock Island's Fordyce-El Dorado Branch.

Examiner Burchmore: Have you contemplated building across to the Rock Island or is there some barrier intervening between the lines?

Mr. Bower: There has been talk of venturing in that direction. There has been nothing done. It has been dropped.

Examiner Burchmore: Is it proposed to connect the line of this railroad with the line of the Fordyce & Princeton, which seems to be somewhat adjacent?

Mr. Bower: No. There was at one time a proposition to connect it with the Malvern & Freeo Valley Railroad, making the Iron Mountain connection.

Examiner Burchmore: That has been abandoned?

Mr. Bower: That has been abandoned.

Examiner Burchmore: Who is President of this railroad company?

Mr. Bower: E. L. Hayward.

Examiner Burchmore: He is also President of the Eagle Lumber Company?

Mr. Bower: No. Edward B. Hayward is President of the Eagle Lumber Company.

2126 Examiner Burchmore: Is that father and son?

Mr. Bower: Father and son.

Examiner Burchmore: Mr. E. L. Hayward is Vice President of the Eagle Lumber Company?

Mr. Bower: No.

Examiner Burchmore: Does he occupy any position with the lumber company?

Mr. Bower: Secretary of the lumber company.

Examiner Burchmore: Who are the other officers of the railroad company?

Mr. Bower: I am its Vice President, and M. J. Moore, Secretary and Treasurer.

Examiner Burchmore: Is Mr. Moore an officer of the lumber company?

Mr. Bower: No.

Examiner Burchmore: Are you an officer of the lumber company?

Mr. Bower: I am its Treasurer and Manager.

Examiner Burchmore: Then with the exception of Mr. M. J. Moore, the officers of the Freeo Valley Railroad Company seem to be officers also of the lumber company?

Mr. Bower: Yes, sir.

2127 Examiner Burchmore: I understand that the Eagle Lumber Company substantially controls the Freeo Valley Railroad through the ownership of a majority of the capital stock; is that correct?

Mr. Bower: I think so, yes, sir.

Examiner Burchmore: The stockholders of the two companies are in the main common?

Mr. Bower: With the exception of a few shares of stock, they are identical.

Examiner Burchmore: Are those few shares in the hands of directors?

Mr. Bower: Directors of the railroad company?

Examiner Burchmore: Yes.

Mr. Bower: Yes, sir.

Examiner Burchmore: And there are no stockholders in the lumber company who are not directly interested in the railroad company?

Mr. Bower: None.

Examiner Burchmore: What is the character of the country through which this railroad runs?

2128 Mr. Bower: Well, it is a mixture of almost everything that can be found in Southern Arkansas. The first three miles out from the junction with the Cotton Belt is fine flats; the next seven miles we will say is a farming country, and it runs almost that entire distance through farming lands. Then we get out into the gumbo hills and it is a very rough country and not very thickly settled on the line of railroad.

Examiner Burchmore: Does the Eagle Lumber Company own any timber land in this vicinity?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is the extent of its timber holdings?

Mr. Bower: There are no timber holdings of the Eagle Lumber Company immediately on the line of the Freeo Valley, but they own a large per cent of the cout-over land for the last ten miles of the length of the line. But beyond and where a private line of the Eagle Lumber Company runs they have approximately 30,000 acres of timber lands.

Examiner Burchmore: In the general area in which this 30,000 acres is situated, how much timber land is there outstanding in the hands of other owners?

Mr. Bower: Well, that would be an estimate on my part. I would think as a rough guess at it there was as much as
2129 one hundred million feet of pine. I have no way of knowing the amount of hardwood, but there is considerable.

Examiner Burchmore: What acreage?

Mr. Bower: Well, 20,000 acres.

Examiner Burchmore: So that this company controls more than half of the timber acreage out there?

Mr. Bower: Yes, I think so.

Examiner Burchmore: In speaking of timber lands, I mean to include stumpage rights, and I suppose you so understood.

Mr. Bower: Yes, sir. There is a great deal of timber land within our territory that has already — logged for the pine, and I have no estimate at all on the hardwood that remains there, but it is coming into the market rapidly; and taking that in connection with the outside pine, the lumber company does not own or control by any means 50 per cent of the stumpage in that territory.

Examiner Burchmore: Do you do any hardwood lumbering?

Mr. Bower: No, sir.

Examiner Burchmore: You sell the hardwood on the trees to other mills?

Mr. Bower: Yes, sir.

2130 Examiner Burchmore: What other sawmills are there on the line?

Mr. Bower: There is only one other sawmill known as the Williams mill. There is another small mill owned by a Mr. Wright that is six miles off the line. He has been wagoning his lumber to the line of the Freeo Valley, and it has been moved out over our line. There is also a small mill that is cutting hardwood, cross ties, railroad crossties exclusively.

Examiner Burchmore: I understand that the mill of the Eagle Lumber Company is located at the junction point at Eagle Mills with the St. Louis Southwestern and is in fact directly adjacent to the tracks of that company?

Mr. Bower: That is correct.

Examiner Burchmore: Is there a sawmill and planing mill both in that plant?

Mr. Bower: Yes, sir.

Examiner Burchmore: One of each?

Mr. Bower: Yes, sir.

Examiner Burchmore: Is there a side track extending from the rails of the Cotton Belt to a convenient point near your loading platform?

Mr. Bower: Well, I do not know that it could be termed
2131 a private siding. There is a siding which goes to our loading platform but——

Examiner Burchmore: Who owns that siding?

Mr. Bower: Well, it was built under the Cotton Belt siding contract. I think that contract provided at the time it was made that the Eagle Lumber Company should do the grading and furnish the crossties and the Cotton Belt furnished the rail and maintains the siding.

Examiner Burchmore: When was that side track constructed or when was the contract made?

Mr. Bower: As I recall it, that contract was made about 1902; that was before my time with the company, however, and I am not positive as to the date of it.

Examiner Burchmore: It is however possible for cars to be moved from the mill to the Cotton Belt main line without moving over the rails of this Freeo Valley Railroad?

Mr. Bower: Yes, sir.

Examiner Burchmore: When was this railroad first constructed?

Mr. Bower: It was begun about 20 years ago.

Examiner Burchmore: When was it incorporated?

Mr. Bower: I think the charter is dated May 11th, 1904.
2132 Examiner Burchmore: And that charter was taken out under the laws of the state?

Mr. Bower: Yes, sir.

Examiner Burchmore: And the line is incorporated as a common carrier railroad?

Mr. Bower: Yes, sir.

Examiner Burchmore: At the time of that incorporation was the entire present line constructed and in operation?

Mr. Bower: No, there was 18 miles constructed at that time.

Examiner Burchmore: Four or five miles have been built since?

Mr. Bower: Four miles.

Examiner Burchmore: Will you state what the total mileage of those private tram road tracks is?

Mr. Bower: I said approximately 17 miles. There is a little more still than that owned by the lumber company, but it is a go and come proposition, it is taken up and laid down.

Examiner Burchmore: When was this mill at Eagle Mills first put in operation?

Mr. Bower: About 26 years ago.

Examiner Burchmore: Then this railroad was constructed subsequent to the opening of the mill?

2133 Mr. Bower: Yes, sir.

Examiner Burchmore: In the beginning was the railroad operated as a mill facility to bring logs to that mill?

Mr. Bower: I take it that it was.

Examiner Burchmore: That is your understanding?

Mr. Bower: That is my understanding.

Examiner Burchmore: That was the situation in 1904, was it not?

Mr. Bower: Well, yes. I do not know what outside business was being done in 1904.

Examiner Burchmore: How long has Mr. Hayward been interested in this plant?

Mr. Bower: Since its inception, since the building of the plant.

Examiner Burchmore: What was the capital stock of this railroad when it was first incorporated?

Mr. Bower: $50,000.

Examiner Burchmore: Was that all issued?

Mr. Bower: Yes, sir.

Examiner Burchmore: Was it issued for cash, or as a sort of dividend on the lumber companys stock, or in what manner
2134 was it issued?

Mr. Bower: It was issued by declaring a dividend of the lumber company; checks were written, I understand, for the amount of the dividend, and were placed in the hands of the stockholders of the lumber company, and they were advised of the organization of the railroad and given permission to accept cash or stock in the railroad for a like amount.

Examiner Burchmore: But did all of them accept the stock?

Mr. Bower: Yes, sir.

Examiner Burchmore: Simply endorsed their checks over?

Mr. Bower: Yes, sir.

Examiner Burchmore: I understand in a substantial sense the officers and directors and stockholders of this railroad company at the present time are practically identical with the officers, stockholders and directors of the Eagle Lumber Company, or perhaps that statement is too broad?

Mr. Bower: They are in a sense; the president of the railroad company is the son of the president of the lumber company; our secretary and treasurer has no interest whatever in the lumber company except that he is an employé of the company.

Examiner Burchmore: But the two corporations, while
2135 they are distinct and separate corporations legally, are in substance one in interest?

Mr. Bower: They are.

Examiner Burchmore: Did the Cotton Belt System furnish any of the steel rails out of which this railroad was built?

Mr. Bower: None that I have any knowledge of.

Examiner Burchmore: Does this railroad company have any station buildings?

Mr. Bower: They have a small freight depot at Eagle Mills.

Examiner Burchmore: And that is the only station?

Mr. Bower: That is the only station.

Examiner Burchmore: Do they have any team tracks at which carload freight can be received or delivered to the shippers along the line?

Mr. Bower: Yes, sir.

Examiner Burchmore: What stations are there along the line, using the word stations in the sense of meaning points to or from which rates apply?

Mr. Bower: There are a number of sidings that are known by the number of miles distant they are from the junction with the
2136 Cotton Belt. The first siding is 7 miles out and is known as the Section House; the next is known as the Williams' Switch, and was built there for the little sawmill that I mentioned, and is 2 miles from the mill. The third is known as the Fourteen Mile Siding. The next is Eaglet, a small town, and the other is Princeton Junction, where there is a siding.

Examiner Burchmore: Those names are all shown in the tariffs?

Mr. Bower: I think so, with the exception of Section House, which I believe is called Scales. There was a depot built there at one time, which was destroyed by fire. The point was named Scales.

Examiner Burchmore: This is a standard gauge railroad?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is the weight of the rail?

Mr. Bower: 35 pounds, with the exception of a mile and a half, which is 45 pounds.

Examiner Burchmore: Is the road substantially constructed?

Mr. Bower: It is.

Examiner Burchmore: Any bridges?

Mr. Bower: Yes, sir.

2137 Examiner Burchmore: Well kept up?

Mr. Bower: It is.

Examiner Burchmore: How is it ballasted?

Mr. Bower: Principally with gravel.

Examiner Burchmore: When was that gravel ballast put on?

Mr. Bower: That work was begun about—well, before my time, but I will say eight years ago.

Examiner Burchmore: How many locomotives do you own and operate?

Mr. Bower: We operate two.

Examiner Burchmore: How many do you own?

Mr. Bower: None.

Examiner Burchmore: Those locomotives are leased from the lumber company?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is the basis of compensation?

Mr. Bower: There is really none, with the exception that a part of the consideration of the sale from the lumber company to the railway company was that 61 logging cars and a caboose and one locomotive at that time was the property of the lumber company and was turned over to the railroad company to be operated, and they were to keep up all repairs and at any time that there was a
2138 demand made on the railroad company for that equipment it was to be returned in substantially as good condition as it was received.

Examiner Burchmore: Any provision for depreciation?

Mr. Bower: Well, no.

Examiner Burchmore: Was that a written contract?

Mr. Bower: No, sir.

Examiner Burchmore: Then the railroad company pays nothing for the use of this locomotive and cars?

Mr. Bower: Except the up-keep. Understand now, the log cars are all run over the private line of the lumber company on the spurs, as well as over the main line. The spur work is being done in a mountainous country, very hilly, and the damage to those cars is very very heavy.

Examiner Burchmore: Who keeps them up?

Mr. Bower: The railroad company; that is the consideration of the lease, that no matter whether the damage is done on the spur tracks or the railroad, it is taken care of by the railroad company.

Examiner Burchmore: You have one box car, you said?

Mr. Bower: No, one caboose.

Examiner Burchmore: Is not that car described in your
2139 books as a combination passenger and freight car?

Mr. Bower: Well, it is, one end is a freight car and the other is a regulation caboose of the American Car & Foundry Company.

Examiner Burchmore: Do you have any other rolling stock besides that described?

Mr. Bower: Substantially none.

Examiner Burchmore: How many track crews are there on the road?

Mr. Bower: Two.

Examiner Burchmore: Do they perform any work on the private tram line of the lumber company?

Mr. Bower: None whatever.

Examiner Burchmore: Have you any station employés?

Mr. Bower: One.

Examiner Burchmore: And he is at Eagle Mills?

Mr. Bower: Joint agent of the Cotton Belt and Freeo Valley.

Examiner Burchmore: What compensation do you pay that agent?

Mr. Bower: I think it is $27.50 per month.

Examiner Burchmore: Do you pay any proportion of the cost of maintaining the station at that point?

2140 Mr. Bower: No, we do not.

Examiner Burchmore: You use the Cotton Belt stations?

Mr. BOWER: Well, in a sense we do, and we do not. The loading spur that runs to our platform is between our connection with the Cotton Belt and the depot and it is not possible for us to get our trains or our engine to the Cotton Belt without going on the main line, to the Cotton Belt depot.

Examiner Burchmore: How many train crews have you?

Mr. Bower: One.

Examiner Burchmore: Do you operate a locomotive with one train crew?

Mr. Bower: No, one locomotive is an emergency locomotive.

Examiner Burchmore: Are there any employés in the general office of the railroad company other than its officers?

Mr. Bower: No.

Examiner Burchmore: Do any of the clerks of the lumber company perform service at times for the railroad company?

Mr. Bower: They do; Mr. Moore, the secretary.

Examiner Burchmore: Is he compensated for that labor by the railroad company?

Mr. Bower: No.

2141 Examiner Burchmore: Does the railroad company pay any money to the lumber company to take care of the services performed by the latter's employés?

Mr. Bower: It does not.

Examiner Burchmore: What are the salaries of these officers from the railroad? I mean railroad officers who may also be officers of the lumber company?

Mr. Bower: There is no compenastion.

Examiner Burchmore: The railroad company then pays no salaries to its officers?

Mr. Bower: No.

Examiner Burchmore: is there any salaried officer of the railroad?

Mr. Bower: Not one, except this agent I spoke of.

Examiner Burchmore: The officers render gratuitous service to this carrier?

Mr. Bower: They do.

Examiner Burchmore: Is not that a little unusual on railroad companies lines?

Mr. Bower: I presume it is.

Examiner Burchmore: You have a very efficient management then. Do you run any passenger or mixed trains?

Mr. Bower: We do not do a passenger business for hire.

2142 Examiner Burchmore: You are incorporated only as a freight carrier?

Mr. Bower: Well——

Examiner Burchmore: At least you do not carry passengers?

Mr. Bower: We do not carry passengers. The caboose is run at times, and passengers all ride when they care to.

Examiner Burchmore: Do your freight trains all operate on a regular service?

Mr. Bower: No, sir.

Examiner Burchmore: How many trains are there running each way daily on the average?

Mr. Bower: Two.

Examiner Burchmore: Two each way?

Mr. Bower: Two each way.

Examiner Burchmire: Those are purely freight trains?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is your total freight tonnage for the past fiscal year?

Mr. Bower: Well, it depends on how you figure it. If as our

secretary made up the annual returns, if that is the correct way of arriving at the tonnage, it is something in excess of 130,000 tons; but in making that report he estimated the log tonnage, and
2143 to that added the lumber tonnage.

Examiner Burchmore: That was a duplication of figures to a certain extent?

Mr. Bower: That was a duplication of figures.

Examiner Burchmore: What would be your tonnage if you did not make that duplication?

Mr. Bower: The total tonnage is about 37,000 tons, that is if we eliminate that duplication.

Examiner Burchmore: 37,000?

Mr. Bower: 37,000, I think is what it is.

Examiner Burchmore: Your total tonnage if you duplicate the tonnage, is 130,000, and if you do not duplicate the figures it is 37,000, or about a quarter as much.

Mr. Bower: Yes, sir. You know the rough material, the logs are very much in excess of the weight of the finished product.

Examiner Burchmore: I do not think the latter figure is accurate, but what is the total weight of the logs into the mill?

Mr. Bower: We have been estimating them at 6,000 pounds to the thousand feet.

Examiner Burchmore: But how many tons to the year?
2144 Mr. Bower: 108,000 tons, as I recall it.

Examiner Burchmore: And your lumber was about 30,000?

Mr. Bower: No. Our lumber was about 29,000 tons. The outside tonnage made the difference.

Examiner Burchmore: What was the extent of the outside tonnage?

Mr. Bower: I think 5,524 tons.

Examiner Burchmore: Well, then, if you do not duplicate the figures, I would suggest that your total tonnage was about 110,000 or 112,000 tons, counting all the logs in and all the other merchandise moved, and not counting the lumber out.

Mr. Bower: It depends how you make the figures as to what the total tonnage is.

Examiner Burchmore: About what percentage of that total tonnage is furnished by the Eagle Lumber Company or subsidiary or relating concerns?

Mr. Bower: On the basis of the report made for the year ending June 30th, the per cent furnished by the Eagle Lumber Company is about 90 per cent of the total tonnage.

Mr. Andrews: The year ending June 30th last?

Mr. Bower: The year ending June 30th last.

Examiner Burchmore: Has that been the prevailing ratio
2145 in past years?

Mr. Bower: No, I think it has decreased, going down a little bit.

Examiner Burchmore: You mean the public traffic has increased in the past few years?

Mr. Bower: Yes, sir.

Examiner Burchmore: By the time the lumber is cut out most of the traffic will be done for the public?

Mr. Bower: Yes, sir.

Examiner Burchmore: You of course have no passenger fares?

Mr. Bower: —.

Examiner Burchmore: Do you publish or file with the Commission any tariffs naming local freight rates over your line?

Mr. Bower: No, we do not do a local freight business for hire.

Examiner Burchmore: You do not publish any local rates that could be applied on through transportation exchanged with the Cotton Belt, in the absence of joint through rates.

Mr. Bower: Not on class commodities.

Examiner Burchmore: You do on forest products or some of them?

2146 Mr. Bower: Yes, sir.

Examiner Burchmore: What is your local rate on lumber?

Mr. Bower: The local rate on lumber over the line?

Examiner Burchmore: Yes.

Mr. Bower: From the end of the line is $15.00 a car flat rate.

Examiner Burchmore: You are a party to joint through interstate rates on lumber or other forest products in connection with the Cotton Belt System?

Mr. Bower: Yes, sir. That applies to yellow pine only, I think.

Examiner Burchmore: Yellow pine lumber only?

Mr. Bower: Yes, sir.

Examiner Burchmore: Does it apply to staves?

Mr. Bower: No.

Examiner Burchmore: Do you handle any staves?

Mr. Bower: Yes, sir.

Examiner Burchmore: What rates do you apply to staves?

Mr. Bower: The same as the lumber rate, a flat rate of $15.00 a car.

Examiner Burchmore: The yellow pine lumber rate?

Mr. Bower: Yes, sir.

2147 Examiner Burchmore: Do you handle any hardwood?

Mr. Bower: Well, no logs; we have handled hardwood lumber.

Examiner Burchmore: What rate do you charge on hardwood lumber?

Mr. Bower: The same.

Examiner Burchmore: I thought you said the rates applied on yellow pine?

Mr. Bower: I was speaking of the joint rates concurred in by the Cotton Belt, and now I am speaking of the local rate of $15.00 a car.

Examiner Burchmore: Are your joint through rates on yellow pine lumber from stations on your line the same as the Cotton Belt rates from its local stations in this same group?

Mr. Bower: Yes, sir.

Examiner Burchmore: What division do you receive out of these joint through rates?

Mr. Bower: From one to two and one-half cents per 100 pounds.

Examiner Burchmore: Is 2½ cents the greatest division you have ever received?

Mr. Bower: No, there was a time, well, I might say it is the largest we have ever received; there was a division of three cents provided for Texas business on the Cotton Belt rails, but we have
2148 never had any business in that territory and to my knowledge there has never been a division given the Freeo Valley in excess of 2½ cents.

Examiner Burchmore: What is the usual weight of a carload of lumber?

Mr. Bower: Our cars average about 40,000.

Examiner Burchmore: What do your earnings on a carload of lumber average?

Mr. Bower: I would say $8.00.

Examiner Burchmore: You have filed with the Commission an index — your tariffs?

Mr. Bower: Yes, sir.

Examiner Burchmore: Do the rates on lumber to which you are a party carry with them a milling in transit privilege?

Mr. Bower: They do.

Examiner Burchmore: Who handles the logs into the mill?

Mr. Bower: The railroad company handles them.

Examiner Burchmore: How many locomotives does the lumber company own or operate?

Mr. Bower: They own five. They operate three independent of the railroad.

Examiner Burchmore: And lease the other two to the rail-
2149 road?

Mr. Bower: And lease the other two.

Examiner Burchmore: How many logging cars does the lumber company own?

Mr. Bower: 61.

Examiner Burchmore: How many does it operate?

Mr. Bower: Well, in connection with the Freeo Valley, 61, those same cars that are maintained by the railroad company run out on the lumber company's spur tracks, and are loaded there.

Exminer Burchmore: Are there not certain logging cars which are operated by the logging company itself?

Mr. Bower: Well, there are two steel cars which are not log cars, and I believe the lumber company has three water cars, tank cars for water purposes.

Examiner Burchmore: And that is all?

Mr. Bower: That is all.

Examiner Burchmore: Do those cars move over the rails of the Freeo Valley Railroad Company at times?

Mr. Bower: I do not—yes, they do; they have been brought into the shop.

2150 Examiner Burchmore: Just for repairs?

Mr. Bower: Just for repairs.

Examiner Burchmore: Is any charge made when they are taken into the shop?

Mr. Bower: No.

Examiner Burchmore: Who owns those shops?

Mr. Bower: The Eagle Lumber Company.

Examiner Burchmore: Does the Eagle Lumber Company repair cars and locomotives for the railroad company?

Mr. Bower: Yes, sir.

Examiner Burchmore: WLat charge does it make for repairs?

Mr. Bower: The regular shop job prices.

Examiner Burchmore: Do they make a profit on those repairs?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is the extent of that profit in a general way?

Mr. Bower: There is added to the actual time that is kept by the shop foreman ten per cent for use of tools in the shop.

Examiner Burchmore: That is a reasonable addition?

Mr. Bower: I would think very reasonable.

2151 Examiner Burchmore: The lumber company does not own nine logging cars which it operates itself?

Mr. Bower: They did at one time. They have been wrecked and have been taken out of the service. They were small cars, 24 inch wheels that set on the side track until the frames were rotten, and they were finally wrecked.

Examiner Burchmore: When were they taken out of service?

Mr. Bower: They have not been in the logging service for five years. They were used for hauling ballast for awhile three years ago.

Examiner Burchmore: Are these private tracks ballasted?

Mr. Bower: Some of them.

Examiner Burchmore: Is any of that ballast hauled over the railroad?

Mr. Bower: No.

Examiner Burchmore: It comes from a pit on the private lines?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is the explanation for the policy to include this private line of tram roads in the railroad system?

2152 Mr. Bower: Well, at the time the railroad was incorporated there was no thought for an extension in the direction of the logging operations for a number of years. The railroad was headed in a general way to a point where the Rock Island passes the northeast corner of the lumber company's holdings. The line started that way and built past the junction point with the lumber company's tram road; there were a number of circumstances that induced the lumber company to change its mind about going into that solid block of timber at that time, and they constructed their private line in a westerly direction, picking up their scattered timber. The private line was started out without any definite idea as to where it was going when it was started. It was begun as a logging spur, and after a complete survey of the territory, it was determined to make it a permanent thing for a few years anyway, and it was then ballasted up.

Examiner Burchmore: As to the manner in which these logs are transported from the woods to the mill, are we to understand that the locomotives operated by the lumber company haul the logging cars when loaded as far as Princeton Junction?

Mr. Bower: No, they haul to Princeton, which is 2½ miles from Princeton Junction. The railroad crew goes to Princeton
2153 Junction, delivers the empties on a siidng and picks up the loads and hauls them over the lumber company's private line 2½ miles.

Examiner Burchmore: Princeton is beyond Princeton Junction?

Mr. Bower: Yes, sir.

Examiner Burchmore: And farther away——

Mr. Bower: To the west of it 2½ miles.

Examiner Burchmore: Why do they have interchange at Princeton instead of Princeton Junction?

Mr. Bower: The principal reason was the water question. There was no water in the gumbo country and there was a running creek at Princeton and the junction point or division point was made down there on account of the water.

Examiner Burchmore: The railroad company hauls the logs from Princeton to the mill?

Mr. Bower: Yes, sir.

Examiner Burchmore: Does it there unload them?

Mr. Bower: Yes, sir.

Examiner Burchmore: Do employés of the lumber company assist in unloading the logs?

Mr. Bower: They assist, but the train crew also assists.

Examiner Burchmore: What is the total charge paid by
2154 the lumber company for the hauling of the logs into the mill?

Mr. Bower: There is none for the haul over the railroad company's line, but for the service of hauling them 2½ miles out of Princeton, and for unloading at the skid way, the lumber company is paying the railroad company a rate of $2.00 the logging car.

Examiner Burchmore: That amounts to how much on a carload of lumber, about $8.00?

Mr. Bower: Well, yes, probably $8.00.

Examiner Burchmore: Now we have the logs into the mill. After they are milled and are ready for shipment to an interstate destination, what is the practice; that is to say, who furnishes the empty car?

Mr. Bower: The Cotton Belt.

Examiner Burchmore: Who places that empty car at the mill?

Mr. Bower: They do.

Examiner Burchmore: It is then loaded by mill employés?

Mr. Bower: Yes, sir.

Examiner Burchmore: Who takes the loaded car back to the Cotton Belt's main line?

Mr. Bower: The Cotton Belt.

Examiner Burchmore: Then the Freeo Valley Railroad
2155 does not have anything to do with the handling of the finished product?

Mr. Bower: Substantially nothing. There are times when it is onvenient to go in on the siding with the Freeo Valley Railroad ompany's locomotive and place a few cars at the loading track, but is not done as a general proposition.

Examiner Burchmore: Then the statement which seems to have een made at one time by an official of the Cotton Belt to the effect hat the lumber "is loaded on our tracks and cars handled by us to nd from the plant", you would say is substantially correct?

Mr. Bower: Say that again, please.

(Question read.)

Mr. Bower: Yes.

Examiner Burchmore: Is there any billing covering the inbound ovement of the logs?

Mr. Bower: No.

Examiner Burchmore: The conductor, I presume, makes a report t the arrival of the train at the mill of the number of logs he has rought in?

Mr. Bower: No.

Examiner Burchmore: The mill just knows how many
156 logs gets there by finding them there?

Mr. Bower: No.

Examiner Burchmore: Well, what is done?

Mr. Bower: There is a report made of the lumber company's perations in the woods to the railroad company, of the number of ars which have been switched to the railroad company that day?

Examiner Burchmore: And all the logs that leave the woods go o the mill?

Mr. Bower: Yes, sir.

Examiner Burchmore: If they lost a few overboard there would ot be any claim for damages?

Mr. Bower: I presume not.

Examiner Burchmore: Who issues the bill of lading on the out- ound lumber from the mill?

Mr. Bower: The Freeo Valley Railroad.

Examiner Burchmore: Its agent at Eagle Mills issues that bill of ading?

Mr. Bower: Yes, sir.

Examiner Burchmore: Does he also issue a waybill?

Mr. Bower: No. That is, as I understand it, transfer
2157 billing.

Examiner Burchmore: Handled on transfer billing to the Cotton Belt?

Mr. Bower: Yes, sir.

Examiner Burchmore: What point is shown as the originating point on this bill of lading?

Mr. Bower: Eagle Mills.

Examiner Burchmore: Does the face of the bill of lading indicate that the shipment has come from beyond?

Mr. Bower: No, it does not. All the face of the billing is that it was received by the Cotton Belt from the Freeo Valley Railroad;

that is, it is Freeo Valley standard bills of lading that are tendered to the Cotton Belt.

Examiner Burchmore: That bill of lading is signed by the Cotton Belt?

Mr. Bower: There is a joint agent there.

Examiner Burchmore: And he files it away as the agent of the company?

Mr. Bower: Yes, sir. Well, that is the transfer part of it.

Examiner Burchmore: The original bill of lading is signed by you as the agent of your company?

2158 Mr. Bower: Yes.

Examiner Burchmore: And kept in your files?

Mr. Bower: Well, the original we——

Examiner Burchmore: Settlements with the Cotton Belt are made monthly by interline settlement?

Mr. Bower: Yes.

Examiner Burchmore: You have a full supply of railroad forms such as are necessary for operation?

Mr. Bower: Yes, sir.

Examiner Burchmore: You endeavor to comply with all the state and Federal statutes governing the conduct of railroad companies which are common carriers?

Mr. Bower: We attempt to.

Examiner Burchmore: And you feel that you do substantially comply with all those requirements?

Mr. Bower: Yes, I think we do.

Examiner Burchmore: Have you a resident agent in Washington?

Mr. Bower: Yes, sir.

Examiner Burchmore: Have you posted in your station at Eagle Mills all of the tariffs to which you are a party, or are they accessible for examination by shippers?

Mr. Bower: The only tariffs we have are concurrences in

2159 the Cotton Belt, and as our joint agent is with the Cotton Belt, they are posted, I suppose, on their accounts.

Examiner Burchmore: Does this railroad have any bonds?

Mr. Bower: No.

Examiner Burchmore: Any other indebtedness?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is that indebtedness?

Mr. Bower: An indebtedness to the Eagle Lumber Company, I think of about $9,000 at this time.

Examiner Burchmore: What does that $9,000 represent?

Mr. Bower: It represents an advance of money to the railway company for the four mile extension of their line after the purchase was made from the lumber company.

Examiner Burchmore: Has the road paid any dividends?

Mr. Bower: No.

Examiner Burchmore: Has it accumulated any surplus?

Mr. Bower: Yes, sir.

Examiner Burchmore: What is that surplus in amount?

Mr. Bower: The actual surplus is something like $30,000; I have forgotten the exact amount.

Examiner Burchmore: Is that a bookkeeping surplus?

Mr. Bower: Yes, sir.

2160 Examiner Burchmore: Any cash on hand?

Mr. Bower: No, sir.

Examiner Burchmore: Has that surplus been expended in additions and betterments?

Mr. Bower: Yes, sir. The surplus has been accumulated by this extension of the main line. The transfer was made to the railroad company at a time when it was necessary to accommodate the lumber company's business that the four mile extension be made and a part of the consideration was that the money should be furnished by the lumber company for making that extension, and it is a matter of bookkeeping between the lumber company and the railroad company, and as fast as any money accumulates it is paid to the lumber company on this open running account.

Examiner Burchmore: These divisions you receive out of joint rates are intended to apply, I assume, partly or wholly on the movement of the logs into the mill?

Mr. Bower: Yes, sir.

Examiner Burchmore: On what basis is this company taxed?

Mr. Bower: The basis for taxation was $3,000 a mile——

Examiner Burchmore: I mean is it taxed as other common carriers are taxed?

2161 Mr. Bower: Well, it is taxed by the Executive Board of the Railway Tax Commission or Tax Commission, I guess, of Arkansas, the body that handles it.

Mr. Walter: It is handled the same way as other railroads?

Mr. Bower: The same as other railroads?

Examiner Burchmore: As a matter of fact, I understand no charge is made by your company for handling local freight?

Mr. Bower: That is true.

Mr. Walter: Don't you mean in less than carload lots?

Mr. Bower: I mean in less than carload lots.

Examiner Burchmore: I do not believe there is any local carload freight?

Mr. Bower: Yes, sir.

Examiner Burchmore: Oh, in staves?

Mr. Bower: Yes, sir, and fertilizer and foodstuffs and flour.

Examiner Burchmore: That stuff has all come from or is destined to interstate points, is it not?

Mr. Bower: No some of it is and some is not.

Examiner Burchmore: You understand that in order to bring the traffic within the jurisdiction of the Interstate Commerce Commission it is not necessarily required that that traffic

2162 shall move under through billing, but it is sufficient if it moves under a common arrangement from which it is handled from a point in one state to another point in another state without the intervention of a shipper at an intermediate point.

Mr. Bower: Yes, sir.

Examiner Burchmore: And you govern yourself in the filing of your rates and the application of those rates according to that understanding?

Mr. Bower: I understand in a general way that that is true, but the movement of carload business, as a general proposition, moves under our local rates, flat rates.

Examiner Burchmore: Those rates are published with the Interstate Commerce Commission?

Mr. Bower: I was under the impression that they were, but I am not sure.

Examiner Burchmore: You refer to the Williams Mill, which is located near Williams Switch?

Mr. Bower: Yes, sir.

Examiner Burchmore: Is that mill owned by or controlled by or related to the Eagle Lumber Company?

Mr. Bower: No.

Examiner Burchmore: What is the extent of their ship-
2163 ments annually?

Mr. Bower: They have moved from the Williams Switch to the Section House Switch, I called your attention to, and a statement made by the proprietor of that mill says he will ship 200 cars of lumber this year.

Examiner Burchmore: What character of lumber?

Mr. Bower: Yellow pine and hardwood.

Examiner Burchmore: Where does he get his logs?

Mr. Bower: He has bought them around in that neighborhood.

Examiner Burchmore: He is not logging your land?

Mr. Bower: No, sir.

Examiner Burchmore: What about this Wright Mill?

Mr. Bower: The Wright Mill was moved out in that territory a year or a year and a half ago primarily to work up some blown down timber, and they afterwards bought adjacent timber and they have been operating about six miles off our line.

Examiner Burchmore: I suppose they team their lumber over to your line?

Mr. Bower: They do.

Examiner Burchmore: That is a mill that has a wagon haul on its logs into the mill, I suppose?

Mr. Bower: Yes, sir.

2164 Examiner Burchmore: And a wagon haul of its lumber over to your line?

Mr. Bower: Yes.

Examiner Burchmore: Can that mill successfully compete with your mill that owns the tap line and gets its logs into the mill substantially free of cost?

Mr. Bower: Well, no, it was not a matter of successful operation at all. The mill was really a contract——

Examiner Burchmore: It was a salvage proposition?

Mr. Bower: Yes, it was a salvage proposition; it was a contract made with the farmers who had the blown down timber, to go out and save what could be saved out of it.

Examiner Burchmore: Do the officers of your company receive free interstate transportation over other lines?

Mr. Bower: Just one.

Examiner Burchmore: What one is that?

Mr. Bower: I do.
Examiner Burchmore: Do you use that pass?
Mr. Bower: Yes, sir.
Mr. Walter: Do you operate into Princeton?
Mr. Bower: Yes, sir.
Mr. Walter: How many people live at Princeton?
2165 Mr. Bower: I would say—oh, I do not know, 350 or 400 people. It used to be the county seat of the county, but they have moved the court house, and it has depleted it somewhat. I do not know the exact population.
Mr. Walter: About how many people live along the line of your road and adjacent territory?
Mr. Bower: Oh, I have not given that matter much thought.
Mr. Walter: Well, just a rough estimate?
Mr. Bower: Two miles from this Section House spur or siding that I mentioned is the town of Holly Springs, probably 300 or 400 people there. The little town of Eaglet and around it is some little place, and I presume a conservative estimate, within a distance back a little on each side, 1000 people.
Mr. Walter: That territory through which you run is in part agricultural?
Mr. Bower: Yes.
Mr. Walter: And as the timber land is cleared away farms are being built up?
Mr. Bower: There are a number of farms being opened up, yes, sir.
Mr. Walter: Those people will be there when the timber is
2166 gone?
Mr. Bower: Yes.
Mr. Walter: You have built a permanent road?
Mr. Bower: Yes.
Mr. Walter: The intention is to devote it to the public use?
Mr. Bower: That was the intention.
Mr. Walter: And do you serve everybody that comes impartially?
Mr. Bower: We do.
Mr. Walter: Why have you not put on passenger service for hire?
Mr. Bower: Well, at the beginning of the railroad organization there was a feeling that the business would not justify us, and it has been the intention whenever we reached the point where it was justified and where there was a demand made for it, it would be put on. And just about one year ago I had the matter up with our people, and at that time the destruction of the tap line status as a common carrier was in question, and they advised me not to invest in any equipment until we found out what was going to be done.
2167 Mr. Walter: If as a common carrier your status is established, is it your intention to operate passenger service?
Mr. Bower: It is.
Mr. Walter: All the hardwood and other timber along your line must use your line as its outlet, must it not?
Mr. Bower: Yes, sir.

Mr. Walter: There is quite a lot of hardwood there?

Mr. Bower: A great deal of hardwood.

Mr. Walter: How many mills, three in addition to your own on your line?

Mr. Bower: Yes, sir.

Mr. Walter: And those are all served by you?

Mr. Bower: Yes.

Mr. Walter: Will your tonnage next year exceed the past year?

Mr. Bower: It will.

Mr. Walter: And during the past year more than 5500 tons were shipped in which you had no interest at all except as a carrier?

Mr. Bower: Yes, sir. That is all with one exception now, the stave bolt business, there was some of that that was sold as standing timber to the stave company from the Eagle Lumber Com-
2168 pany's holdings; their land; but it was sold at so much a cord and was worked up by them and transported on our line.

Mr. Walter: You had no interest in the shipment?

Mr. Bower: No interest whatever.

Mr. Walter: Have you had occasion to discuss with those people along your line that you serve as to their desire to have the common carrier status made permanent?

Mr. Bower: I have.

Mr. Walter: What do you find the view of those people to be?

Mr. Bower: The view of the people to a man is that they do not know what they are going to do unless we put on that promised passenger service.

Mr. Walter: There is a strong public demand for it, is there?

Mr. Bower: If a petition was circulated, every man, woman and child along the road would sign it, if it did any good.

Mr. Walter. Those farmers along your line use it for shipping forest products as well as products of the farm?

Mr. Bower: Yes, sir.

2169 Mr. Walter: So there is quite a number of carload shipments?

Mr. Bower: Yes, sir. I think last year to farmers there were 13 carloads of fertilizer hauled over our line, to give you an idea of the farming interests there are there. Those farmers up to the present time have not been very strong on buying fertilizer, but they are coming to the front now.

Mr. Walter: If your line was not in operation there, state what would be the effect upon getting supplies of that character in, and the material out that they produce?

Mr. Bower: Well, the end of the main line is 22 miles out, and the very nearest haul is 18 miles to a trunk line station—I will take that back, I am thinking only of the Cotton Belt. They might reach the Rock Island a little nearer than that.

Mr. Walter: It would be rather an expensive wagon haul, would it not?

Mr. Bower: Yes, sir.

Mr. Walter: With small loads?

Mr. Bower: Yes.

Mr. Walter: Is there anything further that you would like to add to what you have already said?

2170 Mr. Bower: Well, I do not know as it is necessary to add much more. I will just mention a colonization scheme that is being talked of, but there will be nothing done with it until it is decided what will be done with the railroad.

Mr. Walter: What does that contemplate, speaking in a general way?

Mr. Bower: The Eagle Lumber Company has given a real estate concern an option on 17,000 acres of their cut-over lands, which are out from 10 to 18 miles from the Coton Belt terminus, from the road, and their proposition is to build a town and from that town radiate out and bring in colonists to open up that 17,000 acres of land.

Mr. Walter: That is dependent upon the determination of the status of the road?

Mr. Bower: Further negotiations with respect to that depend upon the status of the road.

Mr. Walter: That is all.

Mr. Cowan: You spoke of a lot of contracts and arrangements which have bee nmade between the railroad company and the lumber company. How did the railroad company deal with the lumber company?

Mr. Bower: Well, you mean how did they deal at——

2171 Mr. Cowan: Yes, the lumber company decided to incorporate its railroad holdings into a railroad company.

Mr. Bower: I presume if you want to call a spade a spade that is the way it was done.

Mr. Cowan: And it is simply play-like talk to talk about the railroad company dealing with the lumber company; they were all a single investment to begin on.

Mr. Bower: Yes, sir.

Mr. Cowan: And then the lumber company decided to do that and incorporated the railroad and issued the securities usual in such cases, and the property was turned over so that the railroad company as a corporation became the owner of certain parts of the property.

Mr. Bower: Yes, I think so.

Mr. Cowan: And the same people continued to operate both as they had been before?

Mr. Bower: Yes.

Mr. Cowan: And they operated it for the same purposes it had been before, of supplying the lumber company with logs for its mill and getting the product out?

Mr. Bower: That is true with the exception of one feature of the case, and that is that prior to the organization of the railroad

2172 company there was no effort made to take care of anybody except the private logging roads to the sawmill, and since that time there has been an effort made to do a railroad business rather than serving the mill company exclusively.

Mr. Cowan: You would be compelled to haul any stuff after having incorporated, that anybody tendered you, as a common carrier.

Mr. Bower: Yes, sir, but there has been an effort made to encourage that class of business. We do not take it because we are compelled to, but we encourage it.

Mr. Cowan: Yes, you would be compelled to, because you are a common carrier.

Mr. Bower: I understand.

Mr. Cowan: $15.00 a car is the rate people pay to send their stuff off your line if they are independent?

Mr. Bower: Yes.

Mr. Cowan: If as a matter of fact your railroad company was an independent concern is there any reason you can see why the Eagle Lumber Company ought not to pay as much as the other fellow for hauling stuff out?

Mr. Bower: Probably not.

2173 Mr. Cowan: Are there other sawmills logging by railroads in your territory which do not secure divisions from the trunk lines?

Mr. Bower: I do not know of any.

Mr. Cowan: Are there any other small mills in your part of the country except the one you mentioned as being on your line or near it?

Mr. Bower: No, I know of none that are logging by railroad.

Mr. Cowan: Are there any sawmills on the main line of the trunk lines that log by team?

Mr. Bower: Yes. You mean on the Cotton Belt?

Mr. Cowan: Yes. To what extent is lumber produced that way?

Mr. Bower: I know of none but small mills of say 10,000 daily capacity.

Mr. Cowan: The great bulk of the lumber in the State of Arkansas is produced by mills logged by railroad?

Mr. Bower: Yes, sir, I think so.

Mr. Cowan: And in all the instances you know of they get a division somewhat similar to the way you get it, for the movement out of the lumber?

Mr. Bower: Yes, sir, most of them get higher divisions, I
2174 think.

Mr. Cowan: Well, as a business proposition, don't you think you are entitled, in justice to your commercial business, to just as good a division as somebody who happens to be on the Rock Island Road?

Mr. Bower: As a railroad proposition I believe we are entitled to every cent we can get in the way of divisions.

Mr. Cowan: As it ultimately results to the benefit of the entire investment in both the lumber company and the railroad, don't you think as a business proposition, taking both as one investment, that you, being on the Cotton Belt, are at a disadvantage compared to a man on the Rock Island who gets 2 or 3 or 4 cents a hundred more than you do?

Mr. Bower: If I thought that strong enough, with the three or

four mile opening between us and the Rock Island, I think we would have connected it up to the Rock Island and delivered it to them a distance of 27 miles and be on a level with the other fellow.

Mr. Cowan: It would be a considerable undertaking to haul that lumber 27 miles?

Mr. Bower: Yes, sir.

Mr. Cowan: And would probably cost you the difference
2175 between your division and what the Rock Island fellow gets, don't you think so?

Mr. Bower: Well, I do not know.

Mr. Cowan: Well, if you had your mill on the Rock Island, that would be a different thing.

Mr. Bower: Yes.

Mr. Cowan: And it would cost you considerable money to build that extra track and maintain it?

Mr. Bower: Yes, it would in a sense. It is hilly country, but if as has been suggested, the entire operation of the lumber plant and the railroad is one and the same thing, I will say that the lumber company owns timber extending right up within a quarter of a mile of the Rock Island Railroad.

Mr. Cowan: Then ultimately you will use that timber by extending your road or putting a mill over at the Rock Island?

Mr. Bower: No, it will all be logged with a spur track, I think.

Mr. Cowan: I believe you have stated what divisions you get?

Mr. Bower: Yes, sir.

Mr. Cowan: This 5,000 tons of other freight than that handled for the lumber company or controlling interest is principally
2176 of the lumber of those two mills you have spoken of?

Mr. Bower: Principally lumber?

Mr. Cowan: Yes.

Mr. Bower: No, it is not. There is a large percentage of that that is stave bolts and split staves.

Mr. Cowan: You will be requested, no doubt—you are going to request them all to file these commodity statements which have been spoken of?

Examiner Burchmore: Yes.

Mr. Cowan: So I will not go into it.

Examiner Burchmore: You have heard this request, Mr. Walter?

Mr. Walter: Yes.

Examiner Burchmore: I wish you would furnish one for each of your companies, and also the map.

Mr. Walter: Yes, a blue print.

Examiner Burchmore: Or an ink map, either one.

Mr. Walter: I do not know that I understand you. You have joint rates on yellow pine lumber through to interstate destinations?

Mr. Bower: Yes.

2177 Mr. Walter: If yellow pine lumber is hauled for some other concern than your own, is it not handled at that joint rate?

Mr. Bower: It is, if it goes to interstate points.

Mr. Walter: And no local charge?

Mr. Bower: No local charge, and this man Williams whom I have mentioned, when the rates were first cancelled, when the order of cancellation of the interstate rates was made, in some way was informed of it, and wrote a letter which he sent to me with the request to send it to the Interstate Commerce Commission, but the suspension of the cancellation was made before I received his letter and I did not forward it on. In this letter he stated that he had purchased his timber in that vicinity with the distinct understanding that his interstate movements would move on the joint route and rate, and that he would consider the cancellation of that a great injustice to him because he estimated that he had at least 200 cars a year that would move interstate.

Mr. Walter: For how long a time?

Mr. Bower: I do not think he said. I do not know the extent of his timber holdings.

2178 Mr. Walter: I will ask you whether all the relations of the railroad company and the lumber company are kept separate, and their corporate individuality recognized both by the railroad company and by the lumber company?

Mr. Bower: Yes, sir.

Mr. Coleman: If I understood you correctly, you estimate the weight of your logs at 6,000 pounds per 1,000 feet.

Mr. Bower: I think that was the estimate which was put on them.

Mr. Coleman: How did you arrive at that estimate?

Mr. Bower: Well, I could not say. It has been handed down to us. I may be mistaken about 6,000; it is either 6,000 or 8,000; but when I was asked the question I said 6,000.

Mr. Coleman: Is it your candid opinion that the logs will not weigh more than 8,000?

Mr. Bower: I do not believe they would, although I never saw a pine log weighed in my life.

Mr. Coleman: Never made the test?

Mr. Bower: Never made the test, and we have no track scales, and it is estimated weights throughout.

Mr. Coleman: Then you will raise your estimate to 8,000?

Mr. Bower: Well, I am hardly competent to say.

2179 Examiner Burchmore: When you return to your office, if you should discover your testimony is incorrect and you find it should be 8,000, you will write a letter to the Commission?

Mr. Bower: Yes.

Mr. Walter: I think he said 8,000.

Mr. Bower: My impression is I said 6,000, when I was asked the question.

Mr. Coleman: I think if you will cause a test weight to be made of logs, you will find even in the shortleaf territory they will weigh in excess of 10,000 pounds.

Examiner Burchmore: You might advise the Commission further in that respect by any statement you care to make as to the weight of logs, Mr. Bower.

Mr. Bower: All right. I am liable to be mistaken about that. I say offhand I do not know what logs do weigh.

(Witness excused.)

2180 *Groveton, Lufkin & Northern Railway.*

J. C. ANDERSON, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: You are an officer of the Groveton, Lufkin & Northern Railway?

Mr. Anderson: Yes, sir; vice-president.

Examiner Burchmore: Are you an officer of any lumber company, and if so, what company and what office?

Mr. Anderson: Trinity County Lumber Company, manager.

Examiner Burchmore: Where are the mills of the Trinity County Lumber Company located?

Mr. Anderson: They are located near Groveton, just across the railroad tracks from the town of Groveton.

Examiner Burchmore: I understand the line of the Groveton, Lufkin & Northern Railway extends from Lufkin in the State of Texas, where a connection is made with the St. Louis, Southwestern and Houston East & West Texas into Eastern Texas, through the town known as Vair——

Mr. Anderson: It is the junction; there is no town there.

Examiner Burchmore: Yes, a junction point with the Texas Southeastern.

2181 Mr. Anderson: Yes, sir.

Examiner Burchmore: To Groveton, the other terminus, where a junction is made with the Missouri, Kansas & Texas system.

Mr. Anderson: Yes, sir; that is correct.

Examiner Burchmore: The mill you stated is located at Groveton?

Mr. Anderson: Near Groveton. The Missouri, Kansas & Texas divides the place. Our mill is located on one side of the railroad and the town proper and court house, stores and business of Groveton is on the other side.

Examiner Burchmore: Your mill is located very close to the right of way of the M. K. & T.?

Mr. Anderson: I should judge nearly a quarter of a mile, if not quite. Our lumber yards run up almost to the right of way of the M. K. & T. The mill is on the far side.

Examiner Burchmore: Where is your planing mill?

Mr. Anderson: It is also on the far side, about the same distance from the M. K. & T. as the saw mill.

Examiner Burchmore: And where is your loading platform?

Mr. Anderson: At the planing mill and west of the planing mill, all about the same distance from the main line of the M. K. & T.

2182 Examiner Burchmore: The place where the cars are actually loaded is about one thousand feet from the main line of the M. K. & T.?

Mr. Anderson: I should judge it was two thousand feet. I never measured it, but it is not less than a quarter of a mile.

Examiner Burchmore: When was this mill at Groveton opened?

Mr. Anderson: About twenty-nine years ago, in 1882, to be exact, in the spring.

Examiner Burchmore: Was it then operated by the Trinity County Lumber Company?

Mr. Anderson: Yes, sir.

Examiner Burchmore: When was this railroad begun?

Mr. Anderson: The Groveton, Lufkin & Northern?

Examiner Burchmore: Yes.

Mr. Anderson: In the spring of 1907.

Examiner Burchmore: The first part of the railroad was constructed?

Mr. Anderson: Yes, sir.

Examiner Burchmore: Then there was no railroad there at all until 1907?

2183 Mr. Anderson: Yes, sir, there was a railroad there twenty-five years ago.

Examiner Burchmore: A part of the present line of the railroad?

Mr. Anderson: No, sir; no part of it.

Examiner Burchmore: Just tell me about that without my asking the questions.

Mr. Anderson: The Trinity County Company was logging its mill from the south of the M. K. & T. railroad with a narrow gauge railroad. In the spring of 1907 it was decided to build an outlet for the product of the mill because they were having a good deal of trouble with car shortage and they were shut out from a good many markets on account of not being able to get freight rates, and they began the construction of what is now the Groveton, Lufkin & Northern Railway. It was built during the years of 1907 and 1908; it was opened up as a railroad—if you will allow me to explain it in my own words I can possibly save you some time. It was opened for traffic on the last day of November two years ago, 1908. The Trinity County Lumber Company at that time owned twenty miles of logging road and still owns them and is still operating them logging the mill, but it has no connection whatever with the

2184 Groveton, Lufkin & Northern Railway, and no part of the material or equipment that the Trinity Lumber Company owned ever went into the Groveton, Lufkin & Northern.

Examiner Burchmore: That is on the other side of the M. K. & T.

Mr. Anderson: No. About the time we began building the Groveton, Lufkin & Northern we exhausted the timber to the south of the mill and began operating with a standard gauge road north of the M. K. & T. track.

Examiner Burchmore: Towards Lufkin?

Mr. Anderson: Well, we first went off in a northerly direction and cut out a belt of timber that we had been operating in for a couple of years and we are now operating directly east of the town of Groveton and the mill and the lumber company still owns the old logging road, the rails and cars and engines and everything that was connected with it. No part of it ever went into the building of the Groveton, Lufkin & Northern Railway. That was a proposition that was built new from the start.

Examiner Burchmore: But the old logging road was taken up and a new one constructed?

2185 Mr. Anderson: We are changing those roads constantly; yes, sir.

Examiner Burchmore: Was the main line of the Groveton, Lufkin & Northern Railway availed of by the Trinity County Lumber Company for the movement of logs?

Mr. Anderson: We run our logs over a mile and a half of the Groveton, Lufkin & Northern railroad just before we get to the edge of town.

Examiner Burchmore: And what compensation is paid for that?

Mr. Anderson: We have never paid any. There has been a contract contemplated and talked of, but it never has been reduced to writing or enforced; it is only recently, beginning about the first of the month, that we began operating that branch. We did after the first eleven months of this year log about four miles, or to be exact about three and one-half miles over the tracks of the road cutting out a little timber that we had a short time lease on. We ran over the Groveton, Lufkin & Northern three and a half miles for the first eleven months of this year. That track has been taken up and we are now running over about a mile and a half over the Groveton, Lufkin & Northern tracks. We do that more to avoid

2186 a grade crossing. We have our old logging road parallel with the main line of the Groveton, Lufkin & Northern this distance, and could still take our logs to the mill without going on to the tracks of the Groveton, Lufkin & Northern, but in order to avoid putting in a crossing we run over a mile and a half of the tracks of the Groveton, Lufkin & Northern.

Examiner Burchmore: As a matter of fact the use of those tracks entails no considerable added burden on this railroad anyway?

Mr. Anderson: No, we thought very little.

Examiner Burchmore: No- what is the total mileage owned by the Groveton, Lufkin & Northern?

Mr. Anderson: Twenty-one and one quarter miles.

Examiner Burchmore: What is the northern terminus of that line?

Mr. Anderson: Lufkin. We reach Lufkin over thirteen and three quarter miles of the Texas Southeastern, by lease.

Examiner Burchmore: Where do you join the Texas Southeastern?

Mr. Anderson: At Vair. We were building to Lufkin and

2187 the Texas Southeastern people, having a line practically over the route that we would have gone, made a proposition to us to use their tracks from this junction point, and we did. The basis of that contract is that we pay three per cent on the fixed value of their thirteen and three-quarter miles of track, and we pay our proportion of the maintenance on a wheelage basis.

Examiner Burchmore: Is that contract filed with the Commission?

Mr. Anderson: Yes, sir, I think so. I know it is filed with the State Commission and I am sure it is with the Interstate Commerce Commission: Is that right?

Mr. Helmick: I think not with the Interstate Commerce Commission.

Mr. Anderson: I do not know, it is a state proposition. I do not known whether the Interstate Commerce Commission asked for it or wanted it.

Mr. Garwood: We will file it if it is not filed.

Examiner Burchmore: Is the Texas Southeastern understood to be owned by any lumber company?

Mr. Anderson: I think the ownership is something like ours; it is owned by the people who own and control the Southern
2188 Pine interests, that is my impression. I have not any information on that. They have a mill on the Houston East & West Texas at Dibell.

Examiner Burchmore: Are there any branch lines of this railroad?

Mr. Anderson: The Groveton, Lufkin & Northern?

Examiner Burchmore: Yes, sir.

Mr. Anderson: None, except the branch to our planing mill at Groveton.

Examiner Burchmore: Well, does the Texas Southeastern have trackage rights over your road for any distance?

Mr. Anderson: No, sir; none at all.

Examiner Burchmore: The line of the Texas Southeastern at this point runs in a general east and west direction?

Mr. Anderson: Yes, sir, and they have a number of branches though; they run from Vair up north; they are operating north.

Examiner Burchmore: Up to Lufkin?

Mr. Anderson: Well, that is on the east side of the Neches River—I mean on the west side; they also have a branch which runs off in that direction.

Mr. Garwood: Here is a map of the Texas Commission.

2189 Examiner Burchmore: I correctly understand that that division of the M. K. & T. with which you connect is not a part of its main line, but it is a detached line?

Mr. Anderson: No, it is locally known as the "Katy Orphan." It is a little offshoot. They cut off—Trinity is their nearest point to the main line. They use the I. & G. N. from Trinity to Houston or from Trinity to Mineola.

Examiner Burchmore: I presume your principal connection is the Houston East & West Texas?

Mr. Anderson: Not necessarily. We connect with the Cotton Belt and the Houston East & West Texas at Lufkin and we also do business with the M. K. & T.

Examiner Burchmore: When was this railroad incorporated?

Mr. Anderson: The Groveton, Lufkin & Northern?

Examiner Burchmore: Yes. In 1907?

Mr. Anderson: It was chartered May 15, 1908.

Examiner Burchmore: After the constuction was completed?

Mr. Anderson: Well, it was in course of construction at that time. We began its construction more than a year before, 1907.

Examiner Burchmore: How was the railroad financed?

2190 Mr. Anderson: The Trinity County Lumber Company was the uncle we went to for money.

Examiner Burchmore: What is the total capital stock of the railroad company?

Mr. Anderson: Fifty thousand dollars.

Examiner Burchmore: All issued?

Mr. Anderson: All issued and all paid for.

Examiner Burchmore: Was that issued indirectly in the form of a dividend to the stockholders of the lumber company?

Mr. Anderson: No, it was issued for real money, cash paid in.

Examiner Burchmore: Who paid in that cash?

Mr. Anderson: The stockholders.

Examiner Burchmore: How did they secure the cash?

Mr. Anderson: I cannot tell you. I secured part of it by working for it.

Examiner Burchmore: The stockholders——

Mr. Anderson: It was all paid up in cash and it all went into the treasury of the railroad company.

Examiner Burchmore: The two companies are substantially one in interest, are they not?

2191 Mr. Anderson: To a very large extent.

Examiner Burchmore: Are there any minority holdings in either company which are separate and distinct from the holdings of the other?

Mr. Anderson: Yes, sir; there are five residents of Texas who hold a small interest in the railroad who are not interested in the lumber company.

Examiner Burchmore: They only hold five shares?

Mr. Anderson: One share each for the purpose of qualifying them as directors.

Examiner Burchmore: But all the stockholders of the lumber company own stock in the railroad company?

Examiner Burchmore: And substantially in proportion?

Mr. Anderson: Yes, sir. I might say exactly in proportion except for the five shares I spoke of.

Examiner Burchmore: The officers of the two companies are substantially the same?

Mr. Anderson: They are not. I am the only exception to that. The officers of the lumber company are entirely different from the officers of the railroad company with the exception that I happen to be the manager of the lumber company and vice-president of the railroad company.

2192 Examiner Burchmore: All the officers of the railroad company are either employees or otherwise interested in the lumber company?

Mr. Anderson: No, sir; not at all.

Examiner Burchmore: The contrary is the fact?

Mr. Anderson: Yes, sir; I can give you the history of that if you wish. The officers of the railroad company, Mr. Seaman is president and has no interest in the lumber company. I am vice-president. Mr.

W. J. Helmick is general manager, and up to two months ago W. P. Smith was the auditor and traffic manager of the railroad company. The officers of the lumber company, David Joyce is president, D. J. Batchelder is vice-president, James Stanley Joyce is secretary, and W. A. Remick is treasurer.

Examiner Burchmore: Mr. Seaman is president of the Tremont & Gulf?

Mr. Anderson: Yes, sir.

Examiner Burchmore: What is the weight of the rails in this railroad?

Mr. Anderson: Sixty pounds.

Examiner Burchmore: Steel?

Mr. Anderson: Yes, sir.

2193 Examiner Burchmore: Standard gauge.

Mr. Anderson: Yes, sir.

Examiner Burchmore: Is the road substantially constructed?

Mr. Anderson: It is said to be as good a road as there is in East Texas. I think so and I have been told that by railroad men who have been over it and examined it.

Examiner Burchmore: Is this road as well built as the connecting line of the M. K. & T.?

Mr. Anderson: A great deal better, or than either of our other connections; I do not think I exaggerate when I say it is a better road than the Houston East & West Texas and the Cotton Belt.

Examiner Burchmore: You naturally take pride in that fact?

Mr. Anderson: Well, we endeavored to make a first class road out of it when we built it, and we tried to—the general superintendent of the Houston East & West Texas has stated a number of times that it was a better road than his and better than the I. & G. N.

Examiner Burchmore: It is graded?

Mr. Anderson: Yes, sir.

2194 Examiner Burchmore: Is it ballasted?

Mr. Anderson: No, we have no ballast. We have no rock or gravel in our country. The only ballast or what could be claimed to be ballast is that we put about forty or fifty thousand yards of clay on; it is something I never saw before and I do not know how to describe it. We got it out with a steam shovel and we blasted it out and put it under the road after the contractors got through with it and made a good roadbed.

Examiner Burchmore: What station buildings have you?

Mr. Anderson: We have small stations at Lacey and a station called Helmic and one called Apple Springs. We use the terminal at Groveton of the M. K. & T., and the terminal at Lufkin of the Cotton Belt under lease, for which we pay a substantial consideration.

Examiner Burchmore: Have you any track scales?

Mr. Anderson: Yes, sir; we have a pair of track scales.

Examiner Burchmore: Water tank?

Mr. Anderson: Yes, sir.

Examiner Burchmore: I suppose you have team tracks for less than carload freight?

Mr. Anderson: We have the team tracks of the M. K. & T.
95 at Groveton and the Cotton Belt at Lufkin. We have cotton platforms at the three stations I have mentioned and also iting rooms for passengers.

Examiner Burchmore: How many locomotives does this road n?

Mr. Anderson: One.

Examiner Burchmore: How many does it lease?

Mr. Anderson: None, except in case of accident or emergency. We ve at times rented an engine from the lumber company while our gine was undergoing repairs.

Examiner Burchmore: What other rolling stock have you, and is owned or leased?

Mr. Anderson: We do not lease anything in the way of rolling ock. We have one passenger coach, one combination coach, eight x cars, twenty-one flat cars, a pile driver mounted on a car, one otor car, "Joy Rider" as the Judge said the other day, four hand rs that are used by section men going to work, four push cars and ne steel car that has been used since the road started.

Examiner Burchmore: These box cars, are they used in the local ork?

Mr. Anderson: No. We originally had sixteen of thouse
196 but several of them have been destroyed and we have sold four and the others are used principally in local freight, carrying ackage freight between Groveton & Lufkin.

Examiner Burchmore: You formerly had more than one locomo- ve?

Mr. Anderson: Yes, we had two, but we found as our business in- reased that they were both rather light for the traffic and we sold hem both and bought a new locomotive, I think in August of this ear.

Examiner Burchmore: As a matter of fact did you not have three?

Mr. Anderson: No, we never had but two. We had one locomo- ive about forty thousand pounds weight I should judge of the pas- enger type and one about fifty thousand pounds, ten wheeler that we sed in the main line work.

Examiner Burchmore: While our examiner was on the ground in 1910 he thought he saw three locomotives.

Mr. Anderson: He might have seen—the lumber company have four and he might have mistaken one of theirs for ours, but the road never had but two.

Examiner Burchmore: He writes that you had three locomotives, and all the information he obtained was cheerfully furnished
2197 by Mr. Helmick.

Mr. Anderson: Well, that was an error on somebody's part. We never owned but two and we sold them last spring and bought a sixty-five ton locomotive which is now hauling our train. There is a photgraph of it. (Handing photograph.)

Examiner Burchmore: Do you offer this in evidence?

Mr. Anderson: You can have it if you like. I have several of them.

Examiner Burchmore: As you choose.

Mr. Anderson: I merely offer it to show you we have a pretty good locomotive.

(The paper so offered and identified was received in evidence and thereupon marked Groveton, Lufkin & Northern Exhibit 1, Witness Anderson, received in evidence December 15, 1910, and is attached hereto.)

Examiner Burchmore: The lumber company equipment does not move over this railroad?

Mr. Anderson: Except over the mile and a half we spoke of.

Examiner Burchmore: I think their equipment may be disregarded for the present.

Mr. Anderson: The lumber company's locomotives never
2198 go on the tracks of the railroad company except that mile and a half I mentioned.

Examiner Burchmore: How many section gangs have you?

Mr. Anderson: Three.

Examiner Burchmore: You have three section gangs and four hand cars?

Mr. Anderson: Well, we have an extra one. We were a little liberal when we bought them and we have an extra one.

Examiner Burchmore: Do they also work on the logging road?

Mr. Anderson: No.

Examiner Burchmore: How many station agents or employees have you?

Mr. Anderson: We use a joint agent at Lufkin and Groveton of the Cotton Belt and Katy, respectively. We have a station agent whose office is where the headquarters of the road at Groveton is and he acts as station agent and does all the billing from the planing mill and shipping sheds of the lumber company; and we have an arrangement with the Post Master at two intermediate stations who sells tickets for us on commission. We do not pay them a salary and they
do not handle any money for freight. They are prepay sta
2199 tions so far as freight goes.

Examiner Burchmore: You have one train crew?

Mr. Anderson: We have one train crew.

Examiner Burchmore: Are there any employees of the general offices of the railroad company?

Mr. Anderson: Yes, sir, the general manager and Mr. Helmick, the auditor and car accountant and the station agent I spoke about.

Examiner Burchmore: Those men are paid their entire compensation by the railroad company?

Mr. Anderson: Yes, sir.

Examiner Burchmore: And as a matter of fact perform no service for the lumber company except in their capacity as railroad agents?

Mr. Anderson: That is all.

Examiner Burchmore: By whom is this Trinity County Lumber Company controlled?

Mr. Anderson: It is owned by Chicago people, a few of the stockholders and small holdings are scattered. One lives in California and one in Clinton, Iowa, but the majority of stock is held in Chicago.

Examiner Burchmore: Is it not controlled by the South-
2200 ern Investment Company?

Mr. Anderson: No, sir. They have nothing to do with it. I can give you the stockholders if you wish.

Examiner Burchmore: Well, no; further than to ask if Mr. William T. Joyce or William T. Joyce & Company do not own a majority?

Mr. Anderson: The William T. Joyce Company, an Illinois corporation, owns a majority of the stock of the Trinity County Lumber Company.

Examiner Burchmore: And the rest is owned by interests allied to that company?

Mr. Anderson: No, not at all. There are a number of people who own stock who are in no wise connected with the company. Mr. Batchelder is a large stockholder and has no connection with it. Mr. Earl of Stockton, California, is a large stockholder. Mrs. Fall, I think, lives at Clinton, Iowa; at any rate she formerly came from there. I think she holds one hundred and fifty shares of stock, I am sure she does.

Examiner Burchmore: Is this railroad a part of any system of railroads?

Mr. Anderson: No.

2201 Examiner Burchmore: It is not allied to any other tap line?

Mr. Anderson: Not at all.

Examiner Burchmore: Do you maintain a regular train service, and, if so, give the particulars.

Mr. Anderson: We run one train a day each way leaving Groveton in the morning and arriving at Lufkin about eleven o'clock, connecting with the Houston East & West Texas both north and south, leaving there after the arrival of their train and reaching Groveton at three thirty in the afternon, connecting with the M. K. & T. train going west in the afternoon. We take passengers from the M. K. & T. in the morning and connect with them at Groveton in the morning and afternoon and we connect with the Houston East & West Texas at Lufkin both north and southbound trains, they arrive there about noon about the same time.

Examiner Burchmore: Do you issue a time schedule?

Mr. Anderson: Yes, sir.

Examiner Burchmore: You may file a copy of that if you desire.

Mr. Anderson: I would be pleased to.

Examiner Burchmore: This is a mixed train?

2202 Mr. Anderson: Yes, sir, we haul one pasenger coach and one combination passenger and baggage, and one coach that carries passengers and baggage and express.

Examiner Burchmore: Do you carry the mail?

Mr. Anderson: Yes, sir.

Examiner Burchmore: Is there any freight carried on this train?

Mr. Anderson: Yes, sir; all the freight is carried on that train.

Examiner Burchmore: You do not run any other train?

Mr. Anderson: No, sir; that is the reason we bought the larger locomotive, so we could handle all the business with one train.

Examiner Burchmore: Does it make good speed?

Mr. Anderson: Yes, sir, they run fast enough.

Examiner Burchmore: What is the extent of your passenger traffic?

Mr. Anderson: For the fiscal year ending last June, the 30th, we carried about nineteen thousand passengers, and the business——

Examiner Burchmore: All revenue passengers?

Mr. Anderson: Yes, sir. And the business for the five
2203 months of the present fiscal year would indicate a passenger traffic of about twenty-four thousand for this year.

Examiner Burchmore: What revenue from that traffic?

Mr. Anderson: Last year it was twelve thousand dollars.

Examiner Burchmore: Any passengers carried free?

Mr. Anderson: No, sir; except railroad employees that are entitled to a pass.

Examiner Burchmore: Do the mill employees pay fare?

Mr. Anderson: They do if they travel on our train?

Examiner Burchmore: Do you issue any annual passes to the officers of other railroad companies?

Mr. Anderson: Yes, sir. We are extremely liberal with them.

Examiner Burchmore: I suppose you receive passes liberally?

Mr. Anderson: Well, not liberally. We have I think three in our office. I have a pass, Mr. Helmick has one, and Mr. Smith, who was formerly our traffic man, had a pass.

Examiner Burchmore: And you gentlemen use those passes?

Mr. Anderson: I do, and I presume they do.

Examiner Burchmore: Are the passes you issue ever presented by the holders?

Mr. Anderson: Oh, yes.

2204 Examiner Burchmore: We have one or two companies that issue passes who could not induce the holders to ride on them.

Mr. Anderson: They come to see us. One man said they do not come to them, but they do come to see us.

Examiner Burchmore: What is the total value of your freight movement?

Mr. Anderson: In tons or money?

Examiner Burchmore: Well, I think, if I remember the figures last year our tonnage was sixty thousand seven hundred and twenty-eight tons.

Examiner Burchmore: That is a substantial increase over the preceding year, as I understand?

Mr. Anderson: Yes, sir, we only had it part of the year; we only had been in operation seven months before that.

Examiner Burchmore: What percentage of that tonnage is furnished by the Trinity County Lumber Company?

Mr. Anderson: I cannot give you that in tons, but I can give the money. The revenue from that sixty thousand tons was fifty-eight thousand dollars in round numbers. Of that the lumber company
was forty-three thousand dollars and the merchandise, mail,
2205 express, baggage, demurrage, passengers and other revenue was $25,400. That would indicate about thirty-five per cent of business outside of lumber.

Examiner Burchmore: That makes $68,000?

Mr. Anderson: Well, I took this hurriedly from our books. I will have to correct that and will give it to you and file it later.

Examiner Burchmore: I suggest you advise the Commission of any corrections which should be made in the figures you have testified to. I would make that same suggestion to any witness who appears, if you find in the transcript you are quoted as saying something that is incorrect or inaccurate, you should advise the Commission of it.

Mr. Garwood: There is the exhibit we had printed, which is attached to the petition in the case.

Examiner Burchmore: There are figures already given then in this record?

Mr. Garwood: Yes.

Mr. Anderson: I think you have all the figures in our annual report.

Examiner Burchmore: Well, we have, but for the benefit of counsel I think some of these final figures should be stated into the
2206 record. Counsel have not access to all our annual reports. What is the nature of your carload traffic other than lumber?

Mr. Anderson: Well, we haul cotton and wagons and staves and any merchandise that is offered for shipment, feed, hay, grain and so forth.

Examiner Burchmore: What switching services do you perform, if any?

Mr. Anderson: Our switching service is very small. I think we switched a few cars of wood out from the saw mill for the Trinity County Lumber Company, I think about two hundred dollars last year was the revenue from that.

Examiner Burchmore: Do any of your passengers travel under coupon tickets or other forms of tickets that are signed by other railroads?

Mr. Anderson: I think not. I think we only have local tickets.

Examiner Burchmore: You do have local tickets?

Mr. Anderson: Yes, sir.

Examiner Burchmore: And some passengers pay cash fare on the train?

Mr. Anderson: Oh, yes; our conductor collects it.

2207 Examiner Burchmore: Have you filed with the Interstate Commerce Commission any local rates applying over your line applicable to interstate movement?

Mr. Anderson: Yes, sir.

Examiner Burchmore: You are also parties to joint through rates?

Mr. Anderson: Yes.

Examiner Burchmore: Joint through rates on class traffic?

Mr. Anderson: Yes, sir.

Examiner Burchmore: And also on lumber and forest products?

Mr. Anderson: Yes, sir.

Examiner Burchmore: With respect to these class rates, do the Texas common point rates apply from stations on your line or are you in other territory?

Mr. Anderson: Yes, they do.

Examiner Burchmore: With respect to lumber, are the joint rates on lumber from the stations on your line the same as the rates published from group stations in that vicinity on other roads?

Mr. Anderson: Yes, sir.

Examiner Burchmore: You receive divisions on joint lum-
2208 ber rates?

Mr. Anderson: Yes, sir.

Examiner Burchmore: What are the divisions you receive on traffic in lumber interchanged with the Houston East & West Texas?

Mr. Anderson: Do you mean what amount we receive?

Examiner Burchmore: Yes, as a division.

Mr. Anderson: I am not right sure about that, but I think about three cents, three to five. I do not think there is anything less than three; there may be some few points where we get less than three cents.

Examiner Burchmore: I think you get two to some points.

Mr. Anderson: Possibly we do. How is that, Mr. Helmick?

Mr. Helmick: One and one-half cents to five points.

Examiner Burchmore: How about the M. K. & T.?

Mr. Anderson: They vary from as low as one cent to as high as five.

Examiner Burchmore: I thought you got a uniform division with the M. K. & T. of four cents?

Mr. Anderson: No, I wish we did.

Examiner Burchmore: That has never been the situation?

Mr. Anderson: No.

2209 Examiner Burchmore: How about the St. Louis Southwestern?

Mr. Anderson: Our division varies there. That probably runs the same as the H. E. & W. T. I am not right clear on the details of these divisions. I may make an error, but it will not be a very grave one if I do.

Examiner Burchmore: I have a division sheet marked St. Louis Southwestern No. 1561, dated January 2, 1909, basis for dividing through rates between Mississippi and Missouri River points and points in defined territories, and stations on the Groveton, Lufkin & Northern, and this division sheet shows a uniform division to your line of four cents by the St. Louis Southwestern.

Mr. Anderson: If you want the details of that you will have to wait until Mr. Helmick or Mr. Smith are on the stand. They are familiar with them and I am not, only in a general way.

Examiner Burchmore: Are there any other saw mills on your line?

Mr. Anderson: Yes, sir; two.

Examiner Burchmore: Where are they and what is the extent of their traffic?

Mr. Anderson: They ship from the station called Helmic,
2210 about twelve miles from Groveton; one is located about one hundred or two hundred yards from the main line with a switch into their yard and the other man hauls his lumber into

our side track and loads it. One mill is owned by Wood & McGee. We have a side track into their mill. The other mill is not now in operation. It has been, however, since we have been operating up to three or four months ago.

Examiner Burchmore: In the case of shipments of lumber which move out from your road through Groveton and over the M. K. & T., the only service that you perform under these divisions is a haul of one or two thousand feet over to that road?

Mr. Anderson: You mean from our planing mill to the M. K. & T. tracks?

Examiner Burchmore: Yes.

Mr. Anderson: We haul it something over a mile and weigh it and mill it.

Examiner Burchmore: You haul it somewhere else in order to weigh it?

Mr. Anderson: No, as I remember it, it is seven thousand feet from the Junction of the M. K. & T. to the end of our planing mill tracks.

2211

Examiner Burchmore: I thought you said it was about two thousand feet?

Mr. Anderson: I said directly across from the station of the M. K. & T. to our planing mill.

Examiner Burchmore: Well, I do not understand the lay of the land.

Mr. Anderson: I can show that to you.

Examiner Burchmore: Never mind that now, because we have called for a map.

Mr. Garwood: We have a map of the terminals here.

(The witness then explained the map to the Examiner.)

Mr. Garwood: We offer the maps showing the terminals of the Groveton, Lufkin & Northern at the town of Groveton and desire leave to withdraw the originals and file duplicates.

(The maps so offered and identified were received in evidence, and thereupon marked Groveton, Lufkin & Northern Exhibits Nos. 2 and 3, Witness Anderson, received in evidence December 15, 1910, and are attached hereto.)

Examiner Burchmore: The mill at Groveton is on the opposite side of the M. K. & T. from your line entrance into Groveton?

2212

Mr. Anderson: Yes, sir.

Examiner Burchmore: You cross the M. K. & T. at that point and have trackage rights for some distance over its line?

Mr. Anderson: We have trackage rights from here (indicating).

Mr. Garwood: When you say here use some expression that will indicate to the stenographer what it is.

Mr. Anderson: We have trackage rights for one mile from the station at Groveton.

Examiner Burchmore: And also have the joint use of the station?

Mr. Anderson: And all their terminals.

Examiner Burchmore: What is the length of your haul on lumber from the mill moving out over the M. K. & T.?

Mr. Anderson: I should say a mile and a quarter.

Examiner Burchmore: In that mile and a quarter haul you stop and weigh the lumber?

Mr. Anderson: Stop and weigh the lumber and deliver it to them on this interchange track.

Examiner Burchmore: As indicated on the map?

2213 Mr. Anderson: Yes, sir. Our engine hauls the cars out here, goes down to the scales and weighs them and shoves them back, and the M. K. & T. trains take them on the interchange track.

Examiner Burchmore: Who issues the bills of lading on outbound shipments of lumber moving out over the M. K. & T.?

Mr. Anderson: The Groveton, Lufkin & Northern——

Examiner Burchmore: And that bill of lading shows the town of Groveton as the point of origin?

Mr. Anderson: No, it shows Atmar. The end of the line there is called Atmar to distinguish it from Groveton. The agent at Groveton has nothing to do with billing our lumber. That is done by our station agent.

Examiner Burchmore: In the case of lumber moving in the other direction over your line you haul the lumber from the mill and weigh it on the M. K. & T. track?

Mr. Anderson: What other direction?

Examiner Burchmore: Through Lufkin?

Mr. Anderson: We weigh it on our own tracks. We do not weigh anything on the M. K. & T. tracks. They have no

2214 scale.

Examiner Burchmore: I thought the Katy had the track.

Mr. Anderson: No, it is the right of way; if you will notice, the scales are about the middle of our half of that interchange track, and we put the scales in.

Examiner Burchmore: You weigh it on that same scale?

Mr. Anderson: Yes, sir and carry it down to Groveton where it is put on this spur and that is where our train starts from in the morning.

Examiner Burchmore: Marked "Front of Katy depot"?

Mr. Anderson: Yes.

Examiner Burchmore: In the case of a shipment which moves out through Lufkin instead of through Groveton, you weigh it in the same manner on the same scales?

Mr. Anderson: Yes.

Examiner Burchmore: And then haul it in the opposite direction to the point of interchange?

Mr. Anderson: Yes.

Examiner Burchmore: Does this company make an effort to comply with all the Federal and state laws regulating common carrier railroads?

Mr. Anderson: We do.

Examiner Burchmore: What is the valuation of this road,
2215 including or excluding equipment?

Mr. Anderson: Including equipment I do not know what the value is, but we paid $487,000 for it.

Examiner Burchmore: That is what it cost you?

Mr. Anderson: That is what it cost us, yes.

Examiner Burchmore: And you constructed it?

Mr. Anderson: We bought it, yes.

Examiner Burchmore: The lumber company built it?

Mr. Anderson: The lumber company built it and turned it over to the railroad company as a going concern. We bought the railroad one afternoon and went to operating it the next morning carrying passengers and freight.

Examiner Burchmore: Did the lumber company operate it previous to the purchase?

Mr. Anderson: No.

Examiner Burchmore: Then you instituted the service when you bought the road?

Mr. Anderson: Yes.

Examiner Burchmore: Did the lumber company make a profit on this railroad?

Mr. Anderson: A very little; yes, sir.

Examiner Burchmore: It sold it substantially at cost?

2216 Mr. Anderson: Yes, sir. It cost the lumber company in round figures $400,000 to build.

Examiner Burchmore: Did you give the capitalization of this company?

Mr. Anderson: $50,000.

Examiner Burchmore: What bonds has it?

Mr. Anderson: $437,000 and the two make $487,000.

Examiner Burchmore: The cost of the road?

Mr. Anderson: The cost of the road.

Examiner Burchmore: Who holds those bonds, the stockholders?

Mr. Anderson: I think they are owned by the Trinity County Lumber Company insofar as I know.

Examiner Burchmore: What do they pay on those bonds?

Mr. Anderson: Five per cent.

Examiner Burchmore: Has the road a surplus?

Mr. Anderson: No. We have managed to accumulate, as the gentleman said a while ago, a small deficit.

Examiner Burchmore: Have you paid any dividends?

Mr. Anderson: Never.

Examiner Burchmore: Will you furnish, Mr. Garwood, a map such as has been called for from other roads?

2217 Mr. Garwood: Yes, sir.

Examiner Burchmore: And make it a small map, inasmuch as the terminals at Groveton are fully shown on these maps, that map may be drawn to a small scale.

Mr. Anderson: Would this railroad map of Texas answer your purpose?

Examiner Burchmore: It would perhaps, but I have here a draft of a letter which was proposed to be sent to the tap lines, or handed

to them, describing the map that was desired, and I will let you read it, although we may not send such a letter, but this will make clear to you what we want, and if you will return this after you have examined it. Are there any small saw mills located a short distance from this line which team their lumber over to your road?

Mr. Anderson: One, but it is not in operation at the present time.

Examiner Burchmore: As a matter of fact that lumber mill cannot operate to a financial advantage in competition with a mill that is located on a railroad, can it?

Mr. Anderson: We do not come in competition with them at all.

Examiner Burchmore: Well, they might come in compe-
2218 tition with you. I suppose you are so much larger?

Mr. Anderson: No, I do not think so. We do business with those people and frequently buy their lumber and give them every facility as a railroad for getting to the market that we have ourselves.

Examiner Burchmore: I think that is all.

Mr. Garwood: Mr. Anderson, was your road ever personally inspected by the Railroad Commission of Texas?

Mr. Anderson: Yes, sir.

Mr. Garwood: What Commissioners inspected it?

Mr. Anderson: Judge Storey and Mr. Colquitt, the present Governor-elect.

Mr. Garwood: Did they go over the full length of the road for the express purpose of ascertaining whether it was a railroad entitled to do business as a common carrier and to be recognized as such under the laws of the State of Texas?

Mr. Anderson: I so understood it. We made a date with them to examine the road for that purpose and they did so.

Mr. Garwood: After that inspection did you file a formal application with the Commission to be recognized as a railway?

Mr. Anderson: We did, either immediately before that in-
2219 spection or directly after, I do not recall the date.

Mr. Garwood: In pursuance of that application upon the part of the railway and the inspection by the railway Commissioner it was recognized by formal order by the Commission?

Mr. Anderson: Yes, sir.

Mr. Garwood: In that connection, your Honor, we offer a copy of our formal application to the Commission to be recognized as a common carrier.

(The paper so offered and identified was received in evidence and thereupon marked Groveton, Lufkin & Northern Exhibit No. 4. Witness Anderson, received in evidence December 15, 1910, and is attached hereto.)

Examiner Burchmore: That application was granted?

Mr. Anderson: Yes, sir.

Mr. Garwood: And in that further connection we offer the formal order of the Commission as set out on page 214 of the Eighteenth Annual Report of the Railroad Commission of Texas. Shall I read it? It is very short:

"Groveton, Lufkin & Northern Railway. In the matter of the

application of Groveton, Lufkin & Northern Railway Company for recognition by this Commission as a common carrier of freight
2220 and passengers with the duties and privileges incident thereto as prescribed by law, in view of the allegations contained in said application, and of the fact that the line of railway of said company has been duly inspected by this Commission and found to be in the condition alleged, properly constructed, equipped to perform the duties of such carrier, it is ordered by the Railroad Commission of Texas that said application of the Groveton, Lufkin & Northern be, and the same is hereby granted, and said company is recognized by this Commission as subject to its orders, rules and regulations and entitled to participate in through rates of freight applying on class and commodities to or from points on its lines of railway. Circular No. 2951, effective November 18, 1908."

Mr. Anderson: And I will say we began operating on the 30th of that same month.

Mr. Garwood: Did you thereafter make an application to the Railway Commission for the issuance of bonds?

Mr. Anderson: We did.

Mr. Garwood: Under the laws of the state bonds can only be issued, that is, bonds which carry a lien upon the corpus of the property, after application to the Commission made in ac-
2221–2 cordance with its rules and regulations?

Mr. Anderson: I so understood it.

2223 Mr. Garwood: That application under the rules of the Commission sets out the corporate proceedings, showing the requisite authority for the issuance of the bonds, and also sets out in detail your acquisition of your right of way, how it is held, all contracts of construction, your alignment map, your profile and all material facts tending to show the actual cost of the construction.

Mr. Anderson: Yes.

Mr. Garwood: You made that application?

Mr. Anderson: We furnished all that information to the engineer of the Commission.

Mr. Garwood: After that application was filed, did the official engineer of the Railroad Commission of Texas personally inspect your railway?

Mr. Anderson: He did.

Mr. Garwood: Did he carefully go over your entire properties, making a minute examination into all of its corporate matters, contracts, records and so forth?

Mr. Anderson: He did; and in addition to that we threw open the books of the Trinity County Lumber Company to him, that he might ascertain the amounts that we paid for everything that
2224 went into the construction of the road. It was not incumbent upon us to do that, but we did it to enable him to get at the facts.

Mr. Garwood: Having made this inspection, did he file with the Railway Commission his reports and valuation of the road?

Mr. Anderson: Yes, sir.

Mr. Garwood: Have you got a copy of that report?

Mr. Anderson: I have.

Mr. Garwood: Have you it with you? I wish you would find it so I may introduce it in evidence.

(Paper produced.)

Mr. Garwood: At this point we introduce in evidence the official report of R. D. Parker, official engineer of the Railroad Commission of Texas, valuing the Groveton, Lufkin & Northern Railway.

(The paper so offered and identified was received in evidence and thereupon marked Groveton, Lufkin & Northern Exhibit No. 5, witness Anderson, received in evidence December 15, 1910, and is attached hereto.)

Mr. Garwood: I will ask you, Mr. Anderson, if that valuation made by the official engineer was not raised to some extent, and if the Railroad Commission of Texas did not find that you were
2225 entitled to a slightly greater valuation than the engineer made?

Mr. Anderson: Yes, sir.

Mr. Garwood: Did they make their order allowing the issuance of bonds by the railway after that?

Mr. Anderson: Yes, sir.

Mr. Garwood: We here introduce the order of the Railroad Commission of Texas, of date December 31, 1909.

(The paper so offered and identified was not marked.)

Examiner Burchmore: What amount of bonds does that cover?

Mr. Garwood: $437,000. I will state in that connection that under the rules of the Commission the carrier is permitted to issue in stocks and bonds together the amount of the value of the road. Having found the road to be of the value of $487,000, and having $50,000 of stock, they authorized the issuance of $437,000 in bonds.

Examiner Burchmore: Then the finding of the Commission was that this road was worth exactly what it cost?

Mr. Anderson: No, I did not say that. I said the road cost us about $400,000, but the Commission allowed us a valuation of $487,000.

Examiner Burchmore: I thought you said you paid the lumber company $487,000 for it.

2226 Mr. Anderson: We did, the railroad company did.

Examiner Burchmore: Then the lumber company made $87,000.

Mr. Anderson: No, we did not.

Examiner Burchmore: I do not follow the figures.

Mr. Anderson: I think the Commission had in mind at the time the depreciation on the bonds of at least ten per cent, which would have been $43,000.

Examiner Burchmore: The bonds did depreciate?

Mr. Anderson: If we were to undertake to sell them, they probably would. The face value was $437,000, but the lumber company took them as worth 90 cents.

Mr. Cowan: On our side it is admitted that the Railroad Commission allows for a lot of real estate and engineering expenses, and

other expenses, so it generally runs ten to 15 per cent, and sometimes more than the actual cost of the property, when you come to figure it out.

Examiner Burchmore: That seems to be a sufficient explanation.

Mr. Anderson: I can make it plainer——

Examiner Burchmore: I think it is plain. I think we all understand it.

Mr. Anderson: The lumber company figured we got about
2227 $443,000 for the road, taking the depreciation of bonds into account, and it cost us about $400,000, so we made about eight per cent, which is not considered unreasonable, from the standpoint of construction. We took the place of a construction company.

Examiner Burchmore: That is a pretty good profit to make on work you were doing for yourselves.

Mr. Anderson: We were two years in doing it, and figured no interest on the cost and labor which was put into that two years, and there are a number of items.

Examiner Burchmore: I think that is enough on that point.

Mr. Garwood: I will state in that connection that the Commission sometimes allows in its valuation a small per cent for what it calls a franchise value.

Mr. Cowan: That is only in towns and streets.

Mr. Garwood: No, not at all; on the proposition as a whole, and it did so in this particular case, I will add, at my especial request. The order of the Commission dated Austin, Texas, December 31, 1909, authorizing the issuance of those bonds, is a short one, and I have it attached to the copy of the petition here.

Mr. Cowan: Just state it is the order as shown in the copy
2228 of the petition.

Examiner Burchmore: I would not offer it. I think we can find it in our records.

Mr. Garwood: I will say as attached to the copy of the petition of the Groveton, Lufkin & Northern, marked Exhibit C.

Examiner Burchmore: Then it is already in the record?

Mr. Garwood: Yes, sir. I wanted to call the attention of the Commission to the very satisfactory recitals in this order as to the nature and character of our road, the fact that it is being operated in good faith as a carrier.

Examiner Burchmore: Well, we have it already.

Mr. Garwood: In that connection we offer a copy of the deed of trust, securing these bonds.

Examiner Burchmore: Is that important to offer? We do not want to cumber up the record.

Mr. Garwood: It will not be copied. I wanted the record complete.

(The paper so offered and identified was received in evidence and thereupon marked Groveton, Lufkin & Northern Exhibit No. 6. witness Anderson, received in evidence December 15, 1910, and is attached hereto.)

Mr. Garwood: You said the Trinity County Lumber Com-
2229 pany had been in operation for 25 years, or more, before this railroad was built?

Mr. Anderson: Yes.

Mr. Garwood: Does your road go through a farming section to any extent?

Mr. Anderson: Yes, sir.

Mr. Garwood: To what extent?

Mr. Anderson: The Trinity County is one of the oldest sections, I believe, of east Texas. We are not very far from the Nacogdoches, which was at one time an outpost of civilization. I suppose Trinity County has been settled up as long as any county. There are men living in the county that is served by our road, middle aged men, who were born there.

Mr. Garwood: Have you any portion of your right of way enclosed by a legal hog-proof fence?

Mr. Anderson: Yes, sir.

Mr. Garwood: How much of it?

Mr. Anderson: I think about seven miles. Allow me to correct an error I made a while ago in giving the division of the revenue. I stated it was a total of $58,000, $43,000 for lumber. That should have been $33,000.

Mr. Garwood: How many farms did you go through when
2230 you were acquiring your right of way for this road?

Mr. Anderson: We bought right of way, I think, through 12 or 13 farms in the 21 miles.

Mr. Garwood: What is the width of your right of way?

Mr. Anderson: 100 feet.

Mr. Garwood: You have complete fee simple deeds to all of that right of way?

Mr. Anderson: Yes, sir.

Mr. Garwood: Do you own that in fee simple title or is it the ordinary right of way deed?

Mr. Anderson: We are owners in fee simple.

Mr. Garwood: Fee simple title?

Mr. Anderson: Yes, sir.

Mr. Garwood: Do you do an express business?

Mr. Anderson: Yes.

Mr. Garwood: With Wells Fargo & Company?

Mr. Anderson: Wells, Fargo, yes, sir.

Mr. Garwood: Do you carry the mail?

Mr. Anderson: Yes, sir.

Mr. Garwood: I will ask you what facilities you give in the way of the carriage of mail to people along that line that did not theretofore exist.

2231 Mr. Anderson: We carry mail to two post offices immediately on the line of road, and we supply from Apple Springs, a station about half way between Groveton and Lufkin, six or seven Star Route offices. The mail is distributed from Apple Springs to those offices in the country.

Mr. Garwood: From Groveton the Houston market is reached

either via the M. K. & T. and the I. & G. N. or the M. K. & T. and the Houston, East & West Texas, or by the Groveton, Lufkin & Northern and the Houston, East & West Texas?

Mr. Anderson: Yes.

Mr. Garwood: State what commercial business you do for the citizens of Groveton from Houston.

Mr. Anderson: From Houston into Groveton?

Mr. Garwood: From Houston into Groveton?

Mr. Anderson: I do not know——

Mr. Garwood: I do not mean the figures, but——

Mr. Anderson: I have not any means of knowing what the other road does, but we have the impression we do about half of the business of the town.

Mr. Garwood: What is the size of that town?

Mr. Anderson: About 5,000.

Mr. Garwood: It is not merely a mill town?

2232 Mr. Anderson: No, sir, it is the county seat and there are more people who live there who are not directly connected with the lumber company than people who are.

Mr. Garwood: In other words, it is a thriving town, with banks, commercial establishments and the ordinary incidents of a thriving town?

Mr. Anderson: I think so.

Mr. Garwood: Is it not a fact, Mr. Anderson, that you do a very large express and package freight business from Houston via the H. E. & W. T. to Lufkin and thence down your road to Groveton?

Mr. Anderson: I think we do the bulk of it.

Mr. Garwood: You think you do the bulk of it?

Mr. Anderson: Yes.

Mr. Garwood: Why do you think you do?

Mr. Anderson: We make better time than any other line into Groveton. We get express and freight because we make better time to Groveton than they do by either of the other routes.

Mr. Garwood: Freight of that character delivered to the Houston, East & West Texas late in the afternoon at Houston gets to Groveton via the H. E. & W. T. and your road at what time?

2233 Mr. Anderson: 3:30 the next afternoon.

Mr. Garwood: How does that compare with the service rendered by the other lines into Groveton?

Mr. Anderson: They generally get it in about two or three days.

Mr. Garwood: And you get there the next day?

Mr. Anderson: Yes, sir.

Mr. Garwood: Is that business increasing?

Mr. Anderson: Constantly. Our records show that.

Mr. Garwood: And is it relatively increasing more than the lumber business is increasing?

Mr. Anderson: The general business from the public, independent of the lumber business, is increasing all the time.

Mr. Garwood: Increasing all the time, and in a greater ratio than the lumber business?

Mr. Anderson: Yes, sir.

Mr. Garwood: You transport cotton from your line?

Mr. Anderson: Yes, sir.

Mr. Garwood: How many bales last year?

Mr. Anderson: I do not recall the figures for the last season. This year we have handled about 2,200 or 2,300 bales.

2234 Mr. Garwood: Of this season's cotton?

Mr. Anderson: Of this season's crop.

Mr. Garwood: 2,200 or 2,300 bales?

Mr. Anderson: Yes, sir.

Mr. Garwood: I will ask you if it is not a fact on a great deal of that cotton you get a double haul, first into Groveton and then out from Groveton for Lufkin?

Mr. Anderson: Yes, there are a great many farmers around Apple Springs who ship their cotton into Groveton and sell it because they have no market where they are, and they would have to haul it otherwise, and they prefer to pay our local into Groveton rather than haul it that distance into Groveton. We haul two or three or four hundred bales into Groveton, which is sold there and immediately shipped back over our line to Houston and other points.

Mr. Garwood: Is all your general commercial business constantly increasing and expanding?

Mr. Anderson: Yes, sir.

Mr. Garwood: Have you, in addition to the financial statements which you have filed as exhibits to your petition in this case, prepared a statement for the time intervening since the close of the last fiscal year from June 30, 1910?

2235 Mr. Anderson: I have no statement, but I have a memorandum here which will give an idea of the increase in the mercantile shipments; that is, the shipments other than lumber shipments, for the four months, July, August, September and October of this year, as compared with last year. That shows a constantly increasing ratio of merchandise shipments as compared with the total.

Mr. Garwood: Give some of those figures for the convenience of counsel.

Mr. Anderson: I can give you the old statement, and make it part of the record.

Mr. Garwood: Read them off so they will appear in the record.

Mr. Anderson: The total revenue for lumber for the four months that I mentioned of this year is $10,258.44. For last year it was $11,768.00——

Examiner Burchmore: Do you want that copied in the record?

Mr. Garwood: Yes.

Examiner Burchmore: It may be.

(The statement is as follows:)

Summary of Statistics for the Months of July, August, September and October, 1909 & 1910.

Revenue on Lumber from Trinity County Lumber Company—Interstate	6301.60	5930.16
Revenue on Lumber from Trinity County Lumber Company—State and Local	5485.15	4328.28
Total Revenue on Lumber from Trinity County Lumber Company	11768.75	10258.44
Revenue on Lumber from Independent Mills—Interstate	283.73	1068.86
Revenue on Lumber from Independent Mills—State	54.83	607.98
Total Revenue on Lumber from Independent Mills	340.56	1676.84
Revenue on Other Commodities—Interstate	579.57	910.24
Revenue on Other Commodities—Local and State	3416.59	3930.69
Total Revenue on Other Commodities	3996.16	4540.93
Percent of Freight Revenue from Lumber	75.21	71.14
Percent of Freight Revenue from Lumber from Trinity County Lumber Company	73.10	61.15
Percent of Trinity County Lumber Company —Lumber Revenue to Total Revenue	56.17	45.76
Percent of Freight Revenue on Lumber from Independent Mills	2.11	9.99
2237 Percent of Freight Revenue on Interstate Lumber	40.83	41.72
Percent of Freight Revenue from Other Freight—Interstate	3.59	5.42
Total Interstate Percent of Freight Revenue	44.42	47.14
Percent of Lumber Revenue of Total Revenue	57.84	53.24
Total Number of Tons of Freight Handled	20712	21639
Total Number of Passengers Handled	6405	7622
Number of Bales of Cotton Handled	1005	1276
Total Revenue	20964.08	22417.03
Total Revenue from Trinity County Lumber Company—Lumber	11786.75	10258.44
Total Revenue Other Than Trinity County Lumber Company—Lumber	9197.33	12158.59

Mr. Garwood: Can you state from that statement the relative proportion of your general business to the lumber business?

Mr. Anderson: Well, in a general way last year the lumber business was about 55 per cent of our revenue, and the other business 45 per cent. This year so far the figures have been reversed. The lumber business would be about 45 per cent of the total revenue and mer-

chandise and business from *out* outside public would be 55 per cent, in round figures.

2238 Examiner Burchmore: Three years ago it was about 75 and 25, was it not?

Mr. Anderson: Yes, sir; for the first seven months we operated of course the lumber business was the largest part of our revenue, because we had to build up the outside business. That has been——

Mr. Garwood: What was your passenger business for the last four months, as covered by this statement?

Mr. Anderson: The passenger business for the four months of this year would indicate an annual total of about $24,000, as against something less than $19,000 last year.

Examiner Burchmore: Please do not examine on that. That will be on the record.

Mr. Garwood: What is the general character of your station appliances, passenger facilities and freight facilities for the public between Lufkin and Groveton?

Mr. Anderson: I stated a while ago that we had cotton platforms for the loading and unloading of the freight and cotton, and we have also a waiting room for passengers. They are not heated, nor do we furnish ice water, or anything of that kind, but they are rooms which keep them out of the weather, and keep them comfortable in bad weather.

2239 Mr. Garwood: Are they substantially and permanently built?

Mr. Anderson: Yes, sir; they are all painted, and if they have overlooked any frills in putting them up I do not know it.

Mr. Garwood: How many passenger pagodas have you on that line?

Mr. Anderson: Three.

Mr. Garwood: Where are they located?

Mr. Anderson: At Lacey, Helmic and Apple Springs.

Mr. Cowan: Is there any other railroad that has a pagoda?

Mr. Garwood: We have them everywhere in Texas except out in western Texas in the cactus, where you live.

Mr. Cowan: I did not know there were any Chinamen down there that would make them desirable or necessary.

Mr. Garwood: You have stated, as I understand it, that the railway company and the Trinity County Lumber Company have no connection in their operations or employees in any manner whatsoever.

Mr. Anderson: None, with the single exception of myself; I am the only goat in the lot.

Mr. Garwood: Their operations are absolutely separate and distinct?

2240 Mr. Anderson: They are.

Mr. Garwood: None of the equipment——

Examiner Burchmore: I would not go into that. I think it is fully in the record.

Mr. Garwood: I want it absolutely in the record.

Examiner Burchmore: I think he has made it clear, that it is entirely separate.

Mr. Garwood: If it is entirely clear to your Honor I will drop it at that point. State, if you know, Mr. Anderson, whether you have through rates on interstate business with the Gulf, Colorado & Sante Fe, business within the state, not business outside the state.

Mr. Anderson: Yes, sir; we have.

Mr. Garwood: Have you through rates with them to points outside the state?

Mr. Anderson: No, sir, we have not.

Mr. Garwood: You are recognized, then, as a common carrier entitled to participate in these rates in so far as state business is concerned, but not for interstate business.

Mr. Anderson: That is correct.

Examiner Burchmore: As a matter of fact, the Santa Fe would not be permitted by the State Commission to cancel those
2241 rates, would it?

Mr. Anderson: No; that is the only reason we have them.

Mr. Garwood: Have you any reasonable through routes that ought to be available to you in connection with the Santa Fe and its connections?

Mr. Anderson: Do you mean outside the state of Texas?

Mr. Garwood: Yes.

Mr. Anderson: Yes.

Mr. Garwood: Where would it be reasonable for you to deliver to the Santa Fe? By what routes would you move?

Mr. Anderson: Well, Judge, that is a point that I am not very clear on. I presume that Houston would be——

Mr. Garwood: Going from Lufkin, could you move directly south over the Houston, East & West Texas and deliver to the Santa Fe at Cleburne?

Mr. Anderson: Yes, sir, or we could also deliver to them by the I. & G. N. at Conroe via Trinity.

Mr. Garwood: By each of those routes the Santa Fe would have the long haul on lumber to points on the Atchison System outside the state?

Mr. Anderson: Yes, sir.

Examiner Burchmore: I do not want to be unreasonable.
2242 but we are not trying here the establishment of joint through rates between companies, but the status of this road.

Mr. Garwood: The reason I asked that question is because it is in the petition of this road.

Examiner Burchmore: Suppose that fact be granted as proven without any testimony, what effect will that have on the decision of this case?

Mr. Garwood: We expected in this same application—this road did not know where it was going to be classified when it filed its petition and therefore asked for the establishment of through routes. If that part of the case is not going to be considered in connection with it——

Examiner Burchmore: Do you expect to try this case with the object of securing an order requiring the establishment of through routes and joint rates with the Santa Fe?

Mr. Garwood: It was so prayed for in the petition, and for that reason I did not want to be held as having waived it.

Examiner Burchmore: You have not waived it, but I think you had better plan to take that up in a supplemental proceeding after this general question has been disposed of.

Mr. Garwood: I do not want to be in the attitude of having made a prayer in the petition and offering no evidence to sustain
2243 it. Of course I should be glad if that would be by way of supplemental proceedings, to eliminate that at this point.

Examiner Burchmore: If we try that issue here, we will not get through for weeks, I am afraid, and you have preserved your rights.

Mr. Garwood: That is all I have done it for. Is there anything further, Mr. Anderson, that you wish to add to what you have said?

Mr. Anderson: Nothing that occurs to me, Judge.

Mr. Garwood: I believe that is all.

Mr. Cowan: You reside at Groveton?

Mr. Anderson: Yes.

Mr. Cowan: How long have you lived there?

Mr. Anderson: Four years.

Mr. Cowan: Had you been residing in that part of Texas before that?

Mr. Anderson: No, sir.

Mr. Cowan: How long have you been connected with the Trinity County Lumber Company?

Mr. Anderson: Four years.

Mr. Cowan: Where did you live before that?

2244 Mr. Anderson: Chicago.

Mr. Cowan: Are you connected with any other lumber company beside this?

Mr. Anderson: No.

Mr. Cowan: Are you connected with any other railroad company beside this?

Mr. Anderson: No.

Mr. Cowan: I was not noticing, but what position is it you hold with both the railroad and the lumber company?

Mr. Anderson: I am vice-president of the railroad, and manager of the lumber company.

Mr. Cowan: As vice-president of the railroad, are you manager of it; do you manage the railroad end of it?

Mr. Anderson: How is that?

Mr. Cowan: As vice-president of the railroad, do you manage it also?

Mr. Anderson: I am supposed to be the official head of the road in Texas.

Mr. Cowan: When you came to Groveton the lumber company was logging its mill by roads built out in the forest, from which you drew your logs?

Mr. Anderson: Yes.

2245 Mr. Cowan: And at that time your only outlet was the M. K. & T. Railroad?

Mr. Anderson: Yes, sir.

Mr. Cowan: The saw mill had been built along the right of way of the railroad, or nearby?

Mr. Anderson: Yes, sir.

Mr. Cowan: And the railroad had extended its spurs into the saw mill industry for the purpose of delivering freight and receiving freight?

Mr. Anderson: Yes, sir.

Mr. Cowan: And during all that period of time the railroad company performed the service of switching in the empty cars and taking out the loads?

Mr. Anderson: What railroad do you refer to?

Mr. Cowan: Well, the only one then was——

Mr. Anderson: The M. K. & T., yes, sir.

Mr. Cowan: You were not receiving divisions from it on account of being located on its line and bringing in logs?

Mr. Anderson: No.

Mr. Cowan: You then performed the same service with respect to bringing in logs that you do to-day, substantially?

Mr. Anderson: Yes.

2246 Mr. Cowan: Now, you come in a mile and a half over the Lufkin road, or whatever you call it?

Mr. Anderson: Yes.

Mr. Cowan: Preferably because it is a better track than your logging road, and you do not have a grade crossing?

Mr. Anderson: Yes.

Mr. Cowan: For which service there is nothing charged and no benefits derived by either your railroad company or your lumber company, except you get the privilege of paying it?

Mr. Anderson: I do not say that no charge is made. There has been, as I stated, a contract contemplated between the railroad and lumber company, by which trackage rights would be acquired, but it never has been reduced to writing yet. We have let it go by default largely because the same interests control both concerns.

Mr. Cowan: Well, my statement is correct; that there has been no charge made, has there?

Mr. Anderson: No.

Mr. Cowan: You were in the same attitude with respect to your lumber company as was William Cameron and others, who connect with the M. K. & T. road, and mill on that line and ship

2247 their lumber out?

Mr. Anderson: I know nothing of their conditions, surrounding their operations.

Mr. Cowan: At all events you received no benefits from the M. K. & T. except the ordinary railroad facilities. You got no division or allowance of any sort?

Mr. Anderson: Do you mean prior to the building of the Groveton, Lufkin & Northern?

Mr. Cowan: Yes.

Mr. Anderson: No, sir, we did not.

Mr. Cowan: When you found out you were in that condition, you found also instances—for example, you must have known how it was in Arkansas and Louisiana in particular.

Mr. Anderson: No, I will not admit that, because it would not be correct. I know nothing about the conditions in Louisiana and Arkansas, only what I have heard here in the last ten days.

Mr. Cowan: I suppose you knew before you built the road that most of the lumber mills in the country which were in competition with you in the markets were receiving divisions out of these rates.

Mr. Anderson: No, I did not know it. I knew some of
2248 them were. That was only hearsay. I did not know of my own knowledge that any of them were.

Mr. Cowan: At the time you came down there to manage the lumber business, there were rebates paid by railroad companies that had ceased?

Mr. Anderson: None that I know of. We did not get any of them if there were.

Mr. Cowan: You had to pay the full flat rate?

Mr. Anderson: Yes.

Mr. Cowan: Is it not a fact that the lumber company concluded, and you, as the managing officer of the lumber company, concluded that if you would build a railroad out whereby you could deliver the lumber out to other connecting lines, thereby getting a division of the rates, that it would be a good financial proposition to do it?

Mr. Anderson: We thought so. We thought we were entitled to compensation if we spent the money to build a railroad.

Mr. Cowan: And that induced you to build this railroad?

Mr. Anderson: To some extent; yes, sir.

Mr. Cowan: Did it not induce you wholly? You were not in the railroad business.

Mr. Anderson: No, not necessarily. We——
2249 Mr. Cowan: Well——

Mr. Garwood: Let the witness answer the question.

Mr. Anderson: The timber holdings of the lumber company at that time were practically all north of the M. K. & T. road, and we knew that we would have to build railroads in there to draw that timber and those logs to the mill, and it is rather a rough country, and the ordinary logging road built through those hills would be a pretty hard proposition. We concluded, inasmuch as we had to spend some money to get there, we might as well build a good one while we were at it.

Mr. Cowan: Well, you were lumber people; you were not in the railroad business.

Mr. Anderson: No, we were forced into it, I might say.

Mr. Cowan: You built the railroad——

Mr. Anderson: And we are not now in the railroad business, and do not want to be.

Mr. Cowan: What?

Mr. Anderson: I say our lumber people are not in the railroad business and do not want to be. We have trouble enough in the lumber business.

Mr. Cowan: You are not having any more trouble in the lumber busines than you did then?
2250 Mr. Anderson: A good deal.

Mr. Cowan: That is on account of the lower price. Pri-

marily you built this railroad for the purpose of delivering your own lumber to other connections than the M. K. & T.

Mr. Anderson: That was one object, but one of the main reasons was at that time the car service to the mills was quite a problem, and we thought we would be in a better position with three outlets than we would with one; I mean in the shipment of lumber after it was manufactured.

Mr. Cowan: But that was——

Mr. Anderson: Just wait until I get through. The facilities offered by the M. K & T. were not the best. You are familiar with their location; the branch that we are on is only called a railroad by courtesy; it is a lot of junk, that if they haven't any other use for it on the main line they send it down there and make the poor fellows use it down there. That applies to engines for moving business. And their arangements with the International & Great Northern for moving their tonnage from Trinity to Houston or to Mineola are rather burdensome, and they were not able to give us rates, and we were shut out from a great many points we would like to reach, because they could not give us rates, and it was partly to cover

2251 that that we built.

Mr. Cowan: Now, Mr. Anderson, are you right certain that the M. K. & T. could not give you rates to everywhere?

Mr. Anderson: There were a great many points we could not reach by the M. K. & T.

Mr. Cowan: Well, you could not reach them by the M. K. & T. tracks?

Mr. Anderson: Nor by their connections. I mean to say they could not make us satisfactory rates.

Mr. Cowan: Well, you were enjoying then the general blanket rate system that applied practically to all territory where you go now?

Mr. Anderson: Yes, sir.

Mr. Cowan: But the object at last, if it was to get cars or better rates, or any other purpose, in constructing the railroad, was to benefit the lumber business?

Mr. Anderson: Yes, to some extent, of course. I could not——

Mr. Cowan: You were not out building railroads for the purpose of developing the country independent of your lumber business?

Mr. Anderson: We would not have done that if it had been

2252 the only reason.

Mr. Cowan: Did you have any agreement with the Houston, East & West Texas Railroad before you built this line?

Mr. Anderson: No, sir.

Mr. Cowan: That you would get a division of the rate when you got in there?

Mr. Anderson: No.

Mr. Cowan: Did you have any with the M. K. & T. that you would get a division of the rate when you got in there?

Mr. Anderson: No.

Mr. Cowan: Did you have any understanding that you would receive them?

Mr. Anderson: No.

Mr. Cowan: If you had not received a division of the rate you certainly would have been in the soup, wouldn't you, with that railroad?

Mr. Anderson: Yes, sir.

Mr. Cowan: You say now that you acted without any understanding that you were to get a division of the rate?

Mr. Anderson: Yes.

Mr. Cowan: But you believed you would get it?

Mr. Anderson: We thought we would because we would
2253 have three outlets where we only had one.

Mr. Cowan: How much did you believe you would get?

Mr. Anderson: We did not know. That is a matter that has been thrashed out up to this good day, we are all the time scrapping with them.

Mr. Cowan: Having got the railroad built, you immediately got the division?

Mr. Anderson: We went out and got all we could.

Mr. Cowan: At that time is it not a fact you carried most of the lumber sent to Houston, East & West Texas, or delivered it most to the M. K. & T.?

Mr. Anderson: There is no rule about it; it varies. It depends upon the car supply and where our lumber is sold——

Mr. Cowan: I am just asking what did take place.

Mr. Anderson: When?

Mr. Cowan: Did you deliver most of it to the Houston, East & West Texas?

Mr. Anderson: No, for the first year we delivered more to other lines; more to the M. K. & T. and more to the Cotton Belt.

Mr. Cowan: The service you performed with respect to deliv-
eries to the M. K. & T. were precisely the same as they were
2254 before?

Mr. Anderson: How is that?

Mr. Cowan: The service in delivering to the Katy at Groveton remained the same as it was before?

Mr. Anderson: No.

Mr. Cowan: Wherein did you change it?

Mr. Anderson: The M. K. & T. went into our tracks, got the cars out and weighed them and billed them.

Mr. Cowan: And thereafter you did that for them?

Mr. Anderson: Certainly we do. There is no road has any access to our tracks now but the Groveton, Lufkin & Northern.

Mr. Cowan: What became of the Katy tracks?

Mr. Anderson: They took their tracks up. They had *an* excuse for a track in there.

Mr. Cowan: And they took it up?

Mr. Anderson: And they took it up.

Mr. Cowan: Between whom was that arrangement made?

Mr. Anderson: I could not say that there was any arrangement made. It was understood when our road was built that we were going in there, and their track was in such a condition it had to be rebuilt if it remained, and they took it up, and we built the track in over the same road or practically so.

2255 Mr. Cowan: And you switch about a mile and a quarter to the Katy?

Mr. Anderson: Yes, sir.

Mr. Cowan: In delivering to the H. E. & W. T. do you do any switching on your line or not?

Mr. Anderson: Which end of the line?

Mr. Cowan: To the Houston, East & West Texas at Lufkin.

Mr. Anderson: At Lufkin we deliver in the yards of the Cotton Belt. We have no physical connection with the H. E. & W. T. At Lufkin we deliver in the yards of the Cotton Belt and there is a switching charge made there which the H. E. & W. T. absorbs, and we in turn pay the transfer from their line on all freight going over our line.

Mr. Cowan: Taking a man who is situated out on the M. K. & T. who logs his mill with a railroad and who pays the flat rate and gets no division, don't you think you have an advantage over him, so far as the railroad charges are concerned?

Mr. Anderson: Well, I am not prepared to express an opinion on that. It is a hypothetical proposition, and it is a condition that is not likely to exist, because there is no place where a man can locate on the line of the M. K. & T. and get any timber; it is all

2256 cut, all that is tributary to the M. K. & T. has been cut and hauled in long ago.

Mr. Cowan: To what extent is the saw mill business carried on in that part of the state by logging a mill by railroad where the mill gets, or the railroad gets—I mean the railroad belonging to the mill—no division of the rates?

Mr. Garwood: The railroad does not belong to the road?

Examiner Burchmore: Judge Cowan, I am very anxious to take up one more case before we adjourn tonight, and if you can hasten the examination I will very much appreciate it.

Mr. Cowan: Was there a traffic manager of your company, your railroad company and your lumber company, a Mr. Wilson, who was a common traffic manager for both?

Mr. Anderson: The lumber company has no traffic manager?

Mr. Cowan: At any time was there a man named Wilson who was traffic manager for the lumber company and the railroad company?

Mr. Anderson: Named who?

Mr. Cowan: Wilson.

Mr. Anderson: Not to my knowledge.

Mr. Cowan: You will be asked, I suppose, to file a statement which has been asked for heretofore, showing the total

2257 amount of tonnage from your mill which goes to each one of your connecting lines.

Mr Anderson: I can give that to you now, if you want to know.

Mr. Cowan: Well, that general question has been asked, and is to be complied with, as I understand it, by all lines, and we will not take time now.

Mr. Garwood: In the ordinary course of operations, how long will it take the Trinity Lumber Company to cut out its timber there?

Mr Anderson: About ten or twelve years.

Mr. Garwood: You of course knew that at the time you constructed this road?

Mr. Anderson: Yes, sir.

Mr. Garwood: The road was then built as a permanent investment, irrespective of any investment that your stock-holding interests might have in lumber?

Mr. Anderson: Well, I might say that two-thirds of the original holdings of the Trinity County Lumber Company had been cut before the railroad had been thought of or dreamed of.

Mr. Garwood: In routing your stuff, do you obey the routings of the shipper?

2258

Mr. Anderson: Yes, sir.

Mr. Garwood: The Trinity County Lumber Company?

Mr. Anderson: Yes.

Mr. Garwood: Do you charge the Trinity County Lumber Company demurrage?

Mr. Anderson: Yes.

Mr. Garwood: Do you receive per diem on your cars?

Mr. Anderson: On our cars on other lines?

Mr. Garwood: That go off your line and are on other lines?

Mr. Anderson: Yes.

Mr. Garwood: I believe it is admitted that we endeavor to comply, and do substantially comply with all the state and Federal laws with reference to reports to both state and Interstate Commissions, and safety appliance acts. Do you observe the Federal Hours of Service Law?

Mr. Anderson: Yes.

Mr. Garwood: Just below you there runs from Trinity the Beaumont & Great Northern Railway?

Mr. Anderson: Yes.

Mr. Garwood: Running from a connection with the M. K. & T. branch to the I. & G. N. and thence over to the H. E. & W. T.

2259

Mr. Anderson: At Livingston.

Mr. Garwood: That road receives divisions, does it not?

Examiner Burchmore: We know all about that railroad.

Mr. Garwood: I did not know whether your Honor knew they received divisions, and that no notice of cancellation has been given to it.

Examiner Burchmore: We know all about it. There is a case submitted to the Commission for decision involving the rights of that company?

Mr. Garwood: That was prior to the severance of its stock-holding relations.

Examiner Burchmore: We are advised about that at the present time.

Mr. Garwood: The question I want to ask is if mills situated on that line get the advantage of a through rate and those upon other lines in the same general locality do not get the advantage of a through rate, whether there would not be a discrimination in their favor.

Mr. Anderson: That is very apparent.

Examiner Burchmore: That is argumentative. Do you understand that the Beaumont & Great Northern Railway Com-
2260 pany is now completely divorced from any lumber interests?

Mr. Garwood: That is my understanding. I am not connected with it in any way, but that is my understanding.

Mr. Coleman: Did you ever weigh any of the logs coming from your logging railroad on your standard railroad?

Mr. Anderson: We do not handle any logs.

Mr. Coleman: Don't you haul the logs to the saw mill?

Mr. Anderson: The lumber company does.

Mr. Coleman: Well, then the lumber company. Did the lumber company ever weigh them?

Mr. Anderson: No, sir; they never did.

Mr. Coleman: Have you any idea what the weight of 1,000 feet of logs is, or the average weight?

Mr. Anderson: Do you mean the weight of the logs which would make 1,000 feet of lumber? We have always estimated in a rough way about 10,000 pounds. That may not be correct; it will vary very much with different timber.

Mr. Coleman: Would that be your average?

Mr. Anderson: I should figure about that.

Mr. Coleman: I simply want to get in the record some way if we cannot get a conservative estimate, some idea of the weight.

2261 Mr. Anderson: We could easily weigh them, but we never have. I got that impression from the fact that we get 60,000 capacity cars and we load about 3,000 feet; that is, a carload of logs makes about 3,000 feet of lumber.

Mr. Coleman: Would it be convenient for you to test out and find what the average is?

Mr. Anderson: We could do it; yes, sir.

Mr. Coleman: I think for the benefit of the general needs of this case, in order to determine the tonnage, it should be determined.

Mr. Anderson: We would be pleased to run a train load of logs across the scales and give you the weights on it.

Mr. Coleman: You say you collect demurrage. Who do you find it necessary to collect demurrage from?

Mr. Anderson: From the Trinity County Lumber Company principally, or from any other mill that we serve.

Mr. Coleman: Now, you say you pay per diem.

Mr. Anderson: The road pays per diem for the cars, yes, sir.

Mr. Coleman: Well, I refer to the road. Of course you are in a dual position——

Mr. Anderson: When I say we pay demurrage, I mean the
2262 lumber company pays it and the railroad company collects it.

Mr. Coleman: I am speaking about—of course the carriers have an arrangement with the lumber company for paying per diem, but when I ask that I ask it as an officer of the railroad, whether the railroad pays per diem.

Mr. Anderson: The railroad pays per diem; yes, sir.

Mr. Coleman: Do you recall what that per diem is?

Mr. Anderson: It was, I think, 30 cents up to a short time ago, and it is now 35 cents.

Mr. Coleman: And your demurrage charge?

Mr. Anderson: $1.00.

Mr. Coleman: So that really the owners of your joint interests make that profit——

Mr. Anderson: We make a loss, as far as the lumber company is concerned, but the railroad company makes——

Mr. Coleman: I say the individuals, the participators in the holdings, make a profit on this demurrage, collecting as they do over and above the per diem.

Mr. Garwood: I think that is——

Examiner Burchmore: It seems to me, Mr. Coleman, if they hold the car ten days the M. K. & T. would receive $3.50 per diem and the lumber company would pay $10.00 demurrage, and the
2263 railroad company would take the difference.

Mr. Anderson: That is exactly it.

Mr. Coleman: Well, they pay it to themselves.

Examiner Burchmore: Part of it.

Mr. Coleman: But I say the stockholders pay the profit over and above the per diem to themselves.

Examiner Burchmore: That is a fact.

Mr. Anderson: We pay the railroad that owns the car.

Mr. Coleman: When you collect from another lumber company you make the absolute profit, and they pay more than you people do?

Mr. Anderson: Yes, sir; but I do not think we ever collect any demurrage from other lumber companies, because we put in a car and they load it and we take it out. They have 48 hours.

Mr. Coleman: As a matter of bookkeeping, you hold those cars as long as you want to and your company pays the per diem, whereas the other shipper pays the demurrage?

Mr. Anderson: We would be the losers the longer we held it, the more we are out of pocket.

Mr. Coleman: You are not as much a loser as the other shipper

2264 Mr. Anderson: We only serve one man and he loads his cars rather promptly, but if he holds it over 48 hours, we collect the demurrage from him.

Mr. Garwood: You have in no milling in transit rates, or anything of that sort?

Mr. Anderson: No.

Mr. Garwood: We introduce in connection with the testimony of this witness the financial statements attached to the petition in this case, marked respectively Exhibits A and B.

Examiner Burchmore: Those are already of record, and reference to them will suffice.

Mr. Garwood: Now, we have our traffic man, who is perpared to go into the question of divisions. Those are matters that are embraced in the division sheets, but we are ready to put him on.

xaminer Burchmore: I would like to ask him about three ques-
s, and I think that is all that will be necessary.

Witness excused.)

5 W. P. SMITH was called as a witness, and having been duly sworn, testified as follows:

Ir. Garwood: I will state in this connection that Mr. Smith was auditor and traffic man until about the last three months, when took other employment, and we have another man, but I think will be familiar with what you wish to ask him.

Examiner Burchmore: Your company receives no divisions in nection with the Texas Southeastern?

Ir. Smith: Well, on state divisions we do now.

Examiner Burchmore: Not interstate?

Ir. Smith: No.

Examiner Burchmore: The same is true of the Eastern Texas?

Ir. Smith: The same is true of the Eastern Texas.

Examiner Burchmore: Your divisions from the M. K. & T. on ıber amount to what sum?

Ir. Smith: About three cents; interstate is three cents flat.

Examiner Burchmore: I understood Mr. Anderson to say it ran m one and a half to four cents.

Ir. Smith: On interstate with the M. K. & T., three cents flat.

66 Examiner Burchmore: How about the Houston, East & West Texas on lumber?

Mr. Smith: The Houston, East & West Texas, our basis runs from e-half a cent to five cents.

Examiner Burchmore: One-half a cent to state traffic?

Mr. Smith: Yes, sir, to five cents interstate traffic.

Examiner Burchmore: You never receive more than five cents?

Mr. Smith: Nothing, no, sir.

Examiner Burchmore: The Cotton Belt allows you how much?

Mr. Smith: The Cotton Belt divisions run from two to four nts.

Examiner Burchmore: Two cents on state traffic?

Mr. Smith: Two cents on state traffic is the minimum and four nts on interstate traffic.

Examiner Burchmore: And four cents on interstate traffic is a t division?

Mr. Smith: Yes, sir.

Examiner Burchmore: Everywhere?

Mr. Smith: Well, except to one line.

Examiner Burchmore: What is that line?

Mr. Smith: The Kansas City, Mexico & Orient.

Examiner Burchmore: Is there not a certain line of rates 267 on which you receive a percentage of the rate and not a division?

Mr. Smith: That is in connection with the Sunset Central Lines; e get 20 per cent of the proportion accruing to the Sunset Central.

Examiner Burchmore: That sometimes exceeds four cents, does it not?

Mr. Smith: No, that is the highest we can get. They reserve the minimum to their junctions.

Examiner Burchmore: What is the rate to St. Louis?

Mr. Smith: Eighteen cents.

Examiner Burchmore: And you get 25 per cent of that rate at times?

Mr. Smith: On lumber, no.

Examiner Burchmore: I have St. Louis Southwestern Railway Company percentage tariff 1561——

2268 Mr. Smith: I think you will notice, though, that that does not apply on lumber.

Examiner Burchmore: Well, that is true. Well, the class rates divide 75 and 25 per cent.

Mr. Smith: Yes, sir.

Examiner Burchmore: In connection with the Cotton Belt?

Mr. Smith: Yes, sir.

Examiner Burchmore: Is it true of the other roads?

Mr. Smith: No, they vary with the other lines.

Examiner Burchmore: Your class rate divisions are higher than your lumber divisions?

Mr. Smith: Well, in one sense, yes, sir.

Examiner Burchmore: Division sheet M. K. & T. 3810 issued by that company January 22nd, 1909, provides that on business interchanged with the Groveton, Lufkin & Northern Railway, the following basis will govern traffic to or from Kansas City and points on the M. K. & T. Railway taking the same rate or lower. Allow Groveton, Lufkin & Northern 25 per cent of the through rate. I understand you to say the through rate to St. Louis is 18 cents.

Mr. Smith: That was on lumber.

Examiner Burchmore: You get 25 per cent of that?

2269 Mr. Smith: No, I think you will notice that does not apply on lumber.

Examiner Burchmore: It applies on coal, coke, cotton, cotton-seed, linters, live stock, grain and grain products——

Mr. Smith: I think there is a supplement which never applied on any lumber.

Examiner Burchmore: I thought you said you got a division of four cents, and no higher.

Mr. Smith: We do not get four cents on lumber.

Examiner Burchmore: There is a supplement to this published a short time later—no, there is not. I will show you this division sheet. Is there an error in that sheet?

Mr. Smith: There is a supplement to this division sheet which excepts lumber from the application of the same. There is a special lumber division sheet which takes care of lumber and foreign products.

Examiner Burchmore: Then do you say this division sheet is not accurate?

Mr. Smith: Not so far as lumber is concerned.

Examiner Burchmore: I do not think it is necessary to bring out the details of these divisions. Are there any questions you desire to ask?

2270 Mr. Garwood: You have issued bills of lading in the ordinary form, state and interstate?

Mr. Smith: Yes, sir.

Mr. Garwood: And followed the usual course of approved railroading in that particular?

Mr. Smith: Yes.

Mr. Garwood: In the publication of your tariffs, and concurrences, and so forth?

Mr. Smith: Yes, sir.

Mr. Cowan: I want to ask Mr. Anderson a question, but do not want to ask this witness.

(Witness excused.)

Mr. Cowan: Just where you are, Mr. Anderson, is it or not a fact that the Groveton, Lufkin & Northern, has some sort of an arrangement for a sale or transfer of the property to the Sunset Central Lines, or some of the Southern Pacific interests?

Mr. Anderson: None whatever.

Mr. Cowan: Was there at any time any arrangement by agreement for division of the rates other than the ordinary division sheets?

2271 Mr. Anderson: None whatever.

Mr. Cowan: That is all.

Mr. Garwood: I will ask the Commission to consider as offered in evidence the rules and regulations of the Railroad Commission of Texas relative to the issuance of stocks and bonds. I ask the Commissioner also to consider as offered in evidence the profiles of our road, and our map of each consecutive mile. It is a very large diagram.

Examiner Burchmore: I do not believe that ought to be put in the record. The record is so big that we will have to send it in a car now.

Mr. Garwood: Very well. I want to state that our general manager is here, and in the interest of time I did not put him on, but I tender him to the Commission for examination either by your Honor or any interested party as to any detail of the conduct or management of that road.

W. J. HELMICK, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Are you an officer in any other railroad?

Mr. Helmick: No.

2272 Examiner Burchmore: You have heard the testimony offered in this case by the other witnesses?

Mr. Helmick: Yes, sir.

Examiner Burchmore: Were there any inaccuracies or corrections that you would suggest?

Mr. Helmick: No.

Examiner Burchmore: It accords with your general understanding of the situation?

Mr. Helmick: Yes, sir.

(Witness excused.)

Examiner Burchmore: The Red River & Rocky Mount?

(No responses.)

Examiner Burchmore: The Rison & Mt. Elba? Is that company represented? I am informed there is no appearance.

The Saline River Railway?

Mr. Smyth: I am here for that road.

Examiner Burchmore: We will hear the Lake Charles & Northern, the Fourche River Valley & Indian Territory Railway, and the Wilmar & Saline Valley Railroad cases at 8:00 o'clock this evening.

2273 *The Saline River Railway.*

L. N. SMYTH, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: What is your position with this railroad?

Mr. Smyth: Auditor.

Examiner Burchmore: How long have you been Auditor of this company?

Mr. Smyth: Since April 15th, this year.

Examiner Burchmore: The Saline River Railway, as I understand it, is controlled by the Saline River Lumber Company through the ownership of the capital stock?

Mr. Smyth: Since April 15th this year.

Examiner Burchmore: The Saline River Railway, as I understand it, is controlled by the Saline River Lumber Company through the ownership of the capital stock?

Mr. Smyth: Well, the stock does not belong to the lumber company, but it belongs to the stockholders of the lumber company.

Examiner Burchmore: Are those stockholders the same in the two companies?

2274 Mr Smyth: Practically so.

Examiner Burchmore: Do they hold their stock in proportion?

Mr. Smyth: Yes, sir.

Examiner Burchmore: In a general way the officers of the two companies are the same?

Mr. Smyth: About the same, yes, sir.

Examiner Burchmore: Well, what differences are there?

Mr. Smyth: Well, there are none except the General Superintendent of the railroad does not fill the same position with the lumber company exactly; that is, he does not meet with the Board of Directors, but otherwise they are the same.

Examiner Burchmore: The Saline River Railway connects with the Cotton Belt at Draughon, Arkansas?

Mr. Smyth: Yes.
Examiner Burchmore: Does it connect with any other railroad?
Mr. Smyth: With the Warren and Ouachita Valley at a place alled Glynn.
Examiner Burchmore: When did you form that connection?
Mr. Smyth: Some time in last May, I believe.
Examiner Burchmore: Which road extended its line to that point?
2275 Mr. Smyth: The lumber company built the extension from New Edinburg, as has been shown previously in reports to he Commission, and in May last they sold it to the railroad company, so that now the entire line belongs to the railroad company.
Examiner Burchmore: Is it not a fact that the Saline River Lumber Company is controlled by Mr. C. J. Carter and his associates.
Mr. Smyth: He is President of both companies and the chief executive officer.
Examiner Burchmore: This lumber company is controlled by the same interests that control the Doniphan Lumber Company?
Mr. Smyth: Yes, sir, just about the same.
Examiner Burchmore: And that company is understood to be in control of the Doniphan, Kensett & Searcy Railroad?
Mr. Smyth: Yes, sir.
Examiner Burchmore: Is there any private tram road connecting with this company?
Mr. Smyth: There are spurs belonging to the lumber company but no tramway.
Examiner Burchmore: What is the character of the country through which it extends?
2276 Mr. Smyth: It is a cut-over timber country with some agricultural products, but not much, except at the station of New Edinburg; around there there is considerable farming and some staves produced, and there has been some little lumber hauled in there and shipped out over the road from local mills through the country, that is small portable mills which move about from place to place.
Examiner Burchmore: The mill or mills of this lumber company are, I understand, located at Draughon?
Mr. Smyth: Yes, sir.
Examiner Burchmore: And they immediately adjoin the rails of the Cotton Belt System?
Mr. Smyth: That is right.
Examiner Burchmore: Is there a private side track connecting the mill with the main line of the Cotton Belt?
Mr. Smyth: Planing mill.
Examiner Burchmore: Well, the loading platform of your industry?
Mr. Smyth: No, the planing mill is located on the Cotton Belt side track. However, the railroad company furnishes the ties
2277 and all necessary material for repairing that track.
Mr. Riddell: By the railroad company, you mean the Saline River?
Mr. Smyth: Yes.

Examiner Burchmore: But the Saline River Railroad does not operate that track?

Mr. Smyth: No; they occasionally go in there to switch cars for the convenience of the lumber company.

Examiner Burchmore: When was this mill at Draughon opened for operations?

Mr. Smyth: Well, it has been, from the record, I should say, about from 13 to 15 years ago; it was not erected by the present owner.

Examiner Burchmore: When did the present owners acquire it?

Mr. Smyth: They bought it in 1907.

Examiner Burchmore: When was the construction commenced on this railroad?

Mr. Smyth: The railroad was built and chartered at the time they bought the mill. They bought the two properties together.

Examiner Burchmore: The railroad was then in existence?

Mr. Smyth: Yes.

Examiner Burchmore: Had it been incorporated previ-
2278 ously?

Mr. Smyth: Yes.

Examiner Burchmore: As a common carrier?

Mr. Smyth: Yes.

Examiner Burchmore: Was it in fact performing services as a common carrier?

Mr. Smyth: I could not say as to that.

Examiner Burchmore: Did it have any traffic besides lumber previous to that time?

Mr. Smyth: I could not say, but it was chartered under the laws of Arkansas, and I now have the original charter in my office.

Examiner Burchmore: As a matter of fact you suspect it did not do any other business?

Mr. Smyth: I do not suppose it did. They contemplated going to this little town of New Edinburg that afterwards the new owners built to. At that time I understand it took a somewhat different route from what it does now, and was a narrow gauge road, and they converted it into a broad gauge road and extended it and changed the general route of the tracks so that they reached this town of New Edinburg, which is quite a little place of importance.

2279 Examiner Burchmore: What was the date of this conversion?

Mr. Smyth: I could not say as to that.

Examiner Burchmore: Previous to 1907?

Mr. Smyth: No, sir, it was after that.

Examiner Burchmore: It was narrow gauge when you bought it?

Mr. Smyth: Yes.

Examiner Burchmore: The lumber company bought this railroad and everything first as one enterprise.

Mr. Smyth: No, they bought it as two separate propositions.

Examiner Burchmore: It was purchased at one time?

Mr. Smyth: Yes, sir, all made in one deal, but there were two corporations, and they bought the stock of both.

Mr. Riddell: I understand the lumber company never owned that road at any time.

Mr. Smyth: No.

Mr. Riddell: But the same stockholders bought it?

Mr. Smyth: Yes, sir.

Examiner Burchmore: I meant the Carters went down there and bought the railroad and lumber company as one deal.

Mr. Riddell: I call attention to that, because in most cases the lumber company originally got the railroad and transferred
2280 it to the railroad company.

Mr. Smyth: But there was a difference in the name too. At the present time the lumber company is called the Saline River Lumber Company, and the railroad the Saline River Railroad, but at the time of the purchase the lumber company had some other name. I think it was the Goodlander & Moore Lumber Company, or something of that sort.

Examiner Burchmore: Was that a fictitious name or the name of the officers?

Mr. Smyth: No, it was the name—the Goodlander Lumber Company, I believe was the correct name.

Examiner Burchmore: What was the capital stock of this railroad company at the time it was purchased?

Mr. Smyth: $50,000.

Examiner Burchmore: That is all outstanding?

Mr. Smyth: Yes.

Examiner Burchmore: Has there been any increase in the capitalization?

Mr. Smyth: No.

Examiner Burchmore: Any bonds at the present time?

Mr. Smyth: No.

2281 Examiner Burchmore: There have not been any bonds issued so far as you know?

Mr. Smyth: There have not been any bonds issued so far as I know.

Examiner Burchmore: Any other indebtedness at the present time?

Mr. Smyth: Yes, sir.

Examiner Burchmore: What is that indebtedness?

Mr. Smyth: Do you want the amount of it?

Examiner Burchmore: Yes, and the nature of it, and to whom it is due.

Mr. Smyth: Our books show a total of loans and bills payable of $127,553.62.

Examiner Burchmore: What do those loans cover?

Mr. Smyth: Principally advances from the lumber company.

Examiner Burchmore: What use was made of those advances, additions and betterments in the main?

Mr. Smyth: I suppose in improving the road: You know they changed it from what it originally was, a narrow gauge, and changed the entire route of it, and during the course of these 13 years they have operated the road that line has been increasing gradually. I

suppose they have paid some back, but in the main it has kept
2282 piling up to what it is now.

Mr. Riddell: The road is accumulating a deficit instead of a surplus, is it?

Mr. Smyth: Yes.

Examiner Burchmore: Speaking of the financing of this road in 1907, or subsequent to that, who furnished the money with which the railroad was bought?

Mr. Smyth: I think the present stockholders have just about the same interest now that they did originally when the road was purchased, but I could not say what the proportions are. I have no data of that kind here.

Examiner Burchmore: Are there any stockholders of this railroad who are not also stockholders of the lumber company?

Mr. Smyth: I think not, except for the purpose of having the required number of directors.

Examiner Burchmore: What is the mileage of main line and sidings?

Mr. Smyth: Main line 19.21 miles; spurs and sidings, 1.72 miles.

Examiner Burchmore: 19 miles of main line?

Mr. Smyth: Yes, sir. That was increased, you know.

Examiner Burchmore: It was increased by nine miles?

2283 Mr. Smyth: No, it is increased by 10.21 miles. Originally the road was nine miles long.

Examiner Burchmore: When was that road increased?

Mr. Smyth: Last May.

Examiner Burchmore: And you say the railroad company built that extension? The lumber company built that extension, did it not?

Mr. Smyth: Yes.

Examiner Burchmore: And the railroad took it over?

Mr. Smyth: Yes.

Examiner Burchmore: At cost?

Mr. Smyth: At cost, yes, sir.

Examiner Burchmore: And a portion of this indebtedness represents that cost?

Mr. Smyth: That is included in this $127,000 I mentioned.

Examiner Burchmore: Do you contemplate in the near future funding your debts?

Mr. Smyth: That has been talked about, but nothing definitely arrived at so far.

Examiner Burchmore: No particular advantage in doing that, is there?

2284 Mr. Smyth: No, sir.

Examiner Burchmore: Is there any obstacle in the way of doing it?

Mr. Smyth: None that I know of. If it was done it would be just simply giving the stockholders in the lumber company some evidence of the debt that they have not now, except this last purchase, there was a note given for that, and I believe the intention is to pay it when the note is due. It is a short time note.

Examiner Burchmore: What is the weight of the rail in this road?

Mr. Smyth: 35 pounds

Examiner Burchmore: Ballasted?

Mr. Smyth: Just ordinary surfaced track, like most of the roads of that nature are, except that it is in good condition and perfectly safe to run over.

Examiner Burchmore: Are there any severe grades?

Mr. Smyth: No, sir, none except what the trains can very easily negotiate.

Examiner Burchmore: What is the sharpest curve on the line?

Mr. Smyth: I could not say without referring to the records.

2285 Examiner Burchmore: Any bridges?

Mr. Smyth: Yes, quite a number.

Examiner Burchmore: Steel bridges?

Mr. Smyth: No, wooden.

Examiner Burchmore: Over large streams?

Mr. Smyth: No, just small streams.

Examiner Burchmore: Have you any station buildings?

Mr. Smyth: Yes, sir, we have one station building of our own, and then we occupy the Cotton Belt station jointly at Draughon.

Examiner Burchmore: Do you have a joint agency there?

Mr. Smyth: Yes, sir.

Examiner Burchmore: What proportion of the total expenses of the station and what proportion of the agent's salary does your road pay?

Mr. Smyth: At Draughon we pay about 77 per cent of the agent's salary, and one-half of all the expenses of running the station including printing and everything of that sort.

Examiner Burchmore: Then I judge that station is chiefly used for your work?

Mr. Smyth: No, it is used as much for the Cotton Belt as

2286 it is for us.

Examiner Burchmore: Then it is owned by the Cotton Belt?

Mr. Smyth: The building is owned by the Cotton Belt, yes, sir.

Examiner Burchmore: I wanted to see why you paid most of the expenses.

Mr. Smyth: Well, they imposed that on us and we just had to stand it I suppose, or else hire an agent of our own, and it was cheaper for us.

Examiner Burchmore: What does 77 per cent of the agent's salary come to?

Mr. Smyth: His salary amounts to $55.00 a month, and I believe the Cotton Belt stands $12.50 and we stand the rest. Now at New Edinburg, our other station, we have an exclusive agent that we pay a salary to, and who devotes all his time to our business.

Mr. Riddell: That is the railroad business?

Mr. Smyth: Yes, sir. He has no connection with the lumber company at all. We have had him located there several years in the exclusive employ of the railroad company.

Examiner Burchmore: Are there any other stations on your line where there are no buildings?

2287 Mr. Smyth: There are no stations. We have some blind sidings——

Examiner Burchmore: From a tariff standpoint, do you have any other stations?

Mr. Smyth: Yes, sir, we have stops by the name of Carter, Hebron, Tucks, New Edinburg; that is the regular station mentioned before, where there is an agent located.

Mr. Riddell: Those are points at which you receive and deliver freight?

Mr. Smyth: Yes, sir, for freight, except that those first three mentioned are small blind sidings.

Mr. Riddell: You would deliver prepaid shipments of merchandise if you had any?

Mr. Smyth: Yes, sir, and we also stop there for passengers, on flag. And at Glynn.

Examiner Burchmore: What is the connection with the Warren & Ouachita Valley Railroad?

Mr. Smyth: Glynn.

Examiner Burchmore: Do you interchange any traffic with that road?

Mr. Smyth: Yes, sir. That road connects with the Iron

2288 Mountain at Warren, and the Rock Island at Banks.

Examiner Burchmore: Leaving the question of traffic for a moment, how many locomotives does the railroad company have?

Mr. Smyth: Three.

Examiner Burchmore: Does it operate all those locomotives?

Mr. Smyth: Yes, they use three of them most of the time, but use two every day. Some times the other one is not in commission.

Examiner Burchmore: Do you own those locomotives?

Mr. Smyth: Yes, sir.

Examiner Burchmore: How many cars do you own?

Mr. Smyth: 35 skeleton logging cars, one box car, one tank car, one caboose, and one combination passenger coach.

Examiner Burchmore: How many road employés are there, or how many section gangs?

Mr. Smyth: Ordinarily we have one; sometimes two, depending on conditions.

Examiner Burchmore: Do either of those gangs perform any work off of your line?

Mr. Smyth: No, sir. The spurs do not belong to the railroad company, and the lumber company employs all its own men.

2289 Examiner Burchmore: Do you have any station employés other than the two agents referred to?

Mr. Smyth: No other station employés except when required occasionally, they may hire extra men to help handle freight or something of that sort.

Examiner Burchmore: What employés are there in the general office of the railroad company?

Mr. Smyth: Myself and the assistant auditor. He is located at Draughon, and I am located in Kansas City.

Examiner Burchmore: The clerks of the lumber company do not work for the railroad company?

Mr. Smyth: No, sir, except this man in Draughon that I mention, a part of his salary is paid by the lumber company and part of it by the railroad company. He is employed by the railroad company, but we pay—I should say he is employed by the lumber company, but we pay them for whatever time he uses for the railroad company.

Examiner Burchmore: What does he do?

Mr. Smyth: He looks after the general accounting of the business done down there at that end of the line.

2290 Mr. Riddell: He is the one you said was assistant auditor?

Mr. Smyth: Yes, sir.

Examiner Burchmore: Give us briefly the particulars of your train service and its character.

Mr. Smyth: We have a mixed train which leaves Draughon daily except Sunday in connection with the local Cotton Belt passenger, making the round trip to New Edinburg. This train makes two trips daily connecting with local passengers both north and south. It carries the mail and express which is handled by freight on our road, but——

Examiner Burchmore: The express company does not operate over your line?

Mr. Smyth: No, but we have an arrangement with them whereby we take their express and deliver it at New Edinburg. We have the privilege of handling it any way we want to, just so we are responsible for it.

Mr. Riddell: That is substantial an express service, is it not?

Mr. Smyth: It is equivalent to it, except we bill the packages the same as we would local freight shipments.

Examiner Burchmore: Do you publish a time table?

2291 Mr. Smyth: Yes, sir.

Examiner Burchmore: Do you wish to file a copy of it?

Mr. Smyth: I have none here, but we can file one.

Examiner Burchmore: It is not necessary unless you deem it desirable.

Mr. Riddell: Is the time table in the Official Guide?

Mr. Smyth: I think it is, yes, sir.

Mr. Riddell: If it is not it might be well to file one.

Mr. Smyth: All right, I will file one.

Examiner Burchmore: How many freight trains do you run aside from the trains described, any?

Mr. Smyth: We run a regular train each way daily, and then an extra train when the occasion requires. These trains run on orders issued by the General Superintendent, made up in standard railway form.

Examiner Burchmore: The first of these trains is the same train you referred to a few minutes ago as——

Mr. Smyth: No.

Examiner Burchmore: As your mixed train?

Mr. Smyth: Well, the one I mentioned first is a mixed train, but in addition to that we operate two regular freight trains that handle logs and lumber.

2292 Examiner Burchmore: What is the extent of your passenger traffic?

Mr. Smyth: It is not as heavy as we would like for it to be. It amounts to about 5 per cent of the gross revenue of the road.

Examiner Burchmore: How many passengers did you carry during some period for which you may have the figures?

Mr. Smyth: Last year I think we carried about 3,000 passengers.

Examiner Burchmore: They all paid fares?

Mr. Smyth: Yes.

Examiner Burchmore: Do you have published tariffs covering passenger service?

Mr. Smyth: Yes, sir.

Examiner Burchmore: Are they filed with the Interstate Commerce Commission?

Mr. Smyth: I think so. If they are not they ought to be.

Examiner Burchmore: Well, they are state fares; I do not know whether they would be filed or not.

Mr. Smyth: We make it a practice, though, to file everything of that nature.

Mr. Riddell: I do not know whether the Commission re-

2293 quires that or not, where they are just local fares.

Examiner Burchmore: Not if you do not cross the state line and do not sell any through tickets.

Mr. Smyth: I do not know as to that.

Examiner Burchmore: Do you carry any people free?

Mr. Smyth: None except those with passes.

Examiner Burchmore: Are any lumber company employés the recipients of passes?

Mr. Smyth: Yes, sir, some of them are.

Examiner Burchmore: Those who travel on the lumber company's business?

Mr. Smyth: Yes.

Examiner Burchmore: With respect to your freight traffic, what is your total tonnage?

Mr. Smyth: The total tonnage for the fiscal year ending June 30th, 1910, was 75,753 tons.

Examiner Burchmore: That is of all speciees of traffic?

Mr. Smyth: Yes, sir.

Examiner Burchmore: How much of that was lumber?

Mr. Smyth: About 17 per cent.

Examiner Burchmore: Was lumber, 17 per cent.

Mr. Smyth: 17 per cent lumber, and 81 per cent of it was

2294 logs.

Examiner Burchmore: Then 98 per cent was logs and lumber?

Mr. Smyth: Yes.

Examiner Burchmore: That is what I meant.

Mr. Smyth: And two per cent of it was merchandise of various kinds.

Examiner Burchmore: How much of that logs and lumber was transported for the Saline River Lumber Company or on its account?

Mr. Smyth: Well, practically all of it. We handled some lumber for other parties, but I do not think there was more than two or three carloads in the year that were shipped possibly from New Edinburg.

Examiner Burchmore: I am going to ask you to file a tonnage statement of the nature called for from other parties.

Mr. Riddell: Yes, I understand what that is, I believe.

Examiner Burchmore: This statement you are making now is sufficiently general for the purposes of this record, and the tonnage statement will be accurate. Has this company any commissary along the line?

Mr. Smyth: No.

2295 Examiner Burchmore: So the other two per cent you refer to is farm products or general merchandise handled for interests who are wholly separate from the lumber company?

Mr. Smyth: Handled to and from this town of New Edinburg I mentioned before.

Examiner Burchmore: Is this town a company town?

Mr. Smyth: No, I do not think any of our employés live there, and we have no interest in it.

Examiner Burchmore: You will give those figures in tons as well as in dollars of revenue?

Mr. Riddell: I understand exactly what is wanted in that respect and I will see that it is furnished.

Examiner Burchmore: Are rates published from your line in connection with the milling in transit privilege?

Mr. Smyth: In one direction we have with the Cotton Belt, we have rates too with the Warren & Ouachita Valley and the Rock Island also.

Examiner Burchmore: Are the through rates from the point of origin on your line to interstate destinations, where there are such through rates, the same as the Cotton Belt rates from Draughon and in that vicinity?

2296 Mr. Smyth: Yes, sir.

Examiner Burchmore: Then the junction point rate applies over your line?

Mr. Smyth: Yes.

Examiner Burchmore: You have rates also in connection with the Warren & Ouachita Valley and the Rock Island?

Mr. Smyth: Yes.

Examiner Burchmore: Are those the same rates in a general way as over the Cotton Belt?

Mr. Smyth: Yes, the rates are practically the same.

Examiner Burchmore: The rates are the same both ways?

Mr. Smyth: Yes.

Examiner Burchmore: How about the divisions? In the first place, what are your divisions with the Cotton Belt?

Mr. Smyth: They range from one to two and a half cents.

Examiner Burchmore: Is two and a half cents the greatest division you receive from the Cotton Belt?

Mr. Smyth: I think so. I never noticed any division larger than that, possibly on account of not having made any shipment to other points where there are higher rates.

Mr. Riddell: That seems to be the basis which is very com-
2297 mon with the Cotton Belt, and I imagine it is correct.

Examiner Burchmore: I was under the impression you got a division of three and a half cents out of the Cotton Belt.

Mr. Smyth: No, it is via the W. & O. V and the Rock Island.

Examiner Burchmore: Now wait a minute——

Mr. Smyth: I think you will find that is not wrong, because I would be glad if you did.

Examiner Burchmore: I guess you are right. What are the divisions over the Rock Island?

Mr. Smyth: Three and a half cents.

Examiner Burchmore: Standard three and a half cents?

Mr. Smyth: Yes.

Examiner Burchmore: Then I suppose all your traffic goes over the Rock Island?

Mr. Smyth: No, not all of it. It depends a good deal upon the car supply.

Examiner Burchmore: They get all the competitive traffic?

Mr. Smyth: Yes, of course.

Examiner Burchmore: Naturally.

Mr. Smyth: Yes.

2298 Examiner Burchmore: How much does the Warren & Ouachita Valley Railway get out of this traffic that goes over the Rock Island?

Mr. Symth: One and one-half cents.

Examiner Burchmore: So the Rock Island sacrifices five cents?

Mr. Smyth: Yes, they give up five cents, but they get something out of it themselves.

Examiner Burchmore: They get the balance?

Mr. Smyth: Yes.

Examiner Burchmore: Has the Cotton Belt System manifested any intention or evidence of raising its divisions?

Mr. Smyth: No, sir.

Examiner Burchmore: They would rather lose the traffic?

Mr. Smyth: I never heard anything about raising it at all. They are more inclined to cut it down, if anything.

Mr. Riddell: Will you permit me to ask a question right here. You said in reply to a query that all your competitive business went over the Rock Island. Do you mean that? Is not all this lumber business practically competitive?

Mr. Smyth: Well, I mean where everything was equal and
2299 we had the choice of routes, we would naturally give it to the Rock Island.

Mr. Riddell: You give it a preference?

Mr. Smyth: Yes, sir, on account of the divisions.

Mr. Riddell: But I understand all this lumber traffic is competitive by reason of its destination; it can be reached by the Cotton Belt or the Rock Island.

Mr. Smyth: Not in every case.

Mr. Riddell: But substantially?

Mr. Smyth: Yes.

Examiner Burchmore: What proportion of your traffic goes out over the Rock Island now?

Mr. Smyth: I suppose at the present time about half of it.

Examiner Burchmore: Have you a contract with the Rock Island?

Mr. Smyth: No, not to my knowledge.

Examiner Burchmore: It seems to me that ordinary business policy would prompt you to send everything by the Rock Island that you could send that way.

Mr. Smyth: This arrangement has not been in effect very long and——

Examiner Burchmore: Well, since it has been in effect?

2300 Mr. Smyth: And the car supply has cut quite a figure in the case. Recently we have been up against a car shortage down there, and it has been more a question of getting cars to load the lumber in than the matter of divisions.

Examiner Burchmore: When did the Rock Island establish divisions with your company?

Mr. Smyth: I could not say exactly, but it was along some time early this year.

Examiner Burchmore: Since this tap line question was actively under consideration?

Mr. Smyth: Yes, sir.

Examiner Burchmore: Is it your understanding that the Rock Island has been expanding the list of roads to which it gives allowances recently?

Mr. Smyth: I could not say.

Mr. Gaughan: This is merely a split of Mr. Hobbs' division on the Warren & Ouachita Valley?

Mr. Riddell: Was your arrangement made with the Rock Island or the Warren & Ouachita Valley?

Mr. Smyth: I could not say positively, as I had nothing to do with it. I imagine, though, since considering it further, that the

2301 arrangement was made with the Warren & Ouachita Valley.

Mr. Riddell: I ask that question, because in discussing this question last night with Mr. Carter and Mr. Stocking I understood very specifically that the arrangement was made with the Warren & Ouachita Valley because I recall having made the suggestion that the Warren & Ouachita Valley had that basis presumably over its own line, and it could very readily extend it to include connecting lines, providing they did not ask any further assistance from the Rock Island.

Examiner Burchmore: The only trouble about that is that the Warren & Ouachita Valley does not get five cents on all its traffic.

Mr. Riddell: That is the suggestion I offered them, and they concurred in it and gave me to understand that the arrangement had been made with the Warren & Ouachita Valley.

Mr. Smyth: I am forming my own opinion from the Rock Island division sheets.

Mr. Riddell: The witness will give you a definite written statement with whom that arrangement was made, if you care to have it.

Examiner Burchmore: I suggest that you might do so, that we can understand it. The Warren & Ouachita Valley only get
2302 a division of three cents on some traffic, or that was formerly true at least. There is no traffic you send via the Rock Island on which you get less than three and a half cents.

Mr. Smyth: That is my understanding.

Examiner Burchmore: Is there any territory you cannot reach over the Rock Island?

Mr. Smyth: Yes, sir, some points.

Examiner Burchmore: Any extensive points?

Mr. Smyth: I think not; no territory to which the lumber company ships.

Examiner Burchmore: Is there any territory that you cannot reach that the Warren & Ouachita Valley people do reach?

Mr. Smyth: Not that I know of.

Examiner Burchmore: Then it means that with respect to a part of the traffic reaching the Rock Island rails over the Warren & Ouachita Valley, the Rock Island raised its three cents division to a five cent division when accorded to the two companies?

Mr. Smyth: That is a matter that I could not state definitely.

Examiner Burchmore: Well, is that your impression?

Mr. Smyth: No, I have no ideas at all on that point. I am
2303 simply giving you what the Rock Island divisions sheets show is our proportion of that rate in certain tariffs that it covers. Aside from that I know nothing about it, because I have not investigated it.

Examiner Burchmore: I suggest you include in your communication any general statement you can make in this particular such as you think the Commission ought to be informed about so it will make the record complete.

Mr. Riddell: We will furnish a comprehensive statement in regard to this division arrangement, as to how it was made, and give full information about it.

Examiner Burchmore: Now do you have any joint class rates with either of your connections?

Mr. Smyth: We have some class and commodity rates, but I could not say positively just what they are at the present time. The only through billing that I have in mind now to our line is shipments of grain and flour. We have through rates on stuff of that kind from the Missouri Pacific points in Missouri, and we have received shipments recently on——

Mr. Riddell: If you have through rates on food products it is quite reasonable to assume you have it on merchandise generally?

2304 Mr. Smyth: I think so, but there is very little traffic of that kind.

Examiner Burchmore: You have local tariffs on file with the Commission which would cover any such business, if they are not covered by the through rate?

Mr. Smyth: I think so.

Examiner Burchmore: For particulars as to your rates, we can refer to your tariffs, but what is your general basis of divisions on class freight, if you are able to testify as to that?

Mr. Smyth: The only one I can mention positively from memory is the rate on flour from points on the Missouri Pacific in Missouri, on which our division is 15 per cent of the Kansas City rate, which is 29 cents per 100 pounds.

Mr. Riddell: Might it not be well to have the witness file a statement as to just what through rate he has on other than forest products, and the divisions he gets out of that?

Examiner Burchmore: Yes, you may file such a statement.

Mr. Smyth: That division just mentioned would amount to 4.35 cents per 100 pounds.

Examiner Burchmore: I do not think it is necessary to go into the particulars of this phase of the matter further than to ask
2305 whether you are endeavoring to comply with all the state and Federal laws, such as the safety appliance act and rate legislation, that govern the methods and practice of railway common carriers.

Mr. Smyth: We are, and also are observing the Sixteen Hour law.

Examiner Burchmore: And you are incorporated as a common carrier under the laws of Arkansas?

Mr. Smyth: Yes, sir.

Examiner Burchmore: And you hold yourselves out to the public as desiring to transport any traffic offered to you?

Mr. Smyth: Yes, sir.

Examiner Burchmore: What is the valuation of the road and equipment?

Mr. Smyth: The book value is $160,707.16.

Examiner Burchmore: Do you think that is the real value?

Mr. Smyth: I do not know, that is what the road has cost.

Examiner Burchmore: Has it actually cost that?

Mr. Smyth: Yes, sir.

Examiner Burchmore: A good deal of that cost represents cost of changes in line and replacing originally poor construction incident to the taking over of what were formerly purely logging
2306 tracks.

Mr. Smyth: Yes, sir, and improving the road and putting it in shape.

Examiner Burchmore: It would not cost that much to build the present railroad as an initial proposition?

Mr. Smyth: No, sir.

Examiner Burchmore: Has this road ever paid dividends?

Mr. Smyth: Not to my knowledge.

Examiner Burchmore: Would you know if it had?

Mr. Smyth: No, unless it had paid dividends within the last two or three years, which it has not. The road now shows a deficit of some $12,000.

Examiner Burchmore: A year?

Mr. Smyth: No, that is the total deficit.

Examiner Burchmore: What was the deficit when you came on the road?

Mr. Smyth: About the same.

Examiner Burchmore: Then you have been coming out even for the past few years?

Mr. Smyth: No, the past year we lost $8,233.13.

Examiner Burchmore: But for the fiscal year 1909 you had a net profit of something in excess of $2,000?

2307 Mr. Smyth: Is that correct?

Examiner Burchmore: Is it not correct?

Mr. Smyth: I do not know about those figures.

Examiner Burchmore: Does that sound right to you?

Mr. Smyth: No, sir. 1909? According to my record, at the end of 1909 the books showed a deficit of $4,086.36.

Examiner Burchmore: Yes, for two or three years preceding, but from the operation for that particular year——

Mr. Smyth: For the current year?

Examiner Burchmore: You made about $2,000?

Mr. Smyth: Well, possibly so. I have no figures on that.

Examiner Burchmore: Well, we have that figure in; whether it is correct or not I am not sure, but the total operating revenues for that year are given as $27,438.76, total operating expenses, $25,421.22. Now of those operating revenues I might state that $22,845 was on freight supplied by the controlling interests supposedly, and other traffic paid $2,988.04. Then we have passenger traffic about $1,000 and mail, switching and rents about $500 for that year.

Mr. Smyth: Those are the figures furnished to the Commission in the annual report?

2308 Examiner Burchmore: I think so. They are contained here in a special report by one of our examiners.

Mr. Smyth: The amount I mentioned of $4,086.36——

Examiner Burchmore: Is an accumulated deficit, including the previous years.

Mr. Smyth: Yes, sir.

Examiner Burchmore: Have I asked you about the salaries of the general officers?

Mr. Smyth: No.

Examiner Burchmore: What are they?

Mr. Smyth. None of the general officers draw salaries except myself and the general superintendent.

Examiner Burchmore: Is your entire salary paid by the railroad?

Mr. Smyth: One fourth by the railroad and one fourth by the Saline River Lumber Company, and one fourth by the Doniphan, Kensett & Searcy.

Examiner Burchmore: You testified for the Doniphan, Kensett & Searcy?

Mr. Smyth: Yes, sir; and one quarter by the Doniphan Lumber Company.

2309 Examiner Burchmore: You work about one quarter of the time for each of these companies?

Mr. Smyth: And sometimes overtime.

Examiner Burchmore: Well, about half of your time for each of these four companies?

Mr. Smyth: Yes, sir. I think the time is pretty well distributed between the four proportionately.

Examiner Burchmore: Will you please describe briefly the service this company rendered for which it is paid these divisions? What are these divisions supposed to cover in the case of shipments moving over the Cotton Belt, and what do they in fact cover?

Mr. Smyth: The divisions are supposed to cover the service performed in hauling the logs to the mill from the spur connection. The lumber company pays the railroad company $3.00 per car for hauling the logs to the main line on their spurs. The logs are loaded by the lumber company.

Examiner Burchmore: Then these private spurs are operated by the lumber company for the railroad company?

Mr. Smyth: Yes, sir, that is as far as hauling logs is concerned.

Examiner Burchmore: Who unloads them at the mill?

Mr. Riddell: You have not answered the question fully yet.

Mr. Smyth: In what respect?

Mr. Riddell: You asked him what service he gives for this compensation.

Examiner Burchmore: Just continue the description of the movement of the logs and lumber with such details as you regard important.

Mr. Riddell: That is all you perform, I think. You haul them from the junction of the spur to the main mill.

Mr. Smyth: They are there unloaded.

Mr. Riddell: And the loaded lumber is handled by the Cotton Belt?

Mr. Smyth: Yes, sir.

Examiner Burchmore: If cars are furnished by the Cotton Belt?

Mr. Smyth: Yes, sir

Examiner Burchmore: But it is accurate to state as a matter of fact the lumber is loaded directly on to the cars by the Cotton Belt as if no other railroad was there?

Mr. Smyth: Yes, sir.

Examiner Burchmore: How about the billing?

Mr. Smyth: The bills of lading read from Carter, Arkansas.

Examiner Burchmore: Which is back on your line?

Mr. Smyth: Which is a point back on our line.

Examiner Burchmore: And do you issue those bills of lading?

Mr. Smyth: They are signed by the agent of the Cotton Belt and the Saline River agent.

Examiner Burchmore: But he signs them in his capacity as your agent?

Mr. Smyth: Yes, sir.

Examiner Burchmore: And he issues through way bills?

Mr. Smyth: He issues through way bills, yes, sir, for the Cotton Belt Company on shipments outbound and transfer made with the slip.

Examiner Burchmore: Slip transfer?

Mr. Smyth: Yes, sir, and southbound billing on shipments by the

Rock Island it is done by the same agent on the forms of the Saline River Railway. We haul those cars to Glynn, a distance of a little over 19 miles; that is the service performed on that part of the business.

2312 Mr. Riddell: That haul down from Draughon to this intersection of the Warren & Ouachita Valley, is in addition to the service you perform on shipments going out via the Cotton Belt?

Mr. Smyth: Yes, sir.

Examiner Burchmore: But there is no milling in transit on the Rock Island?

Mr. Smyth: No.

Examiner Burchmore: So the billing is from Draughon?

Mr. Smyth: Yes.

Mr. Riddell: But that billing must cover the service he renders?

Examiner Burchmore: But the logs are hauled for this other charge into the mill?

Mr. Smyth: Yes.

Examiner Burchmore: You pay the same charge on logs which subsequently move out on the Rock Island as on those which move out on the other roads?

Mr. Smyth: Well, there is a difference, there are some logs delivered in the pond there at the mill, and it is assumed that they will about equal the timber shipped out over the Rock Island, if there would be any distinction made on that point.

2313 Examiner Burchmore: Then the lumber company pays charges on some logs that go to the mill?

Mr. Smyth: The lumber company?

Examiner Burchmore: Yes.

Mr. Smyth: They pay only the $3.00 per car for bringing the logs into the main line.

Examiner Burchmore: Then that is not credited against the outbound charges?

Mr. Smyth: No.

Examiner Burchmore: Then on logs which are moved into the mill and subsequently moved out in the shape of lumber to Rock Island destinations, as a matter of fact the Saline River Railroad receives no charge for its haul into the mill?

Mr. Smyth: No.

Examiner Burchmore: It gets an indirect benefit from the lumber moving out?

Mr. Smyth: Yes.

Examiner Burchmore: But no direct charge?

Mr. Smyth: No.

Examiner Burchmore: There is a contract, is there not, between your company and the Cotton Belt?

2314 Mr. Smyth: I do not know of any.

Examiner Burchmore: Well, if I should tell you there is a contract you will look for it, will you not?

Mr. Smyth: Yes.

Examiner Burchmore: Would you have heard of it if there was?

Mr. Smyth: I might not have heard of it. These rates have beeen in effect for a long time.

Examiner Burchmore: I will ask you to file with the Commission a contract between your railroad or the lumber company and the Cotton Belt.

Mr. Smyth: Relating to divisions?

Examiner Burchmore: Relating to anything. I have not seen the contract and only a reference to it.

Mr. Smyth: If there is one.

Examiner Burchmore: I have a report to which the copy is referred to as being attached, but it is in fact detached.

Mr. Smyth: We will furnish it if we have it.

Examiner Burchmore: What is the nature of the contract between your railroad and the Warren & Ouachita Valley?

Mr. Smyth: We will also furnish you a copy of that
2315 contract.

Examiner Burchmore: If that contract relates particularly to rates or divisions, the regulations of the Commission require its filing.

Mr. Smyth: Yes.

Examiner Burchmore: I will say that I have what purports to be a copy of a contract dated January 7th, 1909, between the Warren & Ouachita Valley Railroad Company and your railway company, so you need not file that contract.

Mr. Riddell: You only want the ones with the Cotton Belt then?

Examiner Burchmore: Yes.

Mr. Smyth: Does that refer to shipments of lumber or logs?

Examiner Burchmore: I do not know, it is a long document. Do you know what it provides? We will read it and find out what it provides, and you can read it and find out what it provides. It is long enough to provide anything. What is the extent of the private spur tracks or tram road owned by the lumber company which connects with this railroad?

Mr. Smyth: At the present time I should say about seven miles.

2316 Examiner Burchmore: Who owns those spur tracks?

Mr. Smyth: The Saline River Lumber Company.

Examiner Burchmore: Who built them?

Mr. Smyth: The Saline River Lumber Company.

Examiner Burchmore: Who owns the rails?

Mr. Smyth: The Saline River Lumber Company.

Examiner Burchmore: How did they get them?

Mr. Smyth: I could not say.

Examiner Burchmore: They did not buy them from the railroad?

Mr. Smyth: They have had them a number of years?

Examiner Burchmore: Do you make any interline settlements with the Cotton Belt?

Mr. Smyth: Yes.

Examiner Burchmore: How do you settle your charges on traffic going to the Rock Island?

Mr. Smyth: Direct with the Rock Island or the delivering line.

Examiner Burchmore: Then you get your divisions from them and the Warren & Ouachita Valley gets its division from the Rock Island?

Mr. Smyth: Not in every case. In some cases we settle
2317 with the delivering carrier.

Examiner Burchmore: Well, some other road, such as the New York Central?

Mr. Smyth: Yes.

Mr. Riddell: I think the accounting department arrangement is that the delivering line divides up the revenue and settles with all the roads.

Mr. Smyth: Yes; for instance, if we had a few cars going to the Northern Pacific we would settle direct with the Northern Pacific.

Mr. Riddell: This railroad company owns all this property including its right of way, does it not?

Mr. Smyth: Yes, sir.

Mr. Riddell: And I believe you said, I am not certain, that your locomotives and your cars, except the skeleton cars, were equipped with air brakes in accordance with the rules of the Commission?

Mr. Smyth: Yes, and automatic couplers.

Mr. Riddell: Do you have any platform scales for the weighing of less than carload freight?

Mr. Smyth: Yes, sir, all less than carload shipments are
2318 weighed.

Mr. Riddell: Are you prepared to operate over spurs for other people on the same basis as you do for the Saline River Lumber Company?

Mr. Smyth: Yes.

Mr. Riddell: At New Edinburg are there any stores?

Mr. Smyth: There are eight or ten, or possibly twelve stores.

Mr. Riddell: Is there a bank there?

Mr. Smyth: Yes.

Mr. Riddell: And your line handles merchandise into that point?

Mr. Smyth: Into and out also.

(Witness excused.)

Whereupon, at 6:35 P. M., a recess was taken until 8:00 P. M.

2319 Evening Session.

8 P. M.

Fourche River Valley & Indian Territory Railway Company.

F. H. Hartshorn, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: I understand you are president of this railway company.

Mr. Hartshorn: Yes.

Examiner Burchmore: Are you an officer of any lumber company?

Mr. Hartshorn: Vice-President and general manager of the Fourche River Lumber Company.

Examiner Burchmore: By whom is the Fourche River Lumber Company owned or controlled?

Mr. Hartshorn: By Bigelow Brothers & Walker Company, headquarters in Chicago.

Examiner Burchmore: Are Bigelow Brothers & Walker interested in lumber operations elsewhere?

Mr. Harthorn: I think not, but I would not make that as an absolute positive statement.

Examiner Burchmore: But insofar as you are advised?

2320 Mr. Hartshorn: No.

Examiner Burchmore: By whom is the Fourche River Valley & Indian Territory Railway owned and controlled?

Mr. Hartshorn: The Fourche River Lumber Company.

Examiner Burchmore: Are the stockholders of the two companies common, or what is the relation?

Mr. Hartshorn: Virtually so; there are only five qualifying shares outside.

Examiner Burchmore: I understand that this railway company was incorporated in August, 1905, in Arkansas as a successor to the Arkansas River & Southern Railway Company?

Mr. Hartshorn: Yes.

Examiner Burchmore: The present company is a common carrier railroad under its charter?

Mr. Hartshorn: Yes.

Examiner Burchmore: Irrespective of what its practices may be.

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Was the Arkansas River & Southern Railway Company ostensibly a common carrier railroad?

Mr. Hartshorn: Yes, sir.

2321 Examiner Burchmore: Now, as a matter of fact the Fourche River Lumber Company and this railroad company are in substance controlled by Bigelow Brothers & Walker?

Mr. Hartshorn: They are.

Examiner Burchmore: The Fourche River Lumber Company has a mill located at Graytown?

Mr. Hartshorn: It has.

Examiner Burchmore: Has it any other mill?

Mr. Hartshorn: It has not in operation.

Examiner Burchmore: The line of the Fourche River Valley and Indian Territory Railroad as I understand it connects with the Rock Island system at Bigelow, Arkansas?

Mr. Hartshorn: It does.

Examiner Burchmore: Is that one of the termini of the road?

Mr. Hartshorn: It is.

Examiner Burchmore: Please describe in your own way the line of the road and mileage.

Mr. Hartshorn: The Fourche River Valley & Indian Territory Railway starts at Bigelow, Arkansas, a junction point with the Rock Island and runs in a southerly direction for about six miles, then in

a westerly direction, the total length of the road, main line,
2322 being 14.8 miles. In making this six miles it goes by Rankin Creek, which makes the length of the line more than six miles. I think it is nearer nine than six.

Examiner Burchmore: Then you have about 14.8 miles of main line?

Mr. Hartshorn: Yes.

Examiner Burchmore: And about two miles of side track?

Mr. Hartshorn: Yes.

Examiner Burchmore: This is a standard gauge line?

Mr. Hartshorn: Yes.

Examiner Burchmore: Does it connect with the line of any other railroad company?

Mr. Hartshorn: Incorporated railroad company, no, sir.

Examiner Burchmore: What private tram lines connect with it?

Mr. Hartshorn: The Fourche River Lumber Company's.

Examiner Burchmore: What is the extent of those private tram lines?

Mr. Hartshorn: The present line is about ten miles.

Examiner Burchmore: Where is that located with reference to the Fourche Railroad Company?

2323 Mr. Hartshorn: It joins the railway company at a place we call Wye, Arkansas, which is a post office.

Examiner Burchmore: Where is Wye with reference to the mill?

Mr. Hartshorn: It is about nine miles by railroad. That distance will be verified by Mr. Collins.

Examiner Burchmore: Wye is not the other end of the line?

Mr. Hartshorn: No, sir. Bellevue is the other end of the line.

Examiner Burchmore: Are there any other mills on your line besides the one at Graytown?

Mr. Hartshorn: Not directly.

Examiner Burchmore: You said that this company had no other mill in operation?

Mr. Hartshorn: Yes.

Examiner Burchmore: Has it another mill which is not being operated?

Mr. Hartshorn: Yes, sir; a small shingle mill at Perry, Arkansas.

Examiner Burchmore: How long has that been closed down?

Mr. Hartshorn: Five years anyway.

2324 Examiner Burchmore: This entire railroad is in Perry County, Arkansas?

Mr. Hartshorn: A very short distance in Pulaski County. I do not know whether that has been filed with the Commission or not, but we found that the corners there jogged and we run across. I do not know whether 181 feet, I think it is, into Pulaski County; a very short distance on account of the section corners there.

Examiner Burchmore: When was the mill at Graytown opened?

Mr. Hartshorn: In the fall of 1903.

Examiner Burchmore: Was it then operated by the present corporation?

Mr. Hartshorn: It was.

Examiner Burchmore: When was the Fourche River Lumber Company incorporated?

Mr. Hartshorn: In the spring of 1903.

Examiner Burchmore: About that time?

Mr. Hartshorn: Just prior to that, before that.

Examiner Burchmore: This is the first mill operation in which this company has been interested?

Mr. Hartshorn: Yes, sir.

2325 Examiner Burchmore: And the mill was built by this company?

Mr. Hartshorn: It was.

Examiner Burchmore: When was construction begun on this railroad?

Mr. Hartshorn: In 1903, the spring I think of 1903.

Examiner Burchmore: How much of it was constructed at that time?

Mr. Hartshorn: Well, prior to the incorporation of the Fourche River Valley and Indian Territory Railroad there was about 8.9 miles.

Examiner Burchmore: Now, as a matter of fact this railroad in its inception was a mere plant facility, was it not? I mean it was originally built to draw the logs to the mill and the lumber from the mill to the railroad?

Mr. Hartshorn: The original building of the road was from a place that was called at that time Esau into the mill to facilitate getting the machinery to the mill.

Examiner Burchmore: Where is Esau?

Mr. Hartshorn: Esau is now Bigelow.

Examiner Burchmore: It was built from the junction with the Rock Island?

2326 Mr. Hartshorn: It was built from the junction with the Rock Island to the mill site.

Examiner Burchmore: That is only half a mile?

Mr. Hartshorn: Oh, well, no; I guess it is nearly three-quarters of a mile.

Examiner Burchmore: Well, it is less than a mile?

Mr. Hartshorn: Yes.

Examiner Burchmore: I thought you said the road was originally nine miles.

Mr. Hartshorn: No, I said we started there originally in that way and then in accordance with our attorney's advice, he advised us not to incorporate until we got through with all our other work. We intended to incorporate right along from the start.

Examiner Burchmore: What would have been your purpose in incorporating?

Mr. Hartshorn: Because it would be the main line road, by that I mean the tap line road, we will call it.

Examiner Burchmore: You did not want to serve the public until you got through serving yourselves?

Mr. Hartshorn: No, the trouble was with so much work on hand at one time, that is all.

2327 Examiner Burchmore: I thought the advice you would secure from your lawyer would be legal rather than practical.

Mr. Hartshorn: Yes.

Examiner Burchmore: He advised you not to incorporate. What was the objection in his mind to the incorporation in 1903?

Mr. Hartshorn: Only in that way, just as the statement I have made to you. We told him in regard to different things and in regard to the railroad incorporation, and they are very sensible people——

Examiner Burchmore: I would not go any further into that. When was the balance of the road constructed, immediately after the incorporation?

Mr. Hartshorn: Yes, sir; I think by November of that year the balance of it was constructed.

Examiner Burchmore: Who constructed the portion of the road built after the incorporation?

Mr. Hartshorn: The railway company.

Examiner Burchmore: Did it do that construction itself or through contractors?

Mr. Hartshorn: Part of it was done by force account and part of it under contract.

2328 Examiner Burchmore: Part of it then was constructed by the lumber company?

Mr. Hartshorn: Yes.

Examiner Burchmore: What charge did the lumber company make for the construction?

Mr. Hartshorn: We sold the 8.9 miles, about that, for $219,500 worth of the stock of the railway company.

Examiner Burchmore: Was there any other stock issued?

Mr. Hartshorn: $500.

Examiner Burchmore: And that went to directors?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Was that $219,000——

Mr. Hartshorn: $219,500.

Examiner Burchmore: Was that supposed to be the actual cost of the construction of that eight miles of road?

Mr. Hartshorn: No, the road actually cost without any interest, just a trifle under $200,000.

Examiner Burchmore: What was the $19,000?

Mr. Hartshorn: That was in the nature of making up their interest and——

Examiner Burchmore: That was supposed to be actual cost plus interest on the investment?

2329 Mr. Hartshorn: Yes, virtually that.

Examiner Burchmore: The financing then of the road originally was arranged by the lumber company?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: What is the present capitalization of the railroad?

Mr. Hartshorn: $220,000.

Examiner Burchmore: There has been no increase in the capitalization?

Mr. Hartshorn: No.
Examiner Burchmore: Are there any bonds outstanding?
Mr. Hartshorn: $100,000.
Examiner Burchmore: In whose hands are they?
Mr. Hartshorn: They are in the Fourche River Lumber Company.
Examiner Burchmore: On what account were they issued?
Mr. Hartshorn: On account of indebtedness, to take up notes.
Examiner Burchmore: What did those notes represent?
Mr. Hartshorn: Money advanced to the railway company.
Examiner Burchmore: What use was made of that money?
Mr. Hartshorn: Construction.
2330 Examiner Burchmore: Construction of what?
Mr. Hartshorn: Of the balance of the road.
Examiner Burchmore: The $219,500 only covered the——
Mr. Hartshorn: The 8.9 miles, about.
Examiner Burchmore: Then you constructed an additional 8 or 9 miles?
Mr. Hartshorn: 14.8, the difference between that.
Examiner Burchmore: Then you construction 6 miles more?
Mr. Hartshorn: Just about.
Examiner Burchmore: That cost only $100,000?
Mr. Hartshorn: The actual cost was not that much.
Examiner Burchmore: It seems to me if you can build 6 miles for less than $100,000 you ought to be able to build 8 or 9 miles for a good deal less than $200,000.
Mr. Hartshorn: We spent in the neighborhood of $25,000 for about one-eighth of a mile which covered the bridge, iron or steel bridge across the Fourche River with the approaches thereto.
Examiner Burchmore: That is in the original 9 miles?
Mr. Hartshorn: Yes, sir.
Examiner Burchmore: What else was there that made
2331 that original construction so expensive?
Mr. Hartshorn: It is heavy work.
Mr. Walter: Did not that also include the equipment?
Mr. Hartshorn: Oh, yes.
Examiner Burchmore: What was the value of the equipment that was included in the $200,000?
Mr. Hartshorn: I think that was $29,204.85.
Examiner Burchmore: Well, now you have $25,000 for that eighth of a mile including the bridge and nearly $30,000 for equipment; that makes $55,000. Now, the difference between that and $200,000 is $145,000, that it cost you to construct about 8 miles of road. How do you reconcile that figure with the other figure of less than $100,000 for the construction of the balance of the line?
Mr. Hartshorn: When we got on top of the plateau the construction was not as heavy as it was in getting on to the plateau.
Examiner Burchmore: Where is the top?
Mr. Hartshorn: At Wye, the 8.9 miles.
Examiner Burchmore: Then both of those figures, I refer to the

$100,000 and the $219,500 are supposed to represent actual cost of construction plus an interest charge?

2332 Mr. Hartshorn: Of the bonds, it was $80,000, the actual amount.

Examiner Burchmore: And $20,000 of that was discount?

Mr. Hartshorn: Discount.

Examiner Burchmore: Well, could you not have sold those bonds for better than 80?

Mr. Hartshorn: 5 per cent bonds at these times? I doubt it.

Examiner Burchmore: Those are not a very safe investment then, those bonds?

Mr. Hartshorn: Well, not if the Commission rules against us.

Examiner Burchmore: How are those bonds secured?

Mr. Hartshorn: By mortgage of all the physical property and rolling stock.

Examiner Burchmore: Are those bonds in any way secured by the lumber company?

Mr. Hartshorn: No, sir.

Examiner Burchmore: I understand that the officers of the Fourche River Lumber Company and the Fourche River Valley and Indian Territory Railroad Company are substantially identical?

2333 Mr. Hartshorn: Yes, sir; a difference in positions that is all.

Examiner Burchmore: What is the weight of the rail in this railroad?

Mr. Hartshorn: 56-pound.

Examiner Burchmore: What is the character of the construction?

Mr. Hartshorn: First class.

Examiner Burchmore: It is a well built railroad?

Mr. Hartshorn: It is.

Examiner Burchmore: The bridges are substantial?

Mr. Hartshorn: Yes.

Examiner Burchmore: Has it any severe grades?

Mr. Hartshorn: It has, three per cent. I would rather have Mr. Collins testify on those matters, if you want to go in them in detail.

Examiner Burchmore: I do not think it is necessary. If you say that the road is fairly well built——

Mr. Hartshorn: Yes, sir. We have a great deal of rock, the majority of it.

Examiner Burchmore: May I ask you about the station buildings or Mr. Collins?

2334 Mr. Hartshorn: I can answer, in a general way.

Examiner Burchmore: Just advise us in general.

Mr. Hartshorn: We entered into a contract with the Rock Island for joint tracks and station buildings at Bigelow.

Examiner Burchmore: What was the date of that contract?

Mr. Hartshorn: Well, now I——

Examiner Burchmore: Some years ago?

Mr. Hartshorn: Well, I would say that it was in the early part of 1906; and that contract provided for the maintaining of joint

tracks and stations, and in addition to that we have a two story station building, the upper portion of which is occupied by the officers of the railway company.

Examiner Burchmore: Where is that located?

Mr. Hartshorn: At Graytown. At Wye we have a store room and also at Bellevue a store room or warehouse.

Examiner Burchmore: Any additional freight platforms or other freight facilities?

Mr. Hartshorn: We have at Orchard a freight platform and at Rankin and Bellevue—at all of the stations they have platforms there.

Examiner Burchmore: Those facilities are adequate for
2335 the handling of any freight that has thus far been offered to you?

Mr. Hartshorn: They are.

Examiner Burchmore: You have a station agent at Graytown and the agent at Bigelow I understand acts as a joint agent?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Are there any other agents?

Mr. Hartshorn: None in the broad sense of the word.

Examiner Burchmore: In the sense of station agents?

Mr. Hartshorn: Yes.

Examiner Burchmore: Have you any track scales?

Mr. Hartshorn: No, sir; the lumber company has.

Examiner Burchmore: Where are those track scales, in the mill yard?

Mr. Hartshorn: Yes, sir, or to the south.

Examiner Burchmore: Those track scales are used by the railway company?

Mr. Hartshorn: They are.

Examiner Burchmore: How many locomotives does this railroad own?

Mr. Hartshorn: One.

Examiner Burchmore: Does it lease any locomotives?

2336 Mr. Hartshorn: It does not, except it has leased from the Rock Island, when repairs were necessary on its own locomotive.

Examiner Burchmore: What does it pay for that locomotive when it leases it?

Mr. Hartshorn: To my best recollection it was ten dollars a day; it might have been twelve.

Examiner Burchmore: That was exclusive of fuel?

Mr. Hartshorn: Oh, yes.

Examiner Burchmore: You furnished the fuel?

Mr. Hartshorn: Yes.

Examiner Burchmore: And you furnished the crew?

Mr. Hartshorn: And the train crew.

Examiner Burchmore: What kind of a locomotive do you get for ten dollars a day?

Mr. Hartshorn: I would say it was a 65-ton, but now I am not prepared to say.

Examiner Burchmore: Pretty good locomotive?

Mr. Hartshorn: Well, not as good as our own.

Examiner Burchmore: Your own locomotive is described in your reports to the Commission?

Mr. Hartshorn: Yes.

2337 Examiner Burchmore: How many passenger cars have you, if any?

Mr. Hartshorn: One combination.

Examiner Burchmore: One combination passenger and freight or passenger and caboose?

Mr. Hartshorn: Passenger and baggage. We carry freight in it, too.

Examiner Burchmore: How many freight cars and what is their character?

Mr. Hartshorn: I would rather—I think I can go into the reports, or Mr. Collins can give you that.

Examiner Burchmore: Mr. Colins, can you state how many you have?

Mr. Collins: Yes, sir; two box cars, eleven flat cars, and forty-eight other cars.

Examiner Burchmore: Are there any cars owned by the lumber company and used by the railroad company?

Mr. Hartshorn: No, sir.

Examiner Burchmore: Does this company handle passengers for hire?

Mr. Hartshorn: It does.

Examiner Burchmore: What is the extent of its passenger

2338 traffic?

Mr. Hartshorn: To the best of my recollection it was about $1100 for the last fiscal year.

Examiner Burchmore: What is your fare?

Mr. Hartshorn: Three cents a mile.

Examiner Burchmore: What is the usual collection from a passenger, ten cents, a quarter or fifty cents?

Mr. Hartshorn: I should say about thirty cents.

Examiner Burchmore: Do you handle the United States mail?

Mr. Hartshorn: Not under contract. The post office at Wye, Arkansas, was established early this year, and I understand the mail contract will not be let until the next quarter.

Examiner Burchmore: You have reason to suppose you will get the contract?

Mr. Hartshorn: We have.

Examiner Burchmore: Does any express company operate over your line?

Mr. Hartshorn: We do not—we carry the express which comes in as freight to the end of the line.

Examiner Burchmore: Under any arrangement with any express company?

2339 Mr. Hartshorn: No.

Examiner Burchmore: Do the passengers buy tickets?

Mr. Hartshorn: They do as much as we can make them, at the

Bigelow and Graytown depots, but none at the other end of the line as we have no agents.

Examiner Burchmore: Are agents of this lumber company transported over the railroad free?

Mr. Hartshorn: Two employees only.

Examiner Burchmore: What is your total freight tonnage inbound for a given period?

Mr. Hartshorn: In dollars and cents?

Examiner Burchmore: In tons?

Mr. Hartshorn: 145,351 tons.

Examiner Burchmore: For what period?

Mr. Hartshorn: For the fiscal year ending June 30, 1910.

Examiner Burchmore: Is that a substantial increase over the preceding year?

Mr. Hartshorn: I would say not. I should think it was about the usual.

Examiner Burchmore: Is there any duplication of figures in that statement?

2340 Mr. Hartshorn: It includes the tonnage of the logs in and tonnage of the lumber out manufactured from those logs?

Examiner Burchmore: Have you made any separation of the logs and lumber figures?

Mr. Hartshorn: The lumber out was, from the Fourche River Lumber Company alone, this is—no, this is from the whole, from every one, 31,176 tons.

Examiner Burchmore: Now for the fiscal year ending June 30, 1908, your total figure seems to be 96,156 tons.

Mr. Hartshorn: 1908?

Examiner Burchmore: 1908.

Mr. Hartshorn: This is for the year 1910.

Examiner Burchmore: Then your traffic has increased?

Mr. Hartshorn: Over 1908, yes, sir. I was referring to 1909.

Examiner Burchmore: You have given the figures of logs and lumber handled for the Fourche River Lumber Company. Have you any other figures on your traffic?

Mr. Hartshorn: Yes, that figure that I gave you, though, was for the lumber from all parties. Now forest products for

2341 other than the lumber company but not including lumber. 4,543 tons.

Examiner Burchmore: What about lumber for other parties?

Mr. Hartshorn: That is included in that 31,176. I can give you that later or furnish it to you later on if you desire it, but I cannot now.

pany, 86 per cent, and on forest products it was 96.8 per cent of that Fourche River Lumber Company traffic?

Mr Hartshorn: Yes, sir; I should say 95 per cent.

Examiner Burchmore: Have you any merchandise and general freight figures?

Mr. Hartshorn: Yes, sir. Freight for the Fourche River Lumber Company, 2,683 tons; freight for other parties, 448 tons.

Examiner Burchmore: Have you got any percentages worked out?

Mr. Hartshorn: I have the freight of other than forest products for other parties, 14 per cent, and the Fourche River Lumber Company, 86 per cent, and on forest products it was 96.8 per cent for the Fourche River Lumber Company and 3.2 for other parties.

2342 Examiner Burchmore: Revenue freight and not tonnage?

Mr. Hartshorn: No, those are our tonnage figures.

Examiner Burchmore: Then of the entire tonnage of the road for that fiscal year I gather it is some 90 or 95 per cent which was furnished by the Fourche River Lumber Company?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Will you prepare and file at your early convenience a tonnage statement such as we have requested from the other companies?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: At this point I might also ask for a map.

Mr. Walter: We will do that, but Mr. Hartshorn has a map there that I think he can furnish you.

Mr. Hartshorn: It is not a regular blue print but it is a map which shows the line of the road. Now this shows Little Rock. That is not literally true; Little Rock is farther down, and it shows also over here Walden; that is not literally true, it is farther west. But Bigelow and Graytown and the road are virtually correct.

Examiner Burchmore: What are the shaded portions of

2343 this map?

Mr. Hartshorn: The Fourche River Lumber Company's land.

Examiner Burchmore: Could you mark it in on this map in ink, the precise location of your saw mill, or is it marked?

Mr. Hartshorn: No, it is not marked, but it is right in here. (Indicating.)

Mr. Walter: Indicate it with an "X."

Mr. Hartshorn: Yes.

Examiner Burchmore: The mill is at the point marked "X" in ink on this map?

Mr. Hartshorn: Yes.

Examiner Burchmore: Is the connection with the Rock Island shown with approximate accuracy?

Mr. Hartshorn: It does not show any of the interchange tracks here or the stations. Of course that is on a very small scale.

Examiner Burchmore: This map will suffice if you will also file a small sketch of the terminals at Bigelow and the interchange tracks there. I also suggest if you can file one or two copies of this map with the Commission it will be a convenience. The whole pamphlet may be filed. Is it issued by your company?

2344 Mr. Hartshorn: By our agents.

(The paper so offered and identified was received in evidence, and thereupon marked Fourche River & Indian Territory Exhibit No. 1, Witness Hartshorn, received in evidence December 15, 1910, and is attached hereto.)

Examiner Burchmore: Do you publish any passenger fares?
Mr. Hartshorn: Schedules?
Examiner Burchmore: Yes.
Mr. Hartshorn: No, not generally speaking. We have it posted in the station.
Examiner Burchmore: It is not necessary to file it with the Interstate Commerce Commission I assume?
Mr. Hartshorn: No.
Examiner Burchmore: Do you have any local class and commodity rates applying between points on your line?
Mr. Hartshorn: We do.
Examiner Burchmore: Are those rates filed with the Interstate Commerce Commission so as to be available in connection with Interstate movements?
Mr. Hartshorn: They are not. We have a letter which arrived just shortly before I came down here asking for that and
2345 it will be attended to soon after my return home.
Examiner Burchmore: Do you understand the Interstate Commerce Commission asks carriers to file rates?
Mr. Hartshorn: To file tariffs?
Examiner Burchmore: Yes.
Mr. Hartshorn: That is what they requested of us. This is a local distance tariff.
Examiner Burchmore: I did not know we had a department request for tariffs.
Mr. Walter: Yes, that is for a separate rate to be applied on through shipments.
Mr. Hartshorn: Yes.
Examiner Burchmore: I assume you are a party to joint tariffs issued by the Rock Island and other carriers?
Mr. Hartshorn: We are.
Examiner Burchmore: Are there such tariffs naming joint rates on classes and commodities other than on lumber?
Mr. Hartshorn: There are not.
Examiner Burchmore: Then the only tariff to which you are joint parties is on lumber and forest products?
Mr. Hartshorn: Yes, but we have a contract with the Rock Island providing for other commodities whenever the tonnage gets
2346 sufficient.
Examiner Burchmore: Do you have a joint rate on coal?
Mr. Hartshorn: We do not.
Examiner Burchmore: Do you burn coal in your locomotives?
Mr. Hartshorn: We do.
Examiner Burchmore: Where do you get that coal?
Mr. Hartshorn: At the present time from Hartsford, Arkansas, a point on the Rock Island.
Examiner Burchmore: You take delivery of it at Bigelow?
Mr. Hartshorn: Bigelow, Arkansas.
Examiner Burchmore: These joint rates on lumber which you have with the Rock Island, do they apply from all points on your line as points of origin?

Mr. Hartshorn: They do.

Examiner Burchmore: What is the rate basis?

Mr. Hartshorn: The rate basis is the same as from Bigelow, Arkansas; that is from Greytown it is the same as from Bigelow, Arkansas, and from other points west thereof it is one cent per hundred pounds higher than Bigelow.

Examiner Burchmore: What divisions do you receive out of these point rates?

2347 Mr. Hartshorn: Two and three quarter cents when to Oklahoma points from Graytown; three and three-quarter cents when to Oklahoma points west of Graytown; points that carry the one cents higher rate.

Examiner Burchmore: That is to all points in Oklahoma where there are joint rates?

Mr. Hartshorn: Yes, sir, I so understood your question.

Examiner Burchmore: Certainly.

Mr. Hartshorn: And other interstate points, from Graytown three cents and from points west thereof which carry the one cent higher rate four cents. No division to intra-state destinations except where the movement moves in interstate movement.

Examiner Burchmore: Well, are there any joint through rate stations on your line to points in Arkansas?

Mr. Hartshorn: I think there is one point only, on the Midland Valley, but there are several on the Kansas City Southern, and quite a few on the Frisco.

Examiner Burchmore: But all those shipments would move on the interstate movement?

Mr. Hartshorn: Interstate movement.

Examiner Burchmore: Then as a matter of fact there are
2348 no joint through rates out of which you do not receive a division?

Mr. Hartshorn: No, that is true.

Examiner Burchmore: Where does most of your traffic go to? Any particular territory?

Mr. Hartshorn: Well, west and north.

Examiner Burchmore: You receive three cents as a division on most of your traffic?

Mr. Hartshorn: Yes.

Examiner Burchmore: The rates you said were one cent higher from points west of Graytown and from Graytown?

Mr. Hartshorn: Yes.

Examiner Burchmore: That additional cent in each case is retained by your company and the Rock Island makes no greater earnings on a shipment west of Graytown and from Graytown?

Mr. Hartshorn: Well, in reality we only get, you might say, so far as the Rock Island is concerned, 2¾ cents and 3 cent divisions. The other cent comes from the extra freight.

Examiner Burchmore: Is that the greatest division you have ever received?

Mr. Hartshorn: Until a reduction of rates into Oklahoma
2349 was made we received the same to Oklahoma points as we received to other points.

Examiner Burchmore: This division sheet which I have before me is numbered Chicago Rock Island division sheet No. 3 and seems to have become effective in April, 1909. That division sheet carries a note reading as follows: with a minimum to the Rock Island lines of five mills per ton per mile, but in no case must the Fourche River Valley & Indian Territory receive less than one cent per hundred pounds.

Mr. Hartshorn: That is true, and I wish to state that we also have a division on forest products of two cents per hundred pounds from all stations on the line other than lumber, lath and shingles. The divisions I have mentioned apply on lumber, lath and shingles only.

Examiner Burchmore: These divisions are the same on stuff milled in transit as on lumber moving through without transit?

Mr. Hartshorn: Yes.

Examiner Burchmore: This railroad has a complete supply of stationery such as bills of lading and way bills, letterheads and so forth?

Mr. Hartshorn: Yes.

2350 Examiner Burchmore: I do not know that the absence of such stationery would in any way affect its status. But do you endeavor to comply with all the state and Federal laws that are enacted to govern the conduct of railroad common carriers?

Mr. Hartshorn: We do.

Examiner Burchmore: Is your equipment furnished with safety devices?

Mr. Hartshorn: All that portion that leaves our line, and the others do not come under the Safety Appliance Act, the center of drawhead being only twenty-four inches from the top of the rail.

Examiner Burchmore: I assume from your previous testimony that the value of this road with equipment is $219,500 plus $100,000?

Mr. Hartshorn: I said that the $80,000 is the actual net returns on that bond issue.

Examiner Burchmore: Then the value of the road with equipment is apparently an even $300,000.

Mr. Hartshorn: I think that our books show $347,000 in round figures.

Examiner Burchmore: Is there any indebtedness on the

2351 road at the present time?

Mr. Hartshorn: Only current indebtedness.

Examiner Burchmore: Some of the additions and betterments have been paid for out of earnings. The point is your road today is apparently worth more than the sum of your capital stock and bond issue.

Mr. Hartshorn: No, the assets I said include the earnings up to June 30, 1910.

Examiner Burchmore: I do not quite understand.

Mr. Hartshorn: We have in round figures I would say $347,000 worth of assets. We have a surplus on hand of $17,000 and we have in the neighborhood of eighty-five hundred or nine thousand dollars of current accounts.

Examiner Burchmore: Receivable?

Mr. Hartshorn: No, payable.

Examiner Burchmore: What do those represent, those accounts payable?

Mr. Hartshorn: I can give you a list of them but not today.

Examiner Burchmore: These are not accounts with the lumber company?

Mr. Hartshorn: Yes, sir; some of them.

2352 Examiner Burchmore: Do they represent salaries?

Mr. Hartshorn: Oh, no.

Examiner Burchmore: Has this railroad paid any dividends?

Mr. Hartshorn: It has.

Examiner Burchmore: Indicate the extent of those dividends.

Mr. Hartshorn: Last year it was sixteen per cent, $35,200.

Examiner Burchmore: What was it the preceding year? Give a history of the dividends from the beginning with substantial accuracy.

Mr. Hartshorn: They have paid in the neighborhood of $100,000, very close to it.

Examiner Burchmore: In how many years?

Mr. Hartshorn: Since the incorporation.

Examiner Burchmore: That is in about five years?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: What about the salaries of the officers of this railroad?

Mr. Hartshorn: Of the lumber company?

Examiner Burchmore: What are their salaries from the railroad?

Mr. Hartshorn: I receive $100 and Mr. Bigelow $50, Mr.

2353 Walker $60 per month. None of the other employees or persons connected with the lumber company receive any salary.

Examiner Burchmore: Those salaries amount almost to a small dividend on the stock, do they not?

Mr. Hartshorn: $2,400 a year.

Examiner Burchmore: That is one per cent on your capitalization?

Mr. Hartshorn: Yes.

Examiner Burchmore: Are those salaries moderate for the services rendered?

Mr. Hartshorn: I should judge so.

Examiner Burchmore: What general office force has the railroad company, any?

Mr. Hartshorn: Yes, it has an auditor who also occupies the position of station agent and we have an office boy. At times we also have extra help. There is quite a little work attendant upon getting out reports and so forth and Mr. Collins of course has general supervision of the office and outside.

Examiner Burchmore: That extra help is furnished by the lumber company employees as a rule, is it not?

Mr. Hartshorn: It never has been so.

2354 Examiner Burchmore: Do these regular employees also work for the lumber company?

Mr. Hartshorn: Oh, no, they perform no work for the lumber company.

Examiner Burchmore: This company has some private tram roads connected with the railroad?

Mr. Hartshorn: It has.

Examiner Burchmore: Does it own any locomotives?

Mr. Hartshorn: Two.

Examiner Burchmore: Are there any other saw mills on your line?

Mr. Hartshorn: Not directly.

Examiner Burchmore: What are there in that vicinity?

Mr. Hartshorn: There is one just south of Orchard and some beyond the end of the line at Bellevue.

Examiner Burchmore: Are those mills operated?

Mr. Hartshorn: The one south of Orchard is now, and I am not positive about those west of Bellevue.

Examiner Burchmore: Do they ship anything over your line?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: What is the extent of those shipments?

Mr. Hartshorn: Small.

2355 Examiner Burchmore: They team their lumber over to your line?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Can a mill that has to team its logs up to the mill, as I suppose these mills do, and then has to team its lumber over to the line of some railroad and then has to pay the regular interstate rate of freight, compete at all successfully with another mill that gets its lumber to market for the interstate rate without paying any teaming bill?

Mr. Hartshorn: I think I can answer that question by making a statement regarding the purchase just recently by Mr. Collins for the railway company of this little mill south of Orchard. He purchased some bridge stringers at a less price than the lumber company would furnish them to him.

Examiner Burchmore: That may mean either of two things: it may mean that that little mill could afford to sell lumber very much cheaper than you could because of its economical operation or because it got its timber at a less cost or some such reason, or it might mean it was unable to reach any other market where it had to pay freight and therefore was willing to sell its product at a very

2356 much cheaper price on that account.

Mr. Hartshorn: No they can get to the markets really cheaper than the lumber company can.

Examiner Burchmore: How do you explain that?

Mr. Hartshorn: The cost on their lumber out is one cent per hundred pounds over ours.

Examiner Burchmore: But they have to team it to get it to your railroad?

Mr. Hartshorn: Yes, sir, but they were able to compete on this bill which I just spoke of.

Examiner Burchmore: But are they able to compete at St. Louis on lumber for example?

Mr. Hartshorn: The small mill in my estimation makes the market for lumber and not the big mill.

Examiner Burchmore: Do you mean they are like tramp steamships, they will do the best they can?

Mr. Burchmore: That does not mean they are making a profit on their lumber?

Mr. Hartshorn: Well, I am not able to answer that.

Examiner Burchmore: What about the timber holdings of this lumber company in the territory which is served by the railroad company in question?

2357 Mr. Hartshorn: How many acres?

Examiner Burchmore: Yes, and how many board feet standing in the woods?

Mr. Hartshorn: About 45,000 acres, 225,000,000 feet.

Examiner Burchmore: That includes stumpage rights?

Mr. Hartshorn: Yes, sir; there is included in that possibly 1500 acres, 7,000,000 of timber rights owned.

Examiner Burchmore: That is yellow pine lumber?

Mr. Hartshorn: Yes, sir and a small amount of hard woods mixed with it.

Examiner Burchmore: Is there any hard wood cutting going on in those camps?

Mr. Hartshorn: We are cutting what hard wood amongst the pine.

Examiner Burchmore: You sell hard wood?

Mr. Hartshorn: Yes, sir, a small per cent.

Examiner Burchmore: You have rates on that the same as on pine?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: And the divisions are on the same general basis?

Mr. Hartshorn: Yes, sir.

2358 Examiner Burchmore: Is there any timber in the territory adjacent to your line owned by other interests?

Mr. Hartshorn: Lumber corporations?

Examiner Burchmore: Other lumber corporations or private owners, any large tracts of timber?

Mr. Hartshorn: Well, the A. J. Neimeyer Lumber Company just south of us, and no other corporation, but there is quite an amount of timber owned by other people, individuals.

Examiner Burchmore: In what part of Arkansas is this railroad.

Mr. Hartshorn: It is thirty-nine miles west of Little Rock.

Examiner Burchmore: You said the Niemeyer interests have timber in that vicinity?

Mr. Hartshorn: South of us.

Examiner Burchmore: That is along the Little Rock Maumee & Western?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: How near does that road come to you?

Mr. Hartshorn: Well their timber comes right together,
2359 you might say; their line of railroad is only about six miles from us.

Examiner Burchmore: Who is this "B. L. Company" marked on this map?

Mr. Hartshorn: I could not tell you.

Mr. Walter: On what map is this?

Examiner Burchmore: This is a private map drawn in the Commission's office. We could not find a railroad map that had all these railroads on it so we had to make one. Is not that the Bryant Lumber company?

Mr. Hartshorn: Yes, sir, but they have no railroad.

Examiner Burchmore: This is supposed to be a representation of your railroad running out here towards Brizz, is it not?

Mr. Hartshorn: Well, yes. I do not know what the Bryant Lumber Company would be doing in there.

Examiner Burchmore: That will develop later, if there is any relation.

Mr. Walter: It ought to be B. W., probably, Bigelow-Walker.

Mr. Hartshorn: Yes, perhaps it is the Bigelow-Walker Company.

Examiner Burchmore: You never heard of the Bryant
2360 Lumber Company?

Mr. Hartshorn: Yes, but they have no railroad, I said.

Examiner Burchmore: Are not they connected with the Fourche River Lumber Company in some way?

Mr. Hartshorn: Not in any way.

Examiner Burchmore: No relation or ownership relation between the two companies?

Mr. Hartshorn: Not at all.

Examiner Burchmore: Is one of them lessee and the other the lessor of any lands?

Mr. Hartshorn: No.

Examiner Burchmore: I have before me what purports to be a copy of a complaint at law filed in the Perry County Circuit Court by the Bryant Lumber Company, complainant, against the Fourche River Lumber Company, defendant. Are you acquainted with the particulars of that lawsuit?

Mr. Hartshorn: Well, there have been several of them. If you will let me see the complaint I can tell you.

(Paper handed witness.)

Mr. Hartshorn (after examining paper): Yes, sir; I am familiar with it.

Examiner Burchmore: What was the outcome of that liti-
2361 gation?

Mr. Hartshorn: It was a verdict against us for, I won't undertake to tell you the amount, but the amount was not for each specific time but a blank amount, and the case is now in the Supreme Court of Arkansas.

Examiner Burchmore: Then the Bryant Lumber Company won that suit?

Mr. Hartshorn: Yes, sir, in the Circuit Court.

Examiner Burchmore: What was the nature of that proceeding, can you state it in the record very briefly?

Mr. Hartshorn: You want the gist of the matter, how it arose?

Examiner Burchmore: Just the gist of it, how it arose, and how it was involved. Do not go into all the details but just state in a few words.

Mr. Hartshorn: The Bryant Lumber Company had some lands running down to Rankin Creek, over which we desired to pass with the railway, and we finally came to an understanding with them regarding the hauling of their logs, and left a large amount to arbitration.

Examiner Burchmore: Before you proceed, what was the nature of that understanding with the Bryant Lumber Company
2362 respecting the movement of their logs?

Mr. Hartshorn: We agreed to haul the logs that they then owned—this is the lumber company I am speaking about now, at 37½ cents a thousand, and all logs that they purchased thereafter at a price to be agreed upon by the board of arbitration.

Examiner Burchmore: Let me ask, because I have not much knowledge of those things, is that charge of 37½ cents supposed to be a compensatory charge?

Mr. Hartshorn: It was certainly not.

Examiner Burchmore: You undertook to render a service then for less than cost?

Mr. Hartshorn: Yes.

Examiner Burchmore: Partly in payment for land rights or timber?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Now proceed.

Mr. Hartshorn: One of the contentions in this suit was that the Fourche River Lumber Company should obtain for them the same concessions in freight rates that they enjoyed through ownership in the Fourche River Valley and Indian Territory railroad.

2363 Examiner Burchmore: Did you say that, or are you quoting the statement that the Fourche River Valley Lumber Company received concessions in the freight rate?

Mr. Hartshorn: I am quoting what they say in this suit. We never received any concessions. It was not a statement of mine, but it was just quoting from this case.

Examiner Burchmore: Well, some dispute had arisen under this agreement and you arbitrated it?

Mr. Hartshorn: Yes.

Examiner Burchmore: And then did not abide exactly by the terms of the arbitration?

Mr. Hartshorn: Yes, I should have stated, when this matter of divisions came up we notified the board that they had no jurisdiction over the matter whatever and told them it would not make any difference what their decision would be, that we would not abide by it. It amounted to the same thing, as it was not within their province.

Examiner Burchmore: Then as I understand your statement the suit involved this point, the Bryant Lumber Company having contracted with you and under that contract being guaranteed, as it understood it, the same rate of freight on outbound shipments of

lumber that your company paid, discovered that the Fourche
2364 River Valley & Indian Territory Railroad was receiving divisions out of the published joint through rate and felt that it ought to receive the same net rate, or what might be described as a net rate, that is the difference between the joint through rate, and the division, and you felt it would not be proper to give them that through rate and therefore declined to put that interpretation on the contract, and you were sued and a recovery was had?

2365 Mr. Hartshorn: We did not, however, in our contract guarantee anything about out freights at all; it was only on hauling their logs.

Examiner Burchmore: They thought the contract gave them the same out rate on lumber?

Mr. Hartshorn: Yes, they actually did have the same out rate that we did.

Examiner Burchmore: But they thought that your division gave you some advantage that they did not enjoy?

Mr. Hartshorn: Yes, sir, that is the gist of this suit.

Examiner Burchmore: You have appealed the case?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: What are the grounds of your appeal, do you know?

Mr. Hartshorn: Well, in the first place we claim that they did not prove their case, and in the second place it would be illegal for any such thing to happen, especially in regard to this division.

Examiner Burchmore: Have you learned of the recent decision of one of the courts in Arkansas of a case brought by the Sawyer & Austin Lumber Company against the Iron Mountain?

2366 Mr. Hartshorn: Yes, sir.

Examiner Burchmore: That case is somewhat similar to yours, I assume.

Mr. Hartshorn: In a general aspect, yes.

Examiner Burchmore: So I presume you anticipate a favorable outcome to the present suit?

Mr. Hartshorn: We certainly do.

Examiner Burchmore: Does not the Bryant Lumber Company own some timber along your right of way?

Mr. Hartshorn: A small amount now.

Examiner Burchmore: Most of it has been cut?

Mr. Hartshorn: Yes.

Examiner Burchmore: Where was their timber milled when they were cutting it?

Mr. Hartshorn: Over at Fourche, which is about a mile; their mill is about a mile and three quarters, I should say, from Bigelow, and I should say three quarters of a mile from Fourche, which is a mile east of Bigelow.

Examiner Burchmore: Beyond the junction?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: How did they get their logs to the mill, did your locomotives haul them?

2367 Mr. Hartshorn: No, we gave them to the Rock Island at Bigelow, and the Rock Island hauled them.

Examiner Burchmore: You hauled them down from the woods to Bigelow?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: And only received 37 cents?

Mr. Hartshorn: The lumber company received two cents, the lumber company paying the railroad company the difference.

Examiner Burchmore: This two cents means a division of the joint through rate?

Mr. Hartshorn: No, our local distance tariff called for two cents a hundred pounds on logs. The railway company must collect that two cents. They do it by getting 37½ cents a thousand from the Bryant Lumber Company, and the balance from the Fourche Lumber Company.

Examiner Burchmore: Then it gives the Fourche Railway Company a substantial sum to carry out this agreement?

Mr. Hartshorn: It does.

Examiner Burchmore: It strikes me as perhaps worthy of notice that in the original agreement, which seems to have been the occasion of this law suit, and which is set out at length in the bill of complaint, such original agreement being dated apparently Au-
2368 gust 3rd, 1905, this railroad seems to be referred to as the Fourche River Lumber Company proposition.

Mr. Hartshorn: No, that was before the Fourche River Valley Railway——

Examiner Burchmore: Well, it keeps referring to the railroad which was built on this land by the Fourche Company, and to the Fourche River Lumber Company, and so forth.

Mr. Hartshorn: I stated that this road for the 8.9 miles was built by the Fourche River Lumber Company, and that is the road that goes over this land.

Examiner Burchmore: That is the proportion of the road west of Wye.

Mr. Hartshorn: No, this is the portion——

Examiner Burchmore: The portion east of Wye?

Mr. Hartshorn: Yes, sir. (Witness indicates on map.)

Mr. Walter: That is only the allegation in the bill you are referring to now?

Examiner Burchmore: It is, and also the allegation in this bill that the failure of the defendant, meaning the Fourche River Lumber Company, to perform the award of the arbitrators by pay-
2369 ing the Bryant Lumber Company the same differentials that the defendant receives from the Fourche River Valley & Indian Territory Railroad Company on through rates over the Rock Island, that amounts to some $2800, and so forth; that seems to reflect the view that this Bryant Lumber Company had of the relation of the Fourche River Lumber Company, and this railroad company. Now as a matter of fact did the Fourche River Lumber Company receive any differentials out of the freight rates from this railroad?

Mr. Hartshorn: It did not.

Examiner Burchmore: So this reflects a misunderstanding of the situation?

Mr. Hartshorn: It certainly does.

Examiner Burchmore: It has some conclusion with regard to the nature of the transaction which does not agree with your conclusion. At last they felt they were somewhat injured by the existence of this differential.

Mr. Hartshorn: Apparently.

Examiner Burchmore: Is that the feeling of other shippers along your line, or don't you know?

Mr. Hartshorn: I think not. This lumber was not produced on our line.

2370 Examiner Burchmore: I thought the logs were produced on your line.

Mr. Hartshorn: The logs were, but the lumber is not produced on our line that they claim differentials on.

Mr. Walter: As a matter of fact that lumber was manufactured on the Rock Island, and took the Rock Island rate.

Mr. Hartshorn: Which rate is the same as the Graytown or Bigelow rate.

Mr. Walter: You had nothing whatever to do with that?

Mr. Hartshorn: No.

Examiner Burchmore: But was not that lumber when it moved out on the Rock Island billed as having originated on your line and a division paid to your company on it?

Mr. Hartshorn: Oh, no.

Examiner Burchmore: Has your company any contracts with the Rock Island Railroad regarding divisions of rates?

Mr. Hartshorn: It has.

Examiner Burchmore: I find in the Commission's files what purports to be a copy of a contract dated August 9th, 1904, between the Chicago, Rock Island & Pacific Railroad Company, party of the first part, and the Arkansas River & Southern Railroad Company of the second part. That corporation is the predecessor of your cor-

2371 poration?

Mr. Hartshorn: Of the Fourche River Valley & Indian Territory Railroad, yes.

Examiner Burchmore: I believe you so stated a little while ago.

Mr. Hartshorn: Yes.

Examiner Burchmore: Now this contract, I may say, seems to be similar in a general way to a number of other contracts that have been filed with the Commission, entered into by the Rock Island Railroad with other short line railroads whose principal traffic is lumber or other foreign products, respecting rates and divisions. Are you familiar with the terms of this contract?

Mr. Hartshorn: Yes. It is quite awhile since I have read it.

Examiner Burchmore: In brief, this contract provides for the maintenance of physical connections and traffic arrangements between the two companies, for the maintenance of joint through rates on forest products and for the payment to your company on movements of manufactured lumber, lath and shingles, the divisions ranging from two cents upward.

Mr. Hartshorn: In addition it also provides at some future
2372 time that joint rates shall be made on other products.

Examiner Burchmore: When such rates shall be found necessary?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: And that reasonable divisions will be established?

Mr. Hartshorn: Yes.

Examiner Burchmore: It also provides that you ship 50 per cent of your traffic over the Rock Island, does it not?

Mr. Hartshorn: I think it does; I am not sure.

Examiner Burchmore: Now, was this contract entered into before the completion of this railroad?

Mr. Hartshorn: Oh, yes, sir.

Examiner Burchmore: Do you contend or would you state that this railroad was constructed on the faith of this contract?

Mr. Hartshorn: The Fourche River Valley & Indian Territory Railroad Company was extended, is a continuation—after we chartered the Fourche River Vally & Indian Territory Railroad Company, we extended it the 5.9 miles.

Examiner Burchmore: Was this contract assigned——

Mr. Hartshorn: To the Fourche River Valley Company.

2373 Examiner Burchmore: It was?

Mr. Hartshorn: Yes.

Examiner Burchmore: And was its period of effectiveness which was originally ten years, extended?

Mr. Hartshorn: No, sir.

Examiner Burchmore: So that the contract expires in 1914?

Mr. Hartshorn: In 1914.

Examiner Burchmore: There are two paragraphs in that contract and these paragraphs I may say appear in other contracts that have been filed, namely paragraphs 9 and 10, which provide that if at any time any part of this contract that is not essential to the performance of the interchange of traffic is declared void by a court or any Commission assuming jurisdiction over the subject matter, or if at any time the divisions provided for under this contract are found illegal or excessive, the necessary adjustment of such divisions or modifications of the performance of the contracts will be made. Do you recall such a clause?

Mr. Hartshorn: Yes, sir.

Examiner Burchmore: Are you able to state the purpose of including those clauses in this contract, or by whose suggestions
2374 they were included?

Mr. Hartshorn: No. I think it was on the part of the Rock Island that they were included.

Examiner Burchmore: Do you think it indicates a doubt or question in the mind of the lawyer by whom it was drawn as to the legality of some of the provisions of the contract?

Mr. Hartshorn: No, I do not. My best recollection is that they stated at the time, I think it was Mr. Holden, the traffic manager then, that they—well, the gist of it was that they did not wish to do

anything illegal in any sense or form and they put that in for a matter of protection, that was all.

Examiner Burchmore: So that they would not incur any penalties or invite a lawsuit by the other party to the contract in the event that at some future date the contract was annulled by some authority.

Mr. Hartshorn: They undoubtedly had that in their minds, although nothing was said at that time.

Examiner Burchmore: In view of those provisions in that contract, do you think your company could successfully maintain a suit for specific performance, or for breach of that contract in the event that it was declared improper by any tribunal?

2375 Mr. Hartshorn: We have not crosed that bridge yet.

Examiner Burchmore: You are not a lawyer and would not express an opinion?

Mr. Hartshorn: No.

Examiner Burchmore: Does the railroad company perform any inter-work switching for the lumber company?

Mr. Hartshorn: I do not believe I understand that expression.

Examiner Burchmore: I will ask Mr. Collins. It is a question of operation.

Mr. Hartshorn: Yes.

Examiner Burchmore: Have you any other contracts with railroads or other companies regarding any phase of this railroad's operations?

Mr. Hartshorn: This contract for joint station and exchange tracks.

Examiner Burchmore: Has that contract been filed with the Commission?

Mr. Hartshorn: I do not know. That is not a very complete copy. We just copied part of it. I can give you a copy if

2376 you like.

Examiner Burchmore: I wish you would file a copy of that contract in this record.

Mr. Hartshorn: All right.

Examiner Burchmore: I presume counsel will keep track of these requests. That contract contains no clauses with respect to divisions or rates.

Mr. Hartshorn: No.

Examiner Burchmore: It simply provides for the joint operation of that depot or terminals?

Mr. Hartshorn: Yes, sir; building them and their operation.

Examiner Burchmore: I think that is all.

Mr. Walter: Does the Arkansas Commission recognize you as a common carrier?

Mr. Hartshorn: They do.

Mr. Walter: Do you publish a time card?

Mr. Hartshorn: We have a time card posted in our depot.

Mr. Walter: At the end of your line have you any graded right of way?

Mr. Hartshorn: Beyond the present operation?

Mr. Walter: Yes.

2377 Mr. Hartshorn: Yes, sir.

Mr. Walter: About how much?

Mr. Hartshorn: Four miles about, I believe it is.

Mr. Walter: That map which you filed shows three projected lines, I believe.

Mr. Hartshorn: Yes, sir, three projected lines or surveys were made.

Mr. Walter: What are your intentions as to extensions?

Mr. Hartshorn: We will have to wait a little while before deciding on that.

Mr. Walter: Does it in a measure depend on the result of this investigation?

Mr. Hartshorn: A good deal.

Mr. Walter: In the purchase of ties or timbers, are such purchases restricted to the Fourche River Lumber Company?

Mr. Hartshorn: No. Mr. Collins just purchased some bridge timbers from a little mill near Orchard, and he has purchased ties at various times from other parties, and other bridge timbers.

Mr. Walter: What sort of a bridge is that you have near the mill?

Mr. Hartshorn: Well, 200 feet swing bridge.

2378 Mr. Walter: That is a bridge which opens for navigation?

Mr. Hartshorn: Yes.

Mr. Walter: What position do you occupy with the lumber company?

Mr. Hartshorn: Secretary and Treasurer.

Mr. Walter: So the first statement was a mistake?

Mr. Hartshorn: It was simply a mistake.

Mr. Walter: This is a permanent railroad you have there?

Mr. Hartshorn: It certainly is.

Mr. Walter: One intended to remain after the timber is gone?

Mr. Hartshorn: It certainly is.

Mr. Walter: I believe the Fourche River Lumber Company have sold or put in the hands of agents for sale a colonization scheme?

Mr. Hartshorn: Yes, sir, covering about 15,000 acres.

Mr. Walter: How much has been sold?

Mr. Hartshorn: Nearly that much, 15,000 acres.

Mr. Walter: The purchasers have gone in and located?

Mr. Hartshorn: Some of them, and they are going in there.

Mr. Walter: Fruit orchards?

Mr. Hartshorn: Yes, sir.

2379 Mr. Walter: Live stock?

Mr. Hartshorn: Yes, sir.

Mr. Walter: And various agricultural pursuits?

Mr. Hartshorn: Yes, sir.

Mr. Walter: Mr. Collins will go more into the question of the service to the public generally. I believe that is all I want to ask Mr. Hartshorn now.

(Witness excused.)

W. M. COLLINS, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Mr. Collins, were you aware that the Rock Island was paying five cents to many tap lines on its line?

Mr. Collins: What is that?

Examiner Burchmore: Were you aware that the Rock Island has been paying a division of five cents to many tap lines that connect with it?

Mr. Collins: I have heard those things, yes, sir.

Examiner Burchmore: Did you know it before you came here?

Mr. Collins: No, I did not, only in one case.

2380 Examiner Burchmore: You have made no effort to secure an increase in your divisions?

Mr. Collins: Yes, sir, I have.

Examiner Burchmore: Any great effort?

Mr. Collins: No.

Examiner Burchmore: It did not seem probable you would be successful?

Mr. Collins: Well, I did not know; I made an effort to get a little more than what we were getting, because I thought we were entitled to more.

Examiner Burchmore: About the equipment of the railroad company and lumber company, how many cars has the railroad?

Mr. Collins: We have 11 flat cars, 2 box cars, 1 tank car, 1 combination coach and 48 logging cars.

Examiner Burchmore: Has the lumber company any cars?

Mr. Collins: Not that I know of except one track laying car.

Examiner Burchmore: Has the lumber company any locomotives?

Mr. Collins: Two.

Examiner Burchmore: Do those locomotives operate over its logging line?

2381 Mr. Collins: Yes, sir.

Examiner Burchmore: Can you describe very briefly the way in which the logs are taken to the mill, as an operating matter?

Mr. Collins: The logs are delivered to us on an interchange track at Wye station.

Examiner Burchmore: Delivered to you by the lumber company?

Mr. Collins: Yes, sir; and we have an interchange track where we deliver the empties and they deliver the loads, and we deliver the logs to the mill.

Examiner Burchmore: Wye station?

Mr. Collins: Yes, sir.

Examiner Burchmore: Then the logging trains of the Fourche River Lumber Company operate over your main line for some distance?

Mr. Collins: No, they do not come on it at all.

Examiner Burchmore: Wye is the connection with the private tram line?

Mr. Collins: Yes, sir.

Examiner Burchmore: What charge do you make for hauling the logs to the mill?

Mr. Collins: Two cents.

2382 Examiner Burchmore: The lumber company pays two cents for getting the logs into the mill?

Mr. Collins: Yes, sir.

Examiner Burchmore: Who unloads the logs at the mill?

Mr. Collins: The lumber company.

Examiner Burchmore: Not the railroad company?

Mr. Collins: No.

Examiner Burchmore: But the unloading operation is very simple, it simply consists in unloosening the fastenings which holds the logs and rolling them off?

Mr. Collins: No, they have a machine for unloading them.

Examiner Burchmore: Is there any billing which accompanies the shipment into the mill, or does the conductor simply report it?

Mr. Collins: No, the cars are all waybilled, I mean bills of lading from Wye, and we waybill them in the office.

Examiner Burchmore: Is that bill of lading issued before they leave Wye?

Mr. Collins: Yes, the conductor makes a bill for all shipments west of Graytown on everybody's stuff.

Examiner Burchmore: That bill of lading is dated at Wye and reads only up to——

2383 Mr. Collins: From the Fourche River Lumber Company at Wye and the Fourche River Lumber Company at Graytown.

Examiner Burchmore: It is a local bill of lading?

Mr. Collins: Yes, sir.

Examiner Burchmore: And you charge two cents per 100 pounds?

Mr. Collins: Yes, sir.

Examiner Burchmore: The rates on your line are on a milling in transit basis?

Mr. Collins: I don't know anything about that.

Mr. Hartshorn: We have a milling in transit clause in our tariffs.

Examiner Burchmore: You handle the empty cars from the Rock Island Junction to the mill?

Mr. Collins: Yes, sir.

Examiner Burchmore: And the loaded cars in the opposite direction?

Mr. Collins: Yes, sir.

Examiner Burchmore: On the movement of lumber generally, your agent at Graytown issues the bill of lading?

Mr. Collins: No, the lumber company issues them.

Examiner Burchmore: Your agent signs them?

2384 Mr. Collins: Yes, sir.

Examiner Burchmore: So as a matter of fact they are executed by the Fourche River Valley & Indian Territory Railway?

Mr. Collins: Yes, sir.

Examiner Burchmore: And what is shown as the point of origin of the shipment?

Mr. Collins: Graytown.

Examiner Burchmore: And not Wye?

Mr. Collins: No, sir.

Examiner Burchmore: And it is shown as a carload of lumber originating at Graytown and destined to St. Louis, for example?

Mr. Collins: Yes, sir.

Examiner Burchmore: Does your railroad company issue a through waybill?

Mr. Collins: Yes, sir.

Examiner Burchmore: Then the cars do not move to the Rock Island under transfer billing?

Mr. Collins: No, sir.

Examiner Burchmore: Does that waybill show the divis-
2385 ions?

Mr. Collins: No.

Examiner Burchmore: Your divisions are paid in an interline settlement?

Mr. Collins: Yes, sir. I have my last month's samples with me.

Examiner Burchmore: I do not care to examine them, and it will not be necessary to offer them.

Mr. Collins: I mean they are last month's forms, not samples.

Examiner Burchmore: The rates from Graytown are the same as the Rock Island rates from Bigelow?

Mr. Collins: Yes, sir.

Examiner Burchmore: Is this two cents charge which is paid for the shipments into the mill credited in any way on the outbound freight charges?

Mr. Collins: Well——

Mr. Hartshorn: I think I can answer that question better than he can.

Examiner Burchmore: If you will?

Mr. Hartshorn: No.

Examiner Burchmore: What is the rate, for example, to
2386 St. Louis?

Mr. Hartshorn: 18 cents on pine, and 15 on hardwood.

Examiner Burchmore: Then on a movement of lumber to St. Louis the total freight charges are 18 cents from Graytown on, but the lumber company has already paid two cents on logs to get them into the mill?

Mr. Hartshorn: Into Graytown, yes, sir.

Mr. Walter: That is in addition to the through rate?

Examiner Burchmore: That is in addition to the through rate?

Mr. Hartshorn: Yes, sir.

Mr. Collins: That is correct.

Examiner Burchmore: You have heard the testimony in the other cases for the last few days?

Mr. Hartshorn: Yes.

Examiner Burchmore: Does not your arrangement seem to be less liberal?

Mr. Hartshorn: Under our milling in transit rate we show a loss,

and consequently if we made any charge we felt that we ought to charge our local distance tariff, which is two cents, and that accounts for our local charge dividends.

Examiner Burchmore: Well, your policy has been to
2387 charge the lumber company what it ought to pay for the service it gets from the railroad company?

Mr. Hartshorn: More than it ought to pay in order not to come out in the hole.

Examiner Burchmore: Then these divisions you receive from the Rock Island are not intended to cover the cost of the movement of logs into the mill?

Mr. Collins: No, sir.

Examiner Burchmore: Although you have milling in transit rates?

Mr. Hartshorn: Although we have milling in transit rates.

Examiner Burchmore: You do not use those milling in transit rates on the Fourche River Lumber Company's traffic?

Mr. Hartshorn: No, we do not.

Examiner Burchmore: Do you run any passenger trains?

Mr. Collins: We run a mixed train.

Examiner Burchmore: One mixed train daily in each direction?

Mr. Collins: We run two.

Examiner Burchmore: Run two in each direction?

Mr. Collins: Yes, sir.

2388 Examiner Burchmore: Do those connect with Rock Island passenger trains?

Mr. Collins: Yes, sir.

Examiner Burchmore: Are there any freight trains in addition to those two mixed trains?

Mr. Collins: No, sir.

Examiner Burchmore: I think Mr. Hartshorn covered the matter of divisions rather fully.

Mr. Collins: Yes.

Examiner Burchmore: That is all that I care to ask, Mr. Walter.

Mr. Walter: Mr. Collins, are there a number of mill men along the line, shippers of lumber?

Mr. Collins: Six.

Mr. Walter: They have their own separate mills?

Mr. Collins: Yes, sir.

Mr. Walter: Neither the Fourche River Lumber Company nor the Fourche River Valley & Indian Territory Railroad Company have any connection with them at all of a proprietary sense?

Mr. Hartshorn: No.

Mr. Walter: What else besides forest products are carried
2389 by the road?

Mr. Collins: Agricultural products.

Mr. Walter: Is it varied, different kinds?

Mr. Collins: Yes, sir.

Mr. Walter: Live stock?

Mr. Collins: No, we do not have any outbound live stock. We have some inbound live stock.

Mr. Walter: Emigrants' outfits?

Mr. Collins: Yes, sir.
Mr. Walter: In short, you serve everybody that comes, impartially?
Mr. Collins: Yes, sir, we certainly do.
Mr. Walter: We can give the names of these various shippers, some dozen or fifteen men who are in the business of shipping piling and logs and their addresses, if you want them.
Examiner Burchmore: Are any of those men related to this lumber company?
Mr. Collins: No.
Examiner Burchmore: You may file the statement if you wish.
Mr. Collins: Some of them haul their lumber 15 miles on wagons.
2390 Examiner Burchmore: You can file if you desire, but need not state them in the record.
Mr. Walter: About how many of these shippers that patronize the railroad to a material degree?
Mr. Collins: You mean saw mill men?
Mr. Walter: Yes.
Mr. Collins: There are six mills on the line, or off the line, that haul lumber into the line.
Mr. Walter: In addition to that, are there shippers of piling, staves and ties?
Mr. Collins: No ties, but piling and staves. We buy all the ties ourselves that are put out on the road.
Mr. Walter: If you know you may state whether or not continually emigrants are coming on to the line of the railroad and settling?
Mr. Collins: Yes, sir.
Mr. Walter: How are these trains operated along the line, by telephone?
Mr. Collins: Yes, sir.
Mr. Walter: Who owns that?
Mr. Collins: The railroad company.

Mr. Walter: That is all.

(Witness excused.)

2391 *Lake Charles Railway & Navigation Company.*

W. P. WEBER was called as a witness, and having been duly sworn, testified as follows:

Examiner Gutheim: What is your residence?
Mr. Weber: Lake Charles, La.
Examiner Gutheim: Your occupation is what?
Mr. Weber: President of the Lake Charles Railway & Navigation Company.
Examiner Gutheim: Have you a map of the Lake Charles Railway & Navigation Company that you can submit in evidence that will show its general geographical location?

Mr. Weber: We have a map here. We probably had better furnish you another one.

Examiner Gutheim: Yes.

Mr. Walter: We will give you another one, but here is the State Commission map of Louisiana which will give you an idea of it.

(Witness proceeds to explain map.)

Examiner Gutheim: According to this map the line operates in and about Lake Charles by rail and thence by water up the Calcasieu River to a place known as Hecker, thence by rail in an
2392 easterly and northerly direction to Edna.

Mr. Weber: Yes, sir.

Examiner Gutheim: What carrier line connections have you at Lake Charles?

Mr. Weber: We have the Kansas City Southern, the Southern Pacific, the L. & W. Division, and the Iron Mountain.

Examiner Gutheim: And your next rail connections are at Edna?

Mr. Weber: At Edna, where we have the Iron Mountain.

Examiner Gutheim: That is the Watkins Route, is it not?

Mr. Weber: Yes, sir.

Examiner Gutheim: From Edna the line runs north how far?

Mr. Weber: At the present time it is only running north—the completed line is half a mile north. The line is proposed to run to Kinder, a distance of 5½ miles north. The steel is purchased for this line, and part of it is on the ground and the work is being done at this time.

Examiner Gutheim: What is the industry on your line at Lake Charles?

Mr. Weber: Well, we serve a number of industries there by boat, you understand.

Examiner Gutheim: But what industries do you serve
2393 there by rail?

Mr. Weber: The Powell Lumber Company.

Examiner Gutheim: Going from Hecker on your rail line, what industries are located between Edna and Hecker?

Mr. Weber: Well, at the town of Hecker there are two stores, general merchandise, and the Calcasieu Naval Stores Company has a turpentine plant and distillery there. The company is better known as the Union Naval Stores Company.

Examiner Gutheim: Is there any other industry until you get to Edna?

Mr. Weber: At Moore.

Examiner Gutheim: What is there?

Mr. Weber: There is also another Naval Stores plant belonging to the Calcasieu Naval Stores Company.

Examiner Gutheim: And at Edna is there a mill?

Mr. Weber: A saw mill at Edna.

Examiner Gutheim: Owned by whom?

Mr. Weber: The Powell Lumber Company.

Examiner Gutheim: Was the settlement at Hecker an existing settlement prior to the time that this rail line was built.

Mr. Weber: It was for a number of years.

2394 Examiner Gutheim: About what is its present population?

Mr. Weber: From 300 to 500.

Examiner Gutheim: What is it in the case of Moore and Kelly Junction? Were they settled communities prior to the entrance of the railroad?

Mr. Weber: There were some settlers in there. There were no communities, just small land owners.

Examiner Gutheim: Is there anything at Baggetts?

Mr. Weber: Just a station, and there are some rice farmers in there.

Examiner Gutheim: As a matter of fact are Moore and Kelly Junction and Baggetts the remains of former logging camps?

Mr. Weber: Well, Kelly Junction is the place where the proposed line is to be built into Lake Charles.

Examiner Gutheim: That is going south from Kelly Junction and then paralleling the Southern Pacific into Lake Charles?

Mr. Weber: Yes, sir. Moore station, as already explained, is a logging camp, but it is now being used by a number of settlers and also being used by the Calcasieu Naval Stores Company.

Examiner Gutheim: Outside of the stores mentioned, the

2395 Calcasieu Naval Stores Company, the principal industries that furnish traffic are the two mills of the Powell Lumber Company at Edna and Lake Charles.

Mr. Weber: Those are the principal interests.

Examiner Gutheim: These stores at Hecker, are they stores owned by the Kelly-Weber Company?

Mr. Weber: No.

Examiner Gutheim: Were they at one time owned by the Kelly-Weber Company?

Mr. Weber: No, sir.

Examiner Gutheim: Who are the present owners of those stores?

Mr. Weber: Mr. F. Hebert owns one, and the Calcasieu Naval Stores Company owns the other one.

Examiner Gutheim: What is the relation between the Powell Lumber Company or the stockholders of the Powell Lumber Company, and the Lake Charles Railway & Navigation Company?

Mr. Weber: The principal stock in both companies is held by the same people; there is some difference though. There are some stockholders in the railroad company who are not stockholders in the lumber company.

Examiner Gutheim: To what extent are the stockholders

2396 different, that is in the number of shares?

Mr. Weber: Well, we have in the Lake Charles Railway & Navigation Company two stockholders who have no interest in the Powell Lumber Company.

Examiner Gutheim: What do their holdings amount to?

Mr. Weber: One of them amounts to 10 or 13 shares.

Mr. George M. King: One has 10 shares and the other two.

Mr. Weber: G. M. King owns 10 shares, and D. Giavinnie two shares.

Examiner Gutheim: When was the rail line from Hecker into Edna constructed?

Mr. Weber: It was finished in the latter part of 1907.

Examiner Gutheim: When was it begun: I take it it was begun out of Hecker.

Mr. Weber: I cannot give you the exact date it was begun. The road was started before our company was organized.

Examiner Gutheim: That is it was started by the predecessors of the Powell Lumber Company?

Mr. Weber: Yes, sir.

Examiner Gutheim: Was the road built about as was required for the timber operation of the Powell Lumber Company or its predecessor?

2397 Mr. Weber: The part that our predecessor built, I presume, he built for the benefit of his lumbering interests.

Examiner Gutheim: How about the part that was built since the Powell Lumber Company interests acquired title?

Mr. Weber: We extended the line for the purpose of reaching out and getting more business.

Examiner Gutheim: More timber business?

Mr. Weber: Any kind of business.

Examiner Gutheim: How much of an extension did you make after you acquired the original railway?

Mr. Weber: About 12 miles.

Examiner Gutheim: How far had the road been built at the time of that acquisition?

Mr. Weber: About eight miles.

Examiner Gutheim: To what point?

Mr. Weber: Near Moore.

Examiner Gutheim: Was the original road what was known in that locality as the Kelly tram?

Mr. Weber: Yes, sir, the Kelly tram never owned that road, though.

Examiner Gutheim: Never owned the Lake Charles Rail-

2398 way & Navigation Company?

Mr. Weber: No, nor it never owned the road that forms any part of it.

Examiner Gutheim: I understood you to say that the original road was what was known as the Kelly tram?

Mr. Weber: Well, it was what was known as the Kelly tram, but the Kelly tram did not own it. It was commonly known as the Kelly tram in that country, but it was owned by J. G. Powell.

Examiner Gutheim: Now the road was organized as a carrier corporation about when?

Mr. Weber: July 22nd, 1908.

Examiner Gutheim: And at that time what capital stock was issued?

Mr. Weber: Well, we issued $50,000 worth on or about that time, the full amount of the capital stock.

Examiner Gutheim: And that stock was issued to the original
wners in consideration of the proper transfers to the railroad cor-
oration?
Mr. Weber: The stock was issued to six different people who sub-
scribed for it.
399 Examiner Gutheim: Were those people all interested at
the time in the Powell Lumber Company?
Mr. Weber: Only four of them.
Examiner Gutheim: And their holdings of the $50,000 amounted
o what?
Mr. Weber: The four, do you mean?
Examiner Gutheim: Yes.
Mr. Weber: It amounted to $1200, the two amounted to $1200.
Examiner Gutheim: The two not interested?
Mr. Weber: The two not interested amounted to $1200.
Examiner Gutheim: So that about $48,000 was held by the Powell
Lumber Company interests.
Mr. Weber: Yes, sir.
Examiner Gutheim: How much railroad property was acquired
for that $50,000 worth of stock?
Mr. Weber: We transferred to the Lake Charles Railway &
Navigation Company all of the railroad track and equipment that
was owned at that time by the Powell Lumber Company.
Examiner Gutheim: That included the tracks in and about Lake
Charles and the floating equipment necessary for use on the river
and about eight miles from Hecker east?
2400 Mr. Weber: It included more track than that. The other
things which you mentioned were included. At the time
that the Powell Lumber Company acquired from its predecessor
those tracks, I stated it was about eight miles. The Powell Lumber
Company built on in the direction of Edna to some extent previous
to the time the transfer was made.
Examiner Gutheim: And all that was built was transferred——
Mr. Weber: All that was built was transferred.
Examiner Gutheim: Was there any steel on hand for the remain-
der of the construction to Edna that passed with the conveyance of
the railroad?
Mr. Weber: I do not remember whether there was any unlaid steel
at that time, any steel that we had on hand was included in the
transfer.
Examiner Gutheim: What obligations are now outstanding in
addition to the $50,000 of capital stock?
Mr. Weber: $29,193.51.
Examiner Gutheim: And that indebtedness is owing to whom?
Mr. Weber: The principal part of that indebtedness is owing to
the Powell Lumber Company. There is some outstanding, of
course.
Examiner Gutheim: Is that indebtedness that arose in the
2401 construction of the property or that had accumulated in the
course of the current operation of the railroad property?

Mr. Weber: It is practically all indebtedness that has accumulated in construction.

Examiner Gutheim: So that substantially $80,000 has been expended for the railroad property that is now owned by the Lake Charles Railway & Navigation Company and the floating equipment used on the river?

Mr. Weber: Yes, sir; to get it exact it is $81,475.65.

Examiner Gutheim: The total rail mileage is how much?

Mr. Weber: 20 miles.

Examiner Gutheim: And the spurs and sidings are about how much?

Mr. Weber: About a half a mile.

Examiner Gutheim: Are the present officials of the Lake Charles Railway & Navigation Company also officials of the Powell Lumber Company?

Mr. Weber: In part.

Examiner Gutheim: To what extent?

Mr. Weber: The President of the railroad and the lumber company are the same.

Examiner Gutheim: That will be sufficient, then. Now
2402 is your track all standard gauge?

Mr. Weber: Yes, sir.

Examiner Gutheim: And the weight of the rail is what?

Mr. Weber: We have some 30 pound. All the steel that has been bought since the incorporation has been heavier, 45 pounds and 52 pounds.

Examiner Gutheim: About what proportion is now laid with 30 pound?

Mr. Weber: About 12 miles.

Examiner Gutheim: Are there any station buildings at Hecker?

Mr. Weber: None.

Examiner Gutheim: At Moore, Kelly Junction or Baggetts?

Mr. Weber: One at Edna.

Examiner Gutheim: Is the station building at Edna the property of this company or the Watkins Road?

Mr. Weber: The property of the railroad company, the Lake Charles Railway & Navigation Company.

Examiner Gutheim: Is it used jointly with the Watkins Company?

Mr. Weber: No.

Examiner Gutheim: I take it there is no depot at Lake
2403 Charles?

Mr. Weber: No.

Examiner Gutheim: What equipment have you?

Mr. Weber: We have a steamboat, two barges, three locomotives, 50 logging cars and 15 flat cars.

Examiner Gutheim: Are any of the locomotives operated on the Lake Charles rails?

Mr. Weber: No, sir.

Examiner Gutheim: They are all operated between Hecker and Edna?

Mr. Weber: They are all operated between Hecker and Edna, yes, sir.

Examiner Gutheim: And so far as required by the Federal Acts they are all equipped with safety appliances?

Mr. Weber: The one that handles the local business is equipped with safety appliances. The other two are not.

Examiner Gutheim: At Lake Charles, do you mean?

Mr. Weber: No, up on the main line; one handles all local business and the other two nothing but logs.

Examiner Gutheim: Has the company a telephone or telegraph line?

Mr. Weber: No.

2404 Examiner Gutheim: The trains are not dispatched?

Mr. Weber: No, sir.

Examiner Gutheim: About how many men have you in the railway service solely?

Mr. Weber: We have an average of about 16 track men, three locomotive crews and six men on the steamboat.

Examiner Gutheim: Where is the general office located?

Mr. Weber: Lake Charles.

Examiner Gutheim: In an office joint with the Powell Lumber Company?

Mr. Weber: In the same building, but they do not occupy the same rooms.

Examiner Gutheim: Are the general office employés joint employés of both companies?

Mr. Weber: Not all of them.

Examiner Gutheim: How many general office employés that are employés solely of the railroad company?

Mr. Weber: Our traffic manager is not an employé of the lumber company in any way, shape or form. The officers and employés in the office are joint.

Examiner Gutheim: Are those joint employés paid by the lumber company and a proportion of their wages charged to the

2405 railway company?

Mr. Weber: To the railroad company.

Examiner Gutheim: What proportion does the railroad company pay?

Mr. Weber: In all cases except me, I think there is one who does not receive any salary, the railroad company is paying two-fifths of the joint salaries. There is one salary that I did not mention, connected with the railroad company, and that is our general manager. He does not draw any salary in any way, shape or form from the lumber company.

Examiner Gutheim: He operates over the whole line, or between Hecker and Edna?

Mr. Weber: Just the line between Hecker and Edna. The steamboat captain has charge of the river.

Examiner Gutheim: What train service do you operate?
Mr. Weber: One train a day each way.
Examiner Gutheim: Sunday trains?
Mr. Weber: None on Sunday.
Examiner Gutheim: Do they operate on regular schedules?
Mr. Weber: They try to.
Examiner Gutheim: On published time tables?
Mr. Weber: Yes.
2406 Examiner Gutheim: Are these arrangements for handling passengers on these trains?
Mr. Weber: No, sir.
Examiner Gutheim: Do you handle any United States mail?
Mr. Weber: We do not.
Examiner Gutheim: Express?
Mr. Weber: We do not.
Examiner Gutheim: Can you furnish us with a statement showing the total tonnage and revenue of the road for the last fiscal year and the division of that tonnage and revenue between the tonnage and revenue accruing on the business of the Powell Lumber Company and the tonnage and revenue accruing on the business of the outside general public?
Mr. Weber: We can.
Mr. Walter: You have that with you, have you not?
Mr. Weber: Well, he asked me to furnish it, and I thought we could make it more complete maybe.
Examiner Gutheim: Mr. Burchmore suggests you are going to furnish that same statement for all of them.
Mr. Walter: Yes, and a map for all of them.
Examiner Gutheim: The logs that are used at the Lake
2407 Charles mill are taken to Hecker, I should say, and then by the river line to Lake Charles.
Mr. Weber: Yes, sir.
Examiner Gutheim: Where is the woods operation or logging operation going on at the present time?
Mr. Weber: There is one camp and contractor at Moore, and the logs that go to the Lake Charles mill are furnished principally from this place at this time. We are buying some logs, or the company is buying some logs along the line.
Examiner Gutheim: Is the entire railroad operation in the timber conducted by the Lake Charles Railway & Navigation Company?
Mr. Weber: No, sir, it is not.
Examiner Gutheim: Who handles the spur operation?
Mr. Weber: The logging contractors who are employed by contract with the lumber company.
Examiner Gutheim: And do they handle that work with their own railroad equipment?
Mr. Weber: The Lake Charles Railway & Navigation Company furnishes the steel for the spurs and the locomotive power. The contractors for the lumber company lay their own tracks and load their own logs.

2408 Examiner Gutheim: What consideration is paid by the contractors to the railroad for the use of the equipment?

Mr. Weber: They do not use any equipment.

Examiner Gutheim: I understood you to say they furnished the ocomotive and the steel.

Mr. Weber: No, sir; that is a mistake. The steel is furnished nd the railroad company hauls the cars for which they charge the umber company $4.00 a car.

Examiner Gutheim: Yes; but am I to understand that the $4.00 er car compensation covers also the privilege extended to the Powell umber Company to use this rail and this locomotive?

Mr. Weber: They do not use a locomotive; the railroad company ses the locomotive.

Examiner Gutheim: Is there not a locomotive necessary in the operation of the logging spurs?

Mr. Weber: The locomotive goes right in on the spur; the spurs are short at this time, because they are moved from time to time; and it pulls the logs out on the main line and hauls them to the mill or to the river, as the case may be.

Examiner Gutheim: Let me get this straight now. Does

2409 the steel that is laid in the temporary logging spurs and taken up from time to time and relaid belong to the Lake Charles Railway & Navigation Company?

Mr. Weber: Yes, sir.

Examiner Gutheim: And the laying and taking up and relaying of that steel is done by the lumber company?

Mr. Weber: Yes, sir; or their sub-contractors.

Examiner Gutheim: And the only locomotive operation that is performed there is performed by the Lake Charles Railway & Navigation Company's locomotive?

Mr. Weber: Yes, sir.

Examiner Gutheim: That is, there is no one locomotive assigned to the spur work?

Mr. Weber: No.

Examiner Gutheim: What other traffic is handled over the line in addition to the logs?

Mr. Weber: Do you mean in which the lumber company has no interest?

Examiner Gutheim: Well, to get a general idea of the traffic there?

Mr. Weber: Well, they haul turpentine and resin and tar.

Examiner Gutheim: That is for the Calcasieu Naval Stores

2410 Company?

Mr. Weber: Yes, sir; better known as the Union Naval Stores Company. Merchandise for; hauled here some steel some time back for a tram company that was located above there; they haul some rice in carloads.

Examiner Gutheim: About all of the business that you handle going north from Lake Charles comes pretty nearly being camp supplies, does it not?

Mr. Weber: We do not handle any camp supplies going north by the boat to any great extent, a very small amount.

Examiner Gutheim: Is it handled south from Edna?

Mr. Weber: No, sir; we do not handle very much of that stuff. The people living in there buy their stuff from the stores at Hecker.

Mr. Walter: Where is your commissary?

Mr. Weber: The lumber company has a commissary at Edna, the only commissary connected with the business.

Examiner Gutheim: Do you issue any local tariffs?

Mr. Weber: We do.

Examiner Gutheim: Are they filed with the Interstate Commerce Commission?

Mr. Weber: They are.

2411 Examiner Gutheim: Do you concur in the point tariffs of your connections?

Mr. Weber: Yes, sir.

Examiner Gutheim: With the Southern Pacific lines and the Iron Mountain and Kansas City Southern?

Mr. Weber: Yes, sir.

Examiner Gutheim: And what divisions does the Lake Charles Railway & Navigation Company receive out of the through rates?

Mr. Weber: Do you want any special line or just the maximum and minimum?

Examiner Gutheim: If you will file the division sheets you can just give us the range.

Mr. Weber: Three-quarters of a cent to four cents. I will say that that should read three-quarters of a cent to three cents, because the points to which we are entitled to a four cent division are points which we are not able to avail ourselves of.

Mr. Walter: Shall I put them in the record? They are already on file?

Examiner Gutheim: All right, if we have them. It runs

2412 from three-quarters of a cent to three cents.

Mr. Weber: Three-quarters of a cent to four cents, but we do not get any four cent divisions, unfortunately.

Examiner Gutheim: Do they all pay you the same divisions?

Mr. Weber: No, sir; they do not.

Examiner Gutheim: What divisions do you get on your class and commodity rates?

Mr. Walter: 15 and 20 per cent.

Examiner Gutheim: Are those class and commodity rates in effect generally, or are they simply in effect to and from New Orleans?

Mr. Weber: Generally.

Examiner Gutheim: Are the divisions that accrue to your line allowed on a milling in transit basis?

Mr. Weber: They are.

Examiner Gutheim: You are filing annual and monthly reports with the Commission?

Mr. Weber: We are filing annual reports with the Railroad Commission and monthly reports—in fact, all the reports that we know of, to the Interstate Commerce Commission. I want to say, how-

ever, that we did not file an annual report in a book like I see
2413 some of the other lines have. We never received any such book for that purpose. We received it from the State Commission and filed that. We will, however, work that up or will ask for the book as soon as we get home. We have been filing those trial balance sheets every month which shows the report of our business for the year tabluated.

Examiner Gutheim: Is the road operating on a paying basis?

Mr. Weber: Well, this year we have made a little money. We are at the present time a loser.

Examiner Gutheim: Who is financing the deficit?

Mr. Weber: The Powell Lumber Company.

Examiner Gutheim: What rate of interest is paid on the indebtedness due the Powell Lumber Company?

Mr. Weber: No interest so far.

Examiner Gutheim: Does your line exchange free transportation with your connections?

Mr. Weber: To some.

Examiner Gutheim: What free transportation do the officials of your road receive?

Mr. Weber: We get two transportations from the Kansas City Southern, three from the Southern Pacific and four from the Iron Mountain.

2414 Examiner Gutheim: Have you any beyond those lines?

Mr. Weber: Yes, sir.

Examiner Gutheim: Which takes you how far, to Chicago?

2415 Mr. Weber: No, sir; we have not anything to Chicago.

Mr. Walter: Have you any beyond those lines?

Mr. Weber: No, sir, not in that direction. We have other transportation, but not in the direction of Chicago. Kansas City and St. Louis.

Examiner Gutheim: I take it you and Mr. Gibson hold passes on all the lines mentioned.

Mr. Weber: On all the lines mentioned, yes, sir.

Mr. Walter: This proposed extension from Edna to Kinder is how far?

Mr. Weber: About five miles.

Mr. Walter: At that point what connection will you make that you have not now?

Mr. Weber: The Colorado Southern.

Examiner Gutheim: That is the Frisco Line?

Mr. Weber: Yes, sir.

Mr. Walter: Why are you making that extension?

Mr. Weber: Well, there are two or three reasons. We want to have more facilities for handling our business, getting more equipment, better rates, and also getting the business between Edna and Kinder, which is partly a rice country and partly timber,
2416 and also there are two other turpentine companies up there that we can serve if we make that extension; and get connected up to the Colorado Southern and they give us the rate that they have promised us on turpentine and resin; we will be able to

handle that business which is now being hauled by wagon in part to Kinder and part of it elsewhere.

Mr. Walter: Is that desirable traffic?

Mr. Weber: Very desirable.

Mr. Walter: And with this extension, will it move in some volume?

Mr. Weber: Yes, sir.

Mr. Walter: Is this road a permanent road?

Mr. Weber: It is.

Mr. Walter: Your charter, I believe, is only for a common carrier of freight and property?

Mr. Weber: Yes, sir.

Mr. Walter: And not of passengers?

Mr. Weber: Not of passengers.

Mr. Walter: I will ask you what effect, if any, the extension of this line to Kinder will have on the rate to the shipper of turpentine and resin.

Mr. Weber: It will reduce the rate to the shipper three
2417 cents per 100 pounds.

Mr. Walter: In other words, it will apply the blanket rate to points on our line?

Mr. Weber: It will apply the blanket rate to points on our line.

Mr. Walter: And you will receive the same division that you would receive locally now?

Mr. Weber: Exactly the same division.

Mr. Walter: What effect will it have as to classes and commodities with reference to the two-line and three-line haul, will it reduce those rates to the shippers?

Mr. Weber: It will.

Mr. Walter: That is to say, the two-line haul is cheaper than the three-line haul to the shipper, it makes a less rate?

Mr. Weber: It makes a less rate; yes, sir.

Mr Walter: We will file these statements showing classification of tonnage and also furnish you a map. Is there anything else which occurs to you which you desire to state?

Mr. Weber: You remember you wanted to know about the brief.

Mr. Walter: As to the complaint, a complaint has not been filed as to this line. Shall we file a complaint, and allow the
2418 evidence that has already been taken to apply to that complaint?

Examiner Burchmore: I do not understand that it is essential to file a complaint, in fact, I do not understand that any right you may have will be prejudiced or jeopardized by your failure to file a complaint.

Mr. Walter: We can file it in a couple of weeks' time, and perhaps if there is no objection, we will do that.

Examiner Burchmore: I would not file a complaint, but if you feel at all doubtful, you may write to the Commission and I think that will elicit the reply that no complaint is necessary.

Mr. Walter: All right.

Examiner Gutheim: You spoke of the extension from Edna to Kinder.

Mr. Weber: Yes, sir.

Examiner Gutheim: As a matter of fact, the territory from Edna to Kinder is now served by the Watkins Road, which has been located in that community for a good many years?

Mr. Weber: Yes, sir.

Examiner Gutheim: At the mill at Edna, does the Lake Charles Railway & Navigation Company handle the finished product,
2419 or is it taken out directly by the Watkins locomotives?

Mr. Weber: In most cases it is taken out by the Iron Mountain.

Examiner Gutheim: It is only very occasionally that you handle it out?

Mr. Weber: Very occasionally.

Examiner Gutheim: And at Lake Charles you have no power, and the mill service is entirely performed by the connections?

Mr. Weber: Yes, sir.

Mr. Walter: That is all.

Mr. Weber: You asked me if there is any statement I might make. It is this: The country that our line runs through belongs to small holders with two exceptions, besides the Powell Lumber Company's interests. Our line does not run through property belonging to the Powell Lumber Company, but the country belongs to small holders with the exception I have spoken of, and those exceptions are timber holdings that belong to interests that have no connection in any way, shape or form with either the railroad or the lumber company, which we hope to serve when they get ready to manufacture their timber into lumber.

2420 Mr. Walter: Is there any proposed colonization scheme on foot?

Mr. Weber: Not that I know of.

Mr. Walter: Do you know of any option being given?

Mr. Weber: Yes, sir; I know of an option on 6,000 acres adjoining our line for colonization, but I do not know that the sale has been made.

Mr. Walter: That is all.

Whereupon, at 10.30 P. M., an adjournment was taken to Friday, December 16, 1910, at 9.30 A. M.

2421 NEW ORLEANS, LA., *December* 16, 1910.

Met pursuant to adjournment at 9:30 a. m.

Present: Examiner Burchmore and parties as before.

Mr. Riddell: I understand that the case of the Salem, Winona and Southern was called last night when we were away, and if there is no objection, I would like to have that case brought up for hearing now.

Examiner Burchmore: First, let me say I have been asked by a number of counsel and representatives whether we will be able to

conclude by Saturday evening, or whether there will be a postponement or further hearings next week. I can answer the first question in the negative. There seem to be over 30 cases awaiting trial at this time, and I do not believe we can hear 15 cases a day. As to whether there will be an adjournment or continuance of the hearing next week, I think I will be able to make an announcement this noon. But I will say that any road that is present and insists upon a hearing at this time will not be forced to go over until a later date. If it is decided to postpone the hearing. I will make some announcement at two o'clock on that.

I desire to call a number of tap line connections of the
2422 Iron Mountain System whose names have not been called, and I call them simply for the purpose of ascertaining whether they are represented. Is the Englewood, Alexandria & Southwestern present?

Mr. Cone: That is out of business.

Examiner Burchmore: I am informed through unofficial sources that this road has ceased operations. The Homan & Southeastern? An appearance has been entered for that company, but it has been called twice and seems not to be present. The Poplar Bluff & Dan River Railway.

(No response.)

Examiner Burchmore: The Prescott & Reader Railway.

(No response.)

Examiner Burchmore: The Scott County Railroad. That railroad is reported to have ceased operations, the entire timber holdings of the controlling company having been cut out, and there being no other business which it could carry, I assume. The Swarts & Ouachita. That is also reported as having ceased operations. The Tyronza & St. Francis River.

(No response.)

Examiner Burchmore: The West Point Railroad.

(No response.)

2423 Examiner Burchmore: The Williamsville, Greenville & St. Louis Railway. That railroad is reported to be carrying very little traffic at the present time; perhaps some ore or something of that kind, but the timber is all cut out.

The Wills Point Railway.

Mr. Jeffery: I may say about the Scott County Railroad, they have ceased the lumber business, but we have a water melon division in with them.

Examiner Burchmore: The Red River & Rocky Mount Railroad was called yesterday afternoon. I had agreed to notify counsel a few moments before the case was called, and then promptly forgot that agreement. He was out in the ante room and I did not give him an opportunity to come in. I think the case should be heard at the present time, it being a Cotton Belt connection.

Mr. Cowan: Before proceeding with the witness in that case I wish now to call attention in the record to what I should have called attention to the first day, that in the supplemental petition of the intervenors filed in this case the printed copies do not have the name of the Ludington, Wells & Van Schaick Lumber Company, of

Ludington, Louisiana as one of the intervenors. The original petition filed with the Interstate Commerce Commission was a
2424 typewritten copy, which by error of the stenographer, left out the one name. Learning that I telegraphed the name to the Interstate Commerce Commission, to the secretary, to be inserted. Later the secretary wired me that it was necessary to have copies furnished for all parties, and so I telegraphed an associate counsel in Washington to have the copies printed. When he went to get the petition and have it printed, he did not get hold of the copy which had the name inserted. There were several typewritten copies sent to the secretary, and he got the copy which did not have that name in, so I wish to have the record show that correction. Now, if your Honor please, a few moments ago when you were speaking about the continuance of the hearing here, you said that if there was any company present which insisted upon a hearing at this time, that a continuance would not be forced. It is not my desire, of course, to force any continuance, but we expected to quit tomorrow night, according to the suggestion made by the Examiner, if those who desire to have a hearing, and if those who desire to have a hearing would indicate that they are not willing to leave without a hearing, and if the number of those cases is such that you would have to go over into next week, then it would require a change in
2425 your Honor's ruling as to whether there would be a continuance forced or we should remain over until next week. So it seems to me, using a colloquial or colonial expression of the judges in Texas, the docket ought to be sounded, to see if we have to stay. Some of us have to leave. I do not have to, but Judge Garwood has to, and some of the other attorneys, and we ought to know as soon as we can after you have gotten your other information what we are going to do.

Examiner Burchmore: That was my purpose, to call the cases.

Mr. Cowan: To call the cases and see whether we have to stay over until next week.

Examiner Burchmore: I do not think, as a matter of fact, that there will be a large proportion of the cases that will insist upon a hearing at the present time, Judge, from the requests for postponement which have come to me. I simply wanted to let counsel know.

Mr. Cowan: I simply make that suggestion in the interest of posting counsel as well as myself.

Mr. Garwood: If it is at all practicable, I should very much desire that the hearing be closed for all purposes; that is, for this sitting, Saturday night. I should very much dislike to leave
2426 if the hearing is still in progress. Still, I have an engagement with Mr. Andrews, of counsel for the intervenors, at Austin Wednesday, that is of considerable importance to us, and if we could close up Saturday night as a whole, I would like very much to do so.

Examiner Burchmore: The Red River & Rocky Mount Railroad will now be heard.

Mr. Ziebold: I represent that company, and Mr. Beardsley will testify.

Examiner Burchmore: I might announce at this time, to save you all sitting here, that I think we will call the Wilmar & Saline River next, it being in turn. Is that company present?

Mr. Judd: We will be ready.

Examiner Burchmore: I have been requested to give preference to the Salem, Winona & Southern, which is not yet in turn. I understand that Captain White has been here throughout the hearing, and counsel for one or two other interests have expressed a willingness to give way to that case this morning. Is there any objection to calling that case this morning? I will call that case third, then. These three cases will doubtless take until noon.

2427 *Red River & Rocky Mount Railroad.*

A. H. BEARDSLEY was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: You are an employee of this railroad company?

Mr. Beardsley: Yes, sir; I am an officer.

Examiner Burchmore: What is your office?

Mr. Beardsley: Secretary.

Examiner Burchmore: Are you an officer of any lumber company?

Mr. Beardsley: No, sir.

Examiner Burchmore: Are you employed by any lumber company?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: What company, and what is your capacity?

Mr. Beardsley: Sales manager of the Antrim Lumber Company.

Examiner Burchmore: What proportion of your total compensation is paid by this railroad?

Mr. Beardsley: None.

Examiner Burchmore: The railroad pays you no salary?

Mr. Beardsley: No, sir.

Examiner Burchmore: Do you devote any substantial por-
2428 tion of your time to its service?

Mr. Beardsley: Well, not a great deal; no sir.

Examiner Burchmore: Is it not true that the stockholders of the Red River & Rocky Mount Railroad are identical with the stockholders of the Antrim Lumber Company, Limited?

Mr. Beardsley: No.

Examiner Burchmore: What difference is there?

Mr. Beardsley: There are three stockholders in the railroad company who have absolutely no stock in the lumber company.

Examiner Burchmore: Those are directors?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: Did they purchase their stock, or was it presented to them?

Mr. Beardsley: Well, practically presented to them.

Examiner Burchmore: What was the purpose of the construction of this railroad?

Mr. Beardsley: Mainly to supply the mill with logs.

Examiner Burchmore: I understand the Red River & Rocky Mount Railroad connects with the Cotton Belt System at Antrim, Louisiana.

Mr. Beardsley: Yes, sir.

2429 Examiner Burchmore: Is that the terminus of the line?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: It extends from that point in what direction and for what distance?

Mr. Beardsley: East and west at present.

Examiner Burchmore: Easterly or westerly?

Mr. Beardsley: Both, right now.

Examiner Burchmore: Then Antrim is not one of the termini, is it?

Mr. Beardsley: Well, we are not operating east at present.

Examiner Burchmore: How far east of that point does the line extend?

Mr. Beardsley: At present about three-quarters of a mile.

Examiner Burchmore: To what point?

Mr. Beardsley: Well, it just goes to the woods.

Examiner Burchmore: That line is owned by the railroad?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: How far west does it extend?

Mr. Beardsley: About twelve miles; a little less than twelve miles.

Examiner Burchmore: To what point?

Mr. Beardsley: To the woods also.

2430 Examiner Burchmore: That line is operated?

Mr. Beardsley: Yes.

Examiner Burchmore: Has the Antrim Lumber Company any private spur tracks connecting with this road?

Mr. Beardsley: Yes.

Examiner Burchmore: Where are those tracks, and what is their extent?

Mr. Beardsley: All told, it is about a mile long and runs out into the woods to no definite point.

Examiner Burchmore: Are those tracks operated by the railroad company or the lumber company?

Mr. Beardsley: Those tracks are put down by the lumber company.

Examiner Burchmore: And the railroad company operates them?

Mr. Beardsley: To this extent; they do all the switching over the track, but the track and ties and right of way and everything belong to the lumber company on this spur.

Examiner Burchmore: Is it not a fact that this railroad was built to develop and get together the timber holdings of the Antrim Lumber Company?

Mr. Beardsley: Yes, I think it was.

2431 Examiner Burchmore: I understand or assume that when the timber has been exhausted along this line the tracks will

be taken up and the equipment sold or removed to some other point; is not that a fact?

Mr. Beardsley: I do not know that that will be a fact with this western division.

Examiner Burchmore: Well, that seems to be the impression in some quarters, does it not?

Mr. Beardsley: I cannot answer positively on that.

Examiner Burchmore: That is a possibility?

Mr. Beardsley: That is a possibility; yes, sir.

Examiner Burchmore: Is it a probability?

Mr. Beardsley: Well, I do not know; there are some conditions developing in there now that may make the company see fit to leave the track.

Examiner Burchmore: That is, you think it may become a paying common carrier railroad?

Mr. Beardsley: Yes, sir, there are chances for it.

Examiner Burchmore: Independent of the traffic furnished by the lumber company?

Mr. Beardsley: Absolutely; yes, sir.

Examiner Burchmore: You say there are chances; is it
2432 probable that it will become a paying venture as a railroad?

Mr. Beardsley: That is too indefinite. I will tell you what it is. It is on account of the Caddo Oil Fields there, right across the river, and if they open up and develop, we will certainly keep the road down there, I believe.

Examiner Burchmore: What prospective traffic have you after the timber is exhausted, aside from this oil?

Mr. Beardsley: Well, I cannot say any in view right now; practically none.

Examiner Burchmore: As a matter of fact, the Caddo oil fields are adequately served by the Kansas City Southern now?

Mr. Beardsley: That may be true, but they are after us for the cut over lands we have there, and evidently they are interested.

Examiner Burchmore: This prospective traffic in petroleum will be furnished by shippers who have adequate means of reaching the market independent of your line; that is, they can use the Kansas City Southern, and that railroad will be satisfactory, presumably?

Mr. Beardsley: Well, the Kansas City Southern could not go over into our territory, if we did not want them to.

Examiner Burchmore: No, but there will not be any oil
2433 shipped from Caddo to Antrim, will there?

Mr. Beardsley: Not necessarily from Caddo, but you understand there is supposed to be oil all over that country.

Examiner Burchmore: Oh, I see; on your holdings?

Mr. Beardsley: Yes, sir, on the Antrim Lumber Company's holdings.

Examiner Burchmore: The territory through which this road runs is very poor land, and not fertile enough to encourage agriculture, as I understand it?

Mr. Beardsley: No, sir; you are mistaken there.

Examiner Burchmore: Are there any farms down there?

r. Beardsley: Yes, sir, there is one of the best peach orchards I ever seen in the back part of the land.

xaminer Burchmore: How long have you been raising peaches nat region?

r. Beardsley: We have not been raising them at all, but it is ad- at to our land.

xaminer Burchmore: How long have there been peach orchards nat neighborhood?

Ir. Beardsley: I cannot state definitely, but I imagine six or n years; somewhere around there; I am not positive on that point.

4 Examiner Burchmore: How does your road differ in the nature and extent of its operations, from the Bodcaw Valley lroad, which seems to be in the same vicinity? They are of the ie general character?

Ir. Beardsley: I do not know much about the one you mention.

Examiner Burchmore: Is not that the one which connects at len Bridge with the trunk line?

Ir. Beardsley: I believe it is, but I am not positive about that.

Examiner Burchmore: Where are the mills of the Antrim Lum Company located?

Ir. Beardsley: At Antrim, Louisiana.

Examiner Burchmore: They are immediately adjacent to the ht of way of the Cotton Belt Railroad?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: And the lumber manufactured in those lls is located directly into the equipment furnished by the Cotton lt, as it stands on Cotton Belt rails?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: So that the finished lumber moving out from these mills does not pass over at any time the rails of 435 the Red River & Rocky Mount Railroad?

Mr. Beardsley: No, sir.

Examiner Burchmore: And the engines of the Red River & Rocky lount Railroad do not haul this finished lumber?

Mr. Beardsley: No, sir, they do not touch it.

Examiner Burchmore: Then the entire service in connection ith the lumber is performed by the Cotton Belt System?

Mr. Beardsley: On the lumber; yes, sir.

Examiner Burchmore: But on the logs this Red River & Rocky lount Railroad gets the haul?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: When was this mill opened?

Mr. Beardsley: About 16 years ago.

Examiner Burchmore: That was the first operation of the mill?

Mr. Beardsley: Somewhere around there; I am not positive; I ave not been with the company long enough to know.

Examiner Burchmore: Was it then operated by this same corpora- ion?

Mr. Beardsley: I think it was. I would not speak positively on hat point.

Examiner Burchmore: When was construction begun on
2436 this railroad?

Mr. Beardsley: About the same time.

Examiner Burchmore: The railroad was originally intended solely to haul the logs to the mill, was it not?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: When was this railroad incorporated?

Mr. Beardsley: In May, 1904.

Examiner Burchmore: Previous to that time had it received any divisions out of freight rates?

Mr. Beardsley: It had.

Examiner Burchmore: It had?

Mr. Beardsley: Yes.

Examiner Burchmore: Previous to that it had transported traffic for the public?

Mr. Beardsley: To my knowledge, no.

Examiner Burchmore: Well, your opinion is, aside from actual knowledge, that it had not?

Mr. Beardsley: That is my opinion.

Examiner Burchmore: Who pays the taxes of this railroad company?

Mr. Beardsley: The railroad company.

Examiner Burchmore: Is it not a fact that the lumber com-
2437 pany, as an actual matter of fact, pays these taxes and charges them to the railroad tax account?

Mr. Beardsley: Well, now, I am not sure whether the railroad company issues their own check or not for it; it eventually is charged to the railroad company, which makes the railroad company, in my estimation, pay it.

Examiner Burchmore: What is the total capitalization of this railroad?

Mr. Beardsley: $64,000.

Examiner Burchmore: Is that all issued and outstanding?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: Was it paid for in cash?

Mr. Beardsley: I think it was a transfer arrangement, similar to some of these other cases you have had before you.

Examiner Burchmore: It was in the nature of a stock dividend to the stockholders of the lumber company, was it not?

Mr. Beardsley: Well, you might construe it that way; yes, sir.

Examiner Burchmore: That is, the stockholders in the lumber company received a dividend in the shape of railroad stock; that is about what it amounted to?

2438 Mr. Beardsley: Well you might put that construction on it.

Examiner Burchmore: What construction would you put on it?

Mr. Beardsley: Well, I hardly know how to explain it best.

Examiner Burchmore: Just explain the original financing of this road in such a way as you can.

Mr. Beardsley: The lumber company charged the amount of the stock to the stockholders and the stockholders received stock from

railroad company to the extent of their holdings, which is prac-
lly nothing but a transfer.
Examiner Burchmore: Has the railroad company any bonded in-
tedness?
Mr. Beardsley: No, sir.
Examiner Burchmore: Has it any notes outstanding?
Mr. Beardsley: No, sir.
Examiner Burchmore: What did it cost to construct this rail-
d including equipment, if you know?
Mr. Beardsley: I do not know, but I presume—well, I do not
ow positively. I will make that answer.
Examiner Burchmore: You have about 14 miles of standard
uge track?
Mr. Beardsley: Somewhere in that neighborhood.
Examiner Burchmore: What is the character of the rail?
39 Mr. Beardsley: 35 pound steel.
Examiner Burchmore: This railroad is all light construc-
on, is it not?
Mr. Beardsley: Well, compared with the main line of the Cotton
elt, yes, sir.
Examiner Burchmore: Do you hold any trackage rights over the
otton Belt?
Mr. Beardsley: No, not now.
Examiner Burchmore: How many locomotives have you?
Mr. Beardsley: Three.
Examiner Burchmore: Do you operate all those locomotives?
Mr. Beardsley: Yes, sir.
Examiner Burchmore: Do you own those locomotives?
Mr. Beardsley: Yes, sir, own them outright.
Examiner Burchmore: What cars has the railroad company?
Mr. Beardsley: Thirty cars.
Examiner Burchmore: How long has it owned those logging cars?
Mr. Beardsley: Quite a while; I don't know when they were
purchased; it was before my time.
Examiner Burchmore: Are not those log cars leased from the lum-
ber company?
2440 Mr. Beardsley: No, sir, not to my knowledge they are
not.
Examiner Burchmore: You have no other equipment besides
these logging cars?
Mr. Beardsley: Well, we have got, I think, two hand cars, but I
did not include that in the equipment in making up my list.
Examiner Burchmore: How many gangs of workmen are there
engaged on track work?
Mr. Beardsley: One.
Examiner Burchmore: Those men or other trackmen employed
by the railroad company maintain and keep in condition and relay
the private tram roads of the Antrim Lumber Company, do they
not?
Mr. Beardsley: No, sir, I do not think they touch the private
tracks of the Antrim Lumber Company at all.
Examiner Burchmore: Who attends to that repairing?

Mr. Beardsley: They have their own crew, a spur crew.
Examiner Burchmore: Have you any station buildings?
Mr. Beardsley: No.
Examiner Burchmore: Any platforms or warehouses?
Mr. Beardsley: No, you could not call them warehouses. We have a round house.
2441 Examiner Burchmore: For the locomotives?
Mr. Beardsley: Yes.
Examiner Burchmore: Is that round house standing on land owned by the lumber company?
Mr. Beardsley: I do not know whether the ground has ever been transferred to the railroad company or not; I am of the opinion it has not.
Examiner Burchmore: What about the building, who owns that?
Mr. Beardsley: That is owned by the railroad company.
Examiner Burchmore: Who owns the right of way on which the railroad runs?
Mr. Beardsley: The railroad company.
Examiner Burchmore: It owns that outright?
Mr. Beardsley: Yes, sir.
Examiner Burchmore: Was any part of that right of way secured by condemnation proceedings?
Mr. Beardsley: I am not familiar.
Examiner Burchmore: Do you know, Mr. Ziebold?
Mr. Ziebold: I think not.
Examiner Burchmore: How many train crews have you?
Mr. Beardsley: Three.
Examiner Burchmore: What employees are there of the railroad company aside from the track crews and train crews
2442 that receive salary?
Mr. Beardsley: There is one party at the mill that takes care of the records; he gets a nominal compensation for the time he spends on it.
Examiner Burchmore: Do you have any passenger trains?
Mr. Beardsley: No.
Examiner Burchmore: Do not carry passengers for hire?
Mr. Beardsley: No.
Examiner Burchmore: How many freight trains do you run, and are they run on a regular schedule?
Mr. Beardsley: We run one regular train out, that is, the empty cars out in the morning and the loaded cars back in the evening on a regular schedule posted in the office.
Examiner Burchmore: How many cars in that train, as a general thing?
Mr. Beardsley: They average from 15 to 20.
Examiner Burchmore: Do you carry any other freight except logs?
Mr. Beardsley: No.
Examiner Burchmore: Are you able to give me the total tonnage figures for your road for the past fiscal year?
2443 Mr. Beardsley: 27,721.
Examiner Burchmore: All of that tonnage was logs, was it not?

Mr. Beardsley: Yes, sir.
Examiner Burchmore: You did not have any other freight?
Mr. Beardsley: Only such little supplies as go out to the commissary, which do not amount to very much and are not worth considering.
Examiner Burchmore: You are a party to joint tariffs on file with the Interstate Commerce Commission?
Mr. Beardsley: Yes, sir, we concur in the Cotton Belt tariffs.
Examiner Burchmore: What stations are there on your line, from a tariff standpoint; that is, what stations are named in the tariffs? You have Plain Dealing.
Mr. Beardsley: That is not on the Red River & Rocky Mount; that is on the Cotton Belt, about three miles from Antrim.
Examiner Burchmore: What did you have to do with Plain Dealing, as a station?
Mr. Beardsley: It has more to do with the billing. We have no agent at Antrim.
Examiner Burchmore: The Cotton Belt has no station at
2444 Antrim?
Mr. Beardsley: No.
Examiner Burchmore: The billing is done at Plain Dealing?
Mr. Beardsley: Yes, sir; the agent does it there; he makes his billing read from Antrim to destination.
Examiner Burchmore: Simply because there is no employee at Antrim?
Mr. Beardsley: Yes.
Examiner Burchmore: I understand all the billing is made out by the Cotton Belt agent?
Mr. Beardsley: The bill is; yes, sir.
Examiner Burchmore: Your company does no billing?
Mr. Beardsley: We make our own bills of lading, and present them to the agent at Antrim.
Examiner Burchmore: I mean the Red River & Rocky Mount Railroad has nothing to do with the bills of lading?
Mr. Beardsley: That is what I mean; they make out the bills of lading at Antrim.
Examiner Burchmore: I should think if they make them out, they ought to sign them as a railroad.
Mr. Beardsley: They do sign them.
Examiner Burchmore: The bills of lading or way bills?
2445 Mr. Beardsley: The bills of lading.
Examiner Burchmore: I thought the bills of lading when signed were delivered to the shipper.
Mr. Beardsley: We use the triplicate standard form and they deliver the memorandum, and straight bill of lading goes——
Examiner Burchmore: The original goes to the shipper?
Mr. Beardsley: Yes, sir.
Examiner Burchmore: One copy goes to your railroad files and the other copy——
Mr. Beardsley: To the agent at Plain Dealing.
Examiner Burchmore: That copy goes to the agent so he can make out the way bill?

Mr. Beardsley: That is the understanding; yes, sir.

Examiner Burchmore: What stations are there on your line?

Mr. Beardsley: Well, none.

Examiner Burchmore: I mean stations from a tariff standpoint, named in the tariff.

Mr. Beardsley: The tariff shows, I believe, two or three stations, but they are no longer in existence.

Examiner Burchmore: There are no joint rates published from points back along your line?

Mr. Beardsley: I think the tariff provides that, but we
2446 are not operating them.

Examiner Burchmore: But there are no stations there?

Mr. Beardsley: No.

Examiner Burchmore: Your mill is at Antrim?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: And these bills of lading read from Antrim on the Red River & Rocky Mount, and not from Antrim on the Cotton Belt?

Mr. Beardsley: Our bills of lading do; yes, sir.

Examiner Burchmore: Is the joint rate that applies from points on your line the same as the joint rate that applies from Plain Dealing on lumber?

Mr. Beardsley: Yes, sir; I think Plain Dealing takes the same rates as all our points.

Examiner Burchmore: Your station at Antrim takes the same rate on lumber that the Cotton Belt's own station at Antrim takes?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: What are your divisions?

Mr. Beardsley: From one to two and a half cents, according to the road the car takes.

Examiner Burchmore: That is your largest division, two and a half cents?

2447 Mr. Beardsley: Yes, sir.

Examiner Burchmore: The only service you perform for that division is the movement of the logs into the mill?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: Do you receive any other compensation for moving those logs into the mill?

Mr. Beardsley: From the lumber company we do, 40 cents a ton from the company.

Examiner Burchmore: Is that 40 cents a ton on the actual weight of the logs?

Mr. Beardsley: It is estimated at 8,000 pounds per 1,000 feet.

Examiner Burchmore: Is that a reasonable estimate, in your opinion?

Mr. Beardsley: I think it is.

Examiner Burchmore: Have you ever weighed any logs?

Mr. Beardsley: I have not personally, but I presume the company did when they first started in.

Examiner Burchmore: Have you any track scales there?

Mr. Beardsley: No, sir.

Examiner Burchmore: Mr. Walter, one of your companies
2448 said it had track scales on its line. Do you know what one that was?

Mr. Cowan: The Groveton, Lufkin & Northern has.

Mr. Garwood: That is our road.

Examiner Burchmore: Would it be too much trouble for the Groveton, Lufkin & Northern to weigh two or three carloads? It has been suggested that it may be important to know how much logs weigh, and if they will instruct the Commission as to the log weights——

Mr. Garwood: We will be very glad to do that.

Mr. Cone: The Forest Service has accurate weights on all kinds of green logs.

Examiner Burchmore: I presume the Commission will take that matter up with the Forest Service.

Mr. Walter: The Fourche River Railroad has scales, and they have made very careful weights.

Mr. Cowan: Do you recall what it is on pine?

Mr. Walter: He told me it ranged from 7,500 to 11,000.

Mr. Beardsley: If he gets long leaf logs he will get into trouble.

Mr. Riddell: Mr. White can give you definite information.

Mr. White: It depends on the size of the logs. If the
2449 scaling is of a small log, that carload of logs weighs 20 per cent or 25 per cent — than if it is a large log. You see in scaling a log that is only 12 inches in diameter and 16 feet long. there are 64 feet in it, and it will saw out a good deal more than that, the overrun is so much greater on a small log, so that small log will weigh 20 to 25 per cent more than large logs per thousand.

Mr. Coleman: What is the average on short leaf and long leaf?

Mr. White: Short leaf timber growing on low lands will weigh 20 per cent more than the same class of timber growing on high land. It gets more moisture, and grows more rapidly, and at the same time it dries out and shrinks after it is dry, it is lighter than the timber on the high land.

Mr. Cowan: What is the general average, as you understand?

Mr. White: In Missouri our average was about 7,000 pounds per thousand feet of lumber.

respecting the operation of railroads?

Mr. White: That is board measure; that is on the high lands in Missouri. Down in Louisiana that timber will weigh 8,000 pounds to the thousand feet of lumber, the average size, trees that will average 14 to 15 inches in diameter.

2450 Mr. Cowan: Will you permit a few questions of Mr. White in the record as a matter of general information?

Mr. Greer: He is going to take the stand directly.

Mr. Cowan: Some one remarked here that the Forest Service of the Government has an accurate estimate.

Examiner Burchmore: Yes, sir. We will take that up with the Forest Service. Does this company comply with the acts of Congress respecting the operation of railroads?

Mr. Beardsley: They endeavor to do so; yes, sir.

Examiner Burchmore: Do you keep your accounts in accordan with the system prescribed by the Interstate Commerce Commissio

Mr. Beardsley: Yes, sir; but I understand we did not file the la annual report. For what reason, I do not know. I have been tr ing to find out ever since I have been here.

Examiner Burchmore: You have not filed any annual repo have you?

Mr. Beardsley: I do not know since the last one, since I got he and found it was required, I have been trying to get it.

Examiner Burchmore: I understand you do not file any annu reports.

2451 Mr. Beardsley: I cannot vouch for that. I have not be in charge of this department long enough to know.

Examiner Burchmore: How long have you been keeping a sep rate set of books for the railroad company?

Mr. Beardsley: Well, for years back; I think that can be a swered positively. I can give you any information that you desi because everything is kept separate on the books.

Examiner Burchmore: Is it not a fact that until very recently least this railroad company kept no separate books but simply ke separate accounts on the lumber company's books?

Mr. Beardsley: They still do that, keep separate accounts on t books of the lumber company, but the accounts are separate. understood that was your question before.

Examiner Burchmore: You are incorporated under the Louisia law as a railroad common carrier?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: Has this railroad paid any dividends?

Mr. Beardsley: No.

Examiner Burchmore: Is it losing or making money?

Mr. Beardsley: Losing money.

Examiner Burchmore: Has it consistently lost money from t beginning?

2452 Mr. Beardsley: I think it has.

Examiner Burchmore: Lost money, as far as being a ra road company is concerned?

Mr. Beardsley: Yes.

Examiner Burchmore: Have you any contract with the Cott Belt respecting rates and divisions?

Mr. Beardsley: Not to my knowledge.

Examiner Burchmore: But you have a contract with the Cott Belt respecting the track that connects your mill with the right way?

Mr. Beardsley: I am not positive.

Examiner Burchmore: Will you look into that on your retu and advise the Commission if you have one?

Mr. Beardsley: Yes, sir.

Examiner Burchmore: You need not send a copy, but simp indicate it.

Mr. Beardsley: That is, the spur track from the mill?

Examiner Burchmore: The spur track from the mill to the C ton Belt line.

Mr. Beardsley: And address the secretary at Washington?
Examiner Burchmore: Yes. Mr. Ziebold, will you furnish a map of this railroad?
2453 Mr. Ziebold: The witness has a map with him.
Mr. Beardsley: This map only covers the road running into Antrim.
Examiner Burchmore: Will you complete that map and send us that map?
Mr. Beardsley: I would prefer to send you a complete map.
Examiner Burchmore: That is all I desire to ask at this time.
Mr. Zeibold: When you referred to the fact that you did not know whether the line would be taken up and the line discontinued after the timber was cut out, because of the probable prospects of other traffic, owing to the supposed oil in that territory, you meant that you believe you have oil on your holdings, and in that vicinity, and if it should be discovered and developed, there would spring up communities and settlements and produce traffic other than timber; is that what you meant?
Mr. Beardsley: Yes, sir.
Mr. Ziebold: Consequently you could not say at this time what disposition is to be made of the line after the timber is cut out?
Mr. Beardsley: No, sir.
2454 Mr. Ziebold: When you say you keep your accounts separately you mean you keep them on the books of the lumber company but in such a manner throughout that the business of the lumber company and the railroad company are entirely separate and all details of each can be ascertained at any time?
Mr. Beardsley: Yes, sir. We have a special book prepared for it. It is a special combination journal, which provides for the accounts of the railroad company.
Mr. Ziebold: Are you desirous of complying with whatever regulations you have not complied with, so far as it is practicable and possible for you to do so?
Mr. Beardsley: Yes, sir, very anxious.
Mr. Ziebold: That is all.
Mr. Cowan: Have you any oil wells on your land?
Mr. Beardsley: No, sir, not now.
Mr. Cowan: One of the tap lines has a prospective diamond proposition on their land. Have you got anything of that sort on yours?
Mr. Beardsley: We do not think ours is a wild cat scheme, because there is oil right across the river.
Mr. Cowan: Well, there are diamonds right up in Arkansas.
Mr. Ziebold: Black?
2455 Mr. Cowan: Does the Louisiana Commission recognize this as a railroad?
Mr. Beardsley: I believe they do.
Mr. Cowan: Can you name any track that has iron or steel rails on it that the Louisiana Commission does not recognize?
Mr. Beardsley: Any track?
Mr. Cowan: es, do you know of any place where there are some rails and ties that the Louisiana Commission does not recognize it as a railroad?

Mr. Beardsley: No, sir, I do not.

Mr. Cowan: Where is this railroad projected to; is it Rocky Mount or Mountain?

Mr. Beardsley: Mount, is the name.

Mr. Cowan: Is there a prospect of an extension of this road?

Mr. Beardsley: No.

Mr. Cowan: Thank you. You are the only one I have heard of. What divisions did the road get previous to the time that it incorporated?

Mr. Beardsley: I cannot answer that question. I am not posted on it.

2456 Mr. Cowan: Well, you answered the Examiner that it got some division.

Mr. Beardsley: I know it did, but I do not know how much.

Mr. Cowan: But it did not get divisions as a railroad, did it?

Mr. Beardsley: I presume it did.

Mr. Cowan: It was not a railroad corporation before it was incorporated.

Mr. Beardsley: Well, I understand lots of them got it that were not incorporated at that time.

Mr. Cowan: The fact is they got it the same way that the rebating business went on all over the country; the division was paid to the lumber company as there was no railroad to pay it to?

Mr. Beardsley: I do not know.

Examiner Burchmore: I would not ask the witness as to that.

Mr. Cowan: I want to protect him. The statute of limitations has run, I guess. Well, your railroad company itself could not have got any divisions, as you had no incorporation.

Mr. Beardsley: We had a railroad company, but it was not incorporated.

Mr. Cowan: Who composed the company?

2457 Mr. Beardsley: Well, it was then owned by the lumber Company.

Examiner Burchmore: May I say this, I suppose you know, Judge Cowan, but I understand from another hearing that we had here that previous to the incorporation of some of these railroads the main connecting line used to pay allowances to them and paid these allowances however, not in the name of the lumber company but to the railroad company by name, although it was not incorporated, and the railroad simply endorsed the checks to the lumber company which owned it, and the railroad itself, having no corporate existence, the lumber company got the money. Now, at the present time if the money does pass from the railroad corporation to the lumber company owners, it passes indirectly through stock ownershop. But the reason they incorporated many of these companies, as you perhaps know, was the supposed intimation from the Commission that incorporation was necessary.

Mr. Cowan: I understand that to be the case, but my understanding does not become evidence in the record.

Examiner Burchmore: I think this statement will make it evidence in the record in connection with your question.

Mr. Cowan: Your lumber company kept no separate books for the railroad company before it was incorporated?

2458 Examiner Burchmore: It does not today, Judge Cowan; I do not believe I would bring it up further.

Mr. Cowan: Separate accounts, he said.

Mr. Beardsley: I presume it did, but I cannot answer positively. It was before my time.

Mr. Cowan: Do you keep an account in your books to show the operating statistics, for example, the train miles, car miles and tonnage, the statistics as to operating, as to amount of tonnage handled over different divisions of your road?

Mr. Beardsley: We do not keep all these items you have mentioned in the books, but we can ascertain them from the facts we have on the books.

Mr. Cowan: Is it not a fact the only books you keep are for the purpose of showing the amount of divisions the railroad company pays?

Mr. Beardsley: No, you are mistaken about that. I can show you every item of expense or receipts that the railroad has got, regardless of divisions.

Examiner Burchmore: I think this road is rather fully covered, and I would not ask any further questions.

Mr. Cowan: I have no further questions. I only asked

2459 that in view of the fact he stated the Louisiana Commission recognized it as a railroad.

(Witness excused.)

Mr. Ziebold: Are we expected to send a statement of tonnage and revenue? There seems to be a general understanding as to that?

Examiner Burchmore: You may have that right.

Mr. Ziebold: Showing the revenue and expenditures?

Examiner Burchmore: Yes.

Mr. Ziebold: At this point I desire to state for the purposes of the record, that this company is an incorporated company under the railroad corporation laws of Louisiana, and believes itself to be a common carrier, and as such entitled to divisions allowed common carriers. But we desire the Commission also to have in view for its consideration in passing on the status, rights and obligations of this company the provisions of the Interstate Commerce Law, as contained in section 15, which provides that where the owner directly or indirectly renders any service in connection with transportation that he or they are entitled to reasonable allowance for that service, which may be fixed, so that if we should be denied recogni-

2460 tion at this time because of some deficiency as a common carrier, we expect to have our rights considered under section 15, because then the owner is participating in the service, and transporting the product under the milling in transit principle that has been in existence. I wish that to be a part of the record.

2461 *Wilmar & Saline Valley Railway.*

A. W. JUDD, was called as a witness and having been duly sworn, testified as follows:

Examiner Burchmore: I understand, Mr. Judd, that the Wilmar

& Saline Valley is controlled by the Gates Lumber Company through ownership of a majority of the capital stock and that the officers of the two companies are practically identical. Are those statements correct?

Mr. Judd: They are.

Examiner Burchmore: Are the stockholders of the two companies the same, or what differences are there in stockholders?

Mr. Judd: They are the same titles but they are different stockholders.

Examiner Burchmore: The line of this railroad connects with the St. Louis, Iron Mountain & Southern at Wilmar, Arkansas?

Mr. Judd: Yes, sir.

Examiner Burchmore: From what point in what direction does it extend and for what distance?

Mr. Judd: Due south for twelve miles.

Examiner Burchmore: Any branch lines?

2462 Mr. Judd: The company has a branch line from the main line where we incorporated about fifteen miles.

Examiner Burchmore: Those branch lines are owned by the lumber company, however?

Mr. Judd: Yes, sir, by the Gates Lumber Company.

Examiner Burchmore: But the main line of the railroad would not be worth very much if it did not have those feeders?

Mr. Judd: Well, it was worth considerable at that time when it was incorporated; all our lumber was on that line then.

Examiner Burchmore: But at the present time those feeders are absolutely essential to the existence of this railroad?

Mr. Judd: Probably so.

Examiner Burchmore: I have here a letter addressed by you apparently to the statistician of the Commission in 1910 answering his inquiry as to the location of Godwin, Arkansas, which he says was not on any map he was able to obtain. Now Godwin, I understand is the southern terminus of your line.

Mr. Judd: Yes, sir.

Examiner Burchmore: Is there any settlement there?

2463 Mr. Judd: Yes, sir.

Examiner Burchmore: How much of a town?

Mr. Judd: There are probably 30 or 40 people.

Examiner Burchmore: Those are all lumber company employees. are they not?

Mr. Judd: No.

Examiner Burchmore: Is not that a company town?

Mr. Judd: Well, it is a company town but they are not all company employees who live there.

Examiner Burchmore: Your company has a commissary there?

Mr. Judd: No.

Examiner Burchmore: I mean the lumber company has?

Mr. Judd: No.

Examiner Burchmore: Are there any stores there?

Mr. Judd: No.

Examiner Burchmore: Where do they get their provisions and supplies?

Mr. Judd: At Wilmar.
Examiner Burchmore: Do you have a company store at Wilmar?
Mr. Judd: No.
Examiner Burchmore: Then this lumber company does
2464 not furnish supplies and so forth to its employees?
Mr. Judd: No, sir.
Examiner Burchmore: The mill of the Gates Lumber Company is located at what point?
Mr. Judd: Wilmar, Arkansas.
Examiner Burchmore: It is at the junction with the Iron Mountain?
Mr. Judd: Yes, sir.
Examiner Burchmore: And the lumber manufactured at that mill is loaded into cars standing on the Iron Mountain rails?
Mr. Judd: Yes, sir.
Examiner Burchmore: In other words the Wilmar & Saline Valley Railroad performs no service of transportation in connection with the movement of lumber out of the mill but only on logs into the mill?
Mr. Judd: No, they do some work for the lumber itself.
Examiner Burchmore: What is that work?
Mr. Judd: Just at present the railroad company does a lot of that work.
Examiner Burchmore: What work?
2465 Mr. Judd: The Iron Mountain only gives you a freight train about twice a week, and we take our engine around there and place empty cars and take the loaded out.
Examiner Burchmore: Where do you get the empty cars?
Mr. Judd: Off the Iron Mountain track.
Examiner Burchmore: Where do you put the loaded cars?
Mr. Judd: What we call a passing track up to the station, to the house track.
Examiner Burchmore: What switching distance is that?
Mr. Judd: Probably two thousand feet or more.
Examiner Burchmore: You move the empty cars about two thousand feet and the loaded cars about two thousand feet?
Mr. Judd: Yes, sir; not all the time.
Examiner Burchmore: You only do that in extraordinary times when the Iron Mountain is too busy to do it?
Mr. Judd: When they cannot do it, they are not too busy but they have not motive power to do it.
Examiner Burchmore: The engines are not powerful enough?
Mr. Judd: Yes, sir; that is what I mean.
Examiner Burchmore: Is there a heavy grade?
Mr. Judd: No, sir; but they are on a strike and they are in pretty bad shape.
2466 Examiner Burchmore: Then it is the temporary disability of the Iron Mountain that forces you to perform this service?
Mr. Judd: Not altogether. We do it the whole year round. There is a grade about a quarter of a mile east from us and if they bring a heavy load from Warren they will leave some on our track and we go around there and clean up the track so we can do some work.

Examiner Burchmore: When was this mill opened for operation?
Mr. Judd: I think twenty-one years ago. It was before my time.
Examiner Burchmore: When was the railroad construction begun?
Mr. Judd: I am not positive; I think it was ten or eleven years ago.
Examiner Burchmore: Originally it was not incorporated?
Mr. Judd: Yes, sir; this was.
Examiner Burchmore: When was the railroad incorporated?
Mr. Judd: I think it was in 1902.
Examiner Burchmore: The same time it was built?
Mr. Judd: Yes, sir. I can explain by saying we were log-
2467 ging north and now we are logging south.
Examiner Burchmore: Then you moved the railroad?
Mr. Judd: Yes, sir; not this railroad but the Gates Lumber Company at that time was milling north.
Examiner Burchmore: The Gates Lumber Company owned that railroad running north?
Mr. Judd: Yes, sir.
Examiner Burchmore: When was the road running south constructed?
Mr. Judd: I think ten years ago; I am not positive.
Examiner Burchmore: When was the railroad corporation organized?
Mr. Judd: I think in 1902; I am not positive, it was before my time.
Examiner Burchmore: At the same time the railroad was constructed?
Mr. Judd: Practically so, I suppose; I am not positive.
Examiner Burchmore: Was any other traffic in sight at that time excepting logs moving to the Gates Lumber Company?
Mr. Judd: No, I do not think there was.
Examiner Burchmore: This road was constructed prima-
2468 rily for the purpose of enabling the Gates Lumber Company to get its logs into its mill?
Mr. Judd: Yes, sir.
Examiner Burchmore: In other words to serve the same purpose that the former line running northward had served?
Mr. Judd: I think that is correct.
Examiner Burchmore: What is the capital stock of this road?
Mr. Judd: $50,000.
Examiner Burchmore: Does that represent the cost of constructing the road and the equipment?
Mr. Judd: I think it was supposed to be the cost of the road. That was before my time.
Examiner Burchmore: Any bonds?
Mr. Judd: No.
Examiner Burchmore: Any other indebtedness?
Mr. Judd: No.
Examiner Burchmore: What has the road cost to build, have you any figures?

Mr. Judd: I have not. The superintendent handles that.
Examiner Burchmore: Is he here this morning?
2469 Mr. Judd: No.
Examiner Burchmore: Has there been any other witness resent for your company?
Mr. Judd: No, sir.
Examiner Burchmore: You file an annual report with the Interstate Commerce Commission?
Mr. Judd: Yes, sir.
Examiner Burchmore: That report shows the cost of road and equipment?
Mr. Judd: Yes, sir.
Examiner Burchmore: Is it your opinion it is about $50,000, shown in that report?
Mr. Judd: I know the capital stock is $50,000.
Examiner Burchmore: I mean the cost of the road. Was it in excess of $50,000?
Mr. Judd: I could not say. I do not know.
Examiner Burchmore: Have they paid for any additions and betterments in recent years out of their net earnings?
Mr. Judd: Yes, sir.
Examiner Burchmore: That is the disposition of the surplus that has been made from time to time?
Mr. Judd: To some extent, yes, sir.
2470 Examiner Burchmore: This is a standard gauge line?
Mr. Judd: Yes, sir.
Examiner Burchmore: How many locomotives have you?
Mr. Judd: Four.
Examiner Burchmore: Do you own all those locomotives?
Mr. Judd: They are leased from the lumber company.
Examiner Burchmore: You lease all four of them?
Mr. Judd: Yes, sir.
Examiner Burchmore: What do you pay for those locomotives?
Mr. Judd: I could not say, I don't know.
Examiner Burchmore: You have not any idea?
Mr. Judd: I have not. No, I don't think there is any charge for it though. I do not think there is any charge for the lease.
Examiner Burchmore: You have some freight cars?
Mr. Judd: No, no freight cars.
Examiner Burchmore: You lease some freight cars?
Mr. Judd: Regular box cars?
Examiner Burchmore: I mean any kind of cars.
Mr. Judd: We have logging cars.
Examiner Burchmore: How many logging cars do you own?
Mr. Judd: None. They are leased.
2471 Examiner Burchmore: You lease about sixty?
Mr. Judd: Sixty. We have sixty-six cars altogether.
Examiner Burchmore: What other cars have you besides the logging cars?
Mr. Judd: Two tank cars and four flat cars.
Examiner Burchmore: All the equipment is owned by the lumber company?

Mr. Judd: Yes.

Examiner Burchmore: How long has that been true?

Mr. Judd: It has been true since we were incorporated.

Examiner Burchmore: Did you not inform the Examiner of the Commission or did not some officer of your company inform the Examiner of the Commission in the summer of 1909 when he was going over this property that the locomotives and cars were owned by the railroad?

Mr. Judd: I had thought of that—I was not there when the representative was there, but I think they were put in as locomotives of the railroad company. If that is true it was a mistake.

Examiner Burchmore: I would suggest that in the future you rectify mistakes of that kind, because our records ought to be correct. I suppose the annual reports are correct?

2472 Mr. Judd: Yes, sir.

Examiner Burchmore: What is the character of the construction of this road, does it run uphill and down dale like the one we were talking of the other day?

Mr. Judd: In some places it is quite hilly. In some places it is very fine track.

Examiner Burchmore: You have fills and cuts?

Mr. Judd: Yes, sir and some bridges.

Examiner Burchmore: Pretty well built?

Mr. Judd: The Iron Mountain people say it is a better track than they have.

Examiner Burchmore: How many track crews have you?

Mr. Judd: We have two on the incorporated part.

Examiner Burchmore: How many on the unincorporated part?

Mr. Judd: Two.

Examiner Burchmore: Those gangs do not interchange work, part on one part and part on the other?

Mr. Judd: No.

Examiner Burchmore: Any station agents?

Mr. Judd: We have a joint agent at Wilmar.

Examiner Burchmore: No other agent?

2473 Mr. Judd: No.

Examiner Burchmore: Any station buildings?

Mr. Judd: No.

Examiner Burchmore: Do you pay a part of the station expense at Wilmar?

Mr. Judd: We pay half of the agent's salary.

Examiner Burchmore: How many train crews has the railroad company?

Mr. Judd: One.

Examiner Burchmore: One train crew for four locomotives?

Mr. Judd: One of them is idle practically all the time and two working in the woods.

Examiner Burchmore: Those two that work in the woods you said were leased from the lumber company by the railroad company?

Mr. Judd: That is true.

Examiner Burchmore: If they are leased from the lumber com-

pany by the railroad company one would think that the railroad was operating that.

Mr. Judd: Well, that is not correct.

Examiner Burchmore: Then you did not mean to say that four were leased?

2474 Mr. Judd: No.

Examiner Burchmore: But two are leased?

Mr. Judd: By the railroad company direct, yes, sir.

Examiner Burchmore: Does the lumber company lease its locomotives?

Mr. Judd: No, they own them.

Examiner Burchmore: And they operate them?

Mr. Judd: Yes, sir, and they operate them.

Examiner Burchmore: Have you any other salaried employees than the ones I have mentioned?

Mr. Judd: No, sir.

Examiner Burchmore: Who performs the clerical work in the general offices of the railroad?

Mr. Judd: I do to some extent and the bookkeeper for the Gates Lumber Company.

Examiner Burchmore: Does the lumber company reimburse that bookkeeper?

Mr. Judd: No, sir.

Examiner Burchmore: Does it pay the lumber company anything for his services?

Mr. Judd: No.

Examiner Burchmore: That is a gratuitous service?

2475 Mr. Judd: Yes, sir.

Examiner Burchmore: Any passenger service?

Mr. Judd: No.

Examiner Burchmore: You are incorporated as a freight carrier exclusively?

Mr. Judd: Freight carrier exclusively.

Examiner Burchmore: How many freight trains do you run each way?

Mr. Judd: Two each way a day.

Examiner Burchmore: Any logging trains beside those?

Mr. Judd: No.

Examiner Burchmore: How many cars in each train?

Mr. Judd: Twenty, supposed to be twenty.

Examiner Burchmore: What is your tonnage for the past fiscal year?

Mr. Judd: About, if I remember right, 71,000 tons.

Examiner Burchmore: That was less than the previous year?

Mr. Judd: I could not say, I don't remember.

Examiner Burchmore: How much of that was logs?

Mr. Judd: About ninety per cent.

Examiner Burchmore: What was the rest of it?

Mr. Judd: Well, there were some stave bolts, some finished

2476 lumber and supplies to the shore out there.

Examiner Burchmore: As a matter of fact more than 95 per cent of it was logs, is not that the fact?

Mr. Judd: I could not say; I am just guessing at 90 per cent.

Examiner Burchmore: In the fiscal year 1908, for example, it seems you had a total tonnage of 78,998 tons, that is about correct?

Mr. Judd: I think so.

Examiner Burchmore: That entire tonnage is reported to have been supplied by the Gates Lumber Company. Has this foreign tonnage or public tonnage as I might describe it, grown up since 1908?

Mr. Judd: Oh, yes; yes, sir.

Examiner Burchmore: In the last year or so?

Mr. Judd: Yes, sir; I can explain that probably in this way, that after the end of our incorporated track we have changed and are going due east instead of due south now, and are going through a very fine farming country.

Examiner Burchmore: You took up a part of your trade?

Mr. Judd: Yes, sir, and we are going east now 15 miles from Godwin, instead of due south 8 miles.

Examiner Burchmore: What was the extent of your ton-
2477 nage in agricultural products last year?

Mr. Judd: Last year it was very light because we had just finished the road and were not running over it.

Examiner Burchmore: How much do you say it will be this year?

Mr. Judd: That is a hard thing to estimate.

Examiner Burchmore: As much as three carloads?

Mr. Judd: Yes, sir; more than that. We have application now for three cars of cotton seed. It will be a great deal more than that.

Examiner Burchmore: You have no lumber tonnage.

Mr. Judd: I don't understand what you mean by that.

Examiner Burchmore: You handle logs but no lumber?

Mr. Judd: We handle lumber from the mills direct to the farming district?

Examiner Burchmore: Small quantities?

Mr. Judd: Small quantities, yes, sir.

Examiner Burchmore: Do you have any local freight rates, or do you use the Arkansas scale?

Mr. Judd: We use the Arkansas Court House tariff or classification.

Examiner Burchmore: Do you file any tariffs with the
2478 Interstate Commerce Commission?

Mr. Judd: On lumber, yes, sir.

Examiner Burchmore: Not on other traffic?

Mr. Judd: No.

Examiner Burchmore: Do you have joint through class rates with the Iron Mountain?

Mr. Judd: You mean on classes?

Examiner Burchmore: Yes.

Mr. Judd: Nothing but just on lumber.

Examiner Burchmore: Are there any stations along your line at which lumber originates?

Mr. Judd: No, sir.

Examiner Burchmore: You have joint rates published from Wilmar on your line to interstate destinations reached by the Iron Mountain?

Mr. Judd: On lumber, yes, sir.

Examiner Burchmore: Do you have joint through rates from any other originating point?

Mr. Judd: No.

Examiner Burchmore: Those rates are the same as the local rates of the Iron Mountain; there is no arbitrary added in the case of shipments from your line?

2479 Mr. Judd: From Wilmar?

Examiner Burchmore: Yes.

Mr. Judd: No, not from Wilmar.

Examiner Burchmore: What division do you receive on that traffic?

Mr. Judd: Two cents.

Examiner Burchmore: On all traffic?

Mr. Judd: No, not on all traffic.

Examiner Burchmore: On all lumber traffic?

Mr. Judd: On lumber billed from Godwin.

Examiner Burchmore: Then your rates do reach back to Godwin?

Mr. Judd: Oh, yes; all our lumber shipments originating from Godwin or from the Wilmar & Saline Valley.

Examiner Burchmore: Then you have a milling in transit rate?

Mr. Judd: Yes, sir.

Examiner Burchmore: None of your lumber is billed as originating from Wilmar?

Mr. Judd: Yes, sir; lots of it.

Examiner Burchmore: What is that?

Mr. Judd: To all Arkansas points.

2480 Examiner Burchmore: That is lumber on which you do not get a division of the rate?

Mr. Judd: Yes, sir.

Examiner Burchmore: So there is no object in billing it back to Godwin. Now is two cents the highest division?

Mr. Judd: Yes, sir.

Examiner Burchmore: You are sure about that?

Mr. Judd: Yes, sir.

Examiner Burchmore: You formerly received a higher division?

Mr. Judd: No, sir, not that I know of. You probably have reference to four cents, but we do not get four cents. On eastern shipments the division shows four cents, but the freight bills come back overcharged two cents.

Examiner Burchmore: What is the meaning of that?

Mr. Judd: I don't know: It was done before I ever came in there; so we really get two cents.

Examiner Burchmore: That is all you actually get in cash, two cents?

Mr. Judd: Yes, sir.

Examiner Burchmore: Don't you think probably the Iron

Mountain has probably overcharged you two cents on that
2481 lumber?

Mr. Judd: Well, we watch that pretty close.

Examiner Burchmore: I think the division sheets of the Commission today show four cents and on some traffic is it not a fact there is a two cent arbitrary added to the Iron Mountain's rate?

Mr. Judd: I don't understand what you mean by that.

Examiner Burchmore: Well, whatever the explanation is, you say as a matter of fact you never got more than two cents?

Mr. Judd: Two cents is all we get.

Examiner Burchmore: If that is so, how did the Examiner learn when we examined your property and questioned your officials that you received four cents on Eastern traffic?

Mr. Judd: That is what I just remarked, the division sheet shows four cents, but those freight bills on eastern shipments come back overcharged two cents, and while we get four cents back from the Iron Mountain, nevertheless we are overcharged two cents, so it only makes two cents net.

Examiner Burchmore: Do those shippers put in a claim for the overcharge?

2482 Mr. Judd: No, we do.

Examiner Burchmore: You say you keep rather close watch of those things. Why didn't you see the matter through and learn the satisfactory explanation for the overcharge of two cents?

Mr. Judd: There wasn't any reason for that. That was established before I went there, and the way they wanted it, and it was satisfactory to me.

Examiner Burchmore: How much does the Gates Lumber Company pay for getting its logs to the mill?

Mr. Judd: I don't believe—it doesn't pay anything.

Examiner Burchmore: It does not pay anything?

Mr. Judd: They pay for the service of the Wilmar & Saline Valley employees and train crews.

Examiner Burchmore: Is there any billing accompanying the logs into the mills?

Mr. Judd: No.

Examiner Burchmore: Who issues the bill of lading on the outbound lumber?

Mr. Judd: The Wilmar & Saline Valley.

Examiner Burchmore: That bill shows the point of origin
2483 as Godwin?

Mr. Judd: Yes, sir.

Examiner Burchmore: Do you issue any waybills?

Mr. Judd: The joint agent does that.

Examiner Burchmore: Does that through waybill read over the Wilmar & Saline Valley or do you hand it over to the Iron Mountain or transfer billing?

Mr. Judd: It reads from the Wilmar & Saline Valley.

Examiner Burchmore: So it shows two connecting carriers? With the junction at Wilmar?

Mr. Judd: Yes, sir.

Examiner Burchmore: Are the proportions shown on that way-bill?

Mr. Judd: No.

Examiner Burchmore: That is all arranged through interline settlement?

Mr. Judd: Through interline settlement.

Examiner Burchmore: Then I suppose that the divisions on the outbound lumber pay for the transportation of the logs into the mill?

Mr. Judd: Supposed to.

Examiner Burchmore: Well, as a matter of fact they do, because your road is operated at a profit?

2484 Mr. Judd: Yes, sir.

Examiner Burchmore: Do you file tariffs with the Interstate Commerce Commission?

Mr. Judd: Yes, sir.

Examiner Burchmore: You endeavor to comply with all the regulations of the Interstate Commerce law I presume?

Mr. Judd: In every respect.

Examiner Burchmore: The same is true of state regulations?

Mr. Judd: Yes.

Examiner Burchmore: Your road is recognized in Arkansas as a common carrier railroad?

Mr. Judd: Yes, sir.

Examiner Burchmore: Have the courts ever recognized you?

Mr. Judd: Do you mean in a suit?

Examiner Burchmore: In any law suit.

Mr. Judd: No, sir, never had any.

Examiner Burchmore: Never have been sued for damages by an employee who was injured on the train?

Mr. Judd: No, sir.

Examiner Burchmore: The Gates Lumber Company oper-

2485 ates its own private side track?

Mr. Judd: At the mill, do you mean?

Examiner Burchmore: Now, I was speaking of up in the woods?

Mr. Judd: Yes, sir.

Examiner Burchmore: Then the locomotive that that company operates hauls the logs to the junction with the main line of the railroad?

Mr. Judd: Yes, sir.

Examiner Burchmore: Then the engine of the Wilmar & Saline Valley hauls the logs the rest of the way to the mill?

Mr. Judd: Yes, sir.

Examiner Burchmore: Then the Wilmer & Saline Valley does not go off its rails to the wood?

Mr. Judd: No, except on pay days.

Examiner Burchmore: Then it goes as a pay train?

Mr. Judd: No, we use it to take us to where the men are with the money.

Examiner Burchmore: Just as a convenience?

Mr. Judd: Just as a convenience; yes, sir.

Examiner Burchmore: The two companies have the same pay master?

2486 Mr. Judd: Yes, sir.

Examiner Burchmore: Do you keep your books separate from the books of the lumber company?

Mr. Judd: Yes, sir.

Examiner Burchmore: Have a separate set of books?

Mr. Judd: Yes, sir.

Examiner Burchmore: Is the cash of the two companies mingled in the same bank?

Mr. Judd: Yes, sir.

Examiner Burchmore: Does the railroad company issue any checks?

Mr. Judd: No.

Examiner Burchmore: The lumber company issues checks for them?

Mr. Judd: Yes, sir.

Examiner Burchmore: Do you keep your accounts in accordance with the system prescribed by the Interstate Commerce Commission?

Mr. Judd: Yes, sir; in every respect.

Examiner Burchmore: What dividends have you paid as a railroad company?

Mr. Judd: Do you mean the amount?

2487 Examiner Burchmore: Yes, in the whole history of the road.

Mr. Judd: I am not prepared to answer that. I don't remember.

Examiner Burchmore: Well, you pay dividends?

Mr. Judd: Yes, sir; we pay them to the stockholders of the railroad.

Examiner Burchmore: Is that a substantial dividend?

Mr. Judd: Pretty fair, I think; yes, sir; I do not remember the amount.

Examiner Burchmore: I have not the figures here for 1910, and I am not sure whether these are the 1909 or 1908 figures that I have, but I am inclined to think they are for 1909. At any rate I will read them:

Total operating revenue on traffic supplied by the controlling interest was $38,719.11; there was no other source of revenue. $38,719.11 as against $13,846.68 operating expenses, leaving a net revenue of $24,872.43. Have you made as much money as that this year?

Mr. Judd: I could not say: I have not got the figures. I don't know.

Examiner Burchmore: Well, your operating ratio seems

2488 to be rather low, $38,000 of revenue as against $13,000 of expenses. Are not your earnings very great for this road?

Mr. Judd: That would appear they were. The superintendent handles those figures and I am not qualified to answer.

Examiner Burchmore: Is he here?

Mr. Judd: No, sir.

Examiner Burchmore: I suppose you will see a copy of this testimony. If you find those figures are radically wrong I want you to correct them.

Mr. Judd: I will be glad to.

Examiner Burchmore: Of course we can verify them from our records, but I read them so that counsel will have an idea what they are. You paid a ten or fifteen per cent dividend this year?

Mr. Judd: I could not say about that. The superintendent handles that and I don't know.

Examiner Burchmore: But you understand the dividends are substantial?

Mr. Judd: Yes, sir; they are, I admit that.

Examiner Burchmore: Stock in this railroad company is desirable from an investment standpoint?

Mr. Judd: Well, it ought to be.

2489 Examiner Burchmore: Are there any other mills on the line?

Mr. Judd: No.

Mr. Jeffery: About that four cents, was it not a matter of fact that you published a two cent local rate from the mill point so that the net division was really two cents; in other words at one time you got your two cents that you charged yourself back, plus the two cent division allowed on the milling in transit tariff?

Mr. Judd: I am not qualified to state, because all that was done before I came there.

Mr. Jeffery: When did you come?

Mr. Judd: I have been working there quite a while but only three years since I had charge of these things or any connection with it.

Mr. Jeffery: My inclination is he has got a four cent division.

Mr. Judd: No, we do not. We get a two cent division net.

Examiner Burchmore: We will look into it and if the division sheets are not filed with the Commission the carriers will be requested to file them.

2490 Mr. Judd: The division sheet shows four cents I think. I have asked our Mr. Gates about that several times.

Examiner Burchmore: Suppose you ask your Mr. Gates to look into that and write the Commission and inform us, how you seem to have been cheated out of two cents.

Mr. Judd: I know that.

Mr. Jeffery: Find out whether it is an over charge or an under divide.

Mr. Judd: It must have been an under divide.

Mr. Cowan: The information gathered by an examination of the books of the so-called railway company show you had a total tonnage of 79,898 tons; that is the report your company made to the Examiners of the Interstate Commerce Commission.

Mr. Judd: For the fiscal year ending June 30th?

Mr. Cowan: 1909 I suppose.

Mr. Judd: It was 71,000 tons and some odd.

Mr. Cowan: This revenue you received, $38,719, which you could

not get except by a division of the rate, you had no other source of revenue, and that does not figure out two cents. That figures more money. Now there is something wrong about it. The tonnage is not right or the amount of the division you have named. I
2491 call your attention to it in order that you may correct it and show where the error is. Now, I want to ask you this question: what I mean is, if you multiply the tonnage by the two cents it does not account for the money you got.

Mr. Judd: I understand that. Your idea is to have me look into it and verify it?

Mr. Andrews: Have your Mr. Gates look into it.

Mr. Judd: I will be glad to do that.

Mr. Cowan: Is there any reason why you should not get four cents if other lumber companies get four cents divisions?

Mr. Judd: No good reason why we should not. I think we should if the rest of them are getting it.

Mr. Cowan: Your notion is it would be undue discrimination to give you two cents and another man under similar circumstances four cents?

Mr. Judd: Yes, sir; although I do not know that they are getting four cents.

Mr. Cowan: And it would be a still further discrimination to give another man none and give you two?

Mr. Judd: Well, I could not say, it would depend on what
2492 he has got.

Mr. Cowan: If they gave another man five or six cents and only gave you two cents that would be a discrimination?

Mr. Judd: Not necessarily?

Mr. Cowan: And would you not feel the effect of it in the ultimate operation of your business enterprise? It would necessarily be reflected in the business enterprise as a whole if one man got five cents out of the rate and another man got none.

Mr. Judd: No, I don't think so. I think conditions vary in different places.

Mr. Cowan: But I said under similar circumstances and conditions.

Mr. Judd: I am not qualified to say about that.

Mr. Cowan: That is, a man logging his mill on the Rock Island gets five cents per hundred pounds division and you are logging your mill on the Iron Mountain and by the same means, by one of these so-called railroad companies, and you get two cents. Do you think that is fair between you and him as a business proposition?

Mr. Judd: Well, I have always been kind of learned to be content with what I had, regardless of what the other fellow
2493 got.

Mr. Cowan: I did not ask you what you were content with, but would it be fair as a business proposition?

Mr. Judd: It would be fair to me.

Mr. Cowan: It would be?

Mr. Judd: Yes, sir.

Mr. Cowan: To give you two cents and the other man five?

Mr. Judd: If he had occasion to get it; yes, sir.
Mr. Cowan: To the victor then belongs the spoils?
Mr. Judd: Evidently, yes, sir.
Mr. Garwood: I think that is a line of examination that is going to keep us.
Mr. Cowan: I am through. You need not take any time arguing.
Mr. Garwood: Then you should have finished before you started.
Mr. Andrews: The Gates Lumber Company is the company that is identical in interest with the railroad company as stated. Is there any other interest in the lumber business or railroad business controlled or owned by the people or the corporation who own
2494 and control the Gates Lumber Company?
Mr. Judd: No.
Mr. Andrews: It is not connected with any other interests by a community of stock ownership or otherwise?
Mr. Judd: No.
Examiner Burchmore: Have you any other statement you desire to make?
Mr. Judd: No, I believe not.
Examiner Burchmore: Has there been any material change in the methods and practices of your company and its manner of doing business in the last year or two?
Mr. Judd: No, sir.
Examiner Burchmore: Then a report rendered to the Commissioner by an Examiner who went over the property a year or two ago would be as accurate today, omitting unessential details as it would then?
Mr. Judd: I think it would except as the spur track was changed. The map of the railroad would be entirely different, that is the spur part of it.
Examiner Burchmore: Will you furnish the Commission a map of your line such as has been requested of other companies?
2495 Mr. Judd: Yes, sir.
Examiner Burchmore: And a statement of the tonnage. You have heard those requests?
Mr. Judd: Yes, sir, I will be glad to.

(Witness excused.)

Examiner Burchmore: The Salem Winona & Southern Railroad.
Mr. Garwood: The Washington & Choctaw is represented by Mr J. G. Burlingame, vice-president and general manager. It is situated in the state of Alabama, connecting with the Mobile & Ohio, just above Mobile. It wishes to be made a party to the record and to enter its appearance.
Examiner Burchmore: With whom do they connect?
Mr. Garwood: The Mobile & Ohio.
Examiner Burchmore: East of the river?
Mr. Garwood: East of the river.
Examiner Burchmore: All right, but I am afraid we cannot hear them this week.

Mr. Garwood: He hardly expects that, but he wishes to enter his appearance and be made a party to the proceeding.

Examiner Burchmore: But he is not present ready for hearing?

2496 Mr. Garwood: Yes, he is here and if you reach him in due order he will be prepared to put on his case.

Mr. Riddell: Mr. White will be prepared to testify to all matters concerning the Salem, Winona & Southern with the exception of the division arrangement and tonnage movement and way billing of freight, and handling of the freight. It will be necessary for me to give that testimony.

Mr. Jeffery: Before going into an examination of this particular tap line I wish to state that a day or so ago I asked permission of the Commission on behalf of Mr. Brandeis of the Louisville & Nashville Railroad Company to file a brief in this investigation. At his request at that time I asked permission to file a brief on his behalf if the other carriers in the case filed briefs. I have a telegram now in which he asks me to ask the Commission for leave to file a brief irrespective of the action of the other carriers. He is not present and his road is not a party to the action, and I would like to file this telegram.

Examiner Burchmore: It will be filed and the request laid before the Commission: I might say, however, that I am not aware that the Commission have made any order or announcement in respect

2497 to briefs in the case, but when such an order is made Mr. Brandeis will be remembered.

(The telegram was received and thereupon marked filed December 16, 1910, and is attached hereto.)

2498 *Salem, Winona & Southern Railroad.*

J. B. WHITE, was called as a witness, and having been duly sworn, testified as follows:

Examiner Gutheim: Your name?

Mr. White: J. B. White.

Examiner Gutheim: You live where?

Mr. White: Kansas City, Missouri.

Examiner Gutheim: Your occupation is what?

Mr. White: My chief occupation is that of a lumber man.

Examiner Gutheim: You have some connection with the Salem, Winona & Southern Railway Company?

Mr. White: Yes, sir.

Examiner Gutheim: What is your official relation to that company?

Mr. White: President of the company.

Examiner Gutheim: Have you a map of that railroad which we can have in evidence?

Mr. White: I have a Rand-McNally map showing the road.

Examiner Gutheim: Well, as a matter of fact the Salem, Winona & Southern Railroad begins at a point in the State of Missouri known as Horse Hollow, and runs south to a point known as Winona Junction?

2499 Mr. White: It begins at Winona Junction and runs north to Angelina or Horse Hollow, that was the native name, but the Post Office there is Angelina, and it is on the map as Angelina.

Examiner Gutheim: What connections have you with the road, the Salem, Winona & Southern?

Mr. White: The Frisco at Winona.

Examiner Gutheim: At Winona or Winona Junction?

Mr. White: At Winona.

Examiner Gutheim: Do you operate with the motive power of the Salem, Winona & Southern Railway over any portion of the Frisco line east or west of Winona?

Mr. White: A little over two miles between Winona and Winona Junction.

Examiner Gutheim: Have you in the past operated farther east than Winona over the Frisco?

Mr. White: Yes, sir, we had a mill at Grandin and an unchartered road.

Examiner Gutheim: The operations at Grandin have now entirely ceased?

—. As a saw mill town it his entirely ceased and we are not lumbering there any more.

Examiner Gutheim: What communities are there on the
2500 line of the Salem, Winona & Southern between Winona and Horse Hollow?

Mr. White: Do you mean what towns?

Examiner Gutheim: Yes.

Mr. White: The town of West Eminence, which is a mile and a half from the county seat, is the principal town; and we have stations at two points between West Eminence and Winona Junction, which are Buckhart and Delaware.

Examiner Gutheim: Are there any communities of any considerable size at those two points?

Mr. White: It is a farming settlement. At Delaware we ship cattle and we have a yard there and a cattle and stock chute.

Examiner Gutheim: What is there at West Eminence?

Mr. White: At West Eminence there is theh saw mill of the Missouri Lumber & Mining Company and the commissary of the Missouri Lumber & Mining Company and two other mercantile establishments belonging to other people.

Examiner Gutheim: What is the name of the county seat that you say is one and one-half miles from West Eminence?

Mr. White: It is Eminence.

Examiner Gutheim: Has it any railroad serving it with
2501 the Salem, Winona & Southern through West Eminence?

Mr. White: That is all.

Examiner Gutheim: Is this road from Winona to Horse Hollow owned by the Salem, Winona & Southern Railway corporation?

Mr. White: No, it is rented from the Missouri Lumber & Mining Company.

Examiner Gutheim: Is the equipment that operates over that

road in the name of the Salem, Winona & Southern also owned by the Missouri Lumber & Mining Company?

Mr. White: It is owned by the Missouri Lumber & Mining Company and rented by the railroad company.

Examiner Gutheim: How long is the line of railroad that is leased?

Mr. White: Twenty miles, a little over twenty miles.

Examiner Gutheim: And that is from Winona to Horse Hollow?

Mr. White: That is from Winona Junction to Horse Hollow.

Examiner Gutheim: How much equipment is operated by the Salem, Winona & Southern and leased from the Missouri Lumber & Mining Company?

2502 Mr. White: Two locomotives, two box cars, fifty flat cars, two coaches and one caboose.

Examiner Gutheim: Are the fifty flat cars, flat cars of the ordinary type or logging cars?

Mr. White: They are flat cars of the ordinary type equipped with air brakes.

Examiner Gutheim: But used practically solely in the logging operations for the Missouri Lumber & Mining Company?

Mr. White: No, they are not used at all for the Missouri Lumber & Mining Company.

Examiner Gutheim: What consideration is paid by the Salem, Winona & Southern Railroad to the Missouri Lumber & Mining Company for the lease of the approximately twenty miles of railroad and the equipment you have mentioned?

Mr. White: $1,000 a month.

Examiner Gutheim: Upon what basis is that rental arrived at?

Mr. White: About eight per cent upon the value of the property, the cost of the road.

Examiner Gutheim: Are there any other lumber or mining operations that are served by the Salem, Winona & Southern

2503 Railroad with the exception of the Missouri Lumber & Mining Company and which produce a considerable proportion of its traffic?

Mr. White: There is one mill that cuts about 20,000 feet a day and that is between Horse Hollow and West Eminence. Then there is a smaller mill that is located from two or three miles from Horse Hollow and the lumber is hauled into Horse Hollow.

Mr. Riddell: I have here a letter addressed to me by the general superintendent of the Salem, Winona & Southern giving a list of the names and addresses of all the shippers of various products served by the railroad company. It might be well to file that.

Examiner Burchmore: Is that list correct?

Mr. Riddell: It certainly must be.

Mr. White: Yes, sir.

(The paper so offered and identified was received in evidence and thereupon marked Salem, Winona & Southern Exhibit 1, Witness White, received in evidence December 16, 1910 and is attached hereto.)

Examiner Gutheim: The two mills you have mentioned are

absolutely independent of the control of the Missouri Lum-
2504 ber & Mining Company?

Mr. White: Yes, sir.

Examiner Gutheim: What is the relation between the Missouri Lumber & Mining Company and the Salem, Winona & Southern Railroad Company?

Mr. White: No relation except practically the same stockholders in the Lumber Company own stock in the Salem, Winona & Southern Railroad Company.

Examiner Gutheim: Just what stockholders, if any, are there in the railroad company who are not stockholders in the lumber company?

Mr. White: There are perhaps only two, and they only own a small amount of stock, simply as directors; but the same amount of stock is not owned, that is, the same relative amount; for instance, one of our stockholders has twice as much stock in the railroad company as he has in the lumber company. He is quite a large stockholder.

Examiner Gutheim: From your description of the property I take it the Salem, Winona & Southern Railroad corporation does not own any railroad property whatever?

Mr. White: No, it does not.

Examiner Gutheim: And the valuation of the property
2505 upon which you pay a rental of one thousand dollars per month must be $150,000?

Mr. White: Yes, sir.

Examiner Gutheim: The road was constructed for the Missouri Lumber & Mining Company?

Mr. White: Yes.

Examiner Gutheim: Was it constructed contemporaneously with the erection of the West Eminence mill or prior thereto in connection with the operation of the old mill at Grandin?

Mr. White: It was constructed prior to the construction of the building of the mill at West Eminence.

Examiner Gutheim: Had it been used prior to that time in connection with the lumber operations serving the mill at Grandin?

Mr. White: Yes, sir.

Examiner Gutheim: North of Horse Hollow——

Mr. White: Perhaps I should qualify that statement by saying not as a railroad, not as a common carrier.

Examiner Gutheim: But merely as an incident to the lumbering operations?

Mr. White: Yes, sir.

2506 Examiner Gutheim: North of Horse Hollow are there any railroad operations at the present time that connect with the Salem, Winona & Southern?

Mr. White: Nothing excepting the tram road of the Missouri Lumber & Mining Company.

Examiner Gutheim: And that tram road is not operated in any way that might be termed a common carrier operation?

Mr. White: No, it is not.

Examiner Gutheim: Going back into the ancient history of the

company, at the time the mill operated at Grandin your logging was done north and west of Grandin on the Frisco and up on this track that is now the Salem, Winona & Southern into the woods that are still being cut over by the Missouri Lumber & Mining Company north of Horse Hollow?

Mr. White: No. Prior to the building of that road into Shannon County we operated at Grandin and north and west of Grandin on the main line of the Current River Railroad by a contract made in 1886.

Examiner Gutheim: Did that contract provide for the operation of that piece of track by the Missouri Lumber & Mining Company alone or did it give you merely a trackage right for certain
2507 purposes?

Mr. White: It gave us a trackage right in common with all other mills on that road. The Ozark Land & Lumber Company and the Cords-Fisher Lumber Company, all had trackage rights on that road.

Examiner Gutheim: Was the trackage right restricted to certain class of service. Were you permitted to haul anything other than logs and cars to be used in hauling logs?

Mr. White: We were permitted to haul logs and to haul food and equipment and anything that went into use for the hauling of logs.

Examiner Gutheim: And what consideration was paid by the Missouri Lumber & Mining Company for the trackage privilege?

Mr. White: The same consideration as they granted all other mills, and was the consideration whereby the railroad company agreed to build a railroad to Grandin, Missouri and have it finished by a certain time, providing we would build a mill and have it finished by a certain time, a mill of a certain capacity that would be capable of giving them fifteen million feet of lumber each year.

2508 Examiner Gutheim: That mill's production, were you required under the contract, under the trackage privilege to give any portion of the output to the Frisco?

Mr. White: Only such proportion to the Frisco as came from the logs we hauled over their road.

Examiner Gutheim: In other words, you guaranteed the Frisco a certain percent of the tonnage that came out of the logs hauled from over their road under the trackage privilege?

Mr. White: Yes, sir; that is right.

Examiner Gutheim: Was there any agreement as to the rates the Missouri Lumber & Mining Company was to pay out of Grandin?

Mr. White: The contract stated that the Missouri Lumber & Mining Company should have the same rates as any other mill along the line; that the rate should not exceed a certain sum, and that it should have in all respects the same rates as the most favored competitor.

Examiner Gutheim: What was the reason for the separate incorporation of the particular piece of track from Winona to Horse Hollow about 1908 as a common carrier corporation?

2509 Mr. White: Do you mean why did we build from the junction two miles from——

Examiner Gutheim: No, why did you incorporate the road, or that piece of track separately as the Salem, Winona & Southern?

Mr. White: Well, it was because we considered the matter and we were informed—the Missouri Lumber & Mining Company was informed by the railroad that they could not under the law give the divisions to the railroad which was unincorporated or to the Missouri Lumber & Mining Company through its unincorporated railroad, and then they cancelled our divisions, and then we were entirely cut out at Grandin, and the question was whether we should build a mill at West Eminence in Shannon County——

Mr. Riddell: Did not they also notify you that they could not continue this trackage privilege over their line with a lumber company?

Mr. White: Yes, sir, they also informed us they could not continue the trackage agreement.

Examiner Burchmore: That seems to be a sufficient explanation for the purposes of this record.

2510 Examiner Gutheim: After the discontinuance of the operation at Grandin was the mill dismantled and moved to the place now known as West Eminence?

Mr. White: Yes, sir, a great portion of it.

Examiner Gutheim: Was that property moved by the power of the Salem, Winona & Southern or the Missouri Lumber & Mining Company over the line of the Frisco from Grandin to Winona Junction under the trackage agreement that you had?

Mr. White: Yes, under that trackage agreement.

Examiner Gutheim: As a matter of fact the trackage agreement you said provided only for the hauling of logs and logging camp supplies?

Mr. White: Yes, sir, and the machinery, of course, and I did not add that, but anything pertaining to the successful operation of our mills was permitted.

Examiner Gutheim: That is to say it was the understanding of your company that that old contract that was made back in 1887 contemplated that when that Grandin mill should be moved, if ever, you had the privilege of carrying that mill machinery over the line of the Frisco under those trackage rights as far as you desired?

Mr. White: I do not think it was contemplated, I do not think we intended to move the mill at the time it was made.

2511 Examiner Gutheim: But it was contemplated that the definition of the commodities that you were permitted to carry under that trackage agreement should take in mill machinery?

Mr. White: Yes, sir, it was contemplated that everything that was necessary to the successful prosecution of our lumber business at Grandin, between that and the forest, between the town of Grandin and the forest, we would be permitted to run our own logging trains over and carry our own material, and we carried lumber for our camps and——

Examiner Burchmore: Is it not a fact when any large mills are opened up in this southern pine territory that it is the custom or has been the custom of the railroads running south from Chicago,

for example, to put in special commodity rates to cover the movement of sawmill machinery and other supplies of that nature.

Mr. White: I think that is true.

Examiner Burchmore: I have observed a great many tariffs of that nature and ask whether that is not the fact.

Mr. White: Yes, sir. Mr. Riddell would be familiar with the tariff arrangements.

Mr. Riddell: Well, that was the custom more or less general, I think, when some of the mills in which Mr. White is in-
2512 terested in Louisiana were built seven or eight years ago, special rates were made on all the equipment of those mills. I wanted to ask whether this was of any importance, the movement of this tonnage from Grandin to West Eminence? It was strictly within the State, and I do not think any question ought to be raised as to its being regular.

Examiner Burchmore: Well, it has a general relation to the whole nature of that trackage agreement and arrangement. Have you any further questions along that line?

Examiner Gutheim: No, I had about finished on it.

Examiner Burchmore: It seems to me it is pertinent to this inquiry, although it may not be directly involved.

Mr. Riddell: Of course, it is understood that trackage agreement is no longer in existence east of Winona.

Examiner Gutheim: Yes, that is understood. The entire track of the Salem, Winona & Southern and the Missouri Lumber & Mining Company is of standard gauge?

Mr. White: It is.

Examiner Gutheim: That portion which is operated entirely by the Salem, Winona & Southern between Horse Hollow and Winona is about what weight of rails?

2513 Mr. White: It is chiefly—I think it all 56 pound.

Examiner Gutheim: Have you any station buildings along the line from Winona to Horse Hollow?

Mr. White: Yes.

Examiner Gutheim: At any place with the exception of West Eminence.

Mr. White: No station building for the accommodation of passengers except at West Eminence. At Horse Hollow the passengers occupy or use the store where tickets are sold at one end of the store.

Examiner Gutheim: About how many men have you in the railroad operation—that is, how many road crews have you?

Mr. White: We have three.

Examiner Gutheim: How many men in them?

Mr. White: I think 15.

Examiner Gutheim: State generally about how many employés in the transportation service?

Mr. White: I do not know whether I have that statement here. Have you got it, Mr. Riddell? It would be enough, anyhow, to equip two trains, and then an agent at West Eminence and
2514 a joint agent with the Frisco at Winona, and then our auditor and ticket agent.

Examiner Gutheim: Is your general office work all done at West Eminence?

Mr. White: The general office work, the transportation, we have an office in Kansas City for the general traffic manager.

Examiner Gutheim: But is the general office work at West Eminence done by employés who are solely railroad employés or joint employés?

Mr. White: Some of it is solely railroad employés.

Examiner Gutheim: Are the joint employés paid by the railroad company and a portion of the wages charged to the lumber company, or the other way round?

Mr. White: The Salem, Winona & Southern hired its own bookkeeper, and I am not sure whether any portion of the auditor's salary is charged to the Missouri Lumber & Mining Company, but I am under the impression that the auditor does some work for the Missouri Lumber & Mining Company, but most of his work is for the railroad company.

Examiner Gutheim: What train service is operated by the Salem, Winona & Southern, how many trains a day?

Mr. White: Two trains each way.

2515 Examiner Gutheim: Is passenger service taken care of in those trains?

Mr. White: Passenger service is well taken care of.

Examiner Gutheim: Do you handle any United States mail or express?

Mr. White: We handle United States mail.

Examiner Gutheim: You have no express contracts?

Mr. White: We have no express contracts.

Examiner Gutheim: Can you say what your total tonnage was in your last fiscal year, or if you have not been operating there a year, since you began operations, and how much was handled before the Missouri Lumber & Mining Company.

Mr. White: Yes, sir; Mr. Riddell, our traffic manager, will state it. I don't know whether he has been sworn yet.

(J. B. RIDDELL was then duly sworn.)

Mr. Riddell: The general tonnage for the last fiscal year was 64,572 tons. That was comprised of 56,107 tons of forest products and 8,465 tons of other freight. The Missouri Lumber & Mining Company contributed 53,301 tons of the forest products and the other interests 2,806 tons, and the Missouri Lumber & Mining Company contributed 5,310 tons of other freight than forest prod-

2516 ucts, and other interests contributed 3,155 tons. Would you like the revenue also?

Examiner Gutheim: Yes.

Mr. Riddell: The total revenue was $54,074.20, made up as follows: Forest products of the Missouri Lumber & Mining Company, $30,290.17; forest products outside interests, $1,408.93. Other freight of Missouri Lumber & Mining Company $14,036.37. Other freight of outside interests $8,338.73. I would like to say at this point in explanation that this other freight of the Missouri Lumber

& Mining Company, $14,036.37 is materially in excess of what the figures will be next year, or perhaps for several years to come by reason of the fact that the Salem, Winona & Southern charged for the transportation of all of the machinery and lumber and construction material of all kinds that entered into the building of the sawmill and planing mill at West Eminence, as well as all of the other buildings that go to make up that town. Excepting that tonnage, the freight other than forest products handled for outside interests exceeded that handled for account of the Missouri Lumber & Mining Company.

Examiner Burchmore: But for that year about $44,000 of the revenue came from the controlling interests, and about $9,000 outside?

2517 Mr. Riddell: Approximately.

Mr. Andrews: Could you state that in per cent; have you worked it out?

Examiner Burchmore: It is about 20 per cent.

Mr. Riddell: I have not worked out the percentage, but it is in the record.

Examiner Burchmore: Does that answer the request that has been made of the other companies?

Mr. Riddell: Yes.

(The statement so offered and identified, was received in evidence and thereupon marked Salem, Winona & Southern Exhibit No. 2, Witness Riddell, received in evidence December 16th, 1910, and is attached hereto.)

Examiner Gutheim: While you were operating the mill at Grandin, did the Frisco take the product of the mill right at that point?

Mr. White: Yes, sir. They took it at the station at their own sidings at Grandin.

Examiner Gutheim: Did the Missouri Lumber & Mining Company have to perform any actual service in getting that mill product to their siding?

Mr. White: Yes, sir, we owned——

2518 Examiner Gutheim: How much of a haul?

Mr. White: Well, it was not over—for our rough lumber, the way our tracks run, we would have to haul the rough lumber a mile, nearly a mile and a half. Our dressed lumber, the tracks connecting with our shed from the planing mill, it was not perhaps over a few hundred feet, 500 or 1000 feet.

Examiner Gutheim: In the operation of the new mill at West Eminence do you have to haul milled products down to Winona Junction for delivery to the Frisco?

Mr. White: The Salem, Winona & Southern?

Examiner Gutheim: Yes.

Mr. White: No, the Salem, Winona & Southern Railroad takes our product at the mill at West Eminence and hauls it to Winona Junction or down to Winona.

Examiner Gutheim: And there the Frisco gets it?

Mr. White: The Frisco gets it at Winona.

Examiner Gutheim: How much of a haul is it from West Emi-

nence to the point of interchange with the Frisco at Winona, approximately?

Mr. White: Something over 15 miles.

Mr. Riddell: I think it is 15.77.

2519 Mr. White: Yes, sir.

Examiner Gutheim: At the time of the operation at Grandin say for the last year you were at Grandin, about what was the average haul on the logs that were worked up in the mill?

Mr. White: The last year at Grandin we hauled our logs from West Eminence, and I think hauled them about 50 miles.

Examiner Gutheim: The log haul I suppose has been constantly increasing from the time that the Grandin mill had been erected?

Mr. White: Yes, sir.

Examiner Gutheim: That in part was the reason for the continuance of the mill at Grandin and the removal to West Eminence.

Mr. White: Yes, sir. It was not the reason we moved to West Eminence, but it was the reason we quit Grandin.

Examiner Gutheim: About what is the average haul on your logs to the West Eminence mill at the present time?

Mr. White: I think that is an average of about 12 or 15 miles. an average of 12 miles, I will say.

Examiner Gutheim: Is the operation of the railroad north of Horse Hollow entirely at the expense of the Missouri Lumber & Mining Company?

2520 Mr. White: The operation of the logging roads to Horse Hollow from West Eminence is entirely at the expense of the Missiouri Lumber & Mining Company. The Salem, Winona & Southern Railroad Company rents that portion between West Eminence and Horse Hollow, nearly 6 miles, for the use of their business, the railroad business, taking supplies up into that country for the Missouri Lumber & Mining Company's stores and for other stores, and lumber.

Examiner Gutheim: You mean that the Salem, Winona & Southern permits the Missouri Lumber & Mining Company to use the tracks between West Eminence and Horse Hollow?

Mr. White: It is different——

Mr. Riddell: The Salem, Winona & Southern is incorporated as a common carrier between West Eminence and Winona Junction, and this portion of the track between West Eminence and Horse Hollow is simply rented from the Missouri Lumber & Mining Company.

Mr. White: That is right.

Examiner Gutheim: Then I am to understand that the track operated by the lumber company begins at West Eminence and not at Horse Hollow?

2521 Mr. White: Yes, sir.

Mr. Andrews: I understood you to say that all the line you operated as a railroad was leased from the Missouri Lumber & Mining Company.

Mr. White: It is.

Mr. Andrews: I did not so understand the question asked of you, and I wanted to clear up the confusion.

Mr. White: The Salem, Winona & Southern as incorporated has the exclusive right to the road from West Eminence to the Frisco, some 15.7 miles. Then they rent five or six miles more of the lumber company to Horse Hollow.

Examiner Gutheim: Is the railroad operation a profitable operation?

Examiner Burchmore: May I interrupt. I think we shall call the Shreveport, Houston & Gulf. Are you ready?

Mr. Walter: We are ready.

Examiner Burchmore: There will be no other cases called until two o'clock.

Mr. White: It is a very profitable operation as a railroad, but largely due to the fact that we have had an unusual amount of freight in hauling machinery in and supplies for the new plant at West Eminence during the past year closed June 30th. It
2522 will not be as much next year or this year.

Examiner Gutheim: That is all.

Mr. Riddell: I do not know whether you stated, but I would like to get you to state whether or not the agent at West Eminence devotes his entire time to the affairs of the railroad, and gets all his compensation from the railroad?

Mr. White: He does.

Mr. Riddell: You stated that you maintained a stock pen and chute at Delaware, and I would like to ask whether or not you do not maintain one at West Eminence?

Mr. White: Yes, sir.

Mr. Riddell: And you actually use them in the shipment of live stock?

Mr. White: Yes, sir.

Mr. Riddell: Do you have any track scales for the weighing of carload freight?

Mr. White: We do. I should add that we also have shipped two carloads of sheep from Horse Hollow in the last year.

Mr. Riddle: The Salem, Winona & Southern Railroad does not handle logs for the Missouri Lumber & Mining Company?

Mr. White: No, not any logs.

Mr. Riddell: Your trains are operated on a regular pub-
2523 lished schedule, are they not?

Mr. White: Yes, sir.

Mr. Riddell: You have a time card and it is posted?

Mr. White: Yes.

Mr. Riddell: You have tickets on sale?

Mr. White: Yes.

Mr. Riddell: Both at Winona and West Eminence?

Mr. White: Yes, sir.

Mr. Riddell: In the interchange of the cars with the Frisco you are governed by the per diem rules, are you not?

Mr. White: Yes, sir.

Mr. Riddell: And in your relations with the shippers along your line, the Car Service Rules apply, do they not?

Mr. White: They do.

Mr. Riddell: This town of Eminence which is adjacent to West

Eminence, that is the county seat of Shannon County, is a town of several hundred population?

Mr. White: Yes, sir.

Mr. Riddell: It has stores and banks, one or more?

Mr. White: It has four or five good stores, and a bank, and it has a large hotel and the usual accommodations for a good town

2524 Mr. Riddell: Not quite as large as the Grunewald?

Mr. White: No, but it is built on the same plan; it is very extensive; it is built out of concrete and——

Mr. Riddell: All that community are dependent solely on the Salem, Winona & Southern as a means of transportation of persons and property?

Mr. White: Yes, sir.

Mr. Riddell: Did you seek a mail contract with the government, or did the government make a demand on you to handle the mail?

Mr. White: Our road did not seek the contract.

Mr. Riddell: That is what I am asking you.

Mr. White: No, the railroad did not.

Mr. Riddell: The first overtures were made by the government.

Mr. White: Made by the people in a petition, I think——

Mr. Riddell: I was only speaking of your relation to the government.

Mr. White: No, we did not seek it.

Mr. Riddell: Is the line betwen West Eminence and the junction of the Frisco through the lands owned by the Missouri Lumber & Mining Company.

Mr. White: The line between West Eminence and the

2525 Frisco for 13.7 miles is owned by other people. The Missouri Lumber & Mining Company never owned but one quarter section of 160 acres.

Mr. Riddell: These are not exclusive passenger trains, but are mixed trains?

Mr. White: Yes, sir.

Mr. Riddell: They are identical with the Frisco, I believe.

Mr. White: Yes, sir.

Mr. Riddell: The only difference being that in that section the Frisco only runs one train and you run two?

Mr. White: Yes, sir.

Mr. Riddell: Is the country along this line to its northern terminus susceptible of agricultural pursuits?

Mr. White: Yes, sir, it is.

Mr. Riddell: Is it being developed at all or any emigration into the territory along your line?

Mr. White: I see that the Emigration Commissioner published that there were 300 emigrants the past year into Shannon County.

Mr. Riddell: How long a cut has the mill of the Missouri Lumber & Mining Company?

2526 Mr. White: Only five years.

Mr. Riddell: Can you say how the volume of timber owned by the Missouri Mining & Lumber Company in this territory north of West Eminence compares with other interests?

Mr. White: We own about not more than one-fifth of the timber in that territory.

Mr. Riddell: Not more than twenty per cent?

Mr. White: Not more than 20 per cent. There are other companies which own a great deal more than we have. One company has 85,000 acres, while we only have 50,000 acres.

Mr. Riddell: When this timber of the Missouri Lumber & Mining Company is exhausted and the mill ceases to operate, this railroad will have to extend or in some other way find additional tonnage?

Mr. White: That is the intention, yes.

Mr. Riddell: The original intention, I believe, was not to take the road to Hot Springs, but up to somewhere near Salem?

Mr. White: That is the intention.

Mr. Riddell: I think there was a plan on foot at one time to couple up with the road of the Ozark Land & Lumber Company which runs south about 25 miles south of Winona?

Mr. White: Yes, sir, we tried to accomplish that.

2527 Examiner Burchmore: I understand you contemplated building across to reach the Frisco?

M. White: The Frisco and Salem. The Frisco Road runs through Salem to St. Louis, and then it also has a branch south of us, and we contemplate building and connecting up the Salem Road.

Examiner Burchmore: What advantage would accrue to you connecting with the Frisco at Salem?

Mr. White: The development of the coal and iron mines. There are a great many iron mines in Shannon County and a great deal of timber in Shannon County, and then the country is being developed by farmers and they need a railroad.

Examiner Burchmore: Has the Frisco held out any inducements to you in the shape of divisions to connect with their line?

Mr. White: We expect to get divisions. The road is getting divisions, but they held out no further inducements.

Examiner Burchmore: It is not anticipated that the result of a connection with the Frisco would be an increase in divisions?

Mr. White: No.

Mr. Riddell: I do not think that has been discussed at all.

2528 Mr. White: No, it has not been discussed at all.

Mr. Riddell: Is it your belief there is a necessity for a railroad in that country?

Mr. White: Yes, sir, and we were encouraged to build the railroad.

Mr. Riddell: I believe you have some figures showing the earnings of the road. Will you please state how much they earned the last fiscal year on passengers?

Mr. White: The passenger revenue for the year ending June 30th, $5,282.29.

Mr. Riddell: How much from mail?

Mr. White: $822.86.

Mr. Riddell: Would it be a reasonably safe assumption that the bulk of those people traveled between Winona and West Eminence?

Mr. White: The bulk of the people traveled between there and

West Eminence, but they are getting off at Delaware, and Buckhart and all stations.

Mr. Riddell: I only asked that to get at some idea of the number of passengers. We have that information filed, but I believe the rate between Winona and West Eminence is about 60 cents. It is based on four cents.

2529 Examiner Burchmore: Your report to the Commission shows the number of passenger miles.

Mr. Riddell: We did not have it before us here. You know, I believe, of the fact that it is contended by the intervenors in this case that the allowance of divisions gives an advantage to the mill served by roads who get those divisions and enables those mills to sell lumber at cheaper delivered prices than other people, and that they are actually used for that purpose. You know of that contention.

Mr. White: Yes, sir, I know that has been stated.

Mr. Riddell: In addition to being the President of this railroad you are general manager, are you not, of the Missouri Lumber & Land Exchange Company?

Mr. White: Yes, sir.

Mr. Riddell: And that I understand to be a selling agency handling the output of the Missouri Lumber & Mining Company, the Ozark Land & Lumber Company, the Louisiana Central Lumber Company, and the Louisiana Long Leaf Lumber Company?

Mr. White: That is right.

Mr. Riddell: No one interest owns or controls all those
2530 various lumber companies?

Mr. White: No.

Mr. Riddell: For instance, there is no stockholder in the Ozark Land & Lumber Company who owns any stock in the Missouri Lumber & Mining Company?

Mr. White: None.

Mr. Riddell: And no stockholders in the Missouri Lumber & Mining Company that owns any in the Ozark Company?

Mr. White: No.

Examiner Burchmore: Does one company own the other?

Mr. White: No.

Mr. Riddell: The principal interest in the Ozark Land & Lumber Company does not own any stock in any of the other companies?

Mr. White: No.

Mr. Riddell: And the principal interest in the Louisiana Central Lumber Company does not own stock in either the Louisiana Long Leaf Company or the Ozark Land & Lumber Company?

Mr. White: No, none.

Mr. Riddell: As a matter of fact, while some people are interested in most of the companies, there is no one or two
2531 or three or four people who control them all?

Mr. White: No.

Mr. Riddell: When a salesman for this Missouri Lumber & Land Exchange Company goes to sell lumber at a point like St. Louis or

Chicago or any point east of the Missouri River, as an illustration, he prices that lumber at a figure that includes the carriage to destination or a delivered price, so to speak?

Mr. White: Yes, sir.

Mr. Riddell: When he sells that lumber he does not know from what mill it is likely to be moved?

Mr. White: He does not.

Mr. Riddell: We will take St. Louis as an illustration or Chicago, as the situation is just the same. If he should sell to a dealer in St. Louis or Chicago some 10 or 12 carloads of lumber at one time, he knows nothing about who will ship that lumber except it will be some mill represented by the Exchange?

Mr. White: That is all.

Mr. Riddell: When that order reaches the office in Kansas City it will very probably be distributed as among all these mills in the event that the conditions at the various mills will permit?

2532 Mr. White: That is the plan we follow.

Mr. Riddell: The price has been fixed in advance and each one of these different mills, assuming that that division be made, will get the same delivered price?

Mr. White: Yes, sir.

Mr. Riddell: Out of which it will have to pay the freight rate?

Mr. White: Yes, sir.

Mr. Riddell: Do you know it to be a fact that any part of this lumber that may be shipped from Clarks or Standard on the Iron Mountain would move on a rate out of which the so-called tap line would receive a division of four cents, whereas if it were placed at West Eminence the tap lines would get three cents, and if it went to the T. & P. mill at Victoria the tap line would get two cents, and if it went to Foster on the Kansas City Southern the tap line would get one cent, whereas if it went to Winona the tap line would get nothing.

Mr. White: That is correct.

Examiner Burchmore: Are you trying to show that the divisions are grossly disproportionate to different points?

2533 Mr. Riddell: No. I am trying to show that the divisions to the tap line has absolutely nothing to do with the fixing of the price of the lumber so far as the mills represented by the Missouri Lumber & Land Exchange is concerned.

Examiner Burchmore: Suppose that is true, it might be true that the divisions materially affect the prosperity of the mills that receive them.

Mr. Riddell: I was not dealing with that at all, but only with the delivered price of the lumber.

Examiner Burchmore: Well, that may be so.

Mr. Riddell: It is in our case.

Mr. Andrews: Will you please state the delivered rate at St. Louis from each of the points you have named. You have stated the divisions.

Mr. Riddell: Well, from West Eminence it is 11 cents. From Winona 11 cents; from Fisher 18 cents; from Victoria 18 cents, and from Clarks and Standard 18 cents.

r. Andrews: And from the Ozark Mill?
r. Riddell: I stated that, 11 cents. The rates from Missouri made a differential of 7 cents per 100 pounds under the south, ather the rates from the south are made a differential of 11 cents per 100 pounds over Missouri, from what is known as the Grandin district.
Examiner Gutheim: You spoke of a couple of carloads of p which you took out of Horse Hollow?
r. White: Yes, sir.
xaminer Gutheim: You are getting more or less of that business n Horse Hollow all the time?
r. White: No, the stock business is just beginning to be loped. There has been a great deal of work done to develop country. The Governor and his staff were down there, and are trying to get that country settled up in the Ozark region, so they have got some people in there to raising sheep and cattle it is going to be a stock country largely.
xaminer Gutheim: The common carrier operation of the Salem, ona & Southern does not serve Horse Hollow, but only goes s far as West Eminence?
r. White: It serves as far as Horse Hollow.
Examiner Gutheim: I understood you to say that the Salem, ona & Southern did not go as far as Horse Hollow, but from West inence to Horse Hollow was all the Missouri Lumber & Mining Company's track.
Mr. White: It is, and so is all the track. They lease it to the Salem, Winona & Southern.
Examiner Gutheim: But as I understand it they do not run the ion between West Eminence and Horse Hollow.
r. White: But they do, and I so stated.
r. Riddell: I think the distinction is between leased and incor ated. The line is only incorporated up to West Eminence, but it exclusive use of the tracks to West Eminence, but beyond that ents it.
Examiner Gutheim: Have the people in Horse Hollow the right emand the common carrier services beyond West Eminence?
r. White: Yes, sir, it is being performed every day.
Examiner Gutheim: West Eminence is the point at which the ling operation of the Missouri Lumber & Mining Company is at sent conducted?
r. White: Yes, sir.
Examiner Gutheim: You say you have about five years of cut?
r. White: That is all.
Examiner Gutheim: Is there a written contract that provides for lease of this track from Winona Junction up to West Emin ence?
Mr. White: Yes, sir, there is.
Examiner Burchmore: Is it filed with the Commission?
r. White: I do not remember. I think it is, but it is filed with State Commission.
r. Riddell: We will file it.

Mr. White: We will file it, yes, sir.

Examiner Burchmore: You will file it if it is not already filed?

Mr. White: Yes, sir.

Examiner Gutheim: But the Salem, Winona & Southern as a corporation owns absolutely no railroad property?

Mr. White: No.

Examiner Gutheim: So if it should get out of that country it is not likely it is going to suffer any of the inconvenience that usually attends the cessation of a common carrier operation?

Mr. White: They will not unless they should be forced out by some unfortunate decision.

Examiner Gutheim: But if they should happen to get out they would not have any property as a railroad?

Mr. White: No, but we expect to make that railroad pay.

2537 Mr. Garwood: Do you ship any lumber to Texas?

Mr. White: No. That is out of our territory.

Mr. Garwood: Do you ship any to New Mexico?

Mr. White: No.

Mr. Garwood: To what extent do you ship to Kansas?

Mr. White: Mr. Riddell will know more about that.

Mr. Riddell: We ship quite largely to Kansas. West Eminence is not very far from the Missouri-Kansas State Line.

Mr. Garwood: Where do you ship the greater part of your product to?

Mr. Riddell: Into the State of Missouri.

Mr. Garwood: It is consumed locally in the state?

Mr. Riddell: Yes, sir, Kansas City and St. Louis are large consuming points, and St. Joseph.

Mr. Garwood: You ship nothing to Texas?

Mr. Riddell: No. Did you want to ask me about the divisions?

Mr. Walter: Could we not now have the captain state the weight of logs?

Mr. Cowan: Weight of logs, lumber, and the method of estimating the weight and scaling the logs.

Examiner Burchmore: I think we will ascertain that from

2538 the forest service, but if he wishes to make a very brief statement he may.

Mr. White: I will make a very brief statement, and it is this, that in Missouri logs running say 15 logs to the thousand will weigh from 7,000 to 10,000 pounds to the thousand. Now I think that is true in the south. It depends on the size of the logs. Logs that will run ten logs to the thousand I judge will weigh from 8500 to 9500, while logs that would run six logs to the thousand feet would only weigh from 7500 to 9000. I should correct my figure. 15 to the thousand run from 9000 to 10,000 pounds. Logs running ten to the thousand will weigh 8500 to 9500 pounds. Logs running six to the thousand will run from 7500 to 9000, and we all know that there are a great many logs that will sink, they are so heavy, that they are heavier than water, and I should judge in some localities five per cent sink as soon as they get into the water.

Examiner Burchmore: The Commission has in connection with

ne of these companies a statement handed to one of our examiners
y an operating official of the actual results of weighing logs, and
that will be looked up and considered in this connection.

539 Mr. Cowan: I want to ask a question or two in regard to this common sales agency. What is the name of the company
at is the common sales agent?

Mr. White: It is the Missouri Lumber & Land Exchange Company.

Mr. Cowan: Is that the same one which sells also for the Long-Bell interests?

Mr. White: No.

Mr. Cowan: There was somebody else here——

Mr. Riddell: That was Mr. Slagle, the owner of one of the Louisiana Companies.

Mr. Cowan: That is the same common sales agent which was spoken of by Mr. Slagle?

Mr. Riddell: Yes.

Mr. Cowan: You sell the lumber at the same price for each one of the mills?

Mr. White. Yes.

Mr. Cowan: And it results——

Mr. White: Well, I should correct that a little. There are some people who prefer Missouri Lumber because of its being lighter and so sometimes we have a sale and get a little better price for

540 the short leaf finish from Missouri than we can from the south.

Mr. Cowan: What I mean, the same quality of lumber is sold at the same price.

Mr. White: Yes, sir.

Mr. Cowan: And the mills sell the lumber at a delivered price to Kansas City, for example?

Mr. White: Yes, sir.

Mr. Cowan: And at Denver?

Mr. White: Yes, sir. Perhaps I should disabuse your mind as to how the price is fixed. A salesman is told that he must sell his lumber at the best he can in the market and we place a limit that we cannot let him go below. He gets as much above that as he can but it is the same to all mills. The order is divided up among the different mills and some days there are better prices than other days.

Mr. Cowan: And it is a delivered price?

Mr. White: It is a delivered price.

Mr. Cowan: And that price is not based upon the mill price at all?

Mr. White: No.

2541 Mr. Cowan: And this company's sales agency has by contract the right to sell the entire output of these mills except their local sales?

Mr. White: They have the right to sell from all of these mills but the mills themselves reserve the right to sell also. But they find it more economical not to put a salesman on the road because we can do it more economically by letting the central office sell the lumber.

Mr. Cowan: And as a matter of fact your sales agency does sell the output, whether the mills are bound to permit you to do it or not, as a business proposition it is better for them.

Mr. White: They sell most of it, but not all of it. Anybody can go to any of our mills and buy a carload of lumber, any dealer can.

Mr. Cowan: That is, any dealer can?

Mr. White: Yes, sir.

Mr. Cowan: But that is not the practice?

Mr. White: No.

Mr. Cowan: In case they do that does your agency get its commission?

Mr. White: We do.

2542 Mr. Andrews: Just for the purpose of clarifying the history you have given involving some little repetition, that I may not misunderstand the point, the lumber business was organized in 1885, I understood you to say?

Mr. White: Do you mean the incorporation of the Missouri Lumber & Mining Company, our lumber business?

Mr. Andrews: Yes.

Mr. White: It was organized in December, 1880.

Mr. Andrews: And the development of that produced all these railroad tracks you have been testifying about?

Mr. White: Yes, sir.

Mr. Andrews: And in 1908 a railroad company was incorporated?

Mr. White: Yes, sir.

Mr. Andrews: At that time your average lumber haul to the mill at its then location on the Frisco tracks, Winona Junction was that point?

Mr. White: No, at Grandin, hauling from the forest in Shannon County to Grandin.

Mr. Andrews: Was what distance?

Mr. White: About 50 miles.

Mr. Andrews: Then I understood you to say since you

2543 moved the mill it is about 12 miles?

Mr. White: Yes.

Mr Andrews: What makes that difference?

Mr. White: Because we built a mill closer to the forests and went into another county and built another mill close to the forests.

Mr. Andrews: And now you haul the finished product how far?

Mr. White: After it is made into lumber 15.7 miles.

Mr. Andrews: Now, as a matter of fact it takes about four carloads of logs to make one carload of finished product, does it not, average?

Mr. White: I expect it does, yes, sir

Mr. Andrews: So that the distance from where the mill is now located to the delivery at the Frisco is one car instead of four transported over your railroad?

Mr. White: Yes.

Mr. Andrews: The lumber company has been operating the rail-

ad company during all of these years as it has grown and devel-
ed substantially like you are operating it now.

Mr. White: We operated another railroad, not this one. This road was never operated years ago. This road has only
544 been built in the last three years.

Mr. Andrews: I do not understand that part. This is cent construction?

Mr. White: This is recent construction. The lumber company ilt the railroad. They built a railroad 50 miles southeast in an-her county, at a place called Grandin 23 years ago, and that rail-ad has been taken up.

Mr. Riddell: Have you a map there of Missouri? I think I can plain it.

Examiner Burchmore: It seems to me this is wholly in the rec-d.

Mr. Andrews: It may be fully in the record to those who under-and the physical situation there, but I have been trying very ard to follow these physical conditions and I do not understand em. I am not desiring any unnecessary repetition, but simply to t the facts so the record will reflect to a stranger what they are.

Mr. White: Perhaps I can state it briefly. We incorporated in ecember, 1880.

Mr. Andrews: The lumber company?

Mr. White: The lumber company, and a year from that
545 time we had a sawmill built and were hauling 10 miles to Mill Springs on the Iron Mountain, that is where we began auling our lumber 10 miles, with mules. Then we had to shut own and then we got this operation into Grandin and——

Mr. Andrews: I understood all that, but I did not understand the hysical conditions.

Mr. Andrews: You have spoken of the development of that coun-y by emigration. Under the census returns, as a matter of fact, 6 counties of Missouri, being the rural counties with few exceptions, ll showed a decrease in population in the last 10 years, did they ot?

Mr. White: I understood they did. I refer to the Globe Democrat f December 6th, in which W. H. Curran, the Commissioner of migration of the State of Missouri, made his report and he shows bout 300 emigrants into Shannon County last year.

Mr. Andrews: I was not questioning the correctness of your tatement, but about the facts as they had existed for the past ten ears. Tha is the result in the past 10 years in Missouri.

Mr. White: I have not examined it carefully, but I understand
in the main that is true. Some counties have lost in popu-
546 lation.

Mr. Andrews: How long has the mail been carried over his line?

Mr. White: I think it has been about a year.

Mr. Andrews: How long have passengers been carried?

Mr. White: Something over a year. I think we made a previous eport to the Commission a year ago.

Examiner Burchmore: Will you furnish a map of this line of the character requested of other lines?

Mr. Riddell: Yes.

Examiner Burchmore: And also a tonnage statement?

Mr. Riddell: We have furnished that.

Mr. Cowan: One question I wish to ask is whether there are any other lumber companies than the ones mentioned for whom your agency sells the output?

Mr. White: We do not sell for any other company.

Examiner Burchmore: Is this tap line a part of any other system of short line railroads?

Mr. White: No, it is not.

Examiner Burchmore: Mr. Riddell just happens to be traffic manager of several railroads?

Mr. White: He is a traffic manager of several roads, three
2547 different roads, yes.

Mr. Garwood: Do you see any logical connection between the decrease in population in Missouri and the increase in tap line mileage?

Mr. White: No.

Mr. Andrews: I asked that question because from the testimony it seems the only way to develop a country is to build a tap line, and I think in Missouri they had not been holding it down as they ought to.

Mr. White: The trouble is there are very few tap lines in this country.

Mr. Coleman: Under the method of selling, as you have explained what would be the comparative net price results at the mills, what you call Louisiana Company mill, as against your Ozark mill, having in mind the rates and the divisions to the tap lines?

Mr. White: It would conflict.

Mr. Coleman: The same kind of lumber shipped at the same time at the same delivered price.

Mr. White: Then they would not get as much if they paid more freight, they would not get as much net for their lumber.

2548 Mr. Coleman: What would be the comparative results. Ozark getting nothing, and the Louisiana Company's mill, or its railroad company, getting a division, what would be the comparative results to the respective common owners of the mills and the railroads?

Mr. White: The result as explained to me by the general manager and one of the largest stockholders of that road that belongs to the lumber company, the Ozark Land & Lumber Company, he said he considered he was doing just as well as he would to incorporate his road and abide by the requirements and the expense and liability that he would by incorporating, and therefore he would not incorporate and——

Mr. Coleman: It is your opinion then that the Louisiana Mill would suffer no particular hardship if the divisions were done away with entirely?

Mr. White: I spoke of their rights as railroads. The railroads would suffer if their divisions were taken away.

Mr. Coleman: I would like to put it in another way. Take the same kind of lumber, what is your average weight on lumber, take the mill out from one of these mills.

Mr. White: Say 2600 dry and green maybe it will average
2549 2600.

Mr. Coleman: The railroad serving the Ozark mill gets nothing?

Mr. White: They get nothing because that railroad is owned by the mill.

Mr. Coleman: What do I understand to be the allowance to the railroad serving the Louisiana Company's mill?

Mr. White: Four cents at Salem, and say to a common point north of the Ohio and east of the Mississippi four cents.

Mr. Coleman: Then on that business going to those particular markets four cents for 2600 pounds, that would be $1.04 better mill price that the Louisiana Company would get than the Ozark Company would get.

Mr. White: It would be $1.04 that the railroad company would get.

Mr. Coleman: I am assuming it is common ownership, that the holders and owners of the railroad and the lumber companies, that the Louisiana Company would get $1.04 more out of the net results of the railroad and the lumber company——

Mr. White: Yet you say that if the Louisiana Lumber Company had a railroad that was getting a division of four cents, and a
2550 man in Missouri or anywhere else had a railroad to the same market that did not get any division, that all conditions being equal that he would be the loser. But if the Louisiana Railroad is a railroad and is entitled to divisions and is going to remain as a railroad, that is a different proposition. It is not the number company.

Mr. Coleman: Well, I take t that there was a common ownership respectively in the two different concerns, that is taking the Louisiana Railway and the mill it serves as one, and the Ozark Company the other, and the question of the difference in mill price is what I was trying to get at.

Mr. White: Well, my stockholders hold stock in a great many different railroads, trunk lines, some of them.

(Witness excused.)

J. B. RIDDELL was called as a witness, and having been previously sworn, testified as follows:

Examiner Burchmore: Are these rates on a milling in transit basis?

Mr. Riddell: No, not at all. They do not handle the logs.

Examiner Burchmore: Do you have any contracts with other lines of railroads as to divisions?

2551 Mr. Riddell: No, only verbal agreements, no contracts—some are written.

Examiner Burchmore: What is the nature of those written agreements?

Mr. Riddell: They would be division sheets.

Examiner Burchmore: They amount to a division sheet?

Mr. Riddell: That is all.

Examiner Burchmore: What is the range of your divisions?

Mr. Riddell: From one to four cents per 100 pounds.

Examiner Burchmore: Is there any traffic on which you do not get a division?

Mr. Riddell: Yes.

Examiner Burchmore: What?

Mr. Riddell: The traffic handled on the combination of locals.

Examiner Burchmore: There are no joint rates out of which you receive nothnig?

Mr. Riddell: No, we would not be a party to a rate which we did not receive divisions on.

Examiner Burchmore: What is your local rate?

Mr. Riddell: I think four cents.

2552 Examiner Burchmore: Is there any traffic on which you receive more than four cents as a division, have you ever received more than four cents?

Mr. Riddell: This company never has.

Examiner Burchmore: Its predecessor?

Mr. Riddell: I believe perhaps 12 years ago there was a time when to a limited territory they got five cents. That division would average perhaps two and a half to two and three quarter cents.

Examiner Burchmore: Were the Grandin Mill's rates on a milling in transit basis?

Mr. Riddell: Yes.

Examiner Burchmore: Then the divisions formerly received also covered the logs into the mill?

Mr. Riddell: Well, the allowance was based on the handling of the logs in and switching of the manufactured traffic over, as has been explained.

(Witness excused.)

2553 *Shreveport, Houston & Gulf.*

L. D. GARRISON, was called as a witness and having been duly sworn, testified as follows:

Examiner Burchmore: You are auditor and traffic manager of the Shreveport, Houston & Gulf?

Mr. Garrison: I am.

Examiner Burchmore: Are you an officer employed for any lumber company?

Mr. Garrison: I am an employé of a lumber company, the Carter-Kelly Lumber Company.

Examiner Burchmore: In what capacity do you serve that lumber company?

Mr. Garrison: Bookkeeper.

Examiner Burchmore: The Shreveport, Houston & Gulf connects with the Texas & New Orleans and the St. Louis, Southern Railway at or near Prestridge, Texas?

Mr. Garrison: It does.

Examiner Burchmore: Does it connect with the line of any other common carrier railroad?

Mr. Garrison: No.

Examiner Burchmore: Has it any private tram road connection?

2554 Mr. Garrison: We have a physical connection with the Carter-Kelly Lumber Company at Manning.

Examiner Burchmore: I understand that the stockholders of the Carter-Kelly Lumber Company and this railroad company are identical.

Mr. Garrison: They are.

Examiner Burchmore: They hold their shares in the two companies in proportion?

Mr. Garrison: Yes, sir.

Examiner Burchmore: I also understand that the officers of the two companies are substantially the same?

Mr. Garrison: There is one difference, in the vice-presidents.

Examiner Burchmore: The mill of the Carter-Kelly Lumber Company is located at Manning?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Is that one of the terminii of the line?

Mr. Garrison: Yes, sir.

Examiner Burchmore: That is approximately nine miles from the junction with these other roads?

Mr. Garrison: Yes, sir.

2555 Examiner Burchmore: And that junction point is the other end of the line?

Mr. Garrison: Yes, sir.

Examiner Burchmore: In other words this road runs from the junction to the mill?

Mr. Garrison: Yes.

Examiner Burchmore: When was this mill put into operation?

Mr. Garrison: The first shipments were made in February, 1907.

Examiner Burchmore: The first shipments were made at that time?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Was that the first cutting that had been done in the mill?

Mr. Garrison: Yes, sir, that was after the completion of the mill at Manning.

Examiner Burchmore: Then the railroad and mill were constructed at about the same time?

Mr. Garrison: Well, the railroad built its track into Manning before the saw mill was completed.

Examiner Burchmore: The saw mill outfit moved over the

2556 railroad to get to the mill?

Mr. Garrison: The machinery did and supplies and material.

Examiner Burchmore: When was the railroad incorporated?

Mr. Garrison: June 20, 1906.

Examiner Burchmore: Before its construction?

Mr. Garrison: Yes, sir.

Examiner Burchmore: What was the capital stock of the railroa corporation?

Mr. Garrison: $100,000.

Examiner Burchmore: What is the capital stock of the lumb company?

Mr. Garrison: $200,000.

Examiner Burchmore: How was the railroad company financed

Mr. Garrison: The capital stock authorized was $100,000, $50,0 of which was paid in in actual cash.

Examiner Burchmore: By the present stockholders, substa tially?

Mr. Garrison: Substantially, yes, sir.

Examiner Burchmore: Did that cash that was paid in for railroa stock pass through the treasury or the cashier or treasurer of th lumber company?

2557 Mr. Garrison: It did not.

Examiner Burchmore: Are there any bonds outstanding

Mr. Garrison: There are none.

Examiner Burchmore: Is there any other indebtedness?

Mr. Garrison: We have a bills payable account of $30,000 rig now.

Examiner Burchmore: What does that represent?

Mr. Garrison: That represents an amount borrowed in part t construct the road.

Examiner Burchmore: Then the road cost to construct abou $80,000.

Mr. Garrison: No.

Examiner Burchmore: Or more than that?

Mr. Garrison: The equipment and construction $106,000.

Examiner Burchmore: And of that $50,000 was raised from th sale of capital stock?

Mr. Garrison: Yes, sir.

Examiner Burchmore: And $30,000 is your present indebtedne to the lumber company——

Mr. Garrison: We do not own the lumber company.

Examiner Burchmore: From whom did you borrow it?

Mr. Garrison: We borrowed $30,000 from W. T. Carte

2558 & Brother?

Examiner Burchmore: Well, W. T. Carter & Brother ar the principal owners of this lumber company?

Mr. Garrison: They own stock, yes, sir; but we borrowed th money from W. T. Carter & Brother and not from the lumbe company.

Examiner Burchmore: They are substantially identical with th Carter-Kelly Lumber Company?

Mr. Garrison: They are interested.

Examiner Bruchmore: Do they not own the majority of th stock?

Mr. Garrison: No, I do not think they *are*.

Examiner Burchmore: You are not sure. They are not the ma jority stockholders?

Mr. Garrison: I do not think they are.

Examiner Burchmore: In addition to this $50,000 and this $30,000 you have previously owned some further sum that was put in for construction?

Mr. Garrison: Well, we have paid back quite a little amount on account.

Examiner Burchmore: What was the total indebtedness?

2559 Mr. Garrison: At one time I think we owed about forty or forty-five thousand dollars.

Examiner Burchmore: And you have paid back fifteen thousand dollars out of your net revenue?

Mr. Garrison: Substantially that amount.

Examiner Burchmore: Then the operations of the road have been conducted at a profit?

Mr. Garrison: Yes.

Examiner Burchmore: Is that a substantial profit?

Mr. Garrison: It is.

Examiner Burchmore: Has the road paid any dividends?

Mr. Garrison: No.

Examiner Burchmore: It is deferring the payment of any dividends until it has paid its debts?

Mr. Garrison: It did.

Examiner Burchmore: What is the mileage of this line, and is it standard or narrow gauge?

Mr. Garrison: Standard, nine miles.

Examiner Burchmore: And what weight of steel?

Mr. Garrison: 40 Pound steel except one mile which is 56.

Examiner Burchmore: Is that nine miles all owned?

Mr. Garrison: Yes.

2560 Examiner Burchmore: In addition to that nine miles you have some trackage rights?

Mr. Garrison: We have trackage rights over the Cotton Belt, from our junction at Prestridge to Huntington, a distance of about one and three-quarter miles.

Examiner Burchmore: Your contract covering those trackage rights also provides for the joint use of station facilities?

Mr. Garrison: Yes, sir.

Examiner Burchmore: That is on file with the Commission?

Mr. Garrison: It is on file with the Texas Commission. I do not know whether the Cotton Belt has filed it with the Interstate Commerce Commission or not?

Examiner Burchmore: I understand it is on file. Does it cross any streams?

Mr. Garrison: Nothing except——

Examiner Burchmore: You have not any large bridges?

Mr. Garrison: We have one about 1000 feet long, a trestle, wooden bridge.

Examiner Burchmore: Is the road well built or of light non-substantial construction?

Mr. Garrison: Well built, solid roadbed.

2561 Examiner Burchmore: Any station buildings of your own?

Mr. Garrison: We have.

Examiner Burchmore: Mention them.

Mr. Garrison: At our junction with the Cotton Belt and the T
N. O. at Prestridge we have a joint pagoda with the Cotton B
and we have another pagoda of our own at a station called Ke
which is six miles from Prestridge. At Manning we have a stand
depot building in every respects.

Examiner Burchmore: Have you any warehouses or platfo
aside from these structures you have just mentioned?

Mr. Garrison: We have our joint facilities you understand
Huntington in connection with the Cotton Belt.

Examiner Burchmore: But nothing else?

Mr. Garrison: No.

Examiner Burchmore: Have you any track scales for weigh
car load shipments?

Mr. Garrison: We have not at present but they are contempla
right now and I believe will be put in.

Examiner Burchmore: How many locomotives does the road ow

Mr. Garrison: Four.

2562 Examiner Burchmore: Passenger cars?

Mr. Garrison: We own one passenger coach and one co
bination mail baggage and express car.

Examiner Burchmore: How many freight cars?

Mr. Garrison: We own thirty-two.

Examiner Burchmore: How many of those are logging cars?

Mr. Garrison: None.

Examiner Burchmore: All freight cars?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Do you lease any equipment?

Mr. Garrison: You mean for our own use?

Examiner Burchmore: Either as lessor or lessee?

Mr. Garrison: We lease some of that equipment to the Cart
Kelly Lumber Company.

Examiner Burchmore: To them?

Mr. Garrison: Yes, sir.

Examiner Burchmore: What does the lumber company le
from this road?

Mr. Garrison: Three locomotives and thirty-one flat cars.

Examiner Burchmore: What do they pay for the locomotives?

Mr. Garrison: They pay a monthly rental of $5,292.53.

Examiner Burchmore: What is the basis—per locomotiv

2563 Mr. Garrison: No, that is for all the equipment, th
locomotives and thirty-one flat cars.

Examiner Burchmore: Is not that rather a modest charge?

Mr. Garrison: We do not think so.

Examiner Burchmore: You heard the other day perhaps the tes
mony to the effect that the Rock Island or the Iron Mountain,
have forgotten which, charged a certain tap line ten dollars a d
for the use of a locomotive without fuel or crew.

Mr. Garrison: We understand that $8 is a legitimate charge b
we figured, when we leased this equipment to Carter-Kelly Co
pany a depreciation charge of six per cent and on top of that a s

per cent interest charge which would practically amount to about twelve per cent on the investment.

Examiner Burchmore: And I suppose these were second hand locomotives.

Mr. Garrison: No, sir; one of them was. There were two new locomotives and one second hand.

Examiner Burchmore: Then you think that that is a fair and reasonable rental for that equipment?

Mr. Garrison: We felt that it was.

2564 Examiner Burchmore: Do you charge the same interest and take account of the same depreciation on the logging cars?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Who keeps these cars and equipment in repair?

Mr. Garrison: The lumber company.

Examiner Burchmore: There is a provision that they will take care of depreciation?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Is that inside or outside of the $200?

Mr. Garrison: I say they take care of depreciation. There is a fixed rental of this amount, but it does not say anything about depreciation. We took care of that, we used that basis when we fixed the rental charge against the lumber company.

Examiner Burchmore: If you were renting similar equipment from the Cotton Belt system would you consider you were getting it very cheap if you got it for the same sum?

Mr. Garrison: I should think so.

Examiner Burchmore: You would not think you were paying a very high rental?

2565 Mr. Garrison: No.

Examiner Burchmore: On the other hand would you think you were paying a rather low rental?

Mr. Garrison: I think it is entirely reasonable.

Examiner Burchmore: From both points of view?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Does the lumber company own any equipment of its own?

Mr. Garrison: No rolling stock.

Examiner Burchmore: What is the aggregate length of the private lines of this lumber company?

Mr. Garrison: I believe the Carter-Kelly line is about 7 miles long now.

Examiner Burchmore: That is moved from time to time?

Mr. Garrison: Well, that will be the main line; they have just finished constructing the main line and they will build trams out to it from time to time.

Examiner Burchmore: They have not been operating this very long?

Mr. Garrison: This is a new line. They were operating in another direction.

Examiner Burchmore: It has been changed recently?
2566 Mr. Garrison: In the last year.
Examiner Burchmore: How many track crews are employed on these rails?
Mr. Garrison: One.
Examiner Burchmore: Do they assist in maintaining and changing the tracks of the private logging road?
Mr. Garrison: No.
Examiner Burchmore: Do you have any men do that?
Mr. Garrison: No.
Examiner Burchmore: The lumber company attends to the maintenance of its own tracks?
Mr. Garrison: They do.
Examiner Burchmore: How many train crews has the railroad company?
Mr. Garrison: One.
Examiner Burchmore: And they operate the single locomotive that is retained in your service?
Mr. Garrison: Yes, sir.
Examiner Burchmore: The lumber company has three crews?
Mr. Garrison: It all depends on their logging operations; some times they do and some times they do not.
2567 Examiner Burchmore: How many employees are there engaged in general office work or supervising the work of this railroad?
Mr. Garrison: Two.
Examiner Burchmore: Do those men work for the lumber company also?
Mr. Garrison: Yes, sir.
Examiner Burchmore: How are they paid?
Mr. Garrison: They are paid a salary by the railroad company and also by the lumber company.
Examiner Burchmore: Now, does the railroad company actually hand those men any money?
Mr. Garrison: We voucher them direct.
Examiner Burchmore: The voucher goes through the lumber company?
Mr. Garrison: No.
Examiner Burchmore: Does the railroad company pay the lumber company any sum whatsoever on account of the services rendered by the lumber company's employees?
Mr. Garrison: Not unless it is in the case of an emergency. For instance, if we had a muck on the line and it is necessary to
2568 get other section men on some occasions you understand we would expect to voucher the lumber company for it and would do it.
Examiner Burchmore: Who are those two men who work for both companies?
Mr. Garrison: The president and general manager and myself.
Examiner Burchmore: That is three.
Mr. Garrison: Well the president and general manager is the same.

Examiner Burchmore: Then there are no clerks employed by both companies?

Mr. Garrison: No.

Examiner Burchmore: Are you paid by the lumber company and the railroad company both?

Mr. Garrison: Yes, sir.

Examiner Burchmore: What proportion of your salary is paid by the railroad company?

Mr. Garrison: You mean what proportion is paid by the lumber company?

Examiner Burchmore: Well, what proportion is paid by the railroad company?

Mr. Garrison: About two-fifths.

2569 Examiner Burchmore: Do you divide your time rather evenly between the two companies?

Mr. Garrison: I think so. Well——

Examiner Burchmore: What about the president, what is his salary from the railroad company?

Mr. Garrison: His is a monthly salary.

Examiner Burchmore: What is the amount of the president's salary from the railroad?

Mr. Garrison: $50 a month.

Examiner Burchmore: He also receives compensation from the lumber company?

Mr. Garrison: He does.

Examiner Burchmore: Does he render any real services for that $50?

Mr. Garrison: He does.

Examiner Burchmore: You run passenger trains?

Mr. Garrison: We run mixed trains.

Examiner Burchmore: How many mixed trains?

Mr. Garrison: We run double daily service, that is two trains each way.

Examiner Burchmore: Two trains each way?

Mr. Garrison: Yes, sir.

2570 Examiner Burchmore: On a regular time schedule?

Mr. Garrison: Yes, sir. I should qualify that, except Sunday.

Examiner Burchmore: No trains on Sunday?

Mr. Garrison: No.

Examiner Burchmore: You carry the mails on these trains?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Carry passengers for hire?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Do those passengers ever have tickets?

Mr. Garrison: Yes.

Examiner Burchmore: Some on tickets and some pay train fare?

Mr. Garrison: Yes.

Examiner Burchmore: How many freight trains do you run in addition to these two mixed trains?

Mr. Garrison: We do not run any.

Examiner Burchmore: Do you have any special logging trains?

Mr. Garrison: No.

Examiner Burchmore: How many cars are there in those
2571 trains on the average?

Mr. Garrison: I should think they would average up to five or perhaps six cars.

Examiner Burchmore: Of logs and everything?

Mr. Garrison: No logs, at all. Lumber and the passenger coach.

Examiner Burchmore: You do not handle any logs to the mill?

Mr. Garrison: No, we do not.

Examiner Burchmore: The private tram lines are all behind the mill?

Mr. Garrison: Yes.

Examiner Burchmore: Do you endeavor to comply with all the state and Federal laws?

Mr. Garrison: We do.

Examiner Burchmore: Are the cars and locomotives equipped with safety appliances?

Mr. Garrison: They are.

Examiner Burchmore: How about the cars and locomotives operated by the lumber company?

Mr. Garrison: They are never on our track but they are equipped with air appliances and one of your Examiners was down
2572 to the place not long ago and he recommended that we make some improvements on them, that is from a general point of view, but he said it would not be necessary so far as the operation was concerned by the railroad company.

Examiner Burchmore: What is the valuation of this road, what is it worth?

Mr. Garrison: The whole road, equipment and everything?

Examiner Burchmore: Yes.

Mr. Garrison: Well, it actually cost us over $106,000.

Examiner Burchmore: Has the road ever paid a dividend?

Mr. Garrison: No.

Examiner Burchmore: You have supplies of tickets and bills of lading and letterheads and so forth?

Mr. Garrison: Yes, sir.

Examiner Burchmore: Is there any further examination counsel wishes to make of this phase of the company's operation? We will reserve until after recess the question of rates and divisions and the manner of handling tonnage, and traffic.

Mr. Walter: How wide is the right of way?

2573 Mr. Garrison: 100 feet.

Mr. Walter: How are the trains operated?

Mr. Garrison: You mean so far as the schedule is concerned?

Mr. Walter: Yes.

Mr. Garrison: They are on a published schedule each way, both trains.

Mr. Walter: Regularly published schedule?

Mr. Garrison: Yes, sir.

Mr. Walter: How much did that station at Manning cost you?

Mr. Garrison: $1,237.22.

Mr. Walter: That was built as the result of an order by the Texas State Commission?

Mr. Garrison: It was.

Mr. Walter: Are you recognized by the Texas State Commission as a common carrier?

Mr. Garrison: We are.

Mr. Walter: Do you observe the hours of service law, both state and national?

Mr. Garrison: We do.

2574 Mr. Walter: As a matter of fact the majority of the capital stock of the railroad is not owned by Carter & Brother, is not that true, as a company?

Mr. Garrison: How is that, now?

Mr. Walter: The majority of the capital stock of the railroad is not owned by W. T. Carter & Brother?

Mr. Garrison: It is not.

Mr. Walter: Is that railroad permanent in every sense of the word, roadbed and rails and ties?

Mr. Garrison: It is.

Mr. Walter: What character of ties do you have?

Mr. Garrison: Standard solid oak ties, white oak I think it is, post oak.

Mr. Walter: Was this railroad constructed under the supervision and survey of an engineer?

Mr. Garrison: It was.

Mr. Walter: This road was constructed prior to the time the machinery and mill went in?

Mr. Garrison: Yes, sir.

Mr. Walter: In pursuance of a charter regularly secured from the state authorities?

Mr. Garrison: Yes.

2575 Examiner Burchmore: It has held itself out to the public that you could serve as a common carrier?

Mr. Garrison: It has in every respect.

Mr. Walter: Can you state whether or not the Texas State Commission made a physical inspection before formally recognizing it?

Mr. Garrison: They did. Judge Storey, at that time chairman of the State Commission, made a personal inspection.

Examiner Burchmore: When was this inspection and the road recognized?

Mr. Garrison: He inspected it in the last part of February, 1908.

Mr. Walter: You have a copy of that formal order?

Mr. Garrison: Yes, sir.

Mr. Walter: We will ask to have it made part of the record, unless you think it is not material.

Examiner Burchmore: What light will it throw on the question?

Mr. Walter: It shows recognition by the Commission.

Mr. Garwood: It is a declaration by that body that it is physically fit to act as a common carrier.

Examiner Burchmore: Does that go into the details of the character of the road?

2576 Mr. Garwood: No, it makes no finding as to that, but it makes it for that purpose.

Examiner Burchmore: Then you state that such a document was entered?

Mr. Walter: It was.

Examiner Burchmore: That is sufficient.

Mr. Walter: You carry mail?

Mr. Garrison: We do.

Mr. Walter: Express?

Mr. Garrison: We do.

Mr. Walter: Passengers?

Mr. Garrison: Yes, sir.

Mr. Walter: And freight for anybody and everybody that they offer it to?

Mr. Garrison: Yes, sir.

Mr. Walter: Do you not have loading points along this line?

Mr. Garrison: We do.

Mr. Walter: At what places?

Mr. Garrison: McConnico and Kelly, two intermediate stations.

Mr. Walter: Speaking generally what class of freight do
2577 you handle aside from forest products?

Mr. Garrison: Merchandise and grain products.

Examiner Burchmore: We will go into the question of the character of traffic after recess.

Mr. Walter: You operate a passenger train into Huntington?

Mr. Garrison: We do.

Mr. Walter: What size town is Huntington?

Mr. Garrison: I should judge seven or eight hundred.

Mr. Walter: About how many people live along the line of the Shreveport, Houston & Gulf?

Mr. Garrison: I should judge about 500.

Mr. Walter: This is entirely a farming country?

Mr. Garrison: No, not entirely.

Mr. Mantooth: He means from Manning to Huntington.

Mr. Garrison: That is principally farm land, that is cut over.

Mr. Walter: None of the right of way from Prest Ridge to Manning is owned by the lumber company?

Mr. Garrison: No.

(Whereupon at 1 P. M. recess was taken until 2 P. M.)

2578 After Recess.

Mr. Ziebold: I desire to present this request for the purpose of the record as follows:

On behalf of the lines represented by myself I wish to ask that the Commission require the various trunk lines interested to file with the Commission as soon as possible a narrative statement of their respective origins, original length, amount of rolling stock and equipment and other details which will show in a practical way how considerable they were in the beginning and their gradual growth and increase from that time up to the present time. It being our con-

tention that the trunk lines of today were possibly in no better situation in their early days than the short lines of today are now.

Secondly, that the Santa Fe and the intervenors here be requested to file a detailed statement with the Commission as soon as possible showing the number and location of so-called tap lines purchased by the Santa Fe from the various intervenors or any of their community or associated interests and the purchase price, and all contracts and other conditions as to right of trackage and otherwise connected therewith, as forming a part of the transaction of pur-
2579 chase and sale.

Third, that the intervenors be requested to file as soon as practicable with the Commission copies of their f. o. b. mill and delivered price lists and their various concession sheets, such as they have had during the last four or five years and have at the present time. The object of this request being that inasmuch as the present hearing has given the trunk lines and the intervenors abundant information as to the origin, conditions, contractual and other relations of the short lines which they can procure by securing copies of the record and prepare themselves for any further hearings or proceedings, that this detailed information will enable the representatives of the short lines to acquire some advance information and be better prepared to conduct examination and elicit information on those subjects at any further hearings or proceedings to be held hereafter.

Examiner Burchmore: Do you feel that you need all that information, Mr. *D*iebold?

Mr. *D*iebold: I may not need it, but others may. I feel that it is necessary and just for the purposes of a complete record and the full enlightenment of the Commission.

2580 Examiner Burchmore: How do you apply that request, for example, to a specific case? Take the Rock Island, you say, what was the Rock Island in the beginning. Do you want them to analyze each mile of their track? You know it is made up of a number of small lines.

Mr. Ziebold: That is the very proposition I want to elicit, how they were made up and at what different times and through the connection of what tap lines.

Mr. Jeffery: We have a hundred and twenty or more difficult companies, and it would be a big undertaking.

Examiner Burchmore: Yes, it seems to me that is a large request It is a request that will be noted on the record. I cannot indicate whether the Commission will make that request of the carriers or not. I suggest, however, that you renew your request for such detailed information in a formal communication addressed to the Commission, in other words, this record may not be written out and reach the Commission for a fortnight and if you will address a separate letter as to each request, that is, to say, one request as to trunk lines, and another request covering the desired information from the intervenors, those letters will receive the particular attention of the Commission.

2581 Mr. *D*iebold: I will do that in addition to the request that has gone into the record.

Mr. Garwood: Before Mr. Ziebold goes, I wish to make just this suggestion. Now a request for specific information as to any specific matter at any specific date, of course is entirely reasonable, and we would be glad to comply with it. I perhaps will prefer some request of that sort later on in this hearing; but it would be extremely burdensome, especially so with our line, some of which started back as far as 1854; and if we had to comply with his request we would have to dig up ancient history that would cover a large volume and a great deal of effort. And while of course I want to comply with the reasonable request, still that would entail an immense amount of historic delving that personally I have not got time to go into, and I doubt if the shifting officers know this ancient history. We have changed ownership and even organization two or three times within this half century or more.

Examiner Burchmore: I understand you regard that request as a little broad.

Mr. Garwood: That was the point I was suggesting. It covers not only too much territory but too much time.

2582 Examiner Burchmore: I think it must be apparent to any one that if the Commission feels that this request is entirely too broad it will have to do either of two things, deny the whole request or have to demand that in part. I suggest you make your request just as narrow as you can in consideration of the rights of your client.

Mr. Ziebold: I will state as far as I am concerned and the interests I represent if there is a practical, substantial compliance with the request, such as the Commission in its judgment thinks adequate and sufficient, that will be sufficient for us. We do not mean to require any detailed information as to any specific point, but such a compliance as would give in substance the information covering the subject as in the judgment of the Commission we may properly expect.

Examiner Burchmore: Would it suffice for your purposes if the Iron Mountain, through Mr. Jeffery, should state that there are now embodied in its line of railway some thirty or forty small lengths of tracks, which while originally separately organized *and* separately operated tap lines?

Mr. Ziebold: Yes, if he will state their original termini and from whom they were acquired and what was the considera-

2583 tion and whether it was a cash transaction or whether there were any contractual relations which existed thereafter or even now may still be in existence. There has been a careful inquiry into the contractual relations of the tap lines and lumber mills and I think that it is only just that the present trunk lines show their hands also.

Mr. Jeffery: I think all that information has been asked for by the Commission; it is in that series of questions they sent out in the trunk lines rate advance case. I know all that as to whom we brought property from and acquired our subsidiary lines from, the Commission's questions were very complete and comprehensive and they are being prepared now by the various lines. I think all this

will be filed by the Commission and I think you will get a very complete report there of all those matters.

Mr. Andrews: So far as the requests made of the intervenors are concerned, it seems to me that it is utterly irrelevant to the course of inquiry that has been conducted here. In the early stages of the proceeding the Commissioner declined to permit any inquiry into any sort of lumber company operations except as they related absolutely to the tap lines operated in connection with the lumber
2584 companies, and certainly schedules of prices and price lists and concessions off and things of that kind have never been in the case, and I cannot see how they can have any place in the case. I do not know why the position in a lawsuit entitles another party to that suit to information that is not involved in the lawsuit.

Examiner Burchmore: I feel sure that the Commission will not grant any request for information to be furnished by the intervenors before ascertaining from the intervenors whether they have any objection to furnishing such information and giving you an opportunity to object to the specific inquiry.

Mr. Andrews: I did not think myself that the Commission would enter an order of that character in view of this investigation, but I wanted to note an objection of record, as the request had been made of record.

Examiner Burchmore: That is perfectly proper.

Mr. Garwood: As to that branch of the inquiry where the gist of the controversy is that the intervenors are being discriminated against unjustly and unduly, it occurs to me that the request of counsel is eminently just and proper, and I think that is of the very essential gist and soul of the complaint lodged by the inter-
2585 venors in this case, and that is information which would be peculiarly within their knowledge and which I assume they should have no objection to furnishing.

Examiner Burchmore: I did not grasp the precise nature of the information which Mr. *Diebold* wished the intervenors to furnish, but it is understood that he will renew his request in writing addressed to the Commission at Washington and the Commission will take such action as it deems proper. The objection of the various parties to furnishing this information will be noted in the record and I think there is nothing further to be said at this time.

Mr. Ziebold: Except when we do that we will do it in addition to this request and not in substitution of this request.

Examiner Burchmore: I want to call the names of all the cases which have not been disposed of or heretofore called for hearing, with the object of ascertaining whether the parties are ready at this time to proceed with the hearing. I therefore request that counsel or representatives of these lines will indicate as the names are called first, whether they would prefer that the hearing with respect
2586 to their particular lines should be deferred until a date hereafter to be fixed, or whether they would prefer to have the hearing go on with respect to their company at this time, tomorrow, or Monday, or just what their position is with respect to an immediate hearing or a postponement.

Is the De Queen & Eastern Railroad present?

Mr. Kirkpatrick: Yes; we have been here ever since the day before the Commission began work and have been ready all the time, and yet unless we could be heard today or certainly tomorrow it would suit us better if we could be heard at St. Louis or Kansas City or some place nearer home. We are willing to suit our convenience to the convenience of the Commission but do not believe if there is any possibility that we could be heard in St. Louis or Kansas City that we would care to take our chances to wait over until next week here for a hearing.

Examiner Burchmore: The Galveston, Beaumont & Northeastern?

Mr. Walter: We are ready to be heard on Saturday, but I will say as to this line, as in regard to almost all I represent that we are ready to go on until the hearings conclude but are perfectly
2587 willing to conform to the convenience of the Examiner or the Commission, having in mind of course that if there is a postponement of the hearing that the existing status may be maintained and the suspension may be held in effect until there can be a determination of the question.

Examiner Burchmore: In general then, the clients you represent will be perfectly agreeable to having their cases tried in turn as late as Monday or Tuesday?

Mr. Walter: Some of them would prefer to be heard today or tomorrow, but others of them the first part of next week. As to the individual lines I would want to make a special answer as to those.

Examiner Burchmore: The Gulf & Sabine River Railroad.

Mr. Sugar: I represent that road and Mr. Walden, the witness, is not in the room. I would prefer to see him before definitely answering.

Mr. Garwood: Is that the Gulf & Sabine River?

Mr. Sugar: I made a mistake. The Sabine & Northern is what I represent.

Mr. Garwood: I am authorized to state that the Gulf & Sabine River, having waited some time, would prefer to let the matter
2588 go over until the next hearing rather than wait over until Monday.

Examiner Burchmore: But you will be ready tomorrow?

Mr. Garwood: I hardly think so, your Honor.

Examiner Burchmore: The Loring & Western Railway?

(No response.)

Examiner Burchmore: The Louisiana & Eastern Railway?

(No response.)

Examiner Burchmore: The Louisiana Central Railroad?

Mr. Church: We would prefer a postponement until some other time at St. Louis.

Examiner Burchmore: The Mansfield Railway & Transportation Company.

Mr. Walter: We are ready today, if we can get a hearing to-

day. If not, the matter can go over under the conditions I have referred to.

Examiner Burchmore: You would not want that heard Monday?

Mr. Walter: I think not. We would rather have it go over than to do that.

Examiner Burchmore: The Missouri & Louisiana Railroad?

Mr. Sargent: Rather than wait until Monday we would prefer to go over until some future time, but I am ready this after-
2589 noon or tonight, and if it can be reached tomorrow we would rather stay until tomorrow night and get through with it.

Examiner Burchmore: The Sabine & Eastern Railway.

Mr. Kirkpatrick: I suggested we were willing to submit that on the Examiner's report if satisfactory to the Commission.

Examiner Burchmore: I do not know what you mean by satisfactory to the Commission.

Mr. Kirkpatrick: Well, unless the Commission on its own behalf desires further testimony or desires to make an additional examination, we have not any witnesses here today and it would have to be at a later date.

Examiner Burchmore: Do I understand you do not care to put in any testimony in support of your contention that you are a common carrier and entitled to participate in divisions?

Mr. Kirkpatrick: I think the examination the Commission has already made and the reports show the physical condition of the road. It is an independent corporation and regularly incorporated under the laws of Louisiana.

Examiner Burchmore: If you are not prepared for hearing
2590 and do not desire to put in any testimony it may be that the Commission will regard the case as abandoned.

Mr. Kirkpatrick: I would not care to have that done, but as I say we have not our evidence here today. We had it some days ago, but we were unable to get the witnesses today or possibly tomorrow.

Examiner Burchmore: Will you be ready tomorrow?

Mr. Kirkpatrick: I do not think we could get them here.

Examiner Burchmore: Would you be ready Monday?

Mr. Kirkpatrick: I would prefer not to try to be here Monday, but if our other case should go to a subsequent date we could be ready then.

Examiner Burchmore: What is your other case?

Mr. Kirkpatrick: The De Queen & Eastern.

Examiner Burchmore: That is going to be called today.

Mr. Kirkpatrick: Very well.

Examiner Burchmore: The Sabine & Northern Railroad.

Mr. Sugar: That is the one I referred to just now. We are ready now, but as to what would be our pleasure if it could not be reached today or tomorrow, I am not able to say.

2591 Examiner Burchmore: The Blythesville, Burdette & Mississippi River Railway. Is that company not represented?

Mr. Coleman: I understand that counsel from St. Louis representing that road, but they are not in the room.

Examiner Burchmore: The Wilson Northern Railroad.

Mr. Coleman: The Wilson Northern is ready but I cannot get them here today. We will have to go over.

Examiner Burchmore: You will be ready Monday?

Mr. Coleman: No, we could not possibly.

Examiner Burchmore: Would you be ready tomorrow?

Mr. Coleman: Yes, but my purpose is unless it can be tried today to let it go over.

Examiner Burchmore: The Manila & Southwestern.

Mr. Gautney: I want to suggest this. It is very essential that we get that, in order to know something of the conditions of affairs. If there is to be any continuance of the hearing I would like to inquire at this time as to when that order which restored the lumber rates becomes ineffective. Do I understand it is January 1st?

Examiner Burchmore: January 5th, if there is no extension.

Mr. Gautney: In this line which I represent there is a
2592 great deal of business we handle other than lumber. At present our lumber rate is restored, but our great difficulty is handling other commodities and for that reason we would like to be heard at this time if possible.

Examiner Burchmore: Do you desire a hearing at this time?

Mr. Gautney: Yes.

Examiner Burchmore: Will you wait until you get it?

Mr. Gautney: I do not know whether I can or not. I have about reached my limit. Now, if there is any possibility of its being heard I would like it to be heard.

Examiner Burchmore: Or tomorrow?

Mr. Gautney: That would be all right?

Examiner Burchmore: How about Monday?

Mr. Gautney: I cannot be here Monday. If the next hearing is to be in St. Louis of course we could go there much easier than to come here.

Examiner Burchmore: The Beaumont & Saratoga Transportation *Transportation* Company.

(No response.)

Examiner Burchmore: The Peach River & Gulf Railway.

Mr. Walter: Saturday or Monday or a continuance.

2593 Examiner Burchmore: The Riverside & Gulf Railway.

Mr. Walter: The same order.

Examiner Burchmore: The Beaumont & Great Northern?

(No response.)

Examiner Burchmore: The Livingston & Southeastern.

(No response.)

Examiner Burchmore: The Moscow, Camden & San Augustine.

Mr. Mantooth: We are ready today and will be tomorrow or Monday or Tuesday, whenever you reach us.

Examiner Burchmore: The Timpson & Henderson, formerly the Timpson & Northwestern.

(No response.)

The Caro Northern Railway.

Mr. Saner: I have been in attendance and very much desire a hearing this week if possible. If it is not possible we will continue until Monday.

Examiner Burchmore: The Trinity Valley & Northern.

Mr. Baldrach: We are ready to go on.

Examiner Burchmore: The Nacogdoches & Southeastern.

Mr. Walter: We are ready in that or to go over for a future hearing. We would like to have it disposed of. There are three held by joint interests, the Nacogdoches & Southeastern, the Mans-
2594 field Railway & Transportation Company, and the Louisiana & Pine Bluff, and we would like to have them heard at the same time if they can be.

Examiner Burchmore: The Mangham & Northeastern.

Mr. Gilly: If it does not jeopardize our interests we would like to have it postponed until a future time. I understand there will be a future meeting in Kansas City or St. Louis.

Examiner Burchmore: I am not sure about it.

Mr. Gilly: We are ready for a hearing today or tomorrow.

Examiner Burchmore: Will you be here Monday?

Mr. Gilly: I can, but I would rather not.

Examiner Burchmore: The Jefferson & Northwestern.

(No response.)

The Gideon & North Island Railroad.

Mr. Walter: We would like to get a hearing on that today or tomorrow and if not I think it would suit Mr. Anderson better to have a hearing in St. Louis of on another date.

Examiner Burchmore: The Memphis, Dallas & Gulf.

(No response.)

—. The Arkansas Southeastern.

2595 Mr. Walter: Either today or tomorrow or at a later date.

Examiner Burchmore: Will you be ready Monday?

Mr. Walter: Yes, sir.

Mr. Jefferson: About that Memphis, Dallas & Gulf, I suggest if you have a future hearing they be notified in some way. I am afraid they are under some misapprehension as to their exact status in this case.

Examiner Burchmore: Is not that owned by some Chicago people?

Mr. Jeffery: I do not know by whom it is owned but I know we have divisions on all classes and commodities with them and our traffic people told me it is quite an embryonic trunk line.

Examiner Burchmore: Is it a good deal better road than the Tremont & Gulf?

Mr. Jeffery: I would not like to make any invidious comparisons——

Mr. Garwood: There are so few better roads than that that I question it.

Mr. Jeffery: I would not like to say as to that. I really do not know, I am not in a position to say.

2596 Examiner Burchmore: The Eldorado & Wesson.

Mr. Walter: We will be ready whenever the Commission reaches us.

Examiner Burchmore: The Fordyce & Princeton Railway.

Mr. Walter: The same thing.

Examiner Burchmore: The North Louisiana & Gulf Railroad.

Mr. Walter: We would like to get a hearing on that today or tomorrow and if not it had better go over.

Examiner Burchmore: The Wyandotte & Southern Railway.

(No response.)

The Lester & Ouachita Valley Railway.

(No response.)

Examiner Burchmore: The Little Rock, Sheridan & Saline River.

Mr. Cone: That has been heard.

Examiner Burchmore: The Louisiana & Pine Bluff.

Mr. Walter: If we can get a hearing today or tomorrow we would like to have it. If not the matter can go over.

2597 Mr. Jeffery: Your Honor there is one that I suggest go over. I am very anxious to get away and that is the only one of the Iron Mountain roads that I think I would like to stay and hear, and if there is to be a further hearing I would like to ask that that be put over, and I will be able to attend to it. I have to leave myself today, and cannot hear it unless it can be heard this afternoon.

Examiner Burchmore: The Mississippi Valley Railroad.

(No response.)

Examiner Burchmore: The Mississippi Valley Railway has been heard.

The Natchez, Ball & Shreveport.

Mr. Wilson: I understood you called the Blythesville, Burdette & Mississippi River Railway.

Examiner Burchmore: Are you ready for a hearing?

Mr. Wilson: Yes, sir.

Examiner Burchmore: Will you be ready for a hearing Monday?

Mr. Wilson: No, sir; I am very much ready today.

Examiner Burchmore: Can you be heard tomorrow?

Mr. Wilson: If we cannot be heard today we could be heard tomorrow.

2598 Examiner Burchmore: The Paragould & Memphis Railway? An appearance has been entered by Mr. John B. Daish, but he has not appeared yet.

The Red River Valley Railroad.

(No response.)

Examiner Burchmore: The Texas Southeastern Railroad.

Mr. Greer: We are ready. I presume we will be the next one called and we want a hearing.

Examiner Burchmore: How long will that case take?

Mr. Greer: It ought not to take much more than an hour.

Examiner Burchmore: That is quite a railroad.

Mr. Greer: Yes, sir.

Examiner Burchmore: The Thornton & Alexandria Railway.

Mr. Walter: We would like to get a hearing on that. I think it will be reached this afternoon on the regular call of the Cotton Belt connections.

Examiner Burchmore: There seem to be twenty-six roads ready for hearing. I think the best thing to do and the course that will be pursued unless there is too much objection, is to continue the regular call today and tomorrow and continue the hearing Monday and proceed through until we have disposed of all the cases
2599 that can be heard. Now several have responded that they would be positively unable to be heard Monday. I am willing to try to make up a little calendar of the cases that will be reached today or may be reached today and those that will or may be reached tomorrow and also those who have to go over to next week. I cannot do that until adjournment this afternoon.

Mr. Garwood: Some of our witnesses in the Gulf & Sabine River Railroad are compelled to leave to fulfill important engagements and they cannot possibly be back Monday.

Examiner Burchmore: Now, Mr. Garwood: Where can that case be heard if it is heard later?

Mr. Garwood: It can be heard at whatever place it suits the convenience of the Commission, St. Louis, Kansas City or Chicago or here or any other convenient locality.

Examiner Burchmore: That is the Gulf & Sabine River?

Mr. Garwood: Yes.

Examiner Burchmore: By whom is that road controlled or how is it owned?

Mr. Garwood: I understand in a general way by the Fullerton interests.

Examiner Burchmore: Are there any other companies
2600 that are in a similar position with respect to a hearing Monday?

Mr. Coleman: The Wilson Northern, I have court engagements on Monday that will make it imperative for me to leave and I would like to leave tonight.

Examiner Burchmore: I think you will be reached tomorrow.

Mr. Coleman: If there is to be a hearing at St. Louis or Kansas City I would rather let it go over and get away tonight. We have been here nearly two weeks.

Examiner Burchmore: I think you can be heard tomorrow and I would very much prefer not to put off any case that does not have to be.

Mr. Coleman: If it is an absolute certainty we could be heard I would strain a point and stay, but if there is any uncertainty we would rather leave tonight.

Examiner Burchmore: When do you have to leave?

Mr. Coleman: 7:30.

Examiner Burchmore: We will try to find out later in the afternoon.

2601 Mr. Garwood: Your Honor made the remark that you would continue this hearing over until next week without there was very strenuous objection. I take it from that that you wanted to know whether there would be strenuous objection. There are some of us here who have a general interest in this matter, and in its broader and general phases, independent of any direct or immediate interest of any particular carrier, and who feel obligated to keep in touch with the drift of this investigation as a whole. Now if any very considerable number of these cases are to be heard on Monday, it would leave some of us, myself particularly, in a very embarrassing position. I have cases in court in our Appellate Court that are to be submitted on Wednesday, the 21st, and I do not think it is possible we can get a postponement of them. Now then not only is it impoissible to get a postponement, but we will be obliged to be in Austin on Tuesday morning, and we cannot possibly get there if we are here Monday. We will have to leave here at least on Sunday. And in that same connection I desire to state that I personally know from Judge Cowan that he has made a very important engagement on Monday in Texas, and is assembling parties at Galveston to meet him there, and it would greatly inconvenience

2602 him and a very large number of people interested in that proposition. So it would be extremely unfortunate for him to remain.

Mr. Walter: If you cannot hear today or tomorrow either the Eldorado & Wesson, the Ouachita Valley, the Fordyce & Princeton, the Mansfield Railway & Transportation Company, the Louisiana & Pine Bluff, the Nacogdoches & Southeastern, the Gideon & North Island, the North Louisiana & Gulf, we would like to have those go over until a subsequent hearing, unless as to the North Louisiana & Gulf, you could fix a day certain next week, say Wednesday or something like that.

Mr. Mantooth: It seems to me there are quite a number of cases which would not object to postponement, if they have to remain over until Monday. They would be willing to have their cases taken up today or tomorrow. Some of these gentlemen, Judge Garwood and Mr. Andrews, say they cannot be here. I suggest that you try the cases that would have to remain over here in any event rather than miss a hearing, and try them today or tomorrow, and postpone those that could not stay until Monday and let them go, so we could dispose of those that have to stay here. I do not want to come back if I can avoid it. I have been traveling over the country a good many times to get a hearing, and I am here and would like to

2603 get a hearing before I leave. I represent the Moscow, Camden & San Augustine Railroad. I am willing to stay here until I get a hearing. I do not mean by that that I am willing to concede my right to be heard at the proper time, when I am called on the list.

Examiner Burchmore: You will be called in your proper order on the list, regardless of whether the others are ready or not.

Mr. Mantooth: I want to stay until I get a hearing, but I suggest there are quite a number who might not want to remain over until Monday if they are called in their proper order, and in that way we might save time by picking out those who would not be heard now in any event, and let those remain over until a later date.

Examiner Burchmore: What were those cases you said could not go over?

Mr. Walter: The Mansfield Railroad & Transportation Company, the Nacogdoches & Southeastern, the Louisiana & Pine Bluff, the Gideon & North Island, the Eldorado & Wesson, the Ouachita Valley and the Fordyce & Princeton.

Mr. Jeffrey: Would it not be just as convenient if all those cases were heard later in St. Louis?

2604 Mr. Walter: If that can be done without any prejudice to our rights under the existing situation, we would like to conform to the pleasure and convenience of the Commission and counsel on the other side, but we want to maintain the existing situation as long as we can.

Mr. S. R. Greer: There seems to be a good many who will not have their cases called today or tomorrow, and I would like very much to have our case postponed, the Mangham & Northeastern.

Examiner Burchmore: Where is it located?

Mr. Greer: In the northeastern part of Louisiana, a connection with the Iron Mountain.

Examiner Burchmore: You are connected with the Mangham & Northeastern?

Mr. S. R. Greer: Yes.

Examiner Burchmore: I think you will be reached tomorrow, but are you anxious to go over?

Mr. Greer: I would like very much to get away tonight, I live in St. Louis, and it would be much more convenient to attend a hearing there or in Kansas City, and it seems there will be another hearing; unless it is the purpose of the Commission to continue this hearing indefinitely into next week.

2605 Examiner Burchmore: I will make some announcement at four o'clock regarding the precedure. We are now on the Shreveport, Houston & Gulf, and we will complete that in a few moments and take up the Texas Southeastern next. I desire to dispose of all the cases possible at this hearing, and I am instructed to postpone only such cases as must be postponed. But I will make some announcement about four o'clock about the postponement, and counsel will then have an opportunity to make any further suggestions they desire.

L. D. GARRISON, was recalled as a witness, and having been previously sworn, testified as follows:

Examiner Burchmore: Now, Mr. Garrison, we have covered the general characteristics of this company and its relation to the other companies, leaving for this afternoon only the question of rates and divisions and practices of transportation. Do you have joint through rates on class freight?

Mr. Garrison: Yes, sir.
Examiner Burchmore: To interstate points?
Mr. Garrison: We do.

Examiner Burchmore: Do those rates apply over the
2606 Houston, East & West Texas Railroad?

Mr. Garrison: In connection with the Texas & New Orleans, that is part of the Southern Pacific System.
Examiner Burchmore: And also in connection with the Cotton Belt?
Mr. Garrison: Yes, sir.
Examiner Burchmore: Are the joint class rates the same over both companies?
Mr. Garrison: Yes, sir.
Examiner Burchmore: And they are quite general in their application?
Mr. Garrison: Yes, sir, they are.
Examiner Burchmore: Your company files no local freight tariffs of its own issuance?
Mr. Garrison: No, sir.
Examiner Burchmore: You have, however, on file with the Commission an index of your tariffs which shows all the schedules in which you participate?
Mr. Garrison: Yes, sir.
Examiner Burchmore: What are your divisions under class rates?
2607 Mr. Garrison: With the Cotton Belt we get 25 per cent of their proportion of the through rate.
Examiner Burchmore: And how much on the Texas & New Orleans?
Mr. Garrison: 12½ per cent.
Examiner Burchmore: Then most of your class freight, I imagine, goes to the Cotton Belt?
Mr. Garrison: Yes, sir. There is only one exception to that, and that is the case of grain and grain products.
Examiner Burchmore: We will not go into the details. You have also joint through rates on lumber?
Mr. Garrison: Yes, sir.
Examiner Burchmore: And forest products?
Mr Garrison: Yes, sir.
Examiner Burchmore: Are your rates the same from your mill at Manning as the rates published by the Texas & New Orleans and the Cotton Belt respectively from Prestridge?
Mr. Garrison: They are except in one or two instances that I know of.
Examiner Burchmore: Just one or two exceptions to that rule?
Mr. Garrison: Yes, sir.
2608 Examiner Burchmore: What are your divisions on lumber received from the Cotton Belt?
Mr. Garrison: Four cents.
Examiner Burchmore: Is it a uniform division of four cents?
Mr. Garrison: To interstate points where through rates are published.

Examiner Burchmore: Four cents to all interstate points where through rates are published?

Mr. Garrison: Yes, sir.

Examiner Burchmore: To such points you also get four cents where the rate yields a minimum of eight cents to the Cotton Belt?

Mr. Garrison: Yes.

Examiner Burchmore: Are the divisions the same with the Texas & New Orleans?

Mr. Garrison: No.

Examiner Burchmore: What divisions do you receive there on lumber?

Mr. Garrison: It varies. On lumber destined to Katy points we get three cents, and to Kansas City Southern points we get three cents, and to points on the Colorado & Southern we get
2609 four cents; but to all other points we get 20 per cent of the Sunset Central proportion up to their junction with the foreign line.

Examiner Burchmore: How does that 20 per cent figure out?

Mr. Garrison: It will average about two cents.

Examiner Burchmore: Sometimes less and sometimes more?

Mr. Garrison: Well, we do not ship very much stuff that way. It will be about two cents average.

Examiner Burchmore: You have no milling in transit rates?

Mr. Garrison: No.

Examiner Burchmore: As matter of fact there is no other sawmill on your line except the one at Manning?

Mr. Garrison: No.

Examiner Burchmore: Has your company any contract with the Texas & New Orleans respecting rates and divisions?

Mr. Garrison: No.

Examiner Burchmore: Have you any with the Cotton Belt System?

Mr. Garrison: No, we have not.

Examiner Burchmore: I have before me copies of three or four contracts which I would like to call to your attention very briefly. Here is one agreement entered into February 1st, 1909,
2610 between this railroad and the Carter-Kelly Lumber Company, a corporation, giving the lumber company the right, as I understand it, to operate its logging trains over a part of the lines of this railroad.

Mr. Garrison: Yes, sir.

Examiner Burchmore: What was that system?

Mr. Garrison: They operate over the entire length of our main line from Manning to Prestridge.

Examiner Burchmore: What is the purpose of that operation?

Mr. Garrison: They had some timber up above Prestridge that they logged from there down to Manning.

Examiner Burchmore: Then they haul the logs down over the line to the mill?

Mr. Garrison: The lumber company haul their own logs. The railroad company did not do it.

Examiner Burchmore: The engine was operated by the lumber company?

Mr. Garrison: Yes, sir.

Examiner Burchmore: And the train by the lumber company?

Mr. Garrison: Entirely.

Examiner Burchmore: They paid you how much?

Mr. Garrison: 20 cents a train mile.

2611 Examiner Burchmore: Is not that a very low rate?

Mr. Garrison: We did not think so. I think that is a common compensation over in that country on the main lines.

Examiner Burchmore: How many cars in the train?

Mr. Garrison: It simply pertained to the train. If they had one car or a light locomotive it was the same price.

Examiner Burchmore: They usually run a very heavy train?

Mr. Garrison: Yes, sir.

Examiner Burchmore: As few trains as possible.

Mr. Garrison: Sure, but I might say though, they have not hauled any logs for six months.

Mr. Walter: Has that contract terminated?

Mr. Garrison: It has so far as—There is no official termination, but there will be no more logs hauled over it.

Examiner Burchmore: It just expired by lapse of the practice?

Mr. Garrison: Yes, sir.

Mr. Walter: No more logs to haul?

Mr. Garrison: No.

Examiner Burchmore: I also have what purports to be a copy of a contract between the St. Louis Southwestern of Texas and the Shreveport, Houston & Gulf, under which in consideration

2612 of the sum of $5.00 per train, round trip, for each round trip, the Cotton Belt System granted to the Shreveport, Houston & Gulf Railroad the right to run its logging trains over the tracks of that system from Prestridge to Donovan and return.

Mr. Garrison: Yes.

Examiner Burchmore: Did the Shreveport, Houston & Gulf operate any logging trains over that track?

Mr. Garrison: Let me explain that——

Examiner Burchmore: The explanation is this, is it not, as stated in a letter from you addressed to the Commission: The Cotton Belt was under the impression that those were your logging trains, and in executing the contract your officer neglected to call their attention to the necessity of changing it?

Mr. Garrison: Yes, sir, that is it exactly.

Examiner Burchmore: A mere inadvertence?

Mr. Garrison: Yes, sir.

Examiner Burchmore: I also have a copy of a contract dated November 1st, 1907 with a memorandum of agreement attached to it and describing it, between the Texas & New Orleans Rail-

2613 road, and the Shreveport, Houston & Gulf, covering the construction, use and ownership of an interchange track 2½ miles south of Huntington. That contract as you recall it, contains no provision relating to rates or divisions.

Mr. Garrison: Not at all.

Examiner Burchmore: Also a contract dated October 1st, 1907, between the Cotton Belt System and the Shreveport, Houston & Gulf. Do you remember what the nature of that contract was?

Mr. Garrison: What was the date of it?

Examiner Burchmore: 1907?

Mr. Garrison: Dated October 1st, 1907?

Examiner Burchmore: October 1st.

Mr. Garrison: That covered the use and trackage rights over 1¾ miles of track belonging to the Cotton Belt between our junction at Prestridge and Huntington, and also station facilities at Huntington.

Examiner Burchmore: What was the payment?

Mr. Garrison: A monthly fixed charge of $45.00 a month.

Examiner Burchmore: For the whole business?

Mr. Garrison: Yes.

Examiner Burchmore: What was the distance from Prest-
2614 ridge to Donovan?

Mr. Garrison: I do not really know. I think it is about a mile.

Examiner Burchmore: Prestridge to Donovan one mile?

Mr. Garrison: I think it is. It may not be quite so far.

Examiner Burchmore: Then the Cotton Belt System charged you $5.00 per round trip for a train movement between Prestridge and Donovan as a trackage right?

Mr. Garrison: I do not know what they call it. That was a fixed charge.

Examiner Burchmore: It amounted only to a trackage right; they permitted your trains to run over that track and charged you $5.00 a trip?

Mr. Garrison: That is the lumber company, you understand.

Examiner Burchmore: Well, I do not care which.

Mr. Garrison: $5.00 a round trip was what they charged.

Examiner Burchmore: And it was one mile each way?

Mr. Garrison: Yes, sir, so far as I know.

Examiner Burchmore: That is about $2.00 or $2.50 a train mile, and yet your railroad company only charges this lumber company 20 cents a mile?

Mr. Garrison: Well, in rebuttal to that I may say, I am not
2615 prepared to say this is positive, but it is my recollection that the Cotton Belt charged the Lufkin Land & Lumber Company the same rate, 20 cents a mile, covering about 20 miles of their track between Lufkin and Donovan.

Examiner Burchmore: Then this $5.00 is a specially high rate?

Mr. Garrison: Well, it only took care of five or six round trips. That perhaps accounted for that.

Examiner Burchmore: You said in rebuttal. You do not understand I was charging that against your company, but simply trying to bring out all the facts both ways. The division on lumber is not intended to and in fact does not take care of any of the expense of moving the logs into the mill.

Mr. Garrison: No, sir, not at all.

Examiner Burchmore: What timber holdings has this lumber company along the line of this railroad, has it any timber holdings?

Mr. Garrison: I believe they own the timber on maybe 100 acres just before we get to Manning, about half or three-quarters of a mile.

2616 Examiner Burchmore: Beyond Manning and away from Prestridge.

Mr. Garrison: No. They just recently acquired it.

Examiner Burchmore: Is there anything else they have acquired since they built this railroad?

Mr. Garrison: They have bought timber from time to time.

Examiner Burchmore: Has anybody else been able to cut their timber land and mill it in competition with this lumber company?

Mr. Garrison: The lumber company bought all the available timber down there.

Mr. Walter: What is your passenger revenue, the number of passengers carried last year?

Mr. Garrison: I think that we hauled something over 9,000.

Mr. Walter: About how much total revenue?

Mr. Garrison: The total passenger revenue was $2,978.20.

Mr. Walter: What were your total earnings last year?

Mr. Garrison: You mean the gross operating revenue?

Mr. Walter: Yes.

Mr. Garrison: $25,464.84.

Mr. Walter: Now then, what other earnings did the railroad have?

Mr. Garrison: We derived a revenue from the rental of
2617 that equipment from the Carter Mills that amounted to $3,510.36.

Mr. Walter: How much for trackage?

Mr. Garrison: That covers the rent received, that is that 20 cents per train mile, $976.20.

Mr. Walter: Demurrage?

Mr. Garrison: We collected $953.

Mr. Walter: Do you know when that timber was bought for the hauling of which 20 cents a train mile was paid?

Mr. Garrison: It was bought after the railroad was completed, and after Carter-Kelly Company had begun cutting the timber down below Manning.

Mr. Walter: How long after?

Mr. Garrison: Two years, I think.

Mr. Mantooth: Two years after the building of the mill and the railroad?

Mr. Garrison: Yes, sir.

Mr. Walter: How much was there of this timber?

Mr. Garrison: Do you mean the stumpage?

Mr. Walter: Yes.

Mr. Garrison: I think about 10,000,000 feet.

Mr. Walter: Do you know whether there is any other individual or individuals that own a material amount of timber land
2618 among the Carter-Kelly holdings?

Mr. Garrison: I do.

Mr. Walter: What concern owns the alternate sections?
Mr. Garrison: It is called the Santa Fe properties.
Mr. Walter: By that you mean the Santa Fe Railroad?
Mr. Garrison: Yes, sir.
Mr. Walter: In addition to the forest products you carried for the Carter-Kelly people, there are various shipments for various people today?
Mr. Garrison: Yes, sir.
Examiner Burchmore: Did you have any special purpose in bringing out that Santa Fe holding?
Mr. Walter: Nothing except to show it is not all owned by us.
Examiner Burchmore: It is not all being cut.
Mr. Mantooth: No, sir, it is not.
Mr. Walter: The country is pretty well settled all down through that country south of the railroad, is it not?
Mr. Garrison: Yes, sir, it is.
Mr. Walter: We will file the itemized statement that is required as to all these rates, and also a map.

2619 Examiner Burchmore: What is the proportion of your tonnage that is lumber for this company?
Mr. Garrison: It is about 94 per cent for the fiscal year ending last June.
Examiner Burchmore: What per cent of the earnings?
Mr. Garrison: I have not figured that.
Examiner Burchmore: About the same per cent, or much less?
Mr. Garrison: It would be about 90 per cent.
Examiner Burchmore: The statement you will furnish will show that accurately?
Mr. Garrison: Yes.
Examiner Burchmore: Have you any questions, Mr. Andrews?
Mr. Andrews: I do not think you gave the percentage of holdings of the railroad company and the Carter-Kelly Lumber Company.
Mr. Garrison: You mean the stock of one in the other?
Mr. Andrews: Yes. You stated they were substantially the same, but some differences, but did not give percentages.
Mr. Garrison: He asked me if the joint ownership was on a regular fixed percentage or ratio, as I understood it. I do not exactly catch your question.
Examiner Burchmore: I think that was fully brought out this morning.

2620 Mr. Andrews: I understood him to say it was a controlling interest, but did not understand him to give the percentage, and did understand him to say there are some differences. If I am incorrect about it I will ask no questions.
Examiner Burchmore: You may be right, but I was of another opinion.
Mr. Andrews: Well, what is the difference in the stock holdings of the two corporations, in percentages?
Mr. Garrison: About four for one.
Mr. Andrews: You misunderstand me. Say for instance, Mr. Carter is a stockholder in each company, just assume that; is his per-

centage of stock in the lumber company the same as his percentage of stock in the railroad company?

Mr. Garrison: It is.

Mr. Andrews: And that applies to the other stockholders?

Mr. Garrison: Except in only one or two minority stockholders, who have sold what little stock they had.

Mr. Andrews: What would that amount to in percentage?

Mr. Garrison: Very little, because——

Mr. Andrews: Director's shares?

Mr. Garrison: No.

Examiner Burchmore: How many shares in number, aside
2621 from percentages?

Mr. Garrison: I do not know. Do you mean the total number?

Examiner Burchmore: How many shares in the railroad company's stock are not owned by people who have any interest in the lumber company?

Mr. Garrison: None at all. They are joint ownership, if you mean——

Mr. Andrews: I understood you to give a different answer this morning, is the reason I asked.

Mr. Garrison: You mean if one man owns stock in the lumber company, if he also owns it in the railroad company?

Mr. Andrews: Yes.

Mr. Garrison: That is right.

Examiner Burchmore: I think he was asked this morning whether Mr. Carter of Houston, owned a majority of stock in the railroad company, and he said he did not.

Mr. Walter: W. T. Carter & Brother.

Mr. Mantooth: That is not a corporation.

Mr. Andrews: I was not asking about that, but about the other part. How far do you haul when you deliver to the St. Louis Southwestern?

Mr. Garrison: Nine miles.

2622 Mr. Andrews: How far do you haul when you deliver to the Texas & New Orleans?

Mr. Garrison: Nine miles.

Mr. Andrews: Do you deliver at a junction point?

Mr. Garrison: Yes.

Mr. Andrews: I did not understand*ing* that Huntington was a junction point. I thought the junction point was at Jacksonville.

Mr. Garrison: I mean our junction point with these two lines is at Prestridge.

Mr. Andrews: The query was how they came to be both nine miles unless they joined at the same point where you crossed them.

Mr. Garrison: They do.

Mr. Andrews: I thought it was at Jacksonville.

Mr. Garrison: They cross there and down below at Huntington again.

(Witness excused.)

E. C. DURHAM was called as a witness, and having been duly sworn, testified as follows:

Examiner Gutheim: Your full name?
Mr. Durham: E. C. Durham.
Mr. Gutheim: You live where?
Mr. Durham: Diboll, Texas.
Examiner Gutheim: Your occupation is what?
Mr. Durham: General Manager of the Texas Southeastern Railroad Company.
Examiner Gutheim: You offer this map of the Texas Southeastern in evidence?
Mr. Durham: Yes.

(The map so offered and identified, was received in evidence and thereupon marked Texas Southeastern Railroad Exhibit No. 1, Witness Durham, received in evidence December 16th, 1910, and is attached hereto.)

Examiner Gutheim: According to this map the Texas Southeastern extends from Diboll to the station where you have a connection with the Houston, East & West Texas in a northerly direction through Blix and Vair to a terminus called Neff.

2624 Mr. Durham: That is correct.

Examiner Gutheim: From Blix you have a branch running is an easterly direction to Lufkin?
Mr. Durham: Yes.
Examiner Gutheim: What is the nature of the country that this road traverses?
Mr. Durham: It is timber country; a good deal of the timber has been cut out right along the lines just now, but there has been.
Examiner Gutheim: Are the stations, the names of which I called from the map, the only stations located on your line?
Mr. Durham: No, there is small station at Peavy.
Examiner Gutheim: Where is Peavy?
Mr. Durham: Six miles southwest of Lufkin.
Mr. Greer: And a station at Lufkin too.
Examiner Gutheim: And Peavy is between Lufkin and Blix?
Mr. Durham: Yes.
Examiner Gutheim: How much of a community is there at Blix?
Mr. Durham: Nothing much. There are a few farmers that live around there.

Examiner Gutheim: At Peavy is there any community to

2625 speak of?

Mr. Durham: There is a store there; a small farming settlement.
Examiner Gutheim: What is the situation at Vair?
Mr. Durham: There is nothing at Vair at all right at the station.
Examiner Gutheim: And at Neff?
Mr. Durham: That is a farm settlement.

Examiner Gutheim: Were any of those settlements there prior to the date the road was built through that country?

Mr. Durham: Yes, sir, I think there were.

Examiner Gutheim: How many?

Mr. Durham: Well, they are just about like they were before the road was built; there has been no particular change.

Examiner Gutheim: I say were they all there before the road was built?

Mr. Durham: I am not sure about that; I think they were, though.

Examiner Gutheim: Is any one of them or all of them the remains of former logging camps?

Mr. Durham: I do not think so.

Examiner Gutheim: Are there any industries that furnish
2626 any large amount of tonnage to the road at these points?

Mr. Durham: No, sir.

Examiner Gutheim: What is there at Diboll?

Mr. Durham: The Southern Pine Lumber Company has two sawmills there.

Examiner Gutheim: Have they sawmills at any other point on the line?

Mr. Durham: No, sir.

Examiner Gutheim: And is the Southern Pine Lumber Company interested in the railroad?

Mr. Durham: Well, the stockholders are, some of them.

Examiner Gutheim: To what extent?

Mr. Durham: I think all the stockholders of the railroad company own stock in the lumber company except two, that own one share for the purpose of qualifying as directors, and the parties that own the controlling interest in the lumber company own the controlling interest in the railroad company.

Examiner Gutheim: Are the officers of the railroad and of the lumber company substantially identical?

Mr. Durham: The President of the railroad is also President of the lumber company, and the Vice-President of the railroad is not an officer nor a stockholder in the lumber company, but he
2627 does some work for them.

Examiner Gutheim: Was the railroad built as an incorporated carrier, or was it originally built as a part of the investment of the Southern Pine Lumber Company?

Mr. Durham: Now I am not sure about that; I think it was built as a logging road in the beginning.

Examiner Gutheim: About the same time that the first mill was established at Diboll?

Mr. Durham: I do not know about that, but I presume it was.

Examiner Gutheim: What is the outstanding indebtedness of the road at the present time?

Mr. Durham: About $365,000.

Examiner Gutheim: All in stock?

Mr. Durham: No, sir.

Examiner Gutheim: How is it divided?

Mr. Durham: Oh, you mean including the stock? The capital stock is——

Examiner Gutheim: How much stock and how much bonds?

Mr. Durham: The capital stock is $250,000 and there is $238,900 issued.

Examiner Gutheim: $238,900 issued in stock?

Mr. Durham: Yes.

2628 Examiner Gutheim: How is the rest divided?

Mr. Durham: The biggest portion of it is carried in the form of a note held by the Southern Pine Lumber Company.

Examiner Gutheim: And about what is the cost of the road and equipment?

Mr. Durham: I think the balance on June 30th was $635,000.

Examiner Gutheim: How is the difference between that figure and the $365,000 financed?

Mr. Durham: I misunderstood you. The capital stock of the company is $250,000 and that $365,000 that I spoke of is in addition to the capital stock; it is a liability.

Examiner Gutheim: What rate of interest, if any, is paid on the balance due the lumber company?

Mr. Durham: Six per cent.

Examiner Gutheim: As a matter of fact does the railroad company carry any separate financial account, or is all of the taking in and paying out of the cash performed by the lumber company and simply charged and credited on the lumber company's books, and reversely on the railroad company's books?

Mr. Durham: No, sir, it is all carried by the railroad com-

2629 pany.

Examiner Gutheim: Has that always been so, or has the system just recently been made to conform to that?

Mr. Durham: I think that that has been the custom for several years. I know it has been since I have been with the company, about two years and a half.

Examiner Gutheim: If I say that the Examiner who went over your books about a year ago this time gathered from them that the method was for the Southern Pine Lumber Company to support the railroad and pay its bills and that the railroad was credited with the freight charges, would that make you change the statement any?

Mr. Durham: Well, the freight that we handle for the Southern Pine Lumber Company is charged to them and we settle with them once a month.

Examiner Gutheim: Is there an actual cash transaction?

Mr. Durham: No.

Examiner Gutheim: Or simply a credit to the account?

Mr. Durham: That is it.

Examiner Gutheim: So as a matter of fact if the railroad needs money and does not get it, the lumber company pays it off, and if there is a surplus it may be temporarily loaned to the lum-

2630 ber company or applied on the debt?

Mr. Durham: If we need the money we get it from the

lumber company, and there has never been any surplus to give back to them.

Examiner Gutheim: The line is all standard gauge?

Mr. Durham: Yes, sir.

Examiner Gutheim: About what rail has it?

Mr. Durham: 56 and 60 pound.

Examiner Gutheim: Any station buildings at the various locations marked on the map as stations?

Mr. Durham: Yes, sir, we have a station building at Diboll, a small shed at Blix, a little station at Vair, one at Neff, and a shed at Peavy.

Examiner Gutheim: Is the Diboll station the property of the Houston, East & West Texas?

Mr. Durham: No, sir, it is not.

Examiner Gutheim: Is it in fact the general office of the Southern Pine Lumber Company?

Mr. Durham: No, sir.

Examiner Gutheim: About how much equipment have you at the present time?

Mr. Durham: We have 84 flat cars, 10 box cars, and 3
2631 locomotives; we have another locomotive which will be delivered next month; a pile driver, a motor car and caboose, and one combination passenger and baggage car.

Examiner Gutheim: And that equipment is all furnished with safety devices as required by the Federal Acts?

Mr. Durham: Yes, sir.

Examiner Gutheim: You have a telegraph or telephone service in connection with the road?

Mr. Durham: Telephone.

Examiner Gutheim: Used for dispatching trains?

Mr. Durham: Yes, sir.

Examiner Gutheim: About how many men are there in the railroad service solely?

Mr. Durham: I think there are 55 now.

Examined Gutheim: Are the general office employés men who devote their entire time to the railroad work, or men who are jointly in the employ of the railroad and the Southern Pine Lumber Company?

Mr. Durham: They devote all their time to railroad work.

Examiner Gutheim: How much train service do you operate?

Mr. Durham: We run a train from Diboll to Neff and return each day, and one from Diboll to Lufkin and return each
2632 day, except Sunday.

Examiner Gutheim: Are they passenger trains?

Mr. Durham: Mixed trains.

Examiner Gutheim: About how many passengers do you handle?

Mr. Durham: Last year we handled something over 6000.

Examiner Gutheim: Do you handle any mail or express?

Mr. Durham: We handle express but no mail.

Examiner Gutheim: Can you furnish us with a statement of the total tonnage and revenue for the last fiscal year, and divide that

between the total tonnage and revenue handled for the Southern Pine Lumber Company and that for the outside general public?

Mr. Durham: Yes, sir.

Examiner Gutheim: Will you file that statement in evidence?

Mr. Durham: I haven't it prepared here now; I can furnish it to you.

Examiner Gutheim: It will be understood that will be furnished?

Mr. Durham: Yes, sir.

Examiner Gutheim: Is your passenger business done with tickets, or all with cash fares?

Mr. Durham: Most of it is with tickets, sold at Lufkin and
2633 Diboll, and some is cash fare.

Examiner Gutheim: And you publish regular tariffs and file them with the Interstate Commerce Commission?

Mr. Durham: We do through our joint agents, yes, sir.

Examiner Gutheim: Are there any local tariffs published?

Mr. Durham: We have one local tariff that is filed with the Interstate Commerce Commission.

Examiner Gutheim: Does that tariff make any provision for a charge on the hauling of logs for the Southern Pine Lumber Company?

Mr. Durham: No, it does not.

Examiner Gutheim: Those are hauled on a milling in transit basis?

Mr. Durham: No.

Examiner Gutheim: Are the logs hauled by the railroad?

Mr. Durham: Yes.

Examiner Gutheim: You mean they are hauled free?

Mr. Durham: No.

Examiner Gutheim: How is the compensation arranged?

Mr. Durham: We charge them $2.50 a car for 10 miles and less, and $3.00 a car for 10 miles and under 20 miles.

2634 Mr. Greer: You said there was no tariffs. Is there not a local tariff which authorizes that charge?

Mr. Durham: Yes, sir, but it does not authorize any milling in transit arrangement.

Examiner Gutheim: Does the rate on logs include any railroad operation in the woods service in connection with the logging?

Mr. Durham: No.

Examiner Gutheim: The woods service is all done with the power of the Southern Pine Lumber Company?

Mr. Durham: Yes, sir.

Examiner Gutheim: In the case of the mills at Diboll, does the Houston, East & West Texas take out the product with its own power?

Mr. Durham: No.

Examiner Gutheim: How much of a haul does the Texas Southeastern Railroad perform on that product?

Mr. Durham: It is simply a switching proposition for about 3000 feet or about 8000 feet.

Examiner Gutheim: What other connections do you have to which you deliver the product of those mills?

2635 Mr. Durham: We connect with the Houston, East & West Texas and Lufkin and the Cotton Belt.

Examiner Gutheim: You make no deliveries at Lufkin, do you?

Mr. Durham: We deliver 95 per cent of our stuff at Lufkin.

Examiner Gutheim: That is you take it from Diboll around through Blix over to Lufkin?

Mr. Durham: Yes, sir.

Examiner Gutheim: And deliver it to the Houston, East & West Texas there?

Mr. Durham: Yes, sir, we do.

Examiner Gutheim: 95 per cent?

Mr. Durham: Yes, sir.

Mr. Greer: Not to the Houston, East & West Texas?

Mr. Durham: No, we do not do that with 95 per cent of our business. I mean 95 per cent of our business is handled through Lufkin either to the Cotton Belt or the Houston, East & West Texas, and of that I suppose the Cotton Belt gets 80 per cent or maybe more.

Examiner Gutheim: Do you mean the Houston, East & West Texas deliveries are made at Lufkin?

Mr. Durham: Some of them are, yes, sir.

Examiner Gutheim: A small proportion of them?

2636 Mr. Durham: Yes, sir.

Examiner Gutheim: And they get very little at Diboll?

Mr. Durham: Yes, sir, very little.

Examiner Gutheim: As a matter of fact could the Houston, East & West Texas take out the product of the Diboll mills with its own power?

Mr. Durham: They could not, no, sir, without going in on our yards and tracks.

Examiner Gutheim: On the tracks of the railroad or the tracks of the Southern Pine Lumber Company?

Mr. Durham: No, the Southern Pine Lumber Company has no tracks.

Examiner Gutheim: Have you any connections other than the Houston, East & West Texas and the Cotton Belt?

Mr. Durham: We connect with the Eastern Texas out at Neff and the Groveton, Lufkin & Northern at Vair.

Examiner Gutheim: Is the Eastern Texas a Cotton Belt proposition?

Mr. Durham: I understand it is.

Examiner Gutheim: You make no deliveries to them at Neff?

Mr. Durham: No.

Examiner Gutheim: Does the Groveton, Lufkin & North-

2637 ern get anything at Vair?

Mr. Durham: We handle a little business that way; not very much.

Examiner Gutheim: The haul from Diboll over to the Cotton

Belt and the Houston, East & West Texas and its connections at Lufkin is how long?

Mr. Durham: 17.5 miles.

Examiner Gutheim: From Diboll up to Neff is how long?

Mr. Durham: It is 17.8 miles.

Examiner Gutheim: Will you indicate generally the range of divisions which you get from the connections that take out the product of the Southern Pine Lumber Company?

Mr. Durham: On interstate business we get from the Cotton Belt four cents per 100 pounds on the lumber to all points where through rates are published, and on Texas business to points on their line where the rate is 12 cents or more we get 4 cents per 100 pounds, and to points beyond their line in Texas we get two cents per 100 pounds. On the Houston, East & West Texas most of our divisions are figured on a percentage basis, and I suppose the average is about two cents.

2638 Examiner Gutheim: You have through rates and divisions on classes and commodities with both the Cotton Belt and the Houston, East & West Texas?

Mr. Durham: Yes, sir.

Examiner Gutheim: Your divisions on lumber are not made on a milling in transit basis?

Mr. Durham: No, sir.

Examiner Gutheim: Are you making monthly and annual reports to the Interstate Commerce Commission?

Mr. Durham: Yes, sir.

Examiner Gutheim: And is the road a paying proposition?

Mr. Durham: It did not pay anything last year. We lost some $2900.

Examiner Gutheim: Has it been paying in previous years?

Mr. Durham: I think they have considered it a paying proposition heretofore.

Examiner Gutheim: You have something in your surplus accounts?

Mr. Durham: Yes, sir.

Examiner Gutheim: About how much?

Mr. Durham: I think it is $59,000.

Examiner Gutheim: And that has been how long accruing?

2639 Mr. Durham: Year before last we made $15,000, and the balance of it was accumulated possibly in four or five years.

Examiner Gutheim: Are the general officers of the railroad paid any salaries?

Mr. Durham: Yes, sir.

Examiner Gutheim: How much is paid to each?

Mr. Durham: All of the salaries—my own salary is paid by the railroad company, and they pay the Vice-President $100 a month and the Southern Pine Lumber Company also pays him something; I do not know just what. The President does not draw any salary from either company; he does not draw any from the railroad company anyhow. All the other employés are paid by the railroad.

Mr. Greer: But you are not paid anything by the lumber company, are you?

Mr. Durham: No, sir.

Examiner Gutheim: This Texas Southeastern is the line over which the Groveton, Lufkin & Northern has trackage rights between Vair and Lufkin?

Mr. Durham: Yes, sir.

Examiner Gutheim: And you get a considerable revenue out of those trackage rights?

2640 Mr. Durham: Yes, sir, we get $450 per mile per annum, and they also pay their proportion of the maintenance expense, that is arrived at on a car mileage basis.

Examiner Gutheim: That is simply the maintenance of way expense?

Mr. Durham: Yes, sir.

Examiner Gutheim: Is the Groveton, Lufkin & Northern connected in any way with the Texas Southeastern or the Southern Pine Lumber Company?

Mr. Durham: No.

Examiner Gutheim: Or is it a branch of any carrier line in that locality?

Mr. Durham: Not that I know of. I do not think it is.

Examiner Gutheim: That is all.

Mr. Greer: Mr. Durham, what kind of a depot building have you at Diboll?

Mr. Durham: We have got a two story station there that has got a waiting room for white people and colored people, a ticket office and a wareroom and platform. And the upstairs is used for the general office of the Texas Southeastern.

Mr. Greer: Has the Southern Pine Lumber Company any interest in that building?

2641 Mr. Durham: No.

Mr. Greer: What was the cost of it?

Mr. Durham: I do not know, I think it cost probably about $800 or $900.

Mr. Greer: State what other employés are at work in that building outside of yourself?

Mr. Durham: Well, we have a local agent and a timekeeper there and a bookkeeper and auditor of the company.

Mr. Greer: Are those people in any way employed by the Southern Pine Lumber Company?

Mr. Durham: No, sir, they are not.

Mr. Greer. You spoke of your Vice President. Who is he?

Mr. Durham: J. E. Mitchell.

Mr. Greer: In what capacity does he serve this railroad?

Mr. Durham: As chief engineer.

Mr. Greer: He is not an officer in the Southern Pine Lumber Company?

Mr. Durham: No, sir.

Mr. Greer: And if the Southern Pine Lumber Company employs him it is in what capacity, as a surveyor or engineer?

Mr. Durham: As a surveyor, and he looks after their lands and timbers.

2642 Mr. Greer: Referring to those tracks, has the H. E. &

W. T. any tracks into your lumber yards or mill?

Mr. Durham: No.

Mr. Greer: I mean the mill of the Southern Pine Lumber Company?

Mr. Durham: No.

Mr. Greer: It could not get into your yards except over the track of the Texas Southeastern?

Mr. Durham: No, sir, it could not.

Mr. Greer: What company owns the various switch tracks that penetrate your lumber yards there?

Mr. Durham: The Texas Southeastern Railway Company.

Mr. Greer: The lumber company does not own them?

Mr. Durham: No, sir.

Mr. Greer: What character of track have you?

Mr. Durham: We think we have a very good track.

Mr. Greer: How does it compare with the tracks of the trunk line railroads in that portion of the state?

Mr. Durham: Well, it is better than some of them, and I think it is as good as the average.

Examiner Burdmore: Take a concrete comparison; how does it compare with the line of the Groveton, Lufkin & Northern?

2643 Mr. Durham: They have 60 pound rail on all their lines, and part of ours is 76, but outside of that I think it is pretty much the same class of road.

Examiner Burchmore: We are pretty well informed with respect to that company. You would say your company ought to be regarded as having about the same quality of road?

Mr. Durham: Yes, sir.

Mr. Greer: On that subject, has your track ever been inspected by the Railroad Commission through its engineer?

Mr. Durham: Yes, sir.

Mr. Greer: And valued?

Mr. Durham: Yes, sir.

Mr. Greer: It is the duty of the Railroad Commission of Texas to put a valuation on all the railroads that are recognized by the Commission, is it not?

Mr. Durham: I think so.

Mr. Greer: And in addition to that can you state whether or not the company filed an application for authority to issue bonds in which it fully and minutely described its tracks, under a sworn statement?

Mr. Durham: Yes, sir.

Mr. Greer: Did the Commission's engineer, pursuant to

2644 his duties, under that application make an investigation and value it in that connection also?

Mr. Durham: Yes, sir.

Mr. Greer: In this connection we will read the valuation of the road as placed on it by the Railroad Commission of Texas. I read from page 389 of the 18th Annual Report of the Railroad Commission of the State of Texas. The heading is: Summary of valuations of railroads as ascertained by the Railroad Commission of Texas in accordance with the requirements of Article 4584-C Statutes of Texas,

up to October 31st, 1909. The Texas Southeastern, date of report of value October 4th, 1909. Mileage 27.07 miles.

Roadbed and so forth (mileage sheet A)	$400,739.38
General property	56,123.96
Rolling stock and equipment	79,530.00
Total value	$536,393.34
Average per mile	19,815.05

From your knowledge of the road what would you say as to whether or not that represents a fair and conservative value of the road and its equipment?

Mr. Durham: I think that is a very conservative estimate; I do not think the Railroad Commission ever makes any other
2645 kind.

Mr. Greer: This is from an actual inspection of the road by the engineer?

Mr. Durham: Yes, sir.

Examiner Burchmore: What is that valuation per mile?

Mr. Greer: $19,815.05.

Examiner Burchmore: What is the valuation placed on the Groveton, Lufkin & Northern?

Mr. Garwood: It is over $20,000. I will ask to read it right in that same connection. $23,016.40 per mile as shown on page 387 of the 18th Annual Report. That includes the equipment, however.

Examiner Burchmore: Is the difference in valuation partly explained by equipment, or are there some expensive bridges or is it the difference in the weight of rail, perhaps?

Mr. Garwood: Difference in weight of rail would be one.

Examiner Burchmore: It is not important to reconcile that difference, however.

Mr. Greer: What percentage of your railroad is laid with 60 pound and what part with 56 pound rail?

Mr. Durham: At the present time there are 11½ miles that are laid with 60 pound rail, but when that valuation was made
2646 there were only about 2½ miles of 60 pound and the other was 56.

Mr. Greer: Then have you laid that rail since?

Mr. Durham: Yes, sir, we have laid nine miles.

Mr. Greer: In the last year you have laid something like nine miles of 60 pound rail?

Mr. Durham: Yes, sir.

Mr. Greer: Are those rails new?

Mr. Durham: Yes, sir.

Mr. Greer: Purchased by whom?

Mr. Durham: By the Texas Southeastern Railroad Company.

Mr. Greer: Referring to this track, is it ballasted in any way?

Mr. Durham: No, sir, except in a few places it is ballasted with cinders; it is just an ordinary dirt roadbed.

Mr. Greer: As compared with the Houston, East & West Texas and the M. K. & T., is it as good a roadbed as either of those?
Mr. Durham: I think it is as good or better.
Mr. Greer: Or the Cotton Belt?
Mr. Durham: Well, than their lines in that section.
Mr. Greer: What kind of logging cars are those you use?
Mr. Durham: They are standard flat cars.
2647 Mr. Greer: Are they equipped with safety appliances?
Mr. Durham: Yes, sir.
Mr. Greer: Why is that?
Mr. Durham: Well, that is on account of the Texas law requiring common carriers to equip their cars with certain safety appliances such as air brakes and automatic couplers. They do not except cars that are in logging service.
Mr. Greer: They do not except those?
Mr. Durham: No.
Mr. Greer: Have your locomotives got the electric headlights?
Mr. Durham: Yes, sir.
Mr. Greer: That is required by the Texas Commission?
Mr. Durham: Yes, sir.
Mr. Garwood: We answered the question generally yesterday that we complied with all the Texas laws with reference to the L. & N. I supposed the Commission understood it included electric headlights and all.
Examiner Burchmore: I would not go into the details of that compliance. I do not think it is important.
Mr. Greer: Let me put a general question. Do you comply with all the state and Federal laws on the subject of safety
2648 appliances?
Mr. Durham: Yes, sir.
Mr. Greer: Generally, and do you attempt to comply with all the laws as applied to common carrier railroads?
Mr. Durham: Yes, sir.
Mr. Greer: Both Federal and state?
Mr. Durham: Yes, sir.
Mr. Greer: Do you publish and file with the Interstate Commerce Commission your tariffs?
Mr. Durham: Yes, sir.
Mr. Greer: Do you publish any local intrastate tariffs?
Mr. Durham: Yes, sir, I have already answered that.
Mr. Greer: These joint rates and through routes are published with your concurrence?
Mr. Durham: Yes, sir.
Mr. Greer: You concur in them?
Mr. Durham: Yes, sir.
Mr. Greer: Do you participate in any joint rates with the Texas Railroads on intrastate shipments?
Mr. Durham: Yes, sir.
Mr. Greer: Those authorized by the State Commission?
Mr. Durham: Yes, sir.
2649 Mr. Greer: State whether or not your road has ever been recognized by the State Commission of Texas?

Mr. Durham: It has.

Mr. Greer: Was that done after an investigation or not?

Mr. Durham: Yes, sir.

Mr. Greer: State whether or not it has been easy or difficult to get recognition in Texas?

Mr. Durham: We found it a very difficult proposition over there.

Mr. Greer: In this connection I wish to read the Commission's order on the subject on page 214 of the annual report for 1909, in the matter of the application of the Texas Southeastern Railroad for recognition by this Commission as a common carrier of freight and passengers, with the duties and privileges incident thereto, as prescribed by law——

Examiner Burchmore: Is that order similar to the one Mr. Garwood read yesterday?

Mr. Greer: Yes, sir.

Examiner Burchmore: I do not believe I would read it. I think the title is enough.

Mr. Greer: It may be stated that it was granted on formal
2650 application.

Examiner Burchmore: Yes.

Mr. Greer: And after an investigation by the Commission. We will refer to page 214 of the 18th Annual Report of the Railroad Commission for the State of Texas for 1909 for the order of the Commission recognizing this road. What facilities have you at Lufkin?

Mr. Durham: We use the terminals of the Cotton Belt System.

Mr. Greer: Under what arrangement?

Mr. Durham: We pay them a monthly rental for the privilege of using their depot and tracks.

Mr. Greer: Is the contract on file with the Commission?

Mr. Durham: I do not know whether it is or not. I think it is.

Mr. Greer: You use their depot facilities too?

Mr. Durham: Yes, sir.

Mr. Greer: What about the agent?

Mr. Durham: He is agent for our company, a joint agent.

Mr. Greer: What other facilities do you have for taking care of freight and passengers at the other station on your line?

2651 Mr. Durham: We have an unloading track at Peavy, a spur; we have unloading tracks at Diboll and Neff, I believe that is all.

Mr. Greer: Have you any buildings at any of these places?

Mr. Durham: We have the station buildings and platforms I mentioned before.

Mr. Greer: You have mentioned those?

Mr. Durham: Yes.

Mr. Greer: Do you haul logs for the Southern Pine Lumber Company?

Mr. Durham: Yes, sir.

Mr. Greer: Free, or do they pay you?

Mr. Durham: They pay us $2.50 a car for 10 miles and less, and $3.00 for 10 miles and under 20 miles.

Mr. Greer: I believe you stated that?

Mr. Durham: Yes.
Mr. Greer: And that is under a published tariff?
Mr. Durham: Yes, sir.
Mr. Greer: You have no milling in transit?
Mr. Durham: No, sir.
Mr. Greer: I understood you to say that the finished prod-
2652 uct, the lumber which you transport, is 95 per cent of it handled through Lufkin?
Mr. Durham: Yes, sir.
Mr. Greer: And only about five per cent at Diboll?
2653 Mr. Durham: Yes, sir.
Mr. Greer: Then that gives you over 17 miles' haul on the finished product?
Mr. Durham: Yes, sir.
Mr. Greer: What road furnishes you the best facilities for reaching the Mississippi gateways?
Mr. Durham: The St. Louis Southwestern, Cotton Belt Road.
Mr. Greer: Where is the major part of your market?
Mr. Durham: I do not know whether the major part goes through the Mississippi gateways or not; a large portion of it does go that way; I know that.
Mr. Greer: Does the St. Louis Southwestern reach the Mississippi gateways by one line or a number of lines?
Mr. Durham: Well, that system reaches the gateways direct from Lufkin.
Mr. Greer: From what sources do you derive your freight at present, and what prospective sources have you that you can reasonably rely on in the future?
Mr. Durham: Well, we handle the business of the Southern Pine Lumber Company, logs and lumber, and we handle merchandise and various freights for stores at Diboll, a little store at Peavy,
2654 and we are putting in a track now to handle 1,200 or 1,500 cars of logs for a saw mill at Lufkin, and also we are going to handle the output of a brick plant that is being established on our line about three miles from Lufkin.
Mr. Greer: Is it a branch line from Blix to Lufkin?
Mr. Durham: It is located on that line; yes, sir.
Mr. Greer: Did the Southern Pine Lumber Company own any timber on that branch line running up to Lufkin at all?
Mr. Durham: They may have owned a few small tracks, but——
Mr. Greer: Wat it a considerable or inconsiderable quantity, if any?
Mr. Durham: Very small.
Mr. Greer: Was the object of building that line to use it to transport logs into that mill, could it have had any such object?
Mr. Durham: No, I think not.
Mr. Greer: No logs there belonging to the Southern Pine Company to transport?
Mr. Durham: No.
Mr. Greer: The logs on that line are going to be transported to what place?

Mr. Durham: Lufkin.
2655 Mr. Greer: By the railroad for another mill?
Mr. Durham: They are.
Examiner Burchmore: As a matter of fact, did you not build to Lufkin in order to get another outlet to the market?
Mr. Durham: Yes, sir.
Mr. Greer: How large a town is Lufkin?
Mr. Durham: It has five or six thousand people, I think.
Mr. Greer: It has banks?
Mr. Durham: Yes, sir.
Mr. Greer: And various mercantile establishments and so on?
Mr. Durham: Yes, sir.
Mr. Greer: How large a town is Diboll?
Mr. Durham: About 1,500.
Mr. Greer: Are there any other interests there besides the Southern Pine Lumber Company's mill?
Mr. Durham: No manufacturing concerns.
Mr. Greer: Any mercantile establishments?
Mr. Durham: There are several other stores.
Mr. Greer: How many people?
Mr. Durham: About 1,500.
Mr. Greer: These other stores you speak of, has the South-
2656 ern Pine Company any interest in them?
Mr. Durham: No.
Mr. Greer: I believe you spoke of a brick yard to be located; is it in process of construction now?
Mr. Durham: Yes, sir.
Mr. Greer: How far from Lufkin?
Mr. Durham: That is about three miles.
Mr. Greer: Dependent on your road?
Mr. Durham: Yes, sir.
Mr. Greer: How is that country adapted to agricultural purposes, after the timber is cut off?
Mr. Durham: Well, it is the ordinary east Texas country.
Mr. Greer: Well, don't speak of east Texas country as being ordinary. Is it not extraordinary?
Examiner Burchmore: Mr. Garwood got a full description of this country into the record. Is your country any different than his?
Mr. Durham: No, it is practically the kind of country that Mr. Anderson described, testifying for the Groveton, Lufkin & Northern.
Examiner Burchmore: Is that correct substantially?
Mr. Durham: I think so substantially.
2657 Mr. Greer: Do you carry express?
Mr. Durham: Yes.
Mr. Greer: Do you interchange cars with trunk line railroads?
Mr. Durham: Yes.
Mr. Greer: It is interchanged on a mileage basis?
Mr. Durham: Per diem basis.
Mr. Greer: Is demurrage paid your railroad by the Southern Pine Lumber Company?
Mr. Durham: Yes, sir.

Mr. Greer: You own your own right of way?
Mr. Durham: Yes, sir.
Mr. Greer: What is its width?
Mr. Durham: 100 feet.
Mr. Greer: Have you any expensive construction on your road in the way of bridges or fills or cuts, or anything of that sort?
Mr. Durham: We have a bridge across the Noches River, I think it is about 1,841 feet long.
Mr. Greer: Any other considerable expensive construction?
Mr. Durham: That is the main bridge we have, the biggest one we have. We have two miles of line on the Lufkin Branch
2658 that was very expensive; I do not know just what it cost per mile.
Mr. Greer: Well, approximate it.
Mr. Durham: I should say about $30,000 a mile.
Mr. Greer: That is on the branch on which the Southern Pine owns no timber?
Mr. Durham: Yes, sir.
Mr. Greer: Do you issue bills of lading?
Mr. Durham: Yes, sir.
Mr. Greer: And way bills?
Mr. Durham: Yes, sir.
Mr. Greer: Do you issue bills of lading both state and interstate?
Mr. Durham: Yes.
Mr. Greer: Do you have any considerable intrastate business?
Mr. Durham: I think it is about 20 per cent, I suppose, of our total business.
Mr. Greer: I believe you stated you have a division of rates on that.
Mr. Durham: Yes, sir.
Mr. Greer: How do your divisions compare with the local Commission rate authorized by the railroad Commission of Texas
2659 for similar service?
Mr. Durham: Our local rate on lumber intrastate from Diboll to Lufkin would be five cents per 100 pounds.
Mr. Greer: And you get just four cents division interstate?
Mr. Durham: We get four cents interstate, yes, sir.
Examiner Burchmore: You sometimes get a higher division than four cents?
Mr. Durham: Yes, sir; that is only on Texas business. To competitive points on the Sunset Central lines, where the rate is 18¾ cents or more, we get five cents.
Mr. Greer: On what class of business?
Mr. Durham: On business to points on the Sunset Central lines, where the rate is 18¾ cents or more, to competitive points, we get five cents.
Mr. Greer: Is that local state business?
Mr. Durham: Yes, sir, that is state business.
Mr. Greer: That is intrastate?
Mr. Durham: That is intrastate.

Examiner Burchmore: You formerly got as much as five cents and I think a little more on certain interstate traffic in lumber?

Mr. Durham: Not since I have been with the company.

2660 Examiner Burchmore: Did not the Cotton Belt formerly give you 25 per cent of their joint through rate on lumber?

Mr. Durham: No.

Examiner Burchmore: Perhaps I cannot read the division sheet right, or perhaps this is in error. Here is St. Louis Southwestern in connection with the St. Louis Southwestern of Texas, a division sheet issued June 3, 1908, and bearing No. 1416——

Mr. Durham: That applies, I think, on classes and commodities from the Cotton Belt to our line.

Examiner Burchmore: It says basis for dividing through rates on freight traffic except coal, coke, carloads, and cotton; it does not say except lumber, between St. Louis, Kansas City, East St. Louis, Cairo, and so forth, describing a large territory, to all stations on the Texas Southeastern Railroad, per cents between all stations on the Texas Southeastern and New Orleans, Vicksburg and other stations, 75 per cent to the St. Louis Southwestern and connections and 25 per cent to your company. Perhaps I read this wrong, but I do not understand it.

Mr. Durham: We are sure we do not get it.

Examiner Burchmore: You never got any percentages on

2661 lumber?

Mr. Durham: No, sir.

Mr. Cowan: I guess there is a special division sheet on lumber that applies to it, although it is not noted as being an exception on that.

Mr. Durham: Yes, sir.

Mr. Greer: That is on southbound business?

Mr. Durham: That division sheet applies between, but I know we have gotten four cents interstate from the Cotton Belt for a long time; no more and no less.

Examiner Burchmore: If that is your statement, it can be verified from the division sheets themselves.

Mr. Durham: Yes, sir.

Mr. Greer: You run your trains on regular schedule?

Mr. Durham: Yes, sir.

Mr. Greer: Have you stated about the number of passengers last year?

Mr. Durham: Yes.

Mr. Greer: You have scales for weighing freight?

Mr. Durham: Track scales; yes, sir.

Mr. Greer: And have you stated your daily passenger service?

2662 Mr. Durham: Yes.

Mr. Greer: Did you give the total number of employees?

Mr. Durham: Yes.

Examiner Burchmore: They are itemized in the annual reports.

Mr. Greer: Well, do you transport all freight and passengers that are offered?

Mr. Durham: Yes.
Mr. Greer: You treat everybody alike, or endeavor to do so?
Mr. Durham: Yes.
Mr. Greer: Is the road put there as a permanent road?
Mr. Durham: Yes.
Mr. Greer: Is there any prospective extension of that road?
Mr. Durham: I do not think there is any that will be made in the very near future; possibly later on the road will be extended to Palestine, but I do not think that will be for several years.
Mr. Greer: Then you are not relying altogether on your intention; it is what you are?
Mr. Durham: No, sir.
Mr. Greer: Do you keep separate accounts and make reports?
Mr. Durham: Yes, sir.
2663 Mr. Greer: With regard to some question asked you about the accounts between you and the Southern Pine Lumber Company, I want to know if your business is kept entirely separate from the Southern Pine Lumber Company.
Mr. Durham: Oh, yes.
Mr. Greer: And when you transport freight for another, do you collect it or does the Southern Pine Lumber Company?
Mr. Durham: We collect it.
Mr. Greer: Have you a bank account?
Mr. Durham: Yes, sir.
Mr. Greer: You pay your own debts, and the Southern Pine Company does not pay your debts?
Mr. Durham: We pay all of our own accounts at our own bank; they have a separate bank account at another bank.
Mr. Greer: Have you received the usual recognition in Texas that is accorded railroads in Texas in the way of damage claims?
Mr. Durham: Yes, sir.
Mr. Greer: You have had to respond in that particular, have you?
Mr. Durham: Yes, sir.
Mr. Greer: With reference to the officers, is there any officer in your company outside of the president who is an officer
2664 in the Southern Pine Lumber Company?
Mr. Durham: There is not.
Mr. Greer: He is the sole officer common to the two?
Mr. Durham: Yes, sir.
Mr. Greer: Is the president active in the management of the road?
Mr. Durham: Yes, sir; that is, I do not know that you would say he is active, either. He is——
Mr. Greer: Who is general manager?
Mr. Durham: I am.
Mr. Greer: You are general manager?
Mr. Durham: Yes.
Mr. Greer: State the other officers.
Examiner Burchmore: Let us leave out those details. He has given the statement. We know who they are. We have them all on file with the Commission, and he has stated they are not officers of the lumber company.

Mr. Greer: I believe that is all.

Mr. Garwood: I would like to ask one question. Is it not a fact that in order to conform the grade of the Texas Southeastern to the maximum one per cent of the Groveton, Lufkin & Northern
2665 before this trackage agreement was entered into that your railroad spent perhaps $50,000 on that part of it between what you call the Lufkin Branch from Vair to Lufkin?

Mr. Durham: They made some improvements there, Judge; I don't know just what they cost.

Mr. Greer: State whether it was considerable.

Mr. Anderson: I don't know the cost, but when we made our survey, I know we practically paralleled 13 miles of this road, and the owners of the road came to us and made a proposition for us to use their road under a trackage agreement, and one of the conditions in making that lease was that they reduced two or three grades that then existed to one per cent, so they would conform to ours, and I think that the manager who preceded Mr. Durham told me that it would cost about $50,000. I am not clear about that. I know they worked all winter there with a steam shovel doing that work, and our engineer checked it before we entered into the contract, so that their grades between Vair and Lufkin conform to ours.

Mr. Greer: Have you appointed an agent at Washington to represent you under the recent act of Congress?

Mr. Durham: Yes, sir.

Mr. Greer: Who is it?

Mr. Durham: C. N. Osgood.

2666 Mr. Greer: I offer this map showing the switch terminals.

(The map so offered and identified was received in evidence and thereupon marked Texas Southeastern Exhibit No. 2, witness Durham, received in evidence December 16, 1910, and is attached hereto.)

Examiner Burchmore: Before we proceed in respect to this company, it seems advisable, because of the representations made by the parties who seem to desire postponements in some of the cases, and because of the heavy calendar there is ahead of us here, to postpone the following cases for hearing at a later date to be fixed by the Commission:

Gulf & Sabine River Railroad.
Louisiana Central Railroad.
Mansfield Railway & Transportation Company.
Sabine & Eastern Railway.
Nacogdoches & Southeastern Railroad.
Louisiana & Pine Bluff.
Red River Valley Railroad.

Are there any other companies in which it will be impossible for the witnesses or counsel to be heard Monday?

Mr. Garwood: There are two cases that I direct your Honor's attention to that cannot stay over, the Alabama road, the
2667 Washington & Choctaw.

Examiner Burchmore: The Washington & Choctaw will go over.

Mr. Garwood: Mr. Greer of the Mangham & Northeastern cannot remain over until Monday, and he would like for his case to be added to the postponed list.

Examiner Burchmore: I think that that case can probably be reached tomorrow.

Mr. Garwood: Can you remain over until tomorrow?

Mr. S. R. Greer: I do not believe I can, if it is possible to be postponed.

Examiner Burchmore: Where is that road?

Mr. S. R. Greer: It is in the northeastern part of this state, and connects with the old New Orleans & Northwestern part of the Iron Mountain.

Examiner Burchmore: Who controls it?

Mr. S. R. Greer: The Stuart Greer Lumber Company.

Examiner Burchmore: Does it receive divisions of the joint rate at the present time?

Mr. S. R. Greer: Yes, sir.

Examiner Burchmore: Were those divisions cancelled recently?

Mr. S. R. Greer: Yes, sir.

Examiner Burchmore: And the order was suspended by
2668 the Commission?

Mr. S. R. Greer: Yes, sir.

Examiner Burchmore: I would prefer not to postpone it at this moment, but I will see about it a little later.

Mr. S. R. Greer: I would like to get away on the 7:15 tonight.

Examiner Burchmore: I do not suppose you could secure unanimous consent to take it up out of order.

Mr. Andrews: He could secure unanimous consent to postpone it.

Mr. S. R. Greer: Yes.

Examiner Burchmore: On what ground?

Mr. S. R. Greer: I cannot stay over.

Examiner Burchmore: It is impossible?

Mr. S. R. Greer: Practically so; yes, sir.

Examiner Burchmore: You are the only witness for that company?

Mr. S. R. Greer: Yes, sir.

Examiner Burchmore: It would not be possible to have some one else here Monday?

Mr. S. R. Greer: No, it would not.

Examiner Burchmore: Where can your case be heard later?
2669 Mr. S. R. Greer: In St. Louis, Kansas City or Chicago.

Examiner Burchmore: Then it will be understood that the Mangham & Northeastern will also go over.

Mr. Walter: Will there be a hearing here as late as Wednesday?

Examiner Burchmore: There will not, unless there is some company who absolutely demands a hearing.

Mr. Walter: Could you give us an idea which cases will be reached today and tomorrow?

Examiner Burchmore: The remaining cases I have on my calendar, which may, however, be incomplete, are in this order, being in the same order they have stood from the beginning:

The Thornton & Alexandria,
The De Queen & Eastern,
Galveston, Beaumont & Northeastern——
I am omitting the roads that are postponed——
The Loring & Western, which seems not to be present,
The Louisiana & Eastern Railway, which has not answered,
The Missouri & Louisiana Railroad, which is ready for hearing,
The Sabine & Northern Railroad, also ready for hearing,
The Blytheville, Burdette & Mississippi River, which is
2670 ready for hearing tomorrow,
The Wilson Northern Railroad, of which the same is true,
The Manila & Southwestern,
Peach River & Gulf,
Beaumont & Saratoga Transportation Company, which has not answered,
Riverside & Gulf Railway,
Beaumont & Great Northern, which has not answered,
Livingston & Southeastern, which is not present.
Mr. Garwood: The Beaumont & Great Northern has a case pending——
Examiner Burchmore: I think they may be regarded as being off this docket, but not as out of the case.
The Moscow, Camden & San Augustine. Now, counsel in that case have been here for ten days, and they want very badly to be heard, and I think they are inclined to ask unanimous consent.
Mr. Garwood: If your Honor would entertain a motion to that effect, I would make it.
Mr. Sargent: I have been here for ten days, and then some, and I have been on the head of the list, and I have got to go home by Monday. My road is the Missouri & Louisiana.
2671 Examiner Burchmore: You will be heard tomorrow surely.
The Caro, Northern,
Trinity Valley & Northern,
Jefferson & Northwestern, which seems not to be present,
Gideon & North Island Railroad,
Memphis, Dallas & Gulf.
At this point allow me to say that my attention has been called to a clipping of the Chicago Record-Herald of recent date and reading as follows, and it is perhaps well to get it in the record, although it may be a mere newspaper report:
"The Little Rock Board of Trade announces that the Rock Island proposes to take over the Memphis, Dallas and Gulf Railroad, which is now in operation from Ashton (Ashdown), on the Kansas City Southern, via Nashville to Murfreesboro, Pike County."
Eldorado & Wesson,
Fordyce & Princeton,
North Louisiana & Gulf,
Ouachita Valley,
Natchez, Ball & Shreveport——
Mr. Walter: Let me make one more request. I notice at the last

is the El Dorado & Wesson, the Fordyce & Princeton, the
2672 North Louisiana & Gulf, and Ouachita Valley. If all those other cases are heard, they cannot be heard before Monday night. Cannot those possibly go over?

Examiner Burchmore: I have felt that possibly it would not be wise to announce definitely whether we would conclude tomorrow but we will start tomorrow morning and plug ahead as hard as we can, and by the middle of the afternoon we will know where we stand and can come to a final conclusion whether we will adjourn until Monday or adjourn indefinitely.

Mr. Coleman: Some railroads are insisting upon being heard immediately. The Wilson Northern will change places with them if that is agreeable.

Mr. Gautney: I observe from the list you called there that my case is perhaps the tenth or twelfth case.

Examiner Burchmore: What road?

Mr. Gautney: The Manila & Southwestern, and it seems from the rate of procedure, it will be impossible to reach that case during this hearing, and either at Kansas City, St. Louis or Chicago we would prefer it to go over.

Examiner Burchmore: Your case is coming up tomorrow.

Mr. Gautney: I am afraid not.

Examiner Burchmore: It is going to be called tomorrow.
2673 I cannot promise more than that.

Mr. Gautney: If it is called, we will be here and try it.

Examiner Burchmore: I have it marked for Saturday, with the expectation it will be called on Saturday.

Mr. Gautney: Well, we will be here.

Examiner Burchmore: Is there any further examination of this witness?

Mr. Andrews: I have not quite understood, Mr. Durham, the method of your logging operations. Your mill is located at Diboll?

Mr. Durham: Yes, sir.

Mr. Andrews: Originally your tram roads were thrown out to the timber, that was the original movement?

Mr. Durham: Yes, sir.

Mr. Andrews: Subsequently you became incorporated?

Mr. Durham: Yes, sir.

Mr. Andrews: Was that before or after you built what you call the Lufkin Branch?

Mr. Durham: That was before we built the Lufkin Branch.

Mr. Andrews: You became incorporated, then, when you had the road down to that junction point with these two branches; what do you call it, Blix?

2674 Mr. Durham: Yes, sir, I think they were incorporated before they built that road.

Mr. Andrews: Before they built which road?

Mr. Durham: From Diboll to Blix.

Mr. Andrews: I thought that was the first one you built.

Mr. Durham: No, sir, the line from Diboll to Blix was built by the Texas Southeastern.

Mr. Andrews: What was the road which was built before the incorporation of the line, do you think?

Mr. Durham: I think the Southern Pine Lumber Company had a tram road, that ran east from Diboll.

Mr. Andrews: Where are your logging operations with reference to Blix, that is, the junction point of the two branches, is it not?

Mr. Durham: Yes, sir; they are directly west of there.

Mr. Andrews: And beyond from Diboll?

Mr. Durham: Yes.

Mr. Andrews: There the lumber company's trams spread out to the lumber?

Mr. Durham: They leave the main line at Vair; that is three miles west of Blix.

2675 Mr. Andrews: Does the railroad company have anything to do at all with the logging operations, the leasing of equipment or otherwise, or the movement of cars on the tram lines, prior to the delivery of the loaded car on the railroad track?

Mr. Durham: The way they are handling the log business now, the lumber company loads the logs and delivers them to the railroad company.

Mr. Andrews: At what point?

Mr. Durham: At a place called Gibson.

Mr. Andrews: Where is that with reference to the railroad track?

Mr. Durham: That is about five miles west of Vair on the Southern Pine Company's tram line.

Mr. Andrews: Then your engines go out there and take them?

Mr. Durham: Yes.

Mr. Andrews: Does the lumber company lease any equipment from the railroad company, or the railroad company any from the lumber company?

Mr. Durham: No.

Mr. Andrews: No interchange of equipment?

Mr. Durham: No, except occasionally for a day or two in case of accident they might borrow an engine.

2676 Mr. Andrews: And for these train hauls you speak about you get a compensation which includes the service of going in on the tram road?

Mr. Durham: Yes.

Mr. Greer: I did not catch that.

Mr. Andrews: He has stated what the compensation was to the railroad for the log haul and I asked him if it included going in on the tram line for the cars, which he has just stated it did.

Mr. Andrews: Did you compute the tram line mileage as part of the mileage in fixing the amount to be charged for a car?

Mr. Durham: Yes, sir.

Mr. Andrews: Does the railroad company charge the lumber company demurrage on cars under any conditions?

Mr. Durham: Yes, sir.

Mr. Andrews: Under what conditions?

Mr. Durham: Well, they charge them demurrage under the rules

that the Railroad Commission of Texas prescribe; that is, 48 hours free time, excluding Sundays and holidays.

Mr. Andrews: Whose cars are used to load the logs on?

Mr. Durham: The Texas Southeastern.

Mr. Andrews: Do you charge demurrage on those cars in the woods?

2677 Mr. Durham: Well, if they detain them we do; yes, sir.

Mr. Andrews: And do you collect the demurrage?

Mr. Durham: Yes, sir.

Mr. Andrews: And you handle on the per diem basis as between the railroad company and other railroads?

Mr. Durham: Yes, sir.

Mr. Andrews: Now, what free time is allowed, the Texas Commission's rules on free time?

Mr. Durham: Do you mean on the demurrage?

Mr. Andrews: Yes.

Mr. Durham: Yes, sir.

Mr. Andrews: You adhere to that?

Mr. Durham: Yes, sir.

Mr. Andrews: You spoke a while ago of a debt of $365,000 that the railroad company owed. Does it own it to the lumber company?

Mr. Durham: Yes, sir.

Mr. Andrews: How long has it owed it?

Mr. Durham: I think they have been owing the lumber company for quite a number of years, probably ever since the road was organized.

Mr. Andrews: Do you pay interest on it?

2678 Mr. Durham: Yes, sir.

Mr. Andrews: How often?

Mr. Durham: It is about every six months, I think.

Mr. Andrews: Do you do that by bookkeeping or by actual money over the counter?

Mr. Durham: It is a bookkeeping transaction.

Mr. Andrews: And you do it by bookkeeping.

Mr. Durham: Yes, sir.

Mr. Andrews: And that is a matter of charging the respective companies according to their accrued liabilities on the books of each company?

Mr. Durham: Yes, sir.

Mr. Andrews: You stated that you had a surplus of $59,000.

Mr. Durham: Yes, sir.

Mr. Andrews: That is money, I presume?

Mr. Durham: No, sir.

Mr. Andrews: And not in accounts?

Mr. Durham: No, sir, it is not in money.

Mr. Andrews: Explain that please, sir.

Mr. Durham: I do not know that I can.

Mr. Andrews: Give any definite explanation of it. I will put it in this way, if it is only in credits and not in money, against

2679 whom are those credits, or against whom are the debits, I should say, made?

Mr. Durham: The debits are made against the road and equipment and property that they own.

Mr. Andrews: You mean, then, that this theoretical accumulation of a $59,000 surplus is a paper accumulation of profits, all of which have actually gone into the railroad; is that the way you mean to put it?

Mr. Durham: Yes, sir, I think that is correct.

Mr. Andrews: There is no money on hand, but it is represented by investment?

Mr. Durham: Yes, sir, very little money.

Mr. Andrews: And not by credits?

Mr. Durham: No, sir.

Mr. Andrews: When you deliver to the H. E. & W. T. from the Diboll mill, what is the purpose in carrying it to Lufkin instead of making the delivery at Diboll?

Mr. Durham: We handle some of our business, about five per cent, at Diboll.

Mr. Andrews: I understand that, but——

Mr. Durham: But it is on account of the location of the tracks there; they have a track which will only hold about four
2680 cars, and they use that for unloading merchandise and loading ties, and just at the end of their track on our track the store and ice house of the Southern Pine & Lumber Company is located, and it is pretty hard to get that business through there without a whole lot of switching, and we run a regular train to Lufkin, and we figure that as a rule we can handle it by Lufkin better than we can by Diboll.

Mr. Andrews: Would it not be a good deal cheaper to build a better interchange track than to carry that equipment and loaded cars around from day to day?

Mr. Durham: Yes, sir; that is a better proposition, and it would be pretty hard to make a better connection in the way the plant and everything is located, but it would be better for us if we could deliver that business to them there.

Mr. Andrews: Did it not really grow up under the condition of the desire on the part of the railroad company and on the part of its connections to start in with some haul on the finished product, instead of merely delivering it as a switch proposition; is not that really the way it grew up?

Mr. Durham: You mean handling it by Lufkin?

Mr. Andrews: Yes.

Mr. Durham: No. I don't think so.

2681 Mr. Andrews: Don't you think that had anything to do with it?

Mr. Durham: If that had been the case, we would have handled it all that way.

Mr. Andrews: Well, you handle pretty nearly all that way.

Mr. Durham: Yes.

Mr. Andrews: Five per cent is only a nickel out of a dollar.

Mr. Durham: We would handle more business that way if we could do it to advantage.

Mr. Andrews: How long was the mill in operation before you commenced the Lufkin operation?

Mr. Durham: I don't know, it has been over a number of years.

Mr. Andrews: It is a pretty old proposition as a mill?

Mr. Durham: Yes, sir.

Mr. Andrews: Where is the principal product disposed of, just generally, where does it go to?

Mr. Durham: I should say that the main part of their business is sold—well, Nebraska, Kansas, Missouri, Iowa, Illinois, Texas, and Oklahoma.

Mr. Andrews: What percentage in Texas?

Mr. Durham: About 20 per cent, I would say.

Mr. Andrews: I believe you stated you are the manager
2682 for the railroad company?

Mr. Durham: Yes, sir.

Mr. Andrews: Are you the traffic manager also?

Mr. Durham: Yes, sir.

Mr. Andrews: Do you perform any service of any kind at all for the lumber company?

Mr. Durham: No.

Mr. Andrews: Who routes the lumber company's traffic?

Mr. Durham: I do; that is, such business that is not already routed by the shipper.

Mr. Andrews: Well, you observe shippers' instructions, I presume.

Mr. Durham: Yes, sir.

Mr. Andrews: And when there are no shippers' instructions, then you exercise the option, instead of the lumber company?

Mr. Durham: Yes, sir.

Mr. Andrews: What percentage would you say is shippers' instructions?

Mr. Durham: Possibly not over ten per cent.

Mr. Andrews: And by shippers' instructions, you mean the person who has purchased the lumber?

Mr. Durham: Well, either that or the Southern Pine
2683 Lumber Company, who ships it. I think they specify such routing as their customer desires.

Mr. Andrews: Is it not true that the Southern Pine Lumber Company never specifies a route to you unless it has first been required by the purchaser?

Mr. Durham: Yes, sir; that is correct.

Mr. Andrews: That is all.

Mr. Greer: Just one question before I forget it, as to this surplus. Is not that just an excess of the resources over the liabilities, practically?

Mr. Durham: It is the excess of the earnings over expenses yes, sir.

Mr. Greer: Have you not put betterments and improvements into this road from time to time?

Mr. Durham: Yes, sir.

Mr. Andrews: He said all that.

Mr. Coleman: In your early testimony you said a great deal of the lumber went to the Mississippi River at——

Mr. Durham: Yes, sir.

Mr. Coleman: Is that routed by the Cotton Belt?

Mr. Durham: Yes, sir.

Mr. Coleman: And would naturally work through the
2684 Cairo gateway, I should take it.

Mr. Durham: I think the greater part of it goes through East St. Louis, by Thebes and East St. Louis.

Mr. Coleman: Well, Thebes.

Mr. Durham: Yes, sir.

Mr. Coleman: Your division of the rate on that business is how much?

Mr. Durham: Four cents.

Mr. Coleman: And your haul?

Mr. Durham: 17½ miles.

Mr. Coleman: Do you know what the basing rate is to Cairo?

Mr. Durham: Sixteen cents.

Mr. Coleman: Do you know what the Cotton Belt's distance is from Lufkin to Cairo?

Mr. Durham: I think it is about 630 or 640 miles.

Mr. Coleman: So that they get twelve cents for a 630 mile haul, and you get four cents for seventeen miles?

Mr. Durham: Yes.

Examiner Burchmore: Who furnishes the car?

Mr. Durham: The Cotton Belt furnishes the empty car.

Mr. Garwood: Is it not the universal practice that the originating line is always given consideration from the fact that it origi-
2685 nates the traffic?

Mr. Durham: I believe that is the custom, Judge.

Mr. Andrews: And it always trades it to the best possible advantage?

Mr. Durham: Yes, sir.

(Witness excused.)

Mr. Andrews: I did not ask this witness any questions about it, nor have I any since I have been making cross examinations. I understand the Commission will request of every tap line that has been represented here a statement showing the ownership of its stock respectively in the controlling interests and in the tap lines.

Examiner Burchmore: We have not made that request so far. Do you suggest it?

Mr. Andrews: Yes, sir. I understood it was made when Commissioner Harlan was here.

Mr. Cowan: That was my understanding all the way through. In the first place, he stated the Commission had a lot of that.

Examiner Burchmore: If your understanding is correct, the matter is all right. If it is not, I will see that the request is presented.

2686 Mr. Andrews: We request that it be furnished to save time in examination.

Mr. Garwood: I thought that the matter was gone into in every case.

Mr. Greer: It is practically the same.

Mr. Andrews: He merely stated that Mr. Temple owned the controlling interest in both cases.

Examiner Burchmore: We will see that the request goes before the Commission.

Mr. Garwood: Of course we will furnish it, but we do not want any more work than we have to do.

Examiner Burchmore: I presume if the request is submitted to the short lines, they will submit whatever objection they have, but I do not see what objection they could have to furnishing it.

Mr. Greer: I omitted to put a witness on in regard to an isolated fact, and that is, the influence of divisions on prices. Commissioner Harlan questioned about that, and the possibility of mills operating successfully without divisions. He asked questions on that, and I have a witness who is acquainted with that subject.

Examiner Burchmore: Do you think it is essential to your
2687 particular case?

Mr. Greer: He seemed to think so.

Examiner Burchmore: To your particular case.

Mr. Greer: No.

Examiner Burchmore: Or just in the whole record?

Mr. Greer: Just on the whole record.

Examiner Burchmore: That matter I understood was gone into rather fully by other witnesses.

Mr. Greer: The other witness did not testify to the facts known to this witness.

Examiner Burchmore: How long will it take?

Mr. Greer: It is just an isolated question. It will only take five minutes.

Examiner Burchmore: Very well.

L. D. GILBERT was called as a witness, and having been duly sworn, testified as follows:

Mr. Greer: You are connected with the Southern Pine Lumber Company?

Mr. Gilbert: Yes, sir.

Mr. Greer: Connected with any other lumber company?

Mr. Gilbert: Yes, sir.

2688 Mr. Greer: Are you acquainted with the prices at which those two lumber companies have sold their product?

Mr. Gilbert: Yes, sir.

Mr. Greer: And have compiled a statement on that subject?

Mr. Gilbert: Yes.

Mr. Greer: Covering what period?

Mr. Gilbert: I compiled a statement covering the last three months in 1909, October, November and December, 1909.

Mr. Greer: Based on actual sales?

Mr. Gilbert: Based on actual sales.

Mr. Greer: And it has been shown here that the Texas Southeastern is connected with the Southern Pine Lumber Company?

Mr. Gilbert: Yes.

Mr. Greer: And that the stockholders of the Southern Pine Lum-

ber Company in the main own the stock of the railroad company. Where is this other lumber company?

Mr. Gilbert: It is at Pineland, Texas, on the Santa Fe. The style is the Temple Lumber Company.

Mr. Greer: What is the comparative size of the two concerns and plants?

Mr. Gilbert: Well, the Temple Lumber Company has one two-band mill and the Southern Pine Company has a two-band
2689 mill and one single band mill.

Mr. Greer: Both of them good large mills?

Mr. Gilbert: Yes, sir.

Mr. Greer: Well equipped?

Mr. Gilbert: Yes.

Mr. Greer: You say this other lumber company is on the Santa Fe?

Mr. Gilbert: Yes, sir.

Mr. Greer: There is no railroad connection with it that receives divisions?

Mr. Gilbert: No, sir.

Mr. Greer: You take the lumber direct from those two mills, lumber of the same kind as actually sold during that period and in the same markets; how do the prices compare; in other words, does the division received by the Texas Southeastern Railroad Company at Diboll influence the price of the lumber sold by the Southern Pine Lumber Company as compared with prices of this other mill?

Mr. Gilbert: It does not. The price basis is the same, the quality and kind being the same.

Mr. Greer: What is that based on?

Mr. Gilbert: It is based on the net f. o. b. mill price.

2690 Mr. Greer: Do you know of any other mills on the Santa Fe over there that are in operation that are being logged without the use of a tram line?

Mr. Gilbert: I think there are two at least, one at Lamorle, which is about three miles north of Pineland, and one at Steep Creek. I do not think either of those have tram roads.

Mr. Greer: Do you know in times past when timber was contiguous to the railroad, that there were a number of that sort of mills up and down the Santa Fe, small mills?

Mr. Gilbert: I am quite sure there were.

Mr. Greer: What, in your judgment, is the controlling factor of the ability of a small mill to operate and log its mill with teams? What is the controlling factor?

Mr. Gilbert: Do you mean the principal item of expense? I do not just catch the question.

Mr. Greer: Under what circumstances can a mill operate successfully, that type of mill?

Mr. Gilbert: It would have to have its timber very close to the mill.

Mr. Greer: And when it has the timber near the mill it can operate successfully with teams?

Mr. Gilbert: That is all.

691 Examiner Burchmore: What is the ultimate fact that you have proved by this witness?

Mr. Greer: Commissioner Harlan seemed to think it impossible or a mill to be logged with teams and operate in the same section f country in competition with a mill which had a railroad serving that received tap line divisions, and it is in answer partially to that nquiry.

Examiner Burchmore: What do you mean by the word "impossile?"

Mr. Greer: It could not operate successfully.

Examiner Burchmore: You mean a financial success?

Mr. Greer: Yes.

Examiner Burchmore: The witness says if the mill was far nough away from the railroad, it could not afford to team it.

Mr. Greer: Certainly not. It is a question of the accessibility of he logs. When they are accessible, it can operate. And it is as to he effect on the prices.

Examiner Burchmore: It does not seem to me that a great deal f light is shed on the inquiry by this witness, but his testimony is n the record.

Mr. Cowan: I want to ask one question about your price basis. You said the base price was the price of the lumber f. o. b.

2692 the mill.

Mr. Gilbert: Well, I might correct that and say we make he price delivered to the customer.

Mr. Cowan: That is a very different proposition.

Mr. Gilbert: It is the same one, merely from the other side——

Mr. Cowan: That is a very different proposition.

Mr. Gilbert: There is no difference in the price we make between the two mills. We make the same price on the lumber that comes from the lumber mill on the Santa Fe that we do that comes from the mill at Diboll, quantity and kind being the same.

Mr. Cowan: The one at Diboll, then, really pays a net rate to the railroad of four cents per 100 pounds less than the one on the Santa Fe?

Mr. Gilbert: I did not understand your question, Judge.

Mr. Cowan: Oh, well, the railroad which serves the mill at Diboll belongs to the people that own the mill.

Mr. Gilbert: In the main it does; there are some stockholders in the lumber company that are not stockholders in the railroad company.

Mr. Cowan: Well, I guess they are pretty scarce, but I assume the controlling interest does, at all events.

2693 Mr. Gilbert: Yes, the vice-president of the lumber company owns no stock in the railroad company.

Mr. Cowan: Let us get to the question, though. Is it not a fact that the same interests substantially which ship the lumber from Diboll to Kansas City, for example, for delivery are out of pocket four cents per 100 pounds less than the one that ships on the Santa Fe?

Mr. Gilbert: The same people are. The lumber company is not.

Mr. Cowan: Well, the same people; I said the same interests. Now, that being so, do you say that it does not affect the price? And that is for the reason that you sell at the same figure?

Mr. Gilbert: Yes, sir; we do not consider the railroad in fixing the prices on the lumber.

Mr. Cowan: Now, is it not a fact that what Mr. White said was true, that the sales agent sells for what he can get in the market?

Mr. Gilbert: Yes.

Mr. Cowan: And the retail purchaser has as much to do in fixing the price as the manufacturer?

Mr. Gilbert: He has had for the last three years.

2394 Mr. Cowan: Now, that being so, is it not a fact that the man who gets $1.00 a thousand off in divisions has got just that much advantage if he has a mind to use it in making the trade?

Mr. Gilbert: If he gets that $1.00 division.

Examiner Burchmore: This seems to me largely a matter of argument. We know what the facts are in a general way, and I guess the Commission knows about as much now about the manner of selling lumber, and tap line divisions, and all other phases of this investigation as anybody else does, and I think this is a matter of argument. It seems so to me.

Mr. Garwood: I would like to suggest that in his hypothetical question counsel always leaves out the cost of operating the railroad, the interest on the bonds, and so forth.

Examiner Burchmore: I suppose it costs less to operate a railroad than a mule team or ox team. If it did not, there would not be any tram roads.

Mr. Gilbert: That would depend on the distance.

Mr. Garwood: I do not know what the cost of operating a mule team is.

Mr. Coleman: I would like to get something in the record there. Did I understand you to state that you knew of but two saw mills on the Santa Fe that log by team?

2395 Mr. Gilbert: I said there were only two that I know, yes, sir, and I am not positive if they do. I know they did for a time, but they may have tram roads now.

Mr. Coleman: Do you pretend to be very familiar with the situation on the Santa Fe?

Mr. Gilbert: No.

Mr. Coleman: Would it surprise you to know there are over fifty?

Mr. Gilbert: Well, yes, sir; it would surprise me to know there are over fifty.

Mr. Coleman: We will put in an exhibit before this hearing is over with, if you intend to hear the trunk lines later on, to show just how many mills we have now. In the Chicago Lumber & Coal case we filed one showing we had 79, I think, of the small mills that did not log by tram.

Examiner Burchmore: Would it surprise you to know that there are apparently more mills in these southwestern states that do not receive any divisions through their tram roads than there are mills that do?

Mr. Gilbert: I do not know anything about it. I have not given it any study.

Mr. Greer: That is largely accounted for from the fact
2696 that little mills spring up and cut off two or three hundred acres of land and then quit.

Mr. Gilbert: Yes, sir; some of the small mills will set for as much as 100,000 feet of lumber.

Examiner Burchmore: The records of the Commission, just reading them down alphabetically, down the line show that there are private tram roads which do not receive any allowances whatever, which have mileages as follows: 4, 8, 6, 2, 12, 27, 6, 4, 10, 13, and so on, and we have got more companies of that length that do not receive any divisions—of course they are not incorporated, but they handle 100 per cent of their traffic from the controlling industry, just about the same as these other companies have testified.

Mr. Gilbert: Well, the Southern Pine own and operate about 20 miles of logging road that is not owned by the Texas Southeastern Company.

Examiner Burchmore: I am simply reading those figures to indicate there are a vast number of mills that have private tram roads which do not receive any divisions. Perhaps I should not have read that into the record. I do not know that the fact requires any discussion at this time.

Mr. Garwood: Will you- Honor let us have a copy of that,
2697 or we will be glad to have it all go in the record.

Examiner Burchmore: I will see if a copy can be obtained.

Mr. Greer: Now about the four cents that this railroad receives; in order to get that it had to make an investment of something over $19,000 a mile and undertake all the burdens of both state and national laws with reference to railroads?

Mr. Gilbert: So I understand.

(Witness excused.)

Examiner Burchmore: We will now take the Thornton & Alexandria Railroad. Before we begin on this railroad, I might say that counsel for the Missouri & Louisiana Railroad, as I understand it, suggests it will be absolutely impossible for him to attend the hearing tomorrow.

Mr. Coleman: I think not. I think Mr. Sargent said he wanted to get through tomorrow, and felt he ought to come on tomorrow.

Examiner Burchmore: He is not present?

Mr. Walter: He could not stay over Sunday, is the way I understood it.

Examiner Burchmore: Is there any road that absolutely can not stay here until tomorrow? This will be the last case called
2698 this afternoon, and after this is heard, we will adjourn until 9:30 tomorrow morning.

2699 *The Thornton & Alexandria Railway.*

J. H. BELAND, was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: You are an officer of the Thornton & Alexandria Railway Company?

Mr. Beland: Yes, sir.

Examiner Burchmore: Are you also an officer of any lumber company?

Mr. Beland: The Stout Lumber Company.

Examiner Burchmore: The officers in those two companies I understand are substantially identical?

Mr. Beland: Practically so.

Examiner Burchmore: With only a slight difference?

Mr. Beland: Slight.

Examiner Burchmore: Now the majority of the capital stock in the two companies is held by the same persons, is it not?

Mr. Beland: Yes, sir.

Examiner Burchmore: What differences are there in the stock ownership?

Mr. Beland: None substantially.

Examiner Burchmore: Any differences aside from direct-
2700 ors' qualifying shares?

Mr. Beland: No, sir.

Examiner Burchmore: This railroad connects, as I understand it, with the Cotton Belt at Thornton, Arkansas?

Mr. Beland: Yes, sir.

Examiner Burchmore: Is that one of the termini?

Mr. Beland: Yes, sir.

Examiner Burchmore: Please describe the road commencing at that point?

Mr. Beland: It runs in a southerly direction to the county seat town of Hampton, Calhoun County.

Examiner Burchmore: And that is the terminus?

Mr. Beland: Yes, sir.

Examiner Burchmore: What is the total main line mileage?

Mr. Beland: 22.93 miles, I think.

Examiner Burchmore: There are several miles of side track?

Mr. Beland: I suppose there are three or four miles.

Examiner Burchmore: Where is the mill of the Stout Lumber Company located?

Mr. Beland: Near Thornton.

Examiner Burchmore: How near Thornton?

Mr. Beland: Half a mile from the station of the Cotton Belt Railroad; it is in the corporate limits of the town.

2701 Examiner Burchmore: And half a mile from the station?

Mr. Beland: About.

Examiner Burchmore: The station is farther down the track?

Mr. Beland: North of the mill.

Examiner Burchmore: The mill itself is right on the right of way of the Cotton Belt System?

Mr. Beland: Not on the right of way.

Examiner Burchmore: Well, I mean it is——

Mr. Beland: It is nearly within a few feet.

Examiner Burchmore: And the loading platforms of that mill are so placed that cars furnished by the Cotton Belt for the loading of lumber can be loaded right out of your platform right on to the car as it stands on the Cotton Belt right of way?

Mr. Beland: We have two loading tracks; one is such as you have described, and the other is entirely off any railroad company's right of way.

Examiner Burchmore: You use the two tracks impartially?

Mr. Beland: Yes, sir.

Examiner Burchmore: What about the location of this second side track?

Mr. Beland: Only for convenience in loading.

2702 Examiner Burchmore: But the Cotton Belt engines move the cars to and from that side track?

Mr. Beland: Not from this one.

Examiner Burchmore: They do not?

Mr. Beland: No, sir.

Examiner Burchmore: That connects with the rails of your company?

Mr. Beland: With the Thornton & Alexandria Railway.

Examiner Burchmore: How far does the locomotive move the car of lumber that comes from this loading track?

Mr. Beland: I should say 700 or 800 feet.

Examiner Burchmore: That movement is by your locomotive?

Mr. Beland: Yes, sir.

Examiner Burchmore: I address you as an officer of the Thornton & Alexandria Railway. When was this sawmill constructed or opened for operations?

Mr. Beland: I think it has been in existence about 25 years.

Examiner Burchmore: When was construction commenced on the railroad?

Mr. Beland: Perhaps 15 years ago.

Examiner Burchmore: When was the railroad incorporated?

2703 Mr. Beland: In the year 1904.

Examiner Burchmore: That incorporation was under the laws of Arkansas? and empowers this railroad to carry on the business of a common carrier railroad?

Mr. Beland: Yes, sir.

Examiner Burchmore: It holds itself out to the public as a common carrier railroad?

Mr. Beland: Yes, sir.

Examiner Burchmore: Is there any public in that vicinity?

(No reply.)

Examiner Burchmore: That is rather a blind question. There are other shippers on the line?

Mr. Beland: Yes, sir.

Examiner Burchmore: So this railroad then was constructed before it was incorporated?

Mr. Beland: Yes, sir.

Examiner Burchmore: The entire road?

Mr. Beland: It was partly completed, my understanding is, after it was incorporated.

Examiner Burchmore: How much of the road was in existence at the time of the incorporation?

Mr. Beland: I think about 18 miles, or something near that.

2704 Examiner Burchmore: It did not run up to the county seat?

Mr. Beland: It did not.

Examiner Burchmore: Are there any private tram lines connected with this road?

Mr. Beland: No.

Examiner Burchmore: The Stout Lumber Company owns no private tracks?

Mr. Beland: Private tram tracks?

Examiner Burchmore: I mean logging tram tracks?

Mr. Beland: The Stout Lumber Company has spurs from the town of Hampton connecting their logging road.

Examiner Burchmore: What is the extent of that logging road?

Mr. Beland: It varies; I think it is now about 5 miles long.

Examiner Burchmore: It is moved from time to time?

Mr. Beland: Yes, sir.

Examiner Burchmore: How long has this lumber company been known as the Stout Lumber Company?

Mr. Beland: About the first of this year.

Examiner Burchmore: It was formerly the Stout-Greer Lumber Company?

2705 Mr. Beland: Yes, sir.

Examiner Burchmore: Is it a corporation?

Mr. Beland: Yes, sir.

Examiner Burchmore: There was no change in that corporation except the change in the name?

Mr. Beland: That is all.

Examiner Burchmore: And the relations between the lumber company and the railroad company are substantially the same today that they were before the change in the name of the lumber corporation?

Mr. Beland: Yes, sir.

Examiner Burchmore: What was the purpose of the original construction of this road?

Mr. Beland: The original construction of the road was absolutely for the hauling of logs only, I think. I say that because I have not been connected with this company until about a year and a half ago.

Examiner Burchmore: Well, the history of the road at least until recent years would justify that thought?

Mr. Beland: Yes, sir.

Examiner Burchmore: What was the purpose of incorporating it?

2706 Mr. Beland: We wanted to do a general railroad business.

Examiner Burchmore: It was your desire to serve the public that prompted you to incorporate?

Mr. Beland: Yes, sir.

Examiner Burchmore: Your incorporation had no relation to the question of the legality of divisions?

Mr. Beland: It might at first have prompted us to have incorporated.

Examiner Burchmore: As a matter of fact was not that the primary consideration that led you to incorporate?

Mr. Beland: I do not know.

Examiner Burchmore: You have never heard?

Mr. Beland: No, sir.

Examiner Burchmore: Is it not a fact that the line of this railroad practically parallels the Rock Island?

Mr. Beland: Yes, sir.

Examiner Burchmore: And at no point is more than four or five miles away from the line of that railroad?

Mr. Beland: Nearly so.

Examiner Burchmore: Now do you think that the demands of that country required the building of a second line within five miles of one already there?

2707 Mr. Beland: I think our road was built first.

Examiner Burchmore: Then you think the Rock Island——

Mr. Beland: Was after the business.

Examiner Burchmore: Have you contemplated building over to meet the Rock Island?

Mr. Beland: We own a right of way at a distance of about 14 miles out from Thornton to a town called Tinsman. We purchased the right of way.

Examiner Burchmore: When did you purchase the right of way?

Mr. Beland: I do not know, but it has been two or three years ago, I think.

Examiner Burchmore: The purchase of that right of way is evidence, is it not, of the active intention of this company to build across and make a connection with the Rock Island?

Mr. Beland: We had thought of it and think of it yet.

Examiner Burchmore: You have had some negotiations of some character or another with the Rock Island line looking to that result?

Mr. Beland: A long time ago they were.

Examiner Burchmore: About three or four years ago?

Mr. Beland: I think so.

2708 Examiner Burchmore: Did the question of divisions of freight rates enter into those negotiations at all?

Mr. Beland: Yes, sir.

Examiner Burchmore: Did you enter into any tentative contract with the Rock Island covering divisions?

Mr. Beland: I think not.

Examiner Burchmore: But the proposition was discussed?

Mr. Beland: It was.

Examiner Burchmore: You now receive divisions on lumber that moves out over your line in connection with the Cotton Belt System?

Mr. Beland: Yes, sir.

Examiner Burchmore: What are those divisions?

Mr. Beland: From one to two and a half cents.

Examiner Burchmore: Is that as liberal a basis of divisions as that which obtains elsewhere?

Mr. Beland: That seems to be their scale along in our territory.

Examiner Burchmore: Well, the Rock Island gives larger divisions than that, according to the evidence in this case, does it not?

Mr. Beland: In this case?

2709 Examiner Burchmore: Yes, in this proceeding?

Mr. Beland: Yes, sir.

Examiner Burchmore: And I presume you would naturally anticipate that the result of making a connection with the Rock Island would be a more generous division?

Mr. Beland: Yes, sir.

Examiner Burchmore: You had that thought in mind?

Mr. Beland: Yes, sir, and also to help us out in the way of securing cars during the car shortage.

Examiner Burchmore: Certainly, there are other advantages which come from having two outlets to the market rather than one. I am simply endeavoring to find out what the facts are. How long has this second side track into your plant, the one which is farther away from the Cotton Belt, been in existence?

Mr. Beland: Long ago, at least two years, I should judge.

Examiner Burchmore: Not more than two or three years?

Mr. Beland: Well, I will say that. It perhaps has been in there five or six years.

Examiner Burchmore: What is the total capital stock of this railroad corporation?

Mr. Beland: $50,000.

Examiner Burchmore: Is that all issued?

2710 Mr. Beland: Yes, sir.

Examiner Burchmore: Was it paid for in cash?

Mr. Beland: It was paid for by a dividend which was declared by the lumber company.

Examiner Burchmore: It was a dividend on the lumber company's stock paid in the form of stock in another company?

Mr. Beland: Yes, sir, that is my understanding of that. This transaction was before I became manager.

Examiner Burchmore: But that was the substance of the transaction?

Mr. Beland: Yes, sir.

Examiner Burchmore: What is the weight of the rail with which this road is built?

Mr. Beland: We have six miles of 60 pound steel, new steel, practically four miles of 40 pound steel, and the balance is either 35 or 30 or 40 pound.

Examiner Burchmore: The road is well built?
Mr. Beland: Yes, sir.
Examiner Burchmore: Have you heard of any road down in that vicinity that is not well built, a short line road?
Mr. Beland: No.
2711 Examiner Burchmore: Have you any station buildings?
Mr. Beland: We have one.
Examiner Burchmore: At what point?
Mr. Beland: At Hampton.
Examiner Burchmore: That is the county seat that you referred to?
Mr. Beland: Yes, sir.
Examiner Burchmore: How long have you had that building?
Mr. Beland: Ever since the road was built into there.
Examiner Burchmore: That is two or three years?
Mr. Beland: Yes, sir.
Examiner Burchmore: And do you know what that building cost?
Mr. Beland: I should judge it cost $600 or $700.
Examiner Burchmore: Frame?
Mr. Beland: Yes.
Examiner Burchmore: Has a ticket office?
Mr. Beland: Yes, sir.
Examiner Burchmore: And waiting room?
Mr. Beland: White and colored.
Examiner Burchmore: A storage room for freight and so forth?
2712 Mr. Beland: Yes, sir.
Examiner Burchmore: How many engines have you?
Mr. Beland: Four.
Examiner Burchmore: Do you own all those locomotives?
Mr. Beland: Yes, sir.
Examiner Burchmore: Operate them all?
Mr. Beland: Yes, sir.
Examiner Burchmore: Does the lumber company own any locomotives?
Mr. Beland: One.
Examiner Burchmore: And with that locomotive it switches the logs on their tram spur?
Mr. Beland: It is used as a construction engine for the building of these spurs.
Examiner Burchmore: Then I understand that the logs are taken from the private tram spurs by the locomotives of the railroad company?
Mr. Beland: Yes.
Examiner Burchmore: What compensation is paid for that service?
Mr. Beland: $1.25 per thousand feet, log scale.
Examiner Burchmore: What does that cover?
2713 Mr. Beland: That is a switching charge from Hampton to the woods.

Examiner Burchmore: The woods are all beyond Hampton?
Mr. Beland: Yes.
Examiner Burchmore: Then from Hampton up to the mill what do you receive?
Mr. Beland: We get a division from the railroad company.
Examiner Burchmore: The lumber that moves out from points on your line is all billed from Hampton?
Mr. Beland: No, sir.
Examiner Burchmore: From the mill?
Mr. Beland: Thornton.
Examiner Burchmore: From Thornton on your line?
Mr. Beland: Yes.
Examiner Burchmore: Who issues that bill of lading, who signs that bill of lading?
Mr. Beland: An employé of the company.
Examiner Burchmore: Of the Thornton & Alexandria?
Mr. Beland: Yes, sir.
Examiner Burchmore: Where is that employé?
Mr. Walter: Mr. Halpin is here and is more familiar with that branch of the work and with the financial and other statisti-
2714 cal information. Mr. Beland was introduced only for the physical operations.
Examiner Burchmore: What is the character of your rolling stock other than locomotives?
Mr. Beland: We have 3 box cars, 6 flats, one caboose, one combination passenger and baggage car, and 50 some logging cars.
Examiner Burchmore: Any other equipment?
Mr. Beland: No, I think not.
Examiner Burchmore: Any track scales?
Mr. Beland: No, sir.
Examiner Burchmore: Have you any team tracks on which carload freight could be delivered?
Mr. Beland: Team tracks? Sidings?
Examiner Burchmore: Yes, side tracks.
Mr. Beland: Yes.
Examiner Burchmore: They call them team tracks in a big city. Your cars are all equipped with the necessary safety devices?
Mr. Beland: The log cars are not, but the other cars that we pull in our passenger train are all equipped with air, automatic couplers, self-dumping ash pans for the engine. We try to make it a
2715 standard train.
Examiner Burchmore: Telegraph or telephone service?
Mr. Beland: Yes, sir.
Examiner Burchmore: Don't you own that yourself?
Mr. Beland: Yes.
Examiner Burchmore: The lumber company uses it?
Mr. Beland: Yes.
Examiner Burchmore: Do they pay rent?
Mr. Beland: I don't know.
Examiner Burchmore: How many track crews are there on the road?

Mr. Beland: Three.

Examiner Burchmore: Do they keep in order the private tracks of the lumber company?

Mr. Beland: Not the private tracks.

Examiner Burchmore: Who does maintain those logging spurs?

Mr. Beland: It is in their logging department.

Examiner Burchmore: Of the mill company?

Mr. Beland: Of the mill company?

Examiner Burchmore: The railroad has nothing to do with that in any way, shape or form?

Mr. Beland: No.

2716 Examiner Burchmore: Have you any station employés.

Mr. Beland: We have one.

Examiner Burchmore: He is at——

Mr. Beland: Hampton.

Examiner Burchmore: Does he devote his entire time to this service?

Mr. Beland: Yes, sir.

Examiner Burchmore: He does not work for the lumber company?

Mr. Beland: No.

Examiner Burchmore: It is not the storekeeper?

Mr. Beland: No.

Examiner Burchmore: How many train crews in the railroad service?

Mr. Beland: There are three train crews.

Examiner Burchmore: One of those locomotives is an emergency engine?

Mr. Beland: Yes, sir.

Examiner Burchmore: Does the lumber company have any train crews?

Mr. Beland: No.

Examiner Burchmore: How do they operate their log-

2717 ging cars?

Mr. Beland: Except this one construction engine I have spoken of, which is owned by the lumber company.

Examiner Burchmore: Does that construction engine lie idle a large part of the time, or are they building tracks all the time?

Mr. Beland: They use it practically every day more or less.

Examiner Burchmore: Now what clerks or other employés has this railroad company besides those mentioned?

Mr. Beland: There is a charge made against the railroad company of $100 per month which the lumber company receives for services that different employés in the office might perform for the railroad company.

Examiner Burchmore: How much time do the lumber company employés put in for the railroad company under that $100 charge?

Mr. Beland: It requires a good deal of time, with all the reports which have been made.

Examiner Burchmore: Do you think the railroad company gets its money's worth?

Mr. Beland: I think so.

Examiner Burchmore: What salaries are paid to the gen-
2718 eral officers of the railroad company, I refer to such officers as are not also employed by the lumber company.

Mr. Beland: Mr. Walter referred to Mr. Halpin, who is here, who can testify to all that, as to rates and such as that. I am not really posted on those things.

Examiner Burchmore: Not even as to rates of salaries?

Mr. Beland: Some of them I am.

Examiner Burchmore: Can you advise me with respect to your train service and if so, make a full statement.

Mr. Beland: Train service?

Examiner Burchmore: Yes.

Mr. Beland: Well, we have a train that leaves Thornton in the morning about seven o'clock and arrives at Hampton about nine something, I forget just what, and returns in time to make connections with the northbound Cotton Belt train known as Train No. 2.

Examiner Burchmore: It makes one round trip a day?

Mr. Beland: Yes, sir, in the morning.

Examiner Burchmore: That carries passengers?

Mr. Beland: Yes, sir.

Examiner Burchmore: Does it make any trip in the afternoon?

2719 Mr. Beland: Not that train.

Examiner Burchmore: Another train?

Mr. Beland: Logging train.

Examiner Burchmore: Then you have two trains?

Mr. Beland: Yes.

Examiner Burchmore: Have you any other trains?

Mr. Beland: Only the log train and this one mail and passenger train.

Examiner Burchmore: Do both of those trains run on regular schedule?

Mr. Beland: Not the log train.

Examiner Burchmore: Do you have a timetable?

Mr. Beland: We have, for the mail train.

Examiner Burchmore: If desirable you can file it. Do you carry mail?

Mr. Beland: Yes, sir.

Examiner Burchmore: Express matter?

Mr. Beland: Yes.

Examiner Burchmore: Does any express company operate on your line, or do you carry express as freight?

Mr. Beland: No, we carry express packages.

Examiner Burchmore: For what company?

2720 Mr. Beland: For ourselves.

Examiner Burchmore: The Adams Express Company does not operate on your line or any other company of that kind?

Mr. Beland: No.

Examiner Burchmore: You charge freight rates?

Mr. Beland: No, we handle small packages and charge the express rate. As I said, I would like to have you ask those questions of Mr. Halpin.

Examiner Burchmore: As to the details I will, but I thought you might know as to the general business. I will ask him as to the freight traffic and passenger traffic and for the figures. You have supplies of bills of lading and waybills and other stationery of that kind?

Mr. Beland: Yes, sir.

Examiner Burchmore: Do you wish to testify in regard to the manner of billing freight?

Mr. Beland: No.

Examiner Burchmore: I believe you said it was your effort to comply with all the state and federal laws that govern the conduct of common carrier railroad companies?

Mr. Beland: It is.

Examiner Burchmore: Can you advise me with respect to
2721 the profits which have been made from the operation of this railway?

Mr. Beland: I think our net profit for the year ending last June was about $1,500.

Examiner Burchmore: What were the revenues on which you made that profit?

Mr. Beland: Passenger and express and——

Examiner Burchmore: I mean the amount, or shall I ask the question of another witness?

Mr. Beland: The other witness, I prefer.

Examiner Burchmore: Has this railroad any bonds?

Mr. Beland: No, sir.

Examiner Burchmore: Do you owe any money to the lumber company?

Mr. Beland: They hold a note against the railroad company for $80,000.

Examiner Burchmore: And the capital stock you said was $50,000?

Mr. Beland: Yes.

Examiner Burchmore: What did the road cost to build?

Mr. Beland: Let me explain. This road when it was turned over or sold to the Thornton & Alexandria Company was a narrow gauge road, and was not extended into Hampton.

2722 Examiner Burchmore: And you paid $50,000 for a narrow gauge road?

Mr. Beland: Yes, sir.

Examiner Burchmore: That is what you paid for the road.

Mr. Beland: Yes.

Examiner Burchmore: And some equipment?

Mr. Beland: And the narrow gauge equipment.

Examiner Burchmore: Then you changed your narrow gauge equipment and standardized the road?

Mr. Beland: Yes, sir, and got this fund from the Stout Lumber Company.

Examiner Burchmore: And you also extended it to this other point?

Mr. Beland: Yes, sir.

Examiner Burchmore: What did all those changes cost?

Mr. Beland: I could not give you the figures.

Examiner Burchmore: Is another witness present who can?

Mr. Beland: I believe he can.

Mr. Walter: Mr. Halpin will give you that.

Examiner Burchmore: I believe that is all with this witness.

Mr. Walter: When you bought that line, it consisted only
2723 of a narrow gauge extending about 18 miles?

Mr. Beland: That is my recollection.

Mr. Walter: That was standardized and extended into Hampton?

Mr. Beland: Yes, sir.

Mr. Walter: Hampton is the county seat?

Mr. Beland: Yes, sir.

Mr. Walter: About how many people live at Hampton?

Mr. Beland: I should judge 800 to 1,000.

Mr. Walter: How many people live along or tributary to the Thornton & Alexandria Road?

Mr. Beland: 4,000 or 5,000 people.

Mr. Walter: All the service from Hampton to Thornton either passenger or freight is over your line?

Mr. Beland: Yes.

Mr. Walter: Your engine goes down to the woods where the logs have been loaded by the lumber company and hauls those logs up to Hampton, for which you receive a switching charge?

Mr. Beland: Yes.

Mr. Walter: The railroad company then take those logs down to Thornton and unload them?

Mr. Beland: Yes, sir.

2724 Examiner Burchmore: The railroad unloads them?

Mr. Beland: Yes, sir.

Mr. Walter: That $1.25 switching charge covers that service for the unloading as well as bringing them up to Hampton?

Mr. Beland: Yes, sir.

Examiner Burchmore: But not for the movement between——

Mr. Walter: The movement from Hampton down to Thornton is covered by the joint rate.

Mr. Beland: Yes.

Mr. Walter: Out of which you receive a division of one and a half to two cents?

Mr. Beland: Yes.

Mr. Walter: You have now a connection with the Cotton Belt?

Mr. Beland: Yes.

Mr. Walter: What is the great advantage of an additional connection with the Rock Island?

Mr. Beland: To secure empties during car shortage and——

Mr. Walter: I will ask you whether or not that is one of the most important considerations?

Mr. Beland: Yes.

2725 Mr. Walter: In having more than one connection.

Mr. Beland: Yes, sir, and to reach other territories.

Examiner Burchmore: What are the other important considerations?

Mr. Walter: Is there any additional consideration in having a second connection other than the additional territory you can reach on joint rates and the additional car supply? Besides the other territory you would reach on the joint rates and the car supply, is there any consideration?

Mr. Beland: We should get better divisions.

Mr. Walter: In the building of that road have you recently made any improvements in grades or anything of that sort?

Mr. Beland: We are making an improvement right now.

Mr. Walter: Is that an extensive improvement? About how much are you putting into the improved right of way?

Mr. Beland: We are reducing a couple of curves in a distance of about a mile at a cost of five or six thousand dollars.

Mr. Walter: How far is it from Hampton to Thornton?

Mr. Beland: Nearly 23 miles.

Mr. Walter: Has the Stout Lumber Company cut over a good portion of its holdings?

2726 Mr. Beland: It has quite a bit.

Mr. Walter: Is that territory occupied to any extent by farmers or producers of fruit?

Mr. Beland: Yes, sir.

Mr. Walter: What is the general nature of the freight traffic which you handle other than forest products?

Mr. Beland: General merchandise of all kinds, flour and feed stuffs.

Mr. Walter: Any cotton or cottonseed?

Mr. Beland: Cotton and cottonseed.

Mr. Walter: And other agricultural products?

Mr. Beland: Yes, sir.

Mr. Walter: Your line serves everybody that comes to you for service either in passenger or freight?

Mr. Beland: Yes, sir, we cater to it.

Mr. Walter: You are building up business as much as you can?

Mr. Beland: Yes, sir.

Mr. Walter: Has the lumber company, if you know, made any sale of its lands or does it contemplate any sales looking to colonization?

Mr. Beland: We are experimenting with our land with a
2727 view of selling it.

Mr. Walter: Just explain to what extent such experimentation by the lumber company has been had.

Mr. Beland: We have expended in the last two or three years about $30,000 on that line.

Mr. Walter: What were you doing?

Mr. Beland: Raising fruit, vegetables, corn, hay, peanuts and alfalfa.

Mr. Walter: In other words, demonstrating the possibility of the soil along the line of road?

Mr. Beland: We can raise most anything.

Mr. Walter: And that was the purpose of this experimental farming?

Mr. Beland: Yes, sir.

Mr. Walter: Can you give me some idea of the extent of the orchard which you put out?

Mr. Beland: We have an orchard of about 8,000 Alberta trees which are beginning to bear, and we shipped two cars from there this year.

Mr. Walter: That will increase?

Mr. Beland: Besides that we have a couple of thousand plum and a thousand or so pear trees.

2728 Mr. Walter: I will ask whether or not you can express an opinion as to whether the general business along your line of railroad will increase in greater proportion than the forest products shipped out?

Mr. Beland: I think it will.

Mr. Walter: Have you not a depot at Thornton?

Mr. Beland: We use—no, we have not.

Mr. Walter: How much longer will the cut of timber last which is now owned by the lumber company, in the ordinary process of cutting?

Mr. Beland: It ought to last 30 years.

Mr. Walter: Will that compel additional building of spur lines?

Mr. Beland: Yes.

Mr. Walter: Will there be any extension of main line?

Mr. Beland: No extension of main line.

Mr. Walter: Only the lumber spurs will be taken up and moved?

Mr. Beland: The lumber spurs perhaps will be built out a distance of 18 to 20 miles.

Mr. Walter: How many lumber shippers have you or other shippers in carload lots of forest products other than the Stout Lumber Company?

2729 Mr. Beland: We have a couple of dozen, I expect, of different concerns.

Mr. Walter: Has the Stout Lumber Company any connection with those concerns?

Mr. Beland: None whatever.

Mr. Cowan: Ask him to file a list or give it now.

Mr. Walter: Can you furnish a list or state now the names right into the record, of the various shippers? If you have a list there, hand it to the stenographer.

Mr. Beland: Mr. Halpin I think has that statement.

Mr. Walter: Here is a list that we offer as an exhibit to his testimony, to be copied into the record. Read the list.

Examiner Burchmore: I do not think we had better copy it.

Mr. Cowan: To save time I was asking him to read the names of the concerns on his line.

Mr. Walter: Also a list of the merchants of Hampton. It is very short.

Examiner Burchmore: It may be copied in then.

(The lists are as follows:)

List of Shippers on T. & A. Ry.

The Stout Lumber Company, Mfrs. & Wholesale Lumber.
Hampton Lumber Co., " Hardwood Lumber.
2730 Hampton Stave Co., Staves, Heading, Stave Bolts, etc.
Fordyce Manufacturing Co., Spoke Timber.
W. A. Matthews & Co., Staves & Heading.
National Cooperage & Wooden W. Co., Staves and Stave Bolts.
J. C. Hollingsworth, Cotton Seed.
Furlow & Son, Cotton.
W. C. Dunn, Cotton.
J. M. Dunn, Cotton Seed.
H. B. Dunn, Cotton.
Moro Fruit Farm, Shippers of Fruit.
Virginia Carolina Chemical Co., Fertilizers.
E. L. Koonce, Contractor.

The above are all Carload shippers.
None of the above have any pecuniary interest in this line, except some of the stockholders of this Company are stockholders in The Stout Lumber Company and the Moro Fruit Farm, and all are wholly dependent upon this line to move their products to market.

2731 *List of Hampton Merchants.*

Biggers, Furlow & Son, Hardware.
Furlow & Son, General Merchandise.
H. B. Dunn, do.
Hampton Grocery Co., do.
W. C. Dunn, do.
Hampton Pharmacy Co., Drugs.
North Side Grocery Co., Groceries & Gen. Mdse.
A. A. Ables, General Merchandise.
J. B. Lucas, Restaurant.
J. B. Wood Feed Store, Feed, Hay, etc.
J. C. Hollingsworth, Cotton Gin.
J. E. Sturgis, General Merchandise.
Hampton Lumber Yard, Retail Lumber.
W. J. Autrey, General Merchandise.
J. B. Ritchie, do.
J. M. Dunn, do.
J. E. Upton, do.
Cobb & Son, do.
J. B. Ritchie, Benson, Ark., Fertilizers.

None of the above have any pecuniary interest in this line
2732 except some of the stockholders of this Company are stockholders in the Hampton Lumber Yard, and all are wholly dependent upon this line to procure their stocks of merchandise.

Mr. Walter: In this extension to Hampton, let me ask whether the public made any donations to secure that extension?

Mr. Beland: They did.

Mr. Walter: To what extent?

Mr. Beland: They gave us right of way and terminal facilities, and a bonus of $2500 cash.

Mr. Walter: What is the value of the consideration you received, counting in the cash and terminal?

Mr. Beland: I should judge $10,000.

Mr. Walter: That was all done in order to get the facilities afforded by you as a common carrier?

Mr. Beland: Yes, sir, they solicited us very strongly, I understand.

Mr. Walter: Do the Arkansas authorities recognize you as a common carrier or not?

Mr. Beland: Yes, sir.

Examiner Burchmore: Have they given you any special
2733 recognition different in character from what you might term the recognition that you have received at the hands of the Interstate Commerce Commission? I mean this Commission has received your tariffs and annual reports and written you letters.

Mr. Beland: Along the same lines.

Examiner Burchmore: And no further?

Mr. Beland: And no further.

Mr. Gaughan: In Arkansas they do not have the formal recognition like they do in Texas.

Examiner Burchmore: That is what I meant. Does this railroad own its entire right of way?

Mr. Beland: With the exception of a very little bit that is tied up in litigation, I guess.

Examiner Burchmore: Are you familiar with the terms of a contract which seems to have been entered into on the 11th day of January, 1909, between this railroad company and the Stout-Greer Lumber Company covering the matter of log movement?

Mr. Beland: No, I do not recall it.

Examiner Burchmore: Is it not a fact that——

Mr. Walter: Perhaps you had better ask Mr. Halpin about it. He knows about it.

2734 Examiner Burchmore: Just one question about it. Is it not a fact that the railroad company transports the mill employees free of charge?

Mr. Beland: I think that that was the contract, made in the form of a contract.

Examiner Burchmore: Do the employees pay fares as a matter of fact?

Mr. Beland: The employees pay fare on the road? No.

Examiner Burchmore: You mean lumber company's employees?

Mr. Beland: No.

Examiner Burchmore: Who repairs these locomotives belonging to the railroad company?

Mr. Beland: The lumber company.

Examiner Burchmore: And they also repair the cars?

Mr. Beland: Yes.

Examiner Burchmore: What do they charge for those repairs?

Mr. Beland: I think there is 10 per cent added to the actual cost.

Examiner Burchmore: There seems to be a provision in this contract to that effect. This contract I may say also purports to provide for the $1.25 charge per thousand feet to reimburse the railroad company for moving the logs over the tram road
2735 up to Hampton. Is there any further examination of this witness?

Mr. Cowan: I want to ask a few questions. What is the extent of the holdings of timber by the lumber company?

Mr. Beland: About 70,000 acres of timber land.

Mr. Cowan: The extent of the land that has been cut off is how much?

Mr. Beland: I suppose there is 20,000, maybe 30,000 acres.

Mr. Cowan: The amount of the service performed in the delivery of lumber by your company to the St. Louis Southwestern, what service do you perform, any?

Mr. Beland: I do not understand.

Mr. Cowan: Well, the lumber is delivered from your mill to the Cotton Belt.

Mr. Beland: Yes, sir.

Mr. Cowan: How much service does your railroad company perform?

Mr. Beland: Sometimes the railroad pushes them on to the Cotton Belt side tracks.

Mr. Cowan: Generally speaking, how is it done?

Mr. Beland: The Cotton Belt Railroad takes the load from the mill siding.

2736 Mr. Cowan: And puts the cars there to be loaded?

Mr. Beland: Yes.

Mr. Cowan: Now you haul lumber for other concerns along the line of your road?

Mr. Beland: Yes, sir.

Mr. Cowan: Are they just little sawmills?

Mr. Beland: Yes, sir.

Mr. Cowan: What rate of freight do you charge them?

Mr. Beland: I think the Arkansas Court tariff.

Examiner Burchmore: We have another specialist here on freight rates for this company.

Mr. Cowan: I have no further questions that I know of.

Mr. Coleman: No questions.

Examiner Burchmore: What was the other company for which you testified?

Mr. Beland: The Bearden & Ouachita River.

Examiner Burchmore: Any relation between those two railroads?

Mr. Beland: None whatever.

Examiner Burchmore: Or between the lumber companies?

Mr. Beland: No, they are separate and distinct companies.

Examiner Burchmore: Are they in the same general vicinity?

2737 Mr. Beland: Yes, sir, about eight miles apart.

Examiner Burchmore: And you are on the ground as the chief operating officer for both companies?

Mr. Beland: Yes, sir. I might correct the statement. I have one share of stock in the Cotton Belt Lumber Company, and also own stock in the Stout Lumber Company.

Examiner Burchmore: You are a director, I suppose?

Mr. Beland: Yes, sir.

(Witness excused.)

B. E. HALPIN was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Mr. Halpin, you are an officer of this lumber company, and also of the railroad company?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Is your entire compensation paid by either company?

Mr. Halpin: There is $50.00 a month of my salary charged against the railroad company.

Examiner Burchmore: Charged against the railroad?

Mr. Halpin: Yes.

2738 Examiner Burchmore: What, does the railroad give it to you?

Mr. Halpin: The railroad does not. In fact, the railroad does not handle any cash, only in the hands of the agent at the station.

Examiner Burchmore: Most of its cash is handled for it by the lumber company?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Any other officers of this railroad that receive salaries?

Mr. Halpin: No.

Examiner Burchmore: Aside from Mr. Beland?

Mr. Halpin: No, he does not draw any salary from the railroad.

Examiner Burchmore: Is it charged to the lumber company?

Mr. Halpin: Yes.

Examiner Burchmore: I thought he was not an officer of the lumber company?

Mr. Halpin: Yes, he testified he was.

Examiner Burchmore: No other officers of the railroad company receive salaries?

Mr. Halpin: No, sir.

2739 Examiner Burchmore: Is there any billing accompanying the movement of logs to the mill?

Mr. Halpin: No, sir.

Examiner Burchmore: Does the conductor make a report on his arrival at the mill of the number of logs he has brought in?

Mr. Halpin: Yes, sir.

Examiner Burchmore: That report is entered on the books of the railroad company?

Mr. Halpin: The number of loads, yes.

Examiner Burchmore: The figures he brings in *on* entered on the books of the company?

Mr. Halpin: The number of cars.

Examiner Burchmore: And that is the accounting basis for the charge of $1.25?

Mr. Halpin: No, not the report the conductor turns in. That is the report of the man who scales the logs in the woods.

Examiner Burchmore: He is a lumber employee?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Then the lumber company renders to the railroad company the statement which is the basis of this
2740 $1.25 settlement?

Mr. Halpin: Yes, sir.

Examiner Burchmore: And I suppose the railroad company exercises some check on that statement?

Mr. Halpin: Well, the check of the number of cars brought in.

Examiner Burchmore: Does the Thornton & Alexandria Railroad issue bills of lading on the outbound movement of lumber?

Mr. Halpin: Yes, sir.

Examiner Burchmore: In all cases?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Do you issue any way bills?

Mr. Halpin: No. It is handled on transfer billing. We give the Cotton Belt agent an extra copy of the bill of lading.

Examiner Burchmore: And that acts as transfer billing?

Mr. Halpin: Yes, sir.

Examiner Burchmore: And he makes out a waybill over his line?

Mr. Halpin: I presume he does.

Examiner Burchmore: Are the rates on lumber over this
2741 line on a milling in transit basis?

Mr. Halpin: Yes, sir.

Examiner Burchmore: But the lumber is billed as originating at the junction point, is it not?

Mr. Halpin: It is billed as originating at Thornton, on the Thornton & Alexandria Railroad.

Examiner Burchmore: But what is the necessity for a milling in transit privilege if it originates at the mill?

Mr. Halpin: Well, we need the money.

Examiner Burchmore: Well, I know it, but you could get the money without having a milling in transit arrangement, if the fact is your lumber is billed as originating at the mill.

Mr. Halpin: Well, that is the way the bills of lading read.

Examiner Burchmore: The bills of lading read as though the lumber originated at the mill?

Mr. Halpin: Yes.

Examiner Burchmore: And not originating back at Hampton?

Mr. Halpin: No, because our mill is not located at Hampton, and we could not very well do that.

2742 Mr. Walter: The bill of lading does not show where the freight originated, but where it is billed from.

Mr. Halpin: Yes, sir, that is all.

Examiner Burchmore: Is the rate applied a straight rate from Hampton, or is it a re-shipping rate from Hampton?

Mr. Halpin: Well, of course we understand it as being a——

Examiner Burchmore: Let me go at this a little differently. Do you have joint through rates on lumber published from Hampton?

Mr. Halpin: Yes, sir.

Examiner Burchmore: To intrastate points?

Mr. Halpin: Yes, sir.

Examiner Burchmore: And those rates are the same as the rates from Thornton on your line to interstate points?

Mr. Halpin: Now I said—we have a tariff covering rates on lumber from Hampton. It is a proportional tariff applicable to interstate shipments. It is not a through rate. We have not issued a joint tariff naming rates.

Examiner Burchmore: You mean you do not have any joint tariffs?

Mr. Halpin: We have joint tariffs, but not on lumber from Hampton out.

2743 Examiner Burchmore: Do you have joint tariffs on lumber from Thornton out?

Mr. Halpin: The Thornton & Alexandria has not.

Examiner Burchmore: As a matter of fact it is explained to me that the Cotton Belt publishes its rate in this fashion; they name a rate from Thornton on their line to St. Louis, for example, and make that rate applicable on logs that have come in to Thornton.

Mr. Halpin: Yes, sir.

Mr. Walter: And the bill of lading is applicable from the junction.

Examiner Burchmore: I believe the Cotton Belt's statements bear that out?

Mr. Halpin: Yes, sir.

Examiner Burchmore: But the division received on those joint rates is intended in a way to cover the logs into the mill?

Mr. Halpin: Yes.

Examiner Burchmore: For as a matter of fact on a great deal of this traffic you do not perform any service on the lumber.

Mr. Halpin: Not after it is loaded into the car.

2744 Examiner Burchmore: But after it has become lumber?

Mr. Halpin: No.

Examiner Burchmore: For half of your traffic or perhaps more is loaded on that track which is a part of the Cotton Belt System.

Mr. Halpin: Yes.

Examiner Burchmore: And loaded directly on the Cotton Belt tracks?

Mr. Halpin: Yes.

Examiner Burchmore: What percentage of the lumber is so loaded?

Mr. Halpin: I have no means of knowing. We do not keep any record of it. I imagine 75 per cent of it.

Examiner Burchmore: That is all I wanted, just a general idea. The rate of freight you paid to St. Louis and other interstate points is the same that you would pay if you were located directly on the Cotton Belt and had no railroad connection other than the Cotton Belt?

(No reply.)

Examiner Burchmore: You pay the regular Cotton Belt local rate?

Mr. Halpin: Yes, sir.

2745 Examiner Burchmore: What are your divisions of the Cotton Belt rates?

Mr. Halpin: On lumber?

Examiner Burchmore: On lumber?

Mr. Halpin: One cent to two and a half cents, you might say from nothing to two and a half cents; there are some shipments we do not get a division on.

Examiner Burchmore: Shipments to what territory?

Mr. Halpin: Texas, except on the Cotton Belt.

Examiner Burchmore: You receive no divisions or shipments to points in Texas off the Cotton Belt?

Mr. Halpin: No.

Examiner Burchmore: But to other points you receive from one to two and a half cents?

Mr. Halpin: Yes, sir.

Examiner Burchmore: There is not any traffic on which you receive more than two and a half cents?

Mr. Halpin: No.

Examiner Burchmore: Have you ever received more than two and a half cents?

Mr. Halpin: Yes, sir, we did some years ago.

Examiner Burchmore: How long ago?

2746 Mr. Halpin: I should say two or three years ago.

Examiner Burchmore: What was that higher division?

Mr. Halpin: We received three cents to points in Texas on the Cotton Belt.

Examiner Burchmore: That accords with my understanding of your divisions. What is the extent of your freight traffic, give us a general idea?

Mr. Halpin: Our total freight for our last fiscal year amounts to $38,800.

Examiner Burchmore: Do you know the tonnage?

Mr. Halpin: Well, I have it here some place.

Examiner Burchmore: I will withdraw that question for the moment. How much of that represented earnings on logs at this $1.25 rate?

Mr. Halpin: Well, I have that here somewhere; $24,169.

Examiner Burchmore: $24,000 on the logs?

Mr. Halpin: Yes.

Examiner Burchmore: Well, you mean that was the division you received from the Cotton Belt?

Mr. Halpin: No. I understood you to say at the $1.25 rate.

Examiner Burchmore: Yes.

2747 Mr. Halpin: Yes, sir, that is what it amounted to.

Examiner Burchmore: How much did you get from the Cotton Belt?

Mr. Halpin: It amounted to about $9,000.

Examiner Burchmore: Does this $1.25 charge on the logs amount to more than the charge you would get out of the Cotton Belt on the lumber?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Is not that $1.25 credited in any way against the freight charges on the outbound movement?

Mr. Halpin: No—well, it is credited to the same account that the percentage from the Cotton Belt is credited to, freight revenue account.

Examiner Burchmore: If the lumber company has paid $1.25 on the logs, the lumber company is not permitted to pay any less on the lumber out; it pays the full rate on the lumber out, nevertheless.

Mr. Halpin: Yes, sir.

Examiner Burchmore: How much did you receive from passenger traffic, mail and express and such sources?

Mr. Halpin: $4,135.

Examiner Burchmore: Making your total revenue how much?

2748 Mr. Halpin: $42,995 for last year.

Examiner Burchmore: What were your expenses last year?

Mr. Halpin: About $41,500.

Examiner Burchmore: Then you had a profit of how much?

Mr. Halpin: About $1500.

Examiner Burchmore: The preceding year you had a larger profit than that on a smaller revenue?

Mr. Halpin: I do not remember what our figures were.

Examiner Burchmore: I think for the fiscal year 1909 the figures apparently are $35,540.84 revenue, and $32,172.78 of expense, making a net revenue of $3,368.06. The major portion of that I assume, was applied as interest on your loan?

Mr. Halpin: Yes, sir.

Examiner Burchmore: You have not any surplus?

Mr. Halpin: Well, we have——

Examiner Burchmore: Actual cash surplus, I mean.

Mr. Halpin: Not in cash, but we have a surplus of about $8,000.

Examiner Burchmore: That is in the road?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Do you keep a separate bank ac-

2749 count from the lumber company?

Mr. Halpin: No.

Examiner Burchmore: Do you keep separate books, not separate accounts, but separate books.

Mr. Halpin: Yes, sir.

Examiner Burchmore: Are those books kept in accordance with the Commission's system of accounting?

Mr. Halpin: Yes, sir, strictly.

Examiner Burchmore: How long have they been so kept?

Mr. Halpin: Ever since the Commission inaugurated the new system of accounts, the last two or three years or three or four years.

Examiner Burchmore: What is the extent of your passenger traffic, is there any figure you can give other than the revenue?

Mr. Halpin: Yes, sir, we carried 4,562 revenue passengers last year.

Examiner Burchmore: That is 15 or 20 a day, apparently?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Do the officers of your company receive free passes over other railroads?

Mr. Halpin: Two of us do.

Examiner Burchmore: Those two are also officers of the
2750 lumber company?

Mr. Halpin: Yes, sir.

Examiner Burchmore: Do they use those passes?

Mr. Halpin: Yes, sir.

Examiner Burchmore: In interstate travel?

Mr. Halpin: Yes, sir.

Examiner Burchmore: What percentage in your opinion, if you have not the actual figures, of the total tonnage of your road is furnished by the interests that control the road, I refer to the lumber company?

Mr. Halpin: About 70 or 75 per cent—now, of the revenue?

Examiner Burchmore: Of the revenue?

Mr. Halpin: Yes, sir.

Examiner Burchmore: But somewhere near 95 per cent of the tonnage?

Mr. Halpin: The percentage of the tonnage would perhaps be more on account of the heavy tonnage of the logs.

Examiner Burchmore: I neglected to ask you, you have joint rates on class freight applying from Hampton?

Mr. Halpin: Yes, sir, and to Hampton.

Examiner Burchmore: And you get 15 per cent of those rates as your division?

2751 Mr. Halpin: Of the joint tariffs, yes, sir.

Examiner Burchmore: What does that 15 per cent amount to?

Mr. Halpin: Well, of course, business billed in that way is not kept separate in our records, so I have no means of knowing.

Examiner Burchmore: But I mean on a package of class freight, do you get four or five cents per 100 pounds, or 15 or 20, or how does it run?

Mr. Halpin: It runs anywhere from 10 to 20 cents, I should say.

Examiner Burchmore: That is on small freight.

Mr. Halpin: Yes, sir; there is very little business billed that way into Hampton: They buy most of the local freight within the state.

Examiner Burchmore: You use the so-called court tariff, local tariff?

Mr. Halpin: Yes, sir.

Mr. Walter: As to the telephone used by the lumber company, does the lumber company pay for that?

Mr. Halpin: Yes, sir, a rental.

Mr. Walter: As to the express which you carry, have you
2752 had in consideration between you and the express company as to an express contract?

Mr. Halpin: Well, no, there is not any express company operating on our line. The Pacific Express Company had their man down there a few months ago and wanted to put in their service on our line, but what they offered was not enough to interest us.

Mr. Walter: You carry the express at your local merchandise rate?

Mr. Halpin: Yes.

Mr. Walter: As to the number of employés carried by the railroad free for the lumber company, where do most of the lumber company's employés spend the night?

Mr. Halpin: Well, the men at the plant, the sawmill, do not do any free traveling. It is some of the woods employés who are passed, we send them either way.

Mr. Walter: Any employé going in there is passed free of charge?

Mr. Halpin: Yes, sir.

Mr. Walter: The lumber company's employés mostly live at Hampton or in the woods?

Mr. Halpin: Well, the woods employés?

2753 Mr. Walter: Yes.

Mr. Halpin: They live in the woods at the camps.

Mr. Walter: And the Thornton employés live mostly at Thornton?

Mr. Halpin: Yes.

Mr. Walter: Can you say what the average would be per month of this free carriage?

Mr. Halpin: Not more than ten passengers a month.

Mr. Walter: What about the rates on classes and commodities from Hampton out, is that high enough to pay you for the service rendered?

Mr. Halpin: Yes, sir.

Mr. Walter: Do you carry all the traffic that goes into or out of Hampton?

Mr. Halpin: Practically, all, yes, sir.

Mr. Walter: We have a photograph of the station at Hampton, together with some of the equipment for the Examiner's view. If that will cumber the record we will not put it in the record, but it simply demonstrates the building at Hampton with the equipment. We also have some further photographs showing the kind of
2754 buildings, the substantial quality of the architecture at Hampton which we also want simply to have the Examiner see.

Examiner Burchmore: I think it would cumber the record a good deal. I do not think the case would be decided on that point.

Mr. Walter: Yes. The Court House there is some evidence of the prosperity of the county.

(Photographs presented to the Examiner for inspection.)

Mr. Walter: You furnish the only railroad facilities that Hampton has?

Mr. Halpin: Yes, sir.

Mr. Walter: I think that is all.

Mr. Cowan: About what do you charge people who haul lumber on your line other than the lumber company that owns the road? Do you haul any other lumber for other people?

Mr. Halpin: Hardwood lumber.

Mr. Cowan: What arrangements do you have?

Mr. Halpin: We have a tariff.

Mr. Cowan: Local rates?

Mr. Halpin: Yes, sir.

Mr. Cowan: To Thornton?

2755 Mr. Halpin: Well, we have a tariff for interstate business also, a proportional tariff.

Mr. Cowan: How much is the local rate?

Mr. Halpin: Five cents per 100 pounds.

Mr. Cowan: Do you move any of it on the local rate?

Mr. Halpin: Yes, sir.

Mr. Cowan: Do you move any on the interstate through rate?

Mr. Halpin: Well, the rate is the same, it is a proportional tariff naming the same rate as the local rate.

Mr. Cowan: So the man shipping lumber from points on your line pays the same rate as anybody else would pay from Thornton plus five cents per hundred pounds?

Mr. Halpin: Yes, sir.

Mr. Cowan: And that is the case with staves, stave bolts, and things of that kind?

Mr. Halpin: I do not know what the rate is on the Cotton Belt for staves. There is a great deal of that business on our line but it is all charged at the local rate.

Mr. Cowan: In other words, your railroad company does not move any lumber or foreign products on the same rate as the Thornton rate is?

Mr. Halpin: No, that Thornton rate is only on yellow 2756 pine, and there is no call for——

Mr. Cowan: You do not move yellow pine from points on your line for anybody else?

Mr. Halpin: We would if they offered it.

Mr. Cowan: Well, you do not haul it, they do not offer it?

Mr. Halpin: No.

Mr. Cowan: If they offered it they would have to pay five cents per hundred pounds more than your mill?

Mr. Halpin: No——

Mr. Gaughan: He said the blanket rate was on yellow pine.

Examiner Burchmore: I thought he said there was no blanket rate.

Mr. Cowan: That was on hardwood.

Examiner Burchmore: He said in answer to my question that the rates were published in an entirely different manner, that is, the Cotton Belt published——

Examiner Stracker: They apply from anywhere on tap lines, but only apply on yellow pine, and they put the junction rate all the way back on the tap lines.

Mr. Walter: There is no joint rate on hardwood lumber.

Mr. Halpin: No.

Mr. Cowan: That is all.

2757 Mr. Walter: Can you tell about the amount of forest products in carloads that is now waiting cars for shipment along your line?

Mr. Halpin: 35 or 40 cars. However, that is a little more than usual.

Mr. Coleman: Have you lumber shipments going into what is known as Central Freight Association territory?

Mr. Halpin: Yes, sir, lumber shipments.

Mr. Coleman: That is routed via Thebes mostly?

Mr. Halpin: Via Du Po, East St. Louis, the same as the junction point of the Cotton Belt at East St. Louis.

Mr. Coleman: What is the rate to East St. Louis?

Mr. Halpin: 18 cents at the present time.

Mr. Coleman: That is the same rate as applies from down at Lufkin, is it not?

Mr. Halpin: I think so.

Mr. Coleman: What is your proportion of that rate?

Mr. Halpin: Well, if it is destined for points east of the Mississippi River it is two and a half cents.

2758 Mr. Coleman: What is the distance on the Cotton Belt from your station?

Mr. Halpin: I think it is a little over 400 miles.

Mr. Coleman: Do you recall what the distance is from Lufkin?

Mr. Halpin: No, sir, I do not.

Mr. Coleman: Did you say about how many miles it is greater than from Lufkin?

Mr. Halpin: I don't know.

Mr. Cowan: Since you do not get divisions to Texas points, you do not ship lumber down there, do you?

Mr. Halpin: Not very much. We ship some.

Mr. Cowan: You did ship there when you did get divisions?

Mr. Halpin: Some; yes, sir.

Mr. Cowan: The principal part of your lumber goes on the two and a half cent division?

Mr. Halpin: Well, I would say that perhaps 50 per cent of it does.

Mr. Cowan: And you ship lumber to points in Arkansas locally for sale?

Mr. Halpin: Yes, sir.

Mr. Cowan: Do you get any division on that?

2759 Mr. Halpin: No.

Mr. Cowan: You charge the local rate on it or not? What does your railroad company get out of lumber of this lumber company that is shipped for sale in Arkansas locally?

Mr. Halpin: Nothing.

Examiner Burchmore: Have you not a switching charge?

Mr. Halpin: No.

Examiner Burchmore: It does not handle the lumber, as a matter of fact; it simply handles the logs in?

Mr. Halpin: It does not handle part of it.

Mr. Cowan: And you handle the lumber locally to Arkansas points, the same as you do interstate lumber, so far as the service at the saw mill is concerned?

Mr. Halpin: Yes, sir.

Mr. Walter: Those Arkansas shipments would not amount to more than one or two per cent, would they?

Mr. Halpin: No.

(Witness excused.)

Mr. Sargent: While I was out I believe some question about our line was raised, and I would ask as a special courtesy that you allow me to be heard tonight. It loses me 24 hours unless I can
2760 get out tomorrow morning, and I am quite sure it will not take very long, and if you can hear me I will greatly appreciate it.

Examiner Burchmore: Your road is the Missouri & Louisiana?

Mr. Sargent: Yes, sir.

Examiner Burchmore: And connects with what company?

Mr. Sargent: The Kansas City Southern and Santa Fe.

Mr. Cowan: Have you just one witness?

Mr. Sargent: That is all.

Mr. Andrews: Judge Cowan is not at all well. I do not like to go on with any of these matters in his absence. The proposition consists of four industrial enterprises, and I apprehend will take considerable time in the examination.

Examiner Burchmore: I advised Mr. Sargent that I was willing to hold a night session, although I do not feel like it myself, if there was unanimous consent, but I do not feel I can take a road out of order unless there is such consent, especially at a night session.

Mr. Sargent: While there are four of them, two are coal properties, and I do not imagine they will be considered at length, and as to them, they could come following the lumber company, and I could answer your questions in very short order, because there is very little to be said.

2761 Examiner Burchmore: Do other counsel desire an opportunity to cross examine the witnesses in this case?

Mr. Cowan: I am not posted on the case until I hear his testimony.

Examiner Burchmore: I can see that counsel would have some hesitancy in objecting, but if there is really any unwillingness, I do not feel I could take it up.

(After further consideration of this matter the case was set down for tomorrow morning.)

Mr. W. P. Anderson: I represent the Gideon & North Island Railroad Company, and it is imperative that I leave here. I am willing to meet the Commission for hearing at any time and place I am called upon, at St. Louis, preferably.

Examiner Burchmore: Very well, it will be understood that the Gideon & North Island will not be called at this session, but will be put over for such further hearing as the Commission may arrange.

(Whereupon, at 5:40 P. M., an adjournment was taken to Saturday, December 17, 1910, at 9:30 A. M.)

2762 NEW ORLEANS, LA., *December* 17, 1910.

Met pursuant to adjournment at 9:30 A. M.
Present: Parties as before.

Examiner Burchmore: Gentlemen, we will come to order.

Mr. Cowan: Before taking up any of the cases this morning I want to read into the record the following requests of the trunk lines, made by the intervenors. These requests have been partly made from time to time, but in order that there may be no misunderstanding, and in order that the matter may be in the record on the consideration of the Commission, as well as the consideration of those who receive the typewritten report of the stenographer, I will read the following requests, that the trunk lines furnish a statement to be presented at the beginning of the next hearing of this case, showing for the years ending June 30, 1908, 1909 and 1910 the following matter: I may interpolate that by trunk lines I mean the railroad lines as separate from those that have been denominated the tap lines.

First. The number of saw mills on or adjacent to their lines, the station or place at which the same are located, the name of the
2763 lumber company and the name of the lumber company tap line or railroad, if any, serving such saw mills and which connect with the trunk line.

Second. The output of each of such saw mills, delivered to the trunk line by the saw mill or the serving railroad of the saw mill interest.

Third. A sketch showing the track connections of the trunk line with each of the saw mills or with the saw mill's connecting railroad.

Fourth. The number of saw mills located on lumber or logging roads serving them, and which logging or lumber roads connect with the trunk line, and the name of the company operating such saw mill and such lumber or logging road.

Fifth. The aggregate tonnage of lumber delivered to such trunk line by each lumber or logging road; that is, the short line serving the saw mill or mills.

Sixth. The aggregate amount of divisions paid to each.

Seventh. The tonnage of lumber on which division was paid.

Eighth. The tonnage received from each lumber or logging road, on which no division was paid.

Ninth. The tonnage of mills not having a railroad serving them, or having railroads, but not having divisions or allowances
2764 out of the rate.

Tenth. The total lumber tonnage of all sorts in all directions, and the average distance hauled and the earnings per ton mile, where those statistics are kept, and if they are kept by the system of railroad to which the trunk line belongs, then let the statement show the same facts as to the system.

Eleventh. The average car loading of lumber.

Examiner Burchmore: Judge Cowan, your request of course is on the record and will receive the attention of the Commission I may suggest it will probably be a fortnight before the transcript gets to

the Commission, and it may take a week later before they can act on the request, and do you not think it would be perhaps well to renew that request, or make the same request of the Commission?

Mr. Cowan: I can hand you this memorandum, or have Mr. Philips write this out now and hand it to you during the day.

Mr. Walter: On account of the press of time, on behalf of the Galveston, Beaumont & Northeastern, the Peach River & Gulf and the Riverside & Gulf, while the witnesses are here and ready to be heard, we are willing and request that these three cases go over until the subsequent hearing.

2765 Examiner Burchmore: That will involve no special inconvenience?

Mr. Walter: Nothing but what we are willing to undergo. Then as to the El Dorado & Wesson, the Ouachita Valley Railroad Company and the Fordyce & Princeton Railway, the witnesses and officers of those lines, together with associate counsel, were compelled to leave the city and could not remain for the hearing today. I therefore ask that these cases be passed to a subsequent hearing.

Examiner Burchmore: Mr. Gaughan, of counsel, stated to me it was absolutely impossible for those companies to remain, and requested that they go over, if it could possibly be done, and I agreed that that might be done if the request were renewed this morning by counsel.

Mr. Walter: As to the Arkansas Southeastern and the North Louisiana & Gulf, the witnesses and officers of those two lines are here ready to be heard, but they are the last two practically on the call, and cannot be here for a hearing earlier than Wednesday of next week. I therefore suggest that these two cases, if they cannot be reached today, be passed for the subsequent hearing.

Examiner Burchmore: It may be possible that we can hear
2766 the Arkansas Southeastern later in the day.

Mr. Walter: Very well, we will hold ourselves in readiness, and if you think it possible as to the North Louisiana & Gulf, we will do the same.

Examiner Burchmore: I think that may be possible, but not as probable as in regard to the other.

Mr. Walter: We will hold ourselves in abeyance, and ready to proceed, and will not give you any more trouble.

Examiner Burchmore: The De Queen & Eastern is on the list first.

2767 *De Queen & Eastern Railroad.*

H. L. DIERKS was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: You are an officer of this railroad company?

Mr. Dierks: I am.

Examiner Burchmore: What is your position?

Mr. Dierks: Secretary and treasurer.

Examiner Burchmore: You are also secretary and treasurer of the Dierks Lumber & Coal Company?

Mr. Dierks: I am.

Examiner Burchmore: I will ask you, Mr. Dierks, if the officers of these two companies are substantially the same?

Mr. Dierks: They are.

Examiner Burchmore: And the persons who hold those offices have practically the same position in each of the two companies?

Mr. Dierks: Yes, sir.

Examiner Burchmore: As a matter of fact, all of the officers of the lumber company are officers in the railroad company?

2768 Mr. Dierks: Well, the elected officers are, yes.

Examiner Burchmore: This railroad connects with the Kansas City Southern at De Queen, Arkansas?

Mr. Dierks: Yes, sir.

Examiner Burchmore: That is one of the termini of the line?

Mr. Dierks: Yes, sir.

Examiner Burchmore: And from that point it runs in what direction and for what distance?

Mr. Dierks: Well, it runs in an easterly direction for 27.02 miles.

Examiner Burchmore: Is that its terminus?

Mr. Dierks: At present; yes, sir.

Examiner Burchmore: What is the name by which the terminus is known?

Mr. Dierks: Dierks, Arkansas.

Examiner Burchmore: Are there any other main lines of this railroad?

Mr. Dierks: Any other main lines? No.

Examiner Burchmore: What is the extent of the branches?

Mr. Dierks: Well, it varies at times. We have approximately 30 miles of steel for spurs, but it is not often that it is all laid; it

2769 probably would average 15 to 20 miles at a time.

Examiner Burchmore: I understand that the Dierks Lumber Company controls this railroad through stock ownership.

Mr. Dierks: The stockholders control the railroad.

Examiner Burchmore: Are the stockholders of the two companies the same, or practically the same?

Mr. Dierks: Well, they are not exactly the same; there is some difference.

Examiner Burchmore: Are those differences extensive?

Mr. Dierks: There is about $50,000 of the railroad stock that is owned by people that have no stock in the lumber company.

Examiner Burchmore: Do those people have any interest in the lumber company?

Mr. Dierks: No, sir.

Examiner Burchmore: Who are those people that hold the $50,000 in lumber stock?

Mr. Dierks: Well, I do not know as I can say off hand.

Examiner Burchmore: Have they any relation to the lumber business?

Mr. Dierks: No, sir.

Examiner Burchmore: Any lumber business, I mean?
Mr. Dierks: One of them I think has.
Examiner Burchmore: How extensive are his holdings?
Dierks: His holdings are not in the South; they are in Ne-

niner Burchmore: Will you file with the Commission a list stockholders of this railroad company, indicating whether they ny relation to the Dierks Lumber & Coal Company, and if not, s their business; that is, whether they are interested in the trade, and have timber holdings in that vicinity?
Dierks: Yes, sir.
Andrews: And the amount of stock held by each.
niner Burchmore: Yes, and the amount of stock held by

Dierks: Yes, sir.
niner Burchmore: What is the total capitalization of the l?
Dierks: Authorized, $700,000. Issued and paid?
niner Burchmore: How much issued?
Dierks: Issued, $593,700.
Examiner Burchmore: Is not that rather a heavy capitalization for a 30 mile railroad?
Mr. Dierks: Not the way it is built. It is built like a rail-

niner Burchmore: I understand the saw mill of the Dierks r & Coal Company, which was formerly located at the junction of the Kansas City Southern, and near its rails, was de- by fire a year or so ago.
Dierks: Yes, sir, a year ago last May.
niner Burchmore: Is that mill being reconstructed?
Dierks: No, sir, not yet.
niner Burchmore: Well, it is proposed to rebuild it?
Dierks: Well, it will be rebuilt if lumber prices ever get high to warrant the rebuilding of it.
Cowan: The company has a saw mill now?
niner Burchmore: The company has no saw mill there at ne.
Dierks: Not in operation. They have a mill, but it is not in on.
niner Burchmore: A small mill?
Dierks: It is small compared with the one that was burned; hard wood mill. The other was pine.
Examiner Burchmore: Do you think that will be opened for operation in the near future?
Mr. Dierks: Not until the pine mill is built.
niner Burchmore: So you might say as a practical matter, npany has no mills there which it will operate until further g is done?
Dierks: No, they have not.
niner Burchmore: Has this lumber company any other saw nywhere?

Mr. Dierks: No, sir.

Examiner Burchmore: Who controls this lumber and coal company?

Mr. Dierks: Well——

Examiner Burchmore: Any special interests?

Mr. Dierks: The Dierks interests, the Dierks family.

Examiner Burchmore: Does the Dierks family have interests elsewhere in the lumber trade?

Mr. Dierks: Individually; yes, sir.

Examiner Burchmore: As a matter of fact, they also control the Sabine & Eastern Railway, do they not, down in Louisiana?

Mr. Dierks: I guess—yes, they would have control of that.

Examiner Burchmore: Are you here as a witness in con-
2773 nection with that company?

Mr. Dierks: No, sir.

Examiner Burchmore: You said $50,000 in the stock of this railroad is outstanding in the hands of other than the Dierks Lumber & Coal Company stockholders. Are those people related to the Dierks family?

Mr. Dierks: I think some of them are.

Examiner Burchmore: Your list might show that relation, if it has any bearing on it.

Mr. Dierks: Yes, sir.

Examiner Burchmore: Are there any other saw mills along the line?

Mr. Dierks: Yes, sir.

Examiner Burchmore: How many of them? Describe them in a general way.

Mr. Cowan: And where located.

Mr. Dierks: I am not as familiar with the industries on our line as our other witness would be, and I would prefer that he answer that question.

Examiner Burchmore: I will put it to the other witness. What is your principal tonnage at the present time?

Mr. Dierks: That is a question he ought to answer too, I
2774 believe.

Examiner Burchmore: He will testify with respect to the rates and divisions?

Mr. Dierks: Yes, sir.

Examiner Burchmore: Also as to the characteristics of the road; that is, the rails and the stations and so forth?

Mr. Dierks: Well, either one of us can do that.

Examiner Burchmore: What is the weight of the rail in this railroad?

Mr. Dierks: The majority of it, or practically all of it is 60 pound now.

Examiner Burchmore: How long has it been 60 pound?

Mr. Dierks: Well——

Examiner Burchmore: Two or three years?

Mr. Dierks: No, more than that.

Examiner Burchmore: That is a sufficient answer. The ties are of good grade?

Mr. Dierks: Standard No. 1 ties.

Examiner Burchmore: Is the road ballasted?

Mr. Kirkpatrick: They are oak ties.

Mr. Dierks: Yes. The road, I don't know whether you would call it ballasted or not; it is tamped and well surfaced, and
2775 part of it ballasted with cinders.

Examiner Burchmore: Any towns on your line?

Mr. Dierks: Yes, sir.

Examiner Burchmore: What are they?

Mr. Dierks: The first town is called Geneva; the next is Lockesburg; the next is Provo, and the next is Dierks.

Examiner Burchmore: Those are the only towns?

Mr. Dierks: Yes, sir.

Examiner Burchmore: What is the size of these towns in a general way?

Mr. Kirkpatrick: Describe De Queen first.

Examiner Burchmore: Yes, I did not mention De Queen; that is the beginning of the road.

Examiner Burchmore: Describe those towns in a very brief way.

Mr. Dierks: De Queen is a very lively Arkansas town of possibly 3,000 people or such a matter, and seems to be very prosperous. There are a great many stores there; I don't know how many, hotels and every other industry that goes to make up a southern city or town.

The town of Geneva does not amount to a great deal. I do not know; there are one or two or three stores, I believe. There
2776 is one, I know. I don't know about the rest of them. And a church and school house. And there is a saw mill at that point, I believe.

Lockesburg, up until recently, was the county seat of Sevier County.

Mr. Kirkpatrick: It was a town before the War, was it not?

Mr. Dierks: It was a very old town. Yes, it was there before the War. Our road was the first road that reached the town, and it is the only one there now.

Examiner Burchmore: Why did they move the county seat?

Mr. Dierks: They voted it out. De Queen got too strong for them.

The town of Provo is a small town; I believe it has three stores. I do not know what other industries are there. Our other witness can describe these towns more than I can.

Examiner Burchmore: Any population there?

Mr. Dierks: There are some people there; I don't know how many.

Examiner Burchmore: Does this lumber and coal company have any stores of its own at these towns?

Mr. Dierks: It has a store at Dierks. The town of Dierks
2777 I should judge, is about three or four hundred people, and it has a number of mercantile establishments, drug stores and bank and in fact everything that goes to make up a small sized town.

Examiner Burchmore: Are any of these towns on the wane since the lumber company ceased operation?

Mr. Dierks: Well, we expected them to be, but they are not.

Examiner Burchmore: They are keeping right up?

Mr. Dierks: Yes, sir. At the town of Dierks we have no employees there, except one, outside of the general store.

Examiner Burchmore: Are there any private tram roads that connect with this railroad, any logging spurs?

Mr. Dierks: No private, no.

Examiner Burchmore: Well, this road owns and operates the logging spurs?

Mr. Dierks: When they are in operation; yes, sir.

Examiner Burchmore: Are there any in operation at the present time?

Mr. Dierks: No, sir.

Examiner Burchmore: Those logging spurs ceased to be operated when the mill burned down?

2778 Mr. Dierks: Yes, sir. I say they are not in operation; there is one spur that is occasionally used, but that is very seldom, by another party who has a little timber out there.

Examiner Burchmore: There are not any logging spurs owned by these other mills to which you made general reference?

Mr. Dierks: No.

Examiner Burchmore: Have those mills expressed or manifested a desire to have this railroad put in spurs for their special benefit?

Mr. Dierks: Those have spurs for their loading.

Examiner Burchmore: But I mean up into their woods.

Mr. Dierks: Not that I know of, no.

Examiner Burchmore: Would you honor such a request, if made?

Mr. Dierks: We would, if the tonnage would justify the expense.

Examiner Burchmore: Did the tonnage of logs originated by the Dierks Lumber people justify the expense of putting the spurs into their woods?

Mr. Dierks: Yes, sir.

Examiner Burchmore: They cannot cut any more logs in a given territory than any one else can, can they?

2779 Mr. Dierks: Well, they can cut more than some people can. It depends on how much money the other fellow *has* got.

Examiner Burchmore: What do you mean by justifying the expense, in the case of a spur built into another man's woods?

Mr. Dierks: It would take a certain amount of tonnage or a certain length of time to repay the railroad for the expense they would go to in building the spur.

Examiner Burchmore: What I mean is this: If you build a spur track three miles into the woods for the purpose of hauling logs out, there is a certain maximum amount that must be hauled out of that spur; you cannot haul any more than are in the woods.

Mr. Dierks: No.

Examiner Burchmore: There are just as many in the woods of John Smith or John Brown as in the Dierks woods?

Mr. Dierks: Probably.

Examiner Burchmore: Would not these people pay as much for getting the logs from those spurs as the Dierks Lumber Company would pay?

Mr. Dierks: They would if they had the timber there.

Examiner Burchmore: You mean there is not any one else
2780 who has the timber?

Mr. Dierks: Well, yes, there are a number that have timber there, but I do not believe there is anybody that has any quantity of timber.

Examiner Burchmore: What did the Dierks Lumber Company pay to this railroad for getting their logs hauled over these woods tracks up to the main line?

Mr. Dierks: They paid $6.00 for a single car and $12.00 for a double car.

Examiner Burchmore: How much was the load of one of those cars?

Mr. Dierks: Do you mean in feet?

Examiner Burchmore: In any quantity in which it might be measured.

Mr. Dierks: A single car would hold probably 3,000 to 3,500, depending on the size of the logs.

Mr. Kirkpatrick: Describe the character of these cars and then the Examiner will understand.

Mr. Dierks: We have some cars that are short; that is, 48 foot cars; they will only hold one length. The most of our cars, however, are 40 feet, 60,000 pound capacity, standard flat cars, and they will hold two lengths.

2781 Examiner Burchmore: Do you have any double deck logging cars?

Mr. Dierks: No.

Examiner Burchmore: Is there such a thing?

Mr. Dierks: I never heard of a double deck lumber car.

Examiner Burchmore: I saw somewhere in reference to these reports, a reference to a rate on double deck cars.

Mr. Dierks: They probably called it double deck because they can haul two lengths.

Examiner Burchmore: You say they charged $6.00 for hauling the logs. What did that $6.00 cover?

Mr. Dierks: It covered hauling the logs from the point of origin on the spur track to the main line.

Examiner Burchmore: And then from the main line up to the mill there was an additional charge of some sort?

Mr. Dierks: That was covered, I believe, by the divisions that the railroad received out of the through billing.

Examiner Burchmore: How many locomotives has this railroad at the present time, or should I ask the other witness?

Mr. Dierks: You should ask the other witness.

Examiner Burchmore: You stated, I believe, that the capitalization of this railroad; that is, the out- capital stock, amounts to
2782 $593,000.

Mr. Dierks: $593,700, yes, sir.

Examiner Burchmore: $593,700?
Mr. Dierks: Yes, sir.
Examiner Burchmore: Are there any bonds outstanding?
Mr. Dierks: No.
Examiner Burchmore: Any other indebtedness?
Mr. Dierks: Nothing only current bills.
Examiner Burchmore: What did the road cost to build?
Mr. Dierks: Up to date?
Examiner Burchmore: Up to date.
Mr. Dierks: Well, I don't know. It cost more than the books show. The books show it cost, I believe, $599,000, in that neighborhood, but it cost more.
Examiner Burchmore: Now, a part of that total cost is to be accounted for by the fact that you have from time to time taken up and relaid these spur tracks into the woods?
Mr. Dierks: No, sir, that is not in a fixed account, the spur track.
Examiner Burchmore: Those are owned and operated by the railroad, when they are operated?
Mr. Dierks: Yes, sir.
2783 Examiner Burchmore: But the railroad does not own the right of way on which they are laid, of course?
Mr. Dierks: Part of it.
Examiner Burchmore: Do I understand that the lumber company formerly paid for the movement of these tracks from place to place in its woods?
Mr. Dierks: No, sir; the railroad pays all that expense, and charges it to an expense account.
Examiner Burchmore: It goes right into operating expenses?
Mr. Dierks: Yes, sir.
Examiner Burchmore: Of course the effect of that is to increase the total operating expenses for the year. Do you understand that that is a correct manner of charging this cost, under the rules of the Commission, as prescribed for accounting?
Mr. Dierks: That is my understanding of it.
Examiner Burchmore: What dividends has this company paid on its stock?
Mr. Dierks: Well, the company has only paid one dividend that I know of, and I don't really know just when that was. It was five or six years ago, I believe, or four or five at least, of six per cent.
2784 Examiner Burchmore: What surplus has it at the present time?
Mr. Dierks: I believe the surplus account up to the end of the last year was only about $2,000. However, the road has made more money than that.
Examiner Burchmore: If you have only paid one dividend of six per cent, and only have $2,000, about, in the treasury as surplus, where has the rest of the profit gone to?
Mr. Dierks: The rest of the profits have gone to the building up of the road, taking up 45 pound steel and relaying with 60 pound

reducing grades, shortening the line, all of which has gone into operating expense instead of fixed account.

Examiner Burchmore: It has gone into operating expenses. Do you not mean——

Mr. Dierks: Well, maintenance of way, or whatever it is called.

Examiner Burchmore: And all the improvements you make on the road you charge right up to operation?

Mr. Dierks: Well, not all of them. On the roadbed I believe all of them go to those accounts.

2785 Examiner Burchmore: Now, you said the road cost, as far as the books show, $599,000. Do you mean $599,000 plus the amounts which you have spent from year to year on additions and have taken out of your operating expense account?

Mr. Dierks: Yes, it cost in addition to that figure.

Examiner Burchmore: And that $599,000 plus these additions you now refer to, does that total amount represent the cost of the permanent tracks and permanent line of the railroad, or does it represent the cost of that line and the cost of this temporary moving of tracks?

Mr. Dierks: It does not include the cost of these temporary moving tracks, these spur tracks.

Examiner Burchmore: Did you understand the question correctly? Is it not a fact that the main line, the permanent line, has cost to date about $599,000 and no more?

Mr. Dierks: It has cost more than that, because, as I say, these expenses of putting in 60 pound steel instead of 45 pound steel, and other general improvements——

Examiner Burchmore: That is not in the $599,000.

Mr Dierks: No.

Examiner Burchmore: How much have these spur tracks cost from time to time?

Mr. Dierks: I have no figures here to tell that.

2786 Examiner Burchmore: That cost is all included in your operating expenses from year to year?

Mr. Dierks: So I understand.

Examiner Burchmore: But your operating expenses from year to year have not included any great amount of expenditure on the main line, aside from the matter of relaying rails?

Mr. Dierks: Yes, quite a bit.

Examiner Burchmore: I wonder if you can——

Mr. Dierks: The main line has been bettered right along.

Examiner Burchmore: Your annual report shows that the cost of this road to date, with equipment, is $599,000, and you say that is not accurate. Are you able to supply the Commission later with any figures as to the real cost of this road?

Mr. Dierks: No.

Examiner Burchmore: Then we will just assume it cost $600,000 or $700,000, or some greater sum?

Mr. Dierks: Yes, sir.

Examiner Burchmore: As a matter of fact, it would not cost any $600,000 to rebuild that line as it stands today, would it?

Mr Dierks: I don't see why it wouldn't.

Examiner Burchmore: You think the road is worth $30,000
2787 a mile?

Mr. Dierks: $30,000? It would not be $30,000, would it?

Mr. Cowan: Nearly $20,000.

Examiner Burchmore: Yes, that is true.

Mr. Dierks: That road, including equipment and its facilities in the way of stations, shops, and so forth, is worth that price, yes, sir.

Examiner Burchmore: Were the stockholders of this company satisfied to have the operating expenses increased from year to year by the amount of money that was expended in changing these tracks, which were used only by the logging company? I should think they would prefer to have their net revenue divided up in the shape of dividends.

Mr. Dierks: Well, they are figuring on making the road a permanent road, and would as soon see it go back into the road as to take it out.

Examiner Burchmore: But I cannot see why these minority stockholders, who have no relation to the lumber company can stand by and be satisfied to have a great amount of money expended each year on what amounts to private logging tracks for the interest of the Dierks Lumber Company.

Mr. Dierks: Well, I do not know as I understand that.

2788 Mr. Kirkpatrick: Can I ask a question?

Examiner Burchmore: You certainly may. I want to get at the situation.

Mr Kirkpatrick: Is it not true that this $6.00 on single cars and $12.00 on double cars did bring in a revenue?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: And that was the purpose of laying them?

Mr. Dierks: Yes, sir.

Examiner Burchmore: Well, did that pay for laying those rails in the woods, taking them up and the cost of the rails and the cost of operating those tracks and yield a profit in addition?

Mr. Dierks: I believe it has. I do not think it has yielded any loss.

Examiner Burchmore: You think they have made a profit?

Mr. Dierks: I think so.

Examiner Burchmore: When was this saw mill opened for operation at De Queen?

Mr. Dierks: I believe it was in 1902.

Examiner Burchmore: About that time?

Mr. Dierks: About that time; yes, sir.

2789 Examiner Burchmore: Was it then owned by the present company?

Mr. Dierks: Yes, sir.

Examiner Burchmore: When was construction begun on this railroad?

Mr. Dierks: In 1900.

Examiner Burchmore: Before the railroad was built?

Mr. Dierks: Yes, sir.

Examiner Burchmore: How much of it was constructed at that time?

Mr. Dierks: I don't know exactly. I think there was about seven or eight miles completed by the time the mill was completed.

Examiner Burchmore: When was the railroad incorporated as a railroad?

Mr. Dierks: In 1900.

Examiner Burchmore: It was at that time incorporated as a common carrier?

Mr. Dierks: It was.

Examiner Burchmore: Of freight and passengers?

Mr. Dierks: Yes, sir.

Examiner Burchmore: And it has held itself out to the
2790 public as such common carrier?

Mr. Dierks: Yes, sir.

Examiner Burchmore: What were the primary purposes of the building of this railroad?

Mr. Dierks: The purposes were to serve the people.

Examiner Burchmore: Well, there were not any woods immediately adjacent to that saw mill at that time, were there?

Mr. Dierks: Immediately adjacent?

Examiner Burchmore: Yes, close at hand; they needed a road to get up to their woods, among other things.

Mr. Dierks: Yes, they needed a road, or some way to get the logs in or else build the mill out in the country.

Examiner Burchmore: That is what I mean. There was not any forest immediately around this mill to be cut; they had to go some distance to get the logs?

Mr. Dierks: There was some forest within a short distance.

Examiner Burchmore: From the beginning of this railroad has it actually carried all the logs milled in the Dierks plant?

Mr. Dierks: Yes, sir, practically all, if not all. I do not know of any that it has not hauled.

Examiner Burchmore: Is there any river there on which
2791 they could float the logs down?

Mr. Dierks: Not at De Queen. There is a river out on the line; I do not know whether it is big enough to float logs or not.

Examiner Burchmore: There is a contract between the lumber company and this railroad company entered into in 1908 which covers this movement of the logging cars to and from the mill, is there not?

Mr. Dierks: I believe so.

Examiner Burchmore: That contract provides this $6.00 charge for the hauling which you have referred to, and also provides a charge of $1.25 for loading logs.

Mr. Dierks: Yes, sir.

Examiner Burchmore: Are you familiar with the terms of that contract?

Mr. Dierks: No. I am not familiar with the terms now. I was at the time, but I have forgotten it now.

Examiner Burchmore: That contract, as I said, was entered into in 1908 and it recites among other things that whereas said lines of

spur track, referring to some of these spurs up into the woods, are of no commercial value for any purpose other than to collect the logs of the Dierks Company and transport them to the main
2792 line of the railroad, to be hauled to the mills of the Dierks Company—but the part of the contract that I wanted to refer to was this. A paragraph provides that the lumber company shall pay the railroad company "the sum of $1.25 for loading each single deck car with logs, and the sum of $2.50 for loading each double deck car with logs." Just what is a single deck and a double deck car?

Mr. Dierks: Under that contract it means that the single decks are the short cars which will only haul one length of logs, and the double decks are the long, 40 feet cars, which will hold two lengths.

Examiner Burchmore: I was thinking of these hog cars, with decks that are one above the other, and I wondered if that was the kind of car here, and wanted an explanation. This contract also provides that it shall be expressly understood and agreed that all the logs hauled up to the mill shall be manufactured into lumber by the Dierks Lumber Company, and be shipped out to market over the lines of the Kansas City Southern from the town of De Queen. Is that contract still in force; has it been abrogated?

Mr. Dierks: I do not know that it has ever been withdrawn,
2793 although it is not used now.

Examiner Burchmore: Certainly it is not in use now, but it has not been abrogated?

Mr. Dierks: No.

Examiner Burchmore: Does the railroad file annual and other reports with the Interstate Commerce Commission?

Mr. Dierks: It does.

Examiner Burchmore: I understand that as a matter of fact there has been some delay in filing its report for the present year, but that it is in preparation.

Mr. Dierks: It will be ready in about three or four days, I understand. There was some delay in getting the books out by the Commission, I believe.

Examiner Burchmore: Are the accounts of this company kept in accordance with the system prescribed by the Interstate Commerce Commission?

Mr. Dierks: As well as we know how.

Examiner Burchmore: Do you keep separate accounts from the lumber company?

Mr. Dierks: Absolutely.

Examiner Burchmore: Are the cars equipped with safety devices?

2794 Mr. Dierks: Yes, sir.

Examiner Burchmore: I think that is all of this witness.

Mr. Kirkpatrick: Now, Mr. Dierks, as I understand it, the lumber company pays $6.00 a single deck and $12.00 a double deck car load of logs for transporting the logs over the spurs to the end of the main line.

Mr. Dierks: Yes, sir, to where it connects with the main line.

Mr. Kirpatrick: And in addition to that they pay $1.25 for a single car, and $2.50 for a double car of loading?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: As I understand, the logs are deposited by the lumber company with teams on the spur tracks.

Mr. Dierks: Along the spur tracks; yes, sir.

Examiner Burchmore: You are speaking now of what they used to do?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: Yes, it is the general custom, and if the mill is ever operated again, I suppose it will be the same. Then the railroad company loads them with steam loaders?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: Is it not true that this charge of $6.00
2795 and $12.00 a car for spur hauling, and the $1.25 and $2.50 for loading was intended to and does produce a revenue to the railroad company?

Mr. Dierks: It was intended to and I believe it does.

Mr. Kirkpatrick: That is over and above all the expense of moving the spurs and putting them down, and the interest on the investment and all those things?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: Is it not true that at the time this railroad was chartered in 1909 that it was intended to make a permanent railroad of it?

Mr. Dierks: It was.

Mr. Kirkpatrick: Now, is it not true also that a number of miles of extra road were built on account of reaching Lockesburg, the county seat?

Mr. Dierks: Yes, sir, I believe it was about six miles that we went out of our way, that is, went out of the way of the Dierks Lumber & Coal Company's timber, to reach Lockesburg, and a very expensive railroad building.

Mr. Kirkpatrick: Now, what was the extra cost of making that connection, would you say?

Mr. Dierks: Well, it cost us extra by going around that
2796 way rather than going in a straight line between $75,000 and $100,000 additional.

Mr. Kirkpatrick: And I believed you received a donation from the town of Lockesburg. What did that amount to?

Mr. Dierks: About $15,000.

Mr. Kirkpatrick: About how many people has the town of Lockesburg?

Mr. Dierks: It is supposed to have about 1,200, as I understand it.

Examiner Burchmore: And at the time the road was incorporated, it was the county seat, and has been for 30 or 40 years?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: And it was only recently that the county seat was moved to De Queen?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: Which is also on the De Queen & Eastern Railroad?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: Now, about how many miles apart are those spurs laid, and about how much of a team haul would you say the lumber company had to make to each spur?

2797 Mr. Dierks: Well, the spurs are laid according to the lay of the land. I do not believe there are any of them closer than three miles, and none of them are five miles apart.

Mr. Kirkpatrick: And the lumber company necessarily moves its logs by team that distance?

Mr. Dierks: Yes, from the dividing line between the two spurs each way.

Mr. Kirkpatrick: How does that compare with the average haul of the small mills located along the line?

Mr. Dierks: I don't believe the majority of the small mills haul their logs any further than that.

Mr. Kirkpatrick: You do not think they do?

Mr. Dierks: No, and they do not have $5.00 a car to pay, either.

Mr. Kirkpatrick: Nor the expense of loading?

Mr. Dierks: No.

Mr. Kirkpatrick: Do they get absolutely the same rate that the Dierks Lumber & Coal Company does for hauling on the main line?

Mr. Dierks: Absolutely.

Mr. Kirkpatrick: No discrimination of any kind in that regard?

2798 Mr. Dierks: Not if we know it.

Mr. Kirkpatrick: Where are the general offices of the company located?

Mr. Dierks: Of the De Queen & Eastern?

Mr. Kirkpatrick: Yes.

Mr. Dierks: At De Queen, Arkansas.

Mr. Kirkpatrick: Has that any connection at all with the lumber company or its offices?

Mr. Dierks: None whatever.

Mr. Kirkpatrick: A separate building?

Mr. Dierks: Absolutely; about a quarter of a mile apart.

Mr. Kirkpatrick: About how extensive is the general office building there?

Mr. Dierks: Well, it is a very large building, I might say, consisting of an agent's quarters, a general office for the accounting, waiting rooms, divided into white and colored divisions, freight and baggage room, and an express room, and all facilities needed by a railroad.

Mr. Kirkpatrick: What does the company do in regard to preserving its records, in accordance with the orders of the Commission?

Mr. Dierks: Why, it preserves them.

2799 Mr. Kirkpatrick: Has it taken any precautions to observe those rules and preserve the records, and if so, what?

Mr. Dierks: It has built a large fire proof vault in the general offices for that purpose.

Mr. Kirkpatrick: And all the past records of the company are kept in accordance with the rules of the Commission as to preserving them?

Mr. Dierks: Yes, sir, they are.

Mr. Kirkpatrick: You say this detour, as it might be called, to reach the town of Lockesburg, cost something like $75,000?

Mr. Dierks: I should think that much anyway, and possibly more

Mr. Kirkpatrick: Describe some of the cuts on the road.

Mr. Dierks: There are two very deep cuts right near Lockesburg. I should judge they are about 25 feet deep, and the two of them combined are two or three hundred yards long, very expensive building.

Mr. Kirkpatrick: Very expensive work?

Mr. Dierks: Yes, and just after going through that cut there is a long fill of about the same height, maybe not quite so high.

2800 Mr. Cowan: I would like to suggest, in the interest of time, that the witness has described what it cost, and says it is a permanent line, built for the general purposes of a common carrier, and going into the details of construction simply consumes unnecessary time, from our viewpoint.

Examiner Burchmore: I think so.

Mr. Cowan: And there would be no contention that they did not prove it, and in the absence of proving that, the amount of traffic would show.

Examiner Burchmore: It seems to me the details of construction might be omitted.

Mr. Kirkpatrick: There are some few items of construction I want to put in the record.

Mr. Cowan: Well, it has to be a good railroad.

Examiner Burchmore: Did it cost $20,000 a mile?

Mr. Kirkpatrick: That includes equipment.

Examiner Burchmore: Was the money wisely expended?

Mr. Dierks: I think so. I do not know but what we made a mistake in going to Lockesburg, but we did not know it at the time.

Examiner Burchmore: I mean you did not waste any money in construction?

2801 Mr. Dierks: No.

Examiner Burchmore: And the road is well built?

Mr. Dierks: Yes, sir.

Examiner Burchmore: I do not think you need to spend any more time.

Mr. Kirkpatrick: I want to show there are a number of steel bridges crossing streams.

Examiner Burchmore: Is that true?

Mr. Dierks: Yes, sir.

Mr. Kirkpatrick: And some very expensive culverts crossing streams, all of which I think are very important details to show it is an actual railroad.

Examiner Burchmore: Please be as brief as possible.

Mr. Kirkpatrick: State something of the character of the bridges.

Examiner Burchmore: I would not go into the character of the bridges. He has stated that.

Mr. Dierks: Would it make any difference to know that one of the bridges is a 200 foot span bridge, with concrete filled cylinders for piers?

Mr. Kirkpatrick: Yes, we want to know that, and the length of the other bridge.

2802 Mr. Dierks: The other is 150 foot span, and at present it is resting on piles.

Examiner Burchmore: There will be no further questions, please, about bridges.

Mr. Kirkpatrick: I understood you to say I might ask that. I can ascertain from the other witness the nature of the depot and stations, and so forth.

Mr. Dierks: Yes.

Mr. Kirkpatrick: I think that is all.

Mr. Cowan: I suppose at the beginning of this enterprise there was some one promoting it who decided on building the railroad and the saw mill. That was all one transaction, to begin with?

Mr. Dierks: Why, I expect you might call it all one transaction.

Mr. Cowan: Who financed the whole proposition?

Mr. Dierks: Different people; the stockholders of both companies.

Mr. Cowan: There must have been some moving spirit in it. You might just tell us briefly how the thing was promoted and financed.

2803 Mr. Dierks: Well, the Dierks interests; there are about twenty of them, I don't suppose you want the names of all of them?

Mr. Cowan: No, that will be filed later with the list of stockholders and the amount of the stock.

Mr. Dierks: Do you want the principal owners; is that the idea?

Mr. Cowan: Yes, who were the principal movers?

Mr. Dierks: Mr. Hans Dierks, Mr. Herman Dierks, the Estate of Peter Dierks and the Estate of Henry Dierks.

Mr. Cowan: The proposition was to get hold of this timber for quite a distance, and build a railroad which would be used for all purposes, as well as for moving the logs to the saw mill and moving that lumber out?

Mr. Dierks: The purpose was to serve the general public, including the Dierks Lumber & Coal Company.

Examiner Burchmore: Did the lumber company furnish the money to build the railroad?

Mr. Dierks: No.

Mr. Cowan: But the interests who furnished the money for one, furnished it for the other, practically?

Mr. Dierks: The interests are practically the same.

2804 Mr. Cowan: And neither enterprise would have been undertaken without the other?

Mr. Dierks: Well, I cannot say that. If somebody else had

come along and built a railroad for our benefit, or for anybody else's benefit——

Mr. Cowan: Well, the object was the combined interests, is what I mean.

Mr. Dierks: That had a great deal to do with it, yes sir.

Mr. Cowan: Judging from the amount of returns that the railroad company obtains from its operation, it would seem to indicate that the object of constructing the railroad was to give service to the controlling interest.

Mr. Dierks: That was not the sole object, no. As I say, the money made in the railroad has been expended on the railroad to make it permanent.

Mr. Cowan: The figures returned to the Interstate Commerce Commission by the examiners show for the year 1908 that the gross returns by the controlling interests of the road were $112,341, and by other traffic it is estimated at $5,900, making $118,242. Operating expenses, $113,541. Net earnings $4,700. I assume that was obtained in your office by the examiners of the Commission.

Mr. Dierks: I do not know whether it was or not. It does
2805 not sound reasonable, though.

Examiner Burchmore: May I interrupt you? Is Mr. C. C. Ray present?

Mr. Dierks: Yes.

Examiner Burchmore: He is the other witness?

Mr. Dierks: Yes, sir.

Examiner Burchmore: When the examiner of the Commission called upon your company at the time referred to by Mr. Cowan about a year or a year and a half ago, he reported to the Commission that the information that he turned in was cheerfully supplied by Mr. C. C. Ray, the general freight agent. In a letter dated January 19, 1910, Mr. Herman Dierks, vice-president and general manager of this railroad, advised the Commission that Mr. Ray had been with the railroad only a short time and was not fully acquainted with the divisions, and therefore that he had inaccurately answered a number of questions asked by the examiner. I might just state what those inaccuracies were in his reply.

2806 Mr. Cowan: Yes.

Examiner Burchmore: For example he was asked "Are the railroad's operations independent of the industrial operations of the controlling interest?" and he answered "No," meaning that they are not independent. And the Commission was asked to correct that record to read "Yes," meaning that they are independent.

In question No. 14 he was asked, "Was the railroad constructed for the purpose of serving the controlling interest," and being a new employee he said, "Yes." His superior officer indicated that it should have been "No."

Another question which is numbered here 22 is, "Is switching performed for the public? A. None offered." And his superior officer said "Yes," instead of "None offered."

And aside from some corrections as to the divisions, which is not

necessary to state, the vice-president subsequently advised the Commission that Mr. Ray's figures as to traffic earnings were entirely inaccurate. Instead of being $112,341.92 revenue on traffic supplied by the controlling interest it ought to be $88,242.48, estimated; $88,000 instead of $112,000. And then on other traffic the
2807 figures should be $30,000 in round figures estimated, instead of $5,900.56. This makes the total operating revenue $118,242.48, exactly the same figure as Mr. Ray had given. The item of $5,900.56 on traffic supplied by other than the controlling interest is stated by the vice-president in his correction to have been entirely wrong, as during the period referred to the revenues from passenger traffic alone were $8,372.96, and from mail $750.91, and from express $1,059.41, making the total passenger mail and express revenue of $10,183.28, and freight outside of the Dierks Lumber & Coal Company's business was estimated at about $20,000. I do not know how it is that the general freight and passenger agent of this railroad was so completely wrong in his figures and how it was that he gave the exact figures, whereas the corrected figures are estimated. I suggest you had better file some sort of statement to clear up this discrepancy.

Mr. Cowan: Yes, a statement from the books. He says he keeps the books in accordance with the Interstate Commerce Commission requirements, and if they do, let the books show them and have no estimate about it. Of course I was just going by the informa-
2808 tion here. I read this because it was the information I had.

You are doing the business that is required by the people living along your line and in the towns in the ordinary way a railroad would do it?

Mr. Dierks: Yes.

Mr. Cowan: And your accounts ought to show how much that is?

Mr. Dierks: Yes, sir.

Mr. Cowan: But my point really is that by far the larger proportion of the earnings on this railroad come from serving the saw mills' interests?

Mr. Dierks: Well, I presume the larger proportion of them do; yes, sir.

Mr. Cowan: Well, you know the larger portion of them do?

Mr. Dierks: Yes, sir. In the past year, though, I do not know how they will be in the future.

Mr. Cowan: Had it not been for that traffic in prospect and which could have been obtained it would have been a perfectly foolish venture to have built the railroad?

Mr. Dierks: I presume it would at that time.

Mr. Cowan: And would today?

2809 Mr. Dierks: Well, I don't know about it today.

Mr. Cowan: When did the mill burn?

Mr. Dierks: It may have been 1909.

Mr. Cowan: And since that time have you got a record of what your traffic earnings have been?

Mr. Dierks: I have a record up to June 30th, yes.

Mr. Cowan: Let your statement that corrects these previous figures

also show the figures on the same items for the fiscal year ending June 30th, 1910.

Mr. Dierks: These figures can be given now in dollars and cents if you would like them.

Mr. Cowan: Well, we would like the tonnage figures as well as the dollars and cents figures. Have you got the dollars and cents now in your hand?

Mr. Dierks: Yes.

Mr. Cowan: You might just give that now.

Mr. Dierks: For the year ending June 30, 1910, the passenger revenue was $5,303.58; for freight $46,603.76; for mail $670.53; express $977.12; excess baggage $139.21; miscellaneous $685.31; total earnings $54,379.51.

Mr. Cowan: Operating expenses, how much?

Mr. Dierks: Operating expenses including depreciation was
2810 $59,049.12.

Mr. Cowan: A deficit of how much?

Mr. Dierks: $4,669.61.

Mr. Cowan: How much timber land did the Dierks interests own to which they were building this road?

Mr. Dierks: At the time they started to build the road?

Mr. Cowan: Well, put it that way then and how much they acquired afterwards.

Mr. Dierks: I do not know how much they owned at that time, but it was only a small amount, something like 15,000 or 20,000 acres. The majority of their land, practically every tree they have now has been bought since the railroad was built.

Mr. Cowan: How much does it amount to?

Mr. Dierks: In fee simple and timber rights they have about 120,000 acres.

Mr. Cowan: How much of the aggregate tonnage or earnings for 1910 were supplied by the Dierks Lumber & Coal Company?

Mr. Dierks: Under the coal item, the Dierks Lumber & Coal Company supplied on forest products $25,121.21 or 53.9 per cent of the total earnings. Other forest products shipped by other
2811 than the Dierks Lumber & Coal Company, a revenue of $10,112.89, 21.6 per cent of the total freight earnings. Other freight outside of forest products was $11,369.66 or 24.5 per cent of the total freight earnings.

Mr. Andrews: Who supplied that?

Mr. Dierks: Our accountant.

Mr. Andrews: Did the Dierks interest supply any of that tonnage of this last item, generally?

Mr. Dierks: The last item?

Mr. Andrews: Yes.

Mr. Dierks: Very little.

Mr. Andrews: What percentage?

Mr. Dierks: I should judge about 10 per cent.

Examiner Burchmore: 10 per cent out of the 20?

Mr. Dierks: No, one-tenth of the $11,000 which would be one thousand and some dollars.

Examiner Burchmore: Has that company any coal mines?

Mr. Dierks: No.

Examiner Burchmore: What does "coal" mean in the name?

Mr. Dierks: It was incorporated with that name, as they handle coal in a retail way in Nebraska.

2812 Mr. Cowan: When the mill burned down of course you ceased to haul logs to the mill?

Mr. Dierks: Not right away. We hauled logs to the hardwood mill for a couple of months after that.

Mr. Cowan: How much of the 1910 year for which the figures were given did you run the hardwood mill?

Mr. Dierks: I should judge about two months.

Mr. Cowan: Now this large amount of tonnage supplied, that is of the earnings, consisted in shipping out lumber that had been already manufactured?

Mr. Dierks: Yes, a large amount of it.

Mr. Cowan: But a very small part of the logs that were hauled into the hardwood mill?

Mr. Dierks: Yes, sir.

Mr. Cowan: At the present time you have no lumber to ship and no logs to haul in for the Dierks interests?

Mr. Dierks: They might have a little lumber left; they have no logs to haul in. They are closed down at the present time completely.

Mr. Cowan: Where — these other mills which are shipping over your line?

Mr. Dierks: From where?

2813 Mr. Cowan: Where are they located on your line?

Mr. Dierks: Our other witness can answer that question better than I can.

Mr. Cowan: You do not know. All right. You said there were no bonds?

Mr. Dierks: No bonds.

Mr. Cowan: I am curious to know how this $600,000 was obtained; was it by sale of the stock or did the lumber company finance it?

Mr. Dierks: I said a while ago the lumber company did not finance it.

Mr. Cowan: Was it by sale of stock that the money was obtained?

Mr. Dierks: Yes.

Mr. Andrews: When you haul these logs in and ship the lumber out do you make any refund of any character to the lumber company on the divisions you get on the outward movement?

Mr. Dierks: No.

Mr. Cowan: Do you make any charge of any sort except the through rate of freight to the other mills located on your line?

2814 Mr. Dierks: No, sir, the through rate of freight, except those we might haul logs for.

Mr. Cowan: They are pine mills?

Mr. Dierks: Some of them are pine and some of them cut hardwood.

Mr. Cowan: It has been understood here that the hardwood lumber rates are not on a blanket system on some of these lines. Does hardwood take the same rate from points on your line as it does from De Queen?

Mr. Dierks: Our other witness will tell you about rates.

Examiner Burchmore: A statement of the stockholders attached to our report as of date August, 1909, shows that persons of the Dierks family hold considerably in excess of 5,000 shares of the stock in this corporation, and something like 500 shares, I should judge, from looking over the statement, or less than 500 are held by people whose names were not Dierks.

Mr. Dierks: Yes.

Examiner Burchmore: That is about 10 per cent outstanding?

Mr. Dierks: I presume something like that.

Examiner Burchmore: Has there been any material change
2815 in the stockholdings since that time?

Mr. Dierks: When was that, 1909?

Examiner Burchmore: August, 1909.

Mr. Dierks: I believe not.

Mr. Cowan: And these other persons whose names are not Dierks, are they connected in interest with the lumber concern?

Mr. Dierks: Yes, sir; some are and some are not.

Examiner Burchmore: And the others acquired their stock through people who originally were in the lumber company, the original stockholders were all lumber company people, were they not?

Mr. Dierks: I do not think so. There were some admitted to buy stock.

Examiner Burchmore: At any rate all this discussion only concerns about 10 per cent of the capital stock of the railroad, for 90 per cent of the capital stock of the railroad is held by the lumber company stockholders?

Mr. Dierks: Yes, sir; I believe so.

Mr. Kirkpatrick: I would like to show if it was not a question of time, by this witness, that we go through a very rich agricultural country that is being settled up very rapidly.

2816 Examiner Burchmore: You may ask a few questions along that line, but make them general and do not go into details.

Mr. Kirkpatrick: State in a general way what the nature of this country we pass through is, and what the prospects of the future freight and passenger development are?

Mr. Dierks: It is a country that is more or less hilly and therefore has practically all kinds of land, good, bad and indifferent. There is a good deal of what is called bottom land, along Cossatot River, and also the Saline River bottom, very rich land. It grows almost anything that can be grown in the state of Arkansas, fruit, corn, hay, cotton and other farm products.

Examiner Burchmore: Are farm products being shipped over the line, as a matter of fact?

Mr. Dierks: I think they are; so I understand.

(Witness excused.)

2817 C. C. RAY, was called as a witness and having been duly sworn, testified as follows:

Examiner Burchmore: What rolling stock has this railroad company?

Mr. Ray: Five locomotives. Do you care for the class?

Examiner Burchmore: Just the number.

Mr. Ray: Passenger cars, 2; box cars, 3; flat cars, 74; tank cars, 2; Dozier, 1; gondola, 1; loaders 2, and a ditcher and pile driver combined, and then they have about 15 boarding cars.

Examiner Burchmore: Who uses those boarding cars?

Mr. Ray: Company employees.

Examiner Burchmore: Are those logging cars now in use?

Mr. Ray: Some of them, very few.

Examiner Burchmore: As a matter of fact, a considerable part of that equipment is not used very extensively at the present time?

Mr. Ray: No, sir.

Examiner Burchmore: You formerly owned six locomotives?

Mr. Ray: Yes, sir.

Examiner Burchmore: You sold one of them?

Mr. Ray: One of them burned.

2818 Examiner Burchmore: All these locomotives are owned?

Mr. Ray: Yes, sir.

Examiner Burchmore: And the other equipment is owned?

Mr. Ray: Yes, sir.

Examiner Burchmore: You do not lease any equipment from the lumber company?

Mr. Ray: No.

Examiner Burchmore: Does the lumber company own any rolling stock?

Mr. Ray: No.

Examiner Burchmore: The lumber company never operated any rail track?

Mr. Ray: No.

Examiner Burchmore: You have several section gangs?

Mr. Ray: Yes.

Examiner Burchmore: How many train crews are there on the line?

Mr. Ray: Just one at present.

Examiner Burchmore: The other engines are in storage?

Mr. Ray: Yes, sir.

Examiner Burchmore: The traffic is not sufficient to warrant running more than one?

2819 Mr. Ray: It does not justify it.

Examiner Burchmore: Have you any station agents?

Mr. Ray: Five.

Examiner Burchmore: At the towns heretofore named?

Mr. Ray: Yes, sir.

Examiner Burchmore: Do those station agents have any outside work?

Mr. Ray: No; none whatever.

Examiner Burchmore: They work only for the railroad?

Mr. Ray: Yes, sir.
Examiner Burchmore: They do not work for the lumber company?
Mr. Ray: No.
Examiner Burchmore: And never did?
Mr. Ray: No.
Examiner Burchmore: What other employees has this railroad?
Mr. Ray: It has three others, two others.
Examiner Burchmore: Who are they, and what are they?
Mr. Ray: Myself and two clerks in the general office.
Examiner Burchmore: Do you work for the lumber company?
Mr. Ray: No, sir.
2820 Examiner Burchmore: Do these clerks work for the lumber company?
Mr. Ray: No, sir.
Examiner Burchmore: Did they formerly work for the lumber company?
Mr. Ray: No.
Examiner Burchmore: What salaries are paid general officers of this railroad? I do not want the amount of salaries which are paid to people who work for the railroad company only but of the lumber company officials who are also officials of the railroad.
Mr. Ray: Do you want general officers?
Examiner Burchmore: Yes.
Mr. Ray: Well, the salaries are about one thousand dollars a month.
Examiner Burchmore: For all the officers?
Mr. Ray: Yes, sir.
Examiner Burchmore: Does that include those who do not work for the railroad company?
Mr. Ray: Yes, sir.
Examiner Burchmore: Now, excepting in your statement those employees or officers who are exclusively connected with the
2821 railroad, what are the total salaries of general officers who are also connected with the lumber company?
Mr. Ray: About $650 per month.
Examiner Burchmore: Well, do those officers render any substantial service for that $650 a month?
Mr. Ray: In an executive way.
Examiner Burchmore: Are not those salaries rather handsome for the services rendered by those officers?
Mr. Ray: I should believe not.
Examiner Burchmore: Do they actually put in a substantial amount of time each month for that money?
Mr. Ray: I think so.
Examiner Burchmore: What division did you receive on lumber?
Mr. Ray: 2 to 6 cents.
Examiner Burchmore: Where did most of this lumber go?
Mr. Ray: The central states, Missouri, Kansas, Nebraska, Iowa.
Examiner Burchmore: Are rates based on the Mississippi very largely?

Mr. Ray: Well it is a blanket rate to the south; it is the general basis to the Mississippi river.

2822 Examiner Burchmore: What is the rate on Central Freight Association shipments?

Mr. Ray: I don't know. Take Kansas City, I can give you that on pine, it is a 22 cent rate.

Examiner Burchmore: The rate was 22 cents to Kansas City?

Mr. Ray: Yes, sir.

Examiner Burchmore: What was your division of that rate?

Mr. Ray: 6 cents.

Examiner Burchmore: How far did you haul the logs?

Mr. Ray: From the mill to the transfer track.

Examiner Burchmore: About 100 feet?

Mr. Ray: No, it is some quarter of a mile.

Examiner Burchmore: You actually hauled the lumber from the mill to the transfer track?

Mr. Ray: Yes, sir.

Examiner Burchmore: How far did you haul the logs up to the mill?

Mr. Ray: It would be the spur and then 27 miles of main line.

Examiner Burchmore: You hauled the logs 27 miles and

2823 the lumber a quarter of a mile and got 6 cents?

Mr. Ray: Yes, sir.

Examiner Burchmore: How far is it over the Kansas City Southern to Kansas City?

Mr. Ray: 433 miles.

Examiner Burchmore: How much did the Kansas City Southern get?

Mr. Ray: 16 Cents.

Examiner Burchmore: Who furnished the cars?

Mr. Ray: The Kansas City Southern.

Examiner Burchmore: Did the car cost your railroad anything?

Mr. Ray: Per diem.

Examiner Burchmore: How much per diem did you pay on the car?

Mr. Ray: 35 Cents per day.

Examiner Burchmore: What was the rate to St. Louis or East St. Louis?

Mr. Ray: I don't know. We do not have much in there. I don't know.

Mr. Coleman: Do you say you have not a rate to East St.

2824 Louis?

Mr. Ray: We do have one but I do not know what it is.

Examiner Burchmore: You do not have much traffic in there?

Mr. Ray: No.

Examiner Burchmore: Your division then ran from 1 to 6 cents and on the most of the traffic you got 5 or 6 cents?

Mr. Ray: Well they averaged 3 or 4 cents.

Examiner Burchmore: You have joint rates on lumber in connection with the Kansas City Southern?

Mr. Ray: Yes, sir.

Examiner Burchmore: Are those milling in transit rates?
Mr. Ray: Yes, sir.
Examiner Burchmore: Milling in transit rates on yellow pine?
Mr. Ray: Yes, sir.
Examiner Burchmore: As a matter of fact you do not apply the transit principle on yellow pine, do you?
Mr. Ray: Only in the milling of logs.
Examiner Burchmore: Is not your lumber billed as originating at Dierks?
Mr. Ray: Yes, sir.
2825 Examiner Burchmore: So that you did not actually take advantage of the milling in transit rule on your lumber; you billed it as originating at Dierks?
Mr. Ray: The milling in transit offsets the handling of the logs to the mill.
Examiner Burchmore: Perhaps that is a detail it would not be necessary to question closely about, but the fact remains that the rate from the originating point on your line to the interstate destination was the same as the Kansas City Southern's rate from stations in that group.
Mr. Ray: Do you mean on yellow pine?
Examiner Burchmore: Yes.
Mr. Ray: No, sir.
Examiner Burchmore: What was it.
Mr. Ray: Two cents over.
Examiner Burchmore: Then the rate from stations on your line was two cents over the Kansas City Southern rate?
Mr. Ray: Yes, sir.
Examiner Burchmore: Your divisions in some cases was only 1 cent. Does that mean that the Kansas City Southern got 1 cent more on a shipment which came from your line than on shipments from its own line?
2826 Mr. Ray: I don't understand.
Examiner Burchmore: You said the rates from points on your line were two cents higher than the Kansas City Southern stations in that group?
Mr. Ray: Yes, sir.
Examiner Burchmore: Is that true in every case?
Mr. Ray: On yellow pine; yes, sir.
Examiner Burchmore: Did you not say in some cases you only got a division of 1 cent?
Mr. Ray: 2 Cents.
Examiner Burchmore: On some traffic the Kansas City Southern got its full regular rate?
—. ——.
Examiner Burchmore: And you simply got the arbitrary?
Mr. Ray: In some instances, yes, sir; that is true.
Examiner Burchmore: Well, your maximum division was 6 or 8 cents?
Mr. Ray: 6 Cents. We got 4 cents plus the arbitrary of 2 cents.

Examiner Burchmore: That is what I wanted to know, whether it was 4 cents plus the arbitrary or 6 cents minus.

Mr. Ray: 4 cents plus the arbitrary.

Examiner Burchmore: You have heard of the Little River
2827 Railroad?

Mr. Ray: No, sir.

Examiner Burchmore: Do you know about the Neal Springs Lumber Company? They have a tram road.

Mr. Ray: Yes, sir.

Examiner Burchmore: How near is that to you?

Mr. Ray: 12 or 15 Miles.

Examiner Burchmore: 12 or 15 Miles, to the north?

Mr. Ray: To the south.

Examiner Burchmore: It also connects with the Kansas City Southern?

Mr. Ray: Yes, sir.

Examiner Burchmore: And parallels your line in a general way?

Mr. Ray: I could not say. I don't know a thing about it.

Examiner Burchmore: It is quite an extensive road as a tram road?

Mr. Ray: I don't know. I have never been over it.

Examiner Burchmore: Is it not a fact they have 12 or 15 miles of tram tracks?

Mr. Ray: I don't know. I could not say.

2828 Mr. Kirkpatrick: I think it runs in the other direction, west of the Kansas City Southern.

Examiner Burchmore: I only know it is close by.

Mr. Kirkpatrick: It does not parallel our road.

Examiner Burchmore: Do they get any divisions.

Mr. Ray: I do not know.

Examiner Burchmore: So if I say that the Neal Springs Lumber Company has a private tap line and apparently does not pretend to be a common carrier, and which bears the name of the Little River Railroad, and if I further say it extends from a connection with the Kansas City Southern at Neal Springs for about 10 miles which is about 10 miles from De Queen and it has 18 miles of track and receives no allowance for divisions on lumber, you would not be able to confirm or controvert my statement.

Mr. Ray: No, sir.

Examiner Burchmore: I believe that is the fact. I may be incorrectly informed. Is the Neal Springs Lumber Company mill in operation?

Mr. Ray: I thing not.

Examiner Burchmore: When did they close down?

Mr. Ray: I cannot answer that question. I do not know.

2829 Examiner Burchmore: I only wondered whether that company could successfully compete with your company, which perhaps has some advantage from its proximity to this short line railroad, and the relations between the two corporations. I think that is all I care to ask.

Mr. Kirkpatrick: I wish you would describe briefly the character

City Southern, and some with private agent's quarters and divisions of waiting rooms, freight and express quarters.

Mr. Kirkpatrick: And Dierks.

Mr. Ray: Dierks is the same way. We really have a better station than any of the others except at De Queen; good platforms and the same quarters.

2832 Mr. Kirkpatrick: How about section houses?

Mr. Ray: We have section houses at Lockesburg, Provo and Dierks, 5 rooms each, all painted and in good condition.

Examiner Burchmore: You have got the equipment and facilities that most railroads have?

Mr. Ray: We have.

Mr. Kirkpatrick: Do you keep water in the stations?

Mr. Cowan: What is the use? We are trying to save time. I do not like to object, but we are wasting time.

Mr. Kirkpatrick: I think you have consumed your share of the time and we have waited here ten days to get a hearing and I want to save time, but I propose to offer what evidence I think is material. State how you issue your time tables and your rates and all that.

Examiner Burchmore: We will not ask him that. But have you a time table?

Mr. Ray: We have.

Examiner Burchmore: Will you file it?

Mr. Ray: We will file a copy.

Mr. Kirkpatrick: You get out your regular indexes?

2833 Mr. Ray: Yes, sir.

Mr. Kirkpatrick: How frequently?

Mr. Ray: Every thirty days, and we issue a general index every six months and supplement it every thirty days.

Mr. Kirkpatrick: You make joint settlements with how many trunk line railroads?

Mr. Ray: I should say 6 or 8 or 10.

Mr. Kirkpatrick: Have you through joint rates on practically everything that is shipped in any territory?

Mr. Ray: We have.

Mr. Kirkpatrick: I would like to have you state what the comparative division is on carloads of lumber and carloads of some half dozen other classes of freight.

Mr. Ray: Do you mean the earnings?

Mr. Kirkpatrick: Yes.

Mr. Ray: They are about equal on a minimum car.

Mr. Kirkpatrick: Give the amount on several of them.

Mr. Andrews: Do not the division sheets show that?

Mr. Ray: It will show the per cent. The minimum carload of lumber is 34,000 pounds and for the division of 4 cents it will average about $14 or $15. Cotton, the average car is 25 bales, and we get 15 cents per 100 pounds and it will average about $18.50 per

2834 car. Cotton seed is 30,000 pounds, the rate is 4 and 4½ cents, and it will average about $13.50. Live stock, 17,000 pounds minimum, average is about $17.00 to $18.00 per car. Salt, 29 cent rate, and our division is 5½ cents which will equal about

$22.00 per car. Hay 20,000 minimum, the rate is 25 cents and it averages 14 to $15.00. Emigrant's outfit, 22 cent rate, minimum 20,000 pounds, average is $12.50 to $13.00 per car. Flour, 25,000 pound minimum, 26 cent rate, average is 20 to $21.00 per car. Those are some of the principal commodities we handle.

Examiner Burchmore: Would your local rates amount to about the same as your proportions?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: Do you comply with all the Arkansas state laws regarding railroads?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: You are assessed as a railroad?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: Do you remember the last year?

Mr. Ray: About $4600.

2835 Mr. Kirkpatrick: Of railroad tax?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: Does any transaction of the railroad ever get onto the lumber company's books?

Mr. Ray: No.

Mr. Kirkpatrick: No connection in any way, shape or form?

Mr. Ray: No.

Mr. Kirkpatrick: You have the same troubles that trunk lines do in the way of damage suits?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: And lawsuits for killing stock and all those things?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: And are required to post notices for killing stock or pay double damages, under the Arkansas law?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: Have you a franchise tax under the Arkansas law?

Mr. Ray: I understand we have.

Examiner Burchmore: Have you ever paid any judg-

2836 ments for personal injuries and for killing cows?

Mr. Ray: Yes, sir; a good many of them.

Mr. Kirkpatrick: I am sorry to say we have a great many. The general attorney certainly earns his salary on that road, if not any place else.

You post notices in all your stations of your tariffs?

Mr. Ray: We do.

Mr. Kirkpatrick: State briefly how they are posted.

Examiner Burchmore: Please do not go into that. He stated he endeavored to comply with all the laws relating to interstate railroads, and that is one of them, if he does not comply with it he will be indicted some day and sustain the penalties. What is the use of pursuing this in such detail?

Mr. Kirkpatrick: I only wanted to show we make as good arrangements for posting as trunk lines do and post in the same way.

Did you issue this notice of cancellation on through rates on lumber, was that canceled in the regular way?

Mr. Ray: It was.

Mr. Kirkpatrick: I wish you would state briefly how many saw mills and cotton gins and so forth there are on the road?

2837 Mr. Ray: I think about 6 saw mills and about 5 cotton gins.

Mr. Kirkpatrick: The company serves all of those?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: Does it build spurs and side tracks for them?

Mr. Ray: It does whenever requested.

Mr. Kirkpatrick: Does the Kansas City Southern sell joint tickets over your line of railroad?

Mr. Ray: It does.

Mr. Kirkpatrick: And you sell tickets and conduct the business in all respects as a trunk line?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: At the time you were operating on logs those train loads of logs were billed in in the regular way?

Mr. Ray: They were.

Mr. Kirkpatrick: You have track scales?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: And you move the finished product over your own tracks and deliver it to the Kansas City Southern?

2838 Mr. Ray: We do.

Mr. Kirkpatrick: Do you charge the lumber company demurrage at the regular rates?

Mr. Ray: We do.

Mr. Kirkpatrick: And weigh the cars you load and send out?

Mr. Ray: We do.

Mr. Cowan: Has there ever been any demurrage charged to the lumber company?

Mr. Ray: There has.

Mr. Cowan: How much of it?

Mr. Ray: Whenever a car is on hand over 48 hours we charge them one dollar a day.

Mr. Cowan: As a matter of fact has there ever been any charge or occasion for it?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: In regard to your divisions of rates and your rates, are the rates to and from points on your line on class goods the same as the rate to and from De Queen?

Mr. Ray: Yes, sir.

Mr. Cowan: From Missouri and Mississippi River points?

2839 Mr. Ray: Yes, sir.

Mr. Cowan: How is that within the state of Arkansas?

Mr. Ray: We are governed by the state tariff.

Mr. Cowan: And that would be higher on your line?

Mr. Ray: Yes, sir.

Mr. Cowan: That is on class goods, I spoke of. Now, how is it on commodity rates?

Mr. Ray: It is about the same.
Mr. Cowan: So that the only thing you get out of it is the divi-
on of the through rate?
Mr. Ray: Yes, sir.
Mr. Cowan: Now on cotton and live stock are the rates higher to
nd from points on your line?
Mr. Ray: I think not.
Mr. Cowan: On lumber it is 2 cents higher?
Mr. Ray: Yes, sir.
Mr. Cowan: Does that just apply to yellow pine lumber or to
ardwood?
Mr. Ray: Yellow pine and its products?
Mr. Cowan: How is it as to hardwood?
Mr. Ray: The De Queen rates.
Mr. Cowan: The De Queen rates on hardwood are 2 cents
2840 higher on yellow pine?
Mr. Ray: Yes, sir.
Mr. Cowan: You get 6 cents division when your lumber is loaded
onto the cars and delivered to the Kansas City Southern at De
Queen?
Mr. Ray: Yes, sir.
Mr. Cowan: That is the Kansas and Nebraska points?
Mr. Ray: Yes, sir; it varies.
Mr. Cowan: All Missouri River territory?
Mr. Ray: I say 6 cents. We only get that to K. C. S. points.
Mr. Cowan: Don't you get it to points off the K. C. S.?
Mr. Ray: No, sir, not 6 cents.
Mr. Cowan: What do you get when it goes beyond K. C. S.
points?
Mr. Ray: 4 cents generally.
Mr. Cowan: In all cases do you get the 2 cents?
Mr. Ray: Yes, sir.
Mr. Cowan: Where you have a two cent division to nearby points
in Oklahoma you get your 2 cents extra also?
Mr. Ray: Yes, sir.
Mr. Cowan: So you really get nothing less than 4 cents
2841 as income to your road for handling lumber, pine lumber?
Mr. Ray: There might be one or two instances where we
only get an arbitrary. I cannot recall any now.
Mr. Cowan: Your object of course would be not to ship to those
points?
Mr. Ray: No, we want the business where we can get the most for
it, that is true.
Mr. Cowan: Do you do the routing of the lumber?
Mr. Ray: That is left to the shipper.
Mr. Cowan: Who do you count as the shipper, the lumber com-
pany?
Mr. Ray: Everybody along our line.
Mr. Cowan: Well, say there is a carload of lumber shipped out to
Kansas City from De Queen from your mill, is the mill company re-
garded as the shipper, the consignor?

Mr. Ray: They do the routing.

Mr. Cowan: The mill company do the routing?

Mr. Ray: Yes, sir; if it is left open we route it.

Examiner Burchmore: You know there is only one possibility of routing out of De Queen, it all would have to go to the Kansas City Southern.

Examiner Burchmore: And the right of routing beyond
2842 would not be worth anything to this railroad, would it?

Mr. Cowan: It might be worth 2 cents.

Examiner Burchmore: There is something about that 2 cent arbitrary that does not look quite right to me. It may be from lack of information, but the point is this. How could the lumber company sell lumber in strongly competitive territory where it had to pay a 2 cent higher freight rate than a mill up here 10 miles away that belongs to somebody else?

Mr. Ray: I do not know how they do that, but they pay our rates.

Examiner Burchmore: They did it, did they?

Mr. Ray: Yes, sir.

Examiner Burchmore: Well, does not that mean that it is not absolutely essential that the rates from the points of origin on these short lines should be the same in cents per hundred pounds as from points which are directly on the main line of railroad?

Mr. Ray: I could not say.

Examiner Burchmore: Your lumber company bore that 2 cents without flinching apparently?

Mr. Cowan: They do not pay it, they get the De Queen
2843 rate. It is the fellow out on the short line that pays the 2 cents.

Examiner Burchmore: I think he said from their mill they paid 2 cents.

Mr. Ray: Yes, sir.

Examiner Burchmore: And 4 cents out of the treasury of the Kansas City Southern. And 2 cents comes out of the extra rate?

Mr. Ray: That is correct.

Mr. Cowan: I misunderstood it. The De Queen rate from your mill would be 2 cents more than the De Queen rate from anybody else at De Queen, that is on yellow pine?

Mr. Ray: The rate from De Queen takes in the milling of the logs which applies from Dierks. We have no through rates from De Queen. The rate from the Dierks Lumber Company, which is the same as to any other shipper, regardless of where it is located.

Mr. Cowan: On the Kansas City Southern?

Mr. Ray: No, on the De Queen & Eastern.

Mr. Cowan: I understand you now and I stated it correctly?

Mr. Ray: Yes, sir.

Mr. Andrews: You gave divisions awhile ago. Does that
2844 apply on inbound business as well as business that you originate?

Mr. Ray: In and out; yes, sir.

Mr. Andrews: You get the same divisions on business delivered to you that you do on business delivered to the other line?

Mr. Ray: Yes, sir; we do.

Mr. Coleman: What was the purpose of reciting those comparisons of units of carload revenues on various commodities from that paper you had?

Mr. Ray: It was only as a comparison of the revenue, as I understand.

Mr. Coleman: As you understand?

Mr. Ray: Yes, sir.

Mr. Coleman: Well,—it is a comparison of the revenue.

Mr. Kirkpatrick: He made those at my request. I do not know if he knows what I wanted of them.

Mr. Coleman: Will you state what the purpose was?

Mr. Kirkpatrick: Yes, I want to show that on all other classes of freight as compared with lumber the rate is practically the same?

Mr. Coleman: The unit per car load?

2845 Mr. Kirkpatrick: Yes.

Mr. Coleman: Was that your understanding of the purpose?

Mr. Ray: As I understand it it is just a comparison of the earnings with reference to the different commodities.

Mr. Coleman: Now, for lumber you took 34,000 pounds as the weight.

Mr. Ray: That is an average of the 36-foot car, the minimum.

Mr. Coleman: That is an average?

Mr. Ray: That is the minimum on a 36-foot car.

Mr. Coleman: If you wanted this for substantial comparison, you would not take what the minimum would be, would you?

Mr. Ray: Well, I took the minimum on all other commodities.

Mr. Coleman: Do you handle many of those other commodities?

Mr. Ray: We do.

Mr. Coleman: What do you understand to be about the average weight of a car of yellow pine moving from your mill?

Mr. Ray: Well, I should say along from 38,000 to 40,000

2846 pounds?

Mr. Coleman: You never figured it up?

Mr. Ray: No, sir; I never have made any general average.

Mr. Coleman: Could you figure it up very easily? Could you make a statement for the Commission, taking in 1, 2 or 6 months?

Mr. Ray: It would be a good job. I could make it.

Mr. Coleman: I wish you would, please. Now, in making your computation was it your purpose to include hardwood in that approximation there?

Mr. Ray: That was figuring on pine.

Mr. Coleman: Why did you not figure on hardwood as well?

Mr. Ray: Well, I could as well as not.

Mr. Kirkpatrick: He can do it for you in a minute if you want it?

Mr. Coleman: You can conveniently also give us the average weight on the movement for a period of a month or three months?

Mr. Ray: I could.

Mr. Coleman: On Hardwood also?

2847 Mr. Ray: Yes, sir.

Examiner Burchmore: It seems it would be well for you to do that. You have put in a comparison on various commodities and they are based on the minimum weight. Now, those are criticized as being merely paper comparisons. Would it not be well to put in the actual figures, the actual loading on what you actually get?

Mr. Ray: We can do that for a month.

Mr. Kirkpatrick: You took the minimum on each car. That was at my suggestion.

Examiner Burchmore: Yes, I should think you ought to take the actual loading.

Mr. Kirkpatrick: The relation would not vary at all.

Examiner Burchmore: Well, you say it would not, and if that is true your comparison is all right.

Mr. Kirkpatrick: We can furnish it gladly.

Mr. Coleman: I very much doubt about it, and I would like if the attorney would like to express himself definitely and in detail on those various commodities, I would like to discuss it with him.

Mr. Kirkpatrick: The time seems to be very short.

Examiner Burchmore: I think you had better furnish the

2848 statement.

Mr. Kirkpatrick: We will be glad to furnish it. We will be glad to furnish the actual weight.

Mr. Coleman: You testified that your rate on yellow pine to Kansas City was 22 cents.

Mr. Ray: Yes, sir.

Mr. Coleman: That is 22 cents now.

Mr. Ray: Yes, sir.

Mr. Coleman: And that 22 cent rate does not apply from De Queen to Kansas City?

Mr. Ray: No.

Mr. Coleman: It is 20 cents from De Queen?

Mr. Ray: Yes, sir.

Mr. Coleman: What is the rate on hardwood lumber from De Queen to Kansas City?

Mr. Ray: I think it is 21 cents at the present time.

Mr. Coleman: You know that?

Mr. Ray: It has been increased here just recently.

Mr. Coleman: It is in effect now?

Mr. Ray: I think so.

Mr. Coleman: And what is the rate on hardwood from points out on your line?

2849 Mr. Ray: The same thing, 21 cents.

Mr. Coleman: What is the purpose of maintaining a difference on hardwood and yellow pine, that is a differential higher on yellow pine from points on your line by comparison with De Queen to Kansas City?

Mr. Ray: Well, I do not know as there is a general reason.

Mr. Coleman: You do not know of any.

Mr. Ray: No.

Mr. Coleman: Do you have anything to do with determining the rates on lumber applying from points on your line?

Mr. Ray: Yes, sir; I do on some.

Mr. Coleman: Not all?

Mr. Ray: No.

Mr. Coleman: What instance would you feel an interest in in taking a hand in the matter?

Mr. Ray: I don't understand your question.

Mr. Coleman: You say on some lumber rates from points on your line you have something to do with determining them. I take it that where you do not your connection, the Kansas City Southern, would fix the rates?

2850 Mr. Ray: I presume so, yes, sir.

Mr. Coleman: I asked you the question, in what instances would you feel sufficiently interested to take a hand in determining the rates?

Mr. Ray: Where we have any business offered for a certain point, or anything that way.

Mr. Coleman: You do not fix up the rates in anticipation of business being offered?

Mr. Ray: We do in some instances.

Mr. Coleman: Then you are at a loss to explain why this differential is carried, is what we are to understand?

Mr. Ray: I think it is more in there to——

Examiner Burchmore: To what?

Mr. Ray: I cannot explain that.

Examiner Burchmore: It is to increase the earnings of this small road, is it not?

Mr. Ray: Yes, sir.

Examiner Burchmore: What did the lumber company use to pay to get its lumber from the mill to Kansas City?

Mr. Ray: It paid that rate, 22 cents.

Examiner Burchmore: 22 cents?

2851 Mr. Ray: Yes, sir.

Examiner Burchmore: And not 24 cents?

Mr. Ray: Not since I have been with them, I don't think so.

Examiner Burchmore: What was the rate from Neal Springs at that time?

Mr. Ray: I could not say.

Examiner Burchmore: What was the rate from De Queen, as a station on the Kansas City Southern?

Mr. Ray: 20 Cents I think.

Examiner Burchmore: Your lumber company paid 2 cents more to get the Kansas City than the man at De Queen?

Mr. Ray: Yes, sir.

Examiner Burchmore: And the Kansas City Southern rendered you no additional services on that lumber more than it rendered anybody else at De Queen?

Mr. Ray: No.

Examiner Burchmore: Why did you pay them 2 cents?

Mr. Ray: It was more than the earning capacity of the road.

Examiner Burchmore: It was more than the earning capacity of the road?

2852 Mr. Ray: As to divisions.

Examiner Burchmore: I don't understand that.

Mr. Cowan: Let me ask a question and I think I can clear this up in a minute and the witness will be bound to answer.

Is it not a fact you put the 2 cents on because that would add 2 cents higher rate to the man that was shipping from points out on your line, is not that the perfectly plain meaning of it?

Mr. Ray: It had the higher rate and gets the same as the Dierks Lumber Company or any other interest on the line.

Mr. Cowan: Yes, if the Dierks do not get it back. There they do not get it back.

Examiner Burchmore: But in a substantial way it would hurt the mills out on the line while in no substantial way would it hurt the Dierks Lumber Company, because it went to a related corporation and they got it back presumably in dividends. The Dierks Lumber Company was interested in the success of this railroad.

Mr. Ray: I presume so.

Examiner Burchmore: I think that it is perhaps unfair to

2853 press the matter further with this witness.

Mr. Coleman: I just wanted to give him an opportunity to answer.

Mr. Kirkpatrick: I think he has answered as far as he knows and fairly.

Examiner Burchmore: I think so too, and any conclusions or deductions which may be drawn from this situation lie in the realm perhaps of argument. We want the facts and we have got his opinion.

Mr. Cowan: To seal this matter up a little further, is there any hardwood mill out on your line?

Mr. Ray: There is.

Mr. Cowan: What is your division on hardwood?

Mr. Ray: It will vary from 2 to 5 cents.

Mr. Coleman: Have you any gum lumber on this line?

Mr. Ray: Yes, sir.

Mr. Coleman: What is the rate on gum lumber to Kansas City?

Mr. Ray: The same rate as oak.

Mr. Coleman: What is the rate on oak?

Mr. Ray: 19 cents—or it is 21 cents now.

Mr. Coleman: What division do you get to Kansas City on

2854 that?

Mr. Ray: Five cents.

Mr. Coleman: Five cents out of the 21 cent rate?

Mr. Ray: Yes, sir.

Mr. Coleman: And that rate is the same from points on your line?

Mr. Ray: Yes, sir.

Mr. Coleman: So in reality you get a higher division on that hardwood than you do on the yellow pine?

Mr. Ray: Yes, sir.

Mr. Coleman: And the rate is lower to Kansas City and you get a higher division?

Mr. Ray: Yes, sir.

Mr. Coleman: How do you explain that?

Mr. Ray: It is the allowance allowed by the Kansas City Southern.

Examiner Burchmore: The originating carrier I believe it is contended usually gets a larger proportion of the revenue than the connecting line gets because it is an originating carrier?

Mr. Ray: It does.

Examiner Burchmore: You are an originating carrier?

2855 Mr. Ray: Yes, sir.

Examiner Burchmore: Then you get a larger proportion of the revenue, that is taking into consideration the service you render, than the Kansas City Southern gets?

Mr. Ray: Yes, sir.

Examiner Burchmore: Do you fix the divisions?

Mr. Ray: Well, it is an amount reached between the Kansas City Southern and ourselves.

Examiner Burchmore: Do you tell the Kansas City Southern what you want or do they tell you what you can have?

Mr. Ray: We ask for it and do the best we can.

Examiner Burchmore: As a matter of fact you have to be satisfied with the best you can get?

Mr. Ray: Yes, sir.

Mr. Andrews: In this particular case the witness has testified he gets exactly the same division in that he gets out.

Mr. Ray: That is on classes and commodities.

Mr. Andrews: And when somebody else originates the business he gets the same as when he originates it.

Examiner Burchmore: Yes. Any further questions?

Mr. Kirkpatrick: You have constructed two or three

2856 regular loading stock yards on your line?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: This demurrage and per diem, does that run? This gentleman asked whether there had ever been any actual demurrage. What does it run per month?

Mr. Ray: The per diem runs about $100 a month on an average.

Mr. Kirkpatrick: That you have to pay?

Mr. Ray: Yes, sir.

Mr. Kirkpatrick: And the demurrage?

Mr. Ray: I should say it runs twenty-five to fifty dollars a month.

Mr. Kirkpatrick: Now there has been no attempt on the part of the Kansas City Southern or any other roads to cancel this rate on anything except yellow pine lumber and oak?

Mr. Cowan: The hardwood mill out on your line is owned by some entirely independent interest?

Mr. Ray: Yes, sir.

Mr. Cowan: I assumed that to be the case. Where is it located?

Mr. Ray: At Lockesburg.

2857 Mr. Coleman: In connection with that demurrage you really suffer no loss of investment or anything in connection with the demurrage on a car, do you?

Mr. Ray: Just about even.

Mr. Coleman: Well, it is not a car of your company as a rule that handles the lumber going from a point on your line beyond?

Mr. Ray: It is not the car of our company, you say?

Mr. Cowan: It is not a car of your company?

Mr. Coleman: It is a car from a connection?

Mr. Ray: Yes, sir.

Mr. Coleman: On that car you pay 25 cents per diem?

Mr. Ray: 35 cents.

Mr. Coleman: And your demurrage is $1.00?

Mr. Coleman: So really you make 65 cents a day whenever there is a demurrage on somebody else's property do you not?

Mr. Ray: If it is on hand over three days we would.

Mr. Coleman: We are talking about demurrage, when demurrage obtains. So really it is a matter of bookkeeping, inasmuch as the interests that own the railroad own the mill when it is a ques-

2858 tion of the Dierks Lumber Company, and you are really making the difference that you may charge to the company; they are getting that as an offset in their earnings?

Mr. Ray: Not any more than anybody else.

Mr. Coleman: You do not give back any of it to the other shipper?

Mr. Ray: No, sir.

Mr. Coleman: He is not interested in the railroad?

Mr. Ray: No.

Examiner Burchmore: Has this railroad company ever paid any rebates to the lumber company?

Mr. Ray: No, sir; not as I know of.

Mr. Kirkpatrick: There is a certain amount of free time allowed any shipper on the road, the Dierks Lumber Company as well as anybody else.

Mr. Ray: Two days.

Mr. Kirkpatrick: During that time you have to pay the per diem?

Mr. Ray: We do.

Mr. Kirkpatrick: So there is not any very big amount of money in the proposition as this gentleman seems to think?

2859 Mr. Ray: No.

Mr. Coleman: He has not any investment in the car either.

Mr. Kirkpatrick: Well he is paying for it every day.

Examiner Burchmore: I believe that is enough on that question. Have you any contracts with the Kansas City Southern?

Mr. Ray: I believe we have one which covers the scales.

Examiner Burchmore: You have not any rate or division contract?

Mr. Ray: No.

Examiner Burchmore: I will request counsel to file a map of this road. You understand what kind of a map we want?

Mr. Kirkpatrick: Yes.

Examiner Burchmore: Will you give us a statement of your revenue and tonnage?

Mr. Kirkpatrick: Yes, sir; I will do that, and want to do it. I also understood this forthcoming annual statement to be considered in this case.

Examiner Burchmore: It is understood all the annual re-
2860 ports of these companies will be considered.

Mr. Kirkpatrick: I am especially anxious for this one, on account of the fact that it runs during a time when the mill was not in operation, and the delay in getting it out was on account of the delay in furnishing the blanks. There were about two months that we did not get them.

I also want to furnish a statement as requested by these gentlemen, showing the tonnage separated. We have shown the dollars and cents, but I would also like to show the tonnage in that statement.

2861 Examiner Burchmore: The Missouri & Louisiana Railroad.

Mr. Walter: Before that is taken up I want to make one suggestion for the record. Apparently the Commission has some information from cases like the Neal Springs Lumber Company, where certain information may have been given to the Commission as to why a certain concern is not able to do business as it thinks it ought to. Now on behalf of all these so-called tap lines we make the formal statement to the Commission that we desire the Commission to call as witnesses parties who give information so that they may be cross examined. I do not think it is proper that our clients should be denied the right to inquire into the facts that may go to bear upon the righteousness of a decision in these cases, and therefore I suggest as to Neal Springs, if any such information has come to the Commission, that some party who knows the facts should be called as a witness under oath——

Examiner Burchmore: May I suggest, take that Neal Springs case, all I know is that from reports that have reached us there is a private tram road at Neal Springs that is called the Little River Valley Railroad, and we know that is owned by the Neal
2862 Springs Lumber Company, and that it has no allowance, and that is all we did know. And I asked this gentleman if they were interested in the business and he said they were not.

Mr. Walter: There might be some inferences from that unsupported statement and from the evidence that comes to you that because it did not get allowances it was driven out of business. Our information is entirely different as to why that lumber company is not now in business.

Examiner Burchmore: Do you think that fact one way or the other will fix the status of this railroad?

Mr. Walter: No, but it might have a bearing upon the general proposition as to whether the Commission will or will not allow joint rates with the lumber producing lines.

Examiner Burchmore: I feel some hesitancy in laying before the Commission the request to subpœna as witnesses an unknown

and inaccurately described class of persons, all the persons who may have given us information. If you have any particular person whom you have in mind——

Mr. Walter: No, all the request we have is that the Commission give no attention to unauthentic and unsupported evidence without opportunity for cross examination by parties interested in
2863 this proceeding.

Examiner Burchmore: I am quite sure that the Commission will not.

Mr. Walter: That is what I thought, but I wanted the record to show so.

Examiner Burchmore: But the Commission in reaching its decision in any case has to exercise its judgment and discretion and its judgment upon all the knowledge it has of the geography, the conditions, and everything else.

Mr. Walter: That is true, but I did not want the Commission to be imposed upon. I have great confidence in its judgment.

Mr. Kirkpatrick: I would like to have noted the request that I may file a brief after I receive a copy of the evidence.

Examiner Burchmore: Your request is noted. I may say I do not know what the Commission will do in the matter of briefs, but it will take it up in its own way.

Mr. Kirkpatrick: I understood Commissioner Harlan to say before he went away, that opportunity would be given to file briefs.

Examiner Burchmore: My impression is you will be given an opportunity to file briefs, but the suggestion I might make
2864 is that it would be wise to make your briefs as brief as possible.

Mr. Kirkpatrick: It would be brief if I filed it.

2865 *Missouri & Louisiana Railroad Company.*

JOHN A. SARGENT, was called as a witness, and having been duly sworn, testified as follows:

Examiner Gutheim: Give your name in full?

Mr. Sargent: John A. Sargent.

Examiner Gutheim: Your place of residence?

Mr. Sargent: Kansas City.

Examiner Gutheim: Your occupation is what?

Mr. Sargent: Vice-President and General Manager of the Missouri & Louisiana Railroad Company.

Examiner Gutheim: That is the company usually known as the Central Coal & Coke Railroad?

Mr. Sargent: Yes, sir.

Examiner Gutheim: And will you explain briefly just where that railroad operates and what properties it serves?

Mr. Sargent: It has two lines in Louisiana, the business practically being confined to handling logs and the product of the Central Coal & Coke Company, one mill property being located at Carson and the other at Neame, La. It has another property in

the red line in Arkansas reaching the mines in what is known as the Sonora, Arkansas, district. It has another in Northern Missouri, Macon County, reaching the mines in the district.

Examiner Guilbert. Will you execute and file with the Commission maps which will show the general geographical position of the lines operated with the various line connections?

Mr. Sargent. Large maps we understand——

Examiner Guilbert. Maps about the size (indicating).

Mr. Sargent. Just the usual condition?

Examiner Guilbert. Showing the usual conditions.

Mr. Sargent. Yes, sir.

Examiner Guilbert. Now what is the capital stock of the Missouri & Louisiana Railroad Company?

Mr. Sargent. $750,000.

Examiner Guilbert. Is all that outstanding?

Mr. Sargent. Yes.

Examiner Guilbert. And who holds it?

Mr. Sargent. Owned by the Central Coal & Coke Company.

Examiner Guilbert. Entirely?

Mr. Sargent. It stands in the name of individuals that hold it in trust.

Examiner Guilbert. Are the officials of the railroad company all connected with the Central Coal & Coke Company as officials?

Mr. Sargent. The general officials are, yes, sir.

Examiner Guilbert. Are you personally connected with the Central Coal & Coke Company in an official capacity?

Mr. Sargent. I do not know whether I would be called an official; I am employed by the Central Coal & Coke Company.

Examiner Guilbert. Taking up the lumber properties in Louisiana, the mill at Carson is served by a branch that connects with the Kansas City Southern?

Mr. Sargent. Yes, but it has a connection with the Santa Fe and the Southern Pacific also.

Examiner Guilbert. By the Southern Pacific you mean the Lake Charles & Northern Line?

Mr. Sargent. The Lake Charles & Northern property of the Southern Pacific.

Examiner Guilbert. About how much of a haul is it from the Carson mill to the Kansas City Southern?

Mr. Sargent. I suppose in the neighborhood of three or four thousand feet, something like that.

Examiner Guilbert. Is that haul performed by the Missouri & Louisiana?

Mr. Sargent. We do all the switching.

Examiner Guilbert. How much of a haul is there to the Lake Charles & Northern connection?

Mr. Sargent. I think from the mill it is about 3.8 miles, something like that.

Examiner Guilbert. How far do you have to go to get to the Santa Fe?

Mr. Sargent: Approximately nine miles.

Examiner Gutheim: As a matter of fact do you make many deliveries to the Santa Fe?

Mr. Sargent: Yes, sir, we do a little business with the Santa Fe right along.

Examiner Gutheim: Does the great majority of the business go to the Kansas City Southern and the Lake Charles & Northern, though?

Mr. Sargent: Well, we do more business with the Southern Pacific Lines than with the Santa Fe, but the Kansas City Southern has more than the other two combined.

Examiner Burchmore: You do not give the Santa Fe any
2869 traffic destined to points other than local points on its line?

Mr. Sargent: Yes, we do at certain times, the business has to move certain routes.

Examiner Gutheim: About how much of a log haul do you have to reach the Carson mill.

Mr. Sargent: The railroad itself takes up logs where the spurs connect anywhere from 5 to 10 miles away from the main line.

Examiner Gutheim: Going to Neame, about how much track have you going into the woods there?

Mr. Sargent: At the present time about six miles of main line.

Examiner Gutheim: And that track all lies to the west of the Kansas City Southern?

Mr. Sargent: That track all lies west of the Kansas City Southern, practically so.

Examiner Gutheim: How long since you quit operating to the east of the Kansas City Southern?

Mr. Sargent: I think about a year.

Examiner Gutheim: And about how far did you operate in that direction?

Mr. Sargent: East?

2870 Examiner Gutheim: Yes.

Mr. Sargent: Approximately 20 miles.

Examiner Gutheim: Since you ceased logging east of the Kansas City Southern what has become of the track formerly known as the Missouri & Louisiana Railroad track?

Mr. Sargent: Some time before the lumber company ceased operations east of the Kansas City Southern track we made a contract with the Louisiana Central Railroad Company, and sold them a half interest in the property, the contract further providing that an extension approximating five miles was to be built by the Louisiana Central and we were to pay 50 per cent of the cost, all of which was accomplished. The contract further providing that the Louisiana Central had the option on that property, and they actually purchased it, I think a year ago last March.

Examiner Gutheim: The Louisiana Central you spoke of is the so-called tap line of the Pickering interests?

Mr. Sargent: Yes, sir.

Examiner Gutheim: Did they take over all of the old Missouri & Louisiana tracks east of the Kansas City Southern or only a portion?

Mr. Sargent: Our contract with them for sale covered only
2871 part of the line, about 14 or 15 miles maybe. The remaining, somewhere between four and five miles we retained to ourselves.

Examiner Gutheim: Has that been taken up?

Mr. Sargent: Most of it has.

Examiner Gutheim: You said that as to the Missouri & Louisiana running from both Carson and Neame, that the business was practically confined to the hauling of logs and supplies for the Central Coal & Coke Company.

Mr. Sargent: Unfortunately for the railroad that is about all there is.

Examiner Burchmore: In the case of the Carson line, if I may interrupt, is it not a fact that it operates exclusively for the Central Coal & Coke Company? You have not any tonnage at all for others?

Mr. Sargent: That is my reply, there is nothing else.

Examiner Gutheim: What you mean is you only pick up an occasional shipment for somebody who wants it taken out into the woods for somebody else?

Mr. Sargent: That is the idea.

Examiner Gutheim: At Neame you have the Kansas City Southern only for a carrier connection?

Mr. Sargent: Yes, sir.

2872 Examiner Gutheim: Does the Kansas City Southern or the Missouri & Louisiana handle out the product of the mill?

Mr. Sargent: The Kansas City Southern do the switching at Neame.

Examiner Gutheim: You perform no service whatever on the milled product?

Mr. Sargent: Not on the manufactured product.

Examiner Gutheim: Will you give generally the range of divisions you receive on the product of both of those mills at Carson and Neame, from the Kansas City Southern?

Mr. Sargent: Well, I suppose the average is in the neighborhood of two cents. It runs from a fraction of a cent up. It varies as to the territory, that is where the business is destined.

Examiner Gutheim: The maximum is what?

Mr. Sargent: I guess about three cents.

Examiner Gutheim: And it will average about two cents?

Mr. Sargent: I should guess that.

Examiner Gutheim: You get no divisions from the Santa Fe, of course?

Mr. Sargent: No.

Examiner Burchmore: Is that reply as to the minimum
2873 of three cents correct?

Mr. Sargent: I have not the divisions in my hand, but I think you will find them attached to your reports there which will show absolutely.

Examiner Burchmore: Is it not a fact you get four cents on some traffic from each of those places?

Mr. Sargent: Your Honor, at the present time I could not answer.

There is some business that pays maybe four cents. The sheets will have to speak for themselves. They can be furnished.

Examiner Gutheim: It is my recollection that on the blanket division sheet that was filed for a lot of these companies there were a few points, not more than half a dozen, that paid four cents, and that is where the maximum of four cents came from at that time. What divisions do you get from the Lake Charles & Northern, the Southern Pacific Line?

Mr. Sargent: They run about the same as the Kansas City Southern, one cent to—I am not really certain that they even allow more than two cents, even where the Kansas City Southern may.

Examiner Gutheim: You mean that the Lake Charles &
2874 Northern maximum is two cents?

Mr. Sargent: That is my recollection, but that division sheet is also on file.

Examiner Gutheim: It is my impression that that division sheet is not on file, for at the time the examination was made the Lake Charles & Northern connection had not been completed.

Mr. Sargent: Well, I did not bring it with me, but it is pretty nearly identical with the Kansas City Southern.

Examiner Gutheim: Will you obtain and file with the Commission a copy of the division sheet with the Lake Charles & Northern?

Mr. Sargent: Yes, I will file one.

Examiner Gutheim: Now are these divisions by the Kansas City Southern and the Lake Charles & Northern covered by a written contract other than the division sheets themselves?

Mr. Sargent: No contracts.

Examiner Gutheim: Where does the Bonanza Line connect with the carrier?

Examiner Burchmore: May I suggest, suppose we dispose of these two lumber company connections and permit counsel to have
2875 cross examination on them before we turn to the coal.

Examiner Gutheim: Will counsel proceed with the cross examination as to the lumber company now then?

Examiner Burchmore: There are one or two questions I want to ask, because I am not familiar with this property. This is all one corporation, this railroad company?

Mr. Sargent: Yes, sir.

Examiner Burchmore: The Missouri & Louisiana Railroad operates, as I understand, four detached properties?

Mr. Sargent: Yes, sir.

Examiner Burchmore: That have not any connections?

Mr. Sargent: No.

Examiner Burchmore: They are like that N. K. & T. floating rib down there that we heard about yesterday, with respect to each other?

Mr. Sargent: Yes, sir.

Examiner Burchmore: You have one line in the vicinity of Carson, La.?

Mr. Sargent: Yes, sir.

Examiner Burchmore: And that line has certain rolling stock, cars and locomotives?

Mr. Sargent: Yes, sir.

2876 Examiner Burchmore: And that rolling stock is confined in its movements to that line?

Mr. Sargent: Yes, sir, unless for some reason we need to move an engine to another point for temporary service.

Examiner Burchmore: When you do that you pay the carriers the same rate for the privilege of moving your engine up to another place?

Mr. Sargent: That is a published rate per mile that is paid.

Examiner Burchmore: And do you pay it?

Mr. Sargent: Yes, sir.

Examiner Burchmore: The sawmill at Carson is how far from the connection with the Kansas City Southern?

Mr. Sargent: I suppose three or four thousand feet; it is adjacent to the Kansas City Southern right of way.

Examiner Burchmore: Your other mill at Neame, did I understand that a portion of the former line of that railroad had been sold to the Louisiana Central?

Mr. Sargent: Yes, sir.

Examiner Burchmore: And another portion is now being jointly operated?

Mr. Sargent: No, the joint operation has ceased.

2877 Examiner Burchmore: The joint operation ceased and you sold it?

Mr. Sargent: Yes, sir.

Examiner Burchmore: It was formerly jointly operated?

Mr. Sargent: Yes, sir.

Examiner Burchmore: When you jointly operated it, how did you divide the operating expenses between the two companies?

Mr. Sargent: Based up on wheelage.

Examiner Burchmore: Was there a contract under which that joint operation was carried on?

Mr. Sargent: Yes, sir.

Examiner Burchmore: It is filed with the Commission?

Mr. Sargent: Yes, sir.

Examiner Burchmore: What was the date of the sale of that portion of the road?

Mr. Sargent: I am mixed on that, but my impression is it was a year last March.

Examiner Burchmore: Along about March, April or May, 1909?

Mr. Sargent: That is my recollection.

Examiner Burchmore: Do you remember what the sale price was, or is there objection to furnishing that?

Mr. Sargent: Well, it is easy enough to tell what the sale

2878 price was. They were to pay us a fixed price for the railroad that was to be eventually sold under the terms of this contract, and then when they purchased our half interest that is just what they paid us for the other half, so the figures in the contract tell that. However that contract does not show the cost of the line that was constructed following the completion of that contract, about five miles being extended towards the east toward

Cravens, La., and I don't remember how much it was, but our 50 per cent was just what the bills called for.

Examiner Burchmore: Now do you handle any logs or lumber down there at the Neame Branch of your road for any other lumber companies?

Mr. Sargent: No, sir.

Examiner Burchmore: Do you handle anything for the Pickering Lumber Company?

Mr. Sargent: Not now.

Examiner Burchmore: How long since you ceased to haul logs or lumber for the Pickering people?

Mr. Sargent: I think a year last March.

Examiner Burchmore: At the same time it was sold?

Mr. Sargent: Yes, sir.

2879 Examiner Burchmore: When you did haul the lumber you charged them $2.50 a car, did you not?

Mr. Sargent: We switched lumber for them at $2.50 per car in some instances.

Examiner Burchmore: How far did you switch it for them?

Mr. Sargent: About four and a half miles.

Examiner Burchmore: That was four and one half miles on a loaded car and four and one half miles on the empty?

Mr. Sargent: Yes, sir.

Examiner Burchmore: Was not that grossly inadequate compensation?

Mr. Sargent: It was, but it was a temporary arrangement made until only the whole line could be completed, for this reason, that the Louisiana Central at the time the contract was made, had no physical connection with our railroad. They were building south from Pickering to a little junction that was known and will be shown on the map as Norlan and their mill at Cravens was operating and for a period of a few months and until they completed their construction we did as lots of carriers do, help out another carrier to overcome their temporary disability.

2880 Examiner Burchmore: Did I understand that the capital stock of this railroad company is held by certain persons in trust?

Mr. Sargent: No deed of trust was ever executed, but it is in fact the situation.

Examiner Burchmore: That is in trust for the Central Coal & Coke Company?

Mr. Sargent: Yes, sir.

Examiner Burchmore: Have any dividends ever been paid on that stock?

Mr. Sargent: Yes, sir.

Examiner Burchmore: Just tell us about the dividends?

Mr. Sargent: I cannot, but it is in your report.

Examiner Burchmore: Quite substantial?

Mr. Sargent: They have been at times.

Examiner Burchmore: Have they run as much as six per cent per year on the average?

Mr. Sargent: Six per cent?
Examiner Burchmore: Yes.
Mr. Sargent: I think more.
Examiner Burchmore: Ten per cent per annum?
Mr. Sargent: Maybe more than that, I don't remember.
2881 Examiner Burchmore: I just wanted counsel to be able to find from this testimony, as they have not access to our reports. Are there any bonds?
Mr. Sargent: No bonds.
Examiner Burchmore: Is there any other statement you wish to make? I understand your counsel is not here to examine you.
Mr. Sargent: I have no counsel.
Examiner Burchmore: Any further statement you wish to make concerning the general character of the company or its operations of these two lines before you are cross examined?
Mr. Sargent: No, but I may want to after being cross examined.
Examiner Burchmore: You may have that opportunity. Mr. Andrews, have you any questions?
Mr. Andrews: Under what governmental authority is the Missouri & Louisiana Railroad Company incorporated?
Mr. Sargent: Missouri.
Mr. Andrews: The State of Missouri?
Mr. Sargent: Yes.
Mr. Andrews: Do you own any railroad in the State of Missouri?
2882 Mr. Sargent: Yes, sir.
Mr. Andrews: How much?
Mr. Sargent: Ten miles of main line and about that much more of surveys tracks, to the coal field.
Mr. Andrews: You also own in Arkansas and Louisiana?
Mr. Sargent: In Arkansas we lease, we do not own any.
Mr. Andrews: You do not own any tracks in Arkansas?
Mr. Sargent: No.
Mr. Andrews: The Missouri & Arkansas propositions serve coal industries, as I understand?
Mr. Sargent: Yes, sir.
Mr. Andrews: And what you own in Louisiana serves lumber interests?
Mr. Sargent: Yes, sir.
Mr. Andrews: I have not quite understood the physical situation of the roads in Louisiana. How many miles of line is there at Carson at the present time?
Mr. Sargent: It is about 13 miles, the main line.
Mr. Andrews: Running from where to where?
Mr. Sargent: Running from Pu Jo, La., the Santa Fe connection, generally in an easterly direction crossing the Kansas City
2883 Southern on east to a connection with the Lake Charles & Northern at what is known as C. C. Junction.
Mr. Andrews: And the mill is located at the intermediate crossing of the Kansas City Southern.

Mr. Sargent: Yes, sir.

Mr. Andrews: So that the real purpose of building the road was to give you the connection with three trunk lines as an outlet for your lumber products?

Mr. Sargent: Well, so far as the connection with the Santa Fe is concerned, we were there first.

Mr. Andrews: You got there before they built in?

Mr. Sargent: Yes, sir.

Mr. Andrews: Is that on the De Ridder Branch?

Mr. Sargent: That is on the De Ridder Branch.

Mr. Andrews: You built there before they built in?

Mr. Sargent: Yes, sir.

Mr. Andrews: How were you there before they built in? Were you tramming out to the timber?

Mr. Sargent: The main line ran to a point perhaps a mile or two north of the Santa Fe right of way.

Mr. Andrews: That was the means of tramming out to the timber?

2884 Mr. Sargent: There were the trams out beyond that, but before the Santa Fe had their lines completed or about that time, those trams north of the Santa Fe track were abandoned because the timber had been cut out by the mill company.

Mr. Andrews: Are you logging any north of the Santa Fe at this time?

Mr. Sargent: Not now.

Mr. Andrews: Any timber left north of the Santa Fe?

Mr. Sargent: Yes, sir.

Mr. Andrews: What quantity?

Mr. Sargent: Not very much.

Mr. Andrews: Approximately how much?

Mr. Sargent: Well, I don't believe I could even make a close guess at that. It is scattering and it is to the west of Pu Jo several miles. I presume that there is enough timber up there to keep a mill busy eight or ten months, if they go into that, which I understand is possible.

Mr. Andrews: Does the Central Coal & Coke Company own all that timber in its own name, or in the name of others?

Mr. Sargent: In its own name.

Mr. Andrews: In its own name?

Mr. Sargent: So far as I have ever heard.

2885 Mr. Andrews: The Central Coal & Coke Company furnished the money to build the railroad?

Mr. Sargent: Indirectly, yes.

Mr. Andrews: Well, it came out of the pocket of the Central Coal & Coke Company, is the direct inquiry.

Mr. Sargent: I would have to go back into history to tell you exactly how it happened.

Mr. Andrews: Unless you want to tell it, all I am interested in is in knowing whose pocket it came from. If you want to tell the details I have no objection.

Mr. Sargent: To be as brief as possibly, the Central Coal & Coke Company organized many years ago the Arkansas & Choctaw Railroad, and that company as a corporation did build the railroads in Louisiana. The Arkansas & Choctaw was sold to the Frisco. The Arkansas & Choctaw started at Ashdown and went west with a charter from the government to build through the Indian Territory. The Frisco acquired that property mostly because they wanted that charter. But when it was sold the equipment and all detached lines were retained by the coal company. They did not go with the sale of the main line of the Arkansas & Choctaw Road, so that the corporation that they originally organized, the Arkansas & Choc-
2886 taw, built these properties, but in the part of the sale it was to retain these detached parts, and the balance was cash.

Mr. Andrews: Well, the Central Coal & Coke Company furnished the money for the original construction?

Mr. Sargent: That was so long ago and before my connection with the company, that I could not say whether the coal company as a company furnished the money for the Arkansas & Choctaw.

Mr. Andrews: But it lent it to the railroad company, and the railroad company used it to build the railroad.

Mr. Sargent: They financed the proposition, yes, sir.

Examiner Burchmore: What do you think of this suggestion: Could you furnish to the Commission in a letter, after conferring with the officers of the railroad who are advised of the fact, a narrative statement of the construction, history of each of these four detached properties, and then a narrative statement, omitting the non-essential details, of the financial history of its operation.

Mr. Sargent: As to the Louisiana Lines I have told it already.

2887 Examiner Burchmore: Yes, but it is a little scattered in the record, and if you could give us a narrative story of the construction of all the roads and also the financing of the properties, that would be of great value as supplementing your testimony here.

Mr. Sargent: I will make a try at it, but I do not know what more I can say.

Examiner Burchmore: There are some things you said you do not know.

Mr. Sargent: Well, only as to this fact, whether the Coal Company put in the money in the Arkansas & Choctaw Road, or whether they as individuals raised the money to start the construction of the Arkansas & Choctaw. I do not remember because that was before my connection with the company, but the Central Coal & Coke Company undoubtedly financed the property, or it could not have been launched.

Examiner Burchmore: We understand, or my impression from your testimony so far is that the Central Coal & Coke Company is now the beneficiary under a trust or the beneficial owner of this railroad.

Mr. Sargent: Yes, sir.

2888 Examiner Burchmore: And my impression is originally financed the railroad in a substantial sense, it furnished the money.

Mr. Sargent: That is correct.

Examiner Burchmore: If your impression is any different, I think you ought to give us a statement later on of the variation.

Mr. Sargent: My impression is not any different.

Mr. Andrews: How much timber holdings has the C. C. & C. C. at the present Carson Mill?

Mr. Sargent: Do you mean that will be manufactured at the Carson Mill?

Mr. Andrews: Yes, that is left.

Mr. Sargent: A whole lot of it.

Mr. Andrews: Well, in feet?

Mr. Sargent: They have about 12 years' supply of timber back of that mill at the present time.

Mr. Andrews: What does that mean in feet?

Mr. Sargent: Well, they turn out about 60,000,000 feet per annum.

Mr. Andrews: 60,000,000 feet per annum?

Mr. Sargent: Yes.

2889 Mr. Andrews: Then you have about 360,000,000 feet of standing timber contiguous to that mill?

Mr. Sargent: Well, it is contiguous to that so far as I know.

Mr. Andrews: And I believe you said that that railroad company handled no business except for the lumber company?

Mr. Sargent: There is no other business.

Mr. Andrews: Your mill at Neame, how much mileage have you there?

Mr. Sargent: The line west is being constructed slowly——

Mr. Andrews: First, what track is your mill on, trunk line track?

Mr. Sargent: The Kansas City Southern.

Mr. Andrews: How far from the track?

Mr. Sargent: It is adjacent to the right of way.

Mr. Andrews: That is a north and south trunk line at that point or east and west?

Mr. Sargent: North and south approximately.

Mr. Andrews: Where does the track of the Missouri & Louisiana Railroad Company run from the mill?

Mr. Sargent: Well, it starts out in a southerly direction crossing the Kansas City Southern main line south of the town of

2890 Neame and then starts west. There is about seven or eight miles built so far.

Mr. Andrews: To where?

Mr. Sargent: It is nothing but the end of the line.

Mr. Andrews: Just to the woods?

Mr. Sargent: Into the woods.

Mr. Andrews: And there you tram out to your timber?

Mr. Sargent: Yes.

Mr. Andrews: Any other mileage there besides that?

Mr. Sargent: Not that the railroad operates. The mill company has its laterals of course, all over the woods.

Mr. Andrews: There are no stations or other facilities for being a railroad?

Mr. Sargent: None needed out there for the business we handle.
Mr. Andrews: That belongs to the Central Coal & Coke Company?
Mr. Sargent: Yes, sir.
Mr. Andrews: In the same way?
Mr. Sargent: In the same way.
Mr. Andrews: Was it constructed in the same way or was
2891 it constructed after the line we have just asked you about?
Mr. Sargent: That was constructed after.
Mr. Andrews: When did that construction begin?
Mr. Sargent: I think it was started about a year ago last March.
Mr. Andrews: The Central Coal & Coke Company furnished the money to build that?
Mr. Sargent: Yes.
Mr. Andrews: It was built with the company's money?
Mr. Sargent: Yes.
Mr. Andrews: The Central Coal & Coke Company also owns the mill at that point?
Mr. Sargent: Yes.
Mr. Andrews: Does that line do any business of any kind at all except for the mill or for the Central Coal & Coke Company?
Mr. Sargent: It has no other business at present.
Mr. Andrews: It produces all the traffic that the railroad handles?
Mr. Sargent: At present.
Mr. Andrews: And you have explained the divisions that you get on the Carson mill. Do you get the same divisions on
2892 the Neame Mill?
Mr. Sargent: Except there is no arrangement for divisions except with the Kansas City Southern.
Mr. Andrews: You do not reach anything but the Kansas City Southern?
Mr. Sargent: No, not now.
Mr. Andrews: Consequently you have no other company to arrange divisions with? Do you get the same divisions with the Kansas City Southern there that you do with the Kansas City Southern at Carson?
Mr. Sargent: Yes.
Mr. Andrews: When you were asked by the Examiner if the Missouri & Louisiana Railroad Company had declared any dividends you meant the railroad company, as to all of its properties?
Mr. Sargent: Yes, sir.
Mr. Andrews: Have either of these lumber lines that I have asked you about declared any dividends?
Mr. Sargent: The income and expenses are all kept together, and if they combined have a net earning, that is distributed as a dividend.
Mr. Andrews: How is it distributed as a dividend?
2893 Mr. Sargent: In dividends declared in the usual way.
Mr. Andrews: Maybe I misunderstood you. You mean

all these four isolated pieces of property are kept as one property in bookkeeping and reported to the Commission?

Mr. Sargent: Yes, sir, the reports to the Commission show the reports of all as one line.

Mr. Andrews: Then you keep no separate books as to these mills in Louisiana?

Mr. Sargent: Yes, sir, that is merely a matter of bookkeeping, to make the reports necessary.

Mr. Andrews: Then I will change the question and ask you if you keep these separate accounts, whether there have been annual earnings and net profits on either of these Louisiana lines?

Mr. Sargent: Some years, yes.

Mr. Andrews: To what extent?

Mr. Sargent: I think I can give you approximately what you want. The earnings received from divisions have never met the operating expenses that I can recall. They may have come close to it some time, but the surplus——

Mr. Andrews: Can you give it to us in this form, the
2894 earnings from divisions, say take the Carson line first, can you give us the earnings from divisions there?

Mr. Sargent: I think I have that here. I have three years, the fiscal years ending June 30th, 1908, 1909 and 1910.

Mr. Andrews: The earnings from divisions now?

Mr. Sargent: Yes, sir.

Mr. Andrews: What are they?

Mr. Sargent: 1908, $16,788.21; 1909, $15,411.91; 1910, $14,-390.10.

Mr. Andrews: What were your total operating expenses for those three years?

Mr. Sargent: 1908, $25,587.73; 1909, $23,827.36; 1910, $20,-249.76.

Mr. Andrews: Your total operating expenses include all services performed by the railroad for the lumber company, do they not?

Mr. Sargent: Yes, all that the railroad does perform itself.

Mr. Andrews: Can you give us the same figures on the Neame plant?

Mr. Sargent: Yes, sir. The income from divisions in 1908 was $10,912.80; 1909, $11,700.70; 1910, $16,174.82.

2895 Mr. Andrews: And the gross operating expenses?

Mr. Sargent: 1908, $30,709.21; 1909, $11,668.02.

Mr. Andrews: Why is that enormous discrepancy?

Mr. Sargent: That is about the time we quit operating that 20 miles of road and started in a westerly direction where there are only seven or eight miles in operation, and as we got on the operating expenses come up a little; in 1910 the operating expenses were $15,590.14.

Mr. Andrews: In regard to logging the mill, what service does the railroad company perform?

Mr. Sargent: The railroad company performs the service of hauling the logs from the woods into the mill site.

Mr. Andrews: Well, that is indefinite, as the railroad itself ends

in the woods, according to your testimony. Do you go out on the sprangled branches of the tram where the cars are loaded and bring the cars in?

Mr. Sargent: In emergency cases only.

Mr. Andrews: Well, what is the custom?

Mr. Sargent: The lumber company has at each plant two engines of its own that it operates and maintains. They do all the woods work, and look after the construction trains which are all
2896 there is. We have nothing whatever to do with that.

Mr. Andrews: They bring them up to this imaginary point where the railroad ends and the tram begins and deliver them to the railroad?

Mr. Sargent: They bring them to the main line. There may be several trams attached to the main line.

Mr. Andrews: From your so-called main line there are several trams sprangled through the woods?

Mr. Sargent: Yes, sir.

Mr. Andrews: They bring them to this point on the main line and you take them there?

Mr. Sargent: Yes, sir, that is the usual way.

Mr. Andrews: Do you lease the lumber company any equipment for that work?

Mr. Sargent: In the case of each plant there are three engines.

Mr. Andrews: Three engines at each plant?

Mr. Sargent: And two of the engines belong to the railroad company, purchased by them, and one in each case belongs to the Central Coal & Coke Company and we lease to them under a verbal arrangement the use of one of our own engines at each point.

2897 Mr. Andrews: What do they pay you for it?

Mr. Sargent: Their sum total payment to us is based upon a log measure. For all the service we render them of moving camp outfits over the main line and extraordinary switching in case they have troubles, for the use of engines. We aim to charge them uniformly 75 cents a thousand. We arrive at that however, in this way. It saves a good deal of bookkeeping. To take it upon the wheel report and charge so much per car, $3.00, which reduced to a thousand feet, the cars averaging about 4,000 pounds, we get about 75 cents.

Mr. Andrews: A thousand feet?

Mr. Sargent: Yes, sir.

Mr. Andrews: Who furnishes the logging cars?

Mr. Sargent: The logging cars belong to the coal company.

Mr. Andrews: And the other equipment of course, belongs to the coal company except the engines which you have mentioned?

Mr. Sargent: Yes. I do not believe there is any equipment at either plant.

Mr. Andrews: That is true at both plants, the same method of operation at both plants?

2898 Mr. Sargent: Yes.

Mr. Andrews: Who routes the shipments when they move out?

Mr. Sargent: The lumber company.

Mr. Andrews: Does not the railroad company have anything to do with the routing?

Mr. Sargent: No, they have a rate man in their office at Kansas City, and he gets an order and he puts the correct rate on them and puts on all routes available and that is the way the order goes to the mill.

Mr. Andrews: Are you Traffic Manager for the railroad company?

Mr. Sargent: No, I am Vice President and General Manager of the railroad company.

Mr. Andrews: Have you a Traffic Manager for the railroad company?

Mr. Sargent: No.

Mr. Andrews: Have you a traffic manager for the lumber interests, the C. C. & C. C. interests?

Mr. Sargent: I am traffic manager for the lumber interests.

Mr. Andrews: Manager for the railroad and traffic manager for the other interests?

2899 Mr. Sargent: Yes.

Mr. Andrews: And when the routing is made up in your office do you make it up as the traffic manager of the lumber company, or as general manager of the railroad company?

Mr. Sargent: As the coal company's employee, I personally do not handle such matters. I do not see an order once in six months.

Mr. Andrews: Well, it is subject to your direction if you see fit to change it?

Mr. Sargent: Certainly.

Mr. Andrews: As a matter of fact it is left to the interest of the railroad company to get the best rate that can be obtained on a shipment to a particular destination, is it not?

Mr. Sargent: Not rate.

Mr. Andrews: Division.

Mr. Sargent: We have got to consider actually the rate that is in effect.

Mr. Andrews: I understand.

Mr. Sargent: And the rate man furnishes the information and furnishes all the available routes.

2900 Mr. Andrews: I corrected the word rate by saying division.

Mr. Sargent: The divisions are the same.

Examiner Burchmore: Is it not correct to say and is it not the final fact that we want to ascertain, that in routing each carload the agent of the coal company that gives the routing instructions, takes into consideration the rights of the railroad and the results to the Missouri & Louisiana Railroad in the way of divisions?

Mr. Sargent: Well, he would in a case like this, if the division on a shipment that could move via the Southern Pacific was one cent, and the division on a shipment destined to that same particular point was two cents if moving via the Kansas City Southern, the railroad would use the Kansas City Southern route.

Mr. Andrews: That is exactly what I asked you, if you did not route it with reference to the best divisions.

Mr. Sargent. But I want to explain there was little occasion for doing that because the divisions are practically identical.

Mr. Andrews. For instance, if you had a shipment going from the Carson Mill to Kansas City you would not route it over the Santa Fe unless you could not possibly get a car from anybody else and had to put on the shipment.

Mr. Sargent. Naturally we would not, because as a railroad we would have to haul it nine miles and only switch it a short distance in the other.

Mr. Andrews. Then as traffic manager of the lumber company you get the best rate you can, and as manager for the railroad company you get the best division you can, you get the best results you can in either case?

Mr. Sargent. I suppose that is the final outcome of it, but it is a matter I never give any consideration to.

Mr. Gaffney. Do you ship lumber to Texas?

Mr. Sargent. Yes, sir.

Mr. Gaffney. Could you state in a general way to what territory largely you ship it?

Mr. Sargent. I suppose that is the final outcome of it, but it is a matter I never give any consideration to.

Mr. Gaffney. Do you ship lumber to Texas?

Mr. Sargent. Yes, sir.

Mr. Gaffney. Could you state in a general way to what territory largely you ship it?

Mr. Sargent. Well, business is scattered all over.

Mr. Gaffney. No special territory?

Mr. Sargent. No particular territory, south and north.

Mr. Gaffney. Can you give without referring to your books any estimate of the amount of lumber that you ship there?

Mr. Sargent. No, I could not. I would have to look it up. The lumber company's books will show the destination of their lumber by states almost any period since they have been in operation, but I never had occasion to use those figures, so I do not know.

Mr. Andrews. Does the Central Coal & Coke Company own a mill in Texas?

Mr. Sargent. No.

Mr. Andrews. Did they formerly?

Mr. Sargent. No.

Mr. Andrews. They have considerable timber holdings, have they not?

Mr. Sargent. They have.

Mr. Andrews. But have no mills operating?

Mr. Sargent. No, the timber land is in Montgomery and Walker Counties, and never had a mill in it.

Mr. Andrews. I was under the impression you had had a mill and a railroad, which railroad had been sold to the Cotton Belt.

Mr. Sargent. No, that does not apply and never did to the Central Coal & Coke Company.

Mr. Andrews. To an allied interest?

Mr. Sargent. Only in the respect that some three or four of the

largest stockholders in the Central Coal & Coke Company were interested in that Louisiana & Texas Company's plant at Ratcliff, Texas.

Mr. Andrews: You still own that?

Mr. Sargent: The Louisiana & Texas Lumber Company has not changed ownership so far as I know. The Central Coal & Coke Company does not own a dollar of it.

Examiner Burchmore: What is the name of the railroad serving that other plant?

Mr. Sargent: The Eastern Texas Railway.

Examiner Burchmore: That has become a part of the Sante Fe System?

Mr. Sargent: No, the Cotton Belt System.

Examiner Burchmore: Have you any questions, Mr. Coleman?

Mr. Coleman: No.

Examiner Burchmore: Have you any further statement you desire to make about these two properties?

Mr. Sargent: It appears to me there is nothing further to
2904 say.

Examiner Burchmore: Now as to the other two properties, I suppose you will be rather brief about them, because they are coal.

Examiner Gutheim: Just a moment on the lumber proposition. Does the Central Coal & Coke Company own the right of way of the two railroad properties in Louisiana?

Mr. Sargent: They do.

Examiner Gutheim: And are the rates upon which you ship from the Carson and the Neame mills made on a milling in transit basis by one or all routes?

Mr. Sargent: That is the theory; the rate on the log or lumber from all points over the Parish is identical and with our small road and its connections we make up one through route and the logs may be milled in transit on the short line or on the long line, and the result is always the same.

Examiner Gutheim: The Bonanza Mill property is served by a railroad operated by the Missouri & Louisiana Railroad Company, but not owned by it, is that the fact?

Mr. Sargent: That is correct. May I interrupt a minute. I do want to make one little statement in connection with the logging roads. You were asking about the dividends. Our annual
2905 statement shows what has been paid. I personally do not remember. But I want to explain why dividends were paid. All of the lines, the two in the coal district and the two in the lumber district, especially the latter, were operated for years at a loss and there was always occasion for calling upon the parent company for money to make both ends meet, and shortly after I came to the company I suggested that was a ridiculous way of doing things, and that the charges for service should be made such as to make the property self-sustaining, inasmuch as there is legitimate income to meet their operating expenses. While I called off a few moments ago the income from divisions, it should be stated that is only a part of the

income that appears in their statement as actual earnings. They are charging $3.00 a car, which is the way it is carried——

Mr. Andrews: We understood that. But I asked you specifically for the income from divisions for another purpose.

Mr. Sargent: Yes. They do a big logging business and applying $3.00 a car to it makes the income from the logging invariably exceed the income from the divisions by a very considerable amount, and that is what sometimes, when we have no bad luck,
2906 creates a surplus. But we have got to have some net earning all the time to provide for contingencies such as wrecks and personal injury claims. We have some of those on hand that look like we will not have a chance to declare a dividend for several years.

Examiner Gutheim: Who owns the tracks operated by the Missouri & Louisiana in the vicinity of Bonanza?

Mr. Sargent: They belong to the Kansas City Southern.

Examiner Gutheim: Are they connected physically with the railroad of the Kansas City Southern?

Mr. Sargent: They are not.

Examiner Gutheim: What is your physical connection, with what carrier line?

Mr. Sargent: The St. Louis & San Francisco.

Examiner Gutheim: And the tracks run from the St. Louis & San Francisco at Bonanza in a generally easterly direction to the mines?

Mr. Sargent: They do.

Examiner Gutheim: What consideration do you pay the Kansas City Southern for the use of the tracks?

Mr. Sargent: Based upon their original cost exclusive of the perishable cost, such as grading and drainage, four per cent.

2907 Examiner Gutheim: Do you lease any equipment with it?

Mr. Sargent: No, sir.

Examiner Gutheim: Do you operate over any track with your own equipment in and about Bonanza, with the exception of the trackage of the Kansas City Southern?

Mr. Sargent: You do not care to talk about the old condition, where they used to run to——

Examiner Gutheim: The present condition.

Mr. Sargent: We started something over a year and a half ago to execute a contract with the Frisco which would provide that we would receive a division per ton on the coal delivered to them for direct consignment to its ultimate destination, and we in turn were to substitute our engines as a switch engine for the use of the Frisco for the purpose of hauling slack coal over about seven miles of the Frisco rails to a coal washing plant. The consideration to the Frisco would be that they would save the expense of putting on a switch engine and our engine having so little tonnage to handle, it was idle part of the time and the arrangement thereby made was mutually beneficial.

Mr. Andrews: Is not this hearing limited to the lumber
2908 business and are we not losing time in going into the coal business?

Examiner Burchmore: We will only take a few moments with

these two properties, and it is all one railroad corporation, and I think the Commission wanted it all brought out. It will be very brief. I might say if you have no interest in it we will adjourn at the conclusion of this phase of the case until two o'clock, and will not take up any other.

Examiner Gutheim: Is that contract with the Frisco agreed upon entirely?

Mr. Sargent: The terms of it were practically agreed upon by exchange of views and conference with the Frisco people, but when the question of what would be done as to these tap lines was brought up, it was concluded that we could not get to a termination of the negotiations until the matter was settled.

Examiner Gutheim: Was the Frisco guaranteed 100 per cent of the output of the Bonanza mines?

Mr. Sargent: They were guaranteed 100 per cent of the output of the mines upon which they were to pay us 10 cents a ton for switching the coal, a service of about 6½ miles over to their
2909 junction, except that on the coal that we were to transport by our engine, in lieu of their doing it with their own power they were to pay no division. When that coal comes out of the washery it goes over the Frisco and we have nothing to do with it. We are simply substituting switching service they would be compelled to do themselves otherwise as a common carrier.

2910 Examiner Gutheim: You mean the only coal upon which you get a division is that which comes from the Bonanza Mines, and is given direct to the Frisco at Bonanza?

Mr. Sargent: Yes, sir.

Examiner Gutheim: No division is paid on the coal which goes to the Hackett Washery, and there delivered to the Frisco?

Mr. Sargent: That is correct.

Examiner Gutheim: Your operating expenses in and about the Bonanza operation consist only of the maintenance of way of the track leased from the Kansas City Southern and the expense incidental to the operation of the one locomotive and the train crew that goes with it.

Mr. Sargent: And the maintenance of the engine.

Examiner Gutheim: And the maintenance of the engine?

Mr. Sargent: Yes.

Examiner Burchmore: One question about that Bonanza plant. How did the Kansas City Southern come to build this five miles of railroad?

Examiner Gutheim: I was going to ask Mr. Sargent to give us a little of the ancient history of that. It is a long story, which I know personally, but I think it should go into the record.

2911 Mr. Sargent: In 1896 or possibly 1897 the Kansas City Southern were building south, and their intent was to build a line to Fort Smith. As originally projected, it ran quite close to this coal property that was then being opened, and in order to make the coal immediately available to their own line, more particularly for engine fuel, they built the tracks adjoining the Frisco where they are right now, to the mines, and they executed a contract with

the Frisco which gave them the trackage right about 19 miles from Poteau, Oklahoma, to Bonanza Junction, a "Y," and later they determined to build a line into Fort Smith. The route they picked out was entirely too expensive and was abandoned for a while, and later they did build to Fort Smith farther north, but far up the valley, so they are entirely removed from the Bonanza mines. They had their investment there, and it was of no value to anyone except to those who could use it in operating the property, and they leased it to us.

Examiner Gutheim: Your road connects at Poteau with the Kansas City Southern through trackage agreement with the Frisco?

Mr. Sargent: No, we took over that contract which the Kansas City Southern executed with the Frisco, and assumed the
2912 obligations and performed the service ourselves for a number of years, but we quit that, well, within the last couple of years; I don't remember just when.

Examiner Gutheim: Then none of your coal moves to the Kansas City Southern now?

Mr. Sargent: Except it may; there are lots of through rates in effect between the Frisco and the Kansas City Southern, but the Frisco is the immediate connection instead of our line.

Examiner Gutheim: What is the extent of the line you lease at Bonanza?

Mr. Sargent: About 6.43 miles, is my recollection.

Examiner Gutheim: You do not do any other business to speak of at Bonanza, or in fact no other business, except the Central Coal & Coke Company business?

Mr. Sargent: No, there is one mine out there, that is ordinarily known as a strip pit, which belongs to other parties, which they work, but the coal company usually buys that coal right at the pit and so in substance, all that is moved out is owned by the Central Coal & Coke Company.

Examiner Gutheim: Taking up the property at Bevier, the main line runs from Bevier, Missouri, to Ardmore?

2913 Mr. Sargent: Yes, sir.

Examiner Gutheim: The mines are in about Ardmore?

Mr. Sargent: They are strung pretty well along the line. The main line distance is ten miles, and the first mine is south of Bevier about two and one-half miles.

Examiner Gutheim: What carrier connection have you with this property?

Mr. Sargent: The Chicago, Burlington & Quincy.

Examiner Gutheim: That is at Bevier?

Mr. Sargent: That is at Bevier.

Examiner Gutheim: Are there any communities of any consequence along the line from Bevier up to Ardmore?

Mr. Sargent: Two towns on the line, Keota and Ardmore. They are old towns; I guess they were there before the railroad was ever built.

Examiner Gutheim: And they are served solely by the Missouri & Louisiana?

Mr. Sargent: Yes.

Examiner Gutheim: Is there any surrounding population that depends on that line for railroad service?

Mr. Sargent: Yes, there is one little interior town which was some years ago quite important; I have not seen it in recent
2914 years; College Mound, it was then, and it was an interior community. There are farms all around in that country; some of the surface is good for that purpose and some not.

Examiner Gutheim: Does that particular line of the Missouri & Louisiana serve any mines which are not controlled directly or indirectly by the Central Coal & Coke Company?

Mr. Sargent: Yes, sir; mines belonging to the Northwestern Coal & Mining Company. That Northwestern company furnishes in the neighborhood of 35 per cent of the tonnage, as a rule. I think they have that.

Examiner Burchmore: You lease a line from them?

Mr. Sargent: No, we own it ourselves.

Examiner Burchmore: Do you not lease any track from them?

Mr. Sargent: Not of the main line. They have tracks which lead to their own mines over which we operate by agreement, and the agreements are on file with the Commission, but it is not main line.

Examiner Gutheim: Are those the ordinary tipple service tracks?

Mr. Sargent: Yes, sir. Well, they have quite a lead leading to their first mine, the first one, but they are all strictly speak-
2915 ing, mine tracks, and are used for no other purpose. For the year ending June 30, 1908, the Northwestern Company furnished 35.24 per cent of the total coal tonnage. In 1909, 29.03 per cent, and in 1910, 32.94 per cent. Of course that runs into thousands of tons, both properties being large producers, and besides this business, there is business for the general public.

Examiner Gutheim: Have you any figures of the tonnage handled for the general public and the revenue received by the company on it?

Mr. Sargent: I have not any tonnage figures on this statement, but I think they are provided in the annual report. I have a division of the income from divisions, passengers, mail and other revenue here.

Examiner Burchmore: Read it briefly.

Mr. Sargent: For 1908 the income from divisions was $29,377.31. To be brief, I will call these in round figures. Would not that be better?

Examiner Burchmore: All right.

Mr. Sargent: Passenger earnings was $5,000. We had no mail contract then, so no income from that. Other revenue, $12,000. In 1909 from divisions, $23,000, passenger earnings $5,000,
2916 mail, $394; other revenue, $8,800. In 1910 from divisions, $26,000; passengers, $4,800, mail, $452; other revenue, $7,700.

Examiner Burchmore: Is not this Northwestern Coal & Mining Company a subsidiary corporation of the Central Coal & Coke Company?

Mr. Sargent: No, it is the only competitor the Central Coal & Coke Company has got in the state of Missouri.

Examiner Burchmore: Active competitor?

Mr. Sargent: Active? Well, I should hope so.

Examiner Burchmore: Then you and your competitor are getting along rather friendly right at that place.

Mr. Sargent: Well, we have got a line that is chartered in the state as a common carrier, and there is no choice; we have to serve them, and they are served absolutely upon the same terms as we serve the Central Coal & Coke Company or any one else.

Examiner Burchmore: But you are their lessee on certain tracks; you lease tracks from them?

Mr. Sargent: That is only to get to their mines. They built those tracks, and we are simply accorded the right to run over them, and the contract more particularly executed to make it com-
2917 pulsory that they maintain the tracks in a safe condition to be used, so in the case of injury their responsibility would be established. There is no consideration in it at all.

Examiner Gutheim: I would say that supplementing the figures of revenue on the business for the general public that Mr. Sargent has submitted, the Commission has of record the tonnage for the years 1908 to 1909, divided on that basis, so if you want the tonnage for 1910, it would have to be obtained from the witness.

Examiner Burchmore: I was going to suggest that you furnish the Commission with a statement of the tonnage and revenues for each of your four properties, the four detached lines, stated separately, stating the character and extent of the tonnage furnished by the controlling corporations, and divide up the tonnage furnished by what might be called the public. And would it be too much trouble to make that up?

Mr. Sargent: No, but allow me to suggest so far as the two lines in Louisiana are concerned, and the line in Arkansas is concerned, there is no other tonnage than the Central Coal & Coke Company.

Examiner Burchmore: But I want the figures, because I
2918 understand that your reports to the Commission combine the four in a lump.

Mr. Sargent: Yes.

Examiner Burchmore: And we would be able to analyze that report, and know how much comes from one line and how much from another. Of course there may not be any separation there as to public and industrial traffic, but we would be able to separate the others.

Mr. Sargent: I have the separate reports.

Examiner Burchmore: All right.

Mr. Sargent: I have it for those three years, but the statement was made that the Commission already had the report.

Examiner Burchmore: Do you want to put that in evidence as it stands?

Mr. Sargent: This memorandum?

Examiner Burchmore: Yes.

Mr. Sargent: Yes, if you care to have it.

Examiner Burchmore: If you care to, it will be received in evidence and perhaps it will show the whole thing.

Mr. Sargent: I am sure it will, but I will have another
2919 try at it.

(The paper so offered and identified was received in evidence and thereupon marked Missouri & Louisiana Exhibit No. 1, Witness Sargent, received in evidence December 17, 1910, and is attached hereto.)

Examiner Gutheim: What divisions do you obtain on the output of the mines at Bevier or at Ardmore?

Mr. Sargent: It is on the basis of so much a ton. The division sheet has been filed, and the terms of the contract with the Burlington under which these divisions were to be allowed, contemplate that the Burlington shall pay nothing on the coal that comes from the Central Coal & Coke Company's mines or the Northwestern Mining Company's mines upon their engine fuel. They, of course, recognized that the pay for the services rendered must in some way or other to be made, but they did not want any tax upon their engine fuel, so they took the tonnage and figured out what it would amount to, and about what it would cost to transport it, and they paid a fixed amount per ton, based upon commercial coal, only it is freight revenue coal to them, and freight revenue coal to us, and that average income, I suppose, figures out about five cents per ton.

2920 Examiner Gutheim: That is on all the coal?

Mr. Sargent: On all coal, when you take the income from divisions and apply it to all the tons of coal handled, that is the Burlington engine coal plus the commercial coal, it averages about five cents a ton.

Examiner Gutheim: But the actual revenue on commercial coal is how much?

Mr. Sargent: It is eight cents a ton; I think ten cents now, changed within the last year.

Examiner Gutheim: About how much of a haul do you perform coming from both the Central Coal & Coke Company and the Northwestern Company's mines?

Mr. Sargent: I think the average service would be about like cutting the line in two, five miles.

Examiner Gutheim: Some of it is hauled about ten miles, others two miles, and others four, and some six?

Mr. Sargent: Yes.

Examiner Gutheim: I will say that the contract with the Burlington is on file with the Commission in connection with the industrial railroad examination.

Examiner Burchmore: This railroad is incorporated in Missouri?

2921 Mr. Sargent: Yes, sir.

Examiner Burchmore: Is there any incorporation in Louisiana?

Mr. Sargent: No, it is a holding company that holds these four companies.

Examiner Burchmore: Does the Louisiana law permit foreign corporations to operate railroads in that state?

Mr. Sargent: I suppose so.

Examiner Burchmore: I thought some of the main line systems had separate corporations in Louisiana, and my impression was that that was due to some state law.

Mr. Sargeant: In Texas that is required, but not in Louisiana.

Examiner Burchmore: Well, the Kansas City Southern has a Louisiana corporation?

Mr. Sargent: They only did that for a purpose. It was not necessary. I was with them when they built the railroad.

Examiner Burchmore: How about Arkansas?

Mr. Sargent: Arkansas is like Louisiana; there is no such law. Texas is the only state I know of that is like that out in this country.

Examiner Burchmore: Your statements to the Commission
2922 report the operating expenses and revenue?

Mr. Sargent: Yes, sir.

Examiner Burchmore: Can you not take your figures for the last three years and advise us as to the separation of revenue and expenses between the four companies?

Mr. Sargent: Yes, sir.

Examiner Burchmore: Take the totals of the operating expenses and revenue for the last three years and separate them between the four companies.

Mr. Sargent: As I understand, make four reports for the years 1908, 1909 and 1910?

Examiner Burchmore: Yes, sir.

Mr. Sargent: Four reports for the separate pieces, all of which were used to make up the total?

Examiner Burchmore: Yes.

Mr. Sargent: Because it all has to be compiled in advance.

Examiner Burchmore: Have you any further statement?

Mr. Walter: As long as Mr. Sargent's attorneys are away, why not permit him to reserve the right to introduce a statement later, if he wants to?

Examiner Burchmore: As to the facts?

Mr. Sargent: I have given you all the facts.

2923 Examiner Burchmore: If your counsel desires to file a brief on the question, or if there is any further statement he wishes to make to the Commission in the form of a written communication, I will allow your suggestion to that effect to go into the record at this point.

Mr. Sargent: Well, we are operating a railroad proposition as such. We assume the responsibility of a carrier, and we have to provide a revenue that will meet the operating expenses and provide for contingencies. We are constantly confronted with extraordinary expenses incident to wrecks, personal injury suits, and we have no means of deriving a revenue sufficient to operate these properties except through the means of being permitted to share in through

rates and be given a division of such through rates, and on that account that income, because of the fact that the divisions will not pay operating expenses, we provide an income through charges for service, in order to make the income meet the expenses. And I only say that again because I want to bring out the fact, if we have no unfortunate accidents, our surplus is great some times and a dividend that is excessive is paid, wheras the next year it may take 200 per cent as the net to meet the deficit incident to the wrecks
2924 and personal injury losses which we have to provide for by some means. In ordinary operations the income looks too big for the service rendered, whereas if you are confronted with these extraordinary items, they fall far short. And I would like to have it go in the record that I ask for our attorney to file any brief in the case if he may elect to do so, and the Commission permits anyone to do so.

Examiner Burchmore: If he so desires, I suggest that you request him to forward his request to the Commission in the shape of a letter, so we may have something to reply to.

Mr. Coleman: May I ask a question? Did you testify as to the amount of the division you got on the coal which originates on your line in Missouri?

Mr. Sargent: Yes, ten cents on the commercial coal only. That, as applied to all coal hauled, brings an income of approximately five cents; in other words, if we were making the Burlington pay on its engine coal, we would charge them five cents as part of the through rate, and the commercial public would be getting the same rate; five cents, but the Burlington did not want it handled that way, so we figured all the tonnage and made the division on commercial coal ten cents, so as to make it all five cents.

2925 Mr. Coleman: I do not know as it is competent for me to ask any questions bearing on the coal proposition there, but we are indirectly interested in coal mines, and so forth, and if permissible, I would like to ask one more question.

Examiner Burchmore: You may.

Mr. Coleman: Is this coal mainly marketed within the state or does any considerable tonnage move interstate?

Mr. Sargent: A very large portion of it goes to the Burlington road. I think there is——

Examiner Burchmore: I just wanted an approximation.

Mr. Sargeant: This is not in total, so I cannot get it absolute, but it looks as if about 60 per cent of the output of the mines goes to the Burlington.

Mr. Coleman: For locomotive consumption?

Mr. Sargent: Locomotive consumption, and the other 40 per cent, quite a tonnage that is, finds its market in Missouri and Nebraska.

Mr. Coleman: And the division applies interstate as well as intrastate.

Mr. Sargent: As well as state; yes, sir.

(Witness excused.)

Whereupon, at 1:00 P. M. a recess was taken until 2:00 P. M.

2926 After Recess.

2:00 P. M.

Examiner Burchmore: We will continue with the call, beginning with the Sabine & Northern, and we will go through as far as we can until six o'clock or thereabouts, and if we have made such progress so that there are only two or three cases to be taken up this evening, we will do so; otherwise we will go on to Monday and finish the cases.

Mr. Cowan: Take my own situation, and probably other people are in the same fix, I have got a business engagement which I have been depending on for several days and doing a lot of worrying about. Question: Can I be in Galveston Sunday? Monday? If not, when can I be there? Now, you have some cases, Mr. Garwood, you told me, which you had to try Monday. It seems to me that although it may discommode some one, that if we could know for certain—if I know for certain I will be here until Monday, it is all right, and I have no complaint, except it seems to me we ought to find out whether we are to be here until Monday. That is partly personal, I admit, but I think we all should know whether we are to be here Monday or not.

2927 Mr. Garwood: I wish to file two notices to produce documents. I will not take up the time of the Commission to read them, and will furnish counsel for the intervenors with copies of them, and ask that they be made part of the record.

Examiner Burchmore: Very well; they will be received.

Mr. Garwood: I wish them made part of the record, and copied into the record.

Interstate Commerce Commission.

No. 1319.

STAR GRAIN AND LUMBER COMPANY et als.
vs.
ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY et als.

In the Matter of Tap Line Allowances and Divisions, Consolidated Under Investigation and Suspension Docket No. 11.

Hearing at New Orleans, December 8, 1910.

Notice to Produce.

To the Kirby Lumber Company, Intervener, John H. Kirby, the Atchison, Topeka & Santa Fe Railway Company, the Gulf, Colorado and Santa Fe Railway Company, and to E. P. Ripley,
2928 President of the Gulf, Colorado and Santa Fe Railway Company and the Atchison Topeka and Santa Fe Railway Company, and to David Gallup, and James R. Chapman, severally:

You, and each of you, are hereby notified to appear and produce upon hearing at the time and place thereof, as shall be hereafter

designated by the Interstate Commerce Commission, the following documents, to-wit:

1. The contract made and entered into by and between said John H. Kirby, of which the Kirby Lumber Company is a beneficiary and the Atchison, Topeka and Santa Fe Railway Company and the Gulf Colorado and Santa Fe Railway Company, both or either of them, or which was entered into by said Atchison Topeka and Santa Fe Railway Company and the Gulf, Colorado and Santa Fe Railway Company, both or either of them, by which said Atchison, Topeka and Santa Fe Railway Company and the Gulf, Colorado and Santa Fe Railway Company, both or either of them, and of which the Kirby Lumber Company was a beneficiary, whereby and whereunder said Atchison, Topeka and Santa Fe Railway Company and said Gulf, Colorado and Santa Fe Railway Company agreed to cancel, and did cancel, all through and joint rates on lumber with the connecting lines of the said Atchison, Topeka and Santa Fe Rail-
2929 way Company and said Gulf, Colorado and Santa Fe Railway Company, said contract being that specific contract referred to in Paragraph XVIII, Section 13 and Section 14, pages 103 and 104 of the joint and several answers of the defendants Kirby Lumber Company and John H. Kirby to the amended bill of complaint of the Maryland Trust Company, Trustee, Complainant, filed in the case of the Maryland Trust Company, Trustee, vs. Kirby Lumber Company and Houston Oil Company of Texas, then pending in the Circuit Court of the United States for the Southern District of Texas at Houston, being numbered 54 on the Equity Docket thereof, on March 25 A. D. 1905, which said Sections 13 and 14 are as follows, to-wit:

"13. Say that the lumber to be cut from the timber on the Kountze lands is tributary to the Gulf, Colorado and Santa Fe Railroad system which in turn is owned by and is a part of the Atchison, Topeka and Santa Fe Railroad system operating nearly ten thousand miles of railway extending from Chicago, Illinois, to San Francisco, California, with numerous branches in the state of Texas, Oklahoma, Kansas, Missouri, Illinois, Colorado, New Mexico and Arizona, through which it runs, and that it has connections at El Paso for points in Mexico, enabling Kirby Lumber Company to reach all points on the line of the said Atchison system under the con-
2930 tract herein mentioned of said Kirby with said Atchison Railroad, at rates, or rather under conditions, that would give said Kirby Lumber Company an advantage of about $1 per thousand feet of lumber over and above what *is* competitors, located on other lines of railway, could realize from shipments to points reached by said Atchison railroad, and this for the reason that said Atchison & Santa Fe railroad, under said contract with said Kirby, of which said Kirby Lumber Company is a beneficiary, had canceled all through and joint rates on lumber with the connecting lines, thereby giving the lumber manufacturers, located along the lines of said Atchison railroad, an advantage in freight rates in reaching all points located on the line of the said Atchison railroad system.

14. Say that said Houston Oil Company of Texas already owned

numerous bodies of land interspersed with said Kountze lands in such a way that it would, if such Kountze lands were not acquired, greatly increase the original cost as well as the expense of operating the tramroads required to log said Houston Oil Company's
2931 lands so interspersed, wherefore it was highly important, as an economic movement, that said Kountze lands be acquired, so much so that thereby an estimated difference in the profit to be realized by defendant, Kirby Lumber Company, amounting to at least $2 to $3 per thousand, would result; that the said Kountze lands were for sale by the owners at a rate of about $2 per thousand feet for the yellow pine timber thereon, and some of said Kirby Lumber Company's competitors in the lumber business, as these defendants knew, were making efforts to acquire parts of said Kountze lands; that the arrangement herein stated between said Kirby and said Atchison, Topeka and Santa Fe Railroad, of which defendant, Kirby Lumber Company, is the beneficiary, is not and under the law could not be exclusively for its benefit, but would apply equally to all shippers along the lines of the Gulf, Colorado and Santa Fe Railway Company; that if said Houston Oil Company of Texas acquired said Kountze lands, then there would be no other large bodies of lands along the lines of said Atchison Railroad, not owned by either the said Houston Oil Company of Texas or said Kirby Lumber Company, to tempt competitors, wherefore such regulation by said Atchison railroad would practically result in said Kirby Lum-
2932 ber Company being the sole beneficiary thereof.

2. Contract between said John H. Kirby and said David Gallup, which said contract was by said Kirby assigned to said Kirby Lumber Company, whereby said Gallup, who held title to said Kountze lands, the body of yellow pine lands situated in the State of Texas containing approximately one hundred and sixty-nine thousand acres of virgin pine timber, for the said Atchison Railroad system, gave to said Kirby on option for a period of five years to purchase said lands, and whereby and wherein defendant, Kirby Lumber Company, agreed to sell to said Atchison Railroad system ten million feet of lumber per year at a cost of twenty per cent. (20%) less than the market price thereof, and agreed to route over said Atchison Railroad system, which includes the Gulf, Colorado and Santa Fe Railway system, all lumber manufactured by said Kirby Lumber Company at such of its mills as were located on the railroad of such system, which said contract is the contract referred to by said Kirby Lumber Company and said John H. Kirby in the answer above referred to in said cause of the Maryland Trust Company, Trustee, vs. Kirby Lumber Company and Houston Oil Company of Texas, in said Paragraph XVIII, sub-section 23, page 110, which is as
2933 follows:

"23. Say further, that these defendants realizing that failure of said Houston Oil Company to purchase such lands "(Kountze)" and subject them to said stumpage contract would be disastrous to its manufacturing interests as aforesaid, sought in every way they could to aid the Houston Oil Company of Texas in this crisis, and, relying implicitly on the representations of said Calhoun

and said Houston Oil Company that the latter would later take over said land and relieve defendant, Kirby Lumber Company, of the burden thereof and repay to these defendants their respective outlays in that behalf, with interest thereon, *one* about to see what plan could be adopted for saving the situation and preventing said Kountze lands from falling into the hands of aforesaid competitors; that said Kirby sought his friend F. P. Ripley, President of said Atchison, Topeka and Santa Fe system, with the result that after some weeks of negotiation, the board of directors of said system agreed to advance $2,000,000 towards said purchase if, but only if, the title to such lands was conveyed to them for said $2,000,000, the balance
2934 of the purchase money to be paid by these defendants, or one of them; that this negotiation culminated in the contract, known as the Gallup contract, under which said Gallup, who held the title to said Kountze lands for said Atchison Railroad System, gave to said Kirby an option on such lands for a period of five years, requiring him, said Kirby, to pay the sum of about $165,000, besides interest semi-annually at the rate of 5 per cent per annum on said sum of $2,000,000, which said option said Kirby at once assigned to defendant, Kirby Lumber Company, whereupon it paid said sum of $165,000 in cash and likewise has paid since three of said semi-annual installments of interest; that, as further consideration for said Gallup Contract, defendant Kirby Lumber Company was required to enter into a contract to sell to said Atchison Railroad System 10,000,000 feet of lumber per year at low prices, to wit, 20 per cent, less than the market price thereof, and was also required to route over said railroad system all lumber manufactured by said Kirby Lumber Company at such of its mills as were located on the railroads of such system."

Which said contract is likewise referred to in Subsection
2935 27 of said Paragraph XVIII, page 112 of said answer.

3. Contract of David Gallup and John H. Kirby referred to in letter of John H. Kirby as President of the Kirby Lumber Company to B. F. Yokum, of date November 8, 1903, as set out in the report of Special Master in Chancery J. R. Burnett in Intervention No. 161 in said Equity cause No. 54 above referred to, filed October 14, 1904 in said cause, said contract being therein referred to as dated July — 1902.

4. The said Atchison, Topeka and Santa Fe Railway Company, Gulf, Colorado and Santa Fe Railway Company and David Gallup, and each of them, are hereby notified to produce all deeds, contracts and resolutions of Boards of Directors of either of said Companies whereby and whereunder said David Gallup or any other person acting for or in the interest of said Atchison, Topeka and Santa Fe Railway or the Gulf, Colorado and Santa Fe Railway Company or either of said Companies directly acquired title to said Kountze lands referred to in the pleadings hereinabove mentioned.

5. All parties to this notice are notified to produce at the time and place aforesaid copies of conveyances of the Kirby Lumber Company to J. R. Chapman whereby, in consideration of the
2936 sum of $1,980,348.26 of date on or about July 2, 1909, the Kirby Lumber Company conveyed to said J. R. Chapman

certain lands situated in Angelina, Hardin, Jasper, Jefferson, Liberty, Newton, Polk, Sabine, S. Augustin, Shelby, Tyler, Montgomery and other counties in the State of Texas, and of conveyance of date on or about the 29th day of June, 1909, whereby John H. Kirby conveyed to J. R. Chapman for the recited consideration of $1,021,425.00 certain lands situated in Angelina, Liberty, Hardin, Jasper, Newton, Sabine, S. Augustin and Tyler Counties in the State of Texas.

6. Generally, said parties are required to produce at the time and place aforesaid all contracts, agreements and resolutions of Boards of Directors or Stockholders entered into between them either in their corporate or individual capacities or as acting for or in behalf of the corporations aforesaid and in their interest relating to all contracts for the cancellation of through rates, the institution of rates, the delivery of lumber tonnage, the purchase of lands or the use of moneys thereof, or connected with either of the contracts or agreements hereinabove set out.

7. All deeds and contracts entered into and connected with the sale, lease or transfer of the Gulf, Beaumont and Kansas 367 City Railway Company and its lines of Railway by John H. Kirby or his associates to the Gulf, Colorado and Santa Fe Railway Company or the Atchison, Topeka and Santa Fe Railway Company, or whereby either of said Companies or the stockholding interests thereof acquired the essential ownership of said Gulf, Beaumont and Kansas City Railway Company, or whereby the said John H. Kirby or his associates sold, transferred, leased or surrendered the Gulf, Beaumont and Kansas Northern Railway Company or any essential interest therein either to the said Gulf, Colorado and Santa Fe Railroad or the Atchison, Topeka and Santa Fe Railway Company, or the interests controlling or owning said Railway Companies or either of them.

8. Said John H. Kirby and said Kirby Lumber Company are notified to produce at said hearing a copy of said joint and several answer of the Kirby Lumber Company and John H. Kirby to the amended bill of complaint of the Maryland Trust Company filed in said cause of Maryland Trust Company, Trustee, vs. Kirby Lumber Company and Houston Oil Company of Texas in the Circuit Court of the United States for the Southern District of Texas; being Equity cause No. 74 hereinabove referred to; and also the report of Judge James R. Burnett in intervention No. 161 in said Equity cause No. 74 in the matter of the Yoakum Contract, filed October 14, 1904.

LUTHER M. WALTER,
E. J. MANTOOTH,
CHAS. T. COLEMAN, *Att'ys.*

Interstate Commerce Commission.

No. 1319.

STAR GRAIN AND LUMBER COMPANY et als.
vs.
ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY et als.

In the Matter of Tap Line Allowances and Divisions, Consolidated under Investigation and Suspension Docket No. 11.

Hearing at New Orleans December 8, 1910.

Notice to Produce.

To the Intervenors, Kirby Lumber Company, William Cameron and Company, Miller-Link Company, Orange Lumber Company, and to each and all of the intervenors making themselves
2939 parties to the intervention of said above named parties, whether herein specifically designated or not:

You and each of you are hereby severally notified to produce at the hearing herein, at the time and place to be hereafter designated by the Interstate Commerce Commission, as applicable to each of said intervenors severally, the following:

1. Cost sheets showing costs per thousand feet, Board Measure, for producing the lumber manufactured at each of your several mills during each month of the year 1910, including every expense chargeable to original cost, from the lumber into the car in which the product moved to market and the general average per thousand feet, Board Measure, for the total amount produced at all the mills of each Company intervening herein during the same period; and showing charge for stumpage per thousand feet, log scale separately and giving name of rule for scaling used in determining the log scale.

2. Exhibit showing the amount received, in dollars and cents, per thousand feet, Board Measure, F. O. B. mill for stock for each month during the year 1910 by grades and per cents in the manner following:

2940

	% of total.	Amount rec'd.
—— feet B. and better (Include all sizes and descriptions)	....	....
—— feet C. and No. 1 Common (Include all sizes and descriptions)	....	....
—— feet No. 2 Common (do)	....	....
—— feet No. 3 Common (do)	....	....
—— feet No. 4 Common (do)	....	....

Show grand total of shipments and general average received per thousand feet board measure for all grades combined.

3. Exhibit showing amount of lumber, including sawed railroad ties as lumber, by cars and feet board measure shipped into each State and Territory of the United States during each month of the year 1910, the amount shipped into Mexico and Canada, and the amount shipped for exporting to foreign countries, giving names of railroads over which shipments moved and number of cars and the amount of feet going over each line of railroad from point of origin to final destination.

2941 4. The Kirby Lumber Company is notified to produce statement of the amount — lumber, railroad ties, and all lumber material sold to the Gulf, Colorado and Santa Fe Railroad or the Atchison, Topeka and Santa Fe Railway Company under the contract made between said parties whereby it was agreed that the Kirby Lumber Company should sell to the said Railway Companies ten million feet of lumber annually at 20% below the market price, which contract said parties have been served notice to produce herein; and, separately statement showing the amount and selling price of all lumber and lumber products, including railroad ties, sold by the Kirby Lumber Company to the Atchison, Topeka and Santa Fe Railway Company from the time of the execution of the contract referred to up to and including the year 1910.

H. M. GARWOOD,
LUTHER M. WALTER,
E. J. MANTOOTH,
CHAS. T. COLEMAN, *Att'ys.*

2942 Examiner Burchmore: Judge Cowan, all I can say is that I am not going to leave New Orleans with any case unheard that wishes to be heard. If, at six o'clock, there appears that there will be only one or two cases left, I do not think anybody will object to our going on tonight and hearing them. I think it probable we will not stay until Monday. I will announce we will hold a session over until Monday, with the possibility that there may be a short night session this evening. Of course if the calendar becomes exhausted today, we will have to adjourn.

2943 *Sabine & Northern Railroad.*

C. E. WALDEN was called as a witness, and having been duly sworn, testified as follows:

Examiner Gutheim: Where do you live?

Mr. Walden: Beaumont, Texas.

Examiner Gutheim: Your occupation is what?

Mr. Walden: I am secretary and treasurer of the Sabine & Northern Railroad.

Examiner Gutheim: I hand you a map of the Sabine & Northern Railroad, which was furnished to one of the examiners of the

Commission about a year ago. Does that show the general geographical location of the country substantially?

Mr. Walden: Yes, but I have a better map showing it.

Examiner Gutheim: If you will file the other map, we will use that.

Mr. Walden: That shows it on scale.

(The map so offered and identified was received in evidence and thereupon marked Sabine & Northern Exhibit No. 1, witness Walden, received in evidence December 17, 1910, and is attached hereto.)

2944 Examiner Gutheim: The track operated by the Sabine & Northern begins at Deweyville, Texas, and runs south a few miles to Ruliffe, and thence in a northeasterly direction to a point called De Quincey and then north through Smyth Junction, and then in a westerly direction to Blewett.

Mr. Walden: Yes, sir, with a spur branch off from Juanita Junction to Juanita.

Examiner Gutheim: And Juanita Junction is between Smyth Junction and Blewett?

Mr. Walden: Yes, sir.

Examiner Gutheim: Who owns the track between Deweyville and Ruliffe?

Mr. Walden: That is the joint track of the Texarkana & Fort Smith Railroad and the Sabine Tram Company, which has been leased by the Sabine Tram Company to the Sabine & Northern Railroad.

Examiner Gutheim: Who owns the track from Ruliffe to De Quincey?

Mr. Walden: The Kansas City Southern.

Examiner Gutheim: And from De Quincey to Smyth Junction?

Mr. Walden: The Kansas City Southern.

Examiner Gutheim: And from Smyth Junction into Blewett.

Mr. Walden: The Sabine & Northern.

2945 Examiner Gutheim: So that the only track owned by this corporation is that from Smyth Junction into Blewett, and from Juanita Junction to Juanita?

Mr. Walden: Yes, sir, in fee simple.

Examiner Gutheim: What is the relation between the Sabine & Northern Railroad and the Sabine Tram Company?

Mr. Walden: In what respect?

Examiner Gutheim: Well, are the stockholders in both companies identical?

Mr. Walden: Practically so. There is one stockholder in the Sabine & Northern Railroad that is not in the Sabine Tram Company.

Examiner Gutheim: And his holdings are sufficient to qualify him as a director?

Mr. Walden: It is nominal; yes, sir.

Examiner Gutheim: The entire track is standard gauge, is it?

Mr. Walden: Yes, sir.

Examiner Gutheim: And the logging along this line is all done out of Blewett?

Mr. Walden: Yes, sir.

Examiner Gutheim: The track from Blewett into the tim-
2946 ber is the private track of the Sabine Tram Company?

Mr. Walden: Private track of the Sabine Tram Company; in other words, what we call the tram road.

Examiner Gutheim: Is the operation of the Kansas City Southern tracks from Smyth Junction through De Quincey down to Ruliffe performed at the present time under contract that was entered into some years ago between the Kansas City Southern and the Texarkana & Fort Smith and the Sabine Tram Company?

Mr. Walden: Yes, sir; under that contract, as signed by the Sabine Tram Company to the Sabine & Northern Railroad.

Examiner Gutheim: That contract provided, did it not, that the operation should be by the Sabine Tram Company or by some corporation organized in its interests?

Mr. Walden: It did.

Mr. Sugar: We have a copy of that here.

Examiner Gutheim: We have a copy also. What consideration is paid the Kansas City Southern for the use of the track between Smyth Junction and Ruliffe?

Mr. Walden: $1.75 per car.

Examiner Gutheim: Per log car?

Mr. Walden: That is the original contract which was en-
2947 tered into between the Sabine Tram Company and the Kansas City Southern Railway.

Examiner Gutheim: And assigned by the Sabine Tram Company to the Sabine & Northern?

Mr. Walden: Assigned by the Sabine Tram Company to the Sabine & Northern, but the consideration is different in that case.

Examiner Gutheim: What is the arrangement for the use of the track between Deweyville & Ruliffe? That track, as I understand, is operated by the Sabine & Northern and the Texarkana & Fort Smith.

Mr. Walden: Yes, sir.

Examiner Gutheim: What arrangement is there as to the use of that track by the owners of it?

Mr. Walden: The Sabine Tram Company leased the right to the Sabine & Northern Railroad to operate over that piece of track in consideration that the Sabine & Northern Railroad would make a flat rate of so much per car from Blewett, Louisiana, to Deweyville, Texas.

Examiner Gutheim: What rate per car does the Sabine Tram Company pay to the Sabine & Northern Railroad for that service from Blewett right through to Deweyville?

2948 Mr. Walden: $5.25 per car where the Sabine & Northern receives no divisions on the outgoing product.

Examiner Gutheim: Where divisions are received, what is paid?

Mr. Walden: That is refunded to the Sabine Tram Company in the proportion of four cars of logs to one car of lumber.

Examiner Gutheim: So that the Sabine & Northern Railroad's revenue is derived ultimately from the log haul solely?

Mr. Walden: I did not catch that.

Examiner Gutheim: The Sabine & Northern's revenue is derived ultimately from the log haul solely, and the divisions go back to the Sabine Tram Company?

Mr. Walden: No.

Examiner Gutheim: Making the amount paid by the Sabine Tram Company the log haul of $5.25 less the division?

Mr. Walden: No, the Sabine & Northern gets $5.25 per car from the Sabine Tram Company for transporting those logs in, provided it receives no division on the finished product delivered by its connection, the Kansas City Southern; but in the event it receives a division, then it refunds to the Sabine Tram Company the cost of bringing in those cars, four cars of logs to one car of lumber, and retains for its compensation the division it gets on the fin-
2949 ished product?

Examiner Gutheim: Where are the mills of the Sabine Tram Company located?

Mr. Walden: One of them is located at Deweyville, Texas, and the other is located at Juanita, Louisiana.

Examiner Gutheim: Has the mill any outlet except by the Sabine & Northern to the Texarkana & Fort Smith at Ruliffe?

Mr. Walden: No.

Examiner Gutheim: And Juanita has no other outlet except the Kansas City Southern at Juanita on its own track?

Mr. Walden: That is true.

Examiner Gutheim: The haul from Deweyville to Ruliffe is how much?

Mr. Walden: Somewhere in the neighborhood of two miles.

Examiner Gutheim: Does the Sabine & Northern perform that two miles of service on the finished product?

Mr. Walden: No.

Examiner Gutheim: The Texarkana & Fort Smith takes it out direct?

Mr. Walden: Yes, sir.

Examiner Gutheim: And at Juanita the Kansas City
2950 Southern takes out the product direct also?

Mr. Walden: Yes, sir.

Examiner Gutheim: So that no service whatever is performed on the product of the mills by the Sabine & Northern?

Mr. Walden: No. We figure we are entitled to the compensation on the basis of a milling in transit. We could, however, perform the services in both cases if it was desired or required.

Examiner Gutheim: What equipment does the Sabine & Northern operate?

Mr. Walden: It owns one locomotive, has one under lease, and has 70 logging cars leased and has one flat car and a caboose.

Examiner Gutheim: And from whom is the equipment leased?

Mr. Walden: From the Sabine Tram Company.

Examiner Gutheim: What consideration is paid as rental?

Mr. Walden: For the locomotive, $100 per month; for the cars, $2,100 per annum, with a contract that the Sabine & Northern Railroad must keep up the cars.

Examiner Gutheim: On the owned track going from Smyth Junction to Blewett and from Juanita Junction to Juanita, is there any service performed for any party except the Sabine
2951–2 Tram Company?

Mr. Walden: Yes, sir; there is some little traffic handled over that line.

Examiner Gutheim: Is it anything more than what is incidental to the needs of the logging camps of the Sabine Tram Company at Blewett and beyond?

Mr. Walden: There are a few people out there that give small quantities of freight to be handled backwards and forwards from Blewett to Smyth Junction or Juanita, as the case may be.

Examiner Gutheim: Does the Sabine & Northern perform any service between Ruliffe and Deweyville for anybody except the Sabine Tram Company?

Mr. Walden: No, sir.

Examiner Gutheim: And under its contract with the Kansas City Southern for the trackage rights, it is prohibited from handling anything except the logs of the Sabine Tram Company?

Mr. Walden: Or some company to be organized—yes, sir, to handle the logs of the Sabine Tram Company.

Examiner Gutheim: Does the contract that provides for the use of the Kansas City Southern's tracks, provide for the distribution of the tonnage of the two mills?

2953 Mr. Walden: Will you read that question?

(Question read.)

Mr. Walden: Do you mean by that, how the tonnage shall be sent out?

Examiner Gutheim: Yes; does the Kansas City Southern provide that it and the Texarkana and Fort Smith shall get all the tonnage and have the permission to route it through?

Mr. Walden: Yes, sir, and with a provision in there that where they cannot hand-e it promptly and furnish equipment promptly, the Sabine Tram Company has the right to designate the routing.

Examiner Gutheim: What division is the Sabine & Northern Railroad allowed out of the rates from Deweyville and Juanita?

Mr. Walden: Three-quarters of a cent to three cents is the greatest division it actually receives. There has been a good deal of discussion about the maximum division on the Kansas City Southern. There is one point, if my recollection serves me right, of four cents; that is Fort Smith, but Fort Smith being located in the manufacturing district, I do not assume that any concern any distance from there has ever had occasion to ship a car of lumber to Fort Smith, so that as a practical proposition the divisions
2954 run from three-quarters of a cent to three cents.

Examiner Gutheim: Now, as a matter of fact, are there any communities located along the line of the road that is owned by the Sabine & Northern.

Mr. Walden: Well, there is Blewett, Louisiana, a small place of five or six hundred people.

Examiner Gutheim: Is it not a fact that Blewett was first established as a logging camp?

Mr. Walden: That is true. And there is Juanita, up there on the tracks of the Kansas City Southern, and the Sabine & Northern, of about seven or eight hundred people.

Examiner Gutheim: Juanita was there before the Sabine & Northern, was it not?

Mr. Walden: Yes, sir, Juanita was there before the Sabine & Northern was ever built. And there is the town of Deweyville down on the Sabine & Northern and the Texarkana & Fort Smith, of probably 1,500 people.

Examiner Gutheim: But Deweyville is served entirely so far as the service except the logging of the mill goes, by the Texarkana & Fort Smith?

Mr. Walden: By the Texarkana & Fort Smith.

Examiner Gutheim: On the joint tracks?

2955 Mr. Walden: On the joint track of the Texarkana & Fort Smith and the Sabine Tram Company.

Examiner Gutheim: Are you keeping separate accounts for the railroad company, as required by the Commission?

Mr. Walden: Yes, sir; and I have all of our forms here, that I am perfectly willing to put in the record if desired.

Examiner Gutheim: You do not have any passenger service?

Mr. Walden: No, sir; we do not handle passengers.

Examiner Gutheim: Is there any contract that provides for the division between the Kansas City Southern and your company, outside of the division sheets?

Mr. Walden: No, sir.

Examiner Gutheim: The divisions are not provided for in the trackage right contract?

Mr. Walden: No, sir.

Examiner Gutheim: Can you say about how much business in tonnage and revenue is done by the Sabine & Northern for parties not connected in any way with the Sabine Tram Company?

Mr. Walden: I could not give it accurately, but I will say it is a very small part.

Examiner Gutheim: Will you furnish a statement that will show the total tonnage and revenue for the last fiscal year, and

2956 the amount of that which was furnished by the Sabine Tram Company, and the different interests?

Mr. Walden: Yes, sir.

Examiner Burchmore: Have you any examination, Judge Cowan?

Mr. Cowan: No.

Mr. Sugar: What is the character of the roadbed of the Sabine & Northern?

Mr. Walden: We have a good roadbed.

Mr. Sugar: What kind of rails have you?

Mr. Walden: 50 pound and 35 pound; the majority of the steel is 50 pound.

Mr. Sugar: Has the road any buildings at Blewett?

Mr. Walden: Yes, sir; that is where we get what tonnage we do outside of that furnished by the Sabine Tram Company. At Blewett, Juanita, and possibly some little delivered to us at Smyth Junction.

Mr. Sugar: Does the Sabine & Northern have any interest in the depot at Smyth Junction?

Mr. Walden: It owns a half interest; that is to say, the Sabine & Northern furnished the lumber, the Kansas City Southern people built the depot—I will put it this way: The Sabine Tram Company originally furnished that, and of course in taking over the
2957 rights, the Sabine & Northern acquired whatever rights they had in that depot.

Mr. Sugar: Does the Sabine & Northern have an agent at Blewett?

Mr. Walden: Yes, sir.

Mr. Sugar: Has it an agent at Smyth Junction?

Mr. Walden: Yes, sir; the agent of the Kansas City Southern at Smyth Junction is a joint agent of the Kansas City Southern and the Sabine & Northern Railroad.

Mr. Sugar: Does the Sabine & Northern pay part of his salary?

Mr. Walden: Yes, sir.

Mr. Sugar: How much?

Mr. Walden: The Sabine & Northern pays him $20 a month for handling its business at that point.

Mr. Sugar: You have filed regular tariffs, both with the State and Interstate Commissions?

Mr. Walden: Yes, sir; we have filed all the classes and commodity tariffs with the State of Louisiana, and we have filed tariffs and concurrences with the Interstate Commerce Commission.

Mr. Sugar: Do you fully comply with all the requirements
2958 of the State of Louisiana and the State of Texas and the United States?

Mr. Walden: So far as we know, we do.

Mr. Sugar: With regard to safety appliances and other requirements?

Mr. Walden: Quite a number of our cars are fitted up with air, so there is a sufficient number of cars in each train with which to handle it. The locomotive has been equipped with an electric headlight, and the ash pan required by the Commission. Of course it is equipped with air to handle the cars with.

Mr. Sugar: Does the bulk of the shipments from the two mills go to points where the Sabine & Northern has allowances, or to points where the road has no allowances?

Mr. Walden: I would say the bulk of the business goes to the places where the Sabine & Northern has no allowances.

Examiner Burchmore: What is the significance of that?

Mr. Sugar: That is in line with a number of questions asked by Commissioner Harlan, I think, and the attorneys for the intervening roads, and it is to meet that, whatever force there may be in the original proposition.

Examiner Burchmore: What earnings do you get on such
2959 traffic where there is no division?

Mr. Walden: In the case of shipments from Deweyville

we get $5.25 per car that we filed the tariff to cover the handling of logs from Blewett to Deweyville, and from the shipments that move from Juanita we get $1.75 per car.

Examiner Burchmore: But you do not get anything on the lumber?

Mr. Walden: We do not get any division on the lumber, unless it goes to a point where we get a division, as I explained in the beginning, in the event the finished product goes to a point where we have a division the cost of bringing in those cars is refunded on the basis of four cars of logs to one of lumber.

Mr. Sugar: In quoting prices of lumber to a possible customer, are the allowances made any feature of your quotation?

Mr. Walden: No, sir, I do not see that it could, or else most of our shipments would go to where we get divisions, as a matter of fact.

Mr. Sugar: Is it not a fact that established saw mills like those of the Sabine Tram Company have regular customers just like the butcher or grocer or any other trade?

2960 Mr. Walden: It is a fact that all saw mills, I presume—at least we do—we have customers who have been buying lumber from the Sabine Tram Company and in some instances most of their lumber for years.

Mr. Sugar: Is it not a fact also that in later years a great deal of lumber is sold in answer to offers made by interior brokers?

Mr. Walden: Repeat that question.

(Question read.)

Mr. Walden: Yes, sir.

Mr. Sugar: He offering you so much for such and such a class of lumber if you care to accept it?

Mr. Walden: Yes, sir. That is the system under which a great deal of lumber is sold that commission men at various large centers go around and solicit business, and they actually take orders and undertake to get that lumber from any source from which it can be had. They will probably write half a dozen institutions that they hold an order calling for such and such quality of lumber, for which they can pay such and such a price, and the mills accept it or not, as they choose. A great deal of lumber is sold that way.

Mr. Sugar: How much timber; that is, in acres, is owned

2961 by the Sabine Tram Company that is tributary to the Sabine & Northern Road?

Mr. Walden: Well, in Louisiana & Sabine Tram Company has something like 22,000 or 23,000 acres cut and uncut timber; in Texas it has something like 60,000 acres cut and uncut. In Louisiana adjoining the Sabine Tram Company's holdings are very large tracts of land, some in the hands of people who will manufacture it themselves, some on the market for anyone who will pay the price to get it. I do not know just how many acres there are. I know of one institution which has 35,000 to 40,000 acres abutting up against us, and there are others who have small quantities, more or less.

Mr. Sugar: But you say the Sabine Tram Company has 22,000 acres cut and uncut. How much is uncut?

Mr. Walden: There are only eight or ten thousand acres uncut, I do not recall just how much there is of it.

Mr. Sugar: Approximately how much other land is there uncut and tributary to the Sabine & Northern which is owned by other people?

Mr. Walden: That runs into a great many thousand acres. There is one body of land that everybody knows about, belonging to the William M. Rice Institution, of 36,000 acres, joining up
2962 to us.

Mr. Sugar: That is all within easy reach of the Sabine & Northern?

Mr. Walden: I say their property adjoins the Sabine Tram Company's property there, and would be adjacent to the Sabine & Northern, and they have a good many thousands of acres over on the Watkins & Gulf, which would not. The Houston Oil Company owns some land there; I do not know whether they will manufacture it or not. The Lutcher & Moore Company own a very large body, and I suppose they will manufacture it.

Mr. Sugar: Going back to the Juanita mill; its lumber shipments are delivered to the Kansas City Southern at Juanita?

Mr. Walden: Yes, sir; the finished product.

Mr. Sugar: Could you deliver that lumber by the Sabine & Northern to another point?

Mr. Walden: The Sabine & Northern could take that lumber and deliver it to the Kansas City Southern at Smyth Junction, between four and five miles below Juanita.

Mr. Sugar: That is to say, the Sabine & Northern tracks practically parallel the Kansas City Southern between Smyth Junction and Juanita?

2963 Mr. Walden: Not exactly parallel them, but the Sabine & Northern goes in a southwesterly direction to Smyth Junction and then turns east, but it kind of forms a triangle. The Sabine & Northern could take the lumber at Juanita and deliver it at Smyth Junction.

Mr. Sugar: You are also in a position to deliver the product of the Deweyville mill at Ruliffe instead of at Deweyville?

Mr. Walden: Certainly; the Sabine & Northern engines and trains go into Deweyville and out from it.

Mr. Sugar: Why is it that some of the product of the Deweyville mill is not given to the Frisco road?

Mr. Walden: The Frisco Railroad has, as you know, a trackage right only, the same as the Sabine & Northern, over the Kansas City Southern, between De Quincy and Beaumont, and that trackage right bars the Frisco from taking either freight or passengers between De Quincy and Beaumont, except at a little place called Maurice, on the New Orleans & Northwestern, which is part of the Frisco system.

Mr. Sugar: In that respect it is tied somewhat like the Sabine & Northern?

Mr. Walden: Yes, sir; we tried to deliver some lumber to
2964 the Frisco, and they would not receive it because they said it would be in violation of their contract.

Mr. Sugar: I believe you said that you had an agent at Blewett?

Mr. Walden: Yes, sir.

Mr. Sugar: What duties does he perform for the Sabine & Northern?

Mr. Walden: He makes out the bills of lading and way bills and looks after the business.

Mr. Sugar: Are the logs way billed from there?

Mr. Walden: Everything that goes from there is way billed.

Mr. Sugar: Now, Mr. Walden, when was the Sabine & Northern incorporated?

Mr. Walden: The date of the charter was January, 1905; I believe they put it of record February, 1906.

Mr. Sugar: Why did the Sabine & Northern incorporate?

Mr. Walden: We incorporated because the traffic department of the Kansas City Southern advised us that it was the opinion of their legal department that they could not pay divisions under the ruling of the Interstate Commerce Commission in that Central Yellow Pine Association case unless the roads were legally incorporated as common carriers, and in order to get these divisions we
2965 incorporated.

Mr. Sugar: Did that cause any change in the original plans of the people in control of the road?

Mr. Walden: Repeat the question.

(Question read.)

Mr. Sugar: Did you decide to build a railroad or run the same old logging road?

Mr. Walden: We decided to incorporate and in fact in our articles of incorporation we stated that we were incorporating for the purpose of extending the line to Marysville, Louisiana, which is a point some twelve miles beyond Blewett.

Mr. Sugar: Was that merely an assertion, or is there something back of it?

Mr. Walden: We meant to make an extension; there was a good deal of tonnage over there, and at the time the charter was taken, we intended to make that extension.

Mr. Sugar: Marysville is a good sized country town, is it not?

Mr. Walden: About 3,000 people.

Mr. Sugar: Some big mills there?

Mr. Walden: There is one big mill and two or three small mills, several stores, and quite a little tonnage produced there.

2966 Mr. Sugar: Why did not the road go on with the construction?

Mr. Walden: We have not felt like spending any more money on a railroad enterprise until we knew just where we stood.

Mr. Sugar: You refer to the present troubles?

Mr. Walden: Well, I refer to the present troubles, and the anticipation of the present trouble. This has been a question for some

time, as to whether a tap line was a railroad and entitled to divisions, and naturally until that proposition was settled, I assume most people do not care to put in any more money in the road than they did have in; at least we would not.

Mr. Sugar: Was the trackage contract between the Sabine Tram Company and the Texarkana & Fort Smith and the Kansas City Southern made before or after the Deweyville mill was built?

2967 Mr. Walden: It was made after the Deweyville mill was built.

Mr. Sugar: Was the line from Juanita Junction to Juanita built before or after this trackage contract?

Mr. Walden: It was built afterwards, because we did not own that Juanita plant at the time that trackage contract was made. We purchased that afterwards.

Mr. Sugar: What length of spur tracks or mill tracks has the mill company that act as feeders to the railroad at Blewett?

Mr. Walden: About 16 miles.

Mr. Sugar: Do the road engines of the Sabine & Northern go on those tracks?

Mr. Walden: No, the Sabine Tram Company has its own locomotives.

Mr. Sugar: Who assembles the cars at Blewett?

Mr. Walden: The Sabine Tram Company.

Mr. Sugar: Then the railroad company takes them up there?

Mr. Walden: The railroad company distributes them, from the time it reaches the Sabine & Northern.

Mr. Sugar: Who estimates the value of the track, the State Board, or who?

2968 Mr. Walden: We render the amount of property we have and the State Board as I understand puts a valuation on it.

Mr. Sugar: That is the Board of Appraisers of Railroad, Telegraph & Telephone Lines?

Mr. Walden: Yes, sir.

Mr. Sugar: Now, the Sabine Tram Company is a Texas corporation?

Mr. Walden: A Texas corporation; yes, sir.

Mr. Sugar: And the Sabine & Northern Railway Company is a Louisiana corporation?

Mr. Walden: Yes, sir.

Mr. Sugar: The Sabine Tram Company has scales at Deweyville, has it not?

Mr. Walden: The Sabine Tram Company and the Kansas City Southern put in a joint scales at Deweyville, a modern 100-ton scale which under the leased rights transferred to the Sabine & Northern, is now a part of the Sabine & Northern, instead of the Sabine Tram Company's equipment.

Mr. Sugar: The thought had occurred to me and it seems to be very material here to ascertain something about the weight of logs,

and I believe we might have that test made. Would that
2969 be very expensive or inconvenient?

Mr. Walden: No, sir, we can put carloads on and weigh the loaded car and the empty car and scale it up; it would be some little expense but not enough to amount to anything. I will say this, however, that that weight would be approximately correct, but the weight of timber varies according to the kind of timber it is and whether it is pithy timber or not.

Mr. Sugar: It should be made with a carload of small logs and a carload of average sized logs——

Examiner Burchmore: Let us not go into the question of the weight of logs. If you wish to make it you may and advise us about the result of it, but we have already in the record enough as to the weight of logs and the principle which controls the weights.

Mr. Sugar: I was not going to ask any questions about it. Is there anything else you wish to state at this point?

Mr. Walden: No, sir; not that I know of.

Mr. Cowan: What is timber land worth in the locality of your mill?

Mr. Walden: That is hard to say, Judge Cowan, it is held
2970 at a better price than the manufacturer can get out of it today. The price of timber land will vary.

Mr. Cowan: You are there and you know something about it. You can say it is worth so much to so much, without attempt to quibble.

Mr. Walden: I am not attempting to quibble. There is no necessity. The value of the timber is good or not according to the ability of the man to hold it. I should say it is $70 an acre, and another man might say more than that.

Mr. Cowan: From $60 to $70.

Mr. Walden: Yes, sir, according to the size of the timber and its nearness to market.

Mr. Cowan: Measured by stumpage estimate what is it worth?

Mr. Walden: Some manufacturers put it in at $3.50, some $4, and some $5. That illustrates the stumpage value just about like the timber value.

Mr. Cowan: What do you mean by putting it in, carrying it in their capital account?

Mr. Walden: In their account, but $3.50 to $5 a thousand, being worth that much.

Mr. Cowan: You do not mean that there is a difference in
2971 the stumpage value of the timber but there is a difference in what the man estimates it to be worth?

Mr. Walden: That is a matter of bookkeeping yes, sir.

Mr. Cowan: And it depends upon what he can manufacture it at and get out of it?

Mr. Walden: It should.

Mr. Cowan: And it depends upon what it costs him to carry it in the stump for a period of years?

Mr. Walden: A great many of them do not even take that into consideration. Some of them figure that they bought timber cheap

years ago and instead of figuring the present market value of it or what they could buy it for, they base it more on what they purchased it at a number of years ago. There are no set rules with reference to the value of stumpage or the value of timber.

Mr. Cowan: Considering the present situation what in your opinion is the fair and reasonable market value in the stumpage per thousand feet of timber in that locality?

Mr. Walden: If you expect to give the manufacturer any profit out of it he could not pay much over $3 to $3.50 for the stumpage and get anything out of it when he put the cost of manu-
2972 facturing and market to it, that is my opinion.

Mr. Cowan: That is what I am asking for, is your opinion. Now the amount he could get out of it depends upon the ultimate cost of manufacturing it.

Mr. Walden: The cost to manufacture and selling it, of course he has got to sell it.

Mr. Cowan: I know, but one of the main elements is the cost of logging his mill and manufacturing it.

Mr. Walden: Yes, he has got to log his mill.

Mr. Cowan: Is the price of lumber based upon the rate of freight at a delivered price at the point of mill or at an f. o. b. price at the mill?

Mr. Walden: It should be based on the f. o. b. mill price at the mill.

Mr. Cowan: Is it?

Mr. Walden: As a matter of fact it seems to me the price of lumber today is based on altogether how bad a man needs the money and whether he has got to run and pay the interest on his debts and so forth. There are a great many concerns selling lumber today that I am satisfied are selling at a loss. We cannot make any money out of it today and I do not think we are the cheapest peo-
2973 ple in the markets.

Examiner Burchmore: Do you mean the market is demoralized?

Mr. Walden: Yes, sir.

Mr. Cowan: I am leading up to that point. The price of lumber today depends on the price at which the man is willing to market his forest?

Mr. Walden: Very largely.

Mr. Cowan: Now, then the man who can log it the cheapest and get it to the point of sale the cheapest has the advantage in the profit to that extent?

Mr. Walden: Why, naturally, a man who manufactures the cheapest lumber will make the most money out of it when he sells it.

Mr. Cowan: You heard the gentleman testify today for some lumber company, I forget the name, but who was on the stand this morning. He gets 6 cents or 4 cents a hundred pounds out of the 18 cent rate on his lumber as a division which goes to the mill company that owns the railroad company. Now you get how much?

Mr. Walden: We get ½ to 3 cents per hundred pounds where it

goes to a place where we get divisions. When it goes to a
2974 place where we do not get any divisions the railroad then has to fall back for its revenue to the $5.25 per car delivered at Deweyville and $1.75 delivered at Juanita.

Mr. Cowan: Which the lumber company has to pay?

Mr. Walden: Which the lumber company has to pay the railroad company.

Mr. Cowan: Don't you know you are working at a disadvantage as against the man who gets the higher division?

Mr. Walden: If our railroad got as good divisions as the other man certainly the railroad company would be benefited that much. If they get a greater division than we do, the road ought to make more money than ours.

Mr. Cowan: In your opinion ought not everybody who is manufacturing and logging their forests by railroad, whether they are common carriers or not, to have equal opportunities in the market?

Mr. Walden: I guess I am dense; I don't seem to understand what your meaning is.

Mr. Cowan: You have in Texas a logging road that is not recognized as a common carrier by the state laws.

2975 Mr. Walden: No, we have no logging road in Texas.

Mr. Cowan: You have some railroad there?

Mr. Walden: Except the Sabine Tram Company has no road except that 2 miles between Blewett and Deweyville, in Texas.

Mr. Cowan: And you get nothing out of that?

Mr. Walden: That is leased to the Sabine & Northern, and of course it gets part of the benefit of whatever the Sabine & Northern Railroad gets.

Mr. Cowan: Do you not get any division on state business?

Mr. Walden: We get some divisions in Texas.

Mr. Cowan: On state business?

Mr. Walden: Yes, sir.

Examiner Burchmore: That is all interstate business, is it not?

Mr. Walden: Yes, it is based on interstate business. I have in mind——

Mr. Cowan: Well, at all events pass that for the moment. My question need not depend on that. Take a railroad in Texas which does not get any division, operating similarly to what yours does in Louisiana, where do you get a division, do you think it is an equal opportunity for one of you to get the freight rate back and
2976 the other not?

Mr. Walden: They are not operating under the same conditions as I understand it. Your question as I gather your meaning is should a tap line that holds itself out as a common carrier get divisions as compared with a tram line that does not hold itself out as a common carrier. Is that the idea?

Mr. Cowan: I am asking you whether as a question of business economy in the manufacture of lumber they are on an equality where one gets a division and the other does not?

Mr. Walden: The manufacturers of lumber are on an equality. The rate is the same.

Mr. Cowan: Well, I will not discuss it with you.

Examiner Burchmore: What is the largest division you get on lumber?

Mr. Walden: 3 cents per hundred pounds.

Examiner Burchmore: Suppose they should raise that rate tomorrow to 5 cents per hundred pounds on lumber, is it not an actual fact that the lumber company would be able to sell its lumber at a little bit better advantage in competition with *of* its competi-
2977 tors than it is today?

Mr. Walden: It could not do it, no.

Examiner Burchmore: Is it not a fact it would feel free to sell the lumber at a little less?

Mr. Walden: I do not know why they should. As a matter of fact the lumber company ought to get the market value of stuff. It can get no more. As an illustration, take Mr. Frary, of the Lutcher Moore Lumber Company, he knows what his material is worth and the Sabine Tram Company ought to get as much as the Lutcher Moore Company, and the Lutcher Moore Company ought to get as much as the Sabine Tram Company.

Examiner Burchmore: Suppose this railroad wanted some material of some kind for use along its line, the lumber company would not hesitate to sell the railroad at actual cost, would it, if it was desired and could not pay any more?

Mr. Walden: Well, we charge the Sabine & Northern Railroad for the material we sell them, the same as we do anybody else; we do not sell it to them any cheaper because they happen to be closely allied with our company.

Examiner Burchmore: You wholly disregard the fact of the close alliance of the two companies when it comes to selling them
2978 the lumber?

Mr. Walden: In fact I can say that because as I said to Mr. Sugar, if we regarded that as a factor very strongly the majority of our lumber would go to points where we get divisions instead of the majority going where we do not get divisions, as it is. We try to market our lumber where we can get the most money.

Examiner Burchmore: I believe we have got a good deal into the record, about all the witness will state on the matter of divisions.

Examiner Gutheim: Take a car which you get a three cent division on, suppose it is a 50,000 pound car, the railroad gets $15 division?

Mr. Walden: Yes, sir.

Examiner Gutheim: On the strength of that the railroad rebates to the lumber company $5.25 charge on 4 carloads of logs?

Mr. Walden: Yes, sir.

Examiner Gutheim: Now the expense that the Sabine Tram Company is put to in the logging, that is $5.25 a car, is one of the elements that goes into the cost of the lumber?

Mr. Walden: Yes, sir.

2979 Examiner Gutheim: So when you rebate $5.25 on the cost of the lumber so far as that particular car goes you have got — $15 to the railroad?

Mr. Walden: Yes, sir.

Examiner Gutheim: The lumber company has got back $21?

Mr. Walden: Yes, sir.

Examiner Gutheim: Out of 4 cars of logs you brought out, how many feet of lumber will you make?

Mr. Walden: I do not know.

Examiner Gutheim: Well, about how much?

Mr. Walden: There ought to be, I would say, in the neighborhood of 25,000 feet.

Examiner Gutheim: 25,000 Feet, and you have got about $21 that you did not have to pay for logging, that you might have to pay on some other car, so you get practically $1 advantage on that lumber on account of the fact you did not have to pay for the logging.

Mr. Walden: You mean the lumber company gets the advantage?

Examiner Gutheim: Yes.

Mr. Walden: It gets some advantage.

Examiner Gutheim: It gets about $1. It gets 25,000 feet
2980 at $21 rebate.

Mr. Walden: Take the other end of it——

Examiner Gutheim: Take this end first. You get about $1.

Mr. Walden: I think it would be about that.

Examiner Gutheim: So that you get a division at a lower price by $1 a thousand than you are getting on a car that you do not get a division on, and if you get no division at all you would be losing a dollar a car as against the fellow who did not get divisions?

Mr. Walden: I would like to make this explanation also. You have taken the proposition where we get $5.25, where the railroad company refunds $5.25 to the lumber company.

Examiner Gutheim: That is also true of the case of the Deweyville mill.

Mr. Walden: How about the other end, at Juanita, where the railroad company gets a divison there but only refunds $1.75 a car.

Examiner Gutheim: The same principle applies, not to such an extent.

Mr. Walden: We figure it would equalize the two.

Examiner Gutheim: Your explanation goes not to the
2981 principle, but to the amount of the advantage. You say at another mill you are advantaged to the extent of $1.75 while in the first you are to the extent of $5.25.

Mr. Walden: Please state that again.

(Question read.)

Examiner Burchmore: Your last explanation amounted to this, that while it is true, that as was apparently brought out by this line of questions which has just been pursued, at one mill you are receiving the advantage of these divisions in that you get a refund of your logging expense of $5.75—— .

Mr. Walden: Where we get divisions.

Examiner Burchmore: Yes, sir; while at the other mill you only get a refund of $1.75.

Mr. Walden: Yes, sir.

Examiner Burchmore: This explanation is in all cases you do not get $5.25 but in some only $1.75, you simply get to the extent of the advantage, the principle is the same.

Mr. Walden: We get back a greater amount on the Deweyville shipment than at the Juanita shipment because the haul is considerably greater and the expense of delivery is greater.

2982 Examiner Burchmore: Is there any further explanation you care to make?

Mr. Walden: No explanation, except that we undertook to handle this proposition on the basis of a milling in transit, and the railroads in Texas at one time under the ruling of the Commission allowed a refund of 4 cars of logs to 1 car of lumber on the finished product, and we undertook in filing this tariff to state it somewhat similar to the way the other lines had handled it. Now, as regards to the difference between the amount refunded on the shipment that went to Deweyville and Juanita we could not equalize that so that the expense would be the same and the lumber company would get the benefit of the same return. We simply based that proposition where we got a division on granting back to Juanita what the Sabine Tram Company had to pay on the cars from Blewett up to Juanita, which was $1.75 per car, and the logs that went to Deweyville, Texas, some 37 miles as compared with a 5 mile haul or approximately that, the cost down there was $5.25, and on the same basis that the Sabine & Northern refunded $1.75 on the Juanita shipment they refunded what was paid, $5.25 on the Deweyville shipment. Now, as to whether the lumber company benefits

2983 or does not by that transaction, of course is a matter of figures.

Examiner Burchmore: I guess perhaps we are getting into the realm of argument an-way.

Mr. Walden: I did not mean to.

Examiner Burchmore: Well, we all have.

Mr. Cowan: I started in upon the price of timber land. The ownership of the saw mill and the railroad in this case is the same in the timber land?

Mr. Walden: Yes, sir.

Mr. Cowan: Lutcher-Moore are in the same fix, are they not?

Mr. Walden: No, sir; Lutcher-Moore have no railroad or make no pretence, they are not incorporated as a common carrier.

Mr. Cowan: They have a great deal better railroad than you have.

Mr. Walden: I don't know about that.

Mr. Cowan: Don't you know they have a great deal better railroad than you have and more expensive?

Mr. Walden: No, I do not know that.

Mr. Cowan: Have you seen it?

2984 Mr. Walden: No.

Mr. Cowan: Don't you know the saw mill cannot operate an extensive plant without a railroad to operate it with?

Mr. Walden: Yes, sir; they can.

Mr. Cowan: Who is doing that?

Mr. Walden: Lutcher-Moore.

Mr. Cowan: Not got a railroad?

Mr. Walden: They say not; it is not incorporated. They call it a tram line.

Mr. Cowan: I am not quibbling about that part of it, but you know they operate a railroad and haul logs to the mill.

Mr. Walden: They either have to operate a railroad or a tram line or have some method of getting the lumber to the mill.

Mr. Cowan: It is laid on rails of as good quality as yours, on ties and graded road to haul the stuff up to the mill the same as you do?

Mr. Walden: I expect so.

Mr. Cowan: You know so.

Mr. Walden: Well, I don't think they haul it to the mill but dump it off in the river.

2985 Mr. Cowan: When they log their forest they have to be at the expense of logging?

Mr. Walden: Yes, sir.

Mr. Cowan: And the railroad company that takes the lumber out does not pay them anything back for it, and in your case they do. Will you say that you do not enjoy an advantage as compared to them in such a case?

Mr. Walden: Yes, sir; because I assume obligations that they do not assume at all.

Mr. Cowan: I understood counsel to say that the reason you incorporated was because the legal department of the Kansas City Southern, though you would incorporate, said you could not get divisions unless you did?

Mr. Walden: Yes, sir.

Mr. Cowan: Did you perform any different service after you incorporated from what you did before, so far as your lumber company is concerned?

Mr. Walden: The arrangement was a little bit different yes, sir.

Mr. Cowan: That is a paper arrangement, but I am talking about the service. Did you perform any different physical service

2986 to the saw mill than you did the day before?

Mr. Walden: The lumber was handled and delivered over the tracks in approximately the same way except we continue the Sabine & Northern end of it to the Sabine & Northern road and let the tram line confine itself to bringing them up to the Sabine & Northern road.

Mr. Cowan: The service is practically the same, the same engines, same crews, over the same railroad, to the same saw mill, and the same kind of lumber.

Mr. Walden: I think we have acquired some engines since.

Mr. Cowan: But that is in the progress of your business.

Examiner Burchmore: I understood the witness substantially admitted that but made a further statement in his own behalf that this railroad had undertaken these duties and liabilities and now held itself to the public as a common carrier and he thought that changed the situation.

Mr. Walden: That is it exactly.

Examiner Burchmore: That is a question of law, is it not?

Mr. Cowan: It may be a question of fact as to what he
2987 actually did. I am not inquiring what he proposed to do but what he actually did. My question was if the service was not the service, and he answered it was. Now, for whom did you perform service the day after you incorporated that you did not the day before?

Mr. Walden: I could not answer that. We may not have performed any service the day after we incorporated.

Mr. Cowan: Well the months afterward. The following month after you incorporated what was the different service?

Mr. Walden: We performed service for anybody who wanted our service after we incorporated. We did not do that before.

Mr. Cowan: But for whom did you do it afterwards that you did not do it for before?

Mr. Walden: Different people who went there that wanted to ship anything.

Mr. Cowan: No, now for whom did you do it?

Mr. Walden: I don't know, I could not say here.

Mr. Cowan: And you put in your charter that you were going to build to some place that you did not build?

Mr. Walden: The charter was to that effect, yes, sir.

2988 Mr. Cowan: And you have not built there?

Mr. Walden: No.

Mr. Cowan: And are not going to?

Mr. Walden: I don't know about that, I am not willing to say that we will not. I will say, under present conditions we won't.

Mr. Cowan: The foundation of it all was to get divisions of the rates?

Mr. Walden: Yes, sir; I made that statement.

Examiner Burchmore: It seems to me I remember hearing a part in drafting a letter to your company not so very long ago in response to an inquiry you addressed to the Commission on a question of law.

Mr. Walden: A question of what?

Examiner Burchmore: The Interstate Commerce law.

Mr. Walden: No, I would not remember it, unless I saw the correspondence.

Examiner Burchmore: I was trying to remember whether it was your company or some one else.

Mr. Walden: I don't remember about it.

Mr. Garwood: When a tram road is laid down the company laying it can take it up whenever it gets ready?

2989 Mr. Walden: That is my understanding. In fact I know it, because we have had tram roads.

Mr. Garwood: When an incorporated railroad lays a track it is compelled to keep it there and operate it until the expiration of the time mentioned in its charter, is it not?

Mr. Walden: That is my understanding.

Mr. Garwood: It cannot quit that business. It assumes the liabilities imposed by law and by statute during the full length of its cor-

porate existence and it has no means of voluntarily relinquishing that liability?

Mr. Walden: That is my understanding.

Mr. Garwood: Is it not true that every question propounded both by counsel for the intervenors and the examiners in this case absolutely leaves out in their comparison of the advantageous situation of the incorporated and the unincorporated road all of the liabilities assumed by the common carrier and the coincident interest on the amount of money put into it.

Mr. Cowan: If you go into that that will lead to a long examination.

Examiner Burchmore: I think you are asking the witness
2990 to testify to matters of law.

Mr. Garwood: No. That last question is not.

Examiner Burchmore: And if you will recall, I think I said or made some explanation a few moments ago——

Mr. Garwood: Your last question did, but this entire examination has been gone over and over and over and I would not have asked the question because I think it is largely a matter of law, but counsel has put that proposition in the record in nineteen different forms and I think——

Examiner Burchmore: I understand you object to that line of questions? If so I will sustain the objection.

Mr. Garwood: I did not object because I did not want to delay the proceeding.

Mr. Sugar: You were asked if the Lutcher & Moore people did not have a tram road equally as good as the Sabine & Northern, and if it was not an inequality for the Sabine & Northern to be allowed a division when the Lutcher Moore people were not allowed one.

Mr. Walden: Yes, sir.

Mr. Sugar: Now take another view of the matter. Say for instance that the Lutcher Moore people buy their timber land at 35
2991 cents to $1.25 an acre and the Sabine Tram Company bought its lands at from $20 to $40 an acre, would it not be an inequality to allow the Lutcher-Moore people to sell lumber at the same price and the Sabine Tram Company?

Mr. Walden: I would say they would have that much advantage and they do have; they bought their lumber lands much cheaper than we did.

Examiner Burchmore: Let us not pursue that any farther.

Mr. Andrews: The Sabine Tram Company has a mill in Texas?

Mr. Walden: Yes, sir.

Mr. Andrews: How many miles of tram road in Texas?

Mr. Walden: None.

Mr. Andrews: How many miles of any sort of road has it in Texas?

Mr. Walden: It has that joint ownership contract with the Kansas City Southern and the Texarkana & Fort Smith between Deweyville and Ruliff, the track itself and the switches and so forth I imagine run out somewhere two and a half to three miles.

Mr. Andrews: That is a joint ownership constructed by whom?

2992 Mr. Walden: By the Sabine Tram Company many years ago. The Sabine Tram Company——

Mr. Andrews: When did the connecting line acquire an interest in it?

Mr. Walden: The Texarkana & Fort Smith?

Mr. Andrews: Yes.

Mr. Walden: I was just going to explain that.

Mr. Andrews: The date is all I care for, unless you want to talk about it.

Mr. Walden: I think my explanation is necessary to make you understand. When they put that mill there in 1898 or 1899 the Sabine Tram Company furnished the right of way, made the grades, furnished the ties, and the Texarkana & Fort Smith furnished the steel and laid it, therefore it became a joint track.

Mr. Andrews: That track was built to serve the mill erected at what you call Deweyville?

Mr. Walden: Deweyville; yes, sir.

Mr. Andrews: Has the Sabine Tram Company any other railroad in Texas, either tram or otherwise?

Mr. Walden: No.

Mr. Andrews: That is all.

2993 Mr. Walden: Yes, sir.

Mr. Andrews: And your interest in that track I understand you to say was leased to the Sabine & Northern?

Mr. Walden: Yes, sir.

Mr. Andrews: Does the Sabine & Northern or the Sabine Tram or anybody else get any division on any purely Taxes movement from that mill?

Mr. Walden: Not where it moves purely within the state.

Mr. Andrews: Do you make any reports to the Texas Railroad Commission?

Mr. Walden: No, sir.

Mr. Andrews: And you are not recognized by the Texas Railroad Commission so far as the Texas end of it is concerned in any sense at all?

Mr. Walden: No, sir.

Mr. Andrews: Is the track in Louisiana better or worse?

Mr. Walden: Than the track in Texas?

Mr. Andrews: Yes.

Mr. Walden: About the same.

Mr. Andrews: About the same track?

Mr. Walden: Yes.

Mr. Andrews: How many miles are there in Louisiana?

2994 Mr. Walden: The Texas end of it I believe has a little heavier steel.

Mr. Andrews: How many miles have you in Louisiana?

Mr. Walden: 9½ miles.

Mr. Andrews: And 3½ miles in Texas?

Mr. Walden: About—well I would say 3. I think 3 would probably cover it.

(Witness excused.)

Examiner Burchmore: The Blytheville, Burdette & Mississippi River Railway.

Mr. Walter: I would like a continuance of the following cases until the next hearing: The Arkansas Southeastern; North Louisiana & Gulf; the Trinity Valley & Northern and the Roman Southeastern.

Examiner Burchmore: We have left on the call 5 cases in addition to these just announced and it seems very possible to dispose of those cases this afternoon and with a short evening session, and counsel has suggested that that be done and those other four cases go over. Is there any objection to that course? How do you feel about that Judge Cowan?

Mr. Cowan: The court hears no objection. We have no ob-
2995 jection.

Examiner Burchmore: It will be understood that the hearing will be adjourned tonight, but it may be possible that one of those companies can be taken up.

Mr. Walter: We will be here and if you can reach any one of them we will be ready.

Examiner Burchmore: If it seems possible we will do it. It was stated to me this noon that the president of the Timpson & Henderson Railroad in Texas, did not attend this hearing and was not present under some misapprehension as to the scope of the hearing, and his part in it. I do not understand how he can be under any misapprehension and I want to say further that an attorney who came to my office in Washington within a fortnight stated that he represented that company, and I think he was their regularly retained counsel, and asked with respect to this hearing down here, and the result of our talk was that I advised him that he or some other representative of that company must be here to look after its rights at this time, and I understood him to say that the general freight agent of that company would be here. I merely make this statement in order that the record may show that the Timpson & Hen-
2996 derson was referred to and they are not here. But, if, as a matter of fact they are under any misapprehension, it will be proper for them to make any such representation to the Commission as they wish to, and such request as they desire to proffer for a hearing at the next hearing. I cannot indicate however what view the Commission will take of this matter.

The Tyrona & St. Francis Valley does not seem to be present and I understand their counsel has sent word indirectly that they did not desire a hearing. We will take up now the Blythesville, Burdette & Mississippi River.

2997 *Blythesville, Burdette & Mississippi River.*

M. B. COOPER, was called as a witness and having been duly sworn, testified as follows:

Examiner Burchmore: You are an officer of the Blythesville, Burdette & Mississippi River Railway?

Mr. Cooper: Yes, sir, secretary and treasurer.

Examiner Burchmore: You occupy the same position with the Three States Lumber Company?

Mr. Cooper: No, I am assistant secretary and treasurer of the lumber company.

Examiner Burchmore: I understand this railway company is at least in a substantial sense controlled by the stockholders of the Three States Lumber Company?

Mr. Cooper: It, as a stockholder of the Three States Lumber Company owns as agent for the stockholders of that company a majority of the stock of the railroad company.

Examiner Burchmore: It is a sort of a trust holding?

Mr. Cooper: In a sense; yes, sir.

Examiner Burchmore: That is, the stock in the railroad is held in trust for the stockholders of the lumber company?

2998 Mr. Cooper: Yes, sir.

Examiner Burchmore: The officers of the two companies are substantially identical?

Mr. Cooper: The president is the same, and the secretary and treasurer of the lumber company is vice-president and general manager of the railroad company; and my office in the lumber company is appointive, whereas in the railroad company it is secretary and treasurer which is elective.

Examiner Burchmore: This railroad as I understand it extends from a connection with the St. Louis & San Francisco Railroad, commonly known as the Frisco at Burdette Junction in what direction and for what distance?

Mr. Cooper: It extends about a mile and a half from Burdette Junction on the Frisco to Burdette and then about 5 miles in a southerly direction to the Misissippi River, about 5 miles in a westerly direction, and is now built about 2 miles in a northerly direction with a proposed extension of 7 miles north of Burdette to Blythesville, Arkansas.

Examiner Burchmore: Is there any grading done on that extension?

Mr. Cooper: That extension is practically all graded except a small gap of possibly at this time less than a mile. We are

2999 now hauling on it.

Examiner Burchmore: And the actual construction of the road has been interrupted for some reason?

Mr. Cooper: Well, last winter it was interrupted by the winter rains and it was not completed, and will be completed this fall, if

the weather permits. We are in a bottom country and depend a great deal upon the season we have.

Examiner Burchmore: Then as I understand it, from Burdette the railroad branches out in several directions, running south to the Mississippi, east to a connection with the Frisco and west to Halls Will and Wagoner.

Mr. Cooper: Yes, sir.

Examiner Burchmore: Where is the lumber mill of the Three States Lumber Company located with reference to the line of this railroad?

Mr. Cooper: In Burdette.

Examiner Burchmore: It is at Burdette?

Mr. Cooper: Yes, sir.

Examiner Burchmore: But it is between Burdette City and the Frisco system?

Mr. Cooper: No, it is within the incorporated limits of
3000 Burdette.

Examiner Burchmore: How far is it from the right of way of the Frisco railroad?

Mr. Cooper: By rail it is about a mile and a half.

Examiner Burchmore: As the crow flies about a quarter of a mile?

Mr. Cooper: No, three-quarters, or nearly a mile.

Examiner Burchmore: The Frisco has a long connecting spur running part way to the mill?

Mr. Cooper: It in a sense is a joint track for three-quarters of a mile. The railroad company owns the right of way, ties and so forth, and the Frisco owns the rail only for three-quarters of a mile, of that distance.

Mr. Wilson: Now the balance of the distance.

Mr. Cooper: The balance of the distance to the lumber company's plant is owned by the Blythesville, Burdette & Mississippi River Railway Company?

Examiner Burchmore: That is about a quarter of a mile?

Mr. Cooper: Well, three-quarters by rail. I said the distance was about a mile and a half.

Examiner Burchmore: Are there any other mills on the line?

3001 Mr. Cooper: There is the Burdette Cooperage Company and Stave Manufacturing Plant and J. W. Smith, who manufactures scythe handles.

Examiner Burchmore: Is J. W. Smith a corporation?

Mr. Cooper: A person.

Examiner Burchmore: Is he any officer or stockholder of this lumber company?

Mr. Cooper: He has no interest whatever in the lumber company.

Examiner Burchmore: Does he buy any of his wood from the forests of this lumber company?

Mr. Cooper: He purchased a little from it last fall but is buying

most of his material from other parties who own timber along our road.

Examiner Burchmore: How about the Burdette Cooperage Company, the same question with respect to them?

Mr. Cooper: The Burdette Cooperage Company I will state, one stockholder of the Three States Lumber Company owns a portion of the stock of the Burdette Cooperage Company.

Examiner Burchmore: Is he a minority stockholder in both companies?

Mr. Cooper: He is a minority stockholder in the Three States Lumber Company but a majority stockholder in the Cooper-
3002 age Company.

Examiner Burchmore: Is the relationship between the two companies a very friendly one?

Mr. Cooper: It is.

Examiner Burchmore: Does this cooperage company buy its stock from the forests of the Three States Lumber Company?

Mr. Cooper: Practically all of its raw material comes from the lands of the Three States Lumber Company although they do buy timber from other parties along the road.

Examiner Burchmore: Now, that material, how does it get to their mill, is it handled by this railroad company?

Mr. Cooper: It is handled by the Blythesville, Burdette & Mississippi Railway Company.

Examiner Burchmore: What do they charge for that, the regular tariff rates?

Mr. Cooper: We have a local published tariff covering all commodities handled.

Examiner Burchmore: Is that the court tariff? You do not use the Arkansas tariff?

Mr. Cooper: The Arkansas distance tariff.

Examiner Burchmore: Yes.

3003 Mr. Cooper: Formerly we did, but within the last year we have got out a published local tariff of our own.

Examiner Burchmore: Do you file that with the Interstate Commerce Commission?

Mr. Cooper: One copy has been sent to the Interstate Commerce Commission, but I might file this with the record.

Examiner Burchmore: Does it bear an I. C. C. number?

Mr. Cooper: Yes, do you want this filed?

Examiner Burchmore: Never mind. When was the mill at Burdette opened for operation?

Mr. Cooper: In about 1900.

Examiner Burchmore: That is the first milling that was done there?

Mr. Cooper: Yes.

Examiner Burchmore: Was it at that time operated by this lumber company?

Mr. Cooper: At that time it was operated under contract by A. B. Wolverton. The contract was of this nature. The lumber company put up the money for the timber lands and the plant and the

contractor was to produce that lumber for a certain amount per thousand and in the event—in the returns from his contract he paid for the plant and the lands, they were to go to him at
3004 the completion of the contract.

Mr. Andrews: To whom?

Mr. Cooper: To Wolverton.

Mr. Andrews: The man who put up the money?

Mr. Cooper: The man who took the product.

Examiner Burchmore: Who was the other party to the contract?

Mr. Cooper: The Three States Lumber Company.

Examiner Burchmore: Was this Three States Lumber Company an old corporation?

Mr. Cooper: It was.

Examiner Burchmore: They had owned down there a long time?

Mr. Cooper: This particular property they had not owned a long time, but other property they had owned.

Examiner Burchmore: How far away from this?

Mr. Cooper: Well, it was in another state at that time.

Examiner Burchmore: Then they bought these holdings down here and entered into a contract with Mr. Wolverton to do the work?

3005 Mr. Cooper: Yes, sir.

Mr. Wilson: I did not understand that the Three States Company bought the land at once, but Mr. Wolverton bought it.

Mr. Cooper: He bought it, but it was taken in the name of the Three States Lumber Company for security and they put up the money; it was simply a means of getting that lumber in a manufactured state without going into the detail of the operation themselves.

Examiner Burchmore: They farmed out the privilege of operating?

Mr. Cooper: Yes.

Mr. Andrews: I think I must misunderstand you. I understood you to say that Mr. Wolverton bought this entire proposition and deeded it to the Three States Lumber Company and the Three States Lumber Company advanced the money with *with* the understanding that if he were to have anything left after the debt was paid, it was to go to Mr. Wolverton.

Mr. Cooper: You have it reversed just a little.

Mr. Andrews: I thought I could not understand and that is the reason I ask.

Mr. Cooper: The property was all taken in the name of
3006 the Three States Lumber Company and simultaneously a contract was made with Mr. Wolverton, the contractor——

Mr. Andrews: Who was the purchaser, Mr. Wolverton, or the Three States Lumber Company?

Mr. Cooper: The Three States Lumber Company.

Mr. Andrews: Was the purchaser?

Mr. Cooper: Was the purchaser. Then they contracted the entire proposition to Wolverton.

Mr. Wilson: The Examiner was right and you and I had it wrong.

Mr. Andrews: I thought I did not understand it, but that is the way I understood.

Mr. Cooper: And in the event his contract was successful he was to be deeded the saw mill plant and the cut over lands at the completion of the contract.

Examiner Burchmore: Would there be any objection on your part to filing a copy of that contract?

Mr. Cooper: I think not.

Examiner Burchmore: If not, I believe that will make it clear. But after all it is a detail of the case which may be of no importance.

Mr. Cooper: I think myself it is unimportant. It occurred before the incorporation of the railroad.

3007 Examiner Burchmore: You owned the land before the railroad was built?

Mr. Cooper: It occurred before the incorporation of the railroad.

Examiner Burchmore: Before the building of the railroad?

Mr. Cooper: No.

Examiner Burchmore: You said the mill was opened in 1902?

Mr. Cooper: In 1902.

Examiner Burchmore: When was the railroad first built, at the same time?

Mr. Cooper: A portion of it from the Mississippi River to Burdette was built before the mill was built, as at that time the Frisco railroad had not extended their line through that country.

Examiner Burchmore: You built down to the river?

Mr. Cooper: We built from the river in, in order to bring the plant in at that time.

Examiner Burchmore: As an original proposition the railroad was built to serve the mill?

Mr. Cooper: It was built to serve the mill; yes, sir.

3008 Examiner Burchmore: When was it incorporated?

Mr. Cooper: In 1906.

Examiner Burchmore: It was incorporated at that time under the laws of Arkansas a common carrier railroad?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Previous to 1906 had it had any joint arrangement with the Frisco?

Mr. Cooper: It did not.

Examiner Burchmore: It did not receive any divisions?

Mr. Cooper: No.

Examiner Burchmore: At the time it was incorporated had Mr. Wolverton dropped out of this arrangement?

Mr. Cooper: Yes, sir.

Examiner Burchmore: And the Three States Lumber Company owned the whole proposition?

Mr. Cooper: The Three States Lumber Company owned the whole proposition.

Examiner Burchmore: I guess that is immaterial, then.

Mr. Andrews: And Mr. Wolverton has now ceased to be the residuary legatee?

Mr. Cooper: Yes, sir; but it occurred before the incorpora-
3009 tion of the railroad.

Mr. Andrews: It seems to me it is unimportant.

Examiner Burchmore: In our zeal to get at the facts we went off on a tangent. Now the railroad corporation was formed in 1906?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Were joint rates and divisions thereunder established immediately upon the incorporation?

Mr. Cooper: Within a few months afterwards.

Examiner Burchmore: What was the original capitalization of this corporation?

Mr. Cooper: Of the railroad?

Examiner Burchmore: Yes.

Mr. Cooper: The original capitalization was $240,000.

Examiner Burchmore: Was that all issued?

Mr. Cooper: No.

Examiner Burchmore: How much was issued?

Mr. Cooper: $140,000 issued.

Examiner Burchmore: Now, has any been issued since?

Mr. Wilson: May I save a little time by interjecting?

Examiner Burchmore: Yes.

Mr. Wilson: You mean stock and bonds?

3010 Mr. Cooper: He did not ask me about bonds. There was issued practically at the same time $140,000 of stock and $100,000 of bonds.

Examiner Burchmore: Was one given as a bonus for the other?

Mr. Cooper: No, it would not be considered so. The lumber company received for the road $100,000 in stock and $100,000 in bonds.

Examiner Burchmore: And took it right over in exchange for the road?

Mr. Cooper: Took it right over in Exchange for the road and $40,000 was disposed of outside.

Examiner Burchmore: $40,000 in stock?

Mr. Cooper: In stock.

Examiner Burchmore: Who took that?

Mr. Cooper: Mostly some of the stockholders of the lumber company individually and a few minor holdings by other parties.

Examiner Burchmore: That stock was subsequently bought up?

Mr. Cooper: It is, you might say, held as qualifying stock mostly.

3011 Examiner Burchmore: $40,000?

Mr. Cooper: Yes, sir.

Examiner Burchmore: It takes $40,000 to qualify these directors?

Mr. Cooper: Well, the $40,000 was issued to different parties, but the Three States Lumber Company paid for practically all of it and held the stock in trust.

Examiner Burchmore: There is some state law that requires resident stockholders or something of that kind?

Mr. Cooper: Yes, sir.

Examiner Burchmore: At that time how much of this railroad was in operation?

Mr. Cooper: The line from Wolverton to Burdette, which is 5 miles; the line from Burdette to Burdette Junction, a mile and a half, and two branch lines running west each of which is practically 10 miles, I believe.

Examiner Burchmore: Then pretty nearly all the present line was in operation with exception of the northern extension?

Mr. Cooper: Yes, sir.

Examiner Burchmore: How much railroad has been constructed since that time?

3012 Mr. Cooper: We have the steel laid on practically 2 miles of the Blythesville extension and nearly all of the dump built for the entire extension of 7 miles.

Examiner Burchmore: How have you paid for those extensions, wherever you obtained the money?

Mr. Cooper: A portion of it, of course came from the $14,000 additional stock issued and I think we show a deficit which represents an open account with the Three States Lumber Company.

Examiner Burchmore: What is the amount of that deficit?

Mr. Cooper: I think it is about $16,000.

Examiner Burchmore: Now you pay interest on that I presume?

Mr. Cooper: Yes, sir.

Examiner Burchmore: 6 Per cent?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Did you state what the main line mileage of this road is at the present time?

Mr. Cooper: There was practically twenty miles turned over by the lumber company to the railroad company.

Examiner Burchmore: Twenty miles?

Mr. Cooper: Yes, sir. That we do not consider as all main line however.

3013 Examiner Burchmore: Now on November 20th, 1909, here are some figures that purport to show the mileage as 7.20 miles of main line, 2.99 miles of siding, making 10.19 as a total. Was that inaccurate at that time?

Mr. Cooper: It must be. Possibly that is derived from the fact that we consider our main line will be from Wolverton straight north to Blythesville, and we had at that time about seven miles of that constructed.

Examiner Burchmore: Then your 2.99 miles of siding I suppose was the line over to Burdette Junction?

Mr. Cooper: No, I suppose that was considered sidings, at the river and at Burdette.

Examiner Burchmore: Then I guess this report here is inaccurate.

Mr. Cooper: It must be, if it really states that mileage.

Examiner Burchmore: Probably the Examiner asked you how long the main line was, and you told him seven miles and the sidings you told him 2 miles, and you did not mention the extension?

Mr. Cooper: Yes, sir.

Examiner Burchmore: I suppose your report is accurately stated?

3014 Mr. Cooper: Yes.

Examiner Burchmore: By the way, do you report to the Commission?

Mr. Cooper. Yes, sir. It was filed just after the first of December. We received the blanks late, and did not get them up.

Examiner Burchmore: You did not file an annual report for the preceding year?

Mr. Cooper: No, we did not. No annual report blanks were sent to us at that time. We had to ask to be put on the list so we could get the Interstate Commerce Commission literature.

Examiner Burchmore: Do you have any trackage rights?

Mr. Cooper: In what way?

Examiner Burchmore: Do you operate your trains over the rails of any other companies?

Mr. Cooper: We do not.

Examiner Burchmore: Are there any private logging tracks or tram tracks belonging to the Three States Lumber Company connecting with your line?

3015 Mr. Cooper: There are not. The railroad company owns all the tracks.

Examiner Burchmore: You run right into the woods?

Mr. Cooper: Yes, sir, although I might say that it is contemplated that hereafter there are some of the temporary spurs that will be constructed by the lumber company.

Examiner Burchmore: In the future?

Mr. Cooper: Yes, sir.

Examiner Burchmore: But not in the past?

Mr. Cooper: But not in the past.

Examiner Burchmore: What is the weight of the rail?

Mr. Cooper: We have some 35 pound steel and some 56 pound steel.

Examiner Burchmore: Is your line well built?

Mr. Cooper: There is practically 14 or 15 miles of our line that is put up with a good dump and that dump sand ballasted.

Examiner Burchmore: Well built?

Mr. Cooper: Well built, yes, sir.

Examiner Burchmore: And the rest of your line?

Mr. Cooper: Some of the western line is not, as it is more or less temporary.

Examiner Burchmore: Have you any station buildings?

3016 Mr. Cooper: We have a station building at the river landing where we receive freight from the boat connection.

Examiner Burchmore: You interchange freight with steamboat?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Do you handle in that way traffic which has come up and down the river?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Do you get any traffic from Memphis or New Orleans, for example?

Mr. Cooper: We do from Memphis and St. Louis principally.

Examiner Burchmore: Have you any platforms for freight or warehouses any place other than at the river?

Mr. Cooper: We have, as I say, at the river terminal, a warehouse and platform at Burdette, and sidings at other points for receiving freight.

Examiner Burchmore: But you have not any storehouses elsewhere than at the river and at Burdette for package freight?

Mr. Cooper: We have not.

Examiner Burchmore: How many locomotives have you?

Mr. Cooper: Four.

3017 Examiner Burchmore: You own all those locomotives?

Mr. Cooper: We do.

Examiner Burchmore: You formerly owned five, did you not?

Mr. Cooper: One has been sold during the past year.

Examiner Burchmore: To whom did you sell that?

Mr. Cooper: To some one up in Missouri, someone outside of our line.

Examiner Burchmore: Any passenger cars?

Mr. Cooper: We have not.

Examiner Burchmore: You have nine flat cars?

Mr. Cooper: 19 flat cars.

Examiner Burchmore: How many logging cars?

Mr. Cooper: We own no logging cars at the present time. We did own the logging cars but sold them to the lumber company.

Examiner Burchmore: So that the lumber company now owns all the logging cars?

Mr. Cooper: The lumber company now owns all the logging cars.

Examiner Burchmore: Does the lumber company own any locomotives?

Mr. Cooper: No.

3018 Examiner Burchmore: Has it any other cars?

Mr. Cooper: The lumber company?

Examiner Burchmore: Yes.

Mr. Cooper: No, unless——

Examiner Burchmore: It has a loading crane?

Mr. Cooper: It has loading cars, camp cars, and skidders.

Examiner Burchmore: How long have you had those 19 flat cars?

Mr. Cooper: Most of them were purchased with the road.

Examiner Burchmore: Are those equipped with safety couplers, air brakes, and so forth?

Mr. Cooper: They are equipped with automatic couplers but not with air equipment, as we do not use them in interstate business.

Examiner Burchmore: You have some cars that are used in interstate business?

Mr. Cooper: No; we own no cars that go off our own line.

Examiner Burchmore: I know, but they handle freight which comes from or goes to interstate points?

Mr. Cooper: Well, in the way of — of course, all carload shipments come in on foreign cars.

3019 Examiner Burchmore: Yes, but you have some package stuff which you get from steamboats?

Mr. Cooper: There is package stuff which may be considered interstate business, but it is always handled on one or two cars.

Examiner Burchmore: And those cars are equipped?

Mr. Cooper: Those cars are not, but the locomotive which handles them is equipped.

Examiner Burchmore: I recommend that you ask your attorney to look at the safety appliance laws, and see if you are complying with them, in the event that you are subject to those laws?

Mr. Cooper: All right.

Examiner Burchmore: How many crews are engaged in maintaining the right of way of this road?

Mr. Cooper: It depends on the season. Sometimes one and sometimes two.

Examiner Burchmore: Any station agents?

Mr. Cooper: We have a joint agent at Burdette Junction.

Examiner Burchmore: You haven't any down at the river landing?

Mr. Cooper: No.

3020 Examiner Burchmore: Does your train conductor act as the receiver of freight in connection with the steamboat?

Mr. Cooper: You might consider it in that sense.

Examiner Burchmore: Or do they just leave the freight on the platform?

Mr. Cooper: They leave their freight in the warehouse at that point.

Examiner Burchmore: How many clerks and other employees in the general office of this railroad company?

Mr. Cooper: We practically have no clerks. The joint agent at Burdette attends to most of the business necessary at that point, and I do most of the work on the general office books.

Examiner Burchmore: Do you receive part of your pay from the lumber company?

Mr. Cooper: From the lumber company?

Examiner Burchmore: Yes.

Mr. Cooper: I receive all my pay from the lumber company at present.

Examiner Burchmore: Is anybody paid by the railroad company in the general offices?

3021 Mr. Cooper: None.

Examiner Burchmore: Do any of its officers receive any salaries?

Mr. Cooper: No.

Examiner Burchmore: Do you run any passenger trains?

Mr. Cooper: No.

Examiner Burchmore: Solely freight service?

Mr. Cooper: Solely freight service?

Examiner Burchmore: You carry an occasional passenger on your freight train or engine?

Mr. Cooper: Well, if they want to get on and ride they are not put off, I guess.

Examiner Burchmore: How many trains a day do you run?

Mr. Cooper: When the plants located on our line are operating, we usually have two trains each way a day.

Examiner Burchmore: That is between Burdette Junction and Burdette?

Mr. Cooper: Well, on account of Burdette being in a sense the hub of the system, we operate out one train twice a day to the woods on our western line, and then we have an engine that performs the service between Burdette and Burdette Junction as occasion
3022 requires.

Examiner Burchmore: Then you run down to the river once in awhile?

Mr. Cooper: Yes, sir, when it is necessary.

Examiner Burchmore: Regularly every day?

Mr. Cooper: No, sir.

Examiner Burchmore: Just to meet the steamboats?

Mr. Cooper: To meet the steamboats.

Examiner Burchmore: Do they notify you or do you meet certain steamboats?

Mr. Cooper: Certain steamboats regularly. We know the days they are due.

Examiner Burchmore: You do not carry any express matter, do you?

Mr. Cooper: We do not.

Examiner Burchmore: What is the total volume of your freight tonnage of all descriptions?

Mr. Cooper: This past year it was practically 15,000 tons.

Examiner Burchmore: 15,000 tons of all kinds of freight?

Mr. Cooper: Of all kinds of freight.

Examiner Burchmore: That is a falling off from the preceding year?

3023 Mr. Cooper: It is.

Examiner Burchmore: As I have the figures for the year 1909, ending June 30th, you had 7,834 cars. Is that right?

Mr. Cooper: I think we made a report of that kind to your examiner.

Examiner Burchmore: And your revenue from that traffic was $25,075.13?

Mr. Cooper: Yes.

Examiner Burchmore: What was your revenue this year, do you remember?

Mr. Cooper: About $6,000.

Examiner Burchmore: What is the trouble?

Mr. Cooper: The Three States Lumber Company plant was not in operation for practically the entire period.

Examiner Burchmore: Then for the year 1909 it is substantially accurate to say that 75 per cent of the total tonnage of your railroad was supplied by the Three States Lumber Company?

Mr. Cooper: For the year 1909?

Examiner Burchmore: Yes.

Mr. Cooper: I think so.

3024 Examiner Burchmore: In 1910 the percentage would doubtless be less?

Mr. Cooper: It was about 35 per cent.

Examiner Burchmore: Because of the closing down of your plant?

Mr. Cooper: Yes.

Examiner Burchmore: Do you think the plant will be in operation most of this year?

Mr. Cooper: It is in operation now and I think it will be the entire year.

Examiner Burchmore: Do you originate any particular volume of farm products, for example?

Mr. Cooper: Mostly the greater portion of farm products has been hay this year, although we have considerable farming territory now along our line and with a cotton gin at Burdette we would get quite a lot of cotton tonnage.

Examiner Burchmore: Would you please furnish the Commission a statement of your tonnage for the fiscal year 1909 and from staves for the fiscal year ending June 30th, 1910, in view of the changed conditions?

Mr. Cooper: Yes, sir.

3025 Examiner Burchmore: Showing the total tonnage of the whole road and showing how much was lumber furnished by the Three States Lumber Company, and how much was lumber furnished by other companies, and the volume of logs, if any, moved, and then the volume of other freight, dividing that if you choose, between farm and other products?

Mr. Cooper: I understand the statement you want, and will get it.

Examiner Burchmore: Showing also the revenue figures?

Mr. Cooper: Yes.

Examiner Burchmore: I understand you are also going to give us a map, something similar to the tracing you have here.

Mr. Cooper: Yes, sir.

Examiner Burchmore: Do you have joint through rates in connection with the Frisco?

Mr. Cooper: On lumber.

Examiner Burchmore: To interstate points?

Mr. Cooper: To interstate points.

Examiner Burchmore: Are they the same from stations on your line as from Burdette Junction and other points on the Frisco?

Mr. Cooper: Yes.

3026 Examiner Burchmore: What are your divisions on those rates?

Mr. Cooper: We get two cents on all hardwoods except on cotton wood, on which we get three cents, that is, three cents to points beyond Frisco terminals. If cotton wood is handled within the Frisco System we only get two cents on that.

Examiner Burchmore: But your usual division is two cents?

Mr. Cooper: Yes, sir.

Examiner Burchmore: And three cents on some hardwoods?

Mr. Cooper: Yes, sir.

Examiner Burchmore: To what territory does your lumber go in the main? Give a representative point.

Mr. Cooper: The northern and eastern markets, and some western.

Examiner Burchmore: Does it very largely take, for example, the St. Louis rate?

Mr. Cooper: Most of our tonnage would go by way of Thebes.

Examiner Burchmore: What is the rate to Thebes?

Mr. Cooper: Nine cents.

Examiner Burchmore: And you get two cents?

Mr. Cooper: And we get two cents.

3027 Examiner Burchmore: And what haul do you have for the two cents?

Mr. Cooper: We make a mile and a half.

Examiner Burchmore: A mile and a half haul on the lumber for two cents, and then the Frisco receives how much, seven cents, for what distance?

Mr. Cooper: I should judge it is about 125 miles, I would not be positive about that.

Examiner Burchmore: Mr. Coleman, I observe you have taken some interest in this line of questions with two or three witnesses. This witness testified he hauls the lumber for a distance of one and one half miles for two cents, and the Frisco hauls it from there to Thebes, 125 miles, for the balance of seven cents.

Mr. Cooper: The total rate is nine cents.

Examiner Burchmore: Do you handle any coal?

Mr. Cooper: Inbound we handle some coal.

Examiner Burchmore: To whom is that coal shipped?

Mr. Cooper: To the Three States Lumber Company and the railroad company.

Examiner Burchmore: And they get a division on that rate?

3028 Mr. Cooper: The Frisco puts in a division in May of 15 cents a ton on inbound coal, but during that time I think we handled two carloads of inbound coal, and we were notified just a short time ago that the Frisco had made a rate that cuts us out on that division, although they have not notified us.

Examiner Burchmore: What is your division?

Mr. Cooper: It was 15 cents a ton on inbound coal.

Examiner Burchmore: Do you ship any lumber down the river by steamboat?

Mr. Cooper: We have done so in the past.

Examiner Burchmore: What would you get on this lumber as your earnings?

Mr. Cooper: We would get two cents per 100 pounds from Burdette to Wolverton.

Examiner Burchmore: Who paid that two cents?

Mr. Cooper: The lumber company.

Examiner Burchmore: The steamboat did not allow you any division?

Mr. Cooper: No.

Examiner Burchmore: You are willing to haul the lumber
3029 all the way from Burdette to the landing, a distance of seven miles, for the same rate you get——

Mr. Cooper: Five miles.

Examiner Burchmore: For the same rate you get for hauling lumber over to the Frisco?

Mr. Cooper: We do for the same amount, but I will state here that the service in hauling to the river can be done much cheaper than the service between Burdette and Burdette Junction, because the lumber is loaded on a barge and we can perform that service continuously until that barge is loaded, whereas the service between Burdette and Burdette Junction is intermittent and requires going out possibly after empties without any load to haul on that outward trip and vice versa. We go out with loads and possibly bring empties in.

Examiner Burchmore: But you haul loads down to the river and bring empties back.

Mr. Cooper: But it is done on the one trip. That service may be performed steadily for two weeks or one week in loading a barge, and then possibly there will not be any more service for a month.

Examiner Burchmore: The operation is an economical one.

Mr. Cooper: Yes, sir.

3030 Mr. Coleman: Who performs the transfer on the boats?

Mr. Cooper: The lumber company loads the barges from our cars.

Examiner Burchmore: You perform the service of hauling the logs to the mill?

Mr. Cooper: Yes.

Examiner Burchmore: As a matter of fact your line west of the mill is of very little use except for hauling logs?

Mr. Cooper: No, the old line has developed quite a farm territory.

Examiner Burchmore: You do not haul any logs from that territory?

Mr. Cooper: We were hauling some stave timber from that line for Frisco points.

Examiner Burchmore: You haul the logs to the mill for the lumber company?

Mr. Cooper: Yes, sir.

Examiner Burchmore: What are you paid for that?

Mr. Cooper: Two cents per 100 pounds according to our tariffs.

Examiner Burchmore: Is that two cents in addition to your tariff on lumber out?

3031 Mr. Cooper: It is.

Examiner Burchmore: And that two cents is credited afterwards on the outbound freight?

Mr. Cooper: It is not.

Examiner Burchmore: Then these Frisco rates are not on a milling in transit basis?

Mr. Cooper: No, sir.

Examiner Burchmore: It costs the lumber company two cents

more than the regular Frisco rate to get to market, they have to pay two cents in on the logs and then the full rate out?

Mr. Cooper: Yes, sir.

Examiner Burchmore: You have noticed that some other companies do not pay anything on the logs in and get a milling in transit arrangement.

Mr. Cooper: Yes.

Examiner Burchmore: You have also observed that a great many companies get more than two cents division?

Mr. Cooper: I have.

Examiner Burchmore: But most of those companies pay a higher rate than nine cents, so I suppose you are not hurt to the same extent you would be otherwise?

3032 Mr. Cooper: I do not remember to what point they considered the delivery.

Examiner Burchmore: Well, we had a man yesterday, for example, who got two cents division out of an 11 cent rate to Thebes, and you are paying 9 cents to Thebes.

Mr. Cooper: 9 cents to Thebes.

Examiner Burchmore: Do these logs move into the mill under any billing?

Mr. Cooper: Yes, sir.

Examiner Burchmore: What kind of billing?

Mr. Cooper: The waybills of the Blythville, Burdette & Mississippi River Railroad.

Examiner Burchmore: Are those waybills made up before the car starts to move?

Mr. Cooper: No, they are made out after the car gets to Burdette, as we do not get the information until then.

Examiner Burchmore: When a shipment of lumber is ready to be made to interstate destinations, and the lumber company desires a car to load that on, I suppose this railroad calls on the Frisco for an empty car?

Mr. Cooper: It does.

3033 Examiner Burchmore: And you move that empty car to the mill and it is loaded?

Mr. Cooper: Yes, sir.

Examiner Burchmore: And you move it back to the Frisco?

Mr. Cooper: Yes.

Examiner Burchmore: And the Frisco takes it on?

Mr. Cooper: Yes.

Examiner Burchmore: Where do you get that car to the Frisco on an interchange track?

Mr. Cooper: Yes, sir, there is an interchange track at Burdette Junction.

Examiner Burchmore: What distance do you haul it from the mill before you leave it?

Mr. Cooper: Practically a mile and a half.

Examiner Burchmore: Down to the right of way of the Frisco?

Mr. Cooper: Yes, sir.

Examiner Burchmore: And operate over this joint track?

Mr. Cooper: Yes.

Examiner Burchmore: Does the Frisco set these cars up on the joint track some place?

Mr. Cooper: On the interchange track, which is a siding,
3034 at Burdette Junction.

Examiner Burchmore: Who issues the bills of lading on the outbound movement of lumber?

Mr. Cooper: The Blytheville, Burdette & Mississippi River.

Examiner Burchmore: What man on that road issues the bill of lading?

Mr. Cooper: We have an agent at Burdette who is as well an employee of the lumber company?

Examiner Burchmore: He is not paid by the railroad company as a matter of fact.

Mr. Cooper: Up to the present time the railroad company has not paid him anything because——

Examiner Burchmore: His duties are not very onerous?

Mr. Cooper: No, and the railroad company has had a losing proposition so far, and we have not taken those things up.

Examiner Burchmore: Does he issue a through waybill or transfer billing?

Mr. Cooper: A through waybill is issued by the joint agent at Burdette Junction from Burdette to destination.

Examiner Burchmore: But your conductor does actually have that way bill when he moves a car out to the junction?

Mr. Cooper: No. Our joint agent at Burdette Junction
3035 does that.

Mr. Wilson: Does your Honor mean the waybill or the bill?

Examiner Burchmore: The waybill. At the present time the bill is made at the mill.

Mr. Cooper: The waybill is made at Burdette Junction by the joint agent.

Examiner Burchmore: You file tariffs with the Interstate Commerce Commission?

Mr. Cooper: We do.

Examiner Burchmore: I suppose you endeavor to comply with all laws relating to railroads?

Mr. Cooper: That has been our endeavor, yes.

Examiner Burchmore: Are you able to give the valuation of the road with equipment, or shall we refer to the reports?

Mr. Cooper: I could not state it accurately. The annual reports cover it.

Examiner Burchmore: It covers approximately the same as you have given, that is the $140,000 capital stock and bonds you have stated?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Have you kept up the interest on the bonds?

3036 Mr. Cooper: No, we have set aside and charged it out of our annual earnings.

Examiner Burchmore: Have you got the money to pay it?

Mr. Cooper: No.

Examiner Burchmore: Is the road conducted at a loss?

Mr. Cooper: The road is conducted at a loss.

Examiner Burchmore: Never has paid any dividends?

Mr. Cooper: Never has made any dividends.

Examiner Burchmore: Have you accumulated any deficit?

Mr. Cooper: We have.

Examiner Burchmore: How much is that deficit?

Mr. Cooper: $29,255.67.

Examiner Burchmore: That deficit includes the interest on your bonds?

Mr. Cooper: It does.

Examiner Burchmore: That is, it assumes they are paid, you have charged them off?

Mr. Cooper: Yes, sir, we have charged it off as paid.

Examiner Burchmore: Is it not a fact that for the fiscal year 1909 you made a net revenue of $3,104.44?

Mr. Cooper: Yes, sir, that was not considering taxes and interest on bonds. I think you will find your report states that.

3037 Examiner Burchmore: Yes.

Mr. Wilson: You spoke of your total capitalization. Your total capitalization is $140,000 stock.

Mr. Cooper: Outstanding.

Mr. Wilson: There is $100,000 in bonds?

Mr. Cooper: Yes.

Mr. Wilson: You spoke of some staves that you transported in conjunction with the Frisco. From whom did you obtain those staves?

Mr. Cooper: We have done considerable business the last three years on stave lumber purchased by the Luxora Cooperage Company at Luxora, Arkansas, on the Frisco Railroad. Also by the National Handle Company and Ollipeter & Jontz at Blythville, Arkansas. This timber has all been purchased from other parties along our railroad, and transported by us to Burdette Junction and then handled by the Frisco to those two towns named.

Mr. Wilson: Do you charge the Three States Lumber Company demurrage on the cars?

Mr. Cooper: We do.

Mr. Wilson: How do you pay for your cars?

Mr. Cooper: We pay per diem charge.

3038 Mr. Wilson: And that means, as I understand it, that you pay for the cars so much a day and if the Three States Company keeps them over 48 hours they pay the usual demurrage.

Mr. Cooper: They pay the usual demurrage. They pay $1.00 a day, and we pay at the present time 35 cents per day as soon as the car is delivered to the interchange track.

Mr. Wilson: Is the territory through which your line goes developing, or is it stationary?

Mr. Cooper: It is developing very rapidly.

Mr. Wilson: In what way?

Mr. Cooper: I will say in this connection that this proposition is located in the St. Francis Valley, which includes some of the richest

agricultural territory in the United States, and we have no trouble and none of the lumber companies have any trouble in selling their cut-over lands as rapidly as they put them on the market. The Illinois farmers and the Missouri farmers are buying up this land continually and moving down there and putting it into cultivation.

Mr. Cowan: At what price?

Mr. Cooper: Of the cut-over land?

Mr. Cowan: Yes.

3039 Mr. Cooper: The last we sold we got $15.00 per acre for it.

Mr. Wilson: Does the Three States Lumber Company own all the adjoining land to the railroad?

Mr. Cooper: No.

Mr. Wilson: What percentage should you say they own?

Mr. Cooper: I should say of actual timber lands about 60 per cent, but lands in general, we do not own over 30 or 40 per cent of the lands along our line.

Mr. Wilson: You have a copy of the charter from the State of Arkansas with you?

Mr. Cooper: I have.

Mr. Wilson: And the report of organization?

Mr. Cooper: Yes.

Examiner Burchmore: It will not be necessary to file that. He says it was incorporated under the laws of the state of Arkansas.

Mr. Wilson: Are you recognized as a common carrier in Arkansas?

Mr. Cooper: Yes, sir.

Mr. Wilson: And taxed as a common carrier?

Mr. Cooper: Yes, they taxed us as such.

3040 Mr. Wilson: You hold yourself out as a common carrier?

Mr. Cooper: Yes.

Mr. Wilson: And you are ready to receive business as such?

Mr. Cooper: We do. In fact we are plugging for business, as they say.

Mr. Andrews: Did you state the percentage of your tonnage in giving your business of last year produced by the Three States Lumber Company? If so, I did not hear it.

Mr. Cooper: I said the business of the Three States Lumber Company for the year ending June 30th, 1910, was about 35 per cent of the business handled.

Mr. Andrews: Of your total business?

Mr. Cooper: Of our total business.

Mr. Andrews: And the other is composed most largely of what?

Mr. Cooper: You might say staves and handle stock, raw material.

Mr. Andrews: And that comes from the land you have stated of the Three States Lumber Company?

Mr. Cooper: No, a great deal of it comes from the lands of other parties along our road.

Mr. Andrews: What per cent?

3041 Mr. Cooper: All our handle lumber goes to the Barrette Cooperage Company which is located on our line.

Mr. Andrews: You misunderstood me. The raw material, I understood you to say earlier in your examination, for the staves and handles and things comes from the land of the Three States Lumber Company which are sold by the Three States Lumber Company to the purchaser. You did not say that?

Mr. Cooper: No, only so far as the Bemis Cooperage Company is concerned. They get all our handle timber.

Mr. Andrews: What percentage of it comes from the Three States Lumber Company's land?

Mr. Cooper: Of this raw material for handles and staves?

Mr. Andrews: Yes.

Mr. Cooper: Possibly 50 per cent; it will vary in different years, I should judge.

Mr. Andrews: Now you stated that when the railroad was organized that it issued $140,000 of stock and $100,000 of bonds which were taken over by the lumber company for the purchase price of the railroad?

Mr. Cooper: Yes, sir.

Mr. Andrews: And that subsequently $40,000 of this stock had been disposed of, but you did not state to whom it had been disposed, or more properly, who at present owns it.

3042

Mr. Cooper: I stated at that time that it had been disposed of to individuals, but the money was advanced by the Three States Lumber Company, and the stock was held in trust by them.

Mr. Andrews: So the Three States Lumber Company still holds all the stock?

Mr. Cooper: Practically all the stock.

Examiner Burchmore: It is the beneficiary of a trust.

Mr. Andrews: Well, I did not get that at all. And this subsequent issue of $40,000 has not been put out, or has it been taken?

Examiner Burchmore: That is included in the present trust.

Mr. Andrews: That is under the same arrangement?

Mr. Cooper: You would not call it under the same arrangement. The other stock was held——

Examiner Burchmore: In order to comply with the Arkansas law he said there had to be a certain percentage of individual stockholders.

Mr. Cooper: Residents of Arkansas.

Examiner Burchmore: It is really held in trust.

Mr. Cooper: It really is, yes, sir.

3043

Mr. Andrews: You stated it was easier to carry the lumber five miles and load it on the barge than it was to deliver it to the railroad company. As a matter of fact your deliveries to the railroad company consist of switching from the mill point a distance of a mile and a quarter or a mile and a half to the interchange track of the railroad company the cars that have already been loaded by the lumber company, does it not?

Mr. Cooper: I would not call it a switch. I would call it a haul.

Mr. Andrews: Well, name it as you prefer, but that is what the service is, is it not?

Mr. Cooper: The——

1235

Mr. Andrews: The lumber company loads the cars?
Mr. Cooper: Naturally, yes.
Mr. Andrews: And your railroad company then hauls that to the connecting railroad.
Mr. Cooper: It first goes and gets the empty car and sets it for the lumber company and then takes the load back when the car is loaded.
Mr. Andrews: As a matter of fact generally is it not—it brings the empty back, and vice versa, does it not?
3044 Mr. Cooper: No, I stated awhile ago that was not so much the case in operation——
Examiner Burchmore: I rather think he covered it rather fully, but it is hard to carry these things. When you come to read the record I think you will find it is described fully.
Mr. Andrews: Well, where do you get the cars you haul to the barges?
Mr. Cooper: The railroad company owns them.
Mr. Andrews: What kind of cars, flat cars?
Mr. Cooper: Flat cars.
Mr. Andrews: The lumber company loads the flat cars?
Mr. Cooper: They do.
Mr. Andrews: And the railroad company takes them to the barge and unloads them?
Mr. Cooper: The lumber company.
Mr. Wilson: Do you mean there is $140,000 of stock outstanding——
Mr. Cooper: $140,000.
Mr. Wilson: All together?
Mr. Cooper: Altogether.
Mr. Wilson: The original issue was $100,000 and it was
3045 subsequently increased by $40,000?
Mr. Cooper: Yes.
Examiner Burchmore: That is all stated in the annual report and I think it has been checked up.
Mr. Wilson: Did you mean to convey the impression that there was $40,000 of stock which was issued to qualify directors?
Mr. Cooper: No, not altogether.
Mr. Coleman: You say you work pretty energetically for business in Arkansas?
Mr. Cooper: We do.
Mr. Coleman: With a good deal of success?
Mr. Cooper: It is developing all the time, yes, sir.
Mr. Coleman: Do you have through rates from points on your line or between points on your line and points on the Frisco and other lines in Arkansas?
Mr. Cooper: In Arkansas?
Mr. Coleman: Yes.
Mr. Cooper: We have no case where the Frisco has made a through rate from points on our line to Luxora, Ark.
Mr. Coleman: Does the same apply as from the junction?

Mr. Cooper: No, I should think not. They have made a
3046 combined rate of two and one-half cents per 100 pounds, of which we get one and one quarter cents and they get one and one quarter cents and the haul is about the same for each road.

Mr. Coleman: What is that on?

Mr. Cooper: That is on stave bolts.

Mr. Coleman: Then there are some instances where you get less than two cents for hauling?

Mr. Cooper: Yes, sir, in that instance there is.

Mr. Coleman: Do you handle any lumber business from your line to distant points in Arkansas or any other forest products?

Mr. Cooper: We handle staves and headings from our line to interstate points and also scythe handles.

Mr. Coleman: No, to Arkansas points, points within the state, intrastate.

Mr. Cooper: Of the manufactured product?

Mr. Coleman: Yes.

Mr. Cooper: I do not believe we have any such movement. It is possible though.

Mr. Coleman: You have no divisions on merchandise be-
3047 tween points on your line and other points in Arkansas?

Mr. Cooper: We have not. Our divisions are covered by the term lumber and forest products.

Mr. Coleman: Then on Arkansas State traffic you receive no divisions except as you may add to the rate applying from the junction with the Frisco, with the exception of this through rate from the belts where you get one and one quarter cents.

Mr. Cooper: In carloads of lumber I think we would get a division of that shipped to some point on the Frisco system; I think our division would cover that.

Mr. Coleman: Where is this business which you say you are successful in securing, this intrastate business?

Mr. Cooper: Principally the raw material for the handle companies and stave mills at Osceola and Luxora and Blytheville, Arkansas.

Mr. Coleman: Then the rate is made up on the sums of the locals?

Mr. Cooper: Except in the one case mentioned it is made up of the sums of the locals.

Mr. Coleman: How do you account for it that the shippers on your line are willing to pay relatively a higher rate or
3049 be subjected to the local rate to the junction with the Frisco on intrastate business and yet on interstate business you have the same rates.

Mr. Cooper: It is because they have no other alternative. We cannot get a division on that, and have not been able to get a division on that raw product, and they buy up this timber on our line and pay the combination of rates to get it out.

Mr. Coleman: You spoke about the land on your line, the cut-over land, selling for $15.00 an acre.

Mr. Cooper: Yes, sir.

Mr. Coleman: Is that hardwood lands?

Mr. Cooper: That is hardwood lands.

Mr. Coleman: Is all the land on your line hardwood land?

Mr. Cooper: It is.

Mr. Coleman: I did not understand what you said as to the extent of the holdings of the lumber company.

Mr. Cooper: I said possibly 60 per cent of the timber lands adjacent to our line, that is virgin timber lands, were owned by the lumber company, but when you took into consideration all the land, farming, cut-over and timber lands, we did not own over 30 or 40 per cent of the adjacent land.

3049 Mr. Coleman: Well, what do the holdings aggregate in acreage that are owned by your company?

Mr. Cooper: About 16,000 acres.

Mr. Coleman: What is that hardwood stumpage estimated as worth now?

Mr. Cooper: The hardwood stumpage? I do not know.

Mr. Coleman: Take your hickory.

Mr. Cooper: Is that competent in this matter?

Examiner Burchmore: I did not understand the question.

Mr. Coleman: I asked him what his hardwood stumpage was worth.

Mr. Wilson: That is going into the value of the hardwood stumpage on the Three States Lumber Company's lands.

Examiner Burchmore: Do you object to that?

Mr. Cooper: Yes, sir, I am here as a witness for the Blythesville, Burdette & Mississippi River Railway Company.

Mr. Coleman: What is it generally worth, not on that land, but as a general proposition.

Mr. Cowan: I think we are entitled to that.

Mr. Coleman: As I understand the situation of this road it was operated for quite a time as an unincorporated road and received no divisions, and as seems apparent, for the purpose of the

3050 general property. It seems to me in order to determine the merits of the investment, in view of that fact, that the question of the value of the land at the time they took it, the stumpage, and what they can sell the cut-over lands for now, would figure into the merits of the operation.

Examiner Burchmore: Have you any objection to giving the figures? Would it not suffice if he gives the figures of the general value at that time?

Mr. Coleman: Yes.

Examiner Burchmore: What was the general value in that territory, not what you paid.

Mr. Cowan: Not that particular land, the general proposition.

Examiner Burchmore: What was the general market price of land in that vicinity?

Mr. Cooper: The lands or did you say timber?

Mr. Coleman: Well, I asked for the stumpage. You told us what the cut-over lands were selling for, $15.00, and I asked you what stumpage is figured on now as being worth.

Mr. Wilson: I understand the question as to the value of the

holdings of the Three States Lumber Company, but they are
3051 asking what the value of the stumpage in that vicinity is worth, and I do not object to that.

Mr. Cooper: The value of the timber on the stumpage, $3.00 to $5.00 per thousand.

Mr. Coleman: What was it worth at the time it was purchased?

Mr. Andrews: I do not know that I have any right to interrupt, but certainly we have no right to inquire into the fortunate or unfortunate operation——

Examiner Burchmore: Do you object, Mr. Cooper?

Mr. Cooper: I object, unless it is necessary in this case.

Examiner Burchmore: What is it worth now?

Mr. Cooper: Well, will the answer to this question have any bearing on this railroad case?

Examiner Burchmore: I do not know. I do not think so, but perhaps Mr. Coleman sees a value that we do not see.

Mr. Cowan: I agree with Mr. Andrews about it. I just tried to qualify Mr. Coleman's statement when he asked about what this man's lumber was worth. I do not think he has a right to inquire.

Mr. Cooper: When he does that he gets at the value of our stumpage.

3052 Examiner Burchmore: Will you frame your question the way you want it?

Mr. Coleman: I am willing to withdraw the question if Mr. Andrews does not think it has any bearing. The only purpose I had was to determine whether this investment was originally made with the expectation of a profit and without any ultimate intention of incorporating a railroad in order to operate the property.

Mr. Cowan: That question would be all right.

Examiner Burchmore: Yes.

Mr. Cooper: I can answer that question.

Mr. Cowan: That is different.

Mr. Cooper: I would say at the time the lumber company went in there they constructed simply a tram line and did not, I suppose, have in view at that time the incorporation of the railroad, because there was absolutely no development in there. The Frisco Railroad had not been built through there when we went in there. It was one vast forest. But since that period the St. Francis Valley has gone forward faster than any other section of the country almost in an agricultural line and the possibilities of that country and of a railroad through that country were so evident to our peo-
3053 ple that they took the tram road as a nucleus and from that are building a railroad. We have no occasion at the present time to go to Blytheville with this railroad, but we are doing it as a railroad possibility. At Blytheville we get a connection with the Cotton Belt Railroad, and in that way it gives the patrons of the Blytheville, Burdette & Mississippi River Railway two connections and it also gives to the factories at Blytheville a chance to come down on to our line and buy and handle timber and stave timber and transport it over one road to Blytheville instead of paying our rate

and the Frisco rate. And we have here which we wish to file a petition from the citizens of Blytheville.

Examiner Burchmore: Expressing their hope that this road will be continued?

Mr. Cooper: Expressing their hope that this road will be recognized by the Commission as being continued to Blytheville. In the event the divisions are taken off, there will not be the incentive to build to Blytheville that there is now.

Examiner Burchmore: I do not quite get that. You do not want any division on lumber for Blytheville, do you?

Mr. Cooper: We will possibly get divisions on the Cotton Belt if we ship that way.

3054 Examiner Burchmore: Better divisions than you have now?

Mr. Cooper: No, we have not hoped for better divisions, but we will get as good I suppose.

Examiner Burchmore: Do you anticipate better divisions when you connect up with the Cotton Belt?

Mr. Cooper: No, that was considered, but the incentive was to get two roads.

(The paper so offered and identified, was received in evidence and thereupon marked Blytheville, Burdette & Mississippi River Exhibit No. 1, Witness Cooper, December 17th, 1910, and is attached hereto.)

Mr. Coleman: You testified your road was being operated at a loss, if I understood you correctly.

Mr. Cooper: It is so far.

Mr. Coleman: Well, at as great a loss as before you incorporated it in 1906?

Mr. Cooper: I don't understand how we can make a comparison before it was incorporated.

Mr. Coleman: I understood you to say you had not made any extensions until recently. Now take it up to the time you had made extensions, since 1906, with before 1906, when you got no divisions.

3055 Mr. Cooper: We were not operating a railroad before 1906; we were operating a tram line and the expenses of that went into the general operation, and I could not give you a comparison.

Mr. Coleman: You do not claim, though, that for the money invested that you have not realized more from transportation on that railroad since 1906 net, than you did prior to 1906?

Mr. Cooper: I don't understand the question.

(Question read.)

Mr. Cooper: Prior to 1906 we were not a railroad and were not incorporated, and were simply handling the lumber company's business at what it cost us and operating as economically as we could a tram line, but since that time we have conformed with the Arkansas State Law and the Federal Laws, and it has been expensive to

a great extent, and we have improved the road, and as I said before, almost completed our extension to Blytheville.

Mr. Coleman: That is all.

Examiner Burchmore: Have you any contract with the Frisco System relating to the division of rates, the freight rates themselves?

Mr. Cooper: You would not call it a contract. The offi-
3056 cials of our road and the officials of the Frisco met and agreed on these divisions and the Frisco simply wrote us a letter confirming that.

Examiner Burchmore: It does not bind either party for a term of years?

Mr. Cooper: No, it can be terminated on 30 days' notice, the letter states.

Examiner Burchmore: That is all.

(Witness excused.)

3057 *Wilson Northern Railway Company.*

M. J. BLACKWELL was called as a witness and having been duly sworn testified as follows:

Mr. Charles T. Coleman: I wish to state that there is a complaint in this case in which all the facts are set out in great particularity, and for the purpose of shortening this hearing we admit that there is a community of interest growing out of the fact that all of the stock of Lee, Wilson & Company, a corporation, and all of the stock of the Wilson Northern Railway is owned by the same parties and that is all set out in this complaint and it will save questioning on that at all. We admit that of record, that the stockholders are the same in each except the qualifying shares, as to which we make no contention.

Examiner Burchmore: Are there any special facts you desire to bring out at this hearing?

Charles T. Coleman: None except the first seven paragraphs of this complaint. I want the witness to say they are correct.

Mr. Blackwell: Yes, sir.

Examiner Burchmore: The organization and history are said to be fully set forth in paragraphs 1 to 7 in the amended
3058 complaint filed with the Commissioner as part of this record. You have read that complaint?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Do you believe that the facts as set out in those seven paragraphs are correctly stated?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: As I understand it is admitted there is a community of interest, as explained by your attorney?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: The officers in the two companies are in the main the same?

Mr. Blackwell: Well, yes, sir, they are the same with the exception of the Superintendent and Auditor of the Railway company.

Examiner Burchmore: He is not an officer of the lumber company?

Mr. Blackwell: No, the superintendent and auditor are two different people.

Examiner Burchmore: They are not officers of the lumber company?

Mr. Blackwell: They are not officers of the lumber com-
3059 pany.

Examiner Burchmore: Their entire salaries are paid by the railway company?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Are there any other officers of the railway company who receive salaries from the lumber company?

Mr. Blackwell: The President.

Examiner Burchmore: What is his salary from the railroad?

Mr. Blackwell: $2400 a year.

Examiner Burchmore: What is the salary of the Vice-President?

Mr. Blackwell: No, he does not receive any.

Examiner Burchmore: Are there any other officers who receive a salary from the Railroad?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: The Secretary and Treasurer?

Mr. Blackwell: He receives $400.

Examiner Burchmore: Is not $2400 quite a salary for the president of this road?

Mr. Blackwell: I think not.

Examiner Burchmore: He is also president of the Lumber Company?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: He is an active officer of this rail-
3060 road?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Now, this railroad company as I understand it has a contract with the St. Louis and San Francisco with which it connects?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: The contract entered into in 1908 provides, does it not, for the maintenance of trackage relations between the two companies, particularly with relation to lumber, or what is the purpose of that contract?

Mr. Blackwell: What is the date of that?

Examiner Burchmore: Have you more than one contract?

Mr. Blackwell: We have two, one for the operation of trains and——

Examiner Burchmore: This contract is dated the 8th day of August, 1908.

Mr. Blackwell: That contract is a trackage contract.

Examiner Burchmore: Is that contract still in effect?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: What does it cover?

Mr. Blackwell: Operations of the Wilson Northern trains over the Deckerville branch of the Frisco.

Examiner Burchmore: The line of this railway connects
3061 with the Frisco line which runs from Memphis to St. Louis and it is what is known as Wilson?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Extending from there is a generally northern direction for how many miles?

Mr. Blackwell: The Deckerville branch?

Examiner Burchmore: No.

Mr. Blackwell: The Wilson Northern ten miles.

Examiner Burchmore: Ten miles in a northerly direction?

Mr Blackwell: Yes, sir.

Examiner Burchmore: Is there any other line that you own at the present time?

Mr. Blackwell: No.

Examiner Burchmore: I thought it was building an extension up towards the Jonesboro, Lake City & Eastern.

Mr. Blackwell: We have contemplated one.

Examiner Burchmore: It has been built?

Mr. Blackwell: It has been built and is now in operation.

Examiner Burchmore: What is the length of that extension?

Mr. Blackwell: Seven and a half miles.

Examiner Burchmore: Where do you connect with the Jonesboro, Lake City & Eastern?

Mr. Blackwell: At Ross, Arkansas.

3062 Examiner Burchmore: That line is at present owned by the lumber company?

Mr. Blackwell: Owned by Moore & McFerren.

Examiner Burchmore: Who are they?

Mr. Blackwell: Lumber people at Ross.

Examiner Burchmore: They do not receive any allowances?

Mr. Blackwell: No.

Examiner Burchmore: And they move only logs over that line?

Mr. Blackwell: Only logs, yes sir.

Examiner Burchmore: Do you move any freight over that line?

Mr. Blackwell: Yes.

Examiner Burchmore: What are you moving over that line?

Mr. Blackwell: Lumber.

Examiner Burchmore: Where from?

Mr. Blackwell: From Ross to Wilson.

Examiner Burchmore: You move some of their lumber?

Mr. Blackwell: We move some of their lumber now.

Examiner Burchmore: You get divisions on that?

Mr. Blackwell: Yes sir.

Examiner Burchmore: Do those divisions inure to the benefit of Moore & McFerren?

Mr. Blackwell: No.

3063 Examiner Burchmore: They inure to the benefit of the Wilson Northern?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: You have a contract with whom?
Mr. Blackwell: Moore & McFerren.
Examiner Burchmore: What is the purport of that contract.
Mr. Blackwell: I am not familiar with the exact divisions of the contract. All I know is that we were to build the road from Ross to Keiser.
Examiner Burchmore: And there connect with that company?
Mr. Blackwell: And there connect with that company.
Examiner Burchmore: And you are logging by that road?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: Will you file a copy of that contract as part of this record?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: It will be understood such a contract will be filed?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: Does that contract cover the present operation of the road as well as its future purchase, or don't you know?
Mr. Blackwell: No, I do not.
3064 Examiner Burchmore: Where is the mill of this Lee Wilson Company?
Mr. Blackwell: Located on the spur track of the Frisco Railroad.
Examiner Burchmore: As a matter of fact your lumber can move out over this spur track to the Frisco system without touching the rails of the Wilson Northern?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: And as a matter of fact it does move in that way?
Mr. Blackwell: The Wilson Northern handles the lumber.
Examiner Burchmore: Over that spur track?
Mr. Blackwell: Over that spur track.
Examiner Burchmore: You participate in joint through rates on inter-state shipments of lumber?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: Do you haul the lumber from the mill to the Frisco?
Mr Blackwell: Yes, sir.
Examiner Burchmore: What do you receive for that service?
Mr. Blackwell: Two and three cents.
Examiner Burchmore: What are the rates out of which
3065 you receive two and three cents are they the same as the Frisco rates?
Mr Blackwell: The same as at the junction point, yes, sir.
Examiner Burchmore: What is your rate to Memphis?
Mr. Blackwell: Six cents.
Examiner Burchmore: What is your division?
Mr Blackwell: Two cents.
Examiner Burchmore: You get two cents out of a six cent rate to Memphis?

Mr. Blackwell: Yes, sir.
Examiner Burchmore: You have a great deal of traffic going to Memphis, I presume?
Mr. Blackwell: Some traffic.
Examiner Burchmore: You also receive that same division and the same rate applies from the lumber that goes down from the Jonesboro, Lake City & Eastern?
Mr. Blackwell: We receive two and a half cents division on all lumber from Ross.
Examiner Burchmore: I thought you did not operate the line up to Ross?
Mr. Blackwell: Yes sir, I stated that first, that we did.
3066 Examiner Burchmore: It is operated as part of your railroad?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: You have stations on that line?
Mr. Blackwell: At Ross.
Examiner Burchmore: But the line is actually owned by this other company?
Mr. Blackwell: Yes, sir, they are under contract to build it for the Wilson Northern.
Examiner Burchmore: It is simply a matter of ownership, you are actually operating it?
Mr. Blackwell: We are actually operating it, yes, sir.
Examiner Burchmore: Does any of your lumber move northward to the Jonesboro, Lake City & Eastern?
Mr. Blackwell: No.
Examiner Burchmore: The whole movement is southward, of this lumber?
Mr. Blackwell: Yes, sir.
Examiner Burchmore: Do you get any allowance on the extension for your mill?
Mr. Blackwell: No.
Examiner Burchmore: But you do get logs on that extension which you handle up to Ross for this other company?
3067 Mr. Blackwell: We do not handle them?
Examiner Burchmore: Who does handle them?
Mr. Blackwell: They are not in operation yet.
Examiner Burchmore: When it was in operation you handled their logs?
Mr. Blackwell: The road was not in operation at that time.
Examiner Burchmore: Is that Ross mill going to be in operation?
Mr. Blackwell: I think so.
Examiner Burchmore: Then you will handle logs for it?
Mr. Blackwell: After they deliver them on the main line to us.
Examiner Burchmore: They have some spurs?
Mr. Blackwell: The understanding is they are going to construct their own spurs.
Examiner Burchmore: They are not constructing those spurs?
Mr. Blackwell: Not now, no sir.

Examiner Burchmore: Are there any private spur tracks connecting with your line?

Mr. Blackwell: No.

3068 Examiner Burchmore: The Lee Wilson Lumber Company does not have any spur tracks?

Mr. Blackwell: Not at the present time.

Examiner Burchmore: Your rails go right into the forests?

Mr. Blackwell: We have one spur about a mile and a half long.

Examiner Burchmore: On that spur all the logs originate?

Mr. Blackwell: No.

Examiner Burchmore: Where do the logs originate for your mill?

Mr. Blackwell: Some are hauled to the main line and some up to the spur track.

Examiner Burchmore: I mean all the logs there originate on your spur track or on the main line?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: What do you get for hauling the logs to the mill?

Mr. Blackwell: Two cents for a hundred pounds.

Examiner Burchmore: That is in addition to the outbound division?

Mr. Blackwell: Yes, sir.

3069 Examiner Burchmore: The Lumber company pays the railroad two cents per 100 pounds for taking the logs to its mill?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Then the Frisco pays you two cents as a proportion of the joint through rate out?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Who issues bills of lading on the lumber *lumber* that is pulled out?

Mr. Blackwell: The Wilson Northern Company.

Examiner Burchmore: You have an agent who issues them?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Does he issue waybills?

Mr. Blackwell: Through waybill, yes sir.

Examiner Burchmore: That is used by your conductor and handed over to the other railroad?

Mr. Blackwell: Handed over to the other railroad and inter-line settlements are made.

Mr. Cowan: What sort of lumber is it, pine?

Mr. Blackwell: No, we have no pine; it is all hard wood.

Examiner Burchmore: What is your rate?

Mr. Blackwell: Nine cents.

Examiner Burchmore: And you get three cents out of that?

Mr. Blackwell: We get two cents I think out of that.

3070 Examiner Burchmore: You are in the same position as this last gentleman who appeared, a nine cent rate received, and a three cent division?

Mr. Blackwell: Yes.

Examiner Burchmore: Would you feel injured if he was getting a three cent division and you only two cents?

Mr. Blackwell: tI would not make any difference to me; that is his business.

Examiner Burchmore: You would not care at all?

Mr. Blackwell: No.

Examiner Burchmore: Would you feel you were getting a little advantage over him if you were getting three cents and he only two?

Mr. Blackwell: It would depend upon the services rendered.

Examiner Burchmore: But it would not enter your mind that it would affect the lumber business at all?

Mr. Blackwell: No.

Examiner Burchmore: On the lumber you move out from the mill of the Lee Wilson Company over to the Frisco your movement is only a fraction of a mile, a few hundred feet?

Mr. Blackwell: About three thousand four hundred and eighty feet.

3071 Examiner Burchmore: And for that service of three thousand four hundred and eighty feet movement of the empty cars and the same movement of the loaded cars you get two and three cents per 100 pounds?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: And the Frisco gets seven cents to Thebes, which is a distance of how many miles?

Mr. Blackwell: I do not know the distance to Thebes.

Examiner Burchmore: One hundred miles?

Mr. Blackwell: I suppose that far, yes sir; and they get four cents to Memphis out of the division.

Examiner Burchmore: The Lee Wilson Company, as a matter of fact, have also another private logging road connecting the Jonesboro, Lake City & Eastern at Armorel, Arkansas?

Mr. Blackwell: The Lee Wilson Company have one, yes sir.

Examiner Burchmore: Have they a sawmill there?

Mr. Blackwell: Yes sir.

Examiner Burchmore: They do not get any allowances up there?

Mr. Blackwell: No.

Examiner Burchmore: Do they contemplate incorporating that road, do you know?

3072 Mr. Blackwell: No, it is simply a plant facility.

Examiner Burchmore: How does it differ from this railroad?

Mr. Blackwell: A great deal. It has no dump; it is simply a log road.

Examiner Burchmore: This railroad is a well built road?

Mr. Blackwell: Well-constructed road.

Examiner Burchmore: Standard gauge?

Mr. Blackwell: Standard gauge.

Examiner Burchmore: It has several locomotives?

Mr. Blackwell: Three.

Examiner Burchmore: A number of freight cars?

Mr. Blackwell: Yes sir.

Examiner Burchmore: Any besides logging cars?

Mr. Blackwell: I will give you a list of the equipment. Three engines, 36 log cars, 15 flat cars, two box cars and one caboose and 40 ballast cars which we just bought.

Examiner Burchmore: Those are used for what purpose?

Mr. Blackwell: To ballast the road. We have just bought them and they are not delivered yet.

Examiner Burchmore: It does not take 40 ballast cars——

Mr. Blackwell: It will take 40 to ballast this road to put
3073 it in proper shape.

Examiner Burchmore: What is the rail on this road?

Mr. Burchmore: 56 and 60 pounds.

Examiner Burchmore: Put in recently?

Mr. Blackwell: Yes sir.

Examine Burchmore: Did you buy it from the Frisco?

Mr. Blackwell: No.

Examiner Burchmore: The lumber company bought it for you?

Mr. Blackwell: They paid for them for us; we borrowed the money to pay for them, yes sir.

Examiner Burchmore: What is the total capital stock?

Mr. Blackwell: $100,000.

Examiner Burchmore: Is that fully set forth in this petition?

Mr. Blackwell: Yes.

Examiner Burchmore: And the bonded indebtedness is set forth?

Mr. Blackwell: None.

Examiner Burchmore: You have not any?

Mr. Blackwell: No.

Examiner Burchmore: Have you any unfunded debt?

Mr. Blackwell: What do you mean by that, liability?

3074 Examiner Burchmore: Have you any current obligations?

Mr. Blackwell: Obligations, yes sir.

Examiner Burchmore: What is the extent of that?

Mr. Blackwell: Well, we have one note of $7,187.80.

Examiner Burchmore: That is recently executed?

Mr. Blackwell: No, sir; it is several years old.

Examiner Burchmore: It was much larger, you have paid part of it off, is that the fact?

Mr. Blackwell: I do not remember as to that exactly.

Examiner Burchmore: What was that note executed for, for advances?

Mr. Blackwell: For rail.

Examiner Burchmore: You are familiar with the character of the traffic of your company?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: What is the total traffic for the last fiscal year, do you remember?

Mr. Blackwell: Yes, sir, I have it here; 85,633 tons.

Examiner Burchmore: That was a substantial increase over the previous year?

Mr. Blackwell: I believe it is; I don't remember.

Examiner Burchmore: How much of that was logs?

3075 Mr. Blackwell: 62,290 tons.

Examiner Burchmore: That was also an increase over the previous year?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: How much of that was lumber?

Mr. Blackwell: 19,490 tons.

Examiner Burchmore: That seems to be a proportionate increase, if these figures I have are correct, for the previous year. How much miscellaneous freight?

Mr. Blackwell: 4,253 tons.

Examiner Burchmore: How much of that traffic was supplied by the Lee Wilson Lumber Company?

Mr. Blackwell: 7,218 tons.

Examiner Burchmore: Out of how much?

Mr. Blackwell: 85,633 tons.

Examiner Burchmore: Just about between 85 and 90 per cent?

Mr. Blackwell: tI is about 84 per cent, 84 plus.

Examiner Burchmore: For the previous year it is stated 86.6 of your tonnage was furnished by the Lee Wilson Company. I do not know whether that is accurate, but it is on a report to the Commission.

Mr. Cowan: What is the other tonnage?

3076 Examiner Burchmore: What was the character of the other tonnage you referred to, miscellaneous tonnage?

Mr. Blackwell: It is merchandise.

Examiner Burchmore: And farm products?

Mr. Blackwell: Yes, sir, farm products, cotton.

Mr. Cowan: Lumber and stave bolts?

Examiner Burchmore: Stave bolts?

Mr. Blackwell: No, that is in logs. Stave bolts is in logs.

Examiner Burchmore: Does the lumber company own any commissaries along the line?

Mr. Blackwell: One at Marie and two public stores.

Examiner Burchmore: How much of this miscellaneous tonnage was intended for those stores?

Mr. Blackwell: I do not know.

Examiner Burchmore: Very much of it, about half to them, was it not?

Mr. Blackwell: I expect so, yes sir.

Examiner Burchmore: You will prepare and file with the Commission one of the tonnage statements I have asked for?

Mr. Blackwell: Yes sir.

Examiner Burchmore: If you will, a general statement

3077 will suffice for the record.

Mr. Cowan: Yes, classifying the tonnage, separating it between the lumber company and the other people's tonnage.

Examiner Burchmore: And also give the revenue if you will. I believe you will file a map, you stated?

Mr. Charles T. Coleman: Yes, we have it here now.

Mr. Blackwell: I want to show the tonnage.

Mr. Charles T. Coleman: Here is the tonnage from the end of the last fiscal year down to the present day.

Examiner Burchmore: Make your statement and state it in the record if you wish.

Mr. Blackwell: The total tonnage from June 30th to October 31st, 21047 tons; total lumber tonnage 11,849, total log tonnage 8,329, total merchandise tonnage 869.

Mr. C. T. Coleman: Give the proportion of that furnished by the allied interests.

Mr. Blackwell: The Lee Wilson Company total tonnage 10,566 tons.

Mr. C. T. Coleman: Outside tonnage?

Mr. Blackwell: 10,481 tons.

Examiner Burchmore: This map is a little bit larger than we want and does not show exactly what we want. All we want is just the section of the country through which your road
3078 runs with the terminals and the mills shown.

Mr. Blackwell: I have one at home I have had made since.

Examiner Burchmore: All we want is just this portion in here (indicating).

Mr. Blackwell: I have one drawn on a larger scale and which is a better map.

Examiner Burchmore: Yes, so if you will take this back and show the terminals and mills and all that, that will be sufficient.

Mr. Cowan: I understood you to say that the majority of the tonnage you just read off was for outside tonnage rather than for Lee Wilson & Company?

Mr. Blackwell: No, about 50 per cent for Lee Wilson & Company and 49 per cent outside.

Mr. Cowan: And that outside tonnage, what makes the change from the previous year, what is the occasion for the change?

Mr. Blackwell: It is on account of this new extension that we are operating.

Mr. Cowan: You are hauling what sort of stuff from that extension?

Mr. Blackwell: The Moore & McFerren lumber.

Mr. Cowan: For other people?

3079 Mr. Blackwell: For other people, yes sir.

Mr. Cowan: Lumber and logs for other people?

Mr. Blackwell: Yes sir.

Mr. Cowan: That accounts for it; I just wanted to know why it was.

Examiner Burchmore: Most of it is for this company up at Ross?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Is not that man directly related to your company?

Mr. Blackwell: Not as yet.

Examiner Burchmore: But he will come in?

Mr. Blackwell: I guess he will.

Examiner Burchmore: It looks to me as if this man at Ross was all in with the one family, and if we are wrong about it——

Mr. C. T. Coleman: This extension was built by Moore & McFerren under contract, by which they were to be paid a certain amount?

Mr. Blackwell: Yes.

Mr. C. T. Coleman: It has not yet been incorporated, but it is being operated by the Wilson Northern under a contract to cover the extension. There are no allied interests between him
3080 and the Lee Wilson Company whatever. They are competitors in that lumber business.

Examiner Burchmore: That mill is a competitor?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: You are not trying to buy them out?

Mr. Blackwell: No.

Examiner Burchmore: I mean that is not part of your contract?

Mr. Blackwell: No.

Examiner Burchmore: You are going to buy the railroad, that is all?

Mr. Blackwell: We are going to buy the railroad, but we have no interest in the lumber company whatever and they have not in ours.

Mr. C. T. Coleman: I will have you introduce a sketch of the terminals.

Examiner Burchmore: Perhaps if you will defer that and put that on your map it would be better.

Mr. Blackwell: I have a large map, two inches to each section, which I will send to them.

Mr. C. T. Coleman: The rails of the Wilson Northern do not reach the mills owned by the Lee Wilson Company at all.

Mr. Blackwell: No.

3081 Mr. C. T. Coleman: How far beyond the crossing do the rails of the Wilson Northern extend?

Mr. Blackwell: About 270 feet.

Mr. C. T. Coleman: What is the distance from there to the mill?

Mr. Blackwell: 3,480 feet.

Mr. C. T. Coleman: Who owns the track for that last distance?

Mr. Blackwell: The Frisco railroad.

Mr. C. T. Coleman: And the outbound movement from the mill is entirely over the Frisco track?

Mr. Blackwell: Entirely over the Frisco rails, yes, sir.

Mr. C. T. Coleman: Is there a contract between the Wilson Northern and the Frisco giving them trackage rights in and out from the mills?

Mr. Blackwell: Yes, sir.

Mr. T. C. Coleman: And that you have agreed to file before the Commission?

Mr. Blackwell: Yes, sir.

Mr. Cowan: This road being extended up to this other mill, how do you get your pay for operating that road for their lumber?

Mr. Blackwell: How is that?

3082 Mr. Cowan: The road has been extended and you are operating it?

Mr. Blackwell: Yes, sir.

Mr. Cowan: How do you get your pay for hauling that lumber?

Mr. Blackwell: A division from the Frisco.

Mr. Cowan: And they get the same rate that is charged from that Frisco station?

Mr. Blackwell: No, they do not get the same rate.

Mr. Cowan: Do they have to pay more?

Mr. Blackwell: They have to pay more, one half cent higher.

Mr. Cowan: And you get that too?

Mr. Blackwell: We get that, the Wilson Northern Railway.

Mr. Cowan: If they build a railroad up to their mill they can get within a half cent of what they could get if they were located on the Frisco railroad?

Mr. Blackwell: Yes, sir.

Mr. Cowan: And if you operate it you get whatever division you can from the Frisco?.

Mr. Blackwell: We get two and a half cents.

Mr. Cowan: Is that the only compensation that passes in the matter?

3083 Mr. Blackwell: Yes, sir.

Examiner Burchmore: You are a freight carrier only?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Your charter does not provide for carriage of passengers?

Mr. Blackwell: Yes, sir, it authorizes us to.

Mr. C. T. Coleman: The passenger service is being inaugurated now.

Mr. Blackwell: We will have to carry passengers a week from now and from then *now*.

Examiner Burchmore: It is understood the annual reports filed with the Commission may be referred to freely in case there is any brief or argument. I want to ask one question, that is about a year ago the Commission through its Examiners had an examination made of your road on the ground. Have conditions changed materially since that time?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Has there been any change in conditions other than the new extension?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Then that report would not be applicable to the present situation?

Mr. Blackwell: No, we have widened the dump and re-tied

3084 it from one end to the other and re-surfaced it and have now purchased 40 ballast cars to ballast it from one end to the other.

Mr. C. T. Coleman: You are familiar with the allegations in this printed complaint (handing paper)?

Mr. Blackwell: Yes, sir.

Mr. C. T. Coleman: This contains a very carefully prepared statement of the population and the conditions along the line and may be referred to. Are those allegations true?

Mr. Blackwell: Yes, sir.

Examiner Burchmore: Have you any further statement you wish to make?

Mr. Blackwell: No, only that we expect to—it has been all drawn out as to the land.

Examiner Burchmore: Yes, you expect to develop a traffic from the cultivated land?

Mr. Blackwell: Yes, sir.

(Witness excused.)

3085 *Manila & Southwestern.*

T. S. TAYLOR, sworn and examined.

Mr. Cowan: Would you mind calling the names of the others who you are going to call hereafter?

Examiner Burchmore: I was going to call the Moscow, Camden & San Augustine and the Caro Northern.

Mr. Cowan: I thought Mr. Walter said those have definitely been agreed to be postponed.

Examiner Burchmore: Everything else except those two. I will be ready to hear any others that are ready.

Examiner Gutheim: Where do you live?

Mr. Taylor: Lansford.

Examiner Gutheim: Your occupation is what?

Mr. Taylor: I am manager of the Manila Southwestern Railroad.

Examiner Gutheim: That runs from where?

Mr. Taylor: From Herman on the Frisco to Lansford.

Examiner Gutheim: It runs in a northerly direction or northeasterly direction generally from Herman?

Mr. Taylor: Yes, sir.

Examiner Gutheim: About how near do you get to the Jonesboro, Lake City & Eastern tracks?

3086 Mr. Taylor: About three and a half miles.

Examiner Gutheim: How long is your road?

Mr. Taylor: Five and a half miles.

Examiner Gutheim: That includes main line only?

Mr. Taylor: Main line and spurs.

Examiner Gutheim: The main line is about five miles long?

Mr. Taylor: Yes, sir.

Examiner Gutheim: It is all standard gauge?

Mr. Taylor: Yes, sir.

Examiner Gutheim: About how heavy a rail?

Mr. Taylor: The principal part of the track is 56 pounds and there is something like a quarter of a mile of 45 pound rail.

Examiner Gutheim: What industries have you on the line?

Mr. Taylor: Well, beginning at Herman we have now a cooperage mill.

Examiner Gutheim: And that is operated by whom?
Mr. Taylor: The Mill Shoals Cooperage Company of Mills Shoals.
Examiner Gutheim: Is the cooperage company interested in the railroad?
Mr. Taylor: No.
3087 Examiner Gutheim: How far are they from the Frisco?
Mr. Taylor: Something like 1,000 feet from the Frisco track.
Examiner Gutheim: Does the Frisco serve that mill with its own power?
Mr. Taylor: No.
Examiner Gutheim: Everything has to come over your track?
Mr. Taylor: Yes, sir.
Examiner Gutheim: What else is there on the line going north from Herman?
Mr. Taylor: Half a mile from Herman is a sawmill.
Examiner Gutheim: That is owned by whom?
Mr. Taylor: F. J. Bergman & Company.
Examiner Gutheim: Is that mill operated by Taylor Brothers.
Mr. Taylor: No.
Examiner Gutheim: Do Taylor Brothers operate a mill on that line?
Mr. Taylor: Yes.
Examiner Gutheim: Where?
Mr. Taylor: At Lansford.
Examiner Gutheim: That is the other terminus of the
3088 line?
Mr. Taylor: Yes.
Examiner Gutheim: That mill is operated at the present time?
Mr. Taylor: Yes.
Examiner Gutheim: To what extent are Taylor Brothers interested in the railroad?
Mr. Taylor: They own 49 and a fraction per cent of the stock.
Examiner Gutheim: As a matter of fact did not the so-called Taylor interests purchase the railroad and that mill property as a single proposition?
Mr. Taylor: No, sir.
Examiner Gutheim: Did the Taylor interests build this road?
Mr. Taylor: No, sir.
Examiner Gutheim: By whom was it built?
Mr. Taylor: By a firm or corporation formed by D. A. Smith & Sons and others.
Examiner Gutheim: Did that concern operate this mill you speak of at Lansford?
Mr. Taylor: The Smith concern?
Examiner Gutheim: The concern just mentioned?
3089 Mr. Taylor: No, sir.
Examiner Gutheim: How did the Taylor interests acquire the railroad?
Mr. Taylor: They advanced money to build the railroad and took

a mortgage on the property and at the time of the panic it went to the wall and the property was sold and we bought it in.

Examiner Gutheim: Was any money advanced on any property other than the railroad, as one transaction?

Mr. Taylor: Yes, I believe there was a mortgage on Mr. Smith's property at Manila, Arkansas?

Examiner Gutheim: Where is Manila?

Mr. Taylor: That is over in Mississippi County on the Jonesboro, Lake City & Eastern Railroad.

Examiner Gutheim: Not on this line?

Mr. Taylor: No.

Examiner Gutheim: The mill was acquired by the Taylor people as the result of a foreclosure of the mortgage?

Mr. Taylor: Yes, sir.

Examiner Gutheim: We are to understand that the Taylor interests by that foreclosure obtained absolutely no property except the railroad?

Mr. Taylor: That is all.

3090 Examiner Gutheim: Were the Taylor family interested in any traffic producing operations at or about Lansford prior to the time that mortgage was foreclosed and they took over the railroad?

Mr. Taylor: Yes, sir.

Examiner Gutheim: Were they shipping over the railroad?

Mr. Taylor: Yes sir.

Examiner Gutheim: Did they have any other outlet at all from their property in and about Lansford?

Mr. Taylor: No.

Examiner Gutheim: What is the situation at the present time, are the Taylors just holding the property until they can dispose of it a little more favorably or do they intend to hold on to it indefinitely?

Mr. Taylor: Well we have considered we would hold on to it.

Examiner Gutheim: But you are not operating the mill property at all?

Mr. Taylor: Now?

Examiner Gutheim: Now.

Mr. Taylor: Yes, sir.

Examiner Gutheim: The Taylor family?

Mr. Taylor: Yes, sir.

Examiner Gutheim: And the traffic of the mill is going

3091 out over this line?

Mr. Taylor: Yes, sir.

Examiner Gutheim: That is the stave mill you spoke of?

Mr. Taylor: No, that is a lumber mill at Lansford.

Examiner Gutheim: Do they also conduct something in the line of farming operations at Lansford besides the mill?

Mr. Taylor: Yes, sir.

Examiner Gutheim: And they were also interested in that respect prior to the acquisition of the railroad?

Mr. Taylor: Yes, sir.

Examiner Gutheim: As a matter of fact how much money was advanced by the Taylor family to the former owners of the railroad?

Mr. Taylor: The total amount of money advanced was about $18,000; but after the foreclosure there were other debts that had to be paid which amounted to something like $28,000.

Examiner Gutheim: And the property was taken over for the net amount of the indebtedness to the Taylor people?

Mr. Taylor: Yes, sir.

Examiner Gutheim: Who owns the balance of the stock of the railroad company at the present time?

Mr. Taylor: The four Taylor brothers own it all but a
3092 small per cent.

Examiner Gutheim: So it is all in the Taylor family?

Mr. Taylor: Yes sir, but only two of the Taylor brothers own any interest in the sawmill.

Examiner Gutheim: But the others of the Taylor family are all interested in this farming operation in and about Lansford?

Mr. Taylor: Yes, sir.

Examiner Gutheim: And taking it in that light, the owners of the road are supplying the traffic that is produced by this sawmill and by the farming operations we have mentioned of the Taylor family?

Mr. Taylor: I did not quite catch that question.

(Question read.)

Mr. Taylor: They are producing part of the traffic over the road.

Examiner Gutheim: I mean what they produce, and they do not produce anything else except the farming produce and the sawmill output?

Mr. Taylor: No, sure.

Examiner Gutheim: And what proportion of the total traffic is furnished by them from the standpoint of tonnage and revenue?

3093 Mr. Taylor: In 1909 it stood just 10 per cent.

Examiner Gutheim: How many communities are there on that road?

Mr. Taylor: Well, it is practically a woods.

Examiner Gutheim: And there is nothing to speak of between Herman and Lansford?

Mr. Taylor: No.

Examiner Gutheim: Where does the balance of 90 per cent of the traffic come from?

Mr. Taylor: From the Bergman mill and the result of the shipment of logs from the Wisarkana Lumber Company to their plant at Helkin, Arkansas, and to various other parties shipping to Jonesboro and Bay and Marked Tree.

Examiner Gutheim: All those logging operations are being conducted by parties who are not in any way connected with the Taylors?

Mr. Taylor: Not in the least.

Examiner Gutheim: Is the logging being done on lands owned by the Taylors?

Mr. Taylor: No.

Examiner Gutheim: But the milling, with the exception of the stave mill is all done outside of the line of this railroad?

——. ——.

3094 Examiner Gutheim: The manufacture of the lumber out of these logs, taken out as you have just described, is all outside the line of this railroad?

Mr. Taylor: Yes.

Examiner Gutheim: Are the officers of the railroad at the present time all members of the Taylor family?

Mr. Taylor: No, sir.

Examiner Gutheim: What is the difference?

Mr. Taylor: The superintendent and secretary is not in the family.

Examiner Gutheim: How much equipment have you?

Mr. Taylor: We have an engine and one flat car and a caboose.

Examiner Burchmore: Are the superintendent and the treasurer, are these two different men?

Mr. Taylor: Two different men.

Examiner Burchmore: Paid at all by the lumber company?

Mr. Taylor: No.

Examiner Gutheim: Do you do any passenger business?

Mr Taylor: Yes, sir.

Examiner Gutheim: Do you run trains on regular schedule?

Mr. Taylor: Yes, sir.

3095 Examiner Gutheim: Handle any mail or express?

Mr. Taylor: No.

Examiner Burchmore: Publish a timetable?

Mr. Taylor: Nothing more than typewritten matter stuck up in the office.

Examiner Burchmore: Do you have any through rates from points on your line with divisions accruing to this railroad?

Mr. Taylor: Yes, sir.

Examiner Burchmore: On what do these rates apply?

Mr. Taylor: Lumber; and it did apply on logs.

Examiner Burchmore: Anything on farming products?

Mr. Taylor: Yes, sir; merchandise.

Examiner Burchmore: On any farm products other than cotton and cottonseed?

Mr. Taylor: Nothing more than a joint local rate.

Examiner Burchmore: How much of a division do you get out of the lumber rates?

Mr. Taylor: Two cents.

Examiner Burchmore: And the same on stave rates?

Mr. Taylor: One cent on logs, staves or stave bolts.

Examiner Burchmore: What division do you get on cotton and merchandise?

3096 Mr. Taylor: Fifteen cents on cotton.

Examiner Burchmore: That is fifteen cents a bale?

Mr. Taylor: Fifteen cents per hundred.
Examiner Burchmore: How much on the cotton seed?
Mr. Taylor: Three cents.
Examiner Burchmore: What do you get on classes and commodities generally?
Mr. Taylor: Eight, ten, twelve and fifteen.
Examiner Burchmore: Do you publish any local tariffs?
Mr. Taylor: Yes, sir.
Examiner Burchmore: File them with the Interstate Commerce Commission?
Mr. Taylor: Yes, sir.
Examiner Burchmore: Are you keeping separate books for your railroad accounts?
Mr. Taylor: Yes, sir.
Examiner Burchmore: How long had that been done?
Mr. Taylor: Two years—1908, 1909 and 1910, three years.
Examiner Burchmore: Is the railroad's operation profitable at the present time?
Mr. Taylor: Yes, sir.
Examiner Burchmore: Have you paid any dividends?
Mr. Taylor: No.
3097 Examiner Burchmore: Are you paying any general office salaries?
Mr. Taylor: No, sir.
Examiner Burchmore: You pay the superintendent and secretary?
Mr. Taylor: No, sir; I did not say so.
Examiner Burchmore: Do they serve without compensation?
Mr. Taylor: Yes, sir.
Examiner Burchmore: Who does pay them?
Mr. Taylor: They have but very little service to perform. He is just a figurehead.
Examiner Burchmore: How does he earn his livelihood?
Examiner Gutheim: Are they related to the Taylor family?
Mr. Taylor: Yes, sir.
Examiner Burchmore: I thought you said they were not members of the Taylor family?
Mr. Taylor: The superintendent is not. The superintendent is paid part of his salary by the railroad company.
Examiner Burchmore: And part by the lumber company?
Mr. Taylor: Yes, sir.
Examiner Burchmore: How much does he get from the railroad company?
Mr. Taylor: $20 a month.
3098 Examiner Burchmore: How about the other gentleman, the secretary?
Mr. Taylor: He does not get anything.
Examiner Gutheim: Have you made any annual or monthly reports to the Commission?
Mr. Taylor: Yes, sir.
Examiner Gutheim: When was the first annual report?

Mr. Taylor: I cannot remember. I believe it was the first in 1909.

Examiner Gutheim: Can you tell us or furnish a statement showing the division of tonnage and revenue accurately and also furnish a map to show the general geographical location of the line and arrange to send it to the Commission?

Mr. Taylor: I can.

Examiner Gutheim: Will you do so?

Mr. Taylor: Yes, sir.

Examiner Burchmore: You have heard these requests for statements as to tonnage?

Mr. Taylor: Yes, sir.

Examiner Burchmore: You understand the nature of those statements?

Mr. Taylor: Yes, sir; I have one for 1909.

Examiner Burchmore: What does it show?

3099 Mr. Taylor: It shows the total amount to be one hundred million pounds.

Examiner Burchmore: How much was furnished by the lumber company?

Mr. Taylor: Ten per cent.

Examiner Burchmore: Only ten per cent?

Mr. Taylor: Only 10 per cent from the fact that this was made up from the shipment of logs from a company that received 100 cars a month, which would amount to forty eight million pounds out of a minimum weight of 40,000 pounds per car.

Examiner Burchmore: I do not understand; you say this lumber company only furnishes 10 per cent of the total tonnage of the road.

Mr. Taylor: For 1909, because we were idle.

Examiner Burchmore: How about 1910?

Mr. Taylor: Well, it is more.

Examiner Burchmore: Will you give us the figures for 1910?

Mr. Taylor: Sure.

Examiner Burchmore: Was the mill in operation for the whole of 1910?

Mr. Taylor: Yes, sir.

Examiner Burchmore: I mean the year beginning July 1,

3100 1909 and ending June 30th, 1910.

Mr. Taylor: Was it——

Examiner Burchmore: Was the mill in operation for that entire period?

Mr. Taylor: The mill closed down in 1907 and began operations again in March, 1909.

Examiner Burchmore: Full blast?

Mr. Taylor: Full blast.

Examiner Burchmore: And at work since up to this time?

Mr. Taylor: Yes, sir.

Examiner Burchmore: Will you please give us a tonnage statement for 1910 up to June 30th, 1910?

Mr. Taylor: Yes sir.

Examiner Gutheim: In that statement you will also include the farm products shipped by the Taylor interests?

Mr. Taylor: Yes sir.

Examiner Gutheim: Is your counsel present?

Mr. C. T. Coleman: Gautney was his counsel and had to leave.

Examiner Gutheim: Where are these logs pulled for other people on this road manufactured?

Mr. Taylor: Jonesboro, Nettleton, Bay and Marked Tree.

Mr. C. T. Coleman: Do you move cars supplied by other railroads?

3101 Mr. Taylor: Yes sir.

Mr. C. T. Coleman: Did the Frisco cancel out your rates?

Mr. Taylor: Yes sir.

Mr. C. T. Coleman: Have they been restored under the suspension order?

Mr. Taylor: The lumber rate has been.

Mr. C. T. Coleman: No other divisions have been restored?

Mr. Taylor: No, sir.

Mr. C. T. Coleman: Are you getting any divisions on anything else now?

Mr. Taylor: No, we just put in a local.

Examiner Burchmore: Any other statement you desire to make?

Mr. Taylor: No.

Mr. C. T. Coleman: I will state to the examiner that Mr. Gautney was compelled to go away and he asked me to call your attention to the fact that in his complaint he simply prays for a restoration of through rates and joint rates on these other commodities than lumber. He wants that brought to the attention of the Commission for immediate action.

Examiner Burchmore: How about lumber, he wants them on lumber?

Mr. C. T. Coleman: The division still obtains on lumber,

3102 but he wants the whole matter restored.

Examiner Burchmore: The class rates went out?

Mr. C. T. Coleman: Yes.

Examiner Burchmore: I thought the Commission suspended all those rates.

Mr. C. T. Coleman: It did, but as a matter of fact that suspension order was not obeyed by the Frisco.

Examiner Burchmore: Are you sure on that?

Mr. Taylor: I am quite sure.

Examiner Burchmore: You ought to write to the Commission and tell them that they do not obey the order.

Mr. Taylor: I did not understand we were entitled to it or that they had suspended it.

Examiner Burchmore: I will look into it, but you might write a letter.

Mr. Taylor: I find that we are entitled to commodity rates and classes.

Mr. C. T. Coleman: In that same connection I wish to say the

same is true as to the Wilson Northern. They did not obey the suspension orders.

Examiner Burchmore: I suggest you look into that and see what the situation is.

(Witness excused.)

3103 *Moscow, Camden & San Augustine Railroad.*

W. T. CARTER, called and sworn.

Examiner Burchmore: You are an officer and stockholder in the Moscow, Camden & San Augustine Railway?

Mr. Carter: Yes, sir.

Examiner Burchmore: You are also one of the copartnership of W. T. Carter & Brother?

Mr. Carter: Yes, sir.

Examiner Burchmore: Who are the other members in that copartnership?

Mr. Carter: E. A. Carter and Jack Thomas.

Examiner Burchmore: I understand this copartnership owns substantially the entire capital stock of the Moscow, Camden & San Augustine Railway Company?

Mr. Carter: It owns all but about 50 or 60 shares, 55 or 60 shares.

Examiner Burchmore: What is the total number of shares?

Mr Carter: Let me get that exact. The capital stock authorized is $250,000; the capital stock issued is $50,000. Now of that W. T. Carter, E. A. Carter and Jack Thomas—there are ten stock-
3104 holders, you can count this as well as I can—there are ten stockholders; three of them, W. T. Carter, E. A. Carter and Jack Thomas, then there is one stockholder holds nine shares, another holds one, just qualifying shares, so practically W.T. Carter and Brother hold the stock.

Examiner Burchmore: Are the remaining shares owned by relatives?

Mr. Carter: No sir, except C. L. Carter. C. L. Carter is a brother.

Examiner Burchmore: Then those other shares are held by directors?

Mr. Carter: Yes.

Examiner Burchmore: This copartnership practically controls the corporation.

Mr. Carter: Practically owns and controls the corporation?

Examiner Burchmore: And the officers are substantially the same?

Mr. Carter: The officers are substantially the same.

Examiner Burchmore: Perhaps there are no officers of the copartnership?

Mr. Carter: No.

Examiner Burchmore: But I mean the officers of the railroad are in the copartnership?

3105 Mr. Carter: Yes, sir.

Examiner Burchmore: You connect with the Houston, East & West Texas, at Moscow, Texas, as I understand it?

Mr. Carter: Yes, sir.

Examiner Burchmore: From that point you run in a generally easterly direction?

Mr. Carter: Yes, sir.

Examiner Burchmore: For a distance of about eight or nine miles?

Mr. Carter: About seven miles we call it.

Examiner Burchmore: Then you have side tracks connecting?

Mr. Carter: Yes, sir.

Examiner Burchmore: Then the other end of your line is Camden?

Mr. Carter: Yes, sir.

Examiner Burchmore: Where is San Augustine?

Mr. Carter: San Augustine is about fifty miles east from there.

Examiner Burchmore: You are contemplating an extension to that point?

Mr. Carter: Not now. We started in good faith expecting to extend to that point, but before we got ready to do it the whole
3106 country over there was cut up with railroads and we don't think we can go over there now.

Examiner Burchmore: From Camden there are some private tram lines extending into the woods owned by the co-partnership?

Mr. Carter: Yes, sir.

Examiner Burchmore: What is the extent of those private tram lines?

Mr. Carter: Right now about 12 miles running south.

Examiner Burchmore: That is altogether?

Mr. Carter: Twelve miles in main line not including sidings; that is logging road.

Examiner Burchmore: What is the extent of your timber holding or stumpage rights down in that vicinity?

Mr. Carter: We own about 140,000 acres of land in there. A good deal of it has been cut over. That is beginning at a point 15 miles north of Camden and extending 25 miles south of Camden and 20 miles east of Camden, that is the area our timber is located in. We do not own all of it, but that's the area; our timber is located. We do not own all of it, but that is the area.

3107 Examiner Burchmore: What proportion of that area do you own?

Mr. Carter: I think about one-third.

Examiner Burchmore: Then some of your timber is north of the M. K. & T.?

Mr. Carter: Yes, sir.

Examiner Burchmore: Some of it comes pretty close to the private tram lines of the B., K. & S. What is that?

Mr. Mantooth: The Livingston & Southeastern, that is.

Examiner Burchmore: Do you run as far down as that?

Mr Carter: Yes, sir; our lands do.

Examiner Burchmore: Are the Knox people cutting any of your lands?

Mr. Carter: No.

Examiner Burchmore: Is any of your land being cut over by other people?

Mr. Carter: No.

Examiner Burchmore: You are milling in along the ten or fifteen miles east or southeast of Camden?

Mr. Carter: We are milling now nearly southeast of Camden.

Examiner Burchmore: What proportion of your total holdings has been cut over?

3108 Mr. Carter: I should suppose about 50,000 acres.

Examiner Burchmore: Leaving how much?

Mr. Carter: Leaving perhaps 90,000 that has not been cut.

Examiner Burchmore: At the present rate how long will it take you to cut it out?

Mr. Carter: We are just building a new mill; our mill was destroyed by fire last summer. With the old plant we expected to take 25 years. The new plant we do not know just now, perhaps 20 years.

Examiner Burchmore: You are not cutting at present?

Mr. Carter: No.

Examiner Burchmore: What is your total amount of lumber there in feet?

Mr. Carter: We figured we had about 600,000,000 feet of lumber.

Examiner Burchmore: Then I suppose you are cutting about 25,000,000 feet a year?

Mr. Carter: With the old mill we were cutting about 20,000,000 feet, and we expect to cut 25,000,000 feet or 30,000,000 feet with the new.

Examiner Burchmore: Where was the mill located?

Mr. Carter: At Camden.

3109 Examiner Burchmore: Then the logs did not move over the railroad?

Mr. Carter: No.

Examiner Burchmore: Just the lumber?

Mr. Carter: Just the lumber.

Examiner Burchmore: Where is the new mill?

Mr. Carter: At the same place.

Examiner Burchmore: When was the old mill first put in operation?

Mr. Carter: The old mill began to operate early in 1898.

Examiner Burchmore: When was this railroad first begun?

Mr. Carter: The railroad was chartered in June, 1898, and built during that year.

Examiner Burchmore: So the mill and the road were built about the same time?

Mr. Carter: The mill was in operation before the road was finished. The construction perhaps was going on at the same time.

Examiner Burchmore: You say the road was chartered at that time?

Mr. Carter: Yes, sir.

Examiner Burchmore: As a common carrier?

3110 Mr. Carter: Yes, sir; chartered as a common carrier under the laws and built as a common carrier, and always has been operated as one.

Examiner Burchmore: What is the Texas State Commission's attitude towards your railroad?

Mr. Carter: They have always recognized it from the first time we ever applied for recognition.

Examiner Burchmore: Is not that a little unusual with a new road——

Mr. Carter: That was not very new; that was 12 years ago.

Examiner Burchmore: Did they recognize you 12 years ago?

Mr. Carter: Yes, sir.

Examiner Burchmore: Was their policy the same as it is in more recent years?

Mr. Carter: I do not think so. It has been changed. When our road was ready, we applied to the Railroad Commission for rates, and they made an order establishing the rates from Camden to all points in Texas the same as the rate from Moscow. It was one of the first orders ever made, covering our road, by the Commission of Texas.

Examiner Burchmore: And later on they reversed that?

3111 Mr. Carter: They have never attacked the Moscow, Camden & San Augustine Road.

Examiner Burchmore: I was under the impression from our records that for a time your railroad was not recognized by the State Commission.

Mr. Carter: No, and it was not attacked when they brought the roads up in the State of Texas and cancelled their divisions. The Moscow, Camden & San Augustine was never summoned before them even. The Railroad Commission has always recognized that as a legitimate enterprise and as a common carrier.

Examiner Burchmore: In the event that our record with respect to your road shows otherwise——

Mr. Carter: Well, if it does it will not be right.

Mr. Mantooth: Your records will not show that. At that time they did not make a physical inspection of the roads, and just took if for granted that the road was a common carrier.

Examiner Burchmore: I only speak of that—I have a memorandum that seems to indicate it. I have no doubt you are right.

Mr. Carter: I know I am right, because divisions have never been cancelled, and we have never been before the Commis-

3112 sion except a year or two ago.

Examiner Burchmore: This road was constructed from Camden to Moscow in the beginning?

Mr. Carter: Yes, sir.

Examiner Burchmore: No extension since?

Mr. Carter: No.

Examiner Burchmore: You said the total stock authorized was $250,000?

Mr. Carter: Yes, sir.

Examiner Burchmore: Only $50,000 issued?

Mr. Carter: Yes, sir.

Examiner Burchmore: That, I presume, is explained by the fact that you only built a small fraction of the distance originally contemplated?

Mr. Carter: Yes, sir.

Examiner Burchmore: Did you issue any bonds?

Mr. Carter: No.

Examiner Burchmore: Any indebtedness except current indebtedness?

Mr. Carter: Just a little current indebtedness. Here is a statement as to that.

Examiner Burchmore: I mean nothing that is a standing
3113 obligation.

Mr. Carter: No, nothing that is a standing obligation.

Examiner Burchmore: Do you have any trackage rights over the Houston, East & West Texas?

Mr. Carter: We have no contract; we go over there and switch over their sidings there, putting cars in and taking them out.

Examiner Burchmore: Just the small amount of switching necessary to place cars?

Mr. Carter: Yes, sir.

Examiner Burchmore: Any station buildings?

Mr. Carter: No.

Examiner Burchmore: Do you carry passengers?

Mr. Carter: Yes.

Examiner Burchmore: But there is no waiting room for those passengers on your line?

Mr. Carter: The store houses are right on the line, and they just stay in the store houses.

Examiner Burchmore: Those are warehouses you use for freight?

Mr. Carter: The company store is right on the tracks.

Examiner Burchmore: The lumber company has a
3114 commissary?

Mr. Carter: Yes, sir.

Examiner Burchmore: Have they any commissary except at Camden?

Mr. Carter: No.

Examiner Burchmore: Has the railroad any station agents?

Mr. Carter: Yes, sir.

Examiner Burchmore: At Camden?

Mr. Carter: Yes, sir.

Examiner Burchmore: Elsewhere?

Mr. Carter: The station agent at Moscow is practically a joint agent; we pay him a little salary with the understanding with the Houston, East & West Texas that he performs services for both roads.

Examiner Burchmore: I notice that the Moscow, Camden & San Augustine connects with the Houston, East & West Texas not so very far—maybe 20 miles or so—from the connection with the Beaumont & Great Northern.

Mr. Carter: Yes, sir.

Examiner Burchmore: You are familiar with that railroad?

Mr. Carter: I have been over it a time or two; I am not very familiar with it.

Examiner Burchmore: I am somewhat informed with
3115 respect to that road. How does the construction of your railroad compare with the Beaumont & Great Northern?

Mr. Carter: I think the grades are not so good, and I think the rail is not so heavy.

Examiner Burchmore: On your road?

Mr. Carter: On our road.

Examiner Burchmore: Your road is not quite as heavy construction?

Mr. Carter: No.

Examiner Burchmore: What is your rail?

Mr. Carter: 35 pound.

Examiner Burchmore: Have you substantial bridges?

Mr. Carter: Yes, sir.

Examiner Burchmore: Well built road?

Mr. Carter: Well, yes; we carry cars of 100,000 capacity right along.

Examiner Burchmore: How fast do you run when you have that sized cars?

Mr. Carter: We do not bother about the speed; I suppose they run 20 miles an hour.

Examiner Burchmore: You are not especially cautious, but just go ahead?

3116 Mr. Carter: No, we go ahead with them.

Examiner Burchmore: Any bridges over streams?

Mr. Carter: Yes, sir.

Examiner Burchmore: Steel bridges?

Mr. Carter: No.

Examiner Burchmore: I suppose you file annual reports with the Interstate Commerce Commission?

Mr. Carter: Yes, sir.

Examiner Burchmore: As a matter of fact the characteristics of the road as to bridges, and so forth, I think, are set forth in the annual reports?

Mr. Cowan: All that is in the reports.

Examiner Burchmore: And unless you indicate your desire to go into that phase, I will just touch a little on the details.

Mr. Cowan: Oh, no.

Examiner Burchmore: You have more than one locomotive?

Mr. Carter: We have but one locomotive on that road. We have an order out for another one.

Examiner Burchmore: You have one passenger coach?

Mr. Carter: We have one passenger coach.

Examiner Burchmore: How many freight cars?

Mr. Carter: We have 16 freight cars.

3117 Examiner Burchmore: Are those all regular freight cars?

Mr. Carter: All standard freight cars. We paid $600 apiece.

Examiner Burchmore: Are they all on your own line?

Mr. Carter: Scattered all over the United States.

Examiner Burchmore: Out on general railway service?
Mr. Carter: Yes, sir.
Examiner Burchmore: Have you any confined to your own line?
Mr. Carter: No, sir.
Examiner Burchmore: I presume the W. T. Carter Lumber Company has locomotives of its own for use on its private track?
Mr. Carter: Yes, sir.
Examiner Burchmore: Also has logging cars?
Mr. Carter: Yes, sir.
Examiner Burchmore: It is not necessary to discuss it, because that road is not before us.
Mr. Carter: No connection.
Examiner Burchmore: Do you move logs into the mill as a private matter?
Mr. Carter: Yes, sir.
Examiner Burchmore: You do not consider that as of pub-
3118 lic interest?
Mr. Carter: No.
Examiner Burchmore: Have you ever contemplated taking that private road over as part of the system?
Mr. Carter: We hope that by the time we get through manufacturing lumber we may be able to develop that road south as a common carrier.
Examiner Burchmore: Is that main line of the tram road of a temporary character?
Mr. Carter: It is a pretty good road.
Examiner Burchmore: About as good as the Moscow, Camden & San Augustine?
Mr. Carter: No, it is not as good as the Moscow, Camden & San Augustine.
Examiner Burchmore: It has been moved a little from time to time?
Mr. Carter: We moved it; yes, sir.
Examiner Burchmore: Do you expect to move it in the future?
Mr. Carter: It is possible we will change the main line in the future. We do not know.
Examiner Burchmore: Have you any platforms and scales and things of that kind along your line for handling freight?
3119 Mr. Carter: We have no car scales.
Examiner Burchmore: Any platforms for loading cars?
Mr. Carter: We have a platform for loading cotton at Camden.
Examiner Burchmore: I suppose there are gins there?
Mr. Carter: Gins out in the country, and brought in there; there is no gin at Camden.
Examiner Burchmore: You have road crews that work on the road?
Mr. Carter: Yes, sir.
Examiner Burchmore: And those men do not work for the lumber company?
Mr. Carter: Those men do not work for the lumber company at all.
Examiner Burchmore: You have a station agent at Camden?

Mr. Carter: Yes, sir.

Examiner Burchmore: You have a station agent at Moscow?

Mr. Carter: The agent at Moscow is a joint agent who does the work for both companies, and we pay him a small remuneration.

Examiner Burchmore: You have one train crew?

Mr. Carter: We have one train crew.

3120 Examiner Burchmore: How many employees have you in the general office of the railroad?

Mr. Carter: We have this agent and auditor and secretary, I reckon you might call him.

Examiner Burchmore: Those men also work for the co-partnership?

Mr. Carter: Yes, sir.

Examiner Burchmore: Do you pay them anything for the railroad?

Mr. Carter: They are paid by both companies; they are paid by the railroad company and by the partnership, and we pay them in proportion to what service we think they render.

Examiner Burchmore: Their salaries are described in a general way in the reports to the Commission?

Mr. Carter: Yes, sir.

Examiner Burchmore: How many trains a day do you run?

Mr. Carter: One each way.

Examiner Burchmore: Do you have a time table for the public?

Mr. Carter: Yes, sir.

Examiner Burchmore: Do you distribute a printed form?

Mr. Carter: I don't really know whether we distribute a

3121 published time table or not.

Examiner Burchmore: You get one out anyhow?

Mr. Carter: We have a schedule which has been in force for many years.

Examiner Burchmore: I suppose you connect with the Houston, East & West Texas trains?

Mr. Carter: We connect with the northbound train; we do not connect with the southbound.

Examiner Burchmore: Do they have to wait over night to make the connection?

Mr. Carter: If a man comes south in the evening at three o'clock he would have to wait until next morning.

Examiner Burchmore: Is that a passenger or a mixed train?

Mr. Carter: Mixed train.

Examiner Burchmore: That is the only train you run?

Mr. Carter: That is the only train we run.

Examiner Burchmore: I believe once in a while you have an extra.

Mr. Carter: Yes, sir.

Examiner Burchmore: How many freight cars are there on that train in the usual run?

Mr. Carter: Usually about five when we have a load; that

3122 is about what we carry.

Examiner Burchmore: You have joint rates on lumber in connection with the Houston, East & West Texas?

Mr. Carter: Yes, sir.

Examiner Burchmore: Are those rates the same from Camden as from Moscow?

Mr. Carter: Yes, sir.

Examiner Burchmore: That is true generally?

Mr. Carter: Yes, sir.

Examiner Burchmore: With respect to all rates?

Mr. Carter: With regard to lumber.

Examiner Burchmore: I was referring to lumber.

Mr. Carter: Yes.

Examiner Burchmore: What is your division out on these rates?

Mr. Carter: We have division sheets here; that is all I know about it.

Examiner Burchmore: It is four cents, is it not?

Mr. Carter: No, sir—you mean to interstate points?

Examiner Burchmore: To interstate points.

Mr. Mantooth: That is the maximum rate, I suppose?

Mr. Carter: Our division sheet is practically this; we get
3123 20 per cent of the amount accruing to all lines south of Fort Worth and Dallas and the Houston, East & West Texas and its connections have a minimum of eight cents. Now, I do not know what that figures; in some cases I think we get four cents, and it runs down to one.

Examiner Burchmore: I have got this division sheet. This may be obsolete, but it provides that on lumber destined to interstate points via Lufkin, Cleburne and Houston, the Houston, East & West Texas will be allowed four cents per 100 pounds; the excess over four cents received by the Houston, East & West Texas on shipments from Moscow proper to accrue to the Moscow, Camden & San Augustine Railroad, unless otherwise provided for in current division sheet.

Mr. Carter: Well, at one time that was the arrangement, but that is not so now.

Examiner Burchmore: When was your present sheet issued?

Mr. Carter: This is the last one (indicating).

Examiner Burchmore: This is Sunset Central Route, division sheet 480-A, issued December 1, 1909. On lumber to stations on the Sunset Central you are allowed under that division sheet apparently from two and one-half cents to five cents, and the details are set forth here.

3124 Mr. Carter: Yes, sir.

Examiner Burchmore: To points on other lines in Texas you get 20 per cent of the Sunset Central's proportion?

Mr. Carter: Yes.

Examiner Burchmore: And to interstate points you get 20 per cent of their proportion, receiving for them eight cents to Fort Worth and Dallas?

Mr. Carter: Yes, sir.

Examiner Burchmore: You also have joint class rates to various points?

Mr. Carter: Yes, sir.

Examiner Burchmore: Do the Texas common point rates apply to stations on your line?

Mr. Carter: Yes, sir.

Examiner Burchmore: It seems out of all rates on grain you get two and a half cents, and on class freight from two cents on class E to as high as 12½ cents on 1st class freight. Do you happen to remember what your local class rates are?

Mr. Carter: Our local class rates would be made, I suppose, by the Texas Commission.

Examiner Burchmore: The regular class applies?

Mr. Cowan: That is in the annual report of the Texas
3125 Commission.

Examiner Burchmore: It is a fact that these class divisions are a little less than the locals?

Mr. Mantooth: Yes.

Examiner Burchmore: That is sufficient. How about your lumber rate? That is published by the Texas Commission?

Mr. Mantooth: Yes.

Mr. Carter: Do you want one of these statements?

Examiner Burchmore: Is there any objection to filing this statement of record?

Mr. Mantooth: You have copies.

Examiner Burchmore: If there is no objection, we will take them both.

Mr. Mantooth: I have no copy here, but that is all right.

(The paper so offered and identified was received in evidence and thereupon marked Moscow, Camden & San Augustine Railway Exhibit No. 1, witness Carter, received in evidence December 17, 1910, and is attached hereto.)

Examiner Burchmore: Your agent at Camden issues bills of lading to interstate points on lumber?

Mr. Carter: Yes, sir.

Examiner Burchmore: Does he also issue a way bill?

3126 Mr. Carter: I do not know much about the details. I suppose so.

Mr. Lehman: Yes, sir.

Examiner Burchmore: Then you move the lumber from the mill at Camden down to the junction point, just as any other railroad would move it, if there was another railroad there?

Mr. Carter: Yes, sir.

Examiner Burchmore: Have you ever contemplated building across and connecting with the M., K. & T.?

Mr. Carter: Yes, sir.

Examiner Burchmore: Is that an active plan?

Mr. Carter: Yes, sir.

Examiner Burchmore: Have you made surveys?

Mr. Carter: No. Well, we made a survey about half the way.

Examiner Burchmore: Is there any special object in view in getting across there?

Mr. Carter: Well, yes, sir. In the year 1907 we got caught with

an immense stock of lumber because of the want of service, and that lumber depreciated $5.00 or $6.00 or $7.00 a thousand, and our idea is if we ever have trouble for service again we will build across there to get service and perhaps get a better division to some point than we get now.

3127 Examiner Burchmore: Then it was primarily a matter of car supply and facilities, and also a matter perhaps of better divisions, and therefore more profitable operation?

Mr. Carter: Yes, sir.

Mr. Cowan: If the Examiner will permit at this point, I would like to call attention to the fact that the gentlemen of the Groveton, Lufkin & Northern built from the M., K. & T., because it was a bad service, over to the Houston, East & West Texas.

Examiner Burchmore: I think that counsel would assert, no matter what you connect with, if you can also join with another road, you get better service?

Mr. Garwood: By connecting with the M., K. & T. he gets right in connection with the International & Great Northern just beyond that.

Mr. Carter: We expect to connect with the M., K. & T. unless we get good service, and whenever you decide what kind of a railroad we are.

Examiner Burchmore: I presume naturally this question affects the future plans. What sort of a town is Camden?

Mr. Carter: It is a saw mill town.

Examiner Burchmore: It is nothing more than a sort of
3128 lumber and mill camp, is it?

Mr. Carter: The town of Camden itself is nothing more than a lumber and mill camp? Well, it is pretty prominent, all right. But some time ago I had our old county surveyor, for the purpose of information for this Commission, go around that community and figure up the number of people that were within reach within six or seven miles of Camden, principally south, that were served by that railroad, who had no connection whatever with the saw mill; and he figured there were 1,500 people. Now, I had that map and brought it here to this hearing, and I left here last Saturday to go home and left it in my room and it disappeared, and I have not been able to find it. I can have that map reproduced.

Examiner Burchmore: Was it a large map?

Mr. Carter: A good large map; yes, sir.

Examiner Burchmore: We desire a map of this line, and if you can give us a map of that line, it does not need to be a beautifully engraved map, but we want it to show the saw mill and the connections of the road with the private tram line, and if you can sketch in the woods, you may.

Mr. Carter: If you will give us time, I will be glad to furnish you a map of the whole country, showing the inaccessibility of
3129 the land south of us to railroad facilities. If you take the Commission map of Texas——

Examiner Burchmore: Well, we have maps of that region which

show those facts, but we want to know the location of your mill and the location of the tracks of the tram road with relation to your road.

Mr. Carter: We will try to do that.

Examiner Burchmore: If you will try to make that map small, say no larger than this one here, we will appreciate it.

Mr. Carter: Yes, sir.

Mr. Cowan: That is not a map of the land, but of the railroad and its connections.

Mr. Carter: But what I would like to show would be the future possibilities of that land to the south.

Examiner Burchmore: Yes, but do not take in all of east Texas.

Mr. Carter: Well, I would like to take in two counties there. The distance from the Houston, East & West Texas, running from Houston to Shreveport, and of the Texas & New Orleans from Beaumont to Dallas is about 35 or 40 miles, and those streams in that country run south. It is nearly impossible for those people ten or fif-
3130 teen miles from either of those railroads to get to those railroads with their goods.

Examiner Burchmore: I had an idea the Livingston & Southeastern came from that direction.

Mr. Carter: I expect that is a defunct corporation or very nearly so.

Examiner Burchmore: It is?

Mr. Carter: Yes, sir.

Examiner Burchmore: Well, they have not appeared here, at least, although cited.

Mr. Carter: Well, they have exhausted that timber.

Examiner Burchmore: There was formerly a small mill or a comparatively small mill at least, located about ten miles from Camden, which shipped over your line. Is that still here?

Mr. Carter: That mill has exhausted its timber and been abandoned.

Examiner Burchmore: Have they any other mills on your line?

Mr. Carter: No. There is a shingle mill out on the line which ships some shingles occasionally.

Examiner Burchmore: How much do they ship?

Mr. Carter: Not very much. I suppose three or four car-
3131 loads a year, perhaps.

Examiner Burchmore: What is the total extent of your tonnage per year?

Mr. Carter: I will refer to the statement.

Examiner Burchmore: It is in the statement?

Mr. Carter: Yes, sir.

Examiner Burchmore: Well, we would like the record to show it. This statement shows the total lumber tonnage of 24,405 tons, with a revenue of $10,708.95; logs, 2,380 tons, revenue, $358. What about those logs?

Mr. Carter: Well, we hauled a little piece of timber out on the road over the railroad into the mill.

Examiner Burchmore: You are not making any such haul this year?

Mr. Carter: No.

Examiner Burchmore: The total tonnage of other freight, 1,305 tons; revenue, $2,322.94, making a total tonnage of 28,090 tons. What percentage of that total tonnage was moved for the W. T. Carter & Brother interest?

Mr. Carter: The tonnage, I think, for W. T. Carter & Brother, in tons, is about 95 per cent.

Examiner Burchmore: Did you include in that 95 per cent
3132 the merchandise which goes to the commissary?

Mr. Carter: Yes, sir; that is my understanding.

Examiner Burchmore: I think that is all.

Mr. Carter: The revenue, however, is about 16 per cent.

Examiner Burchmore: Sixteen per cent from the public?

Mr. Carter: Yes, sir.

Mr. Mantooth: You mean 84 per cent?

Mr. Carter: 84 per cent of the total revenue.

Mr. Mantooth: The 16 per cent is created by the public?

Mr. Carter: I want to explain that a little bit. There is lots of the tonnage which comes off for W. T. Carter & Brother, which is for other people and used by other people. We serve through the commissary a great many people that do not buy their stuff direct, but buy from our commissary. It is not shipped in for other people, but for W. T. Carter & Brother, but it is used by people who are not serving the W. T. Carter & Brother interests.

Mr. Mantooth: Not employees of either company?

Mr. Carter: Not employees of either company.

Mr. Mantooth: What is the life of your charter?

Mr. Carter: I think 50 years.

Mr. Mantooth: What is the life of your timber cuttings
3133 now?

Mr. Carter: I do not think exceeding 20 years; that is for the new plant.

Mr. Mantooth: And state whether or not you have acquired practically all the timber holdings within the territory which you have mentioned that you can acquire.

Mr. Carter: Well, I think very nearly all. There is very little timber left in that territory that is not owned by other corporations or people.

Mr. Mantooth: In an area of 15 miles north, 20 miles east and 30 miles south, you own, you say, about one-third of the land holdings?

Mr. Carter: One-third of the land, I think.

Mr. Mantooth: How is the other two-thirds owned or held, if you know?

Mr. Carter: I think one-third is owned by resident people, settlers, farmers, people who live in there, and the other third owned by non-residents or corporations.

Mr. Mantooth: What per cent of that entire area is considered fairly good agricultural land?

Mr. Carter: The land south of Camden is largely short leaf country, and a very large per cent of it, half of it, is good agricul-
3134 tural land when the timber has been removed.

Mr. Mantooth: From the incipiency of these organizations

and institutions there, I will ask you whether or not you have kept books of account showing the transactions with relation to each other, and to other individuals in connection with either concern?

Mr. Carter: I think those accounts have been kept as absolutely accurate as if W. T. Carter & Brother had no interest in them.

Mr. Mantooth: Have you the original books of account with which you commenced that company?

Mr. Carter: I think so. They are at home.

Mr. Mantooth: They are at home, subject to the inspection of any authority that would be authorized to examine them?

Mr. Carter: Yes.

Mr. Mantooth: Would they show the distinct business relations between W. T. Carter & Brother and the railroad company?

Mr. Carter: Yes, sir, from the very first.

Mr. Mantooth: There is nothing in those books or any dealings outside of what the books show, is there?

Mr. Carter: None whatever.

3135 Mr. Mantooth: Do you own any land along the right of way of the railroad, W. T. Carter & Brother, I mean.

Mr. Carter: We own very little. We own the land for about a mile east, and I think perhaps one other little piece that we lately acquired—a mile west, I mean. I said east. I should have said west. The company owns about one mile west from Camden.

Mr. Mantooth: The balance of it is owned by individuals or corporations?

Mr. Carter: Yes, sir.

Mr. Mantooth: How did you acquire your right of way for the railroad?

Mr. Carter: The right of way was given by the people of Moscow as a sort of little bonus that they gave to have the road come into Moscow.

Examiner Burchmore: All the way from Camden?

Mr. Carter: Except that owned by the mill company. We owned land for about one mile west of Camden, and the balance of the way the people of Moscow gave the right of way as a part bonus.

Examiner Burchmore: Well, did you meet their generosity by deeding that mile?

3136 Mr. Carter: It never has been deeded. The railroad has got it.

Examiner Burchmore: It never has paid anything.

Mr. Carter: No.

Mr. Mantooth: That was an inducement to get the road built down there?

Mr. Carter: From Camden to Moscow; yes, sir. There was some thought at the time of building to Corrigan, on account of joining two roads instead of one.

Mr. Mantooth: You understand that the laws of Texas give the Railway Commission authority and require railroads to put their roads in condition and equip them with rolling stock and things of that kind; is that your understanding?

Mr. Carter: Yes, sir.

Mr. Mantooth: That is true of the lines of Texas?

Mr. Carter: Yes, sir.

Examiner Burchmore: I understand the Railroad Commission of Texas assumes that jurisdiction over this road?

Mr. Mantooth: Yes, and can require you to reduce your grade or put heavier steel in, or anything that is required to make a road better for the general public.

Examiner Burchmore: Please omit the details. We know
3137 the fact generally.

Mr. Mantooth: In pursuance of that authority have they required you to perform any duties in that respect?

Mr. Carter: Well, I do not know whether—perhaps it was the Interstate Commerce Commission's orders about equipment. I think the State Commission has also made some orders about equipment.

Examiner Burchmore: I will request you not to go into those details. He said they have assumed jurisdiction.

Mr. Mantooth: They have, and here is an order requiring us to make certain equipment, and we ask to file it in the record.

Examiner Burchmore: Do you insist upon it?

Mr. Mantooth: I think it is proper to go into the record. It is an order requiring Mr. Carter to improve certain equipment or change it.

(The paper so offered and identified was received in evidence and thereupon marked Moscow, Camden & San Augustine Exhibit No. 2, witness Carter, received in evidence December 17, 1910, and is attached hereto.)

Mr. Carter: That has been complied with. I think it is for 20, and we bought 15.

3138 Mr. Mantooth: That was a regular order by the Commission. I wanted to ask you a few questions briefly about the question as to the sale of your lumber, and the different conditions that you would occupy with reference to your mill company if you had no railroad, and I will ask you if the common point rate was reduced upon the lumber in an amount equal to the divisions allowed, and the railroad divisions cancelled, would you as an individual owning an equal amount of stock in the railroad and the saw mill, be on a parity with your competitor in the saw mill business who did not operate a railroad, and received no divisions?

Mr. Carter: Well, I think I would be at a disadvantage to the extent that I have the building and equipping and constructing of a railroad to come up to the requirements of the State Commission and the Interstate Commerce Commission, which is very much in excess of that of building a common tram road.

Examiner Burchmore: Your disadvantage would be that incident to the additional cost of complying with all the state and interstate laws that apply to common carriers and do not apply to private roads?

Mr. Carter: Yes, sir.

3139 Examiner Burchmore: And that would be your sole disadvantage?

Mr. Carter: Well, practically, yes.

Mr. Mantooth: If the rate from the mill to destination of the lumber was reduced to an amount equal to the divisions your railroad receives, and they were withdrawn, would you, as an individual owning an equal portion of the stock in each company, and if so, why?

Mr. Andrews: That is the same question.

Mr. Mantooth: No, it is not.

Mr. Carter: It is a different question. I will illustrate it. If the through rate, the common point rate, to any particular territory was 20 cents, and if we, the Moscow, Camden & San Augustine, received two cents, if that was a common point rate and the rate then was reduced to 18 cents, and the division to the Moscow, Camden & San Augustine withdrawn, I would lose those two cents as an individual. I would lose it from the simple fact that I would have to sell that at the destination or consuming point for two cents per 100 pounds less, to meet the price of my competitor, if the rate was reduced from all the territory. If the rate was reduced from Camden alone, I would not be injured, because I could maintain the
3140 same price for the product.

Mr. Mantooth: If the rate was reduced just from Camden you would not be injured?

Mr. Carter: If the rate was reduced just from Camden I would not be injured.

Mr. Mantooth: But if it was a common point reduction you would be injured?

Mr. Carter: Yes, sir.

Mr Mantooth: What would be the reasonable difference between building and equipping your railroad necessary to operate it and maintain it as a common carrier and building and equipping a tram road sufficient to supply the demands of your mill?

Mr. Carter: The cost of construction and maintenance is about double.

Mr. Mantooth: Do you sell your lumber, taking the 18¾ cent basis as an illustration, any cheaper where your railroad receives a division of four cents than where it only receives a division of two cents?

Mr. Carter: We do not.

Examiner Burchmore: And the explanation is what?

Mr. Carter: Just simply that we sell on the rate, and we
3141 want whatever we can get out of it. We do not want to rob the saw mill for the railroad, but want each institution to stand on its own bottom. We do this, however, we undertake, so far as the selling office is concerned, not to sell where we do not get divisions. We do that. We operate the wholesale office there, and if we sell lumber where we do not get divisions we buy it ourselves.

Mr. Mantooth: What would be the difference in the cost of operating your railroad as now operated as a common carrier, and the operating of an ordinary tram road that would supply your demands?

Mr. Carter: The cost of operating is more, for the simple reason

t the railroad has not got sufficient tonnage to keep it busy. Of
rse we could operate it for less money per ton, if we had plenty
work, but the work they have to do is limited, and the logging
pany is all it can do, and it costs more to operate it per ton.
Examiner Burchmore: Is not that a conceded fact, it costs you
re to keep up a regular train service and all that than if you sim-
run your own logging trains?
Mr. Carter: Yes.
Mr. Mantooth: How many trips a week would you have to
12 make in operating an ordinary tram road, to supply your
demands?
Mr. Carter: I do not get the question.
Mr. Mantooth: I say about how many trips would you have to
ke during a week over that road, if you were running an ordi-
y tram road, to supply the mill company's demands?
Mr. Carter: If we were supplying the logs over that, it would take
eral trips, because the tonnage is so much greater.
Mr. Mantooth: I mean if it was a tram road instead of a railroad,
uld you have to make a trip a day from the mill to your tram
d?
Mr. Carter: I do not get the question.
Mr. Mantooth: I say if you had no railroad and were operating a
m road from your mill to the Houston, East & West Texas——
Mr. Carter: And hauling the lumber?
Mr. Mantooth: And hauling the lumber only.
Mr. Carter: Well, if we did not have to carry it except when we
ready, of course we would not have to make so many trips.
Mr. Mantooth: About how many trips would you have to make
during the week?
13 Mr. Carter: I suppose we could do the business by making
a trip every other day.
Mr. Mantooth: That is all.
Mr. Cowan: But it would cost you just as much to own a railroad
make a trip on every other day as it would to make a trip every
.
Examiner Burchmore: I think he has explained that he did not
nk it would, and there are some reasons that are apparent. If
only had to run the engine over it every other day it would not
as expensive as it would to operate it every day.
Mr. Cowan: I said to own the railroad. Well, Mr. Carter, I just
nted to know if I understood you. You answered Mr. Mantooth
t you sell your lumber at the same price where you get the
isions and where you do not.
Mr. Carter: No, we try not to sell our lumber where we do not get
y division, but we do not make a difference on the 18¾ cent rate.
ere are some places we get four cents, but other places we would
t get over one or two cents, and we do not make any difference in
king quotations at those places, and do not make any difference
in making sales at those places. We simply do not want to
44 cut the market and want the two institutions to stand on
their own bottoms.

Mr. Cowan: I suppose if you sell at a point in Texas where the rate is 14 cents, you sell at the same delivered price that you do where it is 21 or 22 cents.

Mr. Carter: We do not do that.

3145 Mr. Cowan: Well you sell at a delivered price?

Mr. Carter: We sell at a delivered price, but if the rate is 14 cents we make the same price to the 14 cent point regardless of whether we get 2 cents or 4 cents. We do not sell lumber on the 14 cent rate, at the same price we sell it on the 15 cent.

Mr. Cowan: In other words the freight rate enters into the price of the lumber as delivered?

Mr. Carter: The through freight rate enters into the price, but the division does not, that is the point, and that is the fact.

Mr. Cowan: Suppose they gave you a division of half of it, would that affect it?

Mr. Carter: I do not know.

Mr. Cowan: Well, they do do that in some of these cases here, take some of the Arkansas mills.

Mr. Carter: Perhaps if I had a very large division and had an opportunity of getting a very large order I might make a difference, but just selling a carload or two, the idea is to maintain the market.

Mr. Cowan: Do you give it as an expression of your opin-

3146 ion as a business man that the fact of receiving divisions and the amount of the divisions does not affect the price of the lumber.

Mr. Carter: I do not believe that the average man who owns a tap line or gets a division, of course where they get great large ones it may enter into making the price but ordinarily I do not believe it does.

Mr. Cowan: Now somebody is fixing the price of this lumber——

Mr. Carter: If you will allow me to make a suggestion?

Mr. Cowan: Well?

Mr. Carter: I do not know whether the Interstate Commerce Commission has the authority or not, but I would suggest to settle that question of price that the Interstate Commerce Commission require those mills who have not any tap lines and those mills who have tap lines to file a sworn report for 12 months back showing the average price of the products.

Mr. Cowan: That would result in what, showing it was the same, would it not?

Mr. Carter: It would result in showing who is selling cheap lumber and who is not.

Mr. Cowan: The lumber sold in Waco has got to be sold

3147 at the same price for the same quality by everybody who sells it there, you know that?

Mr. Carter: Well, practically.

Mr. Cowan: The man who has the cheaper price fixes the price and sets the price.

Mr. Carter: That is a question.

Mr. Cowan: That is hardly open to debate.

Mr. Carter: That is a question you want to get, and you can get the facts.

Examiner Burchmore: I wonder if the Forestry Service can determine it.

Mr. Carter: I do not know whether they have authority to get that information or not. If you have authority to do it, you ought to do it.

Examiner Burchmore: Your suggestion is in the record.

Mr. Lehman: We make a report to the Forestry Service.

Mr. Cowan: Do you think the mill finally gets the delivered price? The f. o. b. price is the price.

Mr. Carter: The mill price is the price.

Examiner Burchmore: Don't you think we can get the best information about that——

Mr. Cowan: I was trying to get an admission I thought
3148 Mr. Carter would have to make. He has answered that the divisions do not affect the price and he answers they affect the price because they all sell it at the same price. Of course they do.

Mr. Carter: We do not all sell at the same price. One man will come along and sell for 50 cents or $1 less. The price varies.

Mr. Cowan: You are extensively engaged in the business and undoubtedly are a very intelligent and a very honest man. Do you not know it to be a fact that for the last four years, three years anyway, since lumber took such a tumble, that the people manufacturing lumber are endeavoring to make sales wherever they can in order to keep the mills in operation?

Mr. Carter: Yes, sir.

Mr. Cowan: Don't you know it is a fact that the dealer is having more to do with fixing the price than the mill man?

Mr. Carter: Yes, sir.

Mr. Cowan: Don't you know the mill man is trying to meet the prices therefore which the dealer is willing to offer?

Mr. Carter: I do not get the question.

3149 Mr. Cowan: The mill man is trying to meet the price which the retailer is trying to pay.

Mr. Carter: He is trying to meet the price of his competitor, yes, sir.

Mr. Cowan: And in a multitude of competitors you have to look out and see what your competitor is offering to sell at, is not that true?

Mr. Carter: Yes, sir.

Mr. Cowan: And your mill man goes out and he meets the bid that has been made by others if he can find out what it is?

Mr. Carter: Yes, sir.

Mr. Cowan: And he then finds whether you are willing to meet that price?

Mr. Carter: Yes.

Mr. Cowan: And if you are you get the business?

Mr. Carter: If they give it to us.

Mr. Cowan: You are willing to meet it or not, dependent upon whether you have a profit in the transaction; is not that it?

Mr. Carter: Well, I really think some of them claim they are selling without any profit.

3150 Mr. Cowan: That may be so, but the man who has the most profit in his manufacturing enterprise has got the advantage in making the sale.

Mr. Carter: Oh, I will admit freely that perhaps as a whole investment, if a man has got a saw mill and has got a logging road that is not chartered, and another man has got a saw mill and a logging road similar or practically the same, that man has got an advantage on the whole investment, but whether or not he gives it to the dealer, reduces the price of lumber is another question.

Mr. Cowan: And it will depend upon the circumstances of the financial and commercial transaction, on the commercial business of selling lumber necessarily?

(No reply.)

Mr. Cowan: Don't you find it to be a fact in your own case that certain institutions in Louisiana who are largely interested and extensive dealers put you right down to the bottom and you have to meet the very bottom price in order to sell?

Mr. Carter: I do not find it worse from Louisiana than from any other source. They are all making the price.

Mr. Cowan: You do know there are certain institutions

3151 who are pressing the Texas people pretty hard?

Mr. Carter: I do not know. In the first place I am not manager of the sales and do not keep much track of it.

Mr. Cowan: I imagine you have pretty good knowledge, however.

Mr. Carter: You are mistaken.

Examiner Burchmore: Are we getting much useful information?

Mr. Cowan: We have not until the last question.

Examiner Burchmore: If you desire to continue it I have no objection.

Mr. Cowan: I do not expect Mr. Carter is such a person and I knew he would be bound to admit that the commercial side was bound to find its way into the tap line situation.

Mr. Carter: Why does not the fellow who has the saw mill and the railroad all practically the same avail himself and get a charter like the balance of us and get the division? It is open to him.

Mr. Cowan: I am not on the witness stand.

Mr. Carter: Well, that is the question.

Examiner Burchmore: How about the man who has the oxen and wagon?

3152 Mr. Carter: I don't know.

Examiner Burchmore: He has not the capital, is the reason he does not build it, but after all that is in the realm of argument.

Mr. Cowan: He is a retired bankrupt, the man that has not got a tap line. A man who logs with teams is a retired bankrupt.

Mr. Mantooth: I wanted to ask just one more question.

Mr. Carter: Have you had occasion within the last twelve months to investigate to any extent the question as to whether the lumber

has been sold cheaper by Louisiana manufacturers than by Texas manufacturers?

Mr. Carter: No, sir; I have not.

Examiner Burchmore: Do you know anything about that?

Mr. Mantooth: I know something about it as a lawyer, having gone into this question at Austin and other places.

Mr. Carter: I only know that from common rumor; I do not know anything of my own knowledge.

Mr. Mantooth: I supposed you were in the investigation and looked at the figures we had at Austin?

Mr. Carter: No.

3153 Examiner Burchmore: You will file a map?

Mr. Mantooth: Yes, sir.

Examiner Burchmore: And a statement of tonnage?

Mr. Mantooth: Yes, sir, if it is not in the statement already filed we will comply with the order already entered.

(Witness excused.)

Examiner Burchmore: There is only one more case on the active call and that is the Caro Northern.

3154 *Caro Northern Railroad.*

T. TILFORD, was called as a witness and having been duly sworn, testified as follows:

Examiner Burchmore: You are an officer of the Caro Northern Railway?

Mr. Tilford: Yes, sir.

Examiner Burchmore: What is your office?

Mr. Tilford: Traffic Manager.

Examiner Burchmore: Are you an officer of any lumber company, and if so what one and what office?

Mr. Tilford: No, sir.

Examiner Burchmore: The Saner-Whitman Lumber Company has mills located on your line?

Mr. Tilford: Yes, sir.

Examiner Burchmore: It is understood I believe that there is some relationship between the two companies?

Mr. Tilford: Yes, sir.

Examiner Burchmore: Is it not a fact that the stockholders of that lumber company own the stock of the Caro Northern?

Mr. Tilford: They practically own stock in the two corporations in about the same proportion, yes, sir.

3155 Examiner Burchmore: There are a few shares outstanding I presume in directors' hands.

Mr. Tilford: In the directors of the lumber company.

Examiner Burchmore: And of the railroad company?

Mr. Tilford: Yes, sir.

Examiner Burchmore: You say the holdings are substantially identical?

Mr. Tilford: The directors are stockholders, yes, sir.
Examiner Burchmore: Are there any differences in the stockholders of the two companies?
Mr. Tilford: Well, it is very slight.
Examiner Burchmore: The Caro Northern connects, as I understand it, with the Texas & New Orleans Railroad in the town of Caro, Texas.
Mr. Tilford: Yes, sir.
Examiner Burchmore: And the Saner-Whitman Lumber Company has a saw mill and planer near the junction point?
Mr. Tilford: Yes.
Examiner Burchmore: But neither the saw mill nor the planer are located immediately adjacent to tracks owned by the Texas & New Orleans Railroad?
Mr. Tilford: No.
3156 Examiner Burchmore: They are served only by the rails of this company?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Is there any other mill owned by this lumber company?
Mr. Tilford: No, sir.
Examiner Burchmore: The line as I understand it extends from Caro in a generally northerly direction for about 18 miles.
Mr. Tilford: About 19 miles, including the switches and spurs.
Examiner Burchmore: To the town of Mount Enterprise?
Mr. Tilford: Yes, sir.
Examiner Burchmore: I notice Mount Enterprise, as charted on your map here, there is a depot.
Mr. Tilford: Yes, sir.
Examiner Burchmore: That is your depot?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Then there is a stock yard?
Mr. Tilford: Yes.
Examiner Burchmore: Those are your stock yards?
Mr. Tilford: Yes, sir.
3157 Examiner Burchmore: And a cotton gin?
Mr. Tilford: Yes, sir.
Examiner Burchmore: No saw mill operations there?
Mr. Tilford: Yes, sir.
Examiner Burchmore: You refer to Langford's Mill?
Mr. Tilford: Yes, sir.
Examiner Burchmore: That is a couple of miles from Mount Enterprise?
Mr. Tilford: No, that blue print is not drawn to scale.
Examiner Burchmore: It is within the town of Mount Enterprise?
Mr. Tilford: It is within the outskirts.
Examiner Burchmore: Who owns that mill?
Mr. Tilford: Langford.
Examiner Burchmore: Do they make shipments over your line?
Mr. Tilford: Yes, sir.

Examiner Burchmore: What amount?
Mr. Tilford: I should judge a car and a half a day on the average.
Examiner Burchmore: How much lumber does the Saner-
3158 Whitman Lumber Company manufacture a day?
Mr. Tilford: I do not know about what they manufacture; they ship four or five cars a day depending on the car supply.
Examiner Burchmore: As against one and a half from the Langford mill?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Do you have much stock originating at that stock yard at Mount Enterprise?
Mr. Tilford: Not a great deal.
Examiner Burchmore: How many carloads will it amount to in a year?
Mr. Tilford: I suppose 30 to 40 a year.
Examiner Burchmore: How much cotton?
Mr. Tilford: Approximately 2000 bales each year.
Examiner Burchmore: I notice on this map the Garrison mill.
Mr. Tilford: Yes.
Examiner Burchmore: The Prince and Parrot mill?
Mr. Tilford: Yes.
Examiner Burchmore: And the Van Sickle mill?
Mr. Tilford: Yes.
3159 Examiner Burchmore: Those are located a distance of a mile or two from your line?
Mr. Tilford: Yes, sir, they are not directly on the railroad but we serve them.
Examiner Burchmore: They have to team their mill product across to the railroad?
Mr. Tilford: Yes, sir.
Examiner Burchmore: At Strongfield Station?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Can those mills team across to your station and compete successfully with the mill at Caro?
Mr. Tilford: They do not, do any more teaming than the Saner-Whitman Company.
Examiner Burchmore: Now what teaming does the Saner-Whitman Lumber Company do?
Mr. Tilford: They haul them to the logging roads and put them on the cars and haul them up to the main line.
Examiner Burchmore: You have private logging trams which connect with your main line at Hutch?
Mr. Tilford: Near there.
Examiner Burchmore: Also one connecting between
3160 Hutch and Kearsey?
Mr. Tilford: That is the old logging road. It has been taken up. They run on about ten miles into the woods.
Examiner Burchmore: No other tram roads besides these connect with the railroad?
Mr. Tilford: No.
Examiner Burchmore: I notice that the Houston East & West

Texas lines immediately north of this line? a distance of a few miles parallel your line?

Mr. Tilford: Yes, sir, 12 or 14 miles.

Examiner Burchmore: Any other railroad in the immediate vicinity?

Mr. Tilford: The I. & G. N., and the Timpson & Henderson railroads.

Examiner Burchmore: Mount Enterprise is not so very far east of the Timpson & Henderson?

Mr. Tilford: It might be called east or southeast.

Examiner Burchmore: And it is only four or five miles from the International & Great Northern?

Mr. Tilford: It is farther than that. That scale is not right there. I just drew that up to show the situation; it is not drawn
3161 to scale, it is about 14 miles to Henderson on the I. & G. N.

Examiner Burchmore: Do you purpose putting this in evidence?

Mr. Tilford: If you will accept it without it being drawn to scale.

Examiner Burchmore: If you will give us a map like this drawn to scale, a smaller scale, this is exactly what we want.

Mr. Tilford: I will be glad to do it.

Examiner Burchmore: What sort of a railroad is the Timpson & Henderson?

Mr. Tilford: I don't know much about that road.

Mr. Saner: I will tell you about that.

Examiner Burchmore: It is quite a railroad?

Mr. Saner: A good railroad, good steel, substantial roadbed, new equipment, new engines and new passenger cars.

Examiner Burchmore: Owned by the Ragley Lumber Company?

Mr. Saner: I could not accurately state. There are a good many stockholders who are not in that company.

Examiner Burchmore: Have you contemplated making a connection to either one of these other railroads?

3162 Mr. Tilford: Yes, sir; we have discussed it from time to time. The owner of the Timpson & Henderson has recently bought stock in our road.

Examiner Burchmore: What is the extent of his holdings?

Mr. Tilford: I think it is about $7500.

Examiner Burchmore: Your total capitalization is what?

Mr. Tilford: $100,000.

Examiner Burchmore: So he has $7500 out of $100,000?

Mr. Tilford: Yes, sir.

Examiner Burchmore: Does he own any interest in this lumber company?

Mr. Tilford: No, sir; not any.

Examiner Burchmore: By the owner you refer to Mr. Ragley?

Mr. Tilford: Of the Timpson & Henderson, yes, sir; he and his associates.

Examiner Burchmore: When was this mill at Caro opened for operation?

Mr. Tilford: It was operating when I went there in 1906. I understand about 18 months.

Examiner Burchmore: It was probably opened about 1904?

Mr. Tilford: Yes, sir.

3163 Examiner Burchmore: When was the railroad begun?

Mr. Tilford: September, 1906.

Examiner Burchmore: After the mill was built?

Mr. Tilford: Yes, sir.

Examiner Burchmore: How did they get their logs to the mill before the road was built?

Mr. Tilford: They had an old tram road extending in an opposite direction.

Examiner Burchmore: It is plotted on this plot?

Mr. Tilford: Yes, sir.

Examiner Burchmore: They used to bring their logs in from the other side of the Texas & New Orleans railroad?

Mr. Tilford: Yes.

Examiner Burchmore: Was it incorporated?

Mr. Tilford: No.

Examiner Burchmore: Did they get any divisions on that tram?

Mr. Tilford: No.

Examiner Burchmore: Then they built this railroad in 1906?

Mr. Tilford: Yes, sir.

Examiner Burchmore: When was it completed to Mount Enterprise, immediately thereafter?

3164 Mr. Tilford: Yes, sir; when I got there it was about finished to Mount Enterprise.

Examiner Burchmore: They built it right through as one thing?

Mr. Tilford: Yes, sir; it was built at one time.

Examiner Burchmore: The old tram of the Saner-Whitman Lumber Company that runs over from a connection between Hutch and Kearsey, when was that laid out, immediately after this road was completed?

Mr. Tilford: That tram there was in another location formerly and was taken up about six or eight months ago and was placed down where it now stands.

3165 Examiner Burchmore: As a matter of fact immediately after the completion of this road private trams were opened up into the woods and they have been moved from time to time.

Mr. Tilford: Yes, sir.

Examiner Burchmore: That is the substance of the transaction?

Mr. Tilford: Yes, sir.

Examiner Burchmore: What is the weight of the rail in this railroad?

Mr. Tilford: 52 pounds.

Examiner Burchmore: Is the road ballasted?

Mr. Tilford: Well, with sand and slag on it.

Examiner Burchmore: Is it graded?

Mr. Tilford: Yes, sir.

Examiner Burchmore: Are there any hills down there?

Mr. Tilford: It is a good grade.

Examiner Burchmore: Substantially level?
Mr. Tilford: The maximum grade is 1.36, I think.
Examiner Burchmore: Any extreme curves?
Mr. Tilford: I do not know the degree of the curves; I do not regard any of them as extreme.
Examiner Burchmore: Do you cross any streams?
3166 Mr. Tilford: Yes, sir.
Examiner Burchmore: What bridges have you?
Mr. Tilford: Wooden bridges.
Examiner Burchmore: Will they hold 100,000 pound cars?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Take anything you could move over the line?
Mr. Tilford: Yes, sir, without any trouble.
Examiner Burchmore: You say the total capitalization of this road is $100,000?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Was that stock sold? How was the road financed?
Mr. Tilford: Stock was issued to the stockholders.
Examiner Burchmore: To whom was it issued?
Mr. Tilford: To individuals.
Examiner Burchmore: Who were those individuals, connected with the lumber company?
Mr. Tilford: They were stockholders of the lumber company.
Examiner Burchmore: They got this stock as kind of a dividend?
Mr. Tilford: I do not think so, no. They borrowed the
3167 money as individuals and built the railroad and issued the stock.
Examiner Burchmore: They borrowed the money as individuals, but did they not borrow it as a collection of individuals, an association of people.
Mr. Tilford: No.
Examiner Burchmore: Did they give individual notes——
Mr. Tilford: That is my understanding.
Examiner Burchmore: Was it not a joint note?
Mr. Tilford: They never issued any note as a lumber company not that I know of.
Examiner Burchmore: Then you say these individual stockholders practically put up the money for the stock?
Mr. Tilford: Yes.
Examiner Burchmore: And with the money thus raised—it amounted to $100,000?
Mr. Tilford: It was more than that. The railroad cost about $109,000 but only $100,000 was issued against it.
Examiner Burchmore: And with that money they built the road?
Mr. Tilford: Yes.
Examiner Burchmore: Where did they get the $9,000?
Mr. Tilford: It was part of the indebtedness they owe the
3168 bank.
Examiner Burchmore: Did they have any bonds?
Mr. Tilford: No.

Mr. Saner: A small part of that went as a bonus for building the road.

Examiner Burchmore: They got a bonus of how much?

Mr. Staner: Approximately $9,000.

Examiner Burchmore: From the town of Mt. Enterprise?

Mr. Tilford: Yes.

Examiner Burchmore: How much of a town was that?

Mr. Tilford: Only about 1200 people, I guess.

Examiner Burchmore: They issued some city bonds?

Mr. Tilford: No, they gave us the right of way and a half interest in the town site company.

Examiner Burchmore: Then Mt. Enterprise is perhaps a company town?

Mr. Tilford: No, it is more of a farming town.

Examiner Burchmore: Have you any stores there?

Mr. Tilford: No.

Examiner Burchmore: Have you any stores along the line?

Mr. Tilford: No.

Examiner Burchmore: I refer to the lumber company.

3169 Mr. Tilford: No, they have not.

Examiner Burchmore: You have a contract between this railroad and the Saner-Whitman Lumber Company, dated October 1st, 1909, and a copy of that contract or what purports to be a copy is on file with the Commission. Are you familiar with that contract?

Mr. Tilford: I might be if I knew the substance of it.

Examiner Burchmore: The substance is that the Saner-Whitman Lumber Company received from the Caro Northern the right to run its logging trains over this road up to the mill upon the payment of 25 cents per train mile?

Mr. Tilford: Yes, sir.

Examiner Burchmore: I suppose for empty trains as well as loaded.

Mr. Tilford: Yes.

Examiner Burchmore: Is that contract still in effect?

Mr. Tilford: Yes.

Examiner Burchmore: They are still operating logging trains?

Mr. Tilford: Yes, sir.

Examiner Burchmore: Then I presume from that fact that this Saner-Whitman Lumber Company has private logging

3170 equipment?

Mr. Tilford: Yes, sir.

Examiner Burchmore: And it has locomotives of its own?

Mr. Tilford: Yes.

Examiner Burchmore: And the logs are hauled into the mill by the lumber company?

Mr. Tilford: Yes.

Examiner Burchmore: Now, of course there is no billing on there?

Mr. Tilford: No.

Examiner Burchmore: That 25 cents a car mile amounts to how much on a train?

Mr. Tilford: 25 cents a train mile, it is.
Examiner Burchmore: Do you haul it ten miles?
Mr. Tilford: About eight miles out and back, which is sixteen.
Mr. Cowan: $2.00 for eight miles.
Examiner Burchmore: It would be $4.00 per round trip.
Mr. Tilford: Yes.
Examiner Burchmore: How many cars have you in the train?
Mr. Tilford: Anywhere from 10 to 15.
Examiner Burchmore: Say an average of 12?
3171 Mr. Tilford: Yes.
Examiner Burchmore: 12 cars and $4.00 a train would be about 33-1/3 cents a car. That is what it costs this lumber company to get logs into the mill plus the cost of operation of the trains, of course.
Mr. Tilford: Yes.
Examiner Burchmore: Have you any statistics as to the cost of getting the logs to the mill?
Mr. Tilford: No, it pertains to the lumber company entirely.
Examiner Burchmore: The railroad company, as I understand it, does handle the lumber from the mill over to the connection with the Texas & New Orleans?
Mr. Tilford: Yes, we perform four distinct movements there on the empties and on the loads.
Examiner Burchmore: How is that, four movements, two in and two out?
Mr. Tilford: We sent the locomotive up to the interchange track at the T. & N. O. depot which is also a joint track, we pay a portion of the expense; we pull the empty car down on to our holding track and then replace the empty car to the various industries as
3172 it may be demanded, or to the cotton gin or the platform. I should say, and then when the lumber is loaded out at the mill we switch it to our weighing track and weigh the shipment and then move it back up to the T. & N. O. interchange track.
Examiner Burchmore: Then you have a track scales?
Mr. Tilford: Yes, sir.
Examiner Burchmore: Are any bills of lading issued on the lumber out of the Saner-Whitman mill?
Mr. Tilford: No.
Examiner Burchmore: I say on the lumber when it moves out to interstate destinations, do you issue bills of lading?
Mr. Tilford: Not from the mill but from the railroad station. We have a depot there.
Examiner Burchmore: From what station?
Mr. Tilford: The Caro Northern Railroad station, our station; Wydeck, we call our station.
Examiner Burchmore: You have two depots in the vicinity of Caro?
Mr. Tilford: Yes.
Examiner Burchmore: Your depot is Wydeck and how far is it from Wydeck to the joint station at Caro by rail?
Mr. Tilford: About .6 of a mile.

Examiner Burchmore: Then from Wydeck a bill of lading
3173 is issued by the Caro Northern?
Mr. Tilford: Yes, sir.
Examiner Burchmore: And that bill of lading will carry the shipment up to St. Louis or wherever it is going?
Mr. Tilford: Yes.
Examiner Burchmore: You have an agent at Wydeck.
Mr. Tilford: I act as agent.
Examiner Burchmore: Well, you also work for the lumber company?
Mr. Tilford: No.
Examiner Burchmore: Do you issue a waybill?
Mr. Tilford: Yes, sir.
Examiner Burchmore: And that agrees with the bill of lading?
Mr. Tilford: Yes.
Examiner Burchmore: And the point of origin shown in those papers is Wydeck?
Mr. Tilford: Yes.
Examiner Burchmore: Is the rate from Wydeck to interstate points the same as from Caro on the Texas & New Orleans rails?
Mr. Tilford: Yes.
3174 Examiner Burchmore: What is your division?
Mr. Tilford: Three-quarters of a cent to four cents.
Examiner Burchmore: What is it on state traffic?
Mr. Tilford: You mean on interstate?
Examiner Burchmore: What do you get on state traffic?
Mr. Tilford: We do not get four cents on interstate business. Three is the maximum on interstate business and four cents applies on state business.
Examiner Burchmore: Your state business varies from three-quarters of a cent to four cents?
Mr. Tilford: Yes.
Examiner Burchmore: And interstate three quarters of a cent to three cents?
Mr. Tilford: Yes.
Examiner Burchmore: And for that service you perform the service of hauling the lumber from the mill over to the track of the T. & N. O. as indicated?
Mr. Tilford: Yes.
Examiner Burchmore: Are the general officers of this railroad paid for their services to the railroad?
Mr. Tilford: Yes.
3175 Examiner Burchmore: All of them?
Mr. Tilford: Yes.
Examiner Burchmore: Please give me the salaries of the general officers who are officers of the railroad who are not officers of the lumber company. I do not care to know the salaries of any one who does not work for the lumber company. The President is president of both companies?
Mr. Tilford: Yes.
Examiner Burchmore: What is his salary from the railroad?
Mr. Tilford: $100 a month.

Examiner Burchmore: He does not do any actual work for the railroad, does he?

Mr. Tilford: Yes, sir, I think he does.

Examiner Burchmore: Very much.

Mr. Tilford: Well, he exercises general executive duties. He goes out and inspects the line and attends to the general legal matters and claims.

Examiner Burchmore: He is an attorney?

Mr. Tilford: Yes.

Examiner Burchmore: Is the Vice-President a salaried officer?

Mr. Tilford: No.

3176 Examiner Burchmore: Any other officer of the railroad receive a salary?

Mr. Tilford: The general manager.

Examiner Burchmore: Are you the general manager?

Mr. Tilford: No.

Examiner Burchmore: Is he an officer of the lumber company also?

Mr. Tilford: Also, yes, sir.

Examiner Burchmore: How much does he get from the railroad?

Mr. Tilford: $100 a month.

Examiner Burchmore: Is his salary proportionate to his services?

Mr. Tilford: Yes.

Examiner Burchmore: Are the railroad company's salaries to those officers really proportionate to their service?

Mr. Tilford: I think so, yes, sir.

Examiner Burchmore: Have you any employés?

Mr. Tilford: Only one of the assistants to one of our agents.

Examiner Burchmore: He does not work for the lumber company?

3177 Mr. Tilford: No.

Examiner Burchmore: That is your assistant there?

Mr. Tilford: No, the assistant to the joint agent, part of which is paid by the railroad.

Examiner Burchmore: You share in the expense of that depot?

Mr. Tilford: Yes.

Examiner Burchmore: I suppose you have some contract with the T. & N. O.?

Mr. Tilford: Yes.

Examiner Burchmore: Do you run any passenger trains?

Mr. Tilford: Yes.

Examiner Burchmore: I did not ask you what equipment you had, did I?

Mr. Tilford: No, we have two locomotives, one passenger coach and 2 box cars.

Examiner Burchmore: Now, you run a regular train on schedule, I suppose?

Mr. Tilford: Yes, sir.

Examiner Burchmore: More than one train?

Mr. Tilford: No, just one trip a day out and back.

Examiner Burchmore: That train meets the Texas & New Orleans trains?

3178 Mr. Tilford: Both ways, yes, sir.

Examiner Burchmore: Is it a mixed train?

Mr. Tilford: Yes.

Examiner Burchmore: Do you publish a time table?

Mr. Tilford: Yes.

Examiner Burchmore: What is the extent of your passenger traffic?

Mr. Tilford: Between 5,000 and 6,000 passengers, I should think, in the last fiscal year.

Examiner Burchmore: And you do not remember what the revenue from those passengers was?

Mr. Tilford: About $1700 approximately; I do not remember exactly.

Examiner Burchmore: For the year?

Mr. Tilford: Yes.

Examiner Burchmore: Has your traffic in passengers increased this year very materially?

Mr. Tilford: Well, it has increased slightly; I do not think it has much.

Examiner Burchmore: Can you inform us with respect to your freight tonnage, did you handle any logs last year as a railroad?

3179 Mr. Tilford: No.

Examiner Burchmore: Did you ever handle any logs as a railroad?

Mr. Tilford: Why, 18 months or two years ago we handled them, yes, sir.

Examiner Burchmore: You formerly handled the logs for the lumber company?

Mr. Tilford: Yes.

Examiner Burchmore: In fact until 18 months or two years ago the lumber company did not haul its own logs?

Mr. Tilford: No.

Examiner Burchmore: You did it for them?

Mr. Tilford: Yes.

Examiner Burchmore: Do you remember what the charge was?

Mr. Tilford: $1.50 a car.

Examiner Burchmore: That was entirely independent of any kind of division?

Mr. Tilford: Well——

Examiner Burchmore: You got that and the divisions out of the lumber rates besides?

Mr. Tilford: No.

Examiner Burchmore: It reverted back to the lumber

3180 company; it was a milling in transit proposition at that time.

Mr. Saner: Just in that connection the full authority is under the rules given on pages 95 and 96, Volume 18, of the Texas Railway Commission reports.

Examiner Burchmore: I do not believe we need go into that. It

will appear in this connection that for the past fiscal year you handled no logs?

Mr. Tilford: No.

Examiner Burchmore: Do you remember how much lumber you handled last year?

Mr. Tilford: About 35,000 tons.

Examiner Burchmore: How much of that was furnished by the Saner-Whitman Lumber Company?

Mr. Saner: Have you a statement on that?

Examiner Burchmore: Please give me the general figures.

Mr. Tilford: I have it in carloads. Will that answer?

Examiner Burchmore: That will answer.

Mr. Tilford: For the period from July 1st, 1909, to July 1st, 1910, the tonnage account of the Saner-Whitman Lumber Company, lumber 897 cars; account of the shippers 451 cars; cotton and cottonseed 62 cars; for other shippers, the Saner-Whitman
3181 Company of course not being interested in cotton and cottonseed. On other commodities such as grain and grain products, feed, flour, fertilizer, and so forth, the account of the lumber company was 98 cars and that on account of other shippers 134 cars. The total account of the lumber company was 995 cars and for account of other shippers 647 cars.

Examiner Burchmore: Have you the revenue on that, Mr. Tilford?

Mr. Tilford: No.

Mr. Saner: You know what the revenue was?

Mr. Tilford: About 50 per cent.

Examiner Burchmore: What per cent of the tonnage was furnished by lumber?

Mr. Tilford: Between 55 and 60 per cent of the total tonnage.

Examiner Burchmore: Was the mill run full blast during that period?

Mr. Tilford: Yes.

Examiner Burchmore: That is, it was not idle?

Mr. Tilford: No.

Examiner Burchmore: How much lumber did other mills on the line furnish?

3182 Mr. Tilford: 451 cars.

Examiner Burchmore: As against your how many?

Mr. Tilford: Against the Saner-Whitman Lumber Company 897 cars.

Examiner Burchmore: That is about two thirds of the lumber traffic is for the Saner-Whitman Lumber Company?

Mr. Tilford: Yes.

Mr. Saner: Can you not bring it on down to date for the Commission so far this year?

Mr. Tilford: July 1st, 1910, to December 1st, account of the Saner-Whitman Lumber Company, lumber 352 cars; other shippers 141 cars. Cotton and cottonseed, other shippers 84 cars; other commodities account of the lumber company, 37 cars, and other ship-

pers 45 cars; total account of lumber company 389 cars; account of other shippers 270 cars.

Examiner Burchmore: About the same proportion, is it not?

Mr. Tilford: Yes, sir, just about the same; it leaves a less than 60 per cent furnished by the lumber company of the total tonnage. Shall I file it as part of the record?

Examiner Burchmore: Yes.

(The paper so offered and identified, was received in evi-
3183 dence and thereupon marked Caro Northern Exhibit No. 1, Witness Tilford, received in evidence December 17th, 1910, and is attached hereto.)

Examiner Burchmore: You comply with the Acts of Congress respecting accidents and safety appliances, and so forth, as far as you are advised?

Mr. Tilford: Yes.

Examiner Burchmore: Does the State Commission of Texas recognize this as a common carrier railroad?

Mr. Tilford: Yes, sir, the present Chairman of the Commission and Governor-elect were over personally to inspect the road and went over it.

Examiner Burchmore: When did they accord you that recognition?

Mr. Tilford: That was in March, 1907.

Mr. Saner: What was the length of the life of the company by the charter?

Mr. Tilford: 50 years.

Mr. Saner: What is the length of the timber holdings by the company there, how much longer before they will be cut out?

Mr. Tilford: About four years, I judge.

3184 Mr. Saner: Was it intended when the company was organized to continue that road as a permanent railroad?

Mr. Tilford: Yes.

Mr. Saner: State the amount of holdings of land by this lumber company in that vicinity now and the condition of the country?

Mr. Tilford: Land and timber rights?

Mr. Saner: Land.

Mr. Tilford: They do not own any land at present. They have recently sold 62,000 acres approximately to eastern capitalists, to a syndicate with a view of settling up the country and bringing in more farms.

Mr. Saner: That is under progress now?

Mr. Tilford: Yes.

Mr. Saner: Buying lots as the timber is cut off?

Mr. Tilford: Yes.

Mr. Saner: It is contemplated they will buy it entirely within the four years?

Mr. Tilford: Yes.

Mr. Saner: Has there been any development of that country prior to that time in the truck line, demonstration farms, at Winder?

3185 Mr. Tilford: Yes.

Mr. Saner: How many cars did you haul from there just one season?

Mr. Tilford: 15.

Mr. Saner: How many bales of cotton have you hauled this season from off the line?

Mr. Tilford: I do not know exactly; I think about 1,780 bales.

Mr. Saner: And more to come?

Mr. Tilford: Yes.

Mr. Saner: You will haul approximately how much?

Mr. Tilford: There will be over 2,000 bales, I am satisfied.

Mr. Saner: How many stations and station agents have you on that line?

Mr. Tilford: Do you mean counting flag stops?

Mr. Saner: Well, no, you need not count the flag stops but permanent stations and buildings more especially.

Mr. Tilford: Besides the joint station at Caro we have one at Wydeck and one at Mount Enterprise.

Mr. Saner: All those are separated and do they have passenger rooms for white and colored people, and are they heated?

3186 Mr. Tilford: Yes.

Mr. Saner: Warehouses and platforms for loading?

Mr. Tilford: Yes, sir.

Mr. Saner: You have temporary loading platforms or platforms without a station at Longfield?

Mr. Tilford: Yes.

Mr. Saner: And also at Winder?

Mr. Tilford: Yes, sir.

Mr. Saner: And at Hutch?

Mr. Tilford: Yes.

Mr. Saner: Do you sell tickets and check baggage?

Mr. Tilford: Yes.

Mr. Saner: The Texas Railroad Commission entered a formal order after that inspection, authorizing you to act as a common carrier road?

Mr. Tilford: Yes, sir.

Mr. Saner: This 18th Annual Report, page 213, I do not want to read it. The Examiner asked you about the services being performed. You have indulged in the pleasures of being sued as a railroad over there?

Mr. Tilford: Yes, sir, we have indulged in that luxury.

3187 Examiner Burchmore: Prior to the time that the Texas Railroad Commission recognized you as a railroad, did the Saner-Whitman Company have to pay any personal injury claims for people who were injured on the railroad?

Mr. Tilford: I could not state as to that.

Mr. Saner: No, they did not.

Mr. Cowan: Whether they did or not, I would like to say for the benefit of the record that the Supreme Court of Texas does not exempt a railroad from being responsible on the ground that it is or is not a common carrier. The two have no relation under our law.

Mr. Saner: That is a question we will not take up right here now.

Mr. Cowan: That is my understanding.

Examiner Burchmore: That puts the question into the record.

Mr. Saner: Will you give us the names of various industries on this road and served exclusively by this road?

Mr. Tilford: I could not give them exactly.

Mr. Saner: Give those you can recall from memory.

Mr. Tilford: Well, what kind?

Mr. Saner: All kinds.

3188 Mr. Cowan: They must be farms, because they could not have had so much cotton.

Mr. Saner: How many gins do you have?

Mr. Tilford: Six or seven; I do not remember the number.

Mr. Saner: How many small saw mills do you serve and have you been serving?

Mr. Tilford: 12 to 15.

Mr. Cowan: They are on the map?

Mr. Saner: Some of them are.

Mr. Tilford: Not all of them.

Mr. Saner: You keep separate books in accordance with the rules of the Interstate Commerce Commission?

Mr. Tilford: Yes.

Mr. Saner: And in no wise mingled with the books of the lumber company or have no connection with them?

Mr. Tilford: Not at all. They are kept in my office building.

Mr. Saner: Each company operates separately and distinct and independent of the other?

Mr. Tilford: Yes.

Mr. Saner: You do your own banking?

3189 Mr. Tilford: Yes.

Mr. Saner: File tariffs and concurrences and indexes and so forth in accordance with the rules of the Commission?

Mr. Tilford: Yes, sir.

Mr. Saner: You file your regular reports to the Commissions both State and Interstate?

Mr. Tilford: Yes.

Mr. Saner: And perform all the other requirements so far as you know them, both the State and Interstate Commerce Commissions?

Mr. Tilford: Yes. There may be some I have overlooked, but I make out many a one of them.

Mr. Saner: You issue regular bills of lading and waybills on all shipments originating and moving from your lines?

Mr. Tilford: Yes.

Mr. Saner: I will just let these generalities stand. There are a good many details I could take up, but just one question. The rates to all points on the Caro Northern are the same as they are to Wydeck?

Mr. Tilford: To or from Wydeck?

Mr. Saner: I say the rates to and from all points on the Caro Northern are the same as they are to Wydeck?

3190 Mr. Tilford: Yes.

Examiner Burchmore: I did not ask you if you have issued through class rates.

Mr. Tilford: Yes.

Examiner Burchmore: I suppose the common point rates apply, or are you not in that territory?

Mr. Tilford: Yes, sir, they apply.

Examiner Burchmore: What division do you get?

Mr. Tilford: 12½ per cent of the St. Louis or Missouri River rate.

Examiner Burchmore: That runs from two cents to two and a half cents?

Mr. Tilford: Yes.

Mr. Cowan: You mean the Southwestern Tariff Committee issues rates to and from your road applying the Texas common point rate on interstate traffic?

Mr. Tilford: Yes.

Mr. Cowan: The Texas rates apply to and from points on your line?

Mr. Tilford: Yes.

Mr. Cowan: And the greater distance the greater the rate?

3191 Mr. Tilford: Applied as to distance.

Mr. Cowan: But as to lumber the interstate rates are the blanket rates applicable in that territory?

Mr. Tilford: Yes.

Mr. Cowan: They are therefore the same to all points on your line?

Mr. Tilford: Yes.

Mr. Cowan: They would also apply to state rates on lumber. They are the same to and from all points on your line to any group in Texas?

Mr. Tilford: Yes, sir.

Mr. Cowan: And they are the same therefore to all these other mills as they are from Wydeck?

Mr. Tilford: Yes.

Mr. Cowan: And a man at the other mill has to pay the same as you do from Wydeck?

Mr. Tilford: Yes.

Mr. Cowan: And he haul- his lumber to your railroad?

Mr. Tilford: Yes:

Mr. Cowan: And haul- his logs to his mill?

Mr. Tilford: Just as the Saner-Whitman Company does, yes, sir.

3192 Mr. Saner: You handle United States mail?

Mr. Tilford: Yes.

Mr. Saner: And an express company operates over your line?

Mr. Tilford: The Wells Fargo Express Company; yes, sir.

Mr. Cowan: Of course, you get a division out of the lumber you haul for them the same as you do anything else you haul for anybody?

Mr. Tilford: Yes, sir.

Examiner Burchmore: Do you furnish your passengers ice water at the stations?

Mr. Tilford: We send them over to the lumber company when they want ice water.

Mr. Saner: We do at Mount Enterprise. I do not think we do at Wydeck or Caro. They have a public fountain there.

Mr. Andrews: I am not sure you made clear this matter of stock ownership. You first said the stock of the railroad company was owned by the owners of the Saner-Whitman Lumber Company?

Mr. Tilford: Yes, sir.

Mr. Andrews: In substantially the same proportion?

Mr. Tilford: Yes.

Mr. Andrews: Subsequently you made some remarks about
3193 Mr. Ragley owning some of it.

Mr. Tilford: Well, he is a minority stockholder.

Mr. Andrews: How much has he got?

Mr. Tilford: $7,500 worth.

Mr. Saner: That arises by reason of the fact that Mr. Ragley is my father-in-law and that that stock that he bought in down there offsets the lumber interest. I personally own the controlling interest in both companies and the stockholders are not identically the same in the railroad company as in the lumber company, but substantially so. In other words, I own the controlling interest.

Mr. Cowan: It is an identity of interests largely?

Mr. Saner: Well, yes, sir, but not absolutely. In other words, I own the controlling interest in both companies, although I do not own all the stock.

Mr. Cowan: I hope you make money out of both.

Mr. Saner: Thank you.

Mr. Andrews: Who carries your deficit?

Mr. Saner: We have none.

Mr. Andrews: You reported a deficit for the year ending June 30th, 1909, to the Commission.

Mr. Saner: Not by carrying it forward up to date. We had
3194 a profit in previous years, and that has been carried forward.

Mr. Andrews: The total result of continuous operation is to the good?

Mr. Saner: Yes, sir.

Mr. Andrews: Have you had any dividends?

Mr. Saner: No.

(Witness excused.)

Examiner Burchmore: That seems to be all the cases we have to hear at this time.

Mr. Cowan: Before we adjourn I want to say, and I think it expresses the sentiment of all the lawyers present for all sides, and I say it for the purposes of the record, because these gentlemen are not all here, that I believe we all feel that Commissioner Harlan and your Honor, the Examiner, have indulged in a great deal of patience, and much more hard work than the attorneys on either side would like to have seen exhibited, and I know you are entitled to the thanks of us all. I say that for the purposes of the record in which as I believe the gentlemen on the other side all join.

3195 Mr. Saner: I especially join in expressing my appreciation for your kindness in sitting over until this late hour to get us in the record at this time.

Examiner Burchmore: The hearing will now stand adjourned without date.

Whereupon, at 6:30 P. M., the hearing in the above matter was adjourned without date.

3196 At three P. M., pursuant to announcement, special examiner Burchmore, opened the hearing in the case of Jackson Railroad Company in an adjoining room where the following proceedings were had:

The Jackson Railroad Case.

Examiner Burchmore: We will now take up the case of the Jackson Railroad Company.

FRANKLIN W. HERR,, was called as a witness and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Where is your place of residence, and what is your occupation?

Mr. Herr: My place of residence is Jackson, La., and my occupation is a good deal like that of a—who is that gentleman this morning who was examined? I hold about six offices in the Jackson Railroad: President, Manager, Secretary, and Treasurer, etc.

Examiner Burchmore: Where is the Jackson Railroad?

Mr. Herr: It is a small tap line connected with the Yazoo & Mississippi Valley Railroad at McManus, La.

Examiner Burchmore: It has how many miles?

Mr. Herr: Four and six-tenths (4.6).

Examiner Burchmore: Single or double track?

Mr. Herr: Single track.

Examiner Burchmore: Standard or narrow gauge.

Mr. Herr: Standard gauge.

Examiner Burchmore: Rock ballasted?

Mr. Herr: No sir; just plain dirt ballast.

3197 Examiner Burchmore: It connects with no other road than the Y. & M. V.?

Mr. Herr: No sir, just the Yazoo & Mississippi Valley.

Examiner Burchmore: When was this road constructed?

Mr. Herr: In the winter of 1894-1895.

Examiner Burchmore: Were you at that time interested in the Company?

Mr. Herr: Yes I organized the Company and built it?

Examiner Burchmore: By whom was the Railroad actually constructed?

Mr. Herr: That means, of course, who produced the funds—put up the money.

Examiner Burchmore: Not the financing but the constructing.

Mr. Herr: Who actually did the construction work?

Examiner Burchmore: Yes.

Mr. Herr: I did sir.

Examiner Burchmore: In your own name?

Mr. Herr: No sir I did it as Manager of the Jackson Railroad. The Company was organized and chartered and I built the road myself—superintended the work in person.

Examiner Burchmore: Under a contract?

Mr. Herr: No sir no contracts were let at all.

Examiner Burchmore: When was the Railroad incorporated?

Mr. Herr: On April 15, 1893.

3198 Examiner Burchmore: What was its total authorized capital stock?

Mr. Herr: Thirty thousand Dollars.

Examiner Burchmore: How much of that was issued?

Mr. Herr: The total amount; three hundred shares were issued.

Examiner Burchmore: Were they paid for in Cash?

Mr. Herr: They were practically paid for in cash. They were issued for construction work. It was sold at a discount of 33⅓% to the stockholders and used in the construction of the work.

Examiner Burchmore: The cash was paid in?

Mr. Herr: Yes and used in construction work.

Examiner Burchmore: Is there any bonded indebtedness?

Mr. Herr: No. sir none at all.

Examiner Burchmore: What industries are there on the line?

Mr. Herr: None at all; not a one of them.

Examiner Burchmore: No mines?

Mr. Herr: Nothing.

Examiner Burchmore: No mills, Mr. Herr?

Mr. Herr: No, sir, no mills or manufactories or industries or enterprises of any character; it runs strictly through an

3199 agricultural country.

Examiner Burchmore: What towns are on the line?

Mr. Herr: Only one town, Jackson. McManus is not a town, but merely a point in the woods. It has a Post Office but that is the extent.

Examiner Burchmore: Has your Company a station at Jackson?

Mr. Herr: Yes sir.

Examiner Burchmore: A station building?

Mr. Herr: Yes., also at McManus.

Examiner Burchmore: Are those one room structures?

Mr. Herr: No sir; ware-room and passenger; white and colored passenger waiting room; also two story building with room overhead for private purposes.

Examiner Burchmore: Do you have platforms for the use of passengers at those points?

Mr. Herr: Yes sir, platforms in connection with the depot.

Examiner Burchmore: Any freight warehouses?

Mr. Herr: There are freight warerooms in both depots.

Examiner Burchmore: Scales?

Mr. Herr: Well, there are no platform scales; only the scales used in the depot. I have no wagon scales or things of that

3200 description, or car scales.

Examiner Burchmore: Lunch counter?

Mr. Herr: No sir.

Examiner Burchmore: Is there an agent, a regular station agent at Jackson?

Mr. Herr: Yes sir.

Examiner Burchmore: There all the time?

Mr. Herr: Yes sir.

Examiner Burchmore: Receives a regular salary?

Mr. Herr: Yes sir. The agency is in my name and so is the McManus agency, but I employ my assistant agents you understand. I really do a very little part of the agency work at Jackson, but the agency is in my name, and I am the responsible agent. You understand, the work is more than I could possibly perform.

Examiner Burchmore: What is the character of your traffic?

Mr. Herr: Standard Gauge laid with 60 pound rails leased from the Y. & M. V. Originally we bought the rails with which we built the road, but it was built with 35 pound relay iron but that was worn out and also impractical under the present loads—too light and we found it necessary to relay the track and leased the rails from the Y. & M. V. Railroad. I have a copy of the lease if you

3201 wish to refer to it.

Examiner Burchmore: On what terms did you lease that rail?

Mr. Herr: We lease that rail on 6% interest plan; that was all.

Examiner Burchmore: Is that a copy of the contract?

Mr. Herr: That is a carbon copy of it.

Examiner Burchmore: Are you willing to offer that in evidence?

Mr. Herr: I would not mind furnishing a duplicate, but that is the only copy I have. That was furnished by the Illinois Central. I said the Y. & M. V., but it is the I. C.

Examiner Burchmore: It owns the Y. & M. V.?

Mr. Herr: Yes sir that is correct.

Examiner Burchmore: The question I asked is, what is the character of your traffic?

Mr. Herr: Oh, I thought you said track. We haul passengers, mail, express and general freight traffic.

Examiner Burchmore: Taking these up one at time, what is the extent of your passenger traffic?

Mr. Herr: Well, the revenue——

3202 Examiner Burchmore: How many passengers travel on it a day?

Mr. Herr: I don't know, I can just answer that question. I have it all here in my state railroad Commission report if you will allow me to make use of it.

Examiner Burchmore: While you are looking, are you a former employee of the Y. & M. V. Railroad Company?

Mr. Herr: Yes sir.

Examiner Burchmore: Formerly an engineer?

Mr. Herr: Yes sir. What is the question you wanted to know—the revenue from passenger traffic?

Examiner Burchmore: That will do.

Mr. Herr: Three Hundred and Eighty-one Dollars and Twenty-five Cents ($381.25) for the year ending June 30, 1910.

Examiner Burchmore: What character of freight do you carry?

Mr. Herr: Just general freight traffic; merchandise, groceries, provisions and so on; usual freight business.

Examiner Burchmore: Are you personally interested in any of the freight that you carry; do you own any of it?

Mr. Herr: Not a cent's worth; not any interest whatever.

3203 Examiner Burchmore: What proportion of the Capital stock of the Company do you own?

Mr. Herr: About Eighty-one and two-thirds per cent, I believe it is.

Examiner Burchmore: Who owns the remainder?

Mr. Herr: It is owned by several individuals of Jackson La.

Examiner Burchmore: Who are they?

Mr. Herr: W. R. McCowan, W. S. Payne, Dr. Geo. H. Jones, Dr. T. H. Jones and P. C. Keller, I believe.

Examiner Burchmore: Are these gentlemen engaged in any manufacturing enterprise, lumbering enterprise?

Mr. Herr: None whatever.

Examiner Burchmore: Well, what was your purpose in constructing this road?

Mr. Herr: Well, I was acquainted at Jackson, La. a town five miles from the Y. & M. V. Railroad and knew that it had no rail facilities whatsoever. The State Insane Asylum was located there and I conceived the idea of building this track. Citizens had made one or two efforts to get the state to build the road on account of the State Asylum being located there and I went to work and

3204 raised the money.

Examiner Burchmore: You did it as a money-making venture?

Mr. Herr: I went into it for what I could make out of it, yes sir.

Examiner Burchmore: You transported apparently nearly four thousand tons of bituminous coal during this fiscal year, ending June 30, 1910. For whom was that carried?

Mr. Herr: The State Insane Asylum as well as that for my own furnaces, too. There is over three thousand tons of that belonging to the Insane Asylum.

Mr. Gutheim: The proposition is that you are running as a regular carrier railroad?

Mr. Herr: Yes sir.

Mr. Gutheim: And none of the stockholders you mention are connected with the road in any way or figure as officers on the road?

Mr. Herr: None at all, W. R. McCowan is a retail merchant. W. S. Payne——

Examiner Burchmore: Don't enumerate them all.

Mr. Herr: No sir.

3205 Examiner Burchmore: Has your Railroad been examined by any employee of the Commission?

Mr. Herr: There was, I think, about last Spring some gentleman——

Examiner Burchmore: Mr. Semple?

Mr. Herr: I don't know his name; at least, I don't remember. He came in and examined my tariff and I think took copies of some way bills from the impression book of the Y. & M. V. Railroad.

Examiner Burchmore: Do you have any joint rates?

Mr. Herr: Yes.

Examiner Burchmore: In connection with the Y. & M. V.?

Mr. Herr: Yes; I have a copy of my tariff there if you would like to refer to it.

Examiner Burchmore: Yes, the Y. & M. V.——

Mr. Herr: I haven't any statement there—I will state that the Jackson Railroad does not publish the tariff; it participates in the joint tariff, but I get the Y. & M. V. to print my tariff, to be sure that I am keeping within the legal requirements in getting them up in due form.

Examiner Burchmore: Does any officer of the Y. & M. V. Railroad own stock in your Company?

Mr. Herr: Not a dollar's worth.

3206 Examiner Burchmore: Then your Company has no connection, direct or indirect, with any manufacturing or lumbering or mining or other industries on or near its line?

Mr. Herr: Absolutely none sir.

Examiner Burchmore: It is, in your opinion, exactly the same as any other Railroad except that it is small.

Mr. Herr: That is correct, yes sir.

Examiner Burchmore: You run passenger trains.

Mr. Herr: I carry one coach—an accom-odation coach, and run a train each way each day except Sunday.

Examiner Burchmore: What is the basis of rate to and from Jackson? Are they made by adding an arbitrary to the Y. & M. V. rate?

Mr. Herr: Well, in one sense of the word, that is correct, but not exactly. You see, before this road was built, Jackson depended for its freight traffic principally upon wagons hauling from the river at Bayou Sara and the rates on my road are formed to meet the traffic, which make it necessary for the Y. & M. V. to allow me the principal portion of my rates, if that makes it plainer.

Examiner Burchmore: Well, suppose that these joint rates were finally cancelled and you had to charge your local rate for

3207 movements on your line, and add that rate to the rate charged by the Y. & M. V. to your line, you would still go on in business.

Mr. Herr: No sir, I would wind up business in thirty days absolutely.

Examiner Burchmore: Still, the people at Jackson have no other way to get their stuff?

Mr. Herr: They would go back to wagons; they would not be long doing it.

Examiner Burchmore: Then your competition is with wagons?

Mr. Herr: With wagons strictly.

Examiner Burchmore: Is anybody here representing the Illinois Central?

Mr. Brady: No sir. I am a legal representative but I am not here representing it.

Examiner Burchmore: Do you know anything about the Jackson Railroad.

Mr. Brady: Yes, I have heard——

Examiner Burchmore: It is an industrial railroad.

Mr. Brady: My information is that the witness has stated just like it is.

Mr. Herr: I have correspondence with the Interstate Com-
3208 merce Commission on that point if you want to have it.

Mr. Brady: I can elaborate that statement if you wish. I will say this, that I have never been over the road, but members of my family lived in Jackson, La., and I know in a general way that it is a small railroad connection between Jackson, Louisiana and the Y. & M. V. Railroad, furnishing facilities for Jackson, Louisiana.

Mr. Herr: The capital was raised in Jackson, Louisiana.

Examiner Burchmore: Is the road a financial success?

Mr. Herr: No sir, it has never been a paying proposition; the probabilities are it will not exist more than a few years longer.

Examiner Burchmore: Will you sell it out or go out of business?

Mr. Herr: There is nobody to sell it out to.

Examiner Burchmore: I think that is all, Mr. Herr.

3209 *Natchez, Columbia & Mobile Railroad.*

Examiner Burchmore: Who shall we take next?

Mr. Butterfield: R. B. Butterfield is here representing the Mobile Railroad extending from Norfield Mississippi westward.

Examiner Burchmore: What other roads are represented here?

Mr. T. Brady, Jr.: I represent the New Orleans and Natalbany and Natchez Railroad Company; I also represent the Greensburg and Southwestern Railroad Company.

Examiner Burchmore: What other railroads are present?

Mr. Keyes: I represent the Kentwood and Eastern.

Examiner Burchmore: The Attorney for the Fernwood and Gulf asked me to state that he was in his room preparing his statement and had not completed it but would come up as soon as he had completed it. Any other Company? Mr. Brady, I think we can take up your Company first.

Mr. Brady: I would like to call your attention that it will be fair to you, I think—to the regular appearance I have entered and I would like to read to you a paragraph or two from it so that you may understand clearly our position. It reads, after stating what it is, that its representative was telephoned of the hearing and the order of
Commissioner Harlan requiring it to appear, and in com-
3210 pliance with this order, it entered its appearance wholly unprepared to present its case. It is advised that, with the exception of two or three short lines in this territory, no short line Railroad Companies in the territory have been cited or ordered to appear at this hearing. The truth is, it believes, upon information, that it was inadvertently ordered to appear at this hearing, since the division of rates which it is receiving has not been cancelled, and it would be manifestly unjust and unfair to it to require it to appear and answer with the short line railroads west of the Mississippi River

which have had the matter under consideration for a great length of time.

That its belief that it has been ordered by inadvertence is further borne out by the fact that, with but two or three exceptions, no short line railroad east of the Mississippi river has been ordered to appear, although there are such railroads in said territory forming connections with the Illinois Central Railroad Company with the Louisville and Nashville Railroad Company, *with the Louisville and Nashville Railroad Company,* with the New Orleans and Northeastern Railroad Company, with the Mobile and Ohio Railroad Company, and
3211 many others too numerous to mention.

That it supposes that the division of rates with these short lines not cited will continue, or at least, they will continue until these short lines have been ordered to appear, and are given a hearing, since, without a hearing, to cancel that division of rates, would be a manifest injustice.

That it is but fair to it that it should have its hearing with short line railroads east of the Mississippi river after it has had time to prepare its case and that it should not be forced into a hearing with these railroads involved in the controversy in the above styled cause.

That it would be unfair to include it in an order issued against other short line railroads in the above styled cause, cancelling a division of rates, since to do so would place it upon a basis with roads west of the Mississippi river not cited, while those east of the Mississippi river would not be upon such a basis and would continue to enjoy a division of freight rates when it would be denied such rights.

That it has no objections to making such a showing as it
3212 can at the present hearing, but it protests against being precluded from making a further showing, should other short lines east of the Mississippi river, not ordered to appear at this writing, be in the future allow a hearing.

That it protests against being included in any order against the railroad in the above styled cause and insists that it is entitled to whatever hearing may be hereafter granted to short line railroads east of the Mississippi river, for the reason that the case which it presents has been hastily prepared, some of its important officers being in the North, so that it really is unable to make the showing to which it is entitled, but will make such showing and answer as it can, with the privilege of appearing and completing it, if a further hearing is extended to short line railroads east of the Mississippi river not ordered to appear at this meeting.

That its participation in the freight rates with the trunk lines has never been cancelled, and in equity, should not be; especially should no change be made as to it as long as short line roads east of the Mississippi river continue to share in a division of rates.

3213 Therefore, it prays that this hearing be not declared final as to it, and upon a future final hearing, that no change be made.

Respectfully submitted,

NATCHEZ, COLUMBIA AND MOBILE RAILROAD COMPANY,

By Attorney T. BRADY, JR.

The answer so offered and identified as Exhibit #1, was received in evidence and thereupon marked "Defendant's Exhibit #1, received in evidence December 12th, 1910," page 3213, and is attached hereto.

Examiner Burchmore: You say you filed that objection?

Mr. Brady: I am asking to file it.

Examiner Burchmore: On behalf of what?

Mr. Brady: The Natchez Columbia and Mobile Railroad Company. I do not want to appear to disobey the Commissioner's request. He asked us to appear and telephoned me to come. That petition is sworn to. We are perfectly willing to appear, as far as we can. If you will allow me to speak to Commissioner Harlan, I would like to speak to him upon the subject because I think it is entirely fair.

Examiner Burchmore: Then you protest on behalf of your company against going on with the hearing?

Mr. Brady: No sir, I say I am willing to have such hearing
3214 as we are able to hear. All I ask is this. Mr. Examiner is this; in the future, if you call the Railroads east of the river—this has been going on west of the river for two years and I had no knowledge of what it was and my Company had no knowledge of what it was——

Examiner Burchmore: You have knowledge of what you are and what you are doing?

Mr. Brady: Sure.

Examiner Burchmore: You don't need to know what the railroads west of the river are doing.

Mr. Brady: That is the point; we need time in which to prepare and that is rather short and we want to be allowed this privilege only in case you cite other roads east of the river, and in case our case is not made out to our satisfaction, that we may continue to press our case then.

Examiner Burchmore: This objection will be received and laid before the Commission for its action, but that does not mean however that it is filed or granted. I have no authority to take any action on it except to retain it. Are you ready now to go on?

Mr. Brady: With what we have got, we will be delighted to accom-odate you.

3215 Examiner Burchmore: It is not an ac-om-odation to me. It is your opportunity to be here in an investigation by the commission into the practices and methods of so-called tap lines.

Mr. Brady: We want to do this: we want to submit our case as far as we can, with your permission, and in case other points east of the river are allowed——

Examiner Burchmore: You may present your case without such permission, but with your request for such permission noted in the record.

Mr. Brady: That is all right.

Examiner Burchmore: What witness have you here?

Mr. Brady: Mr. Butterfield.

R. B. BUTTERFIELD was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: What is your occupation, Mr. Butterfield?

Mr. Butterfield: General Manager of the Natchez, Columbia and Mobile Railroad, and Secretary-Treasurer of the Butterfield Lbr. Co. of Norfield, Miss., I am Secretary-Treasurer of both companies in the executive department.

Examiner Burchmore: Where is the line of the Natchez Columbia and Mobile Railroad—Where does it run?

3216 Mr. Butterfield: It runs from Norfield Mississippi to a point one hundred and seventeen miles north of New Orleans on the main line of the Illinois Central Railroad in an easterly direction.

Examiner Burchmore: In an easterly direction how far and to what point?

Mr. Butterfield: The main line is about fourteen miles long. It has two lateral branches. One of them is about—The main line runs from Norfield Mississippi to what is called Main Line Junction, fourteen miles east of Norfield and it has a branch from that point in a north-easterly direction to a point called Old Camp, which is eight miles—practically nine miles long, and to a point in a southerly direction, seven and a half miles long.

Examiner Burchmore: What is the termination of that line?

Mr. Butterfield: Its termination is a name given—the switch where the train is made up—called Furlough switch.

Examiner Burchmore: Furlough Switch?

Mr. Butterfield: Yes sir.

Examiner Burchmore: This Railroad is controlled by the Butterfield Lumber Co.

Mr. Butterfield: The stockholders of its company are the
3217 same and own in the Railroad Company a pro rate of stock in the same pro rata of stock as in the lumber Company.

Examiner Burchmore: Where are the mills?

Mr. Butterfield. At Norfield.

Examiner Burchmore: The Mills are at Junction Point?

Mr. Butterfield: Yes sir. Norfield.

Examiner Burchmore: When was this Railroad incorporated?

Mr. Butterfield: In 1891, I forget the exact date; I think June 21st. I can give it to you if you want.

Examiner Burchmore: The year will suffice. When was the line constructed?

Mr. Butterfield: It was incorporated just before the construction started or they started to construct immediately after incorporation.

Examiner Burchmore: At that time, how far was it constructed?

Mr. Butterfield: As soon as they started to construct it at all, we built five miles as fast as they could build it.

Examiner Burchmore: And that was to a temporary terminus?

Mr. Butterfield: Yes sir.

Examiner Burchmore: When was the mill at Norfield opened up?

Mr. Butterfield: In January 1891, I think; the last of
3218 January or first of February, I will not be sure.

Examiner Burchmore: The construction and operation of the Mill and Railroad were practically s-multaneous?

Mr. Butterfield: Yes sir.

Examiner Burchmore: The railroad was a part of the Mill facilities at that time?

Mr. Butterfield: The Railroad, of course, was a part of the mill facilities, but a distinct corporation. At the time of the incorporation of the Railroad, a great many outside people were interested in the incorporation, but have since been bought out until the holdings are identical with the Railroad Company—the lumber company I mean to say.

Examiner Burchmore: Describe a little more fully who the original organizers of this railroad were?

Mr. Butterfield: The original organizers of the Railroad were the heads of the Lumber Company, with a number of local people.

Examiner Burchmore: These local people were minority holders?

Mr. Butterfield: Yes, and have since been bought out.

Examiner Burchmore: Do these local people own timber lands?

3219 Mr. Butterfield: No longer in that neighborhood. They came from neighboring towns.

Examiner Burchmore: Then the minority holdings were in the hands of persons who had no interest in the lumber business in that region.

Mr. Butterfield: None whatever.

Examiner Burchmore: The original line was five miles long. Were there any tap lines or spurs beyond that?

Mr. Butterfield: There was a tap line, I think that ran at that time—I think it was on my connection—for seven miles long, at the end of that five miles.

Examiner Burchmore: And that seven miles was subsequently taken over by the Railroad Company?

Mr. Butterfield: I cannot really say after that seven miles, but I know that the Railroad Company owns everything in the shape of railroad that is there, so it must have been.

Examiner Burchmore: Are not the logging camps beyond Furlough? Are there not?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Owned by the Railroad Company?

Mr. Butterfield: Yes sir.

Examine- Burchmore: Operated by the Railroad.

3220 Mr. Butterfield: Yes sir.

Examiner Burchmore: Then, as I understand you, when you state that they came to Furlough as a terminus——

Mr. Butterfield: Of the main line. These logging spurs are temporary tracks that are put down and taken up, as soon as the timber which is contiguous to them is logged out.

Examiner Burchmore: But they are owned and operated by the Railroad Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: The ground on which they were laid is not owned——

Mr. Butterfield: No sir, belongs to the Lumber Company, under the Railroad Company's operation. The Lumber Company have a compensation for it.

Examiner Burchmore: By whom is the right of way of the line owned—that land?

Mr. Butterfield: By the Railroad Company.

Examiner Burchmore: In fee?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What is the weight of rails?

Mr. Butterfield: 56 or 60 pound.

Examiner Burchmore: In the entire Main Line?

3221 Mr. Butterfield: Yes sir.

Examiner Burchmore: Was that rail purchased entirely by the Railroad Company in the open market or how?

Mr. Butterfield: To eliminate such expenses as possible—the Railroad Company is operated as an entirely distinct business corporation, but to eliminate expense, the general officers of each are the same officers; some of the, the Railroad employees—the railroad employs some of the office force of the Butterfield Lumber Co. and the purchasing agent of the Butterfield Lbr. Co. is the purchasing agent for the Railroad company and acts along this line as the fiscal agent of the Railroad company in purchasing.

Examiner Burchmore: He purchased the rail?

Mr. Butterfield: Yes sir.

Examiner Burchmore: And turned it over to the Railroad?

Mr. Butterfield: The railroad Company does not purchase anything. The Butterfield Lbr. Co. purchased it and turned it over to the Railroad company at the invoice price.

3222 Examiner Burchmore: The Lumber Company receives no commission?

Mr. Butterfield: Nothing whatever.

Examiner Burchmore: Has the Natchez, Columbia and Mobile Railroad any station building?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Where are they?

Mr. Butterfield: We have a station with an agent at Ruth, Mississippi.

Examiner Burchmore: Where is Ruth?

Mr. Butterfield: Ruth is a point ten miles east of Norfield. We have a station building an- agent at Verna, Mississippi, sixteen miles east of Norfield.

Examiner Burchmore: That is on one of these lateral lines?

Mr. Butterfield: On the Northeast Lateral Branch and another at Topeka, Mississippi, which is 20 miles east of Norfield. We have a ticket agent at Norfield Miss. at the Illinois Central depot. In fact, we have a joint ticket agent there and the freight agent is — the Railroad Company's office at Norfield.

Examiner Burchmore: In the Illinois Central Railroad

3223 Company Office?

Mr. Butterfield: No sir, the N. C. & M.

Examiner Burchmore: That office is a common office with the Lumber Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: You use the Illinois Central Station at Norfield?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What is the distance from the mill in Norfield to the line of the Illinois Central?

Mr. Butterfield: Practically we are right on it, but the way the tracks are laid out, I suppose it is a quarter of a mile.

Examiner Burchmore: What distance do cars move over this Railroad to go from the Mill to the Illinois Central?

Mr. Butterfield: The Illinois Central has built a long passing and interchange track and the N. C. & M. Railroad has a switching crew which receives all of the cars for it and for the Lumber Company and delivers all the cars for it and the Lumber Company to the Illinois Central R. R. Co.

Examiner Burchmore: On this Interchange track?

Mr. Butterfield: Yes. The movement of the cars would average probably half a mile.

3224 Examiner Burchmore: The movement of the cars by the——

Mr. Butterfield: By the N. C. & M.

Examiner Burchmore: The officers of the Lumber and Railroad Company, you state, were identical?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What salaries are paid to the officers of the Railroad Company?

Mr. Butterfield: I think it amounts to $3,000.00.

Examiner Burchmore: For all of them?

Mr. Butterfield: For all four.

Examiner Burchmore: Do they perform any substantial service for the railroad Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Does their salary from the Railroad Company compare with their salary from the lumber company in the same proportion that their services do?

Mr. Butterfield: That was the aim in granting the salaries; I think I can state that it does.

Examiner Burchmore: What is the principal traffic of this Company?

Mr. Butterfield: The principal traffic is the haul for the Butterfield Lbr. Co. of logs.

Examiner Burchmore: Are these Hardwood Logs, Hardwood lumber?

3225 Mr. Butterfield: No sir, Yellow Pine.

Examiner Burchmore: No Hardwood?

Mr. Butterfield: Very little; there is some.

Examiner Burchmore: Does the Natchez Columbia and Mobile Railroad have joint rates on lumber in effect in conjunction with the Illinois Central to interstate destination?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What are those rates? Are they the same

in amount as the Junction point rate of the Illinois Central from Norfield?

Mr. Butterfield: No sir, the rate on lumber on the N. C. & M. is two cents higher than the Junction point rate into central traffic or eastern traffic line territory only.

Examiner Burchmore: To other points the rates are the same?

Mr. Butterfield: To other points, the rate would be a combination of the two locals.

Examiner Burchmore: Then you only have through rates to this territory?

Mr. Butterfield: That is all.

Examiner Burchmore: What is the division according to
3226 your tariff?

Mr. Butterfield: Two cents a hundred.

Examiner Burchmore: Then practically, you get the same result in the operation of your road as a common carrier, that you would if operated as a private carrier?

Mr. Butterfield: Well, not hardly. In the first place, the division of rate is a help to the Railroad inasmuch as it gets its full pro rata any way. In the second place, the lowering of the rate—we happen to have on our line of road several small mills which have contributed a great deal to the revenues of the road and it is a fiscal necessity in that portion of the business to obtain our regular rate for lumber and to tack the two cents which would be necessary on top of the regular rate; if it was to be a combination of the two, it would be nearly prohibitive to any industry that might be put up on the road.

Examiner Burchmore: I don't believe I understand that. On a shipment originating at a point on your line and moving to Central Freight Association destination?

Mr. Butterfield: Yes sir.

Examiner Burchmore: The rate charged at two cents per
3227 hundred pounds higher than on like shipments originating on Illinois Central rails from Norfield?

Mr. Butterfield: Yes sir.

Examiner Burchmore: You receive that two cents?

Mr. Butterfield: No sir.

Examiner Burchmore: The rate is two cents higher?

Mr. Butterfield: Yes sir, we receive four cents out of that. We receive that two cents and two cents more at our division from the Illinois Central.

Examiner Burchmore: Then your standard division is four cents per hundred pounds?

Mr. Butterfield: Yes sir.

Examiner Burchmore: These joint through rates carry with them a milling-in-transit privilege.

Mr. Butterfield: No sir, not that I know of.

Examiner Burchmore: What rate is charged on the movement of logs into the mill from the woods?

Mr. Butterfield: $2.00 per thousand feet.

Examiner Burchmore: And the joint rate applied on the lumber applies only from the mill at Norfield—not back from the woods?

Mr. Butterfield: Joint rate on lumber?

Examiner Burchmore: Yes.

3228 Mr. Butterfield: I think that the tariff of the Illinois Central reads that "it shall retain through the claim department of the Ilinois Central two cents per hundred pounds on lumber manufactured from logs brought in over the Natchez, Columbia and Mobile Railroad" and two cents per hundred on lumber that originates on the Illinois Central, so that applied to lumber and logs both.

Examiner Burchmore: Then, the joint rate from point of origin to destination really covers logs into the mill and the lumber out of the mill.

Mr. Butterfield: Yes, sir.

Examiner Burchmore: Will you please describe in your own way the method of billing and collecting the charges on the movements of logs that originate in the woods on your line and is milled at your mill at Norfield and moves to interstate destinations? Just how it is billed and handled?

Mr. Butterfield: There is a scaler employed jointly by the Lumber Company and the Railroad Company who scales the logs on the car after they are put on the cars by the Lumber Company and he makes up a report daily which is sent in daily and charged

3229 daily by the Railroad Company to the Lumber Company. There is a settlement between the Railroad Company and the Lumber Company at the end of each month on that scale. In addition to that, as a check, the train conductor of the train that handles the logs checks over the car and the number of logs he has on the car. He takes no scale.

Examiner Burchmore: Let me ask you several questions about that. The Logging car is placed for loading in the woods?

Mr. Butterfield: Yes sir.

Examiner Burchmore: By the Railroad Company's employees?

Mr. Butterfield: Yes sir.

Examiner Burchmore: And by its engine. It is then loaded with logs by employees of the lumber Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: When loaded, the Railroad company takes the train load of logs and hauls them to the Mill?

Mr. Butterfield: Yes sir, there is a switching movement in the woods first. The log loaders run out on these spurs and the locomotives that handle the log loaders take the cars out to the side track or delivering track, to the Main line, where the train is made up and from there, the regular movement starts.

Examiner Burchmore: Then, upon the arrival of a train

3230 of logs at the Mill, who unloads it.

Mr. Butterfield: The employees of the Railroad Company unload it.

Examiner Burchmore: Into what?

Mr. Butterfield: Into a Pond. We have skids furnished by the Lumber Company.

Examiner Burchmore: When the logs have been cut at the mill, they are loaded into cars by the Mill employees?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What cars are they loaded into?

Mr. Butterfield: The cars that the Illinois Central furnishes.

Examiner Burchmore: These cars that the Illinois Central Company furnishes, are taken, however, that the Natches, Columbia and Mobile Railroad employees from the interchange track and brought up empty for loading?

Mr. Butterfield: Yes sir.

Examiner Burchmore: After being loaded, the car is switched out to the Illinois Central?

Mr. Butterfield: Yes, sir, and weighed.

Examiner Burchmore: Have you a track scale?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Weighed by your employee, and then goes out——

3231 Mr. Butterfield: Weighed by the representative of the Southern Weighing and Inspection Bureau.

Examiner Burchmore: That is, as to the physical handling of the freight?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Now, as to the billing. Is any Bill of Lading issued at the time the logs leave the wood-?

Mr. Butterfield: No sir.

Examiner Burchmore: When is the first Bill of Lading?

Mr. Butterfield: For lumber manufactured; the first Bill of Lading for lumber manufactured from these logs by the lumber Company.

Examiner Burchmore: It is signed by the agent of the Railroad Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: And issued when the lumber leaves the Mill?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Is there any way bill, or car way bill, accompanying the logs into the Mill?

Mr. Butterfield: No, just the train sheets.

Examiner Burchmore: What are these train sheets?

3232 Mr. Butterfield: I think I have a sample here. If you will give me permission to open this grip, I will give you one now (witness hands a train sheet to the commissioner), I can leave that on file.

Examiner Burchmore: Who fills out that train report?

Mr. Butterfield: A joint employee; that is, the scaler employed by both Companies.

Examiner Burchmore: He fills it out in the woods?

Mr. Butterfield: Yes sir; just right as he scales it; immediately after he scales it.

Examiner Burchmore: He hands it to the conductor?

Mr. Butterfield: He mails them to the company entirely foreign to the conductor.

Examiner Burchmore: The conductor does not take it from him?

Mr. Butterfield: No sir.

Examiner Burchmore: In one sense, it accompanies the car?

Mr. Butterfield: Yes sir.

Examiner Burchmore: It is mailed at the same time that the car moves?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Now, when lumber is shipped from
3233 the Mill, the Bill of Lading is issued signed by the N. C. & M. Railroad Agent?

Mr. Butterfield: No sir. The Illinois Central Agent. It is billed directly to the Illinois Central. The N. C. &. M. does not do anything but make switching movement of that and put it out on the Illinois Central receiving track for which they receive a switching charge.

Examiner Burchmore: What is shown as the point of origin on that Bill of Lading?

Mr. Butterfield: Norfield, Mississippi.

Examiner Burchmore: Does that Northfield mean Northfield on the Illinois Central?

Mr. Butterfield: It means Norfield on the Illinois Central. You have it "Northfield," it is Norfield.

Examiner Burchmore: That is immaterial. When the car leaves the mill, there is nothing on the car to indicate to your train employees where the car is going?

Mr. Butterfield: Nothing whatever. There is a switching list handed from the office to the switching employees in the morning. This is simply a switching line—to put such and such a car out on
the track, and the weighmaster—the only record that is kept
3234 of that outside of the switching master's report is that the weigh master furnishes the Illinois Central Agent with the weights on the car.

Examiner Burchmore: Does that Bill of Lading issued by the Illinois Central Agent at Norfield indicate on its face that the lumber has come from there?

Mr. Butterfield: That the logs have come from there?

Examiner Burchmore: No, the Lumber?

Mr. Butterfield: No sir, not lumber; there is no lumber that the Butterfield Lumber Company handles that comes from there

Examiner Burchmore: It comes from there so far as the Illinois Central is concerned?

Mr. Butterfield: That lumber is handled in an entirely different manner from the Logs.

Examiner Burchmore: We are not talking about lumber.

Mr. Butterfield: I understood you to say Lumber. There is nothing on the Bill of Lading to show that the logs come from beyond Norfield.

Examiner Burchmore: That the logs come from beyond Norfield on the Illinois Central, as an Illinois Central point?

Mr. Butterfield: Or as an N. C. & M. point—any point.

3235 Examiner Burchmore: The two points are identical on the two Railroads?

Mr. Butterfield: No sir, they are considerably different. I don't think I caught quite what you want to get at.

Examiner Burchmore: I am trying to understand the practice. The practice seems to be quite different from that followed by points west of the river, and I am trying to find out what the practice is in billing a movement east from there?

Mr. Butterfield: Why, the tariff issued by the Illinois Central Railroad on this traffic—on the two cent pro rata on the logs—is just simply—says that short lines shall receive a pro rata on lumber manufactured from logs. I am giving you this to the best of my recollection, brought in and handled by the N. C. & M. Railroad Company, and shall be paid thru the claim department at the end of the month. At the end of the month, we make up a sworn statement which we send to the Illinois Central Railroad of the shipments—daily shipments of logs—receipt of logs from the N. C. & M. Railroad for the previous month, which we file in the shape of a claim with the Illinois Central Railroad Agent.

Examiner Burchmore: The N. C. & M. Railroad Company
3236 files this claim?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Not the Lumber Company?

Mr. Butterfield: No sir.

Examiner Burchmore: That tariff published refers to the connecting lines?

Mr. Butterfield: Yes sir.

Examiner Burchmore: That seems to be an unusual method?

Mr. Butterfield: It is the only method we use.

Examiner Burchmore: Your Company receives a division of four cents per hundred pounds?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Out of the joint rate published from Norfield?

Mr. Butterfield: Oh, no. The joint rates are to be from points on the line. We get two cents division and two cents pro rata from the Illinois Central.

Examiner Burchmore: This rate of two cents applies from Topeka and Old Camp, etc.

Mr. Butterfield: Yes sir.

Examiner Burchmore: What service does your Company render under this four cent division? What does it do that it should be paid four cents?

3237 Mr. Butterfield: It hauls the logs or hauls the lumber from the point of origin to the Illinois Central Railroad.

Examiner Burchmore: But it hauls no lumber from Topeka or Old Camp?

Mr. Butterfield: It hauls lumber from other mills, not the Butterfield Lumber Company.

Examiner Burchmore: I am speaking of the Butterfield Lumber Company shipments.

Mr. Butterfield: It hauls their logs for which it receives two cents per thousand and two cents per hundred from the Illinois Central as its proportion of the through rate.

Examiner Burchmore: It does not seem to me that that last statement is quite accurate. It receives two cents from the Lumber Company for moving logs into the mill?

Mr. Butterfield: Yes sir.

Examiner Burchmore: It credits that two cents on the subsequent freight charged does it not?

Mr. Butterfield: The two cents that we receive as refund is given back. We get two cents a thousand flat for hauling the lum-
3238 ber, and the claim is turned over to the Lumber Company.

Examiner Burchmore: What does your Railroad Company receive in the end after the transaction is entirely closed and completed and the claim paid by the Illinois Central Railroad? What does the N. C. & M. Railroad Company receive for hauling logs into the mills, and lumber out for the Butterfield Lumber Company?

Mr. Butterfield: It receives two cents a thousand for hauling logs, and receives a switching or rental charge in the wood, and receives a switching charge at the mill for handling loaded cars and weighing them.

Examiner Burchmore: How about the two cents division?

Mr. Butterfield: We get the two cent division as a matter of course, but that is a rebate—I misused the word pro rata—and it is given back.

Examiner Burchmore: That goes back to the Lumber Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What two cents is that?

Mr. Butterfield: The two cents we get from the Illinois Central Railroad Company.

Examiner Burchmore: Is that what the Illinois Central tariff provides?

3239 Mr. Butterfield: No sir, I don't think it is.

Examiner Burchmore: We will put it different. The two cents you get from the Illinois Central Railroad goes to the Butterfield Lumber Company in case of their shipments? In case of shipments handled for some other mill, "John Smith" where does the two cents go that you get from the Illinois Central Railroad Company?

Mr. Butterfield: It goes straight to the N. C. & M.

Examiner Burchmore: It seems to me that the owners of the Railroad receive a little better advantage from this rate?

Mr. Butterfield: No we have never hauled logs for anybody else that went into any traffic territory where we get this pro rata. We haul lumber for them, but our rate on lumber is two cents higher than the rate from Norfield, and the two cents which we receive from the Illinois Central Railroad Company just makes up our proportion of four cents.

Examiner Burchmore: What is the rate from Old Camp to the Ohio River?

Mr. Butterfield: I don't know sir.

Examiner Burchmore: Or to some other representative point?

3240 Mr. Butterfield: The rate from Norfield to Chicago is twenty-four cents. From Old Camp to Chicago would be twenty-six cents.

Examiner Burchmore: Now what is your method or rule as to the offsetting of logs in and lumber out? How many thousand pounds of logs make ten thousand pounds of lumber? What is the proportion?

Mr. Butterfield: I don't know that I could tell you. That is pretty hard. I figure that logs weigh in the neighborhood—Long Leaf Yellow Pine Logs—in the neighborhood of ten pounds to the foot, fresh cut.

Examiner Burchmore: Well, suppose a certain quantity of logs leaves the spurs in Old Camp, and moves to the mill, and they are there made into lumber by the Butterfield Lumber Company, and exactly a car load comes from that quantity of logs, and that car load of lumber is shipped to Chicago, and assuming that all the freight charges of that lumber are paid by the Lumber Company, and nobody else pays any charge on it, how much will the Butterfield Lumber Company have paid in the end to get that shipment to Chicago?

Mr. Butterfield: That is a pretty hard proposition to figure
3241 out.

Examiner Burchmore: I mean, in cents per ton and per car?

Mr. Butterfield: Well, you figure $2.00 a thousand feet and one thousand feet will weigh in the neighborhood of ten thousand pounds. That will be about two cents a hundred pounds, the equivalent of two cents a hundred, or just about that.

Examiner Burchmore: They pay that to get the logs into the Mill?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What more do they pay?

Mr. Butterfield: The switching charge at Norfield.

Examiner Burchmore: The Lumber Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Does not that Illinois Central Railroad absorb that?

Mr. Butterfield: No sir.

Examiner Burchmore: What is that switching charge?

Mr. Butterfield: One Dollar.

Examiner Burchmore: What else do they pay?

Mr. Butterfield: The other might really be considered—I
3242 don't think you could consider it a logging operation for the operation that we do for them in the woods is to get the trains made up, and delivered to our main line.

Examiner Burchmore: How much is that?

Mr. Butterfield: It all depends, it is not a fixed rate. We do this work for them and charge them 10% over and above the cost of the supervision and different charges. That charge is adjusted at the end of each year, besides that, they pay the Illinois Central Railroad, twenty-four cents a hundred pounds.

Examiner Burchmore: That is the rate from Norfield?

Mr. Butterfield: Yes sir.

Examiner Burchmore: They pay twenty-four cents?

Mr. Butterfield: Yes sir, and the equivalent of two cents for hauling the logs, and the switching charge of $1.00.

Examiner Burchmore: Then they pay 26¢ per hundred?
Mr. Butterfield: Yes sir.
Examiner Burchmore: Plus $1.00 for switching?
Mr. Butterfield: Yes, sir.
Examiner Burchmore: Plus something up there in the woods?
3243 Mr. Butterfield: That is charged, I happen to know, directly to their logging expenses.
Examiner Burchmore: What rebate or refund do they get out of that 26 cents?
Mr. Butterfield: Two cents.
Examiner Burchmore: Out of twenty six cents, they get two?
Mr. Butterfield: No, the Lumber Company gets nothing from that twenty six cents.
Examiner Burchmore: Then instead of saying that they pay the Illinois Central Railroad twenty-four cents to go to Chicago, you mean 26 cents, and subsequently you get two cents back.
Mr. Butterfield: Yes sir, That is just exactly what I mean.
Examiner Burchmore: Now, I think I understand you. Now, suppose someone else in the woods—rather portable saw mills in the woods——
Mr. Butterfield: There are quite a few small saw mills I suppose you might call them portable. They take them up and move them once in a while.
Examiner Burchmore: You mention one?
3244 Mr. Butterfield: The Busby Lumber Company.
Examiner Burchmore: They cut their logs into lumber in the woods?
Mr. Butterfield: Yes, sir.
Examiner Burchmore: What do they pay to get a carload of lumber to Chicago?
Mr. Butterfield: Twenty-six cents.
Examiner Burchmore: Then they pay $1.00 less than you pay—you pay 26 cents plus $1.00 for switching?
Mr. Butterfield: Yes sir. We absorb the switching charge on inter-charge by their freight.
Examiner Burchmore: Now, I have gotten, I think, at what I was trying to get. What does the N. C. & M. receive on these movements?
Mr. Butterfield: For Lumber, four cents a hundred.
Examiner Burchmore: Plus $1.00 a car in the woods?
Mr. Butterfield: From the Butterfield Lumber Company.
Examiner Burchmore: I think that is plain. Perhaps we are a little dense about this, but this refund of two cents in the case of the Butterfield Lbr. Co. shipments, can you——
3245 Mr. Butterfield: I think some of the Illinois Central people here have got a copy of that tariff here. If they will get that——
By Mr. Brady: Mr. Benway, can you give us a copy of that tariff?

Mr. Benway: No I have a local tariff. I will get a copy of that tariff.

Examiner Burchmore: The point is this. In the case of the Butterfield Lbr. Co. shipments, you state that they paid something in the woods for getting the cars together, and then two cents, about?

Mr. Butterfield: The equivalent of two cents.

Examiner Burchmore: To get the logs up to the Mill.

Mr. Butterfield: Yes sir.

Examiner Burchmore: And $1.00 for switching at the Mill?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Then, as an original proposition, they pay twenty-four cents to the Illinois Central Railroad?

Mr. Butterfield: Yes sir.

Examiner Burchmore: That makes a total of twenty-six cents?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Plus $1.00?

3246 Mr. Butterfield: Yes sir.

Examiner Burchmore: Now, subsequently, the Illinois Central entertains a claim and refunds two cents?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Where does that two cents go?

Mr. Butterfield: To the Railroad Company to make the equivalent of four cents on handling.

Examiner Burchmore: The Railroad Company receives that two cents refund, and retains it?

Mr. Butterfield: Yes sir.

Examiner Butterfield: It does not pass to the Butterfield Lumber Company.

Mr. Butterfield: No sir. That two cents is to make up the equivalent of four cents, which we are to get and do get.

Examiner Burchmore: I don't think that is just what you said before.

By Mr. Brady: He did not say that because he did not understand you. I didn't want to interrupt. He knew he was in error at the time.

Examiner Burchmore: The result of it all is that aside from any participation by the Railroad Company the Butterfield Lum-

3247 ber Company pays exactly the same amount as any other shipper on the line, plus $1.00, and that $1.00, it pays for extra services.

By Mr. Brady: That is the exact situation, precisely so; the Lumber Company, Mr. Examiner, does not participate in any division of rate whatever in this matter, but the Railroad Company does. The Butterfield Lumber Company is not preferred in any way. It gets extra service for the extra $1.00 that it pays.

Examiner Burchmore: Where does the Busby Lumber Co. get their logs?

Mr. Butterfield: They haul them with the teams from different distances from their mills, contiguous to their mill. There mill is located on a side track.

Examiner Burchmore: Does the N. C. & M. Railroad Company charge them anything for taking the cars off that track?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Then the Railroad Company switches for them?

Mr. Butterfield: Yes, it is a very short switching service.

Examiner Burchmore: Are there any other mills on your line in the woods?

Mr. Butterfield: Yes sir.

Examiner Burchmore: They all get their logs by team?

Mr. Butterfield: Yes sir.

3248 Examiner Burchmore: Does the Butterfield Lbr. Co. get any of its logs by team?

Mr. Butterfield: No sir, none whatever. We have been operating since 1891, and all logs that are near the mill have gone.

Examiner Burchmore: Then, when you want to move a log from a particular tract, you build a spur line?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Why don't the other mills build spur lines?

Mr. Butterfield: They have not got the capital, I suppose.

Examiner Burchmore: The Natchez, Columbia and Mobile Railroad Company goes to the expense of going and getting their logs for the Butterfield Lumber Company? Why should it not meet a part of the expenses in getting logs for these other mills?

Mr. Butterfield: It meets none of the expenses, it is compensated for everything.

Examiner Burchmore: At the 26 cent rate?

Mr. Butterfield: No sir, in addition to that.

Examiner Burchmore: Then I don't understand.

3249 Mr. Butterfield: It is entirely separate. That is an entirely separate operation. The Railroad Company owns all the steel and motive power we have and in fact all of the railroad stuff and at the end of the year all of the operations in the woods up to the switching with the main line trains—where the logs are billed from in billing—is figured at and a charge made as I understand—a 10% charge added to the cost of the railroad company for the Lumber Company. It is entirely an outside operation.

Examiner Burchmore: As I understand the Railroad Company takes the logs almost from the tree without expense other than the 26¢ rate to Chicago.

Mr. Butterfield: That twenty-six cent rate covers only from the switch where the train is made up and the main line train takes it. Anything beyond that is covered by what is reported in the annual report to the commission as outside operations.

Examiner Burchmore: What does that outside operation cost or amount to on a car load of lumber or logs?

Mr. Butterfield: I really cannot say. Last year it amounted to something over $19,000.00.

3250 Examiner Burchmore: On how many thousand feet of logs?

Mr. Butterfield: Well, something like 33,000,000.

Examiner Burchmore: It costs these other Companies a great deal more to team their logs in than that, does it not?

Mr. Butterfield: I don't know, I suppose it does.

Examiner Burchmore: Did you state the total capitalization of the Railroad Company?

Mr. Butterfield: No sir.

Examiner Burchmore: What is it?

Mr. Butterfield: $1,000,000.00.

Examiner Burchmore: What is outstanding?

Mr. Butterfield: $900,000.00 is outstanding, and $100,000.00 is held as Treasury stock.

Examiner Burchmore: What is the total mileage of the Railroad?

Mr. Butterfield: We have 34 miles on main line and main branches.

Examiner Burchmore: That is $30,000.00 a mile?

Mr. Butterfield: That is the capitalization, yes sir.

Examiner Burchmore: Are there any bonds?

3251 Mr. Butterfield: None.

Examiner Burchmore: Any indebtedness?

Mr. Butterfield: None whatever.

Examiner Burchmore: Except current liabilities?

Mr. Butterfield: None whatever.

Examiner Burchmore: What equipment does the Road own?

Mr. Butterfield: We own three 60-ton Baldwin 10 wheel fast freight type locomotives; one 40-ton 6 wheel, Grant switcher; one 72-ton and one 74-ton Shay Gear Type Locomotive. There are two passenger cars, a baggage car, three box cars. I think there are 10 flat cars for handling lumber along the line, and about 75 log cars.

Examiner Burchmore: Does it lease any additional equipment?

Mr. Butterfield: No sir.

Examiner Burchmore: It owns all of that equipment outright?

Mr. Butterfield: Yes sir, and then some work equipment, pile driver and work cars.

By Mr. Brady: Railroad sheds?

Mr. Butterfield: The Butterfield Lbr. Co. owns that.

Examiner Burchmore: Are you informed as to the cost of

3252 constructing this road independent of equipment.

Mr. Butterfield: Well, fairly so.

Examiner Burchmore: State your knowledge.

Mr. Butterfield: Well, the road costs with equipment—has cost to date with equipment—I think in the neighborhood of $8,000.00 a mile, and the equipment cost $2,000.00 a mile. I can give you the exact figures if you will allow me to look at the annual report which I have here.

Examiner Burchmore: You may do that, but before we pursue that line of questioning, I will ask you one or two questions about the capital stock; was the stock issued for cash?

Mr. Butterfield: Partially. That is all in here too; with an explanation to the commission. I said thirty-four miles cost $11,460.42 a mile. I have not divided—the 1910 report does not require me to divide out the equipment and I have not done so, but I can figure it if desired. That $11,000.00 includes equipment. That is the total.

Examiner Burchmore: Have you not some figures? This $374,000.00 is approximately the cost of the——

3253 Mr. Butterfield: Yes, sir, I have that right here. I can explain that to you very simply, $389,592.00.

Examiner Burchmore: That is the road and equipment.

Mr. Butterfield: Yes sir.

Examiner Burchmore: Of that, how much is equipment?

Mr. Butterfield: $55,785.32. No there is an addition; the way that I had that last year, I am not telling the truth. The idea is, it was $55,785.32 and there was added since 1907, $23,515.33.

Examiner Burchmore: $389,000.00 figures correctly.

Mr. Butterfield: Yes, that is the total to June 30, last.

Examiner Burchmore: Now, this $389,000.00 is the total cost of the railroad and equipment. You had $900,000.00 outstanding capitalization. What became of the balance?

Mr. Butterfield: That is a special agreement between the stockholders and the railroad company itself probably. They issued $1,000,000.00 of stock and $100,000.00 of stock was held in the Treasury and the stockholders, as they needed addition and betterment were to pay for those needed additions and betterments—additions to the road—out of this $1,000,000.00.

3254 Examiner Burchmore: Then the $900,000.00 were issued to stockholders, but only partial payment made on the stock?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What was the first assessment?

Mr. Butterfield: The first assessment was for the building of the road, $225,000.00. Then the stock was increased at a later date to this $1,000,000.00, and of that $1,000,000.00—of the additional amount—$164,000.00 for betterments and additions had been paid in. It is being paid by the stockholders as the road is bettered or extended.

Examiner Burchmore: And from that time to time, there will be additional assessments, I assure, if necessary?

Mr. Butterfield: Yes, sir.

Examiner Burchmore: Have you ever paid any dividends on that stock?

Mr. Butterfield: Never have.

Examiner Burchmore: Have you accumulated any surplus?

Mr. Butterfield: Each year, the surplus has been put in for betterment.

Examiner Burchmore: It is simply raising the standard of your road each year?

3255 Mr. Butterfield: That is all.

Examiner Burchmore: I think you said, although I am not quite clear, because we have here so many companies and they are so similar—I think you said that the stockholders were substantially identical in the two companies?

Mr. Butterfield: They are identical; not substantially, the executive offices are the same.

Examiner Burchmore: And reference may be made to the annual reports for a statement as to the operating expenses and operating revenues etc.?

Mr. Butterfield: It is right there if you want to go over it—our copy.

Examiner Burchmore: The repair shops are owned by the Lumber Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: The engines and locomotives and cars of the Railroad Company are repaired in those shops?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What is the basis of charging for those repairs?

Mr. Butterfield: Actual cost and superintendent.

3256 Examiner Burchmore: What is the basis of superintendence?

Mr. Butterfield: Five per cent.

Examiner Burchmore: Does your Company make annual and monthly reports to the Commission?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Extended reports?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Are those cars and locomotives equipped with proper safety devices when operated in trains?

Mr. Butterfield: When not entirely intra-state. When it is entirely interstate, or interstate traffic is handled, it is handled according to the Interstate Commerce Commission's requirements.

Examiner Burchmore: Do you call Long's Interstate traffic?

Mr. Butterfield: We call the equipment that handles these logs intra-state, because the cars never leave that line. They are equipped for a particular service and require a particular kind of equipment in a way as they never leave the line of road and we call

3257 them intrastate.

Examiner Burchmore: You understand that if a box car train takes one box outside of the state that car has to be coupled with air-brakes?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Your compliance with the statute conforms to that part?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Logging cars of the Company do not need to be equipped with devices under certain——

Mr. Butterfield: We do not interpret the law that way and do not equip the cars that way.

Examiner Burchmore: The law makes an exception of logging cars under certain circumstances. Do you keep your accounts in accordance with the custom prescribed by the commission?

Mr. Butterfield: As far as we can. We have some little difficulties now and then.

Examiner Burchmore: Did you make an effort to comply?

Mr. Butterfield: Yes sir we do.

Examiner Burchmore: Will you furnish or have furnished a map of this line showing——

3258 By Mr. Brady: We have it now. We have a map with the Mississippi Railroad Commission ordered and prepared by the Railroad Commission of that state which shows this Railroad.

Examiner Burchmore: Does it show the location of the Mill and industries and forests?

Mr. Brady: No sir; we have asked in this petition to be allowed to file that kind of a map.

Examiner Burchmore: Please do so. A letter will be sent out, I think, describing the nature of that map. If not, some further announcement will be made in this hearing. We will desire a tonnage statement, but before asking for that I would like to ask one or two questions with respect to traffic.

Mr. Butterfield: There is a tonnage statement in the tonnage report.

Examiner Burchmore: That statement does not indicate what traffic or what operation of that traffic is furnished by the controlling interest. We would like a statement of the traffic of your road for the last fiscal year, and if you choose, you may bring it down to date if you desire to show the last fiscal year separately and indi-
3259 cate thereon the amount of logs handled for the Butterfield Lumber Company and the amount of Butterfield Lumber Company lumber and other products handled out of there, and indicate separately the amount of other traffic handled for the Butterfield interests, and in another place the traffic handled for the public—the general public. I refer now to freight traffic. I presume your passenger traffic is set forth in your report. The statement should not only show tonnage, but revenue, in the same way. Now, can you state in a general way what proportion of the freight tonnage of the road in the last year was handled for the Butterfield Lbr Company.

Mr. Butterfield: Well, the total freight earnings was only $96,000.00 and something of which $67,000.00 was charged against the Butterfield Lbr. Co. for freight haul and $30,000 and some odd dollars was for other people on the road.

Examiner Burchmore: To that $67,000, should there be any addition?

Mr. Butterfield: The switching charge is in addition to that.

Examiner Burchmore: Should there be any addition on
3260 account of this refund allowed by the Illinois Central?

Mr. Butterfield: No sir.

Examiner Burchmore: This takes account of it? This $67,000.00 is the gross amount you received on Butterfield tonnage?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What is the extent of your passenger traffic?

Mr. Butterfield: Very little it amounts to. Last year I think—I can give you the exact figures from here. $2800.00 I think.

Examiner Burchmore: Do the passengers travel on tickets?

Mr. Butterfield: Yes sir. Sometimes train fares. On that little road, the majority of times they pay train fare, and sometimes travel on ticket. $2897.00 was the passenger revenue. That does not include the mail.

Examiner Burchmore: Do you sell commutation tickets?

Mr. Butterfield: No sir, simply one way tickets.

Examiner Burchmore: Any other tickets in connection with the Illinois Central?

Mr. Butterfield: No sir; we concur in the through rates but no tickets have ever been issued in that way.

3261 Examiner Burchmore: Well, what is your train service?

Mr. Butterfield: We have one mixed train each way daily except Sunday and there are two logging trains daily except Sunday. One of these log trains carries a passenger car and accommodates passengers as a matter of accommodation so as to give a double service.

Examiner Burchmore: Do these discharge passengers at the I. C. trains?

Mr. Butterfield: Yes sir, they make connection at Norfield with the Illinois Central trains north and south.

Examiner Burchmore: Do the employees of the Lumber Company pay fare when riding over the road?

Mr. Butterfield: No sir, they do not pay any fare. The lumber company prefers to let them ride free but each one is given a certain kind of ticket and that ticket is turned in and the lumber company pays three cents a mile to the Railroad Company for it. That is the flat rate.

Examiner Burchmore: Do you issue any passes over your road?

Mr. Butterfield: Yes, sir.

Examiner Burchmore: Very extensively?

Mr. Butterfield: Not so very.

3262 Examiner Burchmore: Have you inter-change passes; do you interchange with other railroads?

Mr. Butterfield: Yes sir interchange passes.

Examiner Burchmore: What passes are held by your office from the Illinois Central?

Mr. Butterfield: Three; the President, Vice-President and myself.

Examiner Burchmore: Are those passes used?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Do the officers make any distinction between railroad company passes and lumber company passes, or use the passes indiscriminately?

Mr. Butterfield: I cannot say that they make any great distinction; when we need to use the pass, we use it.

Examiner Burchmore: Whenever you travel over the Illinois Central, you use it?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Is it an annual pass?

Mr. Butterfield: Yes, sir.

Examiner Burchmore: Have you passes on any other road?

Mr. Butterfield: Yes sir.

Examiner Burchmore: How many passes?

3263 Mr. Butterfield: Oh, I don't know.

Examiner Burchmore: A great number?

Mr. Butterfield: Well not so many.

Examiner Burchmore: On large roads?

Mr. Butterfield: May be seven or eight large systems.

Examiner Burchmore: The same is true of your President?

Mr. Butterfield: They are all issued alike, to the three of us.

Examiner Burchmore: Are there any other mills or industries on your line that are controlled by the Butterfield Lbr. Co., although not operated in its name?

Mr. Butterfield: No sir, none.

Examiner Burchmore: Will you answer the question in the negative if I widen the scope so as to include people who are interested in the Butterfield Lumber Company?

Mr. Butterfield: Yes sir, it would be the same answer.

Examiner Burchmore: No relation between the Butterfield Lbr. Company and its owners and any other industry along this line?

Mr. Butterfield: No sir.

Examiner Burchmore: The same is true of the Railroad Company and other industries along this line?

3264 Mr. Butterfield: Yes sir, exactly so.

Examiner Burchmore: Where does the Railroad Company keep its cash?

Mr. Butterfield: The Railroad Company does not handle any cash at all.

Examiner Burchmore: Well, does it have a bank account?

Mr. Butterfield: No sir. It is handled by the Butterfield Lbr. Co. so as to minimize Book-keeping expenses for a small road.

Examiner Burchmore: Well does the Lumber Company allow interest on the money while it holds it?

Mr. Butterfield: Yes sir.

Examiner Burchmore: I don't know whether I asked the question about joint office employees. Do the same persons act as book-keepers and accountants and clearks for the Lumber Company and the Railroad Company?

Mr. Butterfield: Not exactly. The auditor is the auditor of the Lumber Company and the Railroad Company; the assistant Auditor is for the Railroad only. Our Traffic Manager who is also the General Freight Agent, is in the office and he is a Railroad employee only—the General Manager and myself—I have a stenographer who is a Railroad employee only.

3265 Examiner Burchmore: Does she work with the Lumber Company?

Mr. Butterfield: No sir, she sometimes helps out as we expect the Lumber Company to help out in a pinch, but she is entirely paid for her services by the Railroad Company.

Examiner Burchmore: How many joint office clerks are there for the Railroad?

Mr. Butterfield: I don't know that you would call any of them joint office clerks—I think there is only one, and that is my stenographer.

Examiner Burchmore: The other persons who work for the Lumber Company are also paid by the Railroad Company?

Mr. Butterfield: The only other one—I did not quite catch on.

Examiner Burchmore: There are other Lumber Company em-

ployees who receive partial compensation from the Railroad Company?

Mr. Butterfield: Yes, the Lumber Company's time-keeper is also the Railroad Company's time-keeper.

Examiner Burchmore: And the pay is in proportion to services rendered?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Are there any other employees of
3266 whom that is true?

Mr. Butterfield: Yes sir; that is the employees in the woods. The general scaler. And at one of the water tanks—the engineer at one of the water tanks we use jointly. The Butterfield Lumber Company has a weigher who is paid jointly, as the Railroad Company uses him.

Examiner Burchmore: The Lumber Company uses no scale?

Mr. Butterfield: No sir.

Examiner Burchmore: How many employees are there in the road department of the Railroad Company?

Mr. Butterfield: Regular employees?—I will have to look that up.

Examiner Burchmore: That is shown up, I presume, in your annual report?

Mr. Butterfield: Yes sir.

Examiner Burchmore: How many train crews?

Mr. Butterfield: Two regular train crews; when operating two regular train crews, and it has a full quota of three men and a conductor.

Examiner Burchmore: Three men and a conductor?

Mr. Butterfield: Yes sir; and then the switching and extra crew each have the engine crew and one man.

3267 Examiner Burchmore: The Railroad Company has water tanks?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Any public team tracks?

Mr. Butterfield: Yes sir.

Examiner Burchmore: You charge depreciation on your equipment?

Mr. Butterfield: Yes sir.

Examiner Burchmore: At what rate?

Mr. Butterfield: Five per cent per annum. I have just gone through that with the commission. Heretofore, up until last year, we absorbed our depreciation in the annual inventory, and I understood that was satisfactory until a little while ago, but since that time we have been charging depreciation as required.

Examiner Burchmore: Is the difference between $900,000.00 the capital stock issued, and $390,000.00 paid in, under assessment carried on the books in any form?

Mr. Butterfield: No sir, except that we carry that as a debit balance.

Examiner Burchmore: As a deficit?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Is that correct under the accounting
3268 rules of the Commission?

Mr. Butterfield: Well, I am not sure. I explained that

matter to the Commission in making the annual report, the year that was done, and they have had nothing to say about it.

Examiner Burchmore: Mr. Gutheim thinks it is not in keeping with the requirements.

Mr. Butterfield: That was not done. Several years ago I fully explained to the Commission at that time. I wrote a long sheet and put it in there, and there were no remarks made.

By Mr. Gutheim: The fact is that $900,000.00 were outstanding in the hands of the stockholders?

Mr. Butterfield: Yes sir.

Cross-examination:

By Mr. Brady: Mr. Butterfield, I will ask you whether or not there was a desire on the part of the people, the stockholders of the Butterfield Lumber Company to have the Illinois Central Railroad build a railroad so as to supply that mill with Logs?

3269 Mr. Butterfield: Well, when the Company was first organized and moved to this location—rather when it first moved in this location, they tried to get the Illinois Central Railroad to do that—we were given to understand that the trunk lines in the North did this on percentage of the freight taken away from the mill or handled from the mill as an initial carrier. Trunk lines in Wisconsin will build thirty or forty miles of Logging Road, but the Illinois Central did not see it that way at all.

Mr. Brady: When you chartered your Railroad Company, did you purpose to build a permanent railroad?

Mr. Butterfield: Yes sir, we did. We thought at that time that the country thru which we were going would be able in time to support a railroad.

Mr. Brady: Is it your purpose to extend this road and use it as a permanent road?

Mr. Butterfield: Yes sir.

Mr. Brady: What was the nature of the territory through which the road ran before it was put down?

Mr. Butterfield: Mainly open woods.

Mr. Brady: What is the character of the territory now?

Mr. Butterfield: Well, where the timber has been cut off is

3270 very good farming country, and has been opened up and quite thickly populated with farmers.

Mr. Brady: What of the population? Was it scarcely or thickly settled?

Mr. Butterfield: Very scattering, out from the Railroad.

Mr. Brady: What is the population now?

Mr. Butterfield: Well, I think it has increased about one hundred per cent along the line of the Railroad Company tracks.

Mr. Brady: State whether a good deal of the country along the right of way belonged to other people than the Butterfield Lumber Company?

Mr. Butterfield: All along the right of way of the permanent road? The majority of the land belonged to people other than the Butterfield Lumber Company. The Butterfield Lumber Company has

leased a large share of its cut-over lands and they have now become farming lands.

Mr. Brady: What is the purpose of the Railroad in reference to the lands that are cut over alongside of its tracks and the development of this land?

Mr. Butterfield: Well, the Railroad Company really had nothing to do with the land as they are owned by the Butterfield Lum-
3271 ber Company. It is the Lumber Company's purpose to sell that off as fast as possible.

Mr. Brady: What is the Railroad Company's purpose relative to serving——

Mr. Butterfield: It is to the Railroad Company's interest to get as many inhabitants along its line as possible.

Mr. Brady: Is there a road east of you?

Mr. Butterfield: Yes sir, the N. O. & G. N.

Mr. Brady: The New Orleans and Great Northern?

Mr. Butterfield: Yes, sir. Parallels it and the Gulf and Ship Island Railroad on the other side, up Pearl River.

Mr. Brady: The New Orleans and Great Northern, at what point does it connect?

Mr. Butterfield: It runs from New Orleans to Jackson.

Mr. Brady: How far are you from that road?

Mr. Butterfield: We have an extension of our Northeastern branch. It is graded within two miles of it.

Mr. Brady: Was it your purpose to connect with the N. O. & G. N.?

Mr. Butterfield: At some date, yes.

Mr. Brady: What distance North is it to the Railroad run-
3272 ning parallel to yours?

Mr. Butterfield: I think fourteen miles.

Mr. Brady: What distance is that to the Railroad parallel?

Mr. Butterfield: I don't know just how far it is. 12 and 4—about 16 miles.

Mr. Brady: What Railroad facilities have the people other than that of this road between these two roads?

Mr. Butterfield: None whatever.

Mr. Brady: What is this Railroad doing towards the development of that territory?

Mr. Butterfield: It is doing all that it can.

Mr. Brady: What does that mean to say? Is it developing that territory?

Mr. Butterfield: The territory is developing and developing rapidly. Becoming more thickly inhabited and we have joined an immigration movement in the state trying to get settlements along the line of the road.

Mr. Brady: What is doing that?

Mr. Butterfield: The Railroad Company.

Mr. Brady: The Railroad Company is making that effort?

Mr. Butterfield: Yes sir.

Mr. Brady: When it connects with the N. O. & G. N., your road

will then be connected with New Orleans and with Jackson
3273 from that road?

Mr. Butterfield: Yes sir.

Mr. Brady: We offer, for this record, Mr. Examiner, Passenger Tariff I. C. C. #1 as Exhibit "C."

We further offer Passenger Department, I. C. C. #2, as Exhibit "D."

Further Tariff I. C. C. 1111 as Exhibit "E."

Tariff Index I. C. C. *L* as Exhibit "F."

We offer the time table #21 as Exhibit "G."

The said time table #21 was offered and identified and was received in evidence and thereupon marked "Defendant's Exhibit "G," received in evidence December 12, 1910," page —, and is attached hereto.

We offer the division sheets of freight rates with the Illinois Central Railroad Company as Exhibit "H."

We offer a copy of the map of the Railroad Company which we ask leave to file. We tender for examination the books showing the method in which the book-keeping of the Company is done. We want the notes to show we make the tender.

Examiner Burchmore: You don't need to make that tender. The time tables and division of sheets and the map may be received in evidence as Exhibits now or later if you have not them with you. They may be sent to the Commission, but the tariff we will not receive as Exhibits, as you have called attention to them, and
3274 they are on file with the Commission. If you have any tariffs not on file with the Commission, you can file them, but we will not take as Exhibits anything you have on file with the Commission. We do not wish to cumber the record.

Mr. Brady: We offer—I suppose that will fall under the same ruling—our reports from 1905 to date.

Examiner Burchmore: They will be referred to. Mr. Butterfield, I will ask you whether or not this Railroad Company has been doing a successful business and has earned anything above expenses?

Mr. Butterfield: It has earned in passenger traffic until last year—last year, it earned about 10% on the investment.

Examiner Burchmore: What has been done with these earnings?

Mr. Butterfield: Invested in bettering the road and extending it.

Examiner Burchmore: Has any other sum of money been put into the maintenance of the road bed?

Mr. Butterfield: Each year out of its surplus of capital stock which was issued to the stockholders, there is a sum of money put into the road as it needed it. Last year, it had in the neighborhood of $40,000,00.

3275 Examiner Burchmore: State whether or not the road is constructed—the bed of the road itself—is constructed about as the average trunk line of a railroad bed is constructed?

Mr. Butterfield: The Railroad bed is constructed up to the standard of single track trunk line Railroads.

Examiner Burchmore: What about your Railroad branches?

Mr. Butterfield: They are built to the standard of single track trunk line Railroads.

Examiner Burchmore: When did you first learn of this hearing?

Mr. Butterfield: I first learned of it when you telephoned to me.

Examiner Burchmore: When was that?

Mr. Butterfield: The latter part of last week sometime.

Examiner Burchmore: You want to bring out the fact that you were not notified?

Mr. Brady: No, the point is this, we may overlook something that we ought to introduce if we had the time in which to prepare it, and that ought to measure something as an excuse for us.

Examiner Burchmore: That simply amplifies your petition.

3276 Mr. Brady: Yes. Is there anything, Mr. Butterfield, you would like to state relative to the Railroad Company, that you think of? I have some questions. Do you carry United States mail?

Mr. Butterfield: Yes sir.

Mr. Brady: Do you carry Express?

Mr. Butterfield: We have express rates. We do not carry any connection with any regular express Companies.

Mr. Brady: State whether or not your rates for lumber and other commodities on this road have been fixed by the Railroad Commission of the State of Mississippi?

Mr. Butterfield: They all have to be submitted to the Railroad Commission of Mississippi, and approved before we can use them.

Mr. Brady: State whether or not that particular rate asked by the Railroad Company relative to the Busby mill was fixed by the Railroad Commission?

Mr. Butterfield: No, that was not, that was an interstate rate of two—four cents per hundred pounds on lumber is the rate fixed by the State.

Mr. Brady: State whether or not you are complying with the regulations of the State Railroad Commission and the Interstate

3277 Commerce Commission?

Mr. Butterfield: Just so far as we know them, and I think we know them pretty well, we are.

Mr. Brady: State whether or not you have been adjudged by the courts of Mississippi as a common carrier?

Mr. Butterfield: We have.

Examiner Burchmore: I have a few more questions that occur to me that I think ought to be in the record. Have you had any other applications from any other lumber people to put in logging tracks connected with your line out in the woods?

Mr. Butterfield: No sir, never have.

Examiner Burchmore: Suppose you received such application, would you consider granting it?

Mr. Butterfield: Very seriously. If they had any amount of timber that would make it a paying proposition to handle, but you have to figure on a logging spur and the amount of timber it is going to haul out as against the amount of expenses we are going to.

Examiner Burchmore: Would you operate such a spur to any other point on substantially the same basis as with the Butterfield Lumber Company?

3278 Mr. Butterfield: Yes sir.

Examiner Burchmore: You have never received any such application?

Mr. Butterfield: No sir, have no likelihood to receive such an application, as the Butterfield Lumber Company owns all the timber in that neighborhood.

Examiner Burchmore: Then these other people buy from the Butterfield Lumber Company?

Mr. Butterfield: No sir. They had scattering holdings that we were unable to buy because of various reasons. We were not able to absorb it for various reasons, and there is a body of it there which lasts a small mill a considerable time.

Examiner Burchmore: You say you have under actual consideration, a serious consideration, the question of connecting with the N. O. & G. N. Railroad?

Mr. Butterfield: We have had it under such serious consideration that we approached their Traffic Manager—I did personally—with a view of getting a line on the division which he would be able to give us on our business. He got a proposition from us.

3279 Examiner Burchmore: Is that proposition more favorable than that with the Illinois Central? That division?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Would your connection on the N. O. & G. N. Railroad result in an increase in your business?

Mr. Butterfield: I don't know.

Examiner Burchmore: Would you anticipate that result?

Mr. Butterfield: I don't know. There are several factors entering into that that I am entirely unable to say.

Examiner Burchmore: We don't wish to call for speculative opinion. Were the towns to which you refer, Verna, Topeka, etc.—were those towns there before you built?

Mr. Butterfield: No sir.

Examiner Burchmore: What character of towns are they now?

Mr. Butterfield: Little small towns. One or two of them have only five or six houses, but it is a nucleus.

Examiner Burchmore: What is the population of Verna?

Mr Butterfield: Say 150.

Examiner Burchmore: How many houses in Topeka?

Mr. Butterfield: Probably 12 houses, and there is a Mer-

3280 cantile Company there. We have located a side track and it happens to be a cross-roads near there, and it is a nucleus for a rather thickly populated country. We have a side track and do quite a bit of cotton hauling and fertilizer and handle quite a good haul from there.

Examiner Burchmore: Was there any settlement at Old Camp?

Mr. Butterfield: Yes quite a little settlement there, it was settled. Originally there was nothing there—it was started because we located a logging camp there. The Lumber Company moved a logging Camp there, and the Railroad Company built some houses there and a little saw mill was put up there, and I suppose its population now is in the neighborhood of 150 or 160 people.

Examiner Burchmore: Is there anything at Furlough?

Mr. Butterfield: No sir, that is only a point established not more than six or eight months ago.

Examiner Burchmore: Main Line Junction?

Mr. Butterfield: That is a small switch.

Examiner Burchmore: At what point does the Butterfield Lumber Company maintain its Company stores or Commissary?

3281 Mr. Butterfield: It does not maintain any at all.

Examiner Burchmore: Does the Railroad Company have any?

Mr. Butterfield: No sir, we have a general supply store, but that is kept under the item of material and supplies in the annual report.

Examiner Burchmore: Does the Butterfield Lumber Company have any subsidiary concerns that have mercantile enterprises or commissaries?

Mr. Butterfield: No sir. We do business with an entirely foreign corporation on a percentage basis for the business we furnish.

Examiner Burchmore: The Butterfield Lumber Company gets a percentage?

Mr. Butterfield: Yes on the business we furnish.

Examiner Burchmore: They give your employees—the lumber company employees—credit—you give them a cash check?

Mr Butterfield: Yes sir.

Examiner Burchmore: It is operated as a company store?

Mr. Butterfield: Operated exactly as a Company store.

3282 Examiner Burchmore: Then, it in substance, farms out that privilege?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Where are those stores located?

Mr. Butterfield: They have a store at Northfield and a store house or store room at Camp Twelve, where the stuff is delivered to the employees at the other end of the road.

Examiner Burchmore: What rate of freight is charged on this merchandise handled?

Mr. Butterfield: The regular rate.

Examiner Burchmore: The regular rate of freight?

Mr. Butterfield: Yes sir.

Examiner Burchmore: There are no other small stores at Verna or Topeka?

Mr. Butterfield: Yes sir, one at each one of these places—several of them.

Examiner Burchmore: All these towns are made up mostly of Mill employees—I mean, Lumber Company employees?

Mr. Butterfield: No sir, not at all. There may be one or

3283 two from each place, but the towns are made up of country people and farmers around there.

Examiner Burchmore: I notice the executive officers of this Railroad as entered on the back of the time table seem to be largely the Butterfields?

Mr. Butterfield: Yes sir, it happens to be so.

Examiner Burchmore: The Butterfields control this corporation?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Have they any interest in lumber operations elsewhere?

Mr. Butterfield: No sir.

Examiner Burchmore: They have no other Lumber Company?

Mr. Butterfield: No sir.

Examiner Burchmore: That is their entire interest?

Mr. Butterfield: Yes sir.

Examiner Burchmore: They have no Michigan lumber? Is there any relation between this Railroad Company and other Railroad Companies, save that of traffic relation?

Mr. Butterfield: No sir, none whatever. Yes there is in a way. I don't know whether that will apply right here or not but the
3284 Illinois Central—we have a contract with them—they built the first five miles of our line, and they have an interest in the first five miles in so far as the iron on it goes.

Examiner Burchmore: My next question was whether you have any contract with the Illinois Central?

Mr. Butterfield: We have a track that switches at Norfield.

Examiner Burchmore: Are those contracts filed in the Commission?

Mr. Butterfield: I don't think they are.

Examiner Burchmore: If they cover rates or divisions in any shape or form, they ought to be filed?

Mr. Butterfield: They don't cover anything like that.

Mr. Brady: As a matter of fact, notice has been given the Illinois Central that this contract for miles of steel was terminated and that the N. C. & M. Railroad Company desired to purchase under the terms of the contract.

Examiner Burchmore: Please file a copy of these contracts in this record. I presume there is nothing in that you wish to keep away?

Mr Brady: No sir. We want to give everything we have got.

3285 Examiner Burchmore: There may be some contracts which for business reasons you may not wish to file? Do you participate in joint thru classes of rates and thru commodity rates?

Mr. Butterfield: Yes sir.

Examiner Burchmore: To interstate points?

Mr. Butterfield: Yes sir.

Examiner Burchmore: I presume these tariffs are referred to in your index of tariffs?

Mr. Butterfield: Yes sir.

Examiner Burchmore: What is the basis of rates—as from Topeka? In the first place, are all stations on your line grouped—take the same rates?

Mr. Butterfield: Practically, except on some classes. It graduates as to distance.

Examiner Burchmore: To Chicago, for instance, or Memphis, or New Orleans. Are there grouped rates from all stations on most commodities?

Mr. Butterfield: Yes sir. The major portion of through rates are

put in the tariff for which Mr. A. D. Hall is agent. I can give you the exact ones.

3286 Examiner Burchmore: Are these rates from points on your line, the same as the Illinois Central rate from Norfield?

Mr. Butterfield: No sir.

Examiner Burchmore: How much higher are they?

Mr. Butterfield: It takes in our local, I believe.

Examiner Burchmore: Are they equivalent to the sum of the locals?

Mr. Butterfield: Well, I don't know about the Illinois Central, but except on intra-state traffic—it is all local rate and the through rate.

Examiner Burchmore: Then your division of the class and commodity rate is the same? As under your state tariff?

Mr. Butterfield: Yes, no it is not. I made a mistake because the Intra-state rate provides—rather the State Commission provides that the rate in the state handled on two railroads shall be the sum of the two locals less 10%.

Examiner Burchmore: That is not just what I meant. You get the same on shipments from Topeka to New Orleans as your

3287 division—you receive the same amount under the joint rate?

Mr. Butterfield: Yes sir, I think so.

Examiner Burchmore: You get your regular one line rate as a division?

Mr. Butterfield: In Intra-state traffic?

Examiner Burchmore: And on State Traffic, it is 10% less?

Mr. Butterfield: Yes sir.

Examiner Burchmore: I want to ask one question about that. The $1.00 charged for switching to the Butterfield Lumber Company, is that published in any form.

Mr. Butterfield: I don't know whether it is or not. I am inclined to think it is not.

Examiner Burchmore: If it is published, I wish you would look the matter up and refer us to the tariff rate which you will find. You can refer by letter. If it is not published, the inquiry arises whether you have the right to collect that $1.00 which is not provided for by published tariff?

Mr. Butterfield: I can tell you very easily how that $1.00 arises. It was a matter of trouble we were having with our claim de-

3288 partment on the average in weights, and the Illinois Central used to come into our yard, and do all the switching for the Lumber Company.

Examiner Burchmore: When did this discontinue?

Mr. Butterfield: Years ago. When they discontinued was when we put in our two cents and the Lumber Company and the Railroad Company agreed that the Railroad Company would do the switching of the cars, and place them out there for the Illinois Central at $1.00 per car.

Examiner Burchmore: You don't charge that $1.00 against other mills.

Mr. Butterfield: No sir, because we don't have the work to do for

them that we have to do for the Butterfield Lumber Company. The Railroad Company simply absorbs any switching which there might be at Norfield. There is no switching for anybody else.

Examiner Burchmore: The Butterfield Lumber Company does not complain about that charge?

Mr. Butterfield: No sir. They were opposed to it when it was made.

Examiner Burchmore: It was simply a transfer of funds into a subsidiary corporation?

3289 Mr. Brady: The stockholders are about the same.

Examiner Burchmore: They are dealing with each other at arms' length?

Mr. Butterfield: I am inclined to think they do. Ralph Butterfield is the Manager of the Railroad Company and -is brother is the Manager of the Lumber Company, and they deal with each other in pretty strict accordance with the rules of business.

Examiner Burchmore: There is rivalry between them?

Mr. Brady: They handle the business like you and I manage business. The only thing of course, there is a feeling that it is your money and my money, you know, but in business matter, they are right there.

Examiner Burchmore: It is all two railroads in the same system. Have there been any damage suits for personal injuries brought against the Railroad Company?

Mr. Butterfield: Yes sir.

Examiner Burchmore: Have you paid any money on judgments?

Mr. Butterfield: I think we have been very lucky. I don't think we have paid very much.

3290 Mr. Brady: We have two cases now in the Supreme Court.

Examiner Burchmore: Any under the common carrier statute?

Mr. Butterfield: There have been several.

Mr. Brady: Yes. One is brought under the Common Carrier statute.

Examiner Burchmore: And judgment has been rendered?

Mr. Butterfield: Judgment has been rendered in the lower court in one case for $400.00 and in another case for $175.00, both of which are now pending in the Supreme Court.

Examiner Burchmore: Then your status as a Common Carrier has not been questioned?

Mr. Butterfield: They have decided a long time ago in a case that we were one.

Examiner Burchmore: They decided you were a common carrier?

Mr. Butterfield: Yes sir. When the question first arose, 10 years ago—there was a car load of fertilizer burned, and the question arose there as to whether or not we were a common carrier, and we had just commenced—the road had just commenced to do business—and the Court held in that case that we were a Common Carrier.

3291 That car was burned on the switch track of the Butterfield Lumber Company.

Mr. Brady: We decided the case on the ground—for the reason of the fact that as it was delivered to a track, our liabilities ceased and the question was passed on in that case. That is my recollection.

Examiner Burchmore: Anything further?

Mr. Brady: Just one or two. We want to ask leave to submit a copy of our charter.

Examiner Burchmore: That is unnecessary.

Mr. Brady: I will ask some questions. The Western terminus—the intended Western terminus of your road is what point?

Mr. Butterfield: Natchez.

Mr. Brady: And the Eastern or Southern?

Mr. Butterfield: Mobile.

Mr. Brady: Where do you intend to go after intersecting N. O. & G. N. Railroad, directly to what point?

Mr. Butterfield: It goes almost directly to Columbia, Mississippi.

3292 Mr. Brady: That is the prospectus of the road?

Mr. Butterfield: Yes sir.

Mr. Brady: What size town is Columbia?

Mr. Butterfield: I don't know. It has grown so the last few years that I have no idea. It must have two thousand people.

Examiner Burchmore: The purpose is to show——

Mr. Brady: We intend to build this road into Columbia and ultimately we will want a Mobile connection. It is a small road, but does bona-fide intend to build a railroad. That is my purpose in asking the question.

Examiner Burchmore: The witness has stated that that is the intent.

Mr. Brady: Mr. Butterfield, you were asked the question in reference to putting in side tracks and spurs for other corporations if such were to spring up along your road. Is it not a fact that undethe rulings of the Railroad commission of your own state and the Laws of Mississippi you are required to do that?

Mr. Butterfield: Yes sir.

Mr. Brady: Whether the Company wanted to or not, it is

3293 required, and if it is a common carrier, it is required to put in switches?

Examiner Burchmore: Is that the requirement practically of all State Commissions?

Mr. Butterfield: Yes sir.

Examiner Burchmore: It would require him to build a switch or tap line out in the wood?

Mr. Brady: Yes sir.

Examiner Burchmore: But if you were requested to build a ten mile tap line into the woods, would you consider such a line, for say, Smith & Company.

Mr. Brady: I am not certain. We would not be compelled to build it under the laws of Mississippi; we might be compelled to do it under our commission.

Examiner Burchmore: You have no further statement to make, Mr. Butterfield?

Mr. Butterfield: None that I know of.

Mr. Brady: We ask leave, if we think of anything—we have come here on three or four days' preferation—we ask leave to be allowed to mail it in—anything we may consider necessary.

Examiner Burchmore: Any communication you mail to
3294 the Commission in addition to what has been requested—any such communication will be filed in the record and inspected by the Commission for what it seems to be worth. Of course, not being put under oath, we cannot give absolute verity to it.

Mr. Brady: We would like to ask that you make each request for information, such as division of funds from the Butterfield Company and other Companies we are reaching, so as to enable us to get in something that may be of value to us whereas we perhaps do not see it now.

Examiner Burchmore: It does not seem to me that there is very much more light to be thrown by this Company.

Mr. Brady: I don't know. The people in the west have been discussing this matter two or three years and instead of representing my company I am largely relying upon you to develop what facts should be developed. It is a question of simply throwing ourselves on the mercy of the court, with the information and notice that we have.

Examiner Burchmore: Your rate from east of the river is
3295 two cents higher than from west of the river? Are not the east of the river rates generally two cents higher than west? Or the other way, two cents lower?

Mr. Butterfield: To what point?

Examiner Burchmore: To the Ohio River and north.

Mr. Butterfield: I think they are to the east of the Ohio river. They are lower to the Ohio river than we get on the west side. Oh, I was thinking of the Mississippi River. To the Ohio river, I think they are.

Mr. Brady: Lower, you mean.

Mr. Butterfield: Yes sir.

Mr. Brady: Your rates are lower?

Mr. Butterfield: Yes sir.

Examiner Burchmore: They may be lower in contemplation of payment of allowances?

Mr. Butterfield: That I do not know.

Mr. Brady: Mr. Butterfield will be over here to-morrow for a while and if we think of anything, will you permit us——

Examiner Burchmore: I will listen to any excuses you have to make. We will adjourn until 9.30 at this place when I think the other east of the river cases will be taken up at that time.

Whereupon, at —.

3296 *Trinity Valley Southern Railroad Company.*

(Appearances: B. H. Powell, Esq., Att'y.)

C. O. McCARTER was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Mr. Powell, I have been asking the questions to start things out.

Mr. Powell: Yes sir, go ahead.

Examiner Burchmore: Mr. McCarter, what is your residence and what is your occupation:

Mr. McCarter: Oakhurst, Texas, Auditor of the Trinity Valley Southern Railroad Company.

Examiner Burchmore: Are you employed by any Lumber Company?

Mr. McCarter: No sir.

Examiner Burchmore: The Trinity Valley Southern connects with the International and Great Northern at Dodge Texas.

Mr. McCarter: Yes sir.

Examiner Burchmore: And connects with no other Railroad Company?

Mr. McCarter: No sir.

Examiner Burchmore: What is the length of its line?

Mr. McCarter: Six Miles.

3297 Examiner Burchmore: That is, six miles Main line?

Mr. McCarter: Yes sir.

Examiner Burchmore: This report shows 7½ miles.

Mr. McCarter: This is figured five and eight tenths miles on the Railroad Commission of Texas, Mileage circular, but it is generally called six miles.

Examiner Burchmore: Any switches?

Mr. McCarter: No sir except a few spurs to industries along the line.

Examiner Burchmore: Is the Trinity Valley Southern operated in the interest of any lumber company?

Mr. McCarter: In the interest of a lumber company, in what way, do you mean?

Examiner Burchmore: Is it related to any lumber Company?

Mr. McCarter: Some of the stockholders of the Railroad Company are stockholders of a lumber company.

Examiner Burchmore: Is it not a fact that the stockholders of the Lumber Company—the Palmetto Lbr. Co.—control it?

Mr. McCarter: No sir.

Examiner Burchmore: What Lumber Company has mills along its lines at the present time?

3298 Mr. McCarter: None except the Palmetto Lumber Company. Formerly the Columbia Lumber Company was where the Palmetto Lumber Company is now located, but the Palmetto Lbr. Co. before they took from the Columbia Lumber Company, were located out there and the San Jacinto Lumber Company.

Examiner Burchmore: Those Companies have gone out of business?

Mr. McCarter: The San Jacinto Lbr. Co. has gone out of business and moved away and the Palmetto Lbr. Co.—the Mill burned down. They had two mills and one of them burned about a year ago. They still have one mill left.

Examiner Burchmore: Does the Palmetto Lbr. Co. have any stock in the Railroad Company?

Mr. McCarter: No sir.

Examiner Burchmore: Do the officers of the Palmetto Lbr. Co. or the stockholders of the Palmetto Lbr. Co. own any stock in this Railroad?

Mr. McCarter: Some.

Examiner Burchmore: Indicate in a general way, the holdings.

Mr. McCarter: A. C. Ford, President of the Trinity Valley Southern Railraod Company, is also President of the Palmetto Lumber Company, and has one share of stock in the Trinity
3299 Valley Southern Railroad Company.

Examiner Burchmore: And what proportion of the Palmetto Lumber Company?

Mr. McCarter: I cannot say about that.

Examiner Burchmore: He is a majorit*ive* stockholder of the Palmetto Lumber Company?

Mr. McCarter: I presume so, he is President of it.

Examiner Burchmore: Who owns the balance of the stock in the Trinity Valley Southern Railroad Company?

Mr. McCarter: R. W. Miller, who is Vice-President of the Trinity Valley Southern Railroad Company, has one share. He is also General Manager of the Palmetto Lbr. Co. I don't know how much stock he has in the Company. A. L. Black is Superintendent of the Trinity Valley Southern Railroad Company and has one share of stock and has something or other with the Palmetto Lumber Company employ—I don't know what his position is. They are the only ones connected with the Palmetto Lumber Company who have stock in the Trinity Valley Southern Railroad Company. A. L. Black, was Superintendent and he had one share. Miller President, had one share—three shares of stock altogether.

Examiner Burchmore: Who owns the rest of the stock of
3300 the Railroad Company?

Mr. McCarter: W. S. Gibbs, of Huntsville, Texas.

Examiner Burchmore: Who is he?

Mr. McCarter: A Banker at Huntsville.

Examiner Burchmore: He owns that in his own name and right?

Mr. McCarter: Yes sir.

Examiner Burchmore: What else is he besides a banker?

Mr. McCarter: I think he is a capitalist—a banker or something or other; I don't know what he is.

Examiner Burchmore: How much stock does Mr. Gibbs own in the Palmetto Lbr. Co.?

Mr. McCarter: I don't know sir.

Examiner Burchmore: I ask you this—we are dealing not with technicalities but with the substance—is it not a fact that the stockholders—that the Palmetto Lbr. Co. or its stockholders substantial-y own this railraod thru the stock?

Mr. McCarter: I don't think so. It is my understanding in a general way—I don't know positively, but I don't think Mr. Gibbs owns any stock in the Lumber Company.

3301 Examiner Burchmore: How long has he owned his stock in the Railroad Company?

Mr. McCarter: About a year.

Examiner Burchmore: How did he acquire it?

Mr. McCarter: Endorsed over to him—the stock was.

Examiner Burchmore: Endorsed, but why was it endorsed over to him? Did he purchase it?

Mr. McCarter: I don't know whether he purchased it or not, it was transferred over to him from Mr. Ford to Mr. Gibbs.

Mr. Powell: We can develop that better from another witness.

Mr. Ford: I am the President of the Company and I am here and I think if you question me along this line, I can give you information.

Mr. Powell: Mr. Gibbs has owned half for two years and the balance one year.

Examiner Burchmore: You are fully informed in respect to rates and division in this railroad Company?

Mr. McCarter: Yes sir.

Examiner Burchmore: You state that the San Jacinto Company left this part of the country and went elsewhere with its mill?

3302 Mr. McCarter: Yes sir.

Examiner Burchmore: What is the explanation of this departure?

Mr. McCarter: They cut out all the timber, I think, or went broke, or somethng like that.

Examiner Burchmore: Cut out all the timber and could not buy more?

Mr. McCarter: I think so.

Examiner Burchmore: When was the Trinity Valley Southern Railroad incorporated?

Mr. McCarter: The Trinity Valley Southern Railroad Company —the records show that it was incorporated and organized in 1901 in December.

Examiner Burchmore: When was the road built?

Mr. McCarter: The record- show it was built in 1898 or 1899, one of the two.

Examiner Burchmore: And in your opinion, are the records correct?

Mr. McCarter: I have no reason to doubt it.

Examiner Burchmore: Previous to 1898 or 1899, there was no tap line at this place?

3303 Mr. McCarter: I think not. That is my understanding. I don't know that to be a fact. There is nothing to indicate that there was.

Examiner Burchmore: When did the Palmetto Lbr. Co. commence milling in this country—in this lumber country?

Mr. McCarter: The present plant, you mean?

Examiner Burchmore: Yes.

Mr. McCarter: I had better explain. I was not there at the time, but I know from general information that the Palmetto Lumber Company was originally located at Palmetto, Texas, about one mile or two miles from the Trinity Valley Southern Railroad Company and delivered their lumber by means of a spur up to the Trinity Valley Southern Railroad Company, and at that time, the Columbia

Lumber Company and the Trinity Valley Southern Railroad Company were owned by the same stockholders, but the Palmetto Lbr. Co. had no connection whatever with the Trinity Valley Southern Railroad Company.

Examiner Burchmore: The Railroad Company was owned by the stockholders of what company?

Mr. McCarter: Of the Columbia Lumber Company.

Examiner Burchmore: Then the Palmetto Lumber Com-
3304 pany bought out the Columbia Lumber Company's saw mill and timber and railroad?

Mr. McCarter: Yes sir.

Examiner Burchmore: Then, treating or considering the Palmetto Lumber Company as being substantially a successor to the Columbia Lumber Company, with respect, at least, to its particular mill and with respect to its relations to this Railroad, on that understanding, I put this question: Was the railroad originally constructed to facilitate the business of the Lumber Company?

Mr. McCarter: Well, my understanding is that they had to have an outlet there some way to get to the Railroad, and they organized this Railroad Company as such outlet.

Examiner Burchmore: The construction antedates the organization?

Mr. McCarter: I presume that before 1898 no allowances or divisions were paid.

Mr. Powell: I think they operated then as the Trinity Valley Railroad Company, and then they re-organized in 1901 as the Trinity Valley Southern, under the laws of the Texas State Commission.

It was a railroad Company then in 1898 or 1899—I don't
3305 remember the exact date—but at any rate, when first built it was the Trinity Valley Railway Company and it was chartered in 190- as the Trinity Valley Southern Railroad Company.

Examiner Burchmore: Was this Railroad originally constructed if you know or are informed, primarily as a Common Carrier to serve the general public, or primarily to give those mills to which it was related an outlet to reach their market?

Mr. McCarter: As a common carrier for the general public, is my general belief.

Examiner Burchmore: And only in a secondary way, as an outlet for those mills?

Mr. McCarter: Yes sir.

Examiner Burchmore: If that is so, it might be assumed that its traffic has been very largely that of the general public from its inception—is that a fact?

Mr. McCarter: I don't quite catch that question?

Examiner Burchmore: The question is perhaps not well put, but it amounts to this: Is it not a fact that in the beginning, the traffic of this road was almost entirely the traffic furnished by the Lumber Companies that control it?

3306 Mr. McCarter: At the beginning?

Examiner Burchmore: Yes.

Mr. Carter: Well, I could not testify to that because I was not there at that time.

Examiner Burchmore: To leave the history of the road for the present, where is the present mill of the Palmetto Lumber Company located?

Mr. McCarter: At Oakhurst, Texas.

Examiner Burchmore: Where is Oakhurst, Texas?

Mr. McCarter: Six miles from Dodge, the I. & G. N. terminus of the Trinity Valley Southern.

Examiner Burchmore: On the Trinity Valley Southern?

Mr. McCarter: Yes sir.

Examiner Burchmore: How far from this Mill at Oakhurst are the nearest forests from which the mill receives its logs?

Mr. McCarter: You might ask Mr. Ford about that; I don't know.

Examiner Burchmore: Are there any private logging roads connected with the Trinity Valley Southern Railroad Company.

Mr. McCarter: Why, the Palmetto Lumber Company has logging roads running all along there crossing our line at some
3307 places.

Examiner Burchmore: These logging roads are temporary in character and removed from time to time as the forests are cut?

Mr. McCarter: I think some portions of them are. Of course a portion of them run up to the Lumber Company, and they have mills around there, and are never moved.

Examiner Burchmore: The mill is at the terminus of the Railroad?

Mr. McCarter: Yes sir.

Examiner Burchmore: What equipment has the Trinity Valley Southern Railroad Company?

Mr. McCarter: Two locomotives and one combination passenger and baggage coach.

Examiner Burchmore: No freight or log cars?

Mr. McCarter: No sir.

Examiner Burchmore: Does it own that equipment?

Mr. McCarter: Yes sir.

Examiner Burchmore: Doe- it lease any additional equipment?

Mr. McCarter: No sir.

Examiner Burchmore: Does it lease any of its equipment
3308 to other companies?

Mr. McCarter: No sir.

Examiner Burchmore: The Trinity Valley Southern Railroad Company participates in joint through rates on lumber to Interstate points?

Mr. McCarter: Yes sir.

Examiner Burchmore: What is the general basis of those rates? That is to say, are they the same from Oakhurst in cents per hundred pounds as the rates published by the I. & G. N. from the group of stations in which Dodge is included?

Mr. McCarter: Yes sir.

Examiner Burchmore: In other words, the Junction point rate is applied on the tap line?

Mr. McCarter: Yes sir.

Examiner Burchmore: What is your division or the basis of your division out of the joint rate?

Mr. McCarter: Well, they vary from anywhere—from two to five cents.

Examiner Burchmore: What is the general basis of this division—describe that.

3309 Mr. McCarter: Well, as a general basis, they are generally based on a percentage of the I. & G. N. earnings. We usually get about 30% of the I. & G. N. rate.

Examiner Burchmore: You get 30% of the I. & G. N. rate and the I. & G. N. retains 70%?

Mr. McCarter: Yes sir.

Examiner Burchmore: You get that 30% for a haul of six miles?

Mr. McCarter: Yes sir.

Examiner Burchmore: What is the average haul that the I. & G. N. performs?

Mr. McCarter: Well, usually, on that basis, about a hundred miles; eighty miles anyway.

Examiner Burchmore: Through what junction does the greater part of the traffic move?

Mr. McCarter: It is pretty well divided equally through Longview, Fort Worth and Houston. That is, the I. & G. N. Junction.

Examiner Burchmore: Those are the principal junctions?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Do you know the I. & G. N. mileage to Longview?

3310 Mr. McCarter: I don't know exactly; somewhere in the neighborhood of 80 or 90 miles.

Examiner Burchmore: What is the approximate distance to Fort Worth?

Mr. McCarter: By the I. & G. N.?

Examiner Burchmore: Yes sir.

Mr. McCarter: I expect something over one hundred miles—nearly two hundred miles, I expect by the I. & G. N. Railroad.

Examiner Burchmore: Of course, we can figure the distance.

Mr. McCarter: It is nearly two hundred miles, yes, sir.

Examiner Burchmore: What is the distance to Houston?

Mr. McCarter: Seventy-five miles.

Examiner Burchmore: And I understand that in a general way, your company receives a division of from two to five cents for a haul of six miles while the I. & G. N. retains a balance, which would be I suppose from five to ten—five to fifteen cents——

Mr. McCarter: Yes sir.

Examiner Burchmore: For a haul of from seventy-five to two hundred miles?

3311 Mr. McCarter: Yes sir. The five cents that I mention only applies to points on the I. & G. N. where the shipment moves from our line to points on their line. They allow us fifty per cent of the rate, not to exceed our local, and in that way, we get five cents, which is our local.

Mr. Dean: I think that only applies to intra-state shipments.

Mr. McCarter: Yes sir.

Examiner Burchmore: Is not your highest interstate division three cents? What is your chief market?

Mr. McCarter: Well it is pretty well divided, Texas and interstate points, about fifty per cent each way.

Examiner Burchmore: What is your chief interstate market?

Mr. McCarter: East of the Mississippi river is the principal market where the principal part of the lumber moves.

Examiner Burchmore: Are joint rates applied on that traffic or do they break on the Mississippi River?

Mr. McCarter: They break on the Mississippi River.

Examiner Burchmore: What is the rate on the Mississippi River?

Mr. McCarter: Fifteen cents to St. Louis; 16 cents to Thebes and Cairo.

Examiner Burchmore: What do you get out of the 18 cent
3312 rate?

Mr. McCarter: Two cents. That is, one which moves via a certain line, and via some lines, three cents.

Examiner Burchmore: You route most of your traffic at three cents?

Mr. McCarter: I did for a while until I got in a box and quit.

Examiner Burchmore: What embar-assment did that involve?

Mr. McCarter: We got three cents on the M. K. & T. At first we had through rates via that road and later on the through rates were cancelled by the Katy and only applied by the Texas and Pacific and since then the Iron Mountain.

Examiner Burchmore: Are your division sheets filed with the Commission? I don't see any division sheets around?

Mr. McCarter: The I. & G. N. issue them and would naturally file them with the commission.

Examiner Burchmore: I think we have a complete set of yo-r divisio- sheet. Does your company publish and file with the
3313 commission any tariff of rates between Dodge and Oakhurst?

Mr. McCarter: The Railroad commission of Texas publishes those tariffs, and we——

Examiner Burchmore: You don't have any such tariffs with the Interstate Commission?

Mr. McCarter: No sir.

Examiner Burchmore: In order to apply the rates on interstate traffic?

Mr. McCarter: Yes sir we concur in the tariff; we don't issue any tariff ourselves.

Examiner Burchmore: My question refers to local rates on your line which would apply to other traffic in the absence of a give- joint rate?

Mr. McCarter: No, sir, we have not any tariff.

Examiner Burchmore: You know, most railroads file such local state rates with the Interstate Commerce Commission in order to be sure they have the same rate applicable to them for a joint through rate, as a matter of policy.

Mr. Ford: We did not know that.

3314 Examiner Burchmore: It is perfectly proper not to, but it

is frequently done. Are you a party to joint through rates to and from interstate destinations on classes and commodities?

Mr. McCarter: Yes sir.

Examiner Burchmore: Indicate what the division of those rates is?

Mr. McCarter: As a division, we get 10% of the St. Louis and Kansas City proportional rate.

Examiner Burchmore: Well, are all stations on your line grouped?

Mr. McCarter: They take the same grouping as the I. & G. N.

Examiner Burchmore: Does the same rate apply—class rate—from Oakhurst, as from Dodge, on the I. & G. N.?

Mr. McCarter: Yes sir.

Examiner Burchmore: And you get a division of what—what division do you get?

Mr. McCarter: 10% of the proportion south of the river.

Examiner Burchmore: 10% of the proportion south of the Missouri river.

Mr. McCarter: Yes, or the Mississippi river as the case may be.

3315 Examiner Burchmore: How many stations are there on your line?

Mr. McCarter: We have one station at each end and two flag stations.

Examiner Burchmore: Any station buildings?

Mr. McCarter: We have a building at each place—four stations—except that there is a joint station at Dodge with the I. & G. N.

Examiner Burchmore: Is there a general agent at Dodge?

Mr. McCarter: Yes sir.

Examiner Burchmore: Paid by your company?

Mr. McCarter: Yes, sir.

Examiner Burchmore: What is your proportion?

Mr. McCarter: 50% of the expenses of the station?

Examiner Burchmore: Well he is carried on the I. & G. N. pay roll?

Mr. McCarter: Yes, they bill on us.

Examiner Burchmore: Do you have a regular station agent at Oakhurst?

Mr. McCarter: Yes sir.

Examiner Burchmore: Is he carried exclusively on the Railroad Company's pay roll?

3316 Mr. McCarter: Yes sir.

Examiner Burchmore: He receives no compensation and performs no service for the lumber company?

Mr. McCarter: No sir.

Mr. Powell: You had an office building and depot at Oakhurst?

Mr. McCarter: And two waiting rooms, colored and white.

Examiner Burchmore: That office is not used by the lumber company also?

Mr. McCarter: No sir.

Examiner Burchmore: What employees are at work in that building?

Mr. McCarter: My office is in there and the agent. That is all the permanent offices in there.

Examiner Burchmore: You are the operating superintendent of the Railroad?

Mr. McCarter: I am the auditor.

Examiner Burchmore: Is there any superintendent of operation?

Mr. McCarter: Yes sir, A. L. Black is Superintendent.

Examiner Burchmore: He is Vice-President of the Lumber Company also?

3317 Mr. McCarter: Yes sir.

Examiner Burchmore: Does the Palmetto Lumber Company own any locomotives and cars?

Mr. McCarter: Yes sir.

Examiner Burchmore: State what they are.

Mr. McCarter: I could not state; I only know that they own them. I am not connected with that Company.

Examiner Burchmore: If I say that they are supposed to own three locomotives and twenty four cars on their line running from or to Snowtown, would you say that is correct?

Mr. McCarter: I could not say how many they own, sir; I don't know how many. Mr. Ford can probably give you that information.

Examiner Burchmore: What officers of the railroad Company receive salaries fro- the railroad Company?

Mr. McCarter: The Superintendent.

Examiner Burchmore: And the Auditor?

Mr. McCarter: What is the question?

Examiner Burchmore: What officers of the Railroad Company receive salaries from the Railroad Company?

Mr. McCarter: Superintendent and Auditor.

Examiner Burchmore: And no other officers receive a

3318 salary?

Mr. McCarter: No sir.

Examiner Burchmore: What is the Superintendent's salary from the Railroad Company?

Mr. McCarter: Three Hundred dollars a year.

Examiner Burchmore: Does he perform active services for that salary?

Mr. McCarter: He is in charge there. He is also manage- of the same class of work for the lumber company. Of course the company could not afford to have a man of that experience exclusively for the railroad, and therefore they employ him jointly.

Examiner Burchmore: Is his salary excessive for the amount of services he renders the railroad company?

Mr. McCarter: I don't know; I should not think it is.

Examiner Burchmore: What track employees has the railroad Company?

Mr. McCarter: A section foreman and a section crew.

Examiner Burchmore: Does that section gang spend any part of its time at work on the private tracks of the log road?

3319 Mr. McCarter: No sir.

Examiner Burchmore: That entire time is devoted to maintaining the railroad company's track?

Mr. McCarter: Yes sir.

Examiner Burchmore: What train employees are there?

Mr. McCarter: We have an engineer, a fireman, a conductor and a brakeman.

Examiner Burchmore: They devote their entire time to the railroad's service?

Mr. McCarter: They do yes sir.

Examiner Burchmore: What is your train service?

Mr. McCarter: One round trip each day; one train each way.

Examiner Burchmore: One regular schedule?

Mr. McCarter. Yes sir.

Examiner Burchmore: Do you have a time table?

Mr. McCarter: We have not a published time table, but it is published in the guides.

Examiner Burchmore: You mean the I. & G. N. train?

Mr. McCarter: Yes sir, make connections with it.

Examiner Burchmore: Have you any other employees than those I have referred to—general officers, track and train?

3320 Mr. McCarter: No sir, I don't believe we have except the agent.

Examiner Burchmore: The station agent?

Mr. McCarter: Yes sir.

Examiner Burchmore: What if any facilities have you for the handling of less than car load trains?

Mr. McCarter: We have a depot and warehouse.

Examiner Burchmore: In a small scale.

Mr. McCarter: Only a small scale for ways.

Examiner Burchmore: Any wagon scales?

Mr. McCarter: No sir.

Examiner Burchmore: Any track scales?

Mr. McCarter: No sir.

Examiner Burchmore: The weighing is all performed by the I. & G. N.?

Mr. McCarter: We bill the lumber out at an estimated weight and it is weighed en route.

Examiner Burchmore: Is it a standard gauge road?

Mr. McCarter: Yes sir.

Examiner Burchmore: Will you state the weight of the rails?

Mr. McCarter: Thirty-five pounds, I think.

Examiner Burchmore: It is substantially built?

3321 Mr. McCarter: Yes sir. For one hundred thousand pound capacity cars.

Examiner Burchmore: Will it handle one hundred thousand pound capacity cars running at a reasonable rate, or running slowly.

Mr. McCarter: At the average speed that they go all the time—a regular train——

Examiner Burchmore: On an average train run?

Mr. McCarter: Yes sir.

Examiner Burchmore: Has it substantial bridges?

Mr. McCarter: Yes sir.

Examiner Burchmore: It is well built for that character of road?

Mr. McCarter: Yes sir.

Examiner Burchmore: What is the chief tonnage of your road?

Mr. McCarter: Why, lumber is the greatest portion of it, naturally it would be as it is in a lumber district.

Examiner Burchmore: Can you estimate or state accurately the total tonnage for the last fiscal year?

Mr. McCarter: Yes sir, in just a minute; the total tonnage is 127,283 tons.

3322 Examiner Burchmore: Are you going to file that statement?

Mr. McCarter: We can do so.

Mr. Powell: Yes sir, we have prepared it to file.

Examiner Burchmore: Of that, what amount was lumber?

Mr. McCarter: 73%. That is, 73% of the revenue. I never figured out the tonnage.

Examiner Burchmore: That was tons you gave?

Mr. McCarter: Yes sir, but the revenue figures 73%.

Examiner Burchmore: For the preceding year, your total tonnage seems to have been 36,481.

Mr. McCarter: I called it wrong. You had better strike that out. The tonnage for the fiscal year ending June 30, 1910, was 30,148 tons of which 71% was lumber—71% of the revenue.

Examiner Burchmore: Was that about the same proportion as obtained the previous year?

Mr. McCarter: The tonnage for the previous year covers 12 months but the revenues only cover 7 months for the previous year as the books were not kept correctly at the time I took charge, in December, 1908, and I had no way of getting at the figures previous to 1908.

Examiner Burchmore: In referring to lumber, do you
3323 mean the forest products of all kinds, or simply lumber?

Mr. McCarter: Forest products of all kinds.

Examiner Burchmore: Any staves and headings and such stuff made on your line?

Mr. McCarter: No sir.

Examiner Burchmore: Any other forest products other than lumber?

Mr. McCarter: I don't think so. We had some few thousand of shingles in there. I don't know that we have anything else out.

Examiner Burchmore: Aside from the lumber movements, was there any other traffic handled by the railroad company for the lumber company?

Mr. McCarter: Well, shipments come in there—shipments for the company—I never know who they are consigned to as I make my report from the agent's report and in that way I would not know who they are consigned to; but I presume the Palmetto Lbr. Co. is buying stuff there all the time and it goes there the same as anybody else's.

Examiner Burchmore: Does the Palmetto Lbr. Co. have any commissaries or company stores on the line?

Mr. McCarter: One commissary.

3324 Examiner Burchmore: Where is that located?

Mr. McCarter: Right at the mill—at the Palmetto Lumber Company.

Examiner Burchmore: Are there any other stores along the line?

Mr. McCarter: Yes sir.

Examiner Burchmore: Does the merchandise and do the other supplies sold by this company commissary move over the railroad's rails?

Mr. McCarter: Yes sir.

Examiner Burchmore: Under joint rates?

Mr. McCarter: Yes sir.

Examiner Burchmore: On which the railroad receives a division?

Mr. McCarter: Yes sir.

Examiner Burchmore: These commissary supplies are included in the statement of merchandise handled?

Mr. McCarter: Yes sir.

Examiner Burchmore: What proportion of the total merchandise movement consists of this Company's supplies?

Mr. McCarter: I could not say, as I have never made a statement separating the consignees.

3325 Examiner Burchmore: Is it your impression that there is a considerable movement of merchandise handled by the general public?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Over your line?

Mr. McCarter: Yes sir.

Examiner Burchmore: As much as 10% of your traffic?

Mr. McCarter: It has averaged for the last four years about 27%—other than lumber?

Examiner Burchmore: Is a substantial proportion of that 27% composed of merchandise for the Company's stores?

Mr. McCarter: Well, I could not say, as to the exact amount the company gets, but there are about a dozen or more other merchants there that we bring merchandise in to besides the lumber company.

Examiner Burchmore: Small concerns?

Mr. McCarter: Well, one point located about 8 miles from Oakhurst is called Point Blank; that is served from Oakhurst and we bring in the supplies into that community there, and at Snowtown, there is about a dozen merchants who carry anywhere from $5 to $8,000.00 worth of stock I suppose.

3326 Examiner Burchmore: Well, I can cut it short—this part of the examination—by the question, that you will furnish a statement of that tonnage; not a statement simply similar to that contained in the annual report but a statement showing the total movement of lumber for the Palmetto Lumber Company?

Mr. McCarter: Of lumber for the Palmetto Lumber Company—shipped by them?

Examiner Burchmore: When I say that, I mean that you shall include any lumber manufactured in their plant and which may be shipped on account of someone who has bought it F. O. B. point of

origin. Stripped of technical questions, we want the lumber that came from that mill. Show separately in that the total amount of lumber handled on account of other parties, and the total amount of merchandise handled for the Company's commissaries if that can be indicated, and the total amount of merchandise handled for the rest of the public and then show how much farm products—cotton or anything else.

Mr. Neal: The statement shows the cotton.

3327 Mr. McCarter: For what period?

Examiner Burchmore: The fiscal year ending June 30, 1910. Now if you desire, you may also show it down to date, but that is optional and, if so, must be shown separately. Give these figures, not only in tonnage but in revenue both. If you will prepare and file such an exhibit, it may be considered a part of your testimony. Of course, it will have to be checked against the figures in the annual report to show that the figures are correct. I think, with that, we can close this phase of the examination. Do you carry mails?

Mr. McCarter: Yes sir.

Examiner Burchmore: Under standard government contracts?

Mr. McCarter: Yes sir.

Examiner Burchmore: For Oakhurst?

Mr. McCarter: And Point Blank.

Examiner Burchmore: Do you carry any express?

Mr. McCarter: Yes sir.

Examiner Burchmore: With what company have you a contract?

Mr. McCarter: With the Pacific Express.

3328 Examiner Burchmore: I suppose that provides for 50% of the earnings?

Mr. McCarter: 40% I believe we have.

Examiner Burchmore: Do you carry passengers?

Mr. McCarter: Yes sir.

Examiner Burchmore: Those passengers ride on tickets?

Mr. McCarter: Yes sir.

Examiner Burchmore: Sometimes they pay train fare.

Mr. McCarter: If they do not purchase tickets, the conductor collects cash fares and gives them a receipt.

Examiner Burchmore: You carry the Mill employees free?

Mr. McCarter: No sir.

Examiner Burchmore: Does the Palmetto Lumber Company furnish tickets to their employees?

Mr. McCarter: I never heard of it.

Examiner Burchmore: Do you issue any annual passes?

Mr. McCarter: Yes sir.

Examiner Burchmore: Interchange passes with trunk lines?

Mr. McCarter: Yes sir.

Examiner Burchmore: Do you issue any passes for the officers of the Lumber Company as such?

Mr. McCarter: As officers of the Palmetto Lbr. Co.?

3329 Examiner Burchmore: Yes.

Mr. McCarter: No sir.

Examiner Burchmore: What interstate transportation is held by the officers of the railroad company?

Mr. McCarter: Why, I will look over and see. I will have to read them to give them to you. The officers of the lumber company?

Examiner Burchmore: The Railroad company officers?

Mr. McCarter: What interstate transportation is held?

Examiner Burchmore: By officers of the railroad Company. I presume that the officers of the lumber company do not hold any transportation as such?

Mr. McCarter: The I. & G. N.—but that is not interstate.

Examiner Burchmore: Don't give all the roads you hold passes on. You hold a dozen or more?

Mr. McCarter: A dozen or more; a dozen and a half.

Examiner Burchmore: Of interstate passes.

Mr. McCarter: No sir, not of interstate. You just want the interstate?

Examiner Burchmore: Yes, interstate.

Mr. McCarter: I will give you the Interstate.

Examiner Burchmore: Any Chicago and St. Louis?

3330 Mr. McCarter: Yes sir, six.

Examiner Burchmore: That is a sufficient statement. You use those passes?

Mr. McCarter: Yes sir.

Examiner Burchmore: You do not travel on lumber business?

Mr. McCarter: No sir.

Examiner Burchmore: You do all your service for the railroad Company?

Mr. McCarter: Yes sir.

Examiner Burchmore: If you go to Chicago, you don't do any lumber errands there?

Mr. McCarter: No sir.

Examiner Burchmore: Do the other officers? Is the President of the railroad company supplied with any transportation?

Mr. McCarter: Yes sir.

Examiner Burchmore: To about the same extent as you are?

Mr. McCarter: Yes sir.

Examiner Burchmore: Are any of the officers supplied with passes?

Mr. McCarter: The Vice President and Superintendent have I. & G. N. passes.

3331 Examiner Burchmore: Has the Sales Manager of the Lumber company any passes?

Mr. McCarter: I don't think they have any sales manager.

Examiner Burchmore: How do they sell their lumber?

Mr. McCarter: They are manufacturers; they don't sell it except to wholesale dealers.

Examiner Burchmore: They have sales agents?

Mr. McCarter: Yes sir.

Examiner Burchmore: Those sales agents sell on commission?

Mr. McCarter: I don't know how they sell.

Examiner Burchmore: I presume that this Company transacts *his* business the same as any other company does?

Mr. Ford: Yes sir.

Examiner Burchmore: And what we hear from the others, we may assume applies here.

Mr. McCarter: We have no traveling salesmen at all; it has sales agencies.

Examiner Burchmore: But there is nothing peculiar about its way of doing business?

Mr. McCarter: The custom- of the trade apply here I guess.

Examiner Burchmore: Does the Palmetto Lumber Company transport the logs to the Mill?

3332 Mr. McCarter: Yes sir.

Examiner Burchmore: The Railroad company does not go and get the logs?

Mr. McCarter: No sir.

Examiner Burchmore: The private tracks of the lumber company extend to the Mill?

Mr. McCarter: Yes sir.

Examiner Burchmore: They reach the mill directly?

Mr. McCarter: Yes sir.

Examiner Burchmore: Then I assume that the first moment that the Railroad Company has anything to do with the lumber or logs of the Palmetto Lbr. Co. is at the moment when the manufactured lumber is ready for shipment?

Mr. McCarter: Yes sir.

Examiner Burchmore: I assume also that the Trinity Valley Southern Railroad Company obtains its empty car supply from the I. & G. N.?

Mr. McCarter: Yes sir.

Examiner Burchmore: I assume that it moves those cars empty from the junction points up to the mill?

Mr. McCarter: Yes sir.

Examiner Burchmore: And there place them for loading?

3333 Mr. McCarter: Yes sir.

Examiner Burchmore: Are they loaded by the employees of the lumber company?

Mr. McCarty: Yes sir.

Examiner Burchmore: Do the employees of the railraod company assist in the loading?

Mr. McCarter: No sir.

Examiner Burchmore: Who issues the Bills of Lading for interstate shipments?

Mr. McCarter: The agent of the Trinity Valley Southern Railroad company.

Examiner Burchmore: At what point?

Mr. McCarter: Oakhurst.

Examiner Burchmore: The mill is actually located at Oakhurst?

Mr. McCarter: Yes sir.

Examiner Burchmore: These Bills of Lading are dated at Oakhurst on the date when the lumber is ready to go?

Mr. McCarter: Yes sir.

Examiner Burchmore: To its interstate destination?

Mr. McCarter: Yes sir.

Examiner Burchmore: The employees of the railroad
3334 Company with their locomotives, then move the loaded car under billing down to the junction with the I. & G. N. Is this their placed on the exchange track?

Mr. McCarter: Yes sir.

Examiner Burchmore: The I. & G. N. then takes it to destination?

Mr. McCarter Yes sir.

Examiner Burchmore: What way bills are used?

Mr. McCarter: We have the Trinity Valley Southern waybills. We bill it at Oakhurst and the lumber is usually billed through.

Examiner Burchmore: You usually bill it through to interstate destination?

Mr. McCarter: Yes sir.

Examiner Burchmore: Or at least to Fort Worth?

Mr. McCarter: At least to the junction, yes sir.

Examiner Burchmore: That shows the Trinity Valley Southern——

Mr. McCarter: As the originating carrier.

Examiner Burchmore: And participating up to Dodge?

Mr. McCarter: Yes, sir.

Examiner Burchmore: It shows its division as from two to five cents?

3335 Mr. McCarter: It does not show on the way bill, that is made through a monthly inter-line settlement with the I. & G. N.

Examiner Burchmore: Where are the funds of the Railroad Company kept?

Mr. McCarter: At Galveston, Texas.

Examiner Burchmore: In a bank?

Mr. McCarter: The State National Bank.

Examiner Burchmore: Kept separate and distinct from the lumber company's funds?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Did I ask you whether or not it keeps its accounts in conformity with the Interstate Commerce Commission's rules?

Mr. McCarter: No, sir.

Examiner Burchmore: Does it?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Makes monthly reports?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Extended reports? Reports of its expenses?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Are the cars equipped with proper
3336 safety devices?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Do you ever have any accidents on your road?

Mr. McCarter: Sometimes.

Examiner Burchmore: Do you report these to the Interstate Commerce Commission?

Mr. McCarter: Yes, sir.

Examiner Burchmore: Has the Company been named as defendant in any personal injury suit so far as you know?

Mr. McCarter: Not since I have been connected with them, no sir.

Cross-examination:

Mr. Powell: This Company is incorporated under the general statutes of Texas?

Mr. McCarter: Yes, sir.

Mr. Powell: It is subject to the jurisdiction of the State Railroad commission of Texas?

Mr. McCarter: Yes, sir.

Mr. Powell: Does it make its report to the State Railroad Commission as that commission requires?

Mr. McCarter: Yes, sir.

3337 Mr. Powell: Does it own its own right of way?

Mr. McCarter: Yes, sir.

Mr. Powell: What is the width of that right of way?

Mr. McCarter: One hundred feet I believe.

Mr. Powell: The road bears 35 pound steel rails I believe you said?

Mr. McCarter: Yes, sir.

Mr. Powell: The rails are steel?

Mr. McCarter: Yes, sir.

Mr. Powell: Has it got ballast?

Mr. McCarter: Yes, sir, some portion of it is ballasted.

Mr. Powell: It owns its own spur tracks does it?

Mr. McCarter: Yes, sir.

Mr. Powell: Now then with reference to the length of this line, for six miles does not the line own its own spur lines, in the station at Oakhurst? Also the company's loading sheds?

Mr. McCarter: Yes, sir.

Mr. Powell: It loads the cars on our tracks—the tracks of the Trinity Valley Southern?

Mr. McCarter: Yes, sir.

Mr. Powell: And possibly there are seven miles of track

3338 entirely?

Mr. McCarter: We have a spur at Youngstown, a spur at Snowtown, and two spurs at Oakhurst, and a coal bin, and also a spur down to the Palmetto Lumber Company's plant-mill?

Mr. Powell: It has approximately six *lines* of main lines to Oakhurst?

Mr. McCarter: Yes, sir.

Mr. Powell: I was just trying to explain where the seven and nine tenths (7.9) miles comes in. Now then, with reference to the traffic of this road, it is general traffic, isn't it?

Mr. McCarter: Yes sir.

Mr. Powell: Without getting the exact amount, can you state how much cotton you have hauled this season?

Mr. McCarter: So far?

Mr. Powell: Yes, how much cotton have you hauled this season?

Mr. McCarter: I presume about close to about one thousand bales.

Mr. Powell: Is that about the average crop that you haul?
3339 Mr. McCarter: A little better than the average, I believe.
Mr. Powell: And with reference to general merchandise, what size town is Oakhurst?
Mr. McCarter: About fifteen hundred, I think; that is what they claim.
Mr. Powell: There was an old settlement there before the lumber company's plant was put there?
Mr. McCarter: The old town of Snowtown—well, it is still there.
Mr. Powell: Are not 10 or 12 stores there at Snowtown?
Mr. McCarter: Yes sir, about that.
Mr. Powell: Those people had no connection with the Trinity Valley Southern Railroad Company or the Palmetto Lbr. Co.
Mr. McCarter: Not that I know of.
Mr. Powell: Some of those stores carry a good sized stock.
Mr. McCarter: Yes sir.
Mr. Powell: About how much would you state that stock of half a dozen of those stores amounts to?
Mr. McCarter: As I said a while ago, anywhere from five to eight thousand dollars.
3340 Mr. Powell: That much stock in about six of those stores?
Mr. McCarter: Yes sir.
Mr. Powell: I believe you said you carried mail and express?
Mr. McCarter: Yes sir.
Mr. Powell: You do a general common carrier business?
Mr. McCarter: Yes sir.
Mr. Powell: You treat the Palmetto Lbr. Co. like you do anybody else?
Mr. McCarter: Yes sir.
Mr. Powell: You haul material and lumber for anybody that has got it, won't you?
Mr. McCarter: Yes sir.
Mr. Powell: You have done it, have you not?
Mr. McCarter: Yes sir.
Mr. Powell: Prior to the time that the Palmetto Lbr. Co. bought out the Columbia Lbr. Co.'s plant, they shipped as much lumber over this road as the Palmetto Lbr. Co., did not they, approximately?
Mr. McCarter: I presume they did. I was not there prior to the time that the Palmetto Lbr. Co. took over the Columbia plant.
3341 Mr. Powell: You know they haul many cars?
Mr. McCarter: I know they had a mill located at Palmetto. After my connection with the Trinity Valley Southern Railroad, the Palmetto Lumber Company shipped about as much as the Oakhurst mill.
Examiner Burchmore: Why don't they rebuild up that mill?
Mr. Powell: They had bought this Columbia plant at that time. Didn't this mill burn recently—the San Jacinto Co.?
Mr. McCarter: Recently, I think, there was something burned over there, but I believe they moved the saw mill as well as I remember.
Mr. Powell: You are incorrect. The Mill burned and they sold

the timber. But this railroad company did serve that company for a while?

Mr. McCarter: Yes, as a common carrier.

Mr. Powell: Now what is the nature of the country along there? Is it agricultural?

Mr. McCarter: It is developing very fast and being developed into farms. They are moving and considerable farming going on around there.

Mr. Powell: Don't you serve a large portion of the northwest part of San Jacinto county—Point Blank, you say? These peo-
3342 ple all go to Oakhurst for railroad privileges?

Mr. McCarter: Yes sir.

Mr. Powell: There is no other railroad in San Jacinto county except in the southeast corner?

Mr. McCarter: No, sir.

Mr. Powell: How far is the H. E. & W. T. road from your line?

Mr. McCarter: I think about 18 or 20 miles, something like that; probably more.

Mr. Powell: Do you remember how far from your town to Cold Springs?

Mr. McCarter: About 18 miles.

Mr. Powell: How far from Cold Springs to Shepard?

Mr. McCarter: 42 miles.

Mr. Powell: And how far between those two roads?

Mr. McCarter: About 30 miles.

Mr. Powell: San Jacinto county then, in its northwest portion, has no facility for railroad traffic except this line?

Mr. McCarter: No sir.

Mr. Powell: That is true, is it?

Mr. McCarter: Yes sir.

3343 Examiner Burchmore: Are there any inhabitants to require a railroad?

Mr. McCarter: Yes sir.

Mr. Powell: Do you know the population of San Jacinto county?

Mr. McCarter: No sir, I do not.

Mr. Powell: I think it is some twelve thousand under the recent census.

Examiner Burchmore: How far is the terminus of the private logging road that runs up into the northeasterly direction out of Snowtown, I judge? How far is the end of that road from the B. & G. N.?

Mr. McCarter: I don't know.

Mr. Powell: Do you know Mr. Ford? How close are you to the Beaumont and Great Northern?

Mr. Ford: Across Trinity River, I guess it must be about fifteen miles to Oakhurst, to the nearest point of the Beaumont and Great Northern.

Mr. Powell: But you have a private line?

Mr. Ford: You mean our tram road?

Mr. Powell: Yes.

3344 Mr. Ford: I think we go within six or eight miles of them across Trinity river.

Mr. Powell: What kind of road has the Beaumont & Great Northern?

Mr. Ford: A very good road.

Mr. Powell: Is that a tap line?

Mr. Ford: It was included in the original tap line once, but I think it has been since that time——

Mr. Powell: It is about a forty mile road now I think.

Examiner Burchmore: Are you planning to build across?

Mr. Ford: No, the Trinity river is practically a barrier; it would cost $100,000.00 to bridge it.

Mr. Powell: Mr. McCarter, there is a considerable amount of timber adjacent not owned by the Palmetto Lbr. Co., isn't there?

Mr. McCarter: I understand there is.

Examiner Burchmore: Has the Palmetto Lbr. Co. been acquiring timber in recent years?

Mr. McCarter: I don't know about that, I could not say.

Examiner Burchmore: There are no other mills on that line?

Mr. McCarter: Not at present, no, sir.

3345 A. C. FORD was called as a witness, and being first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: You have heard Mr. McCarter's testimony; is it in your opinion accurate?

Mr. Ford: Yes. I think in a few instances, I noticed some discrepancies in it.

Examiner Burchmore: Possibly as to details?

Mr. Ford: Yes, in the main, after details.

Examiner Burchmore: It conveys a correct impression to you?

Mr. Ford: Yes, I think it does.

Examiner Burchmore: Do I understand that the majority of the stock of this Company is now owned by Mr. N. F. Gibs, a banker?

Mr. Ford: Yes sir.

Examiner Burchmore: Does he own that in his own name and right?

Mr. Ford: Yes sir.

Examiner Burchmore: How did he acquire that stock?

Mr. Ford: I had better exp-ain to you that this property was bought from the Cary lumber interests of Chicago just two
3346 years ago this December. Those interests originally built this mill and this railroad. At the time that they built it, the intention was to make quite a railroad proposition out of the property, but they stopped at the town of Oakhurst and never extended it. The Palmetto Lbr. Co. interests of which I own about 40%, and control practically 90% of it wished to acquire the Cary lumber timbering and mill interests at Oakhurst. In order to do so however, it was necessary to buy their entire interests out, including the stock in the Trinity Valley Railroad. I went to Mr. Gibbs, who was a particular friend of mine with whom I had a good many and varied dealings, and who never was and never had been a stockholder in the Palmetto

Lbr. Co. and tried to interest him in the purchase of a part of their investment, the Trinity Valley Southern Railroad. I finally succeeded in doing so and he and I jointly, without any stockholders of the Palmetto Lbr. Co. having any interest in the matter, made a trade with Cary and bought out the Trinity Valley Southern stock. That was two years ago. Last February I sold outright my half interest to Mr. Gibbs, retaining only one share so that I might be a
3347 nominal officer of the road, and in a general way represent the investment that my friend has in there. That will acquaint you pretty well.

Examiner Burchmore: Is Mr. Gibbs your banker?

Mr. Ford: Yes, to a certain extent he was my banker. We bought our original timber from Gibbs eight or ten years ago.

Examiner Burchmore: Now he practically owns the entire capital stock?

Mr. Ford: Yes, out of 200 shares, he owns 194.

Examiner Burchmore: Are there any bonds of the railroad?

Mr. Ford: No sir.

Examiner Burchmore: Any indebtedness outside of current liabilites?

Mr. Ford: No sir, no liabilities of any kind that I know of.

Examiner Burchmore: Mr. Gibbs holds no stock in the Palmetto Lbr. Co.

Mr. Ford: None whatever.

Examiner Burchmore: Does Mr. Gibbs or his bank hold any mortgage on the property of the Palmetto Lbr. Co. or its
3348 bonds?

Mr. Ford: Yes, he did at one time own what you might call the bond of our company to the extent of $200,000.00. Those bonds have, however, been recently liquidated by us and we do not owe Mr. Gibbs anything any more.

Examiner Burchmore: How were they liquidated?

Mr. Ford: By selling to him timber we own in another part of the state of Texas?

Examiner Burchmore: Mr. Gibbs has no interest in this part of Texas within a short radius of ——?

Mr. Ford: He owns quite a lot of land all thru that section—he is quite an extensive land owner.

Examiner Burchmore: We are going into that quite minutely.

Mr. Ford: I am anxious to give you as clear an idea as I can.

Examiner Burchmore: To give you an example, I had one tap line some months ago who came to us and frankly said,—the lumber people said that they had sold the railroad outright to a banker in the east, and divested themselves entirely of all interest, but within six months, we found that the road had been sold
3349 outright back to the original holders and the lumber tracts sold to somebody else. Within six months there was another complete flop in some other direction. So that it appears that rather than having actually sold all the railroad property to foreign interest, it was sort of a financial re-arrangement of the property,

and it is perhaps essential in this case to know just who owned the railroad.

Mr. Ford: I am glad to give you any light I can on that question and furnish you with any information that may help you.

Examiner Burchmore: Aside from any legal questions or technical questions of any sort, do you say that the railroad is not now owned or controlled through stock interest or otherwise, by the interest- that control the Palmetto Lbr. Co.?

Mr. Ford: Yes, sir.

Examiner Burchmore: Completely divorced of any interest or control in the matter?

Mr. Ford: Yes, sir.

Examiner Burchmore: Does Mr. Gibbs or his bank own
3350 any timber holdings along this railroad or near it?

Mr. Ford: No, sir, we have bought from Mr. Gibbs everything outside of some hardwood timber left in that country.

Examiner Burchmore: I mean, Mr. Gibbs, in buying this railroad is not going to open up a saw mill or anything like that and has no such intention?

Mr. Ford: He has no such intention. His interest in the matter came from the fact that he lives at Huntsville about twelve miles west of Dodge on the I. & G. N.

Examiner Burchmore: Are there any extensions being planned in this line?

Mr. Ford: Yes, sir.

Examiner Burchmore: For the immediate future?

Mr. Ford: Yes sir, we are planning for the immediate future.

Examiner Burchmore: For what purpose?

Mr. Ford: The purpose is to connect, to go thru the country, south of San Jacinto country and to connect up a line on the south—giving an outlet on the south with the H. E. & W. T. and Santa Fe, originating tonnage for mills located on those roads.

3351 Examiner Burchmore: This extension will be an ostensible common carrier?

Mr. Ford: Yes, sir; most of the road is already that, but held in private hands. The intention is to connect the property up and make it a common carrier.

Examiner Burchmore: The Palmetto Lbr. Co. retains ownership and control of its private tap road?

Mr. Ford: Yes, sir.

Examiner Burchmore: Is it not contemplated to connect the tap road and receive a division through that?

Mr. Ford: No sir: In pursuance of this plan, it was contemplated to sell to the Trinity Valley Southern a portion of their tram road if that plan was carried out—to make a bona fide sale for a certain amount to the Trinity Valley Southern Railroad of about ten miles of their logging road. That was contemplated?

Examiner Burchmore: For the maintenance and continuation of the tap line division, you have no plan in connection with constructing another tap line to enable this same mill to retain its division?

Mr. Ford: No sir, none whatever.

3352 Examiner Burchmore: Do you receive any benefit from the division now?

Mr. Ford: None whatever. Either directly or indirectly.

Examiner Burchmore: What is the capital stock of the Trinity Valley Southern?

Mr. Ford: Two hundred thousand dollars, issued.

Examiner Burchmore: Issued?

Mr. Ford: Yes, sir.

Examiner Burchmore: Mr. Gibbs owns the majority of that?

Mr. Ford: Yes, sir.

Examiner Burchmore: Has it been a dividen*t* paying company?

Mr. Ford: Yes, it has, I think, made money every year.

Examiner Burchmore: State in a general way what the returns have been for the past years?

Mr. Ford: I am not familiar of course, up to the time we took hold two years ago, except in a general way, but I have always understood it made money for its former owners. During the last two years, Mr. McCarter has the figures of the net earnings.

Examiner Burchmore: What was the rate of dividend?

Mr. Ford: We declared one dividend since we have had it.

3353 out of the surplus, of 10% at the annual meeting last February, this year.

Examiner Burchmore: How long had it taken to accumulate that surplus?

Mr. Ford: About a year we had owned the company.

Examiner Burchmore: There was no*n* surplus when you took it?

Mr. Ford: No sir, the stock carried no especial surplus.

Examiner Burchmore: That 10% was an extraordinary showing in view of the past history of the road?

Mr. Ford: No sir, it was not the entire earnings.

Examiner Burchmore: What surplus had been accumulated since?

Mr. Ford: I will explain here, Mr. Burchmore, that after that or about that time, in December, the Palmetto Lbr. Co. mill at Palmetto burned and the Trinity Valley Southern Railroad had about eight cars belonging to foreign roads on their rails which burned and which carried no insurance. They lost $14 or $15,000.00 which they had to stand out of their earnings. All that was charged off the earnings of the last fiscal year, as nearly nominal. I

3354 have not the figures but I know that for the last 12 months, we only had nominal earnings.

Examiner Burchmore: You are still president of the Railroad Company?

Mr. Ford: Yes, sir.

Examiner Burchmore: Elected at a meeting of the stockholders?

Mr. Ford: Yes sir.

Examiner Burchmore: An actual meeting of the stockholders?

Mr. Ford: Yes sir an actual meeting.

Examiner Burchmore: You still control the policies of the company?

Mr. Ford: Well, when you speak of controlling—I do so on the advice and counsel of the owner of it, Mr. Gibbs. I control however, all of its local affairs in the broadest sense.

Examiner Burchmore: Are you and Mr. Gibbs partners in any enterprise?

Mr. Ford: No sir.

Examiner Burchmore: You are not connected in any other business undertaking?

Mr. Ford: No sir; we are stockholders—no he and I are not either—his family have an interest in a small lumber
3355 Company. We have a small interest in it.

Examiner Burchmore: Have you any interest in any other company than the Thompson & Ford Co.?

Mr. Ford: Yes, two or three different companies outside of the Palmetto Lumber Company.

Examiner Burchmore: Large interest?

Mr. Ford: No sir, not very large. In other lumber companies about $30,000.00 outside of what I own in the Palmetto.

Examiner Burchmore: An ordinary stockholder?

Mr. Ford: Yes. One is a retail concern and the other is a manufacturing concern that has no tap line or enjoys no division as far as I know.

Examiner Burchmore: What bonds?

Mr. Ford: A Railroad Company, no bonds.

Examiner Burchmore: Any deed?

Mr. Ford: No sir.

Examiner Burchmore: Original ventures?

Mr. Ford: Original?

Examiner Burchmore: Yes. Only $20,000 of capital stock, does that represent everything?

3356 Mr. Ford: The $20,000.00 capital stock is nominal that was originally issued. I understand that the original cost of the road was between $55,000.00 and $60,000.00.

Examiner Burchmore: That includes equipment?

Mr. Ford: Yes sir.

Examiner Burchmore: How did they raise the balance of the fund—of the cost of construction?

Mr. Ford: Mr. Burchmore, I am not at all familiar with the original transaction because it has been about ten years ago, and I have only owned it two years.

Examiner Burchmore: When you took the road over, you purchased the $20,000.00 in capital stock?

Mr. Ford: Yes sir.

Examiner Burchmore: And paid therefor in cash?

Mr. Ford: Why I will tell you how that was made, as I told you that these holdings of Timber and Saw Mill property and Railroad were all owned by the same people—the same people in Chicago. They put a value on the whole property together—so much money. I persuaded Mr. Gibbs to assist me in financing it. It involved about $500,000.00. I persuaded him to advance it for the Palmetto

Lumber Company—the original price that Mr. Cary asked
3357 for the Mill was $150,000.00. That is exclusive of timber or lumber. In view however of Mr. Gibbs and myself raising the money for the Palmetto Lumber Company personally, and securing payment of his deferred payments, we made a trade with Mr. Cary by which he reduced the price of the mill plant alone to $110,000.00 and he and I personally acquired the stock of the Trinity Valley Southern Railroad Company. It was figured at $40,000.00. That was the basis it was figured on when we made the deal with Mr. Cary.

Examiner Burchmore: As a matter of fact, the lumber and timber and road were all paid at one time?

Mr. Ford: Yes sir.

Examiner Burchmore: As one interest?

Mr. Ford: Yes sir.

Examiner Burchmore: Is it contemplated that the Palmetto Lumber Company or stockholders thereof shall at a future date buy back the Railroad?

Mr. Ford: It has not been contemplated. The stockholders of the Palmetto Lumber Company outside of myself have never had any knowledge of the business or have not considered that they had any interest whatever in this road at any time.

3358 Examiner Burchmore: Do you own the right of way on which the road is built?

Mr. Ford: No sir.

Examiner Burchmore: Who owns it?

Mr. Ford: The Trinity Valley Southern Railroad Company owns it by deed.

Mr. Powell: We brought that out by Mr. McCarter that the Railroad Company owns the right of way about 100 feet wide.

Examiner Burchmore: Is the Railroad Company recognized as a Common Carrier by the Railroad Commission of Texas?

Mr. Ford: Yes sir.

Examiner Burchmore: Accorded the full rights and privileges that any other road in the state of Texas has?

Mr. Ford: As far as I know. Of course, we investigated that very thoroughly before we located the plant of the Palmetto Lumber Company on this road.

Examiner Burchmore: It has all the rights and disadvantages if any?

Mr. Ford: Yes sir.

Examiner Burchmore: Do you know whether or not there has been any complaint of your rates made by other storekeep-
3359 ers along this line?

Mr. Ford: If there has ever been, I know nothing about it. You see, I operated myself as a manufacturer along this line for eight years before I had interest personally, and I had no complaint to make during this time of the conduct of the road.

Mr. Dean: Mr. Ford, could you, with the present condition of the lumber business since the panic, operate your plant at all without a yearly or monthly loss if you had to pay the local freight rate

from Oakhurst to Dodge, and then the common point rate from Dodge on to interstate destinations?

Mr. Ford: Well, I would say it would be at a severe financial disadvantage for me to do so—to operate my lumber business.

Mr. Dean: If the divisions were cancelled—I believe you stated you got no benefit out of the present division?

Mr. Ford: No sir.

Mr. Dean: If they were cancelled, would you have to pay the local rate to Dodge and from there the same rate you do to Oakhurst?

Mr. Ford: Yes, to interstate points.

Examiner Burchmore: You are speaking to me as a lum-
3360 berman or as a Railroad man?

Mr. Dean: His profession is Lumberman. He owns only one share of railroad stock. I want the record to show that the Palmetto Lumber Company makes itself a party to this record, and I now address him as President of the Palmetto Lumber Company in reference to the effect on the operations of that Company, of the cancellation of these divisions. Mr. Ford, you say that you had been operating in that territory for eight years before you personally acquired any interest in this stock?

Mr. Ford: Yes sir.

Mr. Dean: Now, when you went there, you did it on theory, because of knowledge of the fact that this was a common carrier, and thru it you could get to the markets of the United States?

Mr. Ford: Yes, I investigated that very thoroughly before I made the investment.

Mr. Dean: Would you have invested in that, or located your plant there except for the fact that this Trinity Valley Southern Railroad Company had common carrier privileges and through rates and divisions?

Mr. Ford: I would not.

3361 Mr. Dean: Would you have made the purchase from Mr. Cary of the lumber interest or Saw Mill plant and stock of timber and lumber that you did two years ago except for the fact that you could get the same rate from Oakhurst where the mill was located as you could get on the line of any main or trunk line?

Mr. Ford: No, sir, Iwould not have considered the investment.

Mr. Dean: Now, has the Palmetto Lumber Company its own logging equipment complete?

Mr. Ford: Yes sir.

Mr. Dean: About how much logging road does the Palmetto Lumber Company own?

Mr. Ford: Altogether about twenty miles.

Mr. Dean: About 20 miles of Logging Road?

Mr. Ford: Yes, sir.

Mr. Dean: What is the capacity of the Palmetto Lumber Company?

Mr. Ford: About twenty million feet a year.

Mr. Dean: Before you purchased the Columbia Lumber Company plant, what was the capacity of the Palmetto Lumber Company plant at Palmetto, Texas?

3362 Mr. Ford: About fifteen million feet.

Mr. Dean: There was at that time located a Saw Mill at Youngstown, I believe.

Mr. Ford: Yes sir.

Mr. Dean: Do you know what became of that mill and why?

Mr. Ford: It burned, and they did not rebuild it.

Mr. Dean: Now, has the Trinity Valley Southern Railroad Company ever hauled any logs for you or logged any timber—that is, for the Columbia or Palmetto Lumber Company or any other mill since you have been operating in that territory during the last eight years?

Mr. Ford: Not to my knowledge. Not for the Palmetto Lumber Company. I will state that as a fact.

Mr. Dean: You are familiar in a way with its operation? Your mills are right by its tracks?

Mr. Ford: Yes sir.

Mr. Dean: If it had logged for the Columbia Lumber Company at any time, you would have known it?

Mr. Ford: I am quite sure it did not or I would have known it.

Mr. Dean: Was it ever built as a logging proposition?

Mr. Ford: My information is that it was not.

3363 Mr. Dean: Has it ever, to your knowledge, had any milling in transit rates?

Mr. Ford: To my knowledge, it has not.

Mr. Dean: I believe you said your last investment represented $500.000.00?

Mr. Ford: Yes sir.

Mr. Dean: Is there other timber in that territory to be served by this Railroad Company other than the Palmetto Lumber Company timber?

Mr. Ford: Yes sir.

Examiner Burchmore: Will you furnish the commission with a map drawn to scale, of the line of the Railroad Company showing the junction points with the I. & G. N. and showing the mill location and all the tracks, and showing also the tracks of the private road of the Lumber Company. In other words, a small copy, the smaller the better, so long as it is logical—that will acquaint us with the whole lay of the land.

Mr. Ford: Yes I have some maps of that kind gotten up by some engineer at home, and can send you one of these. Do you wish the tram roads of the Palmetto Lumber Company to be shown on that map?

3364 Examiner Burchmore: Yes so that we can distinguish them and the mill point, and the station buildings, and show the settlements.

Mr. Ford: I will try to get you up as comprehensive a map as I can on a small scale.

Examiner Burchmore: One other question. Suppose that the divisions were withdrawn either as a result of an order from the commission or voluntary action of the I. & G. N. and the Trinity Valley Southern Railroad Company should participate in no joint rates, but

suppose simultaneously the rates—the proportional rates or through rates—were established from the junction point, the same thing as the present net rate accruing beyond junction points, so that shipments of lumber, instead of applying the usual rate on which you receive a division, you would charge your local rate to Texas Points and the I. & G. N. would apply a lower rate beyond, would the effect be seriously detrimental to the interest of the Railroad Company?

Mr. Ford: No, sir, I would not think it would be serious to the interest of the railroad Company.

Examiner Burchmore: Well it would prejudice the lumber Company.

3365 Mr. Ford: I should think very seriously.

Examiner Burchmore: That would be the same rates in cents per hundred pounds to get to that market?

Mr. Ford: That would be true provided the same rate applied from Oakhurst as from Dodge or any point on the Main line of the I. & G. N.

Examiner Burchmore: What I mean to say is, if the same rate applied to market that now applies, and the proportional adjustment obtained elsewhere, would not you be in as good a position as you are right now, as a Railroad man?

Mr. Ford: In other words, the Railroad would be entitled to charge a local rate from terminus to the connection with the I. & G. N.

Examiner Burchmore: Yes?

Mr. Ford: I don't see how it would affect their earnings.

Examiner Burchmore: Your local would be three or four or five cents?

Mr. Ford: Well, I don't see how it would, but if the lumber company had to pay the local rate arbitrarily of three or four or five cents or go into Dodge to the connection of the I. & G. N. and then all of the mills located along the I. & G. N. Railroad should

3366 take advantage of the lower rate, the effect you can readily see, how it would hurt us to the extent of the local rate.

Examiner Burchmore: As a matter of fact, are any mills located immediately on the line of the trunk lines, who get their logs immediately on that line?

Mr. Ford: Yes, very large mills.

Examiner Burchmore: They get their logs by team?

Mr. Ford: By rail.

Examiner Burchmore: From along the line of the I. & G. N.?

Mr. Ford: No sir, by their tram roads.

Examiner Burchmore: But if your divisions were taken away, I presume theirs would be.

Mr. Ford: They have no divisions.

Examiner Burchmore: Then are they not now at a great disadvantage in comparison with you?

Mr. Ford: No sir, not as far as my lumber company is concerned, for our company gets no interest in the divisions.

Examiner Burchmore: They have the same rate that you

3367 do?

—. From your Lumber Mill?

Mr. Ford: Yes sir, exactly.

Examiner Burchmore: They have to bear the expense of operating their tram roads, don't they, as your tram road is paid for?

Mr. Ford: Yes sir, we do not get a cent division from our tram lines.

Examiner Burchmore: What I mean is this. At or out of your private tram line?

Mr. Ford: Yes, sir.

Examiner Burchmore: But you go to the I. & G. N. without cost from your mill. You pay the same rate from your mill which a man on the I. & G. N. pays from his mill?

Mr. Ford: Yes sir.

Examiner Burchmore: Then to all intents and purposes as a lumber man, you are on the I. & G. N. as far as the rates are concerned?

Mr. Ford: But it costs to haul lumber from Oakhurst to Dodge. The Railroad should have something for it.

Examiner Burchmore: There are lumber concerns on the Santa Fe and other points within common carrier territory, and a number of points on the main trunk line, which would be your com-

3368 petitors?

Mr. Ford: Yes, sir.

Examiner Burchmore: Which would have a rate equal to the local in case this division was cancelled?

Mr. Ford: Yes sir.

Examiner Burchmore: Could you compete with that?

Mr. Ford: I would be handicapped at least $1.00 per thousand if I had to pay a local rate for this haul. It would be a very serious matter for us.

Examiner Burchmore: Lumber dealers or mills located on the Santa Fe do not receive divisions from their tap line?

Mr. Ford: No sir.

Examiner Burchmore: How do they compete with those who receive them? Do you know of any advantage that the mills located on the Santa Fe have, that is denied to the mills on the other road?

Mr. Ford: I certainly do.

Examiner Burchmore: Can you state them?

Mr. Ford: They get in the territory on the Santa Fe Railroad which other mills located off the Santa Fe are debarred from reaching for the reason of the fact that the Santa Fe Railroad re-

3369 fused to handle the business of the lumber producing roads in Texas in the division of the through rate, thereby debarring all such plants from entering into the Santa Fe territory.

Examiner Burchmore: But the mill that has a tap line connected with the Santa Fe gets no division?

Mr. Ford: Gets no division. No, sir.

Examiner Burchmore: Has to pay the cost of keeping up its tap line?

Mr. Ford: Yes, sir. I know of no instance in our state, to my knowledge, of any division being granted to any roads along the basis of the testimony I have heard at this hearing. In other words,

there are no mills or tap lines that I know of that enjoy and division that operate purely a logging road as the Livingston and SouthEastern Tap Line. It is a similar proposition to the Oakhurst road.

Examiner Burchmore: It handles nothing but lumber for the Knox Lumber Company?

Mr. Ford: I don't know about that, but it handles lumber alone, not logs.

Examiner Burchmore: The mill is located at the terminus?

3370 Mr. Ford: That is the only class of mills I can figure that are not getting any divisions in the State of Texas. All others have been abolished.

Examiner Burchmore: Have you any further statement to make?

Mr. Ford: No, sir, I don't know anything further. The situation is this: on these tap lines so called, in Texas, that the owners of mill interests located at the terminus of such roads as the Trinity Valley Southern Railroad, and participating in the earnings of that road—you can readily see what a serious matter it would be for those concerns if those divisions were cancelled, and they had to absorb an arbitrary local rate from the milling point to the trunk line.

Examiner Burchmore: Would it be a serious proposition for them if they were withdrawn?

Mr. Ford: I think it would because there are very few in that position. Most of them are located on the main line and get no division—have nothing to do with the tap line rates. There are comparatively few mills in our state not located on the main lines, and which do not pretend to get any division.

3371 Examiner Burchmore: The mills located on the main line have to bear the expenses of getting logs up to the mill?

Mr. Ford: Yes, and so do all of them.

Examiner Burchmore: A mill at the far end of the tap line?

Mr. Ford: Has to bear the same expenses exactly.

Examiner Burchmore: Does it in our case?

Mr. Ford: It certainly does in our case.

Examiner Burchmore: You bear the expenses of your private tram line, but you do not bear the expenses of getting that lumber up to the I. & G. N.?

Mr. Ford: No, sir, neither does the other mill.

Mr. Dean: You don't know of any timber contiguous to the I. & G. N.?

Mr. Ford: No, sir.

Mr. Dean: Now, is the logging equipment of the other mills of the same capacity as yours; they are logged on the main line?

Mr. Ford: Several of them.

Mr. Dean: Your length of tram road and logging equipment is as extensive and expensive as a main line saw mill?

Mr. Ford: Yes, sir.

3372 Mr. Dean: Then you are not paid at all for getting your logs from the woods to the mill?

Mr. Ford: In no way whatever, either directly or indirectly.

Mr. Dean: What is the taxable value of this road, and upon what basis do you pay taxes?

Mr. Ford: About $60,000.00 a year. They tax us pretty high down there.

By Mr. POWELL:

Defendants offer in evidence a report for the year 1910 to 1910 of the income and expenses of the Trinity Valley Southern Railroad Company, marked Exhibit "A."

The said report so offered and identified, was received in evidence and thereupon marked "Defendant's Exhibit A," received in evidence December 13th, 1910, page 3372, and is attached hereto.

3373 *Natchez, Columbia & Mobile R. R.*

NEW ORLEANS, LA., *December* 13, 1910.

Mr. Brady: Mr. Butterfield wishes to make a further statement with reference to the Natchez, Columbia & Mobile Railroad. If Mr. Butterfield has not made it clear to the Examiner that the Butterfield Lumber Company does not profit in any way by a division of rate with the Natchez, Columbia & Mobile Railroad Company, I desire to have Mr. Butterfield restate that it does not.

Examiner Burchmore: It is not perfectly clear, but I think it will become clear upon examination of the tariffs. I understood Mr. Butterfield to state definitely that the Butterfield Lumber Company does not profit, directly or indirectly, through the payment of this refund of 2 cents by the Illinois Central Railroad, except in so far as that 2 cents goes to the railroad with which it is connected.

Mr. Brady: That is true, is it not?

Mr. Butterfield: Yes, sir; the 2 cents goes to the railroad company, the stock of which is owned by the owners of the lumber company.

Examiner Burchmore: Aside from that indirect advantage, there is no other?

Mr. Butterfield: None whatever.

3374 Mr. Brady: The reason for asking the question, Mr. Examiner, is that there was some little cloudiness about that on your part and on his yesterday in the examination. We want to ask Mr. Butterfield whether or not there is any telegraph or telephone line along his railroad.

Mr. Butterfield: There is a telephone line consisting of four wires, two of which,—it is owned by the Cumberland Telephone & Telegraph Company.

Mr. Brady: I want to ask you, Mr. Butterfield, whether anybody connected with the Natchez, Mobile & Columbia Railroad Company, and using passes that you described as having been issued by the Illinois Central Railroad Company, are salesmen of lumber for the Butterfield Lumber Company?

Mr. Butterfield: No, sir.

Mr. Brady: I will ask you whether or not there is any person

connected with the Butterfield Lumber Company that uses passes issued by the Illinois Central Railroad, or any other line, in connection with the sale of lumber for the Butterfield Lumber Company?

Mr. Butterfield: No, Sir. I want to add that this telephone line is put up under contract with the railroad company and the telephone company, and the telephone company furnishes and
3375 maintains two wires on this for the railroad company in its operation of its trains.

Mr. Brady: Who pays for those wires?

Mr. Butterfield: The railroad company pays for its rental.

Examiner Burchmore: What is this telephone company?

Mr. Butterfield: It is the Cumberland Telephone & Telegraph Company.

Examiner Burchmore: Part of the Bell system?

Mr. Butterfield: Part of the Bell system, I understand.

Examiner Burchmore: I will call the case of the Kentwood, Greensburg & Southwestern Railway Company.

Mr. Brady: We are ready in the New Orleans, Natalbany & Natchez Railway Company.

3376 *New Orleans, Natalbany & Natchez Railway Company.*

Examiner Burchmore: I will call the case of the New Orleans, Natalbany & Natchez Railway Company.

Mr. Brady: This railroad is not managed like Mr. Butterfield's. There are different departments in it, and I want to tender different witnesses for different purposes, and I will tender the witness and state for what purpose. I want to submit an answer, or statement with reference to it, which is exactly like the one tendered for the Natchez Columbia & Mobile Railroad yesterday.

Examiner Burchmore: This motion by the New Orleans, Natalbany & Natchez Railway Company will be received and submitted to the Commission for such action as it may deem proper.

(The paper so offered and identified was received in evidence and thereupon marked "New Orleans, Natalbany & Natchez Railway Company Exhibit No. 1, received in evidence December 13, 1910, and is attached hereto.)

Mr. Brady: I will make another statement that will considerably tend to facilitate the hearing. I will state to the Examiner that the stockholders in the New Orleans, Natalbany & Natchez Railway Company are identical with those of the Natalbany Lumber Company, with the exception of four stockholders that are stockholders in the railroad company who are not stock-
3377 holders in the lumber company, the total shares of stock owned by the four in the railroad company being four. Now, I am going to ask Mr. Smythe to take the stand, and I tender Mr. Smythe as a witness purely for the purpose of showing the physical conditions and the manner and method of operating the railroad company, and not with reference to the auditing or account-

ing of the railroad company, since he has no connection with that feature of it.

Examiner Burchmore: Will you have all the witnesses rise and be sworn?

Mr. Brady: Yes, Sir. I will ask all my witnesses, all of the men here with me, to rise and be sworn. I may not tender them all, but I will have them sworn now.

(The witnesses were instructed to rise, and were sworn by the Examiner.)

T. L. SMITHE was called as a witness, and having been duly sworn, testified as follows:

Direct examination.

Examiner Burchmore: Where do you reside, and what is your occupation?

Mr. Smythe: I reside in Hammond, Louisiana, and I am General Manager of the N. O. N. & N. Railroad.

3378 Examiner Burchmore: Are you also an officer of the Natalbany Lumber Company?

Mr. Smythe: No, Sir.

Examiner Burchmore: Not employed by that company?

Mr. Smythe: No, sir.

Examiner Burchmore: Where is this railway located?

Mr. Smythe: It leaves the Illinois Central about three miles north of Hammond.

Examiner Burchmore: And runs?

Mr. Smythe: And runs in a westerly direction about five miles, then bears north around a curve two miles and a half, then north forty-five degrees west about six or seven miles, and then in a northwesterly direction.

Examiner Burchmore: What is the northwesterly terminus of the line?

Mr. Smythe: A little town called Pine Grove. Now, that is the last town, the railroad is built beyond that about two miles, that is, it is in process of construction.

Examiner Burchmore: Your junction with the Illinois Central is at Natalbany?

Mr. Smythe: Natalbany.

Examiner Burchmore: How large a place is Natalbany?

3379 Mr. Smythe: A little town of about a thousand people, very nearly that.

Examiner Burchmore: Does this road connect with any other railroad than the Illinois Central?

Mr. Smythe: No, Sir.

Examiner Burchmore: Are there any private tram-lines connetced with this railroad?

Mr. Smythe: Well, there is one private spur.

Examiner Burchmore: Where is that located?

Examiner Burchmore: First, with respect to this one private spur, and then the Natalbany Lumber Company's logging spurs.

Examiner Burchmore: First, wit hrespect to this one private spur, where is that located, and to whom does it belong?

Mr. Smythe: About twenty miles from Natalbany.

Examiner Burchmore: By whom is it owned?

Mr. Smythe: By Thornton, Claney & Company, Chicago.

Examiner Burchmore: The Natalbany Lumber Company has one or two private tram-lines?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Please state where they connect with your line, and their extent.

3380 Mr. Smythe: They have two, and the easterly one connects with the N. O. N. & N. about twenty-one miles from Natalbany, and the other one at twenty-four and a half miles from Natalbany.

Examiner Burchmore: Are those connecting points, or connections, designated with any station name?

Mr. Smythe: The last one I mentioned there is designated as Pine Grove.

Examiner Burchmore: What stations are there on the line? I mean stations from a tariff standpoint.

Mr. Smythe: There are three.

Examiner Burchmore: Name them.

Mr. Smythe: Natalbany, Montpelier and Pine Grove.

Examiner Burchmore: What is Georgeville?

Mr. Smythe: Georgeville is a little flag station.

Examiner Burchmore: Is that not the point of connection with the first tram-line?

Mr. Smythe: It used to be, but the lumber company have practically logged out their timber there and the tracks are practically taken away.

Examiner Burchmore: Is that true with respect to Storey?

Mr. Smythe: The company camps are there, but their logging operations are about completed.

3381 Examiner Burchmore: What is the length of each of those private tram-roads of the Natalbany Lumber Company?

Mr. Smythe: Those people have one main spur at each place that they take up. The first one I mentioned there is about two and a half miles long and the next is about five. This does not include the lateral spurs; there are several of these.

Examiner Burchmore: What industries are there situated along the line, aside from the Natalbany Lumber Company? Please name them.

Mr. Smythe: Yes, sir; I was just going to say: I have to go numerically first, seven saw mills.

Examiner Burchmore: Seven saw-mills?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Are any of these mills of large capacity?

Mr. Smythe: All small mills; one of the them is about twenty thousand to twenty-five.

Examiner Burchmore: And who owns that mill?

Mr. Smythe: The Penna.-Mich. Lumber Company. It is a connection of the two States, Pennsylvania and Michigan.

Examiner Burchmore: Like Texarkana.

3382 Mr. Smythe: Yes, Sir.

Examiner Burchmore: Are there any box factories along the line?

Mr. Smythe: No, sir.

Examiner Burchmore: Stave makers?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: A number of stave makers?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Those are stave mills?

Mr. Smythe: No, Sir; now the Janovich people in New York make staves all over that part of the country, and also the Austro-American Stave Company, and then numbers of other firms make staves.

Examiner Burchmore: How do you spell that Janovich?

Mr. Smythe: J-a-n-o-v-i-c-h.

Examiner Burchmore: Does the Natalbany Lumber Company own or control the Thornton-Claney Company?

Mr. Smythe: No, Sir.

Examiner Burchmore: No connection whatever?

Mr. Smythe: Not a thing in the world.

Examiner Burchmore: Does the Natalbany Lumber Company own any of the other companies that you referred to?

3383 Mr. Smythe: None whatever.

Examiner Burchmore: The Penna.-Mich. Lumber Company is entirely independent?

Mr. Smythe: Entirely independent.

Examiner Burchmore: Who owns the timber lands along the line?

Mr. Smythe: You mean, who owns the major portion of it? Why, the Natalbany Lumber Company and others.

Examiner Burchmore: The Natalbany Lumber Company owns the major portion?

Mr. Smythe: Yes, Sir; I think so.

Examiner Burchmore: What are their total holdings in the territory served by the line?

Mr. Brady: I will put on other witnesses to show that.

Examiner Burchmore: I will withdraw the question as to you, then. I should ask another witness as to the financial operations?

Mr. Brady: Yes, Sir; Mr. Smythe is the manager of it, practical manager on the line.

Examiner Burchmore: What is the total mileage of this railroad?

Mr. Smythe: Twenty-five miles.

Examiner Burchmore: Our records indicate a mileage of

3384 thirty-one miles. Have you taken up some track?

Mr. Smythe: No.

Examiner Burchmore: Have you any side track?

Mr. Smythe: We have. That is the length of the main line that I have given you. We have numbers of side-tracks. But, by-the-way, allow me to modify that. That twenty-five miles that I mentioned does not include a number of miles that belong to the

N. O. N. & N. Railway Company. We have about five miles at Natalbany, and then we have possibly two or three miles of side-track. So, taking it all together, we have probably thirty-two miles. I was just giving you the length of the main line.

Examiner Burchmore: Is it standard-gauge?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: What is the weight of the rail?

Mr. Smythe: Fifty-six and sixty pounds.

Examiner Burchmore: How is it ballasted?

Mr. Smythe: With the ordinary soil of the country mostly; in other places we have got cinders and sand.

Examiner Burchmore: Are there any sharp grades and curves? How are the bridges, are there any bridges?

Mr. Smythe: Yes, Sir.

3385 Examiner Burchmore: Are they substantial?

Mr. Smythe: They are in good shape.

Examiner Burchmore: How would you describe the general construction of the road; is it well constructed?

Mr Smythe: It is in first-class condition; it is in good condition.

Examiner Burchmore: I mean, is it constructed about as a branch line of a standard railroad is constructed, or like a logging road?

Mr. Smythe: It is in better shape than the ordinary branch line of a standard railroad.

Examiner Burchmore: What station, or stations, have you, if any?

Mr. Smythe: We have two good stations, one at Montpelier with an agency now, and one at Pine Grove. We have a good flag-station a little ahead. We have good stations at Brookhaven, Johnsons, Georgeville and Storey.

Examiner Burchmore: Warehouses at those points, or some of them, where you can store L. C. L. freight?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Have you any track scales?

Mr. Smythe: Yes, Sir.

3386 Examiner Burchmore: Any wagon scales?

Mr. Smythe: No, Sir.

Examiner Burchmore: Any small scales in the depots?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Have any lunch counters?

Mr. Smythe: No, Sir.

Examiner Burchmore: Are there any public team tracks along the line where carload shipments can be unloaded by shippers?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Where are those located?

Mr. Smythe: Well, at all of them, for that matter.

Examiner Burchmore: That is a sufficient statement. Does the New Orleans, Natalbany & Natchez Railway have any trackage rights over the Illinois Central?

Mr. Smythe: No, Sir.

Examiner Burchmore: Has it accorded any trackage rights to the Natalbany Lumber Company?

Mr. Smythe: No, Sir.

Examiner Burchmore: Does the railroad company operate over the private tran-line of the lumber company?

Mr. Smythe: No, Sir.

3387 Examiner Burchmore: How many locomotives has the railroad company?

Mr. Smythe: Ten.

Examiner Burchmore: What character of locomotives,—I withdraw that question, the annual report shows it. How many box cars?

Mr. Smythe: Six.

Examiner Burchmore: Flat-cars?

Mr. Smythe: We have about one hundred and thirty, I think, in good condition.

Examiner Burchmore: Are those regular flat-cars, or logging cars?

Mr. Smythe: Regular flat-cars; and these flat-cars we use for logging purposes and any other purpose.

Examiner Burchmore: Any cabooses?

Mr. Smythe: One.

Examiner Burchmore: Any passenger coaches?

Mr. Smythe: Two.

Examiner Burchmore: Two regular passenger coaches?

Mr. Smythe: One regular passenger coach, and one good fair coach for the laborers.

Examiner Burchmore: Have you any steam shovels and

3388 derricks?

Mr. Smythe: Yes, Sir; and do you consider pile-drivers in that classification?

Examiner Burchmore: Yes, Sir.

Mr. Smythe: Well, we have a pile-driver.

Examiner Burchmore: Have you any motor cars?

Mr. Smythe: Two.

Examiner Burchmore: How many persons do these seat?

Mr. Smythe: One seats four and the other twelve.

Examiner Burchmore: Any hand cars?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: How many?

Mr. Smythe: Eight, I believe.

Examiner Burchmore: Eight hand-cars?

Mr. Smythe: Something like that, I don't just remember,

Examiner Burchmore: Is your equipment supplied with the necessary safety appliances as required by the Acts of Congress?

Mr. Smythe: We have one train which is supplied as required, and of our flat-cars about seventy per cent of them have safety appliances and the others are in the process of having these put on.

3389 Examiner Burchmore: It is your intention to comply with the law as far as possible?

Mr. Smythe: We are doing that in all our repairing.

Examiner Burchmore: Does the Natalbany Lumber Company own any locomotives?

Mr. Smythe: No, Sir.
Examiner Burchmore: Does it own any cars?
Mr. Smythe: No, sir.
Examiner Burchmore: Does it lease any locomotives or cars?
Mr. Smythe: Yes, sir.
Examiner Burchmore: From whom?
Mr. Smythe: From the N. O. N. & N. Railway.
Examiner Burchmore: How many?
Mr. Smythe: Six locomotives.
Examiner Burchmore: How many cars?
Mr. Smythe: It does not lease any cars, we use the cars in the service.
Examiner Burchmore: What payment is made for the use of those leased locomotives?
Mr. Smythe: Twelve Dollars a day.
Examiner Burchmore: Does that twelve dollars a day
3390 include the crew?
Mr. Smythe: No, sir.
Examiner Burchmore: Include the fuel?
Mr. Smythe: The fuel, yes, sir.
Examiner Burchmore: Just the locomotive and fuel.
Mr. Smythe: Yes, Sir; and the necessary repairs.
Examiner Burchmore: Is that twelve dollars a day supposed to include the actual cost of the locomotive a day, or is it supposed to include a profit.
Mr. Smythe: I consider that a fair remuneration.
Examiner Burchmore: On a cost basis?
Mr. Smythe: Yes, Sir.
Examiner Burchmore: But not to give them a profit?
Mr. Smythe: Yes, Sir.
Examiner Burchmore: How did you arrive at twelve dollars?
Mr. Smythe: We just calculated what the locomotive would cost us, and figured a little percentage of profit.
Examiner Burchmore: What was that percentage of profit?
Mr. Smythe: Ten per cent.
Examiner Burchmore: You think that is the result?
Mr. Smythe: Yes, Sir, being fair.
Examiner Burchmore: How many employés has the rail-
3391 road company engaged on maintenance of track?
Mr. Smythe: I think the records better show that, Sir; I don't remember.
Examiner Burchmore: Well, three or four section gangs, or one?
Mr. Smythe: I think it has four section gangs.
Examiner Burchmore: Do these section men——
Mr. Smythe: Let's see, five, including the Bridge Repair crew.
Examiner Burchmore: Do these five section crews devote any part of their time to the repairing or relaying of the private tracks of the lumber company?
Mr. Smythe: No, Sir.
Examiner Burchmore: Their work is exclusively performed on the railroad?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: How many station agents have you?

Mr. Smythe: Three.

Examiner Burchmore: How many train employés has the railroad company?

Mr. Smythe: Fifteen or sixteen men.

Examiner Burchmore: How many crews?

3392 Mr. Smythe: We have four crews.

Examiner Burchmore: What employés are there in the general office of the railroad?

Mr. Smythe: I think the clerical end will better show that.

Examiner Burchmore: Do you run passenger trains?

Mr. Smythe: Yes, Sir; a local mixed train.

Examiner Burchmore: What is your passenger service, the number of trains daily, and whether they run on regular schedule?

Mr. Smythe: Well, we run one train up the road daily, twice each way.

Examiner Burchmore: Does that meet the Ilinois Central trains?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: It runs on regular schedule?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Have you published time tables?

Mr. Smythe: Yes, sir.

Examiner Burchmore: Do you purpose filing that in the record?

Mr. Smythe: I suppose so.

3393 Mr. Brady: Yes, Sir; I have all of them.

Examiner Burchmore: How many freight trains, or logging trains, are run daily?

Mr. Smythe: Generally four.

Examiner Burchmore: Four in each direction?

Mr. Smythe: No, Sir; four in one direction.

Examiner Burchmore: Four loaded and four back?

Mr. Smythe: Four loaded and return empty.

Examiner Burchmore: Are these run on regular schedule?

Mr. Smythe: No, Sir.

Examiner Burchmore: What is the number of cars in your local mixed train?

Mr. Smythe: They vary from four to a dozen.

Examiner Burchmore: Your logging trains are fifteen to twenty cars?

Mr. Smythe: No, Sir; we very seldom handle less than eight thousand feet.

Examiner Burchmore: Do you have any merchandise cars for L. C. L. traffic?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: That is handled on your mixed train?

Mr. Smythe: Yes, Sir.

3394 Examiner Burchmore: Does the railroad transport the United States mails?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Under a standard government contract?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: What is your compensation for that a year?

Mr. Smythe: The clerical end will show that.

Examiner Burchmore: Do you transport express matter?

Mr. Smythe: Except as freight.

Examiner Burchmore: Do you carry passengers?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Do those passengers purchase tickets?

Mr. Smythe: Sometimes.

Examiner Burchmore: Usually pay cash fares?

Mr. Smythe: Well, usually, yes, Sir; that is a fact.

Manager Burchmore: How many passengers do you handle per day, on an average?

Mr. Smythe: That is a pretty hard question to answer, because it varies.

Examiner Burchmore: Is it usual to find four or five
3395 passengers on a train, or twenty or thirty?

Mr. Smythe: Well, we never have less than four or five, and very frequently more than that, fifteen or twenty, or eight or ten, along there.

Examiner Burchmore: Are the employés of the lumber company carried free?

Mr. Smythe: No, Sir.

Examiner Burchmore: You issue annual passes to some of them?

Mr. Smythe: We make annual arrangements. My instructions were that there should be remuneration, so I issue the employés transportation so as not to interfere with the remuneration of the conductor.

Examiner Burchmore: They ride on monthly tickets?

Mr. Smythe: I just write them out, that is, just in emergency cases, otherwise they pay.

Examiner Burchmore: When riding on lumber company's business then, the mill employé's fare is paid to the railroad company.

Mr. Smythe: The mill employé pays his fare just the same as any other man. I am talking about a man sent out there to
3396 the end of the road on emergency, or something of that kind.

Examiner Burchmore: But even from such man you receive a cash fare the same as any other?

Mr. Smythe: Just the same.

Examiner Burchmore: Lumber and logs is the predominating commodity handled by the railroad?

Mr. Smythe: Yes, Sir, we handle a great many logs. I might state incidentally that I have only been with these people two years.

Examiner Burchmore: I have omitted to ask where the mill is located. I refer to the mill of the Natalbany Lumber Company.

Mr. Smythe: Not exactly at Natalbany, there are three of them, the first little station on the road, Mason, which is not very much used, about a mile from the main line of the I. C.

Examiner Burchmore: That is one mill.

Mr. Smythe: Two of them there, the two large mills.

Examiner Burchmore: Is it a sawmill and planing mill?

Mr. Smythe: There are two large sawmills and a planer.

Examiner Burchmore: Where is the third mill?

Mr. Smythe: A short distance from the junction of the road.

3397 Examiner Burchmore: How far from the rails of the Illinois Central?

Mr. Smythe: The junction of the two roads.

Examiner Burchmore: From the right-of-way of the Illinois Central?

Mr. Smythe: Within one hundred feet of it.

Examiner Burchmore: Is there any side-track from the Illinois Central to the mill?

Mr. Smythe: There are two side-tracks.

Examiner Burchmore: I mean, is the mill reached from a private side-track from the Illinois Central? Could cars be taken from the Illinois Central on a private side-track to the mill?

Mr. Smythe: The whole connection is right there, you understand, and they are all switched one from the other. I don't understand your question, Sir.

Examiner Burchmore: Is there any means by which a car can be set at the Natalbany Mill by the Illinois Central, without moving on rails of the New Orleans, Natalbany & Natchez Railway?

Mr. Smythe: No, sir.

Examiner Burchmore: That question, I presume, will be

3398 answered by the map that you will file later?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: What percentage of the total lumber movement comes from these Natalbany mills?

Mr. Smythe: The report will show that, Sir. The clerical report will show that better than I could answer. We have all those figures in proper condition so they will be better shown than I can answer.

Examiner Burchmore: Can you advise me with reference to the method of handling freight and billing?

Mr. Smythe: No, sir.

Examiner Burchmore: How are the logs transported from the forest to the mills?

Mr. Smythe: In regard to the Natalbany Lumber Company, the logs are delivered at the junction of the Natalbany Lumber Company's spurs and the N. O. & N. line, and the N. O. & N. N. engines make up the trains at these points and deliver them to the Natalbany Lumber Company.

Examiner Burchmore: What compensation does the railroad company receive for hauling the logs to the mill?

Mr. Smythe: Three cents per hundred pounds.

Examiner Burchmore: Three cents per hundred pounds on

3399 what?

Mr. Smythe: On the weight of the logs.

Examiner Burchmore: On the actual weight of the logs, or the estimated weight?

Mr. Smythe: Estimated weight. Estimated from the actual weight and scale.

Examiner Burchmore: Does the conductor of the train that

handles these logs into the mill, have any waybill covering the trainload?

Mr. Smythe: He makes his report, as I understand it, of each car, and once a month the month's work is billed regularly, the same as any other freight.

Examiner Burchmore: No Bills of Lading are issued covering the hauling of the logs into the mill?

Mr. Smythe: For individual trains?

Examiner Burchmore: For individual trains.

Mr. Smythe: No, Sir.

Examiner Burchmore: Are the empty cars provided by the Illinois Central?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: And this railroad company takes these empty cars and places them at the mill?

Mr. Smythe: Yes, Sir, the N. O. N. & N. switch engine.

3400 Examiner Burchmore: When so placed, they are loaded by the employees of the lumber company?

Mr. Smythe: Yes, Sir; and then delivered to the I. C. by the N. O. N. & N. switch engine.

Examiner Burchmore: Who issues the bill of lading for the outmove of lumber?

Mr. Smythe: That is another question that must be answered by the clerical end.

Examiner Burchmore: You stated that the Thornton, Claney Company has a private spur?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: How long is that private spur?

Mr. Smythe: In a direct line, a mile and a half, and then there is a little branch about two miles.

Examiner Burchmore: Where is their mill located?

Mr. Smythe: They have no mill.

Examiner Burchmore: What is their business?

Mr. Smythe: They bought a yard of lumber that was manufactured by a little mill about a year and a half ago, and they built their spur in there to remove that, and they put in a little planer, and they are shipping the lumber to Chicago.

Examiner Burchmore: How much lumber is there out there?

3401 Mr. Smythe: Approximately five million feet in that bunch.

Examiner Burchmore: Already cut?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: How did such a quantity of lumber accumulate out there?

Mr. Smythe: In 1908, a cyclone passed through that country, and Mr. T. H. Bowles owned a piece of land that was badly damaged, and he put a little mill in there and cut the lumber and put it right there in the woods.

Examiner Burchmore: Why didn't he team it across to the railroad?

Mr. Smythe: I expect the expense would be too great.

Examiner Burchmore: Would that expense be greater than to construct a special railroad?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Mr. Bowles owns a tap-line somewhere, doesn't he?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: I thought I remembered the name.

Mr. Smythe: He may own a tap-line somewhere, but not in that vicinity.

Examiner Burchmore: What is the length of the haul that
3402 the New Orleans, Natalbany & Natchez has on the lumber of the Natalbany Lumber Company?

Mr. Smythe: About a mile.

Examiner Burchmore: One mile in the case of the two mills at Mason?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: How many feet in the case of the mill at Natalbany?

Mr. Smythe: About fifteen hundred, or two thousand.

Examiner Burchmore: Well, how much of that fifteen hundred feet is within the plant or the yard of the mill?

Mr. Smythe: It is all in the yard, in order to deliver the cars so that the I. C. engines can get them.

Examiner Burchmore: That is all.

Mr. Brady: I might suggest that he understands about the division of rates.

Examiner Burchmore: What is the general territory in which most of the lumber from this district is sold?

Mr. Brady: I don't think he knows about that. He only knows this, he knows about the charges between the railroad company and the lumber company, because he contracts for the railroad
3403 company with the Natalbany Lumber Company with reference to moving the lumber.

Examiner Burchmore: Most of the lumber goes to Chicago?

Mr. Smythe: You had better take the books, they are more satisfactory.

Examiner Burchmore: Do you know the rates to Chicago?

Mr. Smythe: In general, yes, Sir. You had better take the books, because they can answer better than I can.

Examiner Burchmore: You stated that the railroad company received three cents per hundred pounds for moving the lumber into the mill.

Mr. Smythe: For moving the logs into the mill, yes, Sir.

Examiner Burchmore: What does it receive for moving the lumber out of the mill?

Mr. Smythe: Two cents on the lumber that goes into the territory upon which the division is.

Examiner Burchmore: There is some lumber upon which it receives nothing?

Mr. Smythe: Practically.

Examiner Burchmore: Is there any lumber upon which it receives more than two cents?

Mr. Smythe: Not to my knowledge.

Examiner Burchmore: Two cents, then, is the usual division on the lumber.

3404 Mr. Smythe: Yes, Sir.

Examiner Burchmore: Does the Natalbany Lumber Company own any other private railroad in this vicinity?

Mr. Smythe: No, Sir; not to my knowledge, Sir.

Examiner Burchmore: It doesn't own any private railroad running out of Natalbany?

Mr. Smythe: No, Sir.

Examiner Burchmore: By private railroad, I do not intend to refer to an incorporated tap-line.

Mr. Smythe: No, I know.

Examiner Burchmore: It is ostensibly a common carrier. This Company has joint through rates on lumber with the Illinois Central?

Mr. Smythe: I understand so.

Examiner Burchmore: Are you familiar with these rates?

Mr. Smythe: No, Sir.

Mr. Brady: We have another witness. You see, it is a different department.

Mr. Brady: Now, Mr. Smythe, I want to ask you one question: Does the railway company unload the logs into the pond in the lumber company?

3405 Mr. Smythe: Yes, Sir.

Mr. Brady: Is there any charge made for that?

Mr. Smythe: Yes, Sir.

Mr. Brady: What is that charge?

Mr. Smythe: It costs us—we have a contract for unloading them in there, and it costs us twelve and a half cents a car to unload the cars.

Examiner Burchmore: Twelve cents and a half to unload the logs where?

Mr. Smythe: In the pond at Natalbany.

Mr. Brady: That is the charge for that particular work?

Mr. Smythe: Yes, Sir.

Mr. Brady: It is not done for nothing, then?

Mr. Smythe: No, Sir; that is the charge.

Mr. Brady: Mr. Smythe, you were asked something about the roadbed a few minutes ago. I will ask you to be a little more definite. Is it such a roadbed as would carry the tonnage of a regular railroad?

Mr. Smythe: Yes, Sir.

Mr. Brady: What about your bridges and your fills, etc., is it standard construction?

Mr. Smythe: Yes, Sir.

3406 Mr. Brady: Do you know what is the purpose of the road with reference to being extended?

Mr. Smythe: Yes, sir.

Mr. Brady: To what point—Do you know whether the

Board of Directors of the road have taken any steps looking toward the amendment of the charter so as to reach some railroad connection?

Mr. Smythe: I know that is the purpose of the Board of Directors.

Examiner Burchmore: If you will state that purpose very briefly we will accept your statement.

Mr. Brady: The Board of Directors of the railroad company this year passed a resolution whereby the charter was authorized to be amended so as to extend the road from its present western terminus to Baton Rouge, Louisiana, there of course to form a river and railroad connection. I might state something with reference to this territory if you wish.

Examiner Burchmore: I understand there is other lumber in that territory.

Mr. Brady: Yes, Sir; there is other lumber there. It is the purpose of the railroad company to build into Baton Rouge from its main line, and to develop a territory now undeveloped by
3407 railroad companies.

Examiner Burchmore: It seems to be going in the wrong direction for Baton Rouge.

Mr. Brady: Yes, Sir; but that is the purpose of it, Mr. Smythe will indicate to you.

Mr. Brady: Mr. Smythe, I will ask you whether we have made any survey, or not?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Does the Natalbany Lumber Company own any timber in the direction of the surveys?

Mr. Brady: I don't know about that; I think they own some.

Mr. Smythe: They own possibly ten or twelve miles in the direction of that road.

Examiner Burchmore: Have they bought any timber in that direction?

Mr. Smythe: No, Sir.

Mr. Brady: What is the nature and character of the territory, Mr. Smythe, between the terminus and Baton Rouge, through which you propose to extend this line, with reference to being good farming territory, or otherwise?

Mr. Smythe: I can only say honestly that it is one of the finest agricultural prospects I have ever seen in Louisiana.

3408 Mr. Brady: What about stores along your right of way, mercantile establishments and corporations?

Mr. Smythe: Oh, there are several.

Mr. Brady: Do you carry freight for these?

Mr. Smythe: Yes, Sir; we are the only common carrier in that part of the country.

Mr. Brady: What is the population of those little towns along the right of way?

Mr. Smythe: Such as?

Mr. Brady: Well, such as Little River, and others.

Mr. Smythe: Well, taking first Woodhaven is a little flag-station. It is surrounded by a good farming country; but, of course, the

population right at Woodhaven is not great, but there are a good many people living in the vicinity.

Mr. Brady: Who handles that freight, that product?

Mr. Smythe: We do.

Mr. Brady: Take Little River, what is the condition?

Mr. Smythe: Little River is very small, except there is a mill at Little River.

Mr. Brady: Who handles that freight?

Mr. Smythe: The N. O. N. & N.

3409 Mr. Brady: Johnson?

Mr. Smythe: Johnson is simply a little flag-station; there are a few farmers there.

Mr. Brady: Georgeville?

Mr. Smythe: Nothing but a flag-station.

Mr. Brady: Montpelier?

Mr. Smythe: Montpelier is a litttle town on the site of an old County Seat.

Mr. Brady: How many people?

Mr. Smythe: Six or seven hundred, probably.

Mr. Brady: Storey?

Mr. Smythe: Storey is a flag-station and a camp.

Mr. Brady: How about the farming country around Montpelier?

Mr. Smythe: Good. A mile and a half East of Montpelier is the Tickfaw River, and the Tickfaw River Bottoms have been known to be as fertile a river bottom as any in the country.

Mr. Brady: Does this railroad furnish shipping facilities for that territory?

Mr. Smythe: There is no other way.

Mr. Brady: How far North before you reach the territory

3410 of another railroad?

Mr. Smythe: About eight or nine miles.

Mr. Brady: How far South?

Mr. Smythe: About the same distance.

Examiner Burchmore: Do those farmers consume all they raise, or ship some?

Mr. Smythe: They ship a certain proportion.

Mr. Brady: State the character of merchandise shipped, or the freight shipped.

Mr. Smythe: Well, from that section this year the shipment is light, for the reason that that was a cotton growing country, and, of course, as everybody knows in this country, the boll-weevil has given that country a drubbing like most every other place, and they are going in the corn business.

Examiner Burchmore: This line of questions may be followed up by the request that you file a statement of your tonnage for the fiscal year ending June 30th, 1910, similar to the statement that I requested last night from the other companies.

Mr. Brady: In connection with Mr. Smythe's testimony, we offer Tariff——

Examiner Burchmore: Please do not file any tariffs al-
3411 ready filed with the Commission. We will get that a little later. You may file, Mr. Brady, the Time Table and any tariffs which this company has, that are not filed with the Commission.

Mr. Brady: I will ask permission later to ascertain what has been filed and what has not, and to forward to you that which has not.

Examiner Burchmore: It may be done.

Mr. Brady: I ask, not to file, but in this connection to refer Mr. Smythe's testimony to the annual reports made. I want to connect his testimony by reference to those reports. I believe you declined to let us file it?

Examiner Burchmore: Well, you have filed your annual reports.

Mr. Brady: Yes, Sir; but in order to make the testimony clear here, we want Mr. Smythe's testimony to refer to the reports.

Examiner Burchmore: Will you also file a map as I requested last night?

Mr. Brady: Yes, Sir; we have a tracing here, and tender for your inspection the tracing.

Examiner Burchmore: Is it a large document?

3412 Mr. Brady: It is pretty large.

Examiner Burchmore: We would prefer small maps; the stenographer has a trunk full already.

Mr. Brady: We also offer the charter, showing the intents and purposes.

Examiner Burchmore: That is the charter of the railroad as a common carrier under the laws of Louisiana?

Mr. Brady: Of Louisiana.

Examiner Burchmore: Well, it need not be filed.

Mr. Brady: I will ask you, Mr. Smythe, whether this railroad has been adjudged by the courts of Louisiana and by the orders of the Railroad Commission of the State of Louisiana, a common carrier?

Mr. Smythe: Yes, Sir.

Mr. Brady: I will ask you whether or not you make reports to the Railroad Commission of the State of Louisiana and comply with their orders?

Mr. Smythe: Yes, Sir; in every instance.

Examiner Burchmore: What is the basis on which you pay taxes in Louisiana, do you know?

Mr. Smythe: No, sir.

Mr. Brady: Exempt from taxation, like all others?

3413 ROBERT STEINBOCK was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: What is the total capital stock of the New Orleans, Natalbany & Natchez Railway Company?

Mr. Steinbock: There is three hundred thousand dollars.

Examiner Burchmore: How much has been issued?

Mr. Steinbock: Fifteen hundred and fifty shares, one hundred and fifty-five thousand dollars.

Examiner Burchmore: Was that stock issued for cash?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: Cash was paid in for it?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: That cash was used to purchase the railroad from its prior owners?

Mr. Steinbock: It was used for the construction of the road.

Examiner Burchmore: That entire capital stock is owned by the stockholders of the Natalbany Lumber Company in proportion to their holdings in the lumber company, with the exception of four shares?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: In whose hands are those four
3414 shares?

Mr. Steinbock: Those four shares are,—Mr. Brady has one share, Mr. Smythe one share, Mr. Davis has one share, Mr. Richardson has one share.

Examiner Burchmore: Those gentlemen are all officers or stockholders in the lumber company?

Mr. Steinbock: They are not.

Examiner Burchmore: Are any of them officers in the lumber company?

Mr. Steinbock: They are not.

Examiner Burchmore: Have they any connection with the lumber company?

Mr. Steinbock: They hold positions with the lumber company.

Examiner Burchmore: Employees of the lumber company?

Mr. Steinbock: Employees, yes, Sir.

Examiner Burchmore: Are those not directors' qualifying shares?

Mr. Brady: I don't exactly catch your meaning. These four?

Examiner Burchmore: These four shares.

Mr. Brady: I don't think there is one of us that has a thing to do with the Natalbany Lumber Company.

3415 Examiner Burchmore: How long have those four shares been outstanding in those names?

Mr. Steinbock: They were issued in 1908.

Examiner Burchmore: To these four men?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: For cash?

Mr. Steinbock: Yes.

Examiner Burchmore: Are those four men directors of the railroad company?

Mr. Steinbock: They are.

Examiner Burchmore: All of them?

Mr. Steinbock: All four, yes, Sir.

Examiner Burchmore: How long have they been directors of the company?

Mr. Steinbock: Since January 25, 1910.

Examiner Burchmore: When was this railroad incorporated?
Mr. Steinbock: June 4, 1902,—I should have said January 4, 1902.
Examiner Burchmore: Is this railroad a paying proposition?
Mr. Steinbock: It is.
Examiner Burchmore: What dividends has it paid?
Mr. Steinbock: None.
3416 Examiner Burchmore: It has paid no dividends?
Mr. Steinbock: No dividends.
Examiner Burchmore: Has it accumulated a surplus?
Mr. Steinbock: It has.
Examiner Burchmore: What is the extent of that surplus?
Mr. Steinbock: Seventy-three thousand, nine hundred and fourteen dollars.
Examiner Burchmore: Seventy-three thousand, nine hundred and fourteen dollars?
Mr. Steinbock: Yes, Sir.
Examiner Burchmore: About fifty per cent of its capitalization?
Mr. Steinbock: Yes, Sir.
Examiner Burchmore: How many years has it required to accumulate this surplus?
Mr. Steinbock: Well, this surplus was acquired in the last three years.
Examiner Burchmore: Is there any bonded indebtedness?
Mr. Steinbock: No bonded indebtedness.
Examiner Burchmore: Any other indebtedness aside from current liabilities?
Mr. Steinbock: No, Sir.
3417 Examiner Burchmore: Who owns the right of way upon which the railroad is run?
Mr. Steinbock: The railroad company.
Examiner Burchmore: Purchased outright?
Mr. Steinbock: Yes, Sir.
Examiner Burchmore: Any of it acquired through condemnation proceedings?
Mr. Steinbock: Yes, Sir; but I don't know how much.
Examiner Burchmore: And was the price of that portion purchased through condemnation proceedings the same as the price of the portion purchased outright?
Mr. Steinbock: I couldn't say.
Examiner Burchmore: Can you inform me what employés there are in the general office of the railroad company?
Mr. Steinbock: Two.
Examiner Burchmore: Who are they?
Mr. Steinbock: The Auditor and the Chief Clerk.
Examiner Burchmore: Do these employés receive compensation also from the lumber company?
Mr. Steinbock: Yes, Sir.
Examiner Burchmore: Also from the railroad company?
Mr. Steinbock: One of them does.
3418 Examiner Burchmore: Which one?
Mr. Steinbock: The Auditor.

Examiner Burchmore: Who is the Auditor?

Mr. Steinbock: I am the auditor.

Examiner Burchmore: Is the major portion of your salary paid by the railroad company?

Mr. Steinbock: No, Sir; by the *railroad* company.

Examiner Burchmore: What proportion of your salary is paid by the railroad company?

Mr. Steinbock: Forty per cent.

Examiner Burchmore: You render forty per cent of your time for the railroad company?

Mr. Steinbock: Yes, I guess so.

Examiner Burchmore: Are the officers of the railroad company compensated by the railroad company?

Mr. Steinbock: They are not.

Examiner Burchmore: Has any portion of the net earnings from operation been expended on additions and betterments during the past several years; in other words, does the railroad company use a portion of its profits from operation in improving its line?

Mr. Steinbock: Yes, Sir.

3419 Examiner Burchmore: Give me some further information in that connection, if you can.

Mr. Steinbock: Do I understand if they made any improvements?

Examiner Burchmore: Have they paid for any improvements to the line from the profits of operation?

Mr. Steinbock: From the surplus account, you mean?

Examiner Burchmore: Yes.

Mr. Steinbock: No, Sir.

Examiner Burchmore: Not from the present surplus account, but from the funds which would have gone to the surplus account.

Mr. Gutheim: You said you had a present surplus of seventy-three thousand, nine hundred and fourteen dollars, which has not been divided but kept in the business. Is that not offset by the cost of road equipment account?

Mr. Steinbock: Yes, Sir.

Mr. Gutheim: At the present time, then, your cost of road and equipment would amount to approximately two hundred and thirty thousand dollars?

Mr. Steinbock: More than that.

Examiner Burchmore: Then you have a large surplus in

3420 the treasury in the form of cash?

Mr. Steinbock: No, Sir.

Mr. Brady: I would like to ask permission to file with the Examiner a copy of the resolution of the *D*oard of Directors, passed the early part of this year, authorizing an amendment to the charter.

Examiner Burchmore: Such a resolution was passed?

Mr. Brady: Oh, yes, Sir.

Examiner Burchmore: Well, I don't care to see it, if you say it was passed.

Examiner Burchmore: When was this railroad constructed?

Mr. Brady: I will have to put somebody else on the stand for that, because he came in after.

Examiner Burchmore: Is the cash of the railroad company mingled with the funds of the lumber company?

Mr. Steinbock: No, Sir.

Examiner Burchmore: Kept separately?

Mr. Steinbock: Kept separately.

Examiner Burchmore: In the bank?

Mr. Steinbock: In the bank, yes, Sir.

Examiner Burchmore: How do you collect charges from the lumber company?

3421 Mr. Steinbock: We make an entry on our books, passing from one account to the other.

Examiner Burchmore: Well, does a check pass to cover the entry?

Mr. Steinbock: No, Sir; just a journal entry.

Examiner Burchmore: Well, then, there is all one bank account for the two companies?

Mr. Steinbock: No, the railroad company owes the Natalbany Lumber Company an open account, and we credit up the amount of their freight to this account. In other words, we are reducing the open account of the Natalbany Lumber Company.

Examiner Burchmore: What is that open account?

Mr. Steinbock: It represents moneys advanced to the railroad company.

Examiner Burchmore: For what purpose?

Mr. Steinbock: Buying different things.

Examiner Burchmore: On construction account?

Mr. Steinbock: Some on construction account.

Examiner Burchmore: What has been the total cost of construction of the road to date?

Mr. Steinbock: $297,298.72.

3422 Examiner Burchmore: That includes equipment?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: You say they have a bank account for the railroad?

Mr. Steinbock: Yes, sir.

Examiner Burchmore: That bank account covers only transactions with the lumber company, does it not?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: So far as the lumber company is concerned, the money transactions are purely of a book-keeping character?

Mr. Steinbock: Book-keeping character.

Examiner Burchmore: I asked you if there was any indebtedness, other than bonded indebtedness, other than current liabilities, and I understood you to say there was not. How about this amount you owe the lumber company?

Mr. Steinbock: Yes, Sir; the company does owe that.

Examiner Burchmore: Do you pay interest on that?

Mr. Steinbock: Yes, Sir.

Examiner Burchmore: At what rate?

Mr. Steinbock: Five and a half per cent.

Examiner Burchmore: What is the customary rate of in-
3423 terest on loans of that magnitude in this vicinity?

Mr. Steinbock: I think it is about that much.

Mr. Brady: The legal rate is five per cent.

Mr. Brady: This indebtedness to the lumber company by the railroad company, was because of money loaned to the railroad company that the railroad company used in the construction of its roadbed?

Mr. Steinbock: Yes, Sir.

Mr. Brady: And buying equipment?

Mr. Steinbock: Yes, Sir.

Mr. Brady: Is that being reduced?

Mr. Steinbock: It is.

Mr. Brady: That indebtedness is being reduced.

Mr. Steinbock: Yes, Sir.

3424 O. L. BENWAY was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Are you an officer of this railroad company?

Mr. Benway: I am Secretary and Treasurer.

Examiner Burchmore: Are you an officer of the Lumber Company?

Mr. Benway: I am Secretary of the lumber company.

Examiner Burchmore: Who owns this lumber company?

Mr. Benway: It is owned principally by the Dinkman family.

Examiner Burchmore: Do the Dinkman interests own any other lumber company?

Mr. Benway: They do.

Examiner Burchmore: You are a witness in the other cases?

Mr. Benway: I was called.

Mr. Brady: Mr. Benway, what distance is it that the N. O. N. & N. Railroad carries or ships the lumber of the Natalbany Lumber Company?

Mr. Benway: They carry it from half a mile to a mile, I would say.

Mr. Brady: What remuneration is paid it for that service?

3425 Mr. Benway: They get three cents for hauling the logs into the mills, and that includes the switching and handling of the lumber to the Illinois Central when it is shipped out.

Mr. Brady: What else does it get for that service?

Mr. Benway: It gets a two cent division from the Illinois Central for lumber going into a certain territory, the Central Freight Association. I think it is designated.

Mr. Brady: State whether or not there is an agreement or understanding that this division that it gets is in payment of the service that it renders in the moving of the lumber of this company to the tracks of the Illinois Central?

Mr. Benway: It is.

Examiner Burchmore: I don't quite understand that.

Mr. Brady: Well, I will make a statement that will give it to

you. This railroad company pulls these logs as other railroad companies do, but charges no switching charge for switching the lumber from the lumber company's plants to the Illinois Central Railroad, being paid for this service by the division of rate which it gets.

Examiner Burchmore: The two cent division of rate on certain lumber is intended to cover the cost of switching all lumber
3426 to the junction?

Mr. Brady: That is my understanding. In other words, handling their business exactly like all the other lumber companies.

Examiner Burchmore: In other words, you say it is worth a cent and a half to switch the lumber, and instead of paying that amount on all lumber, the Illinois Central pays two cents on certain lumber?

Mr. Brady: You could call it that. However, that division does not go entirely to them, for the reason that it has the same arrangement that other lumber companies have with reference to the logs going into the woods.

Mr. Brady: I will ask you to state how the logs are handled, how they are billed.

Mr. Benway: The billing is made out once a month, covering the logs which have been brought in for that month, charging the lumber company three cents per hundred pounds. That includes delivering the logs in the pond.

Examiner Burchmore: That twelve and a half cents that was referred to is then included in the three cents per hundred pounds?

3427 Mr. Benway: That is my understanding. Mr. Smythe didn't exactly understand that. The railroad company delivers the logs into the pond.

Examiner Burchmore: Is that three cents subsequently credited in any form on the outbound rates?

Mr. Benway: If I understand it, I say No. I understand your question. No, it is not credited on the outbound rates.

Examiner Burchmore: Pine Grove is the junction between one of these private tram-lines and the railroad?

Mr. Benway: Yes, Sir.

Examiner Burchmore: Are their joint through rates published from Pine Grove to C. I. A. territory?

Mr. Benway: Well, our line has recently been extended to Pine Grove. To answer your question, taking Montpelier, for example, it has with reference to Montpelier. And I might add, in pulling these logs, they come in to the main line from different points, and they are all billed from Montpelier.

Examiner Burchmore: That is when lumber is moved out for inter-state destinations, it is billed as originating from Montpelier?

3428 Mr. Benway: No, Sir; it is billed from Natalbany. You asked the question some time back, who issued the bills of lading? The Natalbany Lumber Company make out the bills of lading and this lumber is delivered to the Illinois Central by the N. O. N. & N. trains.

Examiner Burchmore: What rate does the Illinois Central charge on these shipments?

Mr. Benway: Their regular tariff rates, out of which we get two cents for certain territory.

Examiner Burchmore: That is, they charge two cents from Natalbany and don't show your railroad as participating in the movement, so far as the bill of lading is conecerned?

Mr. Benway: No, Sir; this Illinois Central tariff, as brought out in the other case last night, provides for lumber brought in over the N. O. N. & N.

Examiner Burchmore: You were present last night in the case of the Natchez, Columbia & Mobile?

Mr. Benway: ——.

Examiner Burchmore: The practice is similar?

Mr. Benway: Yes, Sir.

Examiner Burchmore: And the rates.

Mr. Benway: Yes, Sir.

3429 Examiner Burchmore: And the refund is made at the end of a stated period, of two cents?

Mr. Benway: For lumber that goes in a certain district, yes, Sir.

Mr. Brady: There is no difference in the method of handling the lumber by the two companies, except that there is no switching charge made.

Examiner Burchmore: What is the rate in cents per one hundred pounds, from Montpelier as compared with the rate from Natalbany?

Mr. Benway: Two cents higher.

Examiner Burchmore: So the total earnings of the New Orleans, Natalbany & Natchez Railway Company are four cents?

Mr. Benway: From lumber that is moved off of their railroad.

Examiner Burchmore: Now, is this three cents that is collected on the inbound movement of logs, credited in any shape?

Mr. Benway: No, Sir; it is not.

Examiner Burchmore: Well, then, how much does this lumber company have to pay to get its logs into the mill and lumber out of the mill?

3430 Mr. Benway: It pays three cents to get the logs in, that is all.

Examiner Burchmore: Three cents to get the logs in, and then what rate of freight?

Mr. Benway: And they pay the regular Illinois Central rate of freight, and the two cents comes back to the railroad company.

Examiner Burchmore: From Montpelier it is twenty-six cents to Chicago.

Mr. Benway: The lumber company pays three cents for its logs into the mill.

Examiner Burchmore: And subsequently pays twenty-four cents to the Illinois Central?

Mr. Benway: For the lumber that goes out.

Examiner Burchmore: Now, disregarding the question of the cost of logs, and looking at the matter as if the lumber was the

same and there was no waste, they would pay three cents in and twenty-four cents out, a total of twenty-seven cents.

Mr. Benway: That is right.

Examiner Burchmore: That three cents would not be credited against the total of twenfy-seven cents?

3431 Mr. Benway: No, Sir. I might add that that covers the extra service the N. O. N. & N. renders in switching the lumber and delivering it to the Illinois Central.

Examiner Burchmore: It has to pay twenty-seven cents, whereas the through rate from Montpelier is twenty-six cents?

Mr. Benway: Yes, Sir.

Examiner Burchmore: The extra cent——

Mr. Benway: That covers the work that they do in handling the lumber from the mill. However, it is the intention that every one pays the same.

Examiner Burchmore: I understand. Now, of that twenty-seven cents, the N. O. N. & N. receives in the first instance three cents for the logs; later it receives two cents from the Illinois Central, making five cents. The Illinois Central receives in the end twenty-two cents?

Mr. Benway: Yes, Sir.

Examiner Burchmore: Which is two cents less than its standard rate from Natalbany?

Mr. Benway: Yes, Sir.

Mr. Gutheim: As a matter of fact, this rate of three cents per hundred pounds is not a rate that is actually based on a

3432 tariff, but is a rate of one dollar per thousand feet on the logs, between the lumber company and the railroad, is it not?

Mr. Benway: No, it is based on the three cents per hundred pounds.

Mr. Gutheim: Our reports as to your company show that the arrangement between the lumber company and the railroad is on the basis of one-fifty per thousand feet to the pond, and that the logs are scaled when they go from the pond into the mill, and that the entire financial transaction is based on that final scaling.

Mr. Benway: It is evidently an old report that you have reference to. It was changed about a year ago to the arrangement to which I now refer.

Mr. Gutheim: So that at the present time you are actually paying three cents per hundred pounds?

Mr. Benway: Three cents per hundred pounds.

Mr. Gutheim: Is that on actual weight?

Mr. Benway: It was averaged. A number of cars were actually weighed to get an average, and now it is an estimated weight based on that weighing.

Mr. Gutheim: What is the estimated weight?

3433 Mr. Benway: The estimated weight is ten thousand pounds.

Mr. Brady: This rate that you speak of that the Illinois Central charges from Natalbany, is a blanket rate and covers the point of shipment along your line of railroad?

Mr. Benway: Well, no; the stations are named on our road.

Mr. Brady: I understand that, but it applies to the different stations.

Mr. Benway: Yes, Sir.

Mr. Brady: The Illinois Central publishes your tariff?

Mr. Benway: It publishes a tariff in which we concur.

Mr. Brady: It shows your rate?

Mr. Benway: Yes, Sir.

Mr. Brady: And shows the manner in which the lumber is shipped?

Mr. Benway: It does.

Examiner Burchmore: Are the joint class rates in effect over your road?

Mr. Benway: Including other commodities, yes, Sir.

Examiner Burchmore: What are your divisions on those rates?

Mr. Benway: I would have to refer to our tariff.

Examiner Burchmore: Are your tariff sheets on file with
3434 the Commission?

Mr. Benway: I think they are.

Examiner Burchmore: They are not customarily filed, you understand?

Mr. Benway: Pardon me, I will ask our Auditor. They are on file, are they not?

Mr. Steinbock: Yes, Sir.

Mr. Benway: They are on file.

Examiner Burchmore: I don't think they are on file, unless you sent them in in answer to a special request.

Mr. Brady: They are not on file, and I would ask permission to file them in connection with Mr. Benway's testimony.

Mr. Benway: I think they were sent in within the last two or three months.

Examiner Burchmore: Can you inform us with reference to the traffic of the road at all?

Mr. Benway: To some extent.

Examiner Burchmore: In a general way, about what proportion of the traffic is furnished by the Natalbany Lumber Company?

Mr. Benway: I can guess at that. I think our Auditor can give you that more correctly. I will make a guess, though,
3435 I will say about eighty per cent.

Examiner Burchmore: Does the lumber company have any commissaries along the line?

Mr. Benway: It has, yes, Sir.

Examiner Burchmore: Do you include the merchandise sent to these commissaries in that eighty per cent?

Mr. Benway: No. In fact, the principal commissary is on the Illinois Central and not on our road. The commissary is right on the side of the Illinois Central, the principal commissary. In further answer to your question, I might add, there are numerous small stores along our line.

Examiner Burchmore: I wish in preparing the statement of traffic, which should be given in tons and in dollars as well, that you

would indicate what proportion of the merchandise was handled on account of the lumber company. For example, if any shipments of machinery went into the mill, we want that shown as lumber company traffic and not miscellaneous traffic.

Mr. Benway: I think we have that here.

Mr. Brady: We will furnish it to you just like the books show.

Examiner Burchmore: Has there been any change in the
3436 last year or two in your general practice with respect to the handling of logs and lumber?

Mr. Benway: I would say No, except we have tried, as we have learned the rules of the Commission, to comply with them a little more fully.

Mr. Brady: With reference to your billing of lumber. It was formerly from Mason?

Mr. Benway: Yes, Sir; we formerly billed our lumber from Mason.

Examiner Burchmore: When was that changed?

Mr. Benway: The first part of this year, some time.

Examiner Burchmore: What was the reason for that change?

Mr. Benway: It was just thought best.

Examiner Burchmore: This refund arrangement is recent?

Mr. Benway: No, Sir; that has been in vogue for several years.

Examiner Burchmore: Done solely as a matter of convenience?

Mr. Benway: Yes, Sir; in fact it was formerly billed from Alexandria, although we changed it to this station on our line and found it didn't work as advantageously for us, and then changed it back for convenience.

3437 Examiner Burchmore: In the past year or two, has there been any change in basis of compensation for the movement of logs into the mill?

Mr. Benway: I think the results are practically the same. We formerly did charge so much per thousand, as your record seems to indicate.

Examiner Burchmore: Is the result the same?

Mr. Benway: About the same; it possibly nets the railroad a little more now.

Examiner Burchmore: Have you handled about the same amount of logs during the fiscal year ending June 30, 1910, as you handled during the preceding fiscal year?

Mr. Benway: We have handled considerably more. We have built another mill. When the railroad was first organized we had one small mill. Now we have one small mill and two large ones.

Examiner Burchmore: What was the reason of this change in the basis of compensation for hauling the logs in?

Mr. Benway: The revision of our rates and methods and complying with the Commission's ruling, and taking all things together, it was thought better to change the basis.

Examiner Burchmore: Was it considered that the previous
3438 method was at all irregular, or anything of that kind?

Mr. Benway: No, Sir, not that it was irregular, we thought that the present method was more regular.

Examiner Burchmore: Both were regular, but the present was more regular.

Mr. Benway: Yes, sir; that is hardly good grammar, but that is about what I mean.

Examiner Burchmore: When was this railroad first constructed?

Mr. Benway: As my memory serves me, in 1902.

Examiner Burchmore: Was it constructed about the same time that the first mill of the lumber company was opened?

Mr. Benway: No, Sir; the present company bought the railroad.

Mr. Brady: What do you mean by "the present company bought the railroad"?

Mr. Benway: The present stockholders of the railroad company bought it after it had been built.

Mr. Brady: There is no one here that knows anything about that better than myself. I represented the Dinkman interests in the purchase of this plant and in the purchase of this railroad. The
3439 railroad stock was purchased and the lumber company stock was purchased, and each assigned the stock to particular persons.

Examiner Burchmore: Of course there were certain legal steps, but wasn't the purpose the purchase by the Dinkmans of the lumber and mill and everything?

Mr. Brady: Well, the Dinkmans were in the North and the matter was placed in my hands, and in the hands of another man, who is not here, and I cannot get him, and the idea was that the railroad was worth a certain sum of money, that is the stock of it, and the stock of the lumber company was worth a certain amount of money, and then a certain amount of money was paid over to the original stockholders of these companies, and a certain proportion went for the purchase of the stock of the railroad company, and a certain proportion went for the purchase of the stock of the lumber company.

Examiner Burchmore: But there had previously been an identity between the former owners of the railroad company and the former owners of the lumber company?

Mr. Brady: I don't know.

Examiner Burchmore: I think the substance of it was that the Dinkman interests bought this whole railroad and timber
3440 as one enterprise. It looks that way, in substance.

Mr. Brady: Well, in substance you might state that, and yet we went into detail. The question of how much rolling stock and how many engines, and all that, and what this railroad was worth, and whether or not they would pay a certain sum for it, and they would not buy one without buying the other.

Examiner Burchmore: Mr. Dinkman bought the railroad, not as a railroad alone, but because he had other interests there at the same time?

Mr. Brady: It is fair to say that in the purchase, the railroad prospect, the ability to build into Baton Rouge and to connect with the Mississippi River and the local traffic, was all taken into considera-

tion and urged on Mr. Easterling, I believe, who represented the purchasers with me.

Examiner Burchmore: Has this company any contract with the Illinois Central Railroad Company of any kind, except division sheets and tariffs?

Mr. Benway: No, Sir; there is this understanding, their two cent rate.

Examiner Burchmore: There is no written contract?

Mr. Benway: No, Sir; there is no written contract.

3441 Examiner Burchmore: You don't have any trackage agreements?

Mr. Benway: No, Sir.

Examiner Burchmore: You heard Mr. Smythe and Mr. Steinbock testify with respect to this company. Are there any corrections that you think ought to be made in their testimony?

Mr. Benway: I don't think of any that has not been made.

Mr. Brady: You spoke a moment ago of a contract with reference to the division of rates. It is just simply what is shown in the record?

Mr. Benway: Yes, Sir. There was one point, excuse me. It was stated that the lumber and staves were the principal industries along the line; that was partly correct. There is, however, these numerous stores, and there is considerable merchandise shipped to these stores during the course of the year.

Examiner Burchmore: How many carloads a year?

Mr. Benway: I think our records will show there are many carloads.

Examiner Burchmore: Not over five thousand pounds per annum.

3442 Mr. Benway: I wouldn't think so.

Examiner Burchmore: Well, your tonnage statements already filed, and to be filed, will show that?

Mr. Benway: Yes, Sir.

Mr. Brady: Mr. Benway, who is it that receives salaries from the railroad company?

Mr. Benway: It has its local men, first, along its line; in its general office it has its accountant and chief clerk, the accountant paid entirely by the railroad company, and our auditor's salary is divided between the lumber company and the railroad company.

Mr. Brady: Mr. Smythe is General Manager?

Mr. Benway: Mr. Smythe is General Manager.

Examiner Burchmore: He receives a salary?

Mr. Benway: He receives a salary from the railroad.

Examiner Burchmore: That makes three?

Mr. Benway: Yes, Sir.

Mr. Brady: I will ask you if any other officers of the railroad company render any material services?

Mr. Benway: There are others who render services, and, I might say, that we do interchange forces.

Mr. Brady: Are they paid?

3443 Mr. Benway: We mean to have them paid in proportion to the services rendered to the different companies.

Examiner Burchmore: Does the General Manager draw a salary from the lumber company?

Mr. Benway: He draws a salary from the lumber company.

Examiner Burchmore: From both companies?

Mr. Benway: From both companies.

Examiner Burchmore: What is his salary from the railroad company?

Mr. Benway: For that, and another road that will be brought out, one hundred and fifty dollars per month.

Examiner Burchmore: Is that seventy-five dollars for this road?

Mr. Benway: About a hundred dollars for this road.

Examiner Burchmore: Does he render that amount of service to this road?

Mr. Benway: He does.

Mr. Brady: I will ask you whether or not the president renders any material services? It is shown that he does not get any salary.

Mr. Benway: He does render some services, yes, Sir.

Mr. Brady: Well, I asked material services.

3444 Mr. Benway: Well, I would say——

Mr. Brady: Does he perform any services at all other than advise?

Mr. Benway: Well, no; in an advisory capacity.

Mr. Brady: Does the president do any more than advise, if he is asked any questions?

Mr. Benway: That is all.

Mr. Brady: And they get no salaries?

Mr. Benway: No, Sir.

Mr. Brady: That is the best hearing we are prepared to make. If there is anything further that the Examiner would like, we will be glad to furnish it.

Examiner Burchmore: Any communication that you may address to the Commission containing any additional facts with reference to your road, will be placed on record and accepted for what it may seem to be worth.

3445 *Kentwood, Greensburg & Southwestern Railway Company.*

Examiner Burchmore: We will now take up the case of the Kentwood, Greensburg & Southwestern Railway Company.

Mr. Brady: I will call Mr. O. C. Pantall. Now, let me state what I will show by Mr. Pantall. I expect to show by Mr. Pantall that he represented the purchasers from the old owners and incorporators both of the Kentwood, Greensburg & Southwestern Railroad Company and the Amos Kent Lumber and Brick Company, and that he knows something of the physical condition of the road, its rolling stock, though not at present connected with it.

O. C. PANTALL was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: Mr. Pantall, what is you occupation and place of residence?

Mr. Pantall: Hammond, Louisiana.

Examiner Burchmore: What is your occupation?

Mr. Pantall: Lumberman.

Examiner Burchmore: By whom are you employed?

Mr. Pantall: Natalbany Lumber Company.

Examiner Burchmore: Do you receive any salary from the Kentwood, Greensburg & Southwestern Railway Company?

3446 Mr. Pantall: No, Sir.

Examiner Burchmore: Do you receive any salary from the Amos Kent Lumber and Brick Company?

Mr. Pantall: No.

Examiner Burchmore: Are you an employé of the Kentwood. Greensburg & Southwestern Railway?

Mr. Pantall: No, Sir.

Examiner Burchmore: Do you know what the N. T. & J. is?

Mr. Pantall: No, Sir.

Examiner Burchmore: Is there a private tram-road connecting with the Illinois Central at Tangipahoa?

Mr. Pantall: I think there is a small line there, but I am not familiar with the name.

Examiner Burchmore: The Kentwood, Greensburg & Southwestern Railway connects with the Illinois Central at Kentsmill?

Mr. Pantall: At Kentsmill.

Examiner Burchmore: It has no other railroad connections?

Mr. Pantall: No, Sir.

Examiner Burchmore: Is there any other private tram-road connected with it?

Mr. Pantall: None other than the Amos Kent Lumber & Brick Company.

3447 Examiner Burchmore: They have private trams?

Mr. Pantall: Yes, Sir; logging.

Examiner Burchmore: Do you know the length of this railroad?

Mr. Pantall: It is about sixteen miles, I believe.

Examiner Burchmore: Narrow, or standard gauge?

Mr. Pantall: Narrow gauge.

Examiner Burchmore: What is its equipment?

Mr. Pantall: Well, I believe——

Examiner Burchmore: How many locomotives?

Mr. Pantall: Seven, I believe.

Examiner Burchmore: Does it operate any of these locomotives?

Mr. Pantall: It operates four.

Examiner Burchmore: And leases three to the lumber company?

Mr. Pantall: Leases three to the lumber company.

Examiner Burchmore: Does it own any passenger cars?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: How many,

Mr. Pantall: Two, I believe, I am not sure; that is, they are home-made passenger cars.

3448 Examiner Burchmore: Freight cars remodelled?

Mr. Pantall: No, not exactly that; they are built something like on the style of the caboose.

Examiner Burchmore: Aside from these passenger cars, has it any cabooses?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: How many?

Mr. Pantall: Well, I am not prepared to answer that.

Examiner Burchmore: How many freight cars, and what is their character?

Mr. Pantall: Well, they have box cars and regular flat cars. The flat cars are used as logging cars. Now, as to the exact number, I don't know.

Examiner Burchmore: Are those cars all used by the railroad company?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: They are not leased to the lumber company?

Mr. Pantall: No, Sir.

Examiner Burchmore: They are not used by the lumber company except for the movement of their logs.

Mr. Pantall: That is all.

3449 Examiner Burchmore: I assume that it is admitted that the Kentwood, Greensburg & Southwestern is owned by the Amos Kent Lumber & Brick Company?

Mr. Brady: Permit me to make a statement. The stockholders of the Amos Kent Lumber and Brick Company are identical with the stockholders of the Kentwood, Greensburg & Southwestern Railroad Company, except three or four other stockholders than those of the lumber company, who own about nineteen shares of stock in the railroad company. The controlling interest of the railroad company and the lumber company being identical.

Examiner Burchmore: Who are the holders of these nineteen shares of stock? Have they any relation to the lumber company?

Mr. Brady: No, Sir, no relation.

Examiner Burchmore: Did they purchase their stock?

Mr. Brady: I will just go ahead and state the reason.

Examiner Burchmore: If you will.

Mr. Brady: Mr. Davis is related to the Dinkman family, and, I suppose, paid for his stock. Mr. Richardson is a stockholder, and while he is not related directly to the Dinkman family, still he is a friend of the family, and the attorney, and the stock was

3450 placed in friendly hands. That is just about the history of it.

Examiner Burchmore: Legally there may be a complete separation between the two companies, but in a substantial sense, the two companies are identical in interest.

Mr. Brady: Legally they are entirely separate, and separately

managed and controlled, but so far as the financial industry is concerned, it is as you state.

Examiner Burchmore: We are not dealing with technicalities in this examination.

Mr. Brady: Well, we have to deal, Mr. Examiner, under the laws of Louisiana and Mississippi, very largely in legal technicalities, when you get in the hands of the Commissioners.

Examiner Burchmore: I am not saying what the Commission or the Courts may hold. I will assume that a legal separation is enough.

Mr. Brady: I wanted to assure you that we were not resorting to these technicalities for the purpose of misleading but we do to comply with the law.

Examiner Burchmore: Has the Amos Kent Lumber and Brick Company more than one mill?

3451 Mr. Pantall: Just one at Kentsmill.

Examiner Burchmore: Is there any private track connecting the Illinois Central with the mill?

Mr. Pantall: You mean the K. G. & S. W. The K. G. & S. W. being a narrow gauge road, have to make the necessary arrangement to transfer their freight to the standard equipment of the I. C. cars, and therefore we have our own cars in there, the K. G. & S. W. have a spur in there for the purpose of transferring.

Examiner Burchmore: Who places the empty cars at the mill?

Mr. Pantall: You mean the I. C.?

Examiner Burchmore: Who places the empty I. C. cars for loading with lumber?

Mr. Pantall: The I. C.

Examiner Burchmore: And the Illinois Central takes them away?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: The track connecting the Illinois Central with the mill being a standard gauge track?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: Is there any brick mill on this line?

Mr. Pantall: There is a brick mill located at Kentsmill,

3452 right at, or near, the saw-mill.

Examiner Burchmore: It is owned by this Brick Company?

Mr. Pantall: The Amos Kent Brick & Lumber Company.

Examiner Burchmore: Do they get the clay for the brick right there at the mill?

Mr. Pantall: Right there at the mill, is my understanding, or a little ways out, you know, practically at the mill.

Examiner Burchmore: Are you competent to testify with reference to the rates and division of rates?

Mr. Pantall: No, Sir.

Examiner Burchmore: Are you competent to testify with respect to the manner of billing logs and lumber?

Mr. Pantall: No, Sir.

Examiner Burchmore: What is the character of this road, is it well constructed?

Mr. Pantall: Very well constructed.

Examiner Burchmore: What is the weight of the rails?
Mr. Pantall: Thirty-five, and some forty, I believe.
Examiner Burchmore: Are the ties in good condition?
Mr. Pantall: Good condition, yes, Sir.
Examiner Burchmore: The rails securely spiked down?
3453 Mr. Pantall: Yes, Sir.
Examiner Burchmore: Who owns the right of way?
Mr. Pantall: I am not prepared to answer that.
Examiner Burchmore: Are there any bridges?
Mr. Pantall: Yes, sir.
Examiner Burchmore: Are they substantially built?
Mr. Pantall: Yes, Sir.
Examiner Burchmore: Is it a road that goes up hill and down grade?
Mr. Pantall: Well, it is graded to a certain extent, but it still goes up and down.
Examiner Burchmore: It isn't like that road we had yesterday that was so rough they couldn't use their couplers?
Mr. Pantall: No, Sir; the road is in very good condition.
Examiner Burchmore: Are there any other mills on the line?
Mr. Pantall: Yes, Sir.
Examiner Burchmore: How many, and what are they?
Mr. Pantall: I believe there are four saw mills, about four saw mills.
Examiner Burchmore: Are they of large capacity?
Mr. Pantall: No, Sir; small.
3454 Examiner Burchmore: Where do they get their logs?
Mr. Pantall: They get them from the timber out there in that territory.
Examiner Burchmore: Do they bring them in by tram?
Mr. Pantall: No, Sir, by team, generally.
Examiner Burchmore: How far do they haul them by team?
Mr. Pantall: Well, sometimes a quarter, half, sometimes three miles; different distances.
Examiner Burchmore: Is the expense of teaming very great in that country?
Mr. Pantall: Well, I should think it would be.
Examiner Burchmore: Have you any idea what the average cost of teaming logs is to the mill?
Mr. Pantall: Well, it is of course different in different localities, it is all according to the country; it costs all the way from a dollar and a half to three dollars a thousand, just according to the difference in the haul.
Examiner Burchmore: What does it cost to tram logs to the mill?
Mr. Pantall: Well, now, that depends too; sometimes logs can be trammed to the mill say from twenty-five cents to a dollar a thousand; it is all according to the amount of stumpage that
3455 stands on the land through which your spur is being built; that is, if you have a great amount of stumpage, you can log a great deal cheaper.

Examiner Burchmore: That cost that you gave, twenty-five cents, does that include the cost of putting the tram there?

Mr. Pantall: In one way it would, too; but the best way to figure is so much a mile for the tram, and then get the amount of stumpage that goes to that tram and then you can readily see how much.

Examiner Burchmore: Well, a small mill that brings its logs in by team, can hardly compete with the larger mill that has a tram, can it?

Mr. Pantall: No, Sir.

Examiner Burchmore: How is this lumber that is made by these independent mills along the line transported, it has to be hauled in narrow gauge cars?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: Down to the junction of the Illinois Central?

Mr. Pantall: Down to the junction of the Illinois Central, and then transfered to the standard I. C. cars.

Examiner Burchmore: Who transfers it?

3456 Mr. Pantall: Why, the railroad company.

Examiner Burchmore: The Kentwood, Greensburg & Southwestern?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: Do they make any charge?

Mr. Pantall: Yes, Sir, there is a tariff.

Mr. Brady: I will say this, that the Railroad Commission of Louisiana has permitted a certain charge for the service.

Examiner Burchmore: What about the Interstate Commerce Commission?

Mr. Brady: I don't think it is Interstate.

Examiner Burchmore: Do these mills ship lumber outside of the State of Louisiana?

Mr. Pantall: I am not prepared to answer that. My impression is that they ship most of their lumber South.

Examiner Burchmore: Are those cars and locomotives equipped with couplers and air-brakes?

Mr. Pantall: That is another question I am not prepared to answer.

Mr. Brady: I put him on chiefly to show how the stock was acquired.

Mr. Brady: Mr. Pantall, who was it that originally owned

3457 the Amos Kent Lumber and Brick Company stock, and the capital stock of the railroad company?

Mr. Pantall: The Kents and Moberly, and, I believe, another party in Chicago, I don't remember his name, held one share.

Mr. Brady: And some other persons around Kentwood, several persons, didn't they?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: Who was Mr. Kent?

Mr. Brady: He was the man that originally built the mill.

Examiner Burchmore: He is not the Y. & M. V. Superintendent?

Mr. Brady: No, Sir.

Mr. Brady: To whom was the stock of this lumber company

sold by the original owners? Who purchased it from the original owners?

Mr. Pantall: We did.

Mr. Brady: Who do you mean by "we," Mr. Pantall?

Mr. Pantall: Why, the Dinkman interests purchased the stock.

Mr. Brady: Who acted in the capacity as their representatives in the purchase?

Mr. Pantall: You and I.

3458 Mr. Brady: Who purchased the stock of the railroad?

Mr. Pantall: The same people?

Mr. Brady: State whether or not there was an estimate placed upon the value of the railroad at the time it was purchased?

Mr. Pantall: There was.

Mr. Brady: Was it with the two propositions, so far as estimating values are concerned, determining the value of each, were they separate from each other?

Mr. Pantall: Entirely.

Mr. Brady: What consideration was paid by the purchasers for the railroad stock?

Mr. Pantall: We had to pay one hundred thousand dollars.

Mr. Brady: That hundred thousand dollars went to the payment of the stock?

Mr. Pantall: Yes, Sir, of the railroad company, the K. G. & S. W. We bought the stock.

Mr. Brady: You bought the right to the stock?

Mr. Pantall: Yes, Sir.

Mr. Brady: Had the stock in the railroad been paid for by the original subscribers?

Mr. Pantall: Some of it had, and some had not.

3459 Mr. Brady: That that had been paid for, you had assigned.

Mr. Pantall: Yes, Sir.

Mr. Brady: And that that had not been paid for, you paid for by paying the money into the treasury of the railroad company?

Mr. Pantall: Yes, Sir.

Mr. Brady: The stock was afterwards issued?

Mr. Pantall: Yes, Sir.

Mr. Brady: Originally, the stockholders in each of these companies were not the original stockholders?

Mr. Pantall: How is that?

—. The persons who are now stockholders in each of these companies are not the original holders of the stock in these companies?

Mr. Pantall: No, Sir.

Examiner Burchmore: When was this saw mill of the Amos Kent Lumber & Brick Company established?

Mr. Pantall: You mean the original.

Examiner Burchmore: The original saw mill, yes.

Mr. Pantall: Well, I am not prepared to say.

Examiner Burchmore: Years ago?

Mr. Pantall: Yes, a long time.

Examiner Burchmore: When was this railroad first built?

3460 Mr. Pantall: I presume at the time the mill was originally built.

Examiner Burchmore: Is there anyone here who knows that?
Mr. Pantall: I don't know, Sir.
Examiner Burchmore: When was this brick yard established?
Mr. Pantall: At the same time, possibly.
Examiner Burchmore: What is the total capitalization of this railroad?
Mr. Pantall: Well, that I am not prepared to say.
Mr. Brady: What is there at the Eastern terminus of this road, in the way of a town?
Mr. Pantall: Well, there is a town out there by the name of Frieler.
Mr. Brady: Is there any town or municipal corporation through which the road extends?
Mr. Pantall: Yes, Sir, Greensburg.
Mr. Brady: What is Greensburg?
Mr. Pantall: The Parish Seat of that County.
Mr. Brady: State whether or not your road carries mail?
Mr. Pantall: It does.
Mr. Brady: Do you know, Mr. Pantall, whether it is the purpose of the owners of the stock of this railroad company
3461 to have it remain a permanent railroad?
Mr. Pantall: I believe it is, yes, Sir.
Mr. Brady: You stated something about some mills being along the road. Are there any mercantile establishments along the road?
Mr. Pantall: Yes, Sir; some at Freiler and also at Greensburg.
Mr. Brady: What railroad facilities have the people of that Parish, which is St. Helena Parish, other than this road?
Mr. Pantall: None.
Mr. Brady: Does it carry passengers for that Parish?
Mr. Pantall: It does.
Mr. Brady: It is the outlet, then?
Mr. Pantall: Practically the outlet.
Mr. Brady: For St. Helena Parish?
Mr. Pantall: Yes, Sir.
Mr. Brady: And has been for how many years?
Mr. Pantall: For a great many years, just how many I cannot say.
Mr. Brady: Don't you know the objective point of this road?
Mr. Pantall: No, Sir.
3462 Mr. Brady: The Western point, I mean?
Mr. Pantall: No.
Mr. Brady: You don't know?
Mr. Pantall: No, Sir.
Mr. Brady: The purpose of the stockholders of this railroad company, as I understand it, is to let it remain a permanent railroad; to connect with the Natalbany,—New Orleans, Natalbany & Natchez Railway, so as to form a connection at Baton Rouge for that section of the country, thereby furnishing railroad facilities to a section and territory of Louisiana that is now without them.
Examiner Burchmore: But this New Orleans, Natalbany & Nat-

chez railroad is aiming towards Baton Rouge, and the Kentwood, Greensburg and Southwestern is apparently aiming at Chicago.

Mr. Brady: I don't know that these maps are correct. They are not actually connected now. I am stating the purpose of the owners.

Examiner Burchmore: There is at present a through line of railroad to Baton Rouge via Hammond?

Mr. Brady: Yes, Sir; I understand that, but that does not help Greensburg. There is an untouched virgin forest in there
3463 not owned by these people.

Examiner Burchmore: That forest will furnish a large amount of logs for these mills?

Mr. Brady: It may do it.

Examiner Burchmore: Has this railroad any stations?

Mr. Pantall: It has.

Examiner Burchmore: At Greensburg?

Mr. Pantall: Yes; Freiler is the name of the station there.

Examiner Burchmore: And what other points?

Mr. Pantall: If you will allow me to refer?

Examiner Burchmore: Certainly.

Mr. Pantall: The first station on the line is Kentsmill, flag-station Carpenters——

Mr. Brady: What is at that flag-station?

Mr. Pantall: It is practically a junction point, I believe.

Examiner Burchmore: Junction point for what?

Mr. Pantall: It is possibly where the logs come in, let me see. In this connection, I am not prepared to testify where these stations are and the number of people there.

Examiner Burchmore: You can give us a general idea,
3464 you have been there.

Mr. Pantall: There is Morris Crossing, Youngs, Phillips, Hutchins and Chapman; these are all flag-stations.

Examiner Burchmore: Any buildings there?

Mr. Pantall: At some of those places. Freila, there is a station there with an agent, and that is about all, probably one or two others.

Examiner Burchmore: At what points are there agents?

Mr. Pantall: At Freiler and Kentsmill.

Examiner Burchmore: Do you use the Illinois Central Station at Kentsmill?

Mr. Pantall: No, Sir.

Examiner Burchmore: You have a station of your own?

Mr. Pantall: Yes, Sir.

Examiner Burchmore: Is there anything in that station except the agency?

Mr. Pantall: No, Sir.

Examiner Burchmore: What is it that you had in mind that is close by?

Mr. Pantall: Well, the office and the store are in another part of the building. Now along these stations I think there is three or four saw-mills; in fact, the day I was over there I think there was
3465 about six carloads of lumber ready to be hauled in to the I. C.

Examiner Burchmore: These are all small mills?

Mr. Pantall: Yes, Sir, small mills.
Examiner Burchmore: Are there any track scales for weighing carload shipments?
Mr. Pantall: I believe not.
Examiner Burchmore: Are there any special facilities for handling less than carload freight, that you recall?
Mr. Pantall: Yes, they have the transfer.
Examiner Burchmore: They have warehouses where it can be stored?
Mr. Pantall: Yes, Sir.
Examiner Burchmore: Can you inform us as to the number of men employed on the road?
Mr. Pantall: No, Sir.
Examiner Burchmore: Do they operate a regular train service?
Mr. Pantall: Yes*a*, Sir.
Examiner Burchmore: How many trains a day?
Mr. Pantall: I am not prepared to answer.
Examiner Burchmore: They have a time-table?
3466 Mr. Pantall: Yes, Sir.
Mr. Brady: Yes, Sir. In this connection, while I think of it, I submit this same answer, or statement in connection with this railroad, and I offer our time-table.
Examiner Burchmore: And it is understood that you are called upon for the same information, and you have the same rights in this case as in the case just disposed of.
Mr. Brady: Yes, Sir.
Examiner Burchmore: We will so consider it. You will make a similar record in this case.

(The paper so offered and identified was received in evidence and thereupon marked Kentwood, Greensburg & Southwestern Railway Company Exhibit No. 1, received in evidence December 13, 1910, and is attached hereto.)

Mr. Brady: The main officers of this company, one of them is in Rock Island, and I have to resort to piecemeal testimony.

3467 T. A. SOWELL, was called as a witness, and having been duly sworn, testified as follows:

Mr. Brady: He is the book-keeper. With reference to the separation of the lumber company's business and the railroad company's business, I think he will be able to show.
Examiner Burchmore: What is the capital stock of this road?
Mr. Sowell: Authorized capital three hundred and fifty thousand.
Examiner Burchmore: And how much has been issued?
Mr. Sowell: One hundred thousand.
Examiner Burchmore: Are there any bonds?
Mr. Sowell: No, Sir.
Examiner Burchmore: Any other indebtedness?
Mr. Sowell: Well, no.
Examiner Burchmore: Just current liabilities?
Mr. Sowell: Just current liabilities.

Examiner Burchmore: This company did not borrow any money from the lumber company?

Mr. Sowell: No; not that I am familiar with.

Examiner Burchmore: Has it paid any dividends on
3468 stock?

Mr. Sowell: No, Sir.

Examiner Burchmore: What surplus has it accumulated, if any?

Mr. Sowell: I think it has about twelve thousand dollars.

Examiner Burchmore: How many years has it required to accumulate that surplus?

Mr. Sowell: Well, I couldn't say; I took charge of the books last March, and I haven't gone back.

Examiner Burchmore: About what is the net income this year?

Mr. Sowell: Net income from operating revenue, ten thousand dollars.

Examiner Burchmore: What is the total operating revenue?

Mr. Sowell: Fifty-five thousand, four hundred and ten dollars and seventy-five cents.

Examiner Burchmore: Has this company been improving its line and adding any better facilities out of its earnings?

Mr. Sowell: Yes, Sir, spending it back into the road.

Examiner Burchmore: Has it a cash surplus?

Mr. Sowell: No, Sir.

Examiner Burchmore: It keeps its bank account separate from the lumber company?

Mr. Sowell: Yes, Sir.

3469 Examiner Burchmore: How do you collect charges from the lumber company for its traffic?

Mr. Sowell: You mean for its logging account?

Examiner Burchmore: Well, for any service rendered?

Mr. Sowell: We pass it through journal entries; they charge us on their lumber books and we give them credit on ours.

Examiner Burchmore: What do they charge you on their lumber books?

Mr. Sowell: Various things.

Examiner Burchmore: Are the employés of the lumber company actually paid by the paymaster of the lumber company?

Mr. Sowell: Well, they were up to a few months ago, the K. G. & S. W. began paying their own payroll.

Examiner Burchmore: Does the Amos Kent Lumber Company do the purchasing for the railroad company, as a practical matter?

Mr. Sowell: Well, the same purchasing agent is the purchasing agent for both companies.

Examiner Burchmore: Well, I mean does the lumber company books show any transactions in which the railroad company is interested?

3470 Mr. Sowell: At times, yes, Sir.

Examiner Burchmore: Does the railroad company handle any cash in its transactions with the Amos Kent Lumber Company?

Mr. Sowell: It has. It has paid its auditor in cash sometimes.

Examiner Burchmore: Are you competent to testify with respect to rates and divisions?

Mr. Sowell: No, Sir.

Examiner Burchmore: Are you advised with respect to the billing?

Mr. Sowell: No, Sir. Only the local billing as far as the lumber has been brought out. In regard to the log billing, it is the same as is on the Natalbany Lumber Company, the billing is made once a month.

Mr. Gutheim: On your last report to the Commission for the year ending June 30, 1910, you show as a liability $47,950.26 on account of audited vouchers and wages. Now, does that represent actually, or approximately, the net indebtedness due by the railroad to the lumber company?

Mr. Sowell: Yes, Sir.

Mr. Gutheim: And that accrues——

3471 Mr. Sowell: Some of them, you know, is vouchers that is due other people beside the lumber company.

Mr. Gutheim: But the great majority is on the account due the lumber company?

Mr. Sowell: The lumber company, yes, Sir.

Mr. Gutheim: And that account accrues on charges on the part of the railroad against the lumber company for freight services, and charges from the lumber company against the railroad for supplies furnished the railroad and for wages paid by the lumber company to the railroad employés?

Mr. Sowell: Yes, sir.

Mr. Gutheim: So it represents in fact the balance due at the end of the fiscal year of the running account between the two companies?

Mr. Sowell: Yes, Sir.

Mr. Gutheim: And on that balance, does the railroad company pay interest to the lumber company?

Mr. Sowell: It has not been, but the question has been raised, and at the close of this fiscal year there will be interest charged.

Mr. Gutheim: As the matter stands, you need practically the entire amount of that open account, plus the capital stock

3472 outstanding, to offset your cost of road and equipment?

Mr. Sowell: Yes, Sir.

Mr. Gutheim: So it practically represents expenditures in the property which are in the property itself?

Mr. Sowell: Yes, Sir.

Examiner Burchmore: Do you know when this railroad was constructed?

Mr. Sowell: No, Sir, I don't; only from the record here.

Examiner Burchmore: What does the record indicate?

Mr. Sowell: They say "Organized January 25, 1906."

Mr. Brady: I can enlighten you a little there. Before the present owners of the stock of the railroad company and the lumber company purchased the stock, the former owners separated the two companies by securing a charter for the lumber company, and by con-

veying—I mean a charter for the railroad company, the lumber company having already been chartered,—and by conveying to the railroad company the right of way and rolling stock, and in fact the railroad formerly owned by the lumber company. That was done before the present owners acquired the stock.

Examiner Burchmore: Do you know whether this railroad
3473 was built at the same time the mill was opened?

Mr. Brady: My information is this railroad is forty or fifty years old.

Examiner Burchmore: It was not a common carrier until 1906?

Mr. Brady: It was not a common carrier, but my impression is that it was held by the Courts to be a common carrier.

Examiner Burchmore: Of course, a railroad may be a common carrier and not be owned by a man. Wasn't the lumber mill there before the railroad was built?

Mr. Brady: I think so. That is my understanding about it. I think the two commenced to grow together.

Examiner Burchmore: Were you counsel for this railroad company at the time it was incorporated?

Mr. Brady: No, Sir; it was incorporated before the present owners purchased the stock, and it was gotten out by the attorneys representing the former stockholders.

Examiner Burchmore: Do you know the purpose of the incorporation?

Mr. Brady: The purpose—it was held to be a common carrier, and it was the purpose to separate the business of the lumber company from the railroad, and to establish the railroad and to
3474 keep them entirely separate to comply with the laws of the State and the orders of the Railroad Commission of the State. They were adjudged to be a common carrier and they had to be permanent. The idea was it was going to be a permanent railroad, and it was just as well to be one in every sense of the word.

Examiner Burchmore: Was the stock of the company issued for cash?

Mr. Sowell: I think so.

Mr. Brady: I can tell you about that. Part of that was issued to the original owners of the Amos Kent Lumber and Brick Company, but was not paid for, and the purchasers who now own the stock paid for the stock that had not been paid for, that is, paid for it by paying the money into the treasury of the railroad company; and that which had been issued and paid for was assigned to them for a consideration, namely, the value of the stock.

Examiner Burchmore: I presume that when the railroad was incorporated in 1906, stock was issued in exchange for the road.

Mr. Brady: My understanding about that was that the stock had been issued before the railroad became complete, the charter
3475 had been gotten out by the incorporators. The lumber company conveyed the entire stock to the railroad company for the one hundred thousand dollars, and I think, I am not sure, paid for, then the present owners of the railroad company came in to purchase that stock which had not been issued but subscribed for,

and was paid for by them by paying the money into the treasury of the railroad company; that stock that had been paid for was assigned to the present stockholders of the railroad company.

Examiner Burchmore: Are there any bonds?

Mr. Brady: I want to state this. I am stating that as an occurrence in 1906, I believe, and I think I am correct about it.

Examiner Burchmore: You are sufficiently familiar with the railroad to be able to testify as to the number of employés?

Mr. Sowell: Well, no; I don't think I can, I have never been over the road.

Examiner Burchmore: Who owns the right of way upon which this railroad is built?

Mr. Sowell: The railroad company, I think.

Examiner Burchmore: How much of this railroad has
3476 been there for forty years?

Mr. Sowell: I couldn't say.

Examiner Burchmore: Well, is there any part of it of recent construction?

Mr. Sowell: Yes, Sir, a part of it, I believe; but I am not competent to answer that.

Examiner Burchmore: Is there a proposition on foot to consolidate these two railroads?

Mr. Brady: No, Sir; the only proposition that there is on foot is one on the part of the stockholders of this road, and is to extend it so as to connect with the New Orleans, Natalbany & Natchez Railway, and in that way get an outlet to Baton Rouge. We will file a map with you showing the proposed extension.

Examiner Burchmore: Show that on the same map, if you will.

Mr. Brady: Yes, Sir, we will.

Examiner Burchmore: What officers of the railroad company hold inter-State passes?

Mr. Sowell: I don't know.

Mr. Brady: You stated formerly that there was a system of accounting between the lumber company and the railroad
3477 company, and the employés of the railroad company were paid by the lumber company. Has that system been changed?

Mr. Sowell: Yes, Sir.

Mr. Brady: Who pays the employés of the railroad company now?

Mr. Sowell: The railroad company.

Mr. Brady: Who are you employed by?

Mr. Sowell: The railroad company.

Mr. Brady: Who pays you?

Mr. Sowell: The railroad company.

Mr. Brady: Have you any connection with the lumber company?

Mr. Sowell: Yes, Sir.

Mr. Brady: What connection have you with the lumber company?

Mr. Sowell: Well, I occasionally do a little book-keeping, but I am not the book-keeper of the lumber company.

Mr. Brady: You are known as an employé of the railroad company?

Mr. Sowell: Yes, Sir.
Mr. Brady: And paid by it?
Mr. Sowell: Yes, sir.
3478 Mr. Brady: Who else is employed by it?
Mr. Sowell: The Auditor.
Mr. Brady: And part of his time is taken and he receives part payment of his salary from the railroad company?
Mr. Sowell: Yes, Sir.
Mr. Brady: Who else in your office?
Mr. Sowell: No one.
Mr. Brady: Does the president and vice-president render, or do the president and vice-president render any regular service to this road?
Mr. Sowell: No, Sir.
Mr. Brady: They receive no salaries, do they?
Mr. Sowell: No, Sir.
Examiner Burchmore: I thought you were secretary of the lumber company?
Mr. Sowell: No, Sir.

Whereupon at 12:30 P. M. a recess was taken until 2 o'clock P. M.

3479 After recess.

T. L. SMYTHE was called as a witness, and having been duly sworn, testified as follows:

Mr. Brady: You have been sworn, have you, Mr. Smythe?
Mr. Smythe: Yes, Sir.
Mr. Brady: Mr. Smythe, what position do you hold with the Kentwood, Greensburg & Southwestern Railway Company?
Mr. Smythe: General Manager.
Mr. Brady: How long have you been General Manager?
Mr. Smythe: Since last February.
Mr. Brady: How many engines have you, locomotives, I mean?
Mr. Smythe: Seven.
Mr. Brady: How many engineers?
Mr. Smythe: Seven.
Mr. Brady: How many firemen?
Mr. Smythe: Seven.
Mr. Brady: How many brakemen?
Mr. Smythe: Seven.
Mr. Brady: How many stations?
Mr. Smythe: Two.
Mr. Brady: How many cars?
Mr. Smythe: Seventy.
3480 Mr. Brady: How many derricks, pile-drivers and things of that sort?
Mr. Smythe: One pile-driver.
Mr. Brady: How many bridges? Estimate it.
Mr. Smythe: Twenty.
Mr. Brady: How many people live in Greensburg?

Mr. Smythe: Three hundred.

Mr. Brady: How many live in Freiler?

Mr. Smythe: About two hundred.

Mr. Brady: What is the character of the territory between the railroad facilities on the North and the railroad facilities on the South for the people; the distance between the railroads North and South, in other words?

Mr. Smythe: They are nearly about equal.

Mr. Brady: Well, how many miles North to a railroad, and how many miles South?

Mr. Smythe: About fourteen miles North, and possibly about twelve miles South, twelve or thirteen.

Examiner Burchmore: To a common carrier railroad?

Mr. Smythe: Yes, Sir.

Mr. Brady: Well, is there any other railroad that is not a common carrier?

3481 Mr. Smythe: No, Sir.

Examiner Burchmore: What is this N. T. & G.?

Mr. Smythe: I never heard of it.

Mr. Brady: Is there any such road there?

Mr. Smythe: There is a little road that goes East from there.

Mr. Brady: What is the name of that road?

Mr. Smythe: They go East.

Examiner Burchmore: Well, the map maybe has the road running the wrong way.

Mr. Brady: I will ask you whether or not the railroad company owns any spur-tracks that run down in the territory along the route of this railroad?

Mr. Smythe: No, Sir.

Mr. Brady: Who owns the spur-tracks that connect with this road?

Mr. Smythe: The Amos Kent Lumber and Brick Company and C. P. Bradley.

Mr. Brady: I will ask you, Mr. Smythe, whether there is any discrimination, or any service for the Amos Kent Lumber and Brick Company different from that of the public service rendered by that railroad?

3482 Mr. Smythe: None to my knowledge.

Mr. Brady: You are the General Manager?

Mr. Smythe: None whatever, at least, that is the answer.

Mr. Brady: What about the spur-track belonging to Bradley, what is the length of it?

Mr. Smythe: Five or six hundred feet.

Mr. Brady: You take up logs that are loaded on cars, then, along this line?

Mr. Smythe: Yes, Sir.

Mr. Brady: For Bradley and the Amos Kent Lumber and Brick Company?

Mr. Smythe: We don't haul logs for Bradley.

Mr. Brady: What do you haul?

Mr. Smythe: Lumber.

Mr. Brady: Do you haul any other class of commodities?

Mr. Smythe: He has a little mill, and we haul his lumber, and we haul for him other commodities, just the same as we do for the other people along the road.

Mr. Brady: Who is Bradley, Mr. Smythe?

Mr. Smythe: He is a little saw-mill man; has a little saw-mill.

Mr. Brady: Will you please give the names of the owners
3483 of saw-mills along this railroad?

Mr. Smythe: Yes, Sir.

Mr. Brady: Al- right.

Mr. Smythe: Now, I am not exactly sure I remember the initials. Bradley is one, and Rutledge, and Frieler, and Prewett.

Mr. Brady: I will ask you whether or not the Railroad Commission of Louisiana has lately issued an order against the Kentwood, Greensburg & Southwestern Railway Company, compelling it to put in a side-track and transfer facilities so as to be able to handle the freight of its patrons expeditiously?

Mr. Smythe: Yes, Sir.

Mr. Brady: Have you complied with that order?

Mr. Smythe: We are complying just as rapidly as the men can get to work on it. We have a switch from the Illinois Central and our switch built, the only thing is the little duct between it; we will have it in service in a week.

Mr. Brady: Mr. Smythe, what is the character of the territory through which this road runs, with reference to being a farming community?

Mr. Smythe: There are a good many good farms in there,
3484 and the lands are good, and the people who are farming in there seem quite successful.

Mr. Brady: Has this road done anything toward the development of that territory ?

Mr. Smythe: No doubt.

Mr. Brady: What is the character of freight it carries?

Mr. Smythe: Merchandise, farm products and lumber.

Mr. Brady: Farm products?

Mr. Smythe: Cotton, cotton-seed, fertilizer and products produced in an agricultural community.

Mr. Brady: Do you know anything about the tonnage carried for the public over this road?

Mr. Smythe: No; only from our records.

Mr. Brady: Do you know when this road commenced to be extended westward?

Mr. Smythe: No, Sir; a good while ago.

Mr. Brady: Do you know when it was built through the town of Greensburg and to the town of Freiler?

Mr. Smythe: Only as I have been informed; in 1905.

Mr. Brady: That is the incorporation. I mean before that.

Mr. Smythe: Oh, no, Sir.

Mr. Brady: You don't know about that.

3485 Mr. Brady: I would like to state in this connection, that this road commenced to be constructed in 1850, and was con-

structed further westward as the timber was cut, until they built to the town of Freiler, through the town of Greensburg in 1904, I believe.

Mr. Brady: Do you know whether or not it has been adjudged by the Courts of Louisiana as a common carrier?

Mr. Smythe: It has.

Mr. Brady: Do you know whether or not it was exempted from taxation under the Constitution of 1898?

Mr. Smythe: No, Sir; I never heard that.

Examiner Burchmore: When did this railroad first begin to receive divisions on shipments of lumber.

Mr. Smythe: The records will show that.

Examiner Burchmore: What records?

Mr. Smythe: The books.

Examiner Burchmore: Well, can you ascertain and advise us?

Mr. Brady: I will introduce the records.

Examiner Burchmore: Where does this man Bradley get his logs?

Mr. Smythe: From about three-quarters of a mile to a mile.

Examiner Burchmore: Does he bring them by tram?

3486 Mr. Smythe: No, Sir.

Examiner Burchmore: By team.

Mr. Smythe: Ox teams, and so forth.

Examiner Burchmore: Is that done at a considerable expense to him?

Mr. Smythe: Well, that is entirely his business, you know.

Examiner Burchmore: Does Bradley get his logs from land owned by the Amos Kent Lumber & Brick Company?

Mr. Smythe: No, Sir.

Examiner Burchmore: The Amos Kent Brick and Lumber Company manufactures brick?

Mr. Smythe: Yes, they used to, but not very much of it now.

Examiner Burchmore: Well, does that brick move out in the same manner as lumber?

Mr. Smythe: Yes, Sir.

Examiner Burchmore: Are there joint through rates on brick?

Mr. Smythe: I think so.

Mr. Brady: Who is the superintendent of the Amos Kent Brick & Lumber Company?

3487 Mr. Smythe: Captain Reid.

Mr. Brady: Do you manage or control the affairs of that lumber company at all?

Mr. Smythe: None whatever.

O. L. Benway was called as a witness, and having been duly sworn, testified as follows:

Mr. Brady: I offer Mr. Benway for the purpose of allowing you, Mr. Examiner, to ascertain about the division of rates, and for the purpose of showing the compensation that the lumber company pays to the railroad company for service in hauling logs.

Examiner Burchmore: Are the rates and divisions, and the method

of billing on this road, similar to the methods and divisions on the New Orleans, Natalbany & Natchez?

Mr. Benway: They are.

Examiner Burchmore: It has the same refund arrangement with the Illinois Central?

Mr. Benway: Yes, Sir.

Examiner Burchmore: And the lumber is billed from Kentsmills?

Mr. Benway: Kentsmills, yes, Sir.

3488 Examiner Burchmore: Who issues the Bill of Lading?

Mr. Benway: The Illinois Central; the agent at Kentwood signs and issues the bills of lading.

Examiner Burchmore: And the billing on these movements is essentially the same as on the movements from Natalbany?

Mr. Benway: Essentially the same. But excuse me, the question just asked on bricks. There are no joint rates on brick. The K. G. & S. W. has nothing to do with the brick.

Examiner Burchmore: Never touches the brick?

Mr. Benway: No, Sir.

Examiner Burchmore: What division is accorded the Kentwood, Greensburg & Southwestern?

Mr. Benway: Two cents on lumber going into this Central Freight Association territory.

Examiner Burchmore: That is two cents in addition to the revenue they receive inbound?

Mr. Benway: Yes, Sir.

Examiner Burchmore: What are the rates from the points along the line on lumber; are they two cents higher than the rate from Kentsmills?

Mr. Benway: Yes, Sir; two cents higher than the rate

3489 from Kentsmills.

Examiner Burchmore: Then to form the rate on lumber from points along this road, an arbitrary of two cents is added.

Mr. Benway: Yes, Sir.

Examiner Burchmore: That two cents is retained by the K. G. & S. W.

Mr. Benway: Well, it comes back in the same way, settled by the Illinois Central, where lumber is billed out on through bill of lading.

Examiner Burchmore: The Kentwood, Greensburg & Southwestern receives from the Illinois Central a division of two cents out of the division rate. What service do they render for that division?

Mr. Benway: On the lumber shipped off of the K. G. & S. W. from other mills.

Examiner Burchmore: In the case of any lumber.

Mr. Benway: All lumber shipped off of our road, they get two cents in addition to this two cents extra division in this territory.

Examiner Burchmore: Making a total of four cents?

Mr. Benway: In this certain territory. Other territory

3490 they get only two cents. The other territory, excuse me, within the State, they get their legal rate less the State law ten per cent.

Examiner Burchmore: What is the legal rate?

Mr. Benway: Three cents.

Examiner Burchmore: What does the Amos Kent Brick & Lumber Company pay to this railroad to get its logs into its mill?

Mr. Benway: Three cents per hundred pounds.

Examiner Burchmore: So that the situation is the same as it is at Natalbany?

Mr. Benway: Practically the same.

Examiner Burchmore: In the case of a carload of lumber shipped by the Bradley people, what rate is applied?

Mr. Benway: If it is the legal rate, shipped to Kentsmills, three cents.

Examiner Burchmore: If it is shipped to Chicago?

Mr. Benway: The Illinois Central rate plus three cents.

Examiner Burchmore: And out of that your company gets four cents?

Mr. Benway: Yes, Sir.

Examiner Burchmore. What about the cost of transferring?

3491 Mr. Benway: Plus the transfer charge of fifty cents per thousand.

Examiner Burchmore: Does the tariff provide for this transfer charge?

Mr. Benway: It does, the Illinois Central tariff, in which we concur.

Examiner Burchmore: What does that amount to per hundred pounds. As a matter of fact, is that rate not published in your tariff as two cents per hundred pounds?

Mr. Benway: I think it is.

Examiner Burchmore: So that the Bradley people really pay——

Mr. Benway: Well, they pay the same as all other people; they pay this tariff rate, which on their bill of lading on the Illinois Central, is fifty cents per thousand feet.

Examiner Burchmore: That amounts to two cents per hundred pounds?

Mr. Benway: Practically two cents per hundred pounds.

Examiner Burchmore: A shipper who ships his lumber on your line has to pay twenty-six cents to Chicago, plus a two cent transfer charge?

Mr. Benway: That is right.

3492 Examiner Burchmore: The Amos Kent Brick and Lumber Company pays twenty-six cents plus a cent——

Mr. Benway: Three.

Examiner Burchmore: They pay three, but two cents of that is applied on the joint rate.

Mr. Benway: Yes, Sir.

Examiner Burchmore: Other shippers are penalized one cent.

Mr. Benway: No, Sir, they are charged practically the same for the services rendered; if they were located like the Amos Kent Lumber and Brick Company, they would be paying exactly the same.

Examiner Burchmore: Well, as a matter of fact, the service is

the same, is it not? I call your attention to the fact that the logs, as I understand it, are unloaded there at the mill pond by the railroad employees under that three cent rate.

Mr. Benway: Yes, Sir.

Examiner Burchmore: Well, isn't the unloading practically the same as a transfer?

Mr. Benway: No, the train is brought to the pond and the logs are dumped over very easily.

Examiner Burchmore: Has there been any complaint
3493 against this charge of two cents for transferring?

Mr. Benway: Not to my knowledge.

Mr. Brady: I will state that the question came up before the Railroad Commission of Louisiana, and the transfer charges fixed were conceded to be just.

Mr. Brady: Mr. Benway, the unloading of these logs, the railroad company makes a charge for that, does it not?

Mr. Benway: Not to the lumber company; it is included in the three cents.

Mr. Brady: In fixing that three cents, it was determined that twelve cents a car should be paid for unloading, was it not?

Mr. Benway: No, I don't think so.

Mr. Brady: You think that Mr. Smythe is in error when he says representing the railroad company he made that charge?

Mr. Benway: He said that in connection with the other railroad company.

Mr. Brady: That is not true in connection with this railroad?

Br. Benway: No, the train crew unloads these logs.

Mr. Brady: After the logs are unloaded, who is it that makes the transfer of the product of the Amos Kent Lumber
3494 & Brick Company to the cars of the Illinois Central?

Mr. Benway: The Amos Kent Brick & Lumber Company.

Mr. Brady: Who makes the transfer for Bradley?

Mr. Benway: The railroad does.

Mr. Brady: So there is service rendered Bradley that is different in character and expense from that rendered to the Amos Kent Lumber and Brick Company?

Mr. Benway: Entirely.

Mr. Brady: Which accounts for the difference in rate?

Mr. Benway: Yes, Sir.

Mr. Brady: I will ask you if it is the purpose, or has been the purposes of this railroad company to discriminate or furnish different rates.

Mr. Benway: It is the purpose to treat them all exactly the same, the Amos Kent Lumber and Brick Company as an outside party.

Mr. Brady: We want to introduce, in connection with Mr. Benway's testimony, this local tariff and the division sheet of this railroad company with the Illinois Central.

Examiner Burchmore: They may be received in evidence.

(The paper so offered and identified was received in evidence

and thereupon marked Kentwood, Greensburg & S. W. Rail-
3495 road Company Exhibit No. 2, Witness Benway, received in evidence December 13, 1910, and is attached hereto.)

Mr. Brady: We want to refer, in connection with Mr. Benway's testimony, to the annual report made by this railroad company to the Railroad Commission.

Mr. Benway: I will suggest in connection with that, that this tariff shows as a station Coles, which was originally built as a spur track.

Mr. Brady: This railroad, we have gotten in this sort of attitude out there. The lumber company built a spur-track from the main line of this road down through the piney woods, and the lumber company wanted to move it, and the railroad Commission of Louisiana would not let them move it, and it makes the railroad company keep that spur-track down there, the Railroad Commission requires that that station be shown. It is not the railroad company's property.

Examiner Burchmore: Does the Amos Kent Lumber and Brick Company have any commissaries and stores?

Mr. Benway: It has at Kent's Mill.

Examiner Burchmore: When was this lumber company's plant built?

Mr. Benway: It was originally built years ago.

3496 Examiner Burchmore: In 1850?

Mr. Benway: I imagine; but it has been renewed since then, and an entirely new mill built.

Examiner Burchmore: Was this road originally built to bring logs to the mill?

Mr. Benway: It was. I wasn't there at that time, but I understand that was the purpose.

Mr. Brady: I would like to introduce Mr. Thames.

T. R. THOMAS was called as a witness, and having been duly sworn, testified as follows:

Mr. Brady: Do you know whether or not this railroad company pays a privilege tax for doing business in Louisiana?

Mr. Thames: It pays an ad valorem tax.

Mr. Brady: Do you know whether or not it is exempt, as other railroads are?

Mr. Thames: Yes, sir.

Mr. Brady: Do you know whether it has been adjudged by the Courts of Louisiana a common carrier and entitled to such exemption?

Mr. Thames: Yes, Sir; there was a suit styled Tax Collec-
3497 tor against the K. G. & S. W. Railroad before the record shows that the charter was made.

Examiner Burchmore: Where is that case reported?

Mr. Brady: It is reported in one of the Louisiana Annuals. I don't remember the number of it. It was about 1904, before it was chartered, it was held to be a common carrier and entitled to this exemption from paying taxes. That is true, isn't it?

Mr. Thames: Yes, Sir; under the Constitution of 1898, railroads were exempted from taxation for ten years. This road had been carrying freight and acting as a common carrier without a charter, and the State attempted to collect taxes on it, and the question was adjudicated as to whether or not it was a common carrier, and it was held to be a common carrier notwithstanding it didn't have a charter.

Mr. Brady: Then came the incorporation.

M. M. CRUSE was called as a witness, and having been duly sworn, testified as follows:

Mr. Brady: I will ask you whether or not there has been an order by the president of the Kentwood, Greensburg & South-
3498 western Railroad Company, requesting you to ascertain the interest due from that company to the Amos Kent Lumber and Brick Company, and after it has been ascertained, to arrange for the payment of it?

Mr. Cruse: Yes, Sir.

Mr. Brady: You were sent, I believe, by the president of this company to do this particular auditing and determine the exact relations about this indebtedness and accrue the interest and see that it was properly ordered paid?

Mr. Cruse: I was.

Examiner Burchmore: At what rate?

Mr. Cruse: At five per cent for the years 1906 and 1907, and 1908 too, I think, and five and a half per cent for 1909 and 1910. I might add that it will be done. It has not been done, I find, but it will be done.

Mr. Brady: Mr. Cruse, this railroad company has a president and a vice-president, a traffic manager, a general manager and an auditor?

Mr. Cruse: Yes, Sir.

Mr. Brady: Do the president and vice-president render any service, or are they just nominal?

Mr. Cruse: Just nominal.

3499 Mr. Brady: They receive no salaries?

Mr. Cruse: No salaries whatever.

Examiner Burchmore: What annual passes are issued by this railroad?

Mr. Cruse: I couldn't give competent testimony about that, because I have nothing to do with the issuing of them.

Mr. Brady: My understanding is that there are two passes issued by this railroad, one to the president of the road and one to the claim agent, probably to the secretary and treasurer of the road.

Mr. Brady: I will ask whether either of those representatives of the road are out on the road selling lumber, or use these passes in the sale of lumber?

Mr. Cruse: None whatever.

Examiner Burchmore: These are passes from the Illinois Central?

Mr. Cruse: Yes, Sir.

Mr. Brady: You can state that these passes are not used by the officers of the lumber company in securing sales of lumber?

Mr. Cruse: They are not.

3500 Mr. Brady: I think that closes our case.

Examiner Burchmore: I think you have covered it sufficiently.

3501 *Fernwood & Gulf Railroad Company.*

Examiner Burchmore: The Fernwood & Gulf, I believe, should be taken up next.

Mr. Green: If your Honor please, in view of the difficulties of definition of the status of the parties to this hearing, we have prepared a statement, and also a deposition, or affidavit, of the material facts in respect to it and we would ask your Honor to refer *to* the parts of it that refer to our status in this hearing, to the Commission, and ask that it be filed. And in order to save time, I will ask that your Honor will allow us, through this witness, Mr. Enochs, who makes this affidavit, to read the statement in this affidavit, and to be further examined as it may suit the pleasure of the Court. It will save a great deal of time. You will find that the material facts are stated there, and it will save the stenographer the necessity of taking down the questions and answers, and furnish your Honor with the information in a substantial way. It is difficult, we have never seen the pleadings, we have never been made a party to the suit, and we don't know exactly where we are. I will ask your Honor to refer to the Commission for its action, the parts of that statement which refer to our status; the other parts as to the facts in

3502 the case, I will ask that we may be allowed to read in evidence.

Mr. Brady: I wish you would let this go in the record in the former case. I don't intend to be unfair to you, but I overlooked it. That same question was pleaded in the petition which we filed. We set up the fact in there that the rate is reasonable, and this division rate is a matter that concerns the two companies individually, and the question is res adjudicata as far as we are concerned. I would ask that you make that a part of the record.

Examiner Burchmore: This document may be placed on record for the information of the Commission and for such action as it may deem proper, and it will be understood that it is referred to as a part of Mr. Enochs' testimony in this case.

(The paper so offered and identified was received in evidence and thereupon marked Fernwood & Gulf Railroad Company, Exhibit No. 1, witness Enochs, received in evidence December 13, 1910, and *it* attached hereto.)

Mr. Green: Mr. Enochs, you have read this document and know the statements therein made to be true?

Mr. Enochs: I have made an affidavit to that.

3503 I. C. ENOCHS was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: I will ask questions, and I think I can be very brief. Mr. Enochs, the Fernwood & Gulf Railroad extends, through a connection with the Illinois Central at Fernwood, easterly through a number of stations, including Tylertown, as far as Kokomo, and a little beyond Kokomo?

Mr. Enochs: That is true.

Examiner Burchmore: Its accredited length of main line is thirty-three miles.

Mr. Enochs: Not exactly, approximately thirty-three miles, thirty-two and eighty-nine one-hundredths, I believe.

Examiner Burchmore: Is it standard gauge?

Mr. Enochs: Yes, Sir.

Examiner Burchmore: The Fernwood Lumber Company was organized in 1889.

Mr. Enochs: Yes, Sir.

Examiner Burchmore: Established its milling plant at Fernwood at that time.

Mr. Enochs: Yes, Sir. The milling plant was established there before the Fernwood Lumber Company was organized. I
3504 owned the mill. My brothers and I owned the mill prior to the incorporation of the Fernwood Lumber Company.

Examiner Burchmore: Mr. Green, will it not be satisfactory if instead of having this filed in the record, it be simply filed as an exhibit in connection with Mr. Enochs' testimony. I will not examine Mr. Enochs at length, but will assume that this statement is fair and complete.

Mr. Green: I think so, yes, Sir. Now, there are several exhibits to go with that.

Examiner Burchmore: Will you attach the exhibits that belong to this document?

Mr. Green: Yes, Sir.

Examiner Burchmore: I just wish to ask one or two questions. They may be covered by this statement, and they may not be. I understand that during the year 1909, this road was sold by the Fernwood Lumber Company to the Fernwood railroad corporation?

Mr. Enochs: Yes, Sir.

Examiner Burchmore: For one hundred and twenty-five thousand dollars, the mileage being twenty-one miles.

Mr. Enochs: Twenty-one miles, approximately, yes, Sir.

Examiner Burchmore: At that time a written agreement
3505 was entered into between the two corporations.

Mr. Enochs: That is true.

Examiner Burchmore: This agreement expressly reserved to the lumber company the trackage right to operate logging trains over that road during the life,—or perpetually?

Mr. Green: During the term that the Fernwood Lumber Company is engaged in business in Marion County, Mississippi.

Examiner Burchmore: The lumber company expressly reserved free trackage rights over this road?

Mr. Enochs: That is true.

Examiner Burchmore: And over any extension that may later be built by the Fernwood & Gulf Railroad Company?

Mr. Enochs: Yes, Sir. That is to say, the contract speaks for itself, and your Examiner had a copy of that when he was at our place.

Examiner Burchmore: The officers and employés of the lumber company's mills are transported free of charge over the railroad?

Mr. Enochs: The officers.

Examiner Burchmore: And employés.

Mr. Enochs: The employés are not transported free of charge over the railroad; the contract allows the employés of the
3506 lumber company to be transported on the log trains but not on the trains of the railroad company. That is my recollection of it, but, of course, it speaks for itself.

Examiner Burchmore: Well, that agreement is attached to your statement?

Mr. Green: We refer to it as being on file with the Commission. We gave it to Mr. Mason.

Examiner Burchmore: That was Mr. Hanson, I believe.

Mr. Green: Mr. Mason, we call it Mason there.

Examiner Burchmore: Mr. Enochs, will you have furnished for the Commission, a statement of your tonnage for the fiscal year ending June 30, 1910, such statement to show the total amount of lumber handled on account of the Fernwood Lumber Company, and the total amount of logs handled for them in tons; also the total amount of various supplies and merchandise that you have been transporting for the lumber company, or on its account, and the traffic for the general public in lumber and products of various kinds?

Mr. Enochs: Yes, Sir.

Examiner Burchmore: You make reports to the Commission?

Mr. Enochs: My report is on file, and it shows,—it is a tonnage statement.

3507 Examiner Burchmore: Of various commodities?

Mr. Enochs: Various commodities other than the tonnage which originated out of the lumber at Fernwood. It was an oversight that that was not added to it. I can make from my records a tonnage statement of the lumber manufactured at Fernwood and moved from there by railroad. That is what you desire?

Examiner Burchmore: I will state what I desire. A statement of the tonnage transported by the railroad for the account of the Fernwood Lumber Company; also of logs for the account of the Fernwood Lumber Company; and of commodities transported for the account of all other lumber companies, or shippers. The statement also to show the tonnage of farm products and all merchandise and other character of freight handled for the general public, and handled for the interests that control this road. The figures should be given in tons and also in revenues.

Mr. Green: We will furnish such statement.

Examiner Burchmore: Another thing. Will you furnish a map of the road. It may be a reference map, but should be drawn to scale, and show the location of the mill and the junction points, and the whole lay of the land?

3508 Mr. Green: We have a map, but it is on a larger scale than your Honor will require. We will have it reduced.

Mr. Green: These are the station houses. We want to offer them in evidence to show the character of station houses we have.

Examiner Burchmore: They may be received in evidence.

(The photographs so offered and identified were received in evidence and thereupon marked Fernwood & Gulf Railroad Company, Exhibits Nos. 2, 3 and 4, Witness Enochs, received in evidence December 13, 1910, and are attached hereto.)

Mr. Green: In connection with this statement, we have the privilege tax assessment of the Railroad Commission of the State of Mississippi, assessing this railroad for a privilege tax, as a railroad, in order that it may classify for classification to pay a privilege tax for a railroad business.

Examiner Burchmore: You say, Mr. Green, that this railroad was taxed on a special basis, as a railroad corporation, and is not taxed either as other corporations or persons are taxed?

3509 Mr. Green: No, Sir; this road is assessed under the Constitution and laws of Mississippi, as a railroad, by the Mississippi State Railroad Commission, for ad valorem taxes; it is also assessed for a privilege tax, which requires that the State Railroad Commission shall classify the several railroads of the State according to their revenues, and imposing a tax of so many dollars per mile of line operated, and the assessment that we show you is the classification and mileage of the Fernwood & Gulf Railroad by the Mississippi Railroad Commission, whereby they classify it as third class and for twenty-one miles, and assess it at ten dollars per mile privilege tax.

Examiner Burchmore: You need not offer in evidence the documents mentioned, the statement will suffice, if you will explain what a third-class railroad is.

Mr. Green: The Railroad Commission assesses them as first, second, third, and narrow gauge tax; it classifies them for privilege tax.

Examiner Burchmore: What is a first class railroad?

Mr. Green: It is classified relatively to its revenues, gross earnings.

Examiner Burchmore: The classification has no relation to the status of the road as a common carrier?

3510 Mr. Green: No, Sir; all railroads in the State of Mississippi are common carriers under the Constitution and under the laws.

Examiner Burchmore: In what class, if any, would the private logging road belonging to a lumber company be classed?

Mr. Green: It would be placed within no class; it would not come within the jurisdiction of the State Railroad Commission to assess these roads. A logging road would not be held responsible as a common carrier in our State. We show also the privilege tax receipts paid on this railroad as a common carrier in the railroad business. I would also state, your Honor, that the assessments of railroad property are made by the State Railroad Commission, as contra-distinguished from assessments made by lumber or logging roads, by the County Assessor.

Examiner Burchmore: The record will show your statement to that effect.

Mr. Green: Now, if your Honor please, in connection with this statement of Mr. Enochs, I have the orders of the Mississippi Railroad Commission referred to in that statement.

3511 Examiner Burchmore: These are orders directed to the Fernwood & Gulf Railroad Company as a common carrier?

Mr. Green: By the Railroad Commission of Mississippi. It has powers to supervise common carriers. Unless your Honor wishes to encumber the record with them——

Examiner Burchmore: We don't care for them; it is sufficient to exhibit them.

Mr. Green: We also wish to exhibit with this statement of Mr. Enochs, the time-table of the Fernwood & Gulf.

Examiner Burchmore: That may be received.

Mr. Green: That is attached to the statement.

Mr. Green: We have referred in this statement to the several tariffs in which the Fernwood & Gulf has joined with other common carriers, giving the I. C. C. numbers in the statement, and, of course, your Honor does not wish these to be more than referred to. As a part of the statement of Mr. Enochs, we have filed the official list of the officers and agents and stations of the Fernwood and Gulf Railroad Company, showing the list of stations and mileage, the agents and the stations at which there are agents, the stations and the character of enterprises that are at the several stations.

3512 Examiner Burchmore: It may be marked and received.

Mr. Green: And, in that connection, we wish to call the attention of your Honor to the number and character of the industrial enterprises that are along this line of railroad.

Examiner Burchmore: That is set forth inn the statement?

Mr. Green: This official list is merely an exhibit to that statement, and referred to in it. With that statement is also filed the division sheet with the Illinois Central of the Fernwood & Gulf, and the division sheets of the New Orleans & Great Northern which connects at Fernwood with the Illinois Central, and at Tylertown with the New Orleans & Great Northern. And these are made exhibits to that statement.

Examiner Burchmore: The Fernwood & Gulf connects with the Illinois at Fernwood, and with the New Orleans and Great Northern at Tylertown.

Mr. Green: Yes, Sir. We will also furnish to your Honor a plat of the switches at Tylertown.

Examiner Burchmore: Just one or two questions: Where is your mill located with respect to the junction point?

Mr. Enochs: It is located at Fernwood.

3513 Examiner Burchmore: How far from the right of way of the Illinois Central?

Mr. Enochs: It is situated in the bend here (indicating).

Examiner Burchmore: A few hundred feet?

Mr. Enochs: Of course, the mill is located at an agle from the station, and if you run from the switch head it is about twenty-six hundred feet; if you run at right angles it is fifteen hundred feet.

Examiner Burchmore: The Fernwood Lumber Company owns certain private logging tracks connecting with this railroad?

Mr. Enochs: How is that?

Examiner Burchmore: The Fernwood Lumber Company owns certain private logging tracks connecting with this railroad?

Mr. Enochs: Up in the woods, they do.

Examiner Burchmore: Does your statement refer to those tracks at all?

Mr. Enochs: I don't think it does.

Examiner Burchmore: Well, are those private tracks operated by the railroad company?

Mr. Enochs: No, Sir.

Examiner Burchmore: The lumber company has engines that operate over those tracks?

3514 Mr. Enochs: Yes, Sir.

Examiner Burchmore: Does the statement refer to that fact?

Mr. Enochs: No, Sir; not as logging tracks we operated, because we took it that we were called only as to the operation of the railroad.

Examiner Burchmore: Did you know, Mr. Enochs, that the majority of tap roads east of the Mississippi River do not receive allowances or divisions?

Mr. Enochs: The majority of tap roads?

Examiner Burchmore: Do not receive divisions or allowances.

Mr. Enochs: Do you mean that the majority of lumber companies which haul logs by rail do not?

Examiner Burchmore: Yes, Sir.

Mr. Enochs: I do.

Examiner Burchmore: How does your road differ from the general run of tap roads east of the Mississippi River?

Mr. Enochs: Because my road performs in good faith transportation services for the public.

Examiner Burchmore: Does it perform any transportation service in connection with your own lumber?

3515 Mr. Enochs: The Fernwood & Gulf Railroad own the physical property throughout the length of this road; the logging trains run in over the Fernwood & Gulf rails, from the woods to the mill.

Examiner Burchmore: Were you present this morning when the

testimony was taken in the case of the New Orleans Natalbany & Natchez Company?

Mr. Enochs: I was.

Examiner Burchmore: Is your method about the same as theirs?

Mr. Enochs: No, Sir; quite different.

Mr. Green: Your Honor, before passing from that, I would like to call your attention to the letter in that regard, which is the commencement of the giving of divisions to the lumber railroads.

Examiner Burchmore: The letter referred to is on page 415 of Volume 1 of the Transcript of Record in Illinois Central Railroad Company vs. Interstate Commerce Commission, before the Supreme Court of the United States, at the October Term 1906, calendar No. 588.

Mr. Green: That is the commencement of the giving of divisions on the Illinois Central, and you will see the principle upon which the Illinois Central proceeded.

3516 Examiner Burchmore: Is there any other statement you wish to make, Mr. Enochs?

Mr. Enochs: No; we are here to give you such information as you desire.

Examiner Burchmore: Well, just this one question, or this one line of questions. The lumber company hauls its own logs into the mill?

Mr. Enochs: It does.

Examiner Burchmore: All the way?

Mr. Enochs: Yes, Sir.

Examiner Burchmore: And the railroad company does not touch the logs coming in?

Mr. Enochs: No, Sir.

Examiner Burchmore: Then after the logs have been milled, they are loaded on cars at the mill by the mill employés?

Mr. Enochs: Yes, Sir.

Examiner Burchmore: Who furnishes these cars?

Mr. Enochs: The Ilinois Central furnishes them in one instance, and the Fernwood & Gulf furnishes them in the other instance. The Fernwood & Gulf furnishes them when they are hauled for connection at Tylertown.

Examiner Burchmore: Take the Illinois Central case.

3517 Mr. Enochs: They furnish the cars.

Examiner Burchmore: The Illinois Central furnishes the cars, but the Fernwood & Gulf Locomotive places the cars at the Mill?

Mr. Enochs: The map which we will file will show the Illinois Central tracks and the Fernwood & Gulf tracks.

Examiner Burchmore: Who puts the empty cars at the mill?

Mr. Enochs: Sometimes the Illinois Central switching crew and sometimes the Fernwood & Gulf switching crew does it and they are sometimes switched by the Fernwood Lumber Company.

Examiner Burchmore: When the car is loaded, who takes it away from the mill to the Illinois Central?

Mr. Enochs: The same inter-change or switching is pursued with respect to loaded cars as with cars yet to be loaded.

Examiner Burchmore: Sometimes the Illinois Central does it with its crew and sometimes the Fernwood & Gulf Railroad Company does it with its crew.

Mr. Enochs: Yes sir.

Examiner Burchmore: In all cases however the Illinois Central grants division of the rate?

Mr. Enochs: No, not in all cases. The Illinois Central
3518 grants a division of rate only to empties.

Examiner Burchmore: I mean, irrespective of which engine gets the cars?

Mr. Enochs: If the Illinois Central gets the haul, why it gets the rate.

Examiner Burchmore: It gets the division if the car moves out of the Illinois Central?

Mr. Enochs: Yes sir.

Examiner Burchmore: In the case of New Orleans and Great Northern shipments?

Mr. Enochs: The Fernwood & Gulf hauls the car back to Tylertown.

Examiner Burchmore: What proportion of your lumber goes out over the Illinois Central, if any?

Mr. Enochs: That varies. At this time, about 75% of our lumber is going out over the Illinois Central. At one time last year about 75% went out over the New Orleans and Great Northern. As a matter of fact, most of our stuff was going out over the New Orleans and Great Northern, until they had a stock at Meridian over the New Orleans and Northeastern, and it demoralized things and got congestive.

3519 Examiner Burchmore: Does this statement indicate the proportion of your tonnage that goes each way from the mill?

Mr. Enochs: No, it does not figure it by proportion. We make a statement here showing how much tonnage—how many cars of lumber—moves over the Fernwood & Gulf Railroad.

Examiner Burchmore: Mr. Enochs, will you furnish us also with a statement of the total number car loads of lumber that moved out last year over the Illinois Central, and that which moved out last year over the New Orleans and Great Northern. We would also like to have it show which one of them gave a division and which one does not.

Mr. Enochs: All right.

Examiner Burchmore: I think there is nothing further unless you have some questions you wish to ask, Mr. Green?

Mr. Green: I want to call your Honor's particular attention to the basis of the division with the Illinois Central and with this Company as shown by exhibit "1" to the Fernwood and Gulf statement. On lumber shipped from Fernwood, Mississippi, manufactured at that point from logs brought in from stations on the Fernwood & Gulf Railroad, the Gulf and Fernwood Railroad will
3520 be allowed two cents per hundred pounds through the freight claim department. I would like to ask you about the size of the towns?

1427

Examiner Burchmore: Does your statement indicate that?
Mr. Green: No, not the population of the town.
Mr. Enochs: What is it you want?
Mr. Green: Mr. Enochs, what is the population——
Examiner Burchmore: Can't you file the population of each town and industries—show the size of the town and population and industries?
Mr. Green: And the extent of service performed for each?
Examiner Burchmore: Yes, and if you think any other statement should be filed to fully set forth the case, you may have that permission, but I suggest that you don't cumber the record.
Mr. Green: I would suggest, your Honor, that if there is any other information, which in the course of inquiry, occurs to your Honor, we would gladly furnish it.
Mr. Enochs: How soon would you desire this?
Examiner Burchmore: As soon as it could be prepared.

3521 *Kentwood and Eastern Railway Company.*

(Appearances: Robert R. Reed, Esq. Attorney for the Kentwood and Eastern Railway Company.)

Examiner Burchmore: Have you filled out a print slip—appearance slip—Mr. Reed?
Mr. Reed: No.
Examiner Burchmore: Please do so.

MR. GEORGE A. KEYES, was called as a witness, and having been first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: What is your name and occupation, Mr. Keyes?
Mr. Keyes: George A. Keyes, General Manager of the Kentwood and Eastern Railway Company.
Examiner Burchmore: Are you an officer of any lumber company?
Mr. Keyes: No, sir.
Examiner Burchmore: The Kentwood and Eastern Railway Company connects with the Illinois Central at Kentwood, La.
Mr. Keyes: Yes sir.
Examiner Burchmore: And with the New Orleans and
3522 Great Northern at Warnertown?
Mr. Keyes: Yes, Warnerton,—W-a-r-n-e-r-t-o-n.
Examiner Burchmore: Warnerton?
Mr. Keyes: Yes, sir.
Examiner Burchmore: What is the length of its line approximately?
Mr. Keyes: Our Hackley line is 30.2 miles in length from Kentwood.
Examiner Burchmore: Is that broad or narrow gauge?

Mr. Keyes: Narrow gauge.

Examiner Burchmore: And your other line?

Mr. Keyes: Our other line is 25.18 miles in length.

Examiner Burchmore: Then you have two lines out of Bolivar Junction?

Mr. Keyes: Yes, sir. We have a three rail line from Kentwood to Bolivar Junction, a distance of 3.34 miles.

Examiner Burchmore: The third rail line? Only one train can pass over it at once?

Mr. Keyes: Yes, sir.

Examiner Burchmore: It is a narrow and standard gauge line combined.

3523 Mr. Keyes: Yes sir.

Examiner Burchmore: Then from Bolivar Junction, the line runs out east?

Mr. Keyes: Out east to Hackley.

Examiner Burchmore: And that is the line which is thirty miles in length?

Mr. Keyes: Yes sir.

Examiner Burchmore: From Bolivar Junction *and* other line run southeast through Wilmer to Foley, Louisiana?

Mr. Keyes: Yes sir.

Examiner Burchmore: A distance of about 20 miles?

Mr. Keyes: It is 25 miles from Kentwood.

Examiner Burchmore: Are there any private tram lines?—Any private tram lines connecting with those roads?

Mr. Keyes: Well, there is what you might call a tap line from Brookdale on the Hackley line. Brookdale is a point a little west of Warnerton.

Examiner Burchmore: Running southward?

Mr. Keyes: That runs in a northerly direction.

Examiner Burchmore: How far?

Mr. Keyes: I think in the neighborhood of four or five miles of track. It runs to a saw mill located about a little over a half a mile north of our line and the rest of their trackage is a logging one.

3524 Examiner Burchmore: Who was tram line built by—who does it belong to?

Mr. Keyes: A concern known as the Bassfield Lbr. Co.

Examiner Burchmore: Before we pursue this line of inquiry further, I understand that the Kentwood and Eastern Railway Company is controlled through its ownership *or* stock by the stockholders of the Brooks Scanlan Company.

Mr. Keyes: Yes sir.

Examiner Burchmore: Are the stockholders of the two companies substantially identical?

Mr. Keyes: Practically so. There are a few stockholders in the lumber company who are not in the railroad company but all the stockholders in the railroad company are stockholders in the lumber company.

Examiner Burchmore: This company that owns a private tram line that you have just referred to, what is its name?

Mr. Keyes: The Bassfield Lumber Company.

Examiner Burchmore: Is the Bassfield Lumber Company related in any way to the Brooks Scanlan?

Mr. Keyes: In no way whatever.

Examiner Burchmore: Where do they get their timber?

Mr. Keyes: They have quite a large tract of timber north
3525 of our railroad.

Examiner Burchmore: Is there any other tram line connected with this road?

Mr. Keyes: No tram lines. There are what you might call logging spurs—possibly what you might call a tram line.

Examiner Burchmore: Connecting——

Mr. Keyes: Belonging to the Brooks Scanlan Lumber Company. There is one logging concern that owns logging spurs on which the Brooks Scanlan Company have no interest except that this Company is logging for the Brooks Scanlan Company. They advance them their money. I don't know just how much trackage they have. They have one locomotive and a number of cars.

Examiner Burchmore: The Brooks Scanlan Company?

Mr. Keyes: No, this logging outfit I have spoken of.

Examiner Burchmore: Where is the mill located?

Mr. Keyes: At Foley.

Examiner Burchmore: That is at the end of your southern line?

Mr. Keyes: Yes, sir.

Examiner Burchmore: Where are the mills of the Brooks Scanlan Company located?

3526 Mr. Keyes: At Kentwood.

Examiner Burchmore: Right on the tracks of the Illinois Central?

Mr. Keyes: Practically so—the Illinois Central sidetracks. They run into them. One of them is on the right of way, I believe, of the Illinois Central, and the other may be four hundred feet distant.

Examiner Burchmore: How many locomotives has the Kentwood and Eastern?

Mr. Keyes: They own nine.

Examiner Burchmore: Part narrow gauge and part standard gauge?

Mr. Keyes: Yes, sir. Five narrow and four standard.

Examiner Burchmore: How many cars does it own?

Mr. Keyes: They own 6 passenger cars, 48 box cars, 182 flat cars, two coal cars, 52 logging cars, nine work cars and four cabooses.

Examiner Burchmore: Part of those cars in each class are narrow gauge and part standard gauge?

Mr. Keyes: All the cars—of these cars—152 are narrow gauge and 51 standard; of the locomotives, five are narrow and four standard gauge.

3527 Examiner Burchmore: What weight of rail is used on the line?

Mr. Keyes: In the Hackley line, it is practically 35 and 40. There is a little 30 pound rail. On our Bolivar line it is all 56 pound rail.

Examiner Burchmore: Your standard gauge line is a lighter rail?

Mr. Keyes: No, sir, the Bolivar line running to the south is a standard gauge.

Examiner Burchmore: Are you contemplating changing the other line to standard gauge—your southern line?

Mr. Keyes: The Southern line is now standard; the eastern is narrow.

Examiner Burchmore: Are you contemplating a change in that?

Mr. Keyes: Not seriously.

Examiner Burchmore: How is the road constructed?

Mr. Keyes: Substantially and with easy grades and long curves. Our standard gauge line is fairly easy grades, the maximum I believe is 1.4 against the loads and a little heavier against the empties. The narrow gauge line for a distance follows the general lines of
3528 country, but from Mount Herman east, there was considerable grading done and a great many bridges built.

Examiner Burchmore: What sort of country does it run through?

Mr. Keyes: It is a pretty rough rolling country.

Examiner Burchmore: Any farms?

Mr. Keyes: A great many; pretty well developed.

Examiner Burchmore: Any box factories on the line?

Mr. Keyes: No box factories, no sir.

Examiner Burchmore: Do those farmers make staves and such stuff?

Mr. Keyes: Not for shipment, no, sir.

Examiner Burchmore: What sort of lumber do you make on the line there—do you get there?

Mr. Keyes: Why, we get a great deal of hewn timber and some cross ties and then we have a number of mills—small mills—on the two lines.

Examiner Burchmore: Pony mills?

Mr. Keyes: Well, I don't know that you would call them Pony mills; all the way from fifteen to forty thousand feet daily capacity.

3529 Examiner Burchmore: Have you any other industries along the line?

Mr. Keyes: There are saw mills. We have in all 32 saw mills.

Examiner Burchmore: How many controlled by Brooks Scanlan?

Mr. Keyes: Two owned by them and one saws for them.

Examiner Burchmore: Where is that?

Mr. Keyes: At Foley.

Examiner Burchmore: That is the mill you referred to a moment ago?

Mr. Keyes: Yes, and in addition to the mill, we have those turpentine stills; four of which are controlled by or operated by the Brooks Scanlan Company.

Examiner Burchmore: Are the other two—do the other two have the turpentine privilege farmed out by Brooks Scalan?

Mr. Keyes: No, sir.

Examiner Burchmore: They do not get the turpentine from the Brooks Scanlan Lumber Company woods?

Mr. Keyes: No.

Examiner Burchmore: Continue.

3530 Mr. Keyes: We have also seventeen cotton gins located along the two lines.

Examiner Burchmore: The Brooks Scanlan Lumber Company has no relation to these cotton gins?

Mr. Keyes: None whatever.

Examiner Burchmore: And these are all the industries?

Mr. Keyes: We serve a large farming section. In 1909 we handled 5,636 bales of cotton.

Examiner Burchmore: Was that an extraordinary number for your road?

Mr. Keyes: No, sir, the amount has been growing less in the last two or three years.

Examiner Burchmore: It has been growing less?

Mr. Keyes: Yes, sir.

Mr. Reed: That is on account of the boll weevil?

Mr. Keyes: The first is due to the entrance of the New Orleans and Great Northern in our recent territory, and in 1910, we handled but 4,572 bales and that was due to the boll weevil, and this year the crop is even better.

Examiner Burchmore: When was this road constructed?

Mr. Keyes: The Hackley line—the last of it was con-

3531 structed in 1904; it was before we took possession of it.

Examiner Burchmore: When was the construction begun?

Mr. Reed: I expect I will have to help him.

Mr. Keyes: It is a good many years ago.

Mr. Reed: It was begun by the Banner Lumber Company probably in 1896 or 1897.

Examiner Burchmore: 1896 or 1897?

Mr. Reed: Yes, sir.

Examiner Burchmore: Their mill was constructed at the same time?

Mr. Reed: The Banner Lumber Company mill was. The Brooks Scanlan Company bought from them in 1905, the first day of November.

Examiner Burchmore: When was this railroad incorporated?

Mr. Keyes: December 5, 1905.

Examiner Burchmore: After you bought it?

Mr. Keyes: Yes, sir.

Examiner Burchmore: The Brooks Scanlan Co. then purchased this mill and the railroad all at one investment?

Mr. Keyes: Yes, sir.

Examiner Burchmore: At a lump price?

3532 Mr. Reed: I don't think Mr. Keyes knows that.

Mr. Keyes: As far as I know.

Mr. Reed: They bought quite a quantity of timber lands on the timber estimate of $2.40 a thousand and bought the mill at an estimate of some $50,000.00 and the railroad at $112,000.00. That is my recollection. I prepared the deeds and represented them.

Examiner Burchmore: That included both lines of the Railroad?

Mr. Reed: No, sir.

Examiner Burchmore: When was the other line of railroad constructed?

Mr. Keyes: The construction work was started in 1906.

Examiner Burchmore: After the incorporation of the railroad?

Mr. Keyes: Yes, sir.

Examiner Burchmore: The mills on that line were opened subsequently?

Mr. Keyes: Yes, sir.

Examiner Burchmore: I presume, practically, simultaneously with the completion of the road?

3533 Mr. Keyes: The small mills?

Examiner Burchmore: Yes, the mills in which you are interested.

Mr. Keyes: The Brooks Scanlan mill?

Examiner Burchmore: Yes.

Mr. Keyes: They had already one mill which they purchased at the same time.

Examiner Burchmore: I am thinking of the mill at Foley.

Mr. Keyes: That mill began operations in May, I think, of this year; that is recently constructed.

Examiner Burchmore: How was the railroad corporation originally financed?

Mr. Keyes: It has been financed by the Brooks Scanlan Company. It has a capital stock of $100,000.00.

Examiner Burchmore: How much of that is issued?

Mr. Keyes: All of it.

Examiner Burchmore: And paid in?

Mr. Keyes: Yes, sir.

Examiner Burchmore: Was that paid in by the stockholders of the Brooks Scanlan as such?

3534 Mr. Keyes: Not as stockholders of the Brooks Scanlan Company, no, sir.

Examiner Burchmore: The same interests control it?

Mr. Keyes: Yes, sir.

Examiner Burchmore: Whom, the Brooks Scanlan Company—any other syndicate?

Mr. Keyes: No, sir.

Examiner Burchmore: Is there any relation between your Company and any other lumber Company?

Mr. Keyes: They have other interests in other parts of the country.

Examiner Burchmore: But not in around that part of the country?

Mr. Keyes: No, sir.

Examiner Burchmore: Who furnished the steel rail out of which this new line was constructed?

Mr. Keyes: All bought of the Carnegie Steel Company.

Examiner Burchmore: Are there any bonds of this Company?

Mr. Keyes: No, sir.

Examiner Burchmore: Has it any indebtedness aside from current liabilities?

Mr. Keyes: Only such amounts as we owe to the Brooks Scanlan Company.

3535 Examiner Burchmore: What does that amount to in round figures?

Mr. Keyes: I think at the present time, something like $220,000.00.

Examiner Burchmore: You owe the Brooks Scanlan Company $220,000.00. Do you pay interest on that indebtedness?

Mr. Keyes: Yes, sir.

Examiner Burchmore: At 6%?

Mr. Keyes: We have paid it as high as 7%, it depends on the market.

Examiner Burchmore: You pay the market rate?

Mr. Keyes: Well, we pay—I don't know just how they arrive at their interest rate but I know that when money is scarce, we have to pay a higher rate of interest.

Examiner Burchmore: You do not govern the rate of interest by the earnings of the road?

Mr. Keyes: No, sir.

Examiner Burchmore: Has the road paid any dividends?

Mr. Keyes: No, sir.

Examiner Burchmore: Has it a surplus?

Mr. Keyes: It has no surplus cash. It has a surplus account—a Profit and Loss Account—but the funds have all been used

3536 in additions and betterments and paying off the indebtedness.

Examiner Burchmore: What was the original cost—the cost of the road as far as you are concerned?

Mr. Keyes: The road and equipment has cost us $491,651.74 up to June 3,—the last fiscal year.

Examiner Burchmore: What is this surplus you have referred to in amount?

Mr. Keyes: May I look at the report?

Examiner Burchmore: Certainly.

Mr. Keyes: $127,936.04 on June 30, 1910.

Examiner Burchmore: Is that a cash surplus or book surplus?

Mr. Keyes: It is a book surplus.

Examiner Burchmore: And where is it in money?

Mr. Keyes: It has been used in additions and betterments, and, to some extent, in reducing our indebtedness. No dividends have been declared.

Examiner Burchmore: I know very little about accounting, and don't know what it all means, but I assume that our accountant will. It is all shown in your annual report, at any rate?

3537 Mr. Keyes: Yes, sir.

Examiner Burchmore: Who is the creditor of the Kentwood and Eastwood Railroad Company?

Mr. Keyes: E. F. Brooks of Minneapolis.

Examiner Burchmore: Is he the President of the Brooks Scanlan Company?

Mr. Keyes: He is Vice-President of that Company.

Examiner Burchmore: Are the other officers of the railroad Company also officers of the lumber company?

Mr. Keyes: The President, Vice-President, and Secretary and Treasurer are—they hold offices in both companies.

Examiner Burchmore: You are not an officer of the Lumber Company?

Mr. Keyes: No, sir.

Examiner Burchmore: Your entire compensation is paid by the railroad company?

Mr. Keyes: All of it.

Examiner Burchmore: And your entire time devoted to its service?

Mr. Keyes: Entirely.

Examiner Burchmore: What other officers of the railroad company are paid for their services?

3538 Mr. Keyes: The President, Vice-President and——

Examiner Burchmore: State their salaries, if you will?

Mr. Keyes: The salary of the President and Vice-President—I will have to explain that—it is $7500.00 a year each?

Examiner Burchmore: From the Railroad Company?

Mr. Keyes: No, I will explain that later. The salary of the Secretary is $5,000.00 making a total of $20,000.00. This is divided between the Brooks Scanlan Company and the Railroad Company in the proportion of the capital stock or practically so.

Examiner Burchmore: What is the proportion of the capital stock?

Mr. Keyes: It is about one to fifteen. In other words, we pay about $1200.00 a year—that proportion of the salary of those officers.

Examiner Burchmore: In your opinion, is that a reasonable division?

Mr. Keyes: I think so.

Examiner Burchmore: Of salaries?

Mr. Keyes: I think so.

Examiner Burchmore: Do the directors receive a $20.00 gold piece for attending Directors' meetings?

3539 Mr. Keyes: Not that I know of.

Examiner Burchmore: That is the custom with the larger railroad lines, I understand. I understand that aside from any legal question, that the tap line corporations and the lumber corporations are substantially identical in interest through stock ownership?

Mr. Keyes: Both are controlled by the same interest.

Examiner Burchmore: How many men are there in the general offices of the railroad?

Mr. Keyes: In the general offices?

Examiner Burchmore: Yes?

Mr. Keyes: Myself—there are four.

Examiner Burchmore: Who receive their entire compensation from the railroad Company?

Mr. Keyes: Yes sir.

Examiner Burchmore: Do they devote their entire time to the Railroad Company?

Mr. Keyes: Yes, sir.

Examiner Burchmore: What stations do you have—what stations has the Company—I mean, stations that are designated with names?

Mr. Keyes: Well, we have many of them.

3540 Examiner Burchmore: Which of those stations have station buildings and which ones have agents?

Mr. Keyes: Well, we have a number of stations where we have no agent, but where we have passenger pagodas. Our first station building outside of Kentwood is at Mount Herman. That is a point with about 100 inhabitants, and we have an agent there. Do you want me to explain the industries at this place.

Examiner Burchmore: Yes.

Mr. Keyes: At that point, there is one bank, one saw mill, and one gin and four merchants. At Brockdale, a place of one hundred inhabitants, there is one saw mill, two gins and four merchants. At Warnerton, 175 inhabitants, one mill one gin and four merchants. At Hackley, about 400 inhabitants, four mills, six gins, 15 merchants and two stills. These points have all agents.

Examiner Burchmore: Do the agents at those points devote their entire time to the Railroad Company's service?

Mr. Keyes: Yes sir.

Examiner Burchmore: They are not storekeepers who work for the Railroad too?

Mr. Keyes: No sir, purely railroad employees. Then we

3541 have a large number of other stations where there are saw mills located where there are really a few people.

Examiner Burchmore: Well, review them very briefly.

Mr. Keyes: Well, I might say that at these other stations, at Hackley, which I mentioned, we have three banks.

Examiner Burchmore: Yes?

Mr. Keyes: And also Mount Herman. There are 22 mills there small mills—located on the two lines, in addition to those I have just enumerated, in which the Brooks Scanlan Company has no interest whatever. In addition to that, there is one mill that is sawing for Brooks Scanlan, and two that are owned by Brooks Scanlan Company.

Examiner Burchmore: Do these mills obtain their lumber from land owned by Brooks Scanlan Company?

Mr. Keyes: No sir.

Examiner Burchmore: Is there any further statement you wish to make as to industries and towns on your line? Does that complete the statement?

Mr. Keyes: Well, I think I have mentioned that at Kentwood—Kentwood is a town of over four thousand people—and we have an

agent and have large shops—quite a large transfer force—

3542 station force. We have about 800 to 1000 feet of platform for transferring lumber and a steam derrick used for that purpose and a freight hoist one hundred and fifty feet in length. And

there are about a hundred and twenty five or thirty merchants, I guess in Kentwood.

Examiner Burchmore: I thought Kentwood is on the Illinois Central.

Mr. Keyes: Yes, but we have joint rates with New Orleans and Kentwood, and also do business——

Examiner Burchmore: You enable the N. O. & G. N. to go into Kentwood?

Mr. Keyes: Yes sir.

Examiner Burchmore: Has that resulted in any reduction in rates to Kentwood merchants?

Mr. Keyes: No sir we publish the same rates.

Examiner Burchmore: They get better service?

Mr. Keyes: Yes sir.

Examiner Burchmore: Has the Brooks Scanlan Company any engines or cars of its own?

Mr. Keyes: Yes sir.

Examiner Burchmore: What use is made of those locomotives?

Mr. Keyes: They use them on their logging spurs.

3543 Examiner Burchmore: But they don't move over your line?

Mr. Keyes: Except from their headquarters Camp to their different logging spurs.

Examiner Burchmore: They have trackage rights have they?

Mr. Keyes: There is no agreement but we allow them to use our tracks in reaching their own logging spurs.

Examiner Burchmore: Without charge?

Mr. Keyes: Without charge.

Examiner Burchmore: Do the track or road employees of the railroad Company perform any services on behalf of the Brooks Scanlan Lumber Company?

Mr. Keyes: No sir; with one exception: on the narrow gauge line, the Lumber Company has a spur out about 12 miles from Kentwood—a logging spur which they have constructed and which they maintain. We do run our engines in on that track for logs, and for doing so we receive additional revenue.

Examiner Burchmore: What is that revenue?

Mr. Keyes: It is an additional revenue of $1.00 per car.

3544 Examiner Burchmore: For the service up to your line?

Mr. Keyes: Yes sir; by doing that, we get that additional revenue?

Examiner Burchmore: Do you have any passenger trains?

Mr. Keyes: I might state that this is the only instance in which our engines perform that service. Heretofore, the Brooks Scanlan Company have always had an engine out there.

Examiner Burchmore: How long have you been doing that?

Mr. Keyes: Some few months—to deliver their loads to the Main line; that is what they are supposed to do.

Examiner Burchmore: Do you have any passenger trains or mixed trains?

Mr. Keyes: Yes sir.

Examiner Burchmore: How many?

Mr. Keyes: On the Hackley line, we run a straight passenger train daily between Hackley and Kentwood. In the morning, we run a passenger train making connection between Hackley and Warnerton, with the New Orleans and Great Northern southbound passenger train, and in the evening we make another run to make connection with the New Orleans and Great North- -bound
3545 passenger train. That is between Hackley and Warnerton.

Examiner Burchmore: These trains run on a regular schedule?

Mr. Keyes: Yes sir.

Examiner Burchmore: You have a time table?

Mr. Keyes: Yes sir.

Examiner Burchmore: Will you offer a copy of that in evidence?

Mr. Keyes: Yes sir.

Examiner Burchmore: How many freight or logging trains do you run daily?

Mr. Keyes: Well, in addition to that train, on the Bolivar line, we run two schedule mixed trains daily—two each way—that handles no logs whatever; that is a commercial business. On the narrow gauge line, we also run our local freight train each way daily except Sundays; it handles no logs whatever.

Examiner Burchmore: Do you have any log trains in addition to this?

Mr. Keyes: Yes sir.

Examiner Burchmore: Are they regularly scheduled?
3546 Mr. Keyes: Yes sir.

The time table requested by the Examiner was at this time offered and identified, and was received in evidence and thereupon marked Kentwood and Eastern Railway Company Exhibit No. 1, received in evidence December 14, 1910, page — and is attached hereto.

Examiner Burchmore: You carry passengers of course?

Mr. Keyes: Well, we carry passengers on our mixed trains and passenger trains, not on local freight trains or logging trains.

Examiner Burchmore: They buy tickets?

Mr. Keyes: Yes sir.

Examiner Burchmore: And sometimes pay fares?

Mr. Keyes: Yes sir.

Examiner Burchmore: You carry the United States Mail?

Mr. Keyes: Yes, a daily average of 4.92 pounds.

Examiner Burchmore: Do you carry express?

Mr. Keyes: We handle—the American Express Company operates over our Hackley line.

Examiner Burchmore: They have a messenger?

Mr. Keyes: Our conductor acts as messenger jointly.
3547 Examiner Burchmore: He is paid for that?

Mr. Keyes: Yes, sir.

Examiner Burchmore: With respect to your freight traffic, in a general way, that can be obtained from your annual report filed with the Commission?

Mr. Keyes: Yes sir.

Examiner Burchmore: Have you any other data?

Mr. Keyes: I can give you the tonnage and revenue, if you wish.

Examiner Burchmore: Read the figures.

Mr. Keyes: During the year—the fiscal year—ending June 30th, 1910, we handled a total tonnage of 351,566 tons.

Examiner Burchmore: Just a moment——

Mr. Keyes: That statement is not in shape to file. Of this amount the Brooks Scanlan Company logs amounted to 250,014 tons or 82.9 per cent; other freight of the Brooks Scanlan Company amounted to 64,020 tons or 21 per cent, and freight shipped by others 45,132 tons or 15 per cent. I should have said that the other freight of the Brooks Scanlan Company amounted to 6420 tons or 2.1 per cent. Now, I have included in this 6,420 of Brooks Scanlan freight, 2,926 tons that went to their contractors which I presume
3548 you consider the same thing.

Examiner Burchmore: That is correctly included.

Mr. Keyes: The total revenue was $211,427.89; of this amount $139,996.50 or 72.4 per cent—do you want the freight or the total revenue?

Examiner Burchmore: The freight.

Mr. Keyes: The freight was—72.4 per cent of the freight accrued on Brooks Scanlan logs. $5,201.01 or 2.7 accrued on Brooks Scanlan other freight; $48,097.40 or 24.9 per cent accrued on freight shipped by others. Passengers and other things amounted to $18,000.00 or 9.8 per cent.

Examiner Burchmore: The particulars are given in the annual report?

Mr. Keyes: Yes sir.

Examiner Burchmore: But the figures in reference to the division of freight tonnage are not shown?

Mr. Keyes: The total tonnage and total revenue is shown in the report; the division I guess, is not.

Examiner Burchmore: Your Company had a tariff for passenger fares?

Mr. Keyes: Yes sir.

Examiner Burchmore: Is that filed with the Interstate
3549 Commerce Commission?

Mr. Keyes: Yes sir.

Examiner Burchmore: You are sure of it?

Mr. Keyes: Yes sir I am pretty certain.

Examiner Burchmore: Does the freight tariff name the rates over this line?

Mr. Keyes: Yes sir.

Examiner Burchmore: Reference will be made to our tariff files for this tariff.

Mr. Keyes: I have even the index.

Examiner Burchmore: Is that index on file with the Commission?

Mr. Keyes: Yes sir.

Examiner Burchmore: Then there is no need to file it here.

Mr. Keyes: All right.

Examiner Burchmore: You participate in joint through class rates with the Illinois Central Railroad?

Mr. [illegible]: Yes, and in the New Orleans and Great Northern rate.

Examiner Burchmore: Are all the stations on your line grouped [illegible] the same rate?

Mr. [illegible]: No. Our class and commodity rates from [illegible]—that is, Chicago, Cincinnati or St. Louis, etc.—to [illegible] are made from New Orleans, and from New Orleans to [illegible] there are two groups.

Examiner Burchmore: One on the northern line?

Mr. [illegible]: No, one group for the eastern end of our Hackley line.

Examiner Burchmore: That is a sufficient particularity.

Mr. [illegible]: That would be for the portion that is east of the New Orleans and Great Northern Railroad?

Mr. [illegible]: Yes, sir.

Mr. [illegible]: You understand that the Great Northern road cuts the [illegible] in two?

Examiner Burchmore: It does cut it or runs across it. I presume you cross the New Orleans and Great Northern?

Mr. [illegible]: No, they cross us. We were there first.

Examiner Burchmore: You have any trouble getting cars?

Mr. [illegible]: No, sir.

Examiner Burchmore: Are the rates on lumber grouped from all [illegible] on the road?

Mr. [illegible]: No, sir; different rates apply from our different stations.

Examiner Burchmore: To interstate points?

Mr. [illegible]: Yes, sir.

Examiner Burchmore: Explain that just a little.

Mr. [illegible]: Well, take Chicago for instance. From Hackley the through rate is [illegible] cents a hundred, or one and a half cents from Kentwood.

Examiner Burchmore: What is it from Foley?

Mr. [illegible]: From Foley and Hunter, the rate is 25 cents or one cent [illegible] from Kentwood. From all other stations the rate is the same as the Kentwood rate except that all cases where there is a transfer from standard gauge to narrow gauge a charge of fifty cents a thousand feet is made in addition.

Examiner Burchmore: That amounts to two cents per hundred pounds?

Mr. [illegible]: Scarce a cent.

Examiner Burchmore: What divisions does your company receive out of those rates on lumber?

Mr. [illegible]: On the 25-cent rate from Hackley, we receive four cents, plus the transfer charge; on Hunter and Foley, we receive three and a half cents, and the transfer when there is any, and on the other points, two and a half cents per hundred plus the transfer charge.

Examiner Burchmore: Then, the lowest division you receive is two and a half cents?

Mr. Keyes: Yes sir.

Examiner Burchmore: Is there any lumber traffic on which you receive no commission?

Mr. Keyes: On which what?

Examiner Burchmore: On which you receive no division—on which you earn nothing?

Mr. Keyes: No sir.

Mr. Reed: Explain that?

Examiner Burchmore: Do you handle any lumber on which you do not get a division with the Illinois Central?

Mr. Reed: You can explain that. His question does not mean that you do not get a compensation from the railroad but that you don't get compensation at all for?

Examiner Burchmore: Well, either way.

Mr. Keyes: Well, now you understand, on these rates I have just mentioned, these divisions—our proportion of the through rate—that does not come out of the Illinois Central rate.

3553 Examiner Burchmore: It comes out of the through rate?

Mr. Keyes: Certainly.

Examiner Burchmore: Are there any through rates out of which you receive no division at all?

Mr. Keyes: From the Illinois Central?

Examiner Burchmore: In which the Illinois Central takes the whole rate?

Mr. Keyes: There are shipments which are billed on the sums of the locals.

Examiner Burchmore: To what territory?

Mr. Keyes: Well, to points south of the Ohio river; principally our through rates are to points north of the Ohio and East of the Mississippi river.

Examiner Burchmore: What are your local rates in a general way?—Higher or lower than the division?

Mr. Keyes: A little higher.

Examiner Burchmore: Do those through rates carry a milling in transit provision?

Mr. Keyes: No.

Examiner Burchmore: You receive from three and a half cents to four cents division. Just what service do you render for that division?

3554 Mr. Keyes: Well now—you are speaking of miscellaneous lumber shipments?

Examiner Burchmore: No, I refer to shipments handled for the Brooks Scanlan Lumber Company.

Mr. Keyes: From the woods to the Illinois Central?

Examiner Burchmore: Yes.

Mr. Keyes: Well, we handle the logs to the mill.

Examiner Burchmore: Under any billing?

Mr. Keyes: There is no billing that accompanies each car.

Examiner Burchmore: It is filled out afterwards?

Mr. Keyes: We have a daily report from our conductor on each car of the lumber they handle and where received, and we also have

a record on our despatcher's train sheets against which we check the conductor's reports.

Examiner Burchmore: You unload logs at the mill?

Mr. Keyes: No sir.

Examiner Burchmore: What additional service do you render?

Mr. Keyes: We do nothing but haul the logs to the Mill.

Examiner Burchmore: The Illinois Central hauls them away from the Mill?

Mr. Keyes: They haul the lumber.

3555 Examiner Burchmore: They set the empty car at the mill?

Mr. Keyes: Yes sir.

Examiner Burchmore: The practices of your road, so far as the Illinois Central shipments are concerned, are about the same as those of one or two other companies we have had to-day?

Mr. Keyes: Practically so.

Examiner Burchmore: Is there any representative from the Illinois Central, as to why you get a division?

Mr. Keyes: We charge a regular tariff rate to the mill, depending on the distance the log is handled.

Examiner Burchmore: Five or six cents?

Mr. Keyes: Two and a half and three cents. Our local log tariff is two and a half cents for a distance of 15 miles; further than fifteen miles, three cents, and we haul all logs to the mill at tariff rates. On shipments moving out that are sawed from these logs going to points at which we have through rates, our claim is made up——

Examiner Burchmore: In the manner described this morning?

Mr. Keyes: Yes sir.

Examiner Burchmore: I think we are informed with respect to that.

3556 Mr. Keyes: Credit for the amount is given.

Examiner Burchmore: How about the New Orleans and Great Northern shipments?

Mr. Keyes: We have no rates to points north. We have through rates to New Orleans and Slidell.

Examiner Burchmore: You haul lumber to the New Orleans and Great Northern on shipments to New Orleans do you?

Mr. Keyes: Yes sir.

Examiner Burchmore: From your mill?

Mr. Keyes: There has been -o shipment moving from Kentwood up to the present time.

Examiner Burchmore: Where do the shipments move from?

Mr. Keyes: From towns along our narrow gauge line.

Examiner Burchmore: Have you any mill on that narrow gauge line?

Mr. Keyes: None of our own.

Examiner Burchmore: The New Orleans and Great Northern gets no Brooks and Scanlan Company lumber?

Mr. Keyes: No sir.

Examiner Burchmore: All the Brooks Scanlan Company lumber goes over the Illinois Central.

3557 Mr. Keyes: Except such as they may ship locally.

Examiner Burchmore: Now, our questions so far have appiel to the Brooks Scanlan Company lumber. How about lumber handled for other interests that have no relation to the Brooks Scanlan Lumber Company. What service do you render there?

Mr. Keyes: We handle the Lumber to the Illinois Central for our proportion of the freight.

Examiner Burchmore: You get no haul on the logs?

Mr. Keyes: No sir.

Examiner Burchmore: You receive the same net revenue as the railroad, in the end, on Brooks Scanlan stuff, that you get on other people's stuff?

Mr. Keyes: Exactly.

Examiner Burchmore: Your road has a supply of tickets and way bills?

Mr. Keyes: Yes sir.

Examiner Burchmore: Bills of Lading, etc.

Mr. Keyes: Yes sir.

Examiner Burchmore: Where are your general offices?

Mr. Keyes: At Kentwood.

Examiner Burchmore: In the same building with the depot
3558 there?

Mr. Keyes: We are in the same building as the Brooks Scanlan Company.

Examiner Burchmore: In the same building as the Brooks Scanlan Company, I mean?

Mr. Keyes: Yes sir.

Examiner Burchmore: Do you use the Illinois Central depot at Kentwood?

Mr. Keyes: Well, it is right nearby, we have no depot. We have transfer facilities and all that.

Examiner Burchmore: The Illinois Central issues Bills of Lading on outbound lumber?

Mr. Keyes: Yes sir.

Examiner Burchmore: From the Brooks Scanlan Lumber Company mills?

Mr. Keyes: Yes sir.

Examiner Burchmore: In the same manner described this morning in the cases o- other roads?

Mr. Keyes: Yes sir.

Examiner Burchmore: Your road files a report with the Interstate Commerce Commission as required by the act to regulate
3559 commerce?

Mr. Keyes: Yes sir.

Examiner Burchmore: Do you keep your accounts in conformity with the prescribed system of accounts?

Mr. Keyes: Yes sir.

Examiner Burchmore: Do you ever have any accidents on the road?

Mr. Keyes: Very few.

Examiner Burchmore: Do you report those to the Commission?
Mr. Keyes: Yes sir.
Examiner Burchmore: Are your cars equipped with safety appliances?
Mr. Keyes: All that are required to be by the commission.
Examiner Burchmore: Do you post your tariff at the stations?
Mr. Keyes: Yes sir.
Examiner Burchmore: Have you a resident agent in Washington?
Mr. Keyes: Yes sir
Examiner Burchmore: Do you have resident agents at all the stations? You know the new law requires the Railroad Company to have a resident agent at each station whose name must be posted at the depot, and to whom the general public can go for
3560 information respecting rates, etc.
Mr. Keyes: I don't believe we have a resident agent.
Examiner Burchmore: I suggest that you look into that phase of the law.
Mr. Keyes: Where can that be found?
Examiner Burchmore: In the act to regulate commerce, as amended at the last session of Congress.
Mr. Keyes: I know we sent out placards to all our stations but I really have forgotten what that was for. I know I copied it out of the act.
Examiner Burchmore: Well, if you complied with that, all right; if you have not do so.
Mr. Keyes: I know I studied it over. I have forgotton just what it covered.
Examiner Burchmore: Your train men work in accordance with the hours of service law?
Mr. Keyes: Generally. Sometime they work over, but it is only when caused by accident or something of that kind.
Examiner Burchmore: You have the valuation of the road and equipment?
Mr. Keyes: Yes sir.
Examiner Burchmore: You stated that the road has not
3561 paid dividends?
Mr. Keyes: No sir.
Examiner Burchmore: Is the C. H. Stevens Logging Company on your line?
Mr. Keyes: The Stevens Logging Company used to saw for the Brooks Scanlan people.
Examiner Burchmore: Is that the Foley people?
Mr. Keyes: Yes sir.
Examiner Burchmore: Has the Stevens Logging Company gone out of business?
Mr. Keyes: Yes sir.
Examiner Burchmore: Who succeeded it?
Mr. Keyes: J. E. Hurd & Co.
Examiner Burchmore: Spell it.
Mr. Keyes: H-u-r-d.
Examiner Burchmore: Where located?

Mr. Keyes: At Scanlan where the Stevens Logging Company used to be located.

Examiner Burchmore: That is not the Company that sends logs to Foley?

Mr. Keyes: No sir.

Examiner Burchmore: What do they do—cut logs?

3562 Mr. Keyes: They do the logging for the Brooks Scanlan Company—load logs on cars and deliver the cars to the main line of the Kentwood and Eastern Railroad Company. They construct all the logging spurs. The Stevens Logging Company used to be contractors for the Brooks Scanlan Company.

Examiner Burchmore: This two cent allowance that the Illinois Central refunds at the end of the month——

Mr. Keyes: Two and a half.

Examiner Burchmore: Two and a half cents—who does that go to?

Mr. Keyes: Well, it goes back to the shipper for the reason that they are charged full freight on their logs.

Examiner Burchmore: It goes back to the Brooks Scanlan Company?

Mr. Keyes: Yes sir.

Examiner Burchmore: Does it go back to other people on the line that ship lumber?

Mr. Keyes: No, for the reason that, in the first place, they are only charged the actual rate.

Examiner Burchmore: The net rate, in the first place?

Mr. Keyes: Yes sir. It is impossible to do that on a mill-

3563 ing in transit proposition.

Examiner Burchmore: It seems to me that the Brooks Scanlan Company are better off at the end of the transaction by two and a half cents than their competitors. Maybe I am wrong about that?

Mr. Keyes: I think so.

Examiner Burchmore: Does the Brooks Scanlan Company pay the same amount substantially in the end on its log and lumber shipments over the Illinois Central as those other people pay?

Mr. Keyes: Exactly.

Examiner Burchmore: Did you ever complain of the car supply of the Illinois Central?

Mr. Keyes: We have complained to the Illinois Central.

Examiner Burchmore: Is your car supply reasonably satisfactory?

Mr. Keyes: Well it is pretty satisfactory right at the present time. It has not been all along in the past.

Examiner Burchmore: Does any officer of the Illinois Central Railroad Company own any stock in the Kentwood and Eastern Railway Company?

Mr. Keyes: No, sir.

3564 —. Are they interested in the Brooks Scanlan Company?

Mr. Keyes: No, sir.

Examiner Burchmore: Neither the railroad nor its officers are interested in this enterprise?

Mr. Keyes: None whatever.
Examiner Burchmore: Who are the Brooks Scanlan people?
Mr. Keyes: Well, Mr. M. J. Scanlan is of Minneapolis, Minnesota.
Examiner Burchmore: What is his business?
Mr. Keyes: Lumberman.
Examiner Burchmore: With interests elsewhere in the country?
Mr. Keyes: Yes sir.
Examiner Burchmore: Extensive interests?
Mr. Keyes: Yes, sir.
Examiner Burchmore: Who are the others?
Mr. Keyes: D. F. Brooks, A. S. Brooks, and E. R. Brooks.
Examiner Burchmore: Who are the Messrs. Brooks?
Mr. Keyes: Who are they?
Examiner Burchmore: Yes.
Mr. Keyes: They are lumbermen, all of them in Minneapolis. Those four are the principal stockholders.

3565 Examiner Burchmore: Are they interested in any other lumbering operations on the Illinois Central so far as you know?

Mr. Keyes: No sir.
Examiner Burchmore: What are their other interests?
Mr. Keyes: They have timber in Oregon—out there; not as the Brooks Scanlan Company, but interested personally—in Oregon—and they have several large tracts in British Columbia, and the Bahama Islands.
Examiner Burchmore: None in this part of the country—in the South?
Mr. Keyes: As I say, they have operations in the Bahama Islands.
Examiner Burchmore: None in the southern states?
Mr. Keyes: I don't know but what they have some timber in Florida.
Examiner Burchmore: Are there any questions you desire to ask Mr. Reed?
Mr. Reed: Yes. Mr. Keyes, how is the assessment of your road made?
Mr. Keyes: It is made by the state Board of assessors on valuation.

3566 Mr. Reed: Your Honor understands that the Parish assessor, *assessing* ordinary property, and we have a separate Board of assessment for public carriers.

Examiner Burchmore: That has been stated in other cases today.
Mr. Reed: It was stated with respect to the State of Mississippi, and it is also true in the State of Louisiana.
Examiner Burchmore: I believe the Granada, Greensburg and Southwestern said so. What kind of a railroad is that?
Mr. Keyes: Which?
Examiner Burchmore: Your competitor, the Granada, Greensburg and Southwestern?
Mr. Keyes: It is like our narrow gauge line.
Examiner Burchmore: A first class railroad I guess?
Mr. Keyes: I guess pretty fair for a narrow gauge railroad.

Examiner Burchmore: As good as yours?

Mr. Keyes: I don't think so.

Examiner Burchmore: You are going to connect up with it?

Mr. Keyes: Not that we have any intention of doing so.

3567 Examiner Burchmore: You are not going to be a part of that trunk line—the K. G. & S. W. and the N. O. & G. N.?

Mr. Brady: It is our purpose to submit just such a proposition. That is our purpose, to submit that very proposition; we have figured it all out. That was our intention.

Mr. Reed: Are you not also exempt to a part of your railroad during a number of years, under a constitutional exemption for railroads provided for in the constitution of the State of Louisiana?

Mr. Keyes: Yes sir.

Mr. Reed: Speaking of hauling timber for the Brooks Scanlan Lumber Company, how far on your narrow gauge road east of Kentwood have they timber to haul?

Mr. Keyes: Why, their hauling now is from what we call 12 mile spur. I think they have a little timber east of that point but very little.

Mr. Reed: And your railroad runs out about 18 miles further east?

Mr. Keyes: Yes, further east than 12 mile spur.

Examiner Burchmore: Why did you build it for that distance?

3568 Mr. Keyes: We did not; the road was already built when we took possession.

Examiner Burchmore: Why was it built? Was their timber there?

Mr. Keyes: The original owners had a body of timber out there. In fact, our company has logged some timber within a few miles of there, but it is practically exhausted, so far as their holdings are concerned.

Mr. Reed: Hackley is in Washington Parish?

Mr. Keyes: Yes sir.

Mr. Reed: And since cutting the timber out in Washington Parish, or more than 12 or 13 miles east of Kentwood, you still maintain the road east of the eastern limit of the Brooks Scanlan Company's timber, about 18 miles?

Mr. Keyes: About 18 miles, yes sir.

Mr. Reed: Do you remember when they quit cutting out east of the 12 mile point?

Mr. Keyes: I think it has been something like a year.

Mr. Reed: You still continue to run the road over to Hackley?

3569 Mr. Keyes: Yes sir.

Mr. Reed: Mr. Keyes, you received regular instructions from the Interstate Commerce Commission in regard to the equipment of your road and schedules and all that?

Mr. Keyes: Yes sir.

Examiner Burchmore: That question does not mean much, because the Interstate Commerce Commission's bureaux send letters

and instructions to everybody whose names appear in any railroad guide book of any character.

Mr. Reed: I will ask you this: you are recognized by the State Railroad Commission as being a subject to its jurisdiction?

Mr. Keyes: Yes sir.

Mr. Reed: Speaking of your passenger trains you are running them according to schedule and under the order of the Louisiana Railroad Commission?

Mr. Keyes: We are compelled to put on regular passenger trains by the Commission.

Examiner Burchmore: You have heard the request made on other companies for maps showing the settlements, etc. Perhaps that tonnage statement will suffice?

3570 Mr. Keyes: I have got another separation there.

Examiner Burchmore: That will suffice, but I request a map.

Mr. Reed: Of both the roads?

Examiner Burchmore: Of both parts; it is all called for of the whole line. The character of map already described today.

Mr. Reed: Where shall we forward this?

Examiner Burchmore: To the Interstate Commerce Commission with mention of this case. Is there any other statement you wish to make, Mr. Keyes?

Mr. Keyes: I have made an estimate of the lumber shipments since July 1, or from July to October inclusive, of this year.

Mr. Reed: That is included in the statement, a copy of which you have filed. Do you intend to file that?

Mr. Keyes: It is not exactly in order.

Mr. Reed: No.

Mr. Keyes: That was a copy I had.

Examiner Burchmore: Give it to the stenographer to check the figures from. I would not put it in the record unless you desire to offer it in evidence.

3571 Mr. Reed: I expect it will save time.

Examiner Burchmore: Is there any objection to putting it in evidence.

Mr. Keyes: I don't know that there is.

Examiner Burchmore: We will take it for what it is worth. Is there any further statement, Mr. Keyes? It seems to me that Mr. Reed has covered the road rather fully?

Mr. Reed: If there should be any other information you want, we will be very glad to furnish it.

Examiner Burchmore: The Commission will request any further information that it may feel it is necessary, but if you feel you have left out any points and it is material, you are at liberty to advise the commission in the form of a written communication which will be placed in the record and given such weight as it may seem to merit, but I would advise you not to do that unless the matter that you have omitted seems to be very important. Will you also kindly file your division sheets?

Mr. Keyes: The division sheets and maps?

Examiner Burchmore: Yes sir.
Mr. Keyes: All right.

3572 *Kentwood and Eastern Railway Company.*

G. A. KEYES, recalled, testified as follows:

I failed to state in the examination that our narrow gauge line from Kentwood to Mile Post, and from Bolivar Junction to Hackley, a mileage of 28.28 miles is leased by the Kentwood and Eastern Railway Company from the Brooks Scanlan Company.

Examiner Burchmore: On what basis?

Mr. Keyes: At an annual rental of $10,000.00 and taxes.

Examiner Burchmore: Well, what is the value of that road?

Mr. Keyes: Well, we don't know what it cost, but the Lumber Company figured it about $120,000.00.

Examiner Burchmore: Do you maintain the line?

Mr. Keyes: Yes, sir.

Examiner Burchmore: The railroad maintains the line?

Mr. Keyes: Yes, sir.

Mr. Reed: There is one other statement you omitted to make.

Mr. Keyes: The number of passengers we handled last year was not brought out.

Mr. Reed: That is shown by your annual report?

3573 Mr. Keyes: Yes, but I have figured it the first four months of this present fiscal year?

Mr. Reed: And what is that?

Mr. Keyes: On the basis of those figures during the present fiscal year, we will have handled over 53,000 passengers.

Examiner Burchmore: At a revenue of——

Mr. Keyes: It figures three cents a mile.

Examiner Burchmore: Is that all?

Mr. Keyes: I don't know that there is anything else, unless you want to know something else about the rental. The mileage between Kentwood and Hackley is 30.02, but part of that original line has been abandoned.

Mr. Reed: The Kentwood and Eastern Railway Company has constructed and owns a mileage equal to that abandoned.

3574 The estimate- of lumber shipments referred to by the witness, Mr. Keyes, on pages 198-199 were not filed with the stenographer.

By MR. REED:

and thereupon marked "Defendants' Exhibit 'A,' received in evidence, Index containing list of tariff publications in effect on November 1st, 1909, marked Exhibit "A."

The document so offered and identified was received in evidence and thereupon marked "Defendant's Exhibit 'A,' received in evidence December 13, 1910," page —, and is attached hereto.

By MR. REED:

We also offer freight tariff covering allowances for mileage on

private cars, issued September 29, 1909, and effective of November 1st, 1909.

The document marked "B," the said freight tariff, so offered and identified was received in evidence, and thereupon marked "Defendant's Exhibit 'B', received in evidence December 13, 1910," page —, and is attached hereto.

By MR. REED:

Counsel for defendant further offers in evidence, local distance tariff of class and commodity rates applying between all stations on traffic having origin, destination and entire transportation within the State of Louisiana for the Kentwood and Eastern Railway, issued September 29th, 1909, effective October 20th, 1909, marked Defendant's Exhibit "C."

3575 The document so offered and identified was received in evidence and thereupon marked "Defendant's Exhibit 'C,' received in evidence December 13, 1910," page —, and is attached hereto.

By MR. REED:

Counsel for defendant further offers and files in evidence, Car service rules and rules governing the furnishing of cars for the Kentwood and Eastern Railway Company, issued September 15, 1909, effective intrastate, September 20, 1909, and interstate, October 15, 1909, marked Defendant's Exhibit "D."

The document so offered and identified was received in evidence and thereupon marked "Defendant's Exhibit D," received in evidence December 13, 1910, page —, and is attached hereto.

By Mr. REED:

Counsel for defendant further offers in evidence, Local Distance tariff of Class and Commodity rates applying between all stations on Interstate Traffic only, for the Kentwood and Eastern Railway Company, issued September 29, 1909, effective November 1st, 1909, marked Defendant's Exhibit "E."

The document so offered and identified was received in evidence, and thereupon marked "Defendant's Exhibit 'B,' received

3576 in evidence December 13, 1910," page —, and is annexed hereto.

3577 *Doniphan, Kensett and Searcy Railway Company.*

(Appearance, W. L. Stocking, Esq., Attorney.)

H. R. KILPATRICK, was called as a witness, and being first duly sworn, testified as follows:

Direct examination.

Examiner Burchmore: What is your occupation Mr. Kilpatrick?

Mr. Kilpatrick: Secretary-Treasurer and General Manager of the Doniphan, Kensett and Searcy Railway Company and also Treasurer and General Manager of the Doniphan Lumber Company.

Examiner Burchmore: I assume it is a fact, Mr. Kilpatrick that the Doniphan, Kensett and Searcy Railway Company in a substantial sense, is controlled by the stockholders of the Doniphan Lumber Company through ownership of a majority of the stock?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: Will you describe just in a general and substantial way, that control?

Mr. Kilpatrick: Mr. Carter is President of the Doniphan Lumber Company and also the Doniphan Railroad Company and of course is Chief Executive. I am General Manager of both companies and have charge of local conditions.

3578 Examiner Burchmore: Well, are the stockholders of the two companies identical?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: And do the stockholders own their stock in proportion?

Mr. Kilpatrick: Yes, the stockholders of the Railroad own stock in the same proportion that they do in the lumber company.

Mr. Stocking: Pardon the interruption. There are a few shares held for purposes of organization, on the outside.

Examiner Burchmore: The Doniphan Railroad connects with the Iron Mountain at Kensett, Arkansas?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: And with the Rock Island at Searcy, Arkansas?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: What is the Missouri and North Arkansas road?

Mr. Kilpatrick: You can call it a truck line, but — is a line of some three hundred or more miles from Joplin, Missouri, to Helena, Arkansas.

3579 Examiner Burchmore: Is that controlled by the same lumber interests?

Mr. Kilpatrick: No, sir, that is owned and controlled by Mr. Princis and Mr. Scolan principally—St. Louis capitalists.

Examiner Burchmore: Is the Railroad entirely divorced from milling operations?

Mr. Kilpatrick: I think, so far as I know.

Examiner Burchmore: Is it part of any railroad system?

Mr. Kilpatrick: None at all according to my knowledge.

Examiner Burchmore: You also connect with that railroad at Searcy?

Mr. Kilpatrick: We do.

Examiner Burchmore: What sort of country does your railroad traverse?

Mr. Kilpatrick: It is level, comparatively flat country.

Examiner Burchmore: Timbered?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: Forests on the line—extensive forests?

Mr. Kilpatrick: No, sir.

3580 Examiner Burchmore: A farming country?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: Are there any forests on the line?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: Are there any forests near the line?

Mr. Kilpatrick: From 12 to 30 miles north of the line, there are extensive forests.

Examiner Burchmore: Are there any private tram lines or loggine road connected with the Doniphan Railroad at Searcy?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: Any box factories on the line?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: Stave factories?

Mr. Kilpatrick: Yes, sir, there is. I would like to explain that by saying that there is a stave factory at Searcy, and that their plant is on our connection of the M. & N. A. We could stop cars or unload anything for them there but we have no direct track connection there with them. We did not furnish them a switch. They are not, strictly speaking, on our line, but we have served
3581 them and could.

Examiner Burchmore: What other industries are there on the line aside from saw mills?

Mr. Kilpatrick: We serve the oil mill and the plant at Searcy; we have no direct switching to their property, but we run to it at and at various times, we set cars of coal for them on our main line, and at other times, we set empty cars on our main line, for them to load with ice. At other times we deliver commodities to them through a switch and connection with the Rock Island. By paying that switching charge, we can deliver them wherever they like in their property, coal, cotton seed or anything of that character.

Examiner Burchmore: Has this industry any relation with your road?

Mr. Kilpatrick: None whatever.

Examiner Burchmore: Has Mr. Carter any interest in it?

Mr. Kilpatrick: Not at all.

Examiner Burchmore: Is it wholly unrelated to the lumber and railroad company?

Mr. Kilpatrick: Wholly so.

Examiner Burchmore: What mill has the Doniphan Lum-
3582 ber Company on your line?

Mr. Kilpatrick: We have one plant located at Doniphan.

Examiner Burchmore: Where is that in relation to Kensett?

Mr. Kilpatrick: It is almost due north one and a half miles from there.

Examiner Burchmore: In other words, a mile and a half from the Iron Mountain Junction?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: How far from the Rock Island Junction?

Mr. Kilpatrick: Approximately five and a half miles.

Examiner Burchmore: When was the road constructed?

Mr. Kilpatrick: That part of it from Doniphan to Kensett, a mile and a half, was constructed in the summer of 1906.

Examiner Burchmore: When was the mill at Doniphan opened?

Mr. Kilpatrick: To the best of my recollection, about the first of 1908.

Examiner Burchmore: Subsequent to the building of the road?

3583 Mr. Kilpatrick: The road was built earlier than the road was completed. The road was built to carry the material when the machinery went into the construction of the mill.

Examiner Burchmore: Then your first junction was with the Iron Mountain?

Mr. Klpatrick: Yes, at Kensett.

Examiner Burchmore: Where did you get the rails to build the road from?

Mr. Kilpatrick: Leased from the Iron Mountain.

Examiner Burchmore: On what basis?

Mr. Kilpatrick: On the basis, I believe, $29.50 a ton and an anual rental of 5%.

Examiner Burchmore: Any account for the depreciation—did you take any account of that?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: What does that $29.50 per ton represent? What did it represent?

Mr. Kilpatrick: The price of the rail material plus the freight. It was an arbitary price fixed by the Railroad company at which we could buy the rail if we cared to at any time within the

3584 life of the contract or lease. I believe the contract stipulates that if we turn the rail back, whatever is missing or lost and is not in practically the same condition that they turn it over to us in, we have to settle for on that basis.

Examiner Burchmore: Have you subsequently purchased the rail?

Mr. Kilpatrick: No, sir, we still lease it.

Examiner Burchmore: If you turn that rail back in 20 years do you get anything for it?

Mr. Kilpatrick: It would be worthless. It is a pretty hard question. I think we would make it our business to turn it quicker than that if it was going to pieces.

Examiner Burchmore: The Iron Mountain has no use for rusty rail?

Mr. Kilpatrick: We would give it back.

Examiner Burchmore: Would they pay you $29.50, or $10.00, or something substantially less?

Mr. Kilpatrick: You understand, the lease only runs two years and of course, at any period in there, if the rail got so bad that we thought we had better turn it in we would turn it in.

Examiner Burchmore: It only runs two years longer or

3585 ran two years from the beginning?

Mr. Kilpatrick: In two year periods is my recollection.

Examiner Burchmore: Who constructed the road—a contractor hired by the Lumber Company?

Mr. Kilpatrick: No, sir, the railroad company constructed it and the Lumber Company financed it.

Examiner Burchmore: Does that statement apply to the entire present line of the railroad?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: When did you build east of Doniphan?

Mr. Kilpatrick: West of Kensett?

Examiner Burchmore: West of the line—between Kensett and Searcy?

Mr. Kilpatrick: That was constructed in 1907.

Examiner Burchmore: I see. Kensett is intermediate to Doniphan and Searcy—a Y-shaped road? I did not perceive that. I thought Doniphan was between Searcy and Kensett?

Mr. Kilpatrick: No.

Examiner Burchmore: What seemed to be the two termini or points of connection or really not termini to the road at all. What was the purpose in building across to Searcy?

Mr. Kilpatrick: The purpose was two-fold. We felt that we could do a considerable amount of commercial business and at the same time better the railroad facilities of that Lumber Company.

Examiner Burchmore: And at the same time receive a higher division by reason of the competition of trunk lines with each other for your traffic?

Mr. Kilpatrick: I don't think so. I don't think our divisions were raised.

Examiner Burchmore: There was no increase in the divisions incident to the new connection?

Mr. Kilpatrick: Not to my knowledge or recollection. The advantage to the mill was a local one. A car supply and greater terminal.

Examiner Burchmore: Have you any mill save that of Doniphan?

Mr. Kilpatrick: No sir.

Examiner Burchmore: Has the Lumber Company had any other mill?

Mr. Kilpatrick: For some eleven years they operated a mill in southeastern Missouri at a point called Doniphan.

Examiner Burchmore: Doniphan, Missouri?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Did they have a tap road there?

Mr. Kilpatrick: Not to my knowledge.

Examiner Burchmore: Would you know it if they had?

Mr. Kilpatrick: I think so yes sir. I was not connected with that operating company and for that reason, I hesitate to speak.

Examiner Burchmore: Then the Lumber Company is an old corporation, comparatively?

Mr. Kilpatrick: Comparatively so, yes sir.

Examiner Burchmore: They formerly operated elsewhere?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Does it now operate anywhere else?

Mr. Kilpatrick: No.

Examiner Burchmore: How was this road originally financed—who furnished the money?

Mr. Kilpatrick: The Lumber Company.

Examiner Burchmore: And took in exchange capital stock?

Mr. Kilpatrick: No.

Examiner Burchmore: Is this a case where the Lumber Company declared a dividend and the stockholders used the dividend
3588 to build a railroad or buy its stock?

Mr. Kilpatrick: Not that I know of, no sir.

Examiner Burchmore: That is a perfectly proper way of doing, but I wanted to know if it was done here? How was it financed?

Mr. Kilpatrick: Directly by the owners of the Lumber Company. The Lumber Company itself actually furnished the funds.

Examiner Burchmore: And subsequently had railroad stock issued to cover it?

Mr. Kilpatrick: To the Lumber Company?

Examiner Burchmore: To the stockholders?

Mr. Kilpatrick: No, the Railroad company and the lumber company were absolutely separate. When the railroad company needed funds, they called upon the lumber company charged the railroad with the funds and turned them over to the railroad.

Examiner Burchmore: What is the total capital stock of the railroad company and how much is issued?

Mr. Kilpatrick: $100,000.00 all issued.

Examiner Burchmore: Issued for cash?

Mr. Kilpatrick: No, part of it—I think $12,000.00 was
3589 paid in cash.

Examiner Burchmore: And the balance was paid for out of the moneys advanced by the Lumber Company?

Mr. Kilpatrick: The balance was issued to take up and pay for the original company which was called the Doniphan, Kensett and Searcy Railroad Company.

Mr. Stocking: Mr. Examiner, if you will permit, I can make a statement which will simplify.

Examiner Burchmore: Yes.

Mr. Stocking: There was a railroad company originally called the Doniphan, Kensett, and Searcy Railroad Company—Mr. Witness, you will correct me if I am in error. It was created under the laws of Arkansas, and stock was subscribed and 5% of that $45,000.00, making $2,250.00 was under the laws of Arkansas, paid to the Railroad Company and all of the stock issued. The Railroad Company then constructed the idea and the lumber company furnished the funds from time to time as it needed it. In 1899, there was a re-organization by which a new corporation was organized under the laws of Arkansas, by the name of the Doniphan, Kensett and Searcy Railway Company, organized under the provisions of the Arkansas statute by which a corporation—a railway cor-
3589*a* poration—may be organized for the purpose of purchasing another railroad, and paying for it in its stock. There was $12,000.00 of stock subscribed to the Doniphan Kensett and Searcy Railway by the same stockholders who paid that $12,000.00 at full par value in cash out of their net funds. The balance of the $100,000.00 was turned over to the old Company, the railroad company,

for the balance, and was by the old Arkansas Company, distributed by way of a dividend to its stockholders. Do I make that plain?

Examiner Burchmore: That is your understanding, Mr. Kilpatrick?

Mr. Kilpatrick: Yes, sir.

Mr. Stocking: If I said 1899 I meant 1909, when the new company was organized.

Examiner Burchmore: I think that that is apparent. Has the Railroad any bonded indebtedness.

Mr. Kilpatrick: No sir.

Examiner Burchmore: Has it any indebtedness other than current liabilities?

Mr. Kilpatrick: I believe not, it owes the Lumber Company still, but has no bonded indebtedness or anything of that sort.

3590 Examiner Burchmore: What does it owe the Lumber Company?

Mr. Kilpatrick: Mr. Smythe there is the auditor.

Mr. Stocking: We will put the auditor on the stand if your Honor pleases.

Examiner Burchmore: Will you inform me with respect to the present directors and officers of the Company?

Mr. Kilpatrick: I believe I would rather have you ask Mr. Smythe who has the record. I can say about the officers but I am not sure about all the directors.

Mr. Stocking: You have the request of the Association over in your pocket which will show who they are.

Examiner Burchmore: Mr. Smythe can answer that offhand. What is the mileage of this road?

Mr. Kilpatrick: Six miles in operation and seven miles under construction.

Examiner Burchmore: Our records seem to show a mileage of 7.44 miles, standard gauge, does that include sidings?

Mr. Kilpatrick: Yes that is the main line.

Examiner Burchmore: That is standard gauge?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Do you hold any trackage rights?

Mr. Kilpatrick: We have trackage rights over the Missouri

3591 and North Arkansas.

Examiner Burchmore: From where to where?

Mr. Kilpatrick: For a distance of fifty miles north of Searcy.

Examiner Burchmore: What do you go way up there for?

Mr. Kilpatrick: For logs, a logging train.

Mr. Stocking: There are forests up there.

Examiner Burchmore: There are no forests around Doniphan?

Mr. Kilpatrick: No sir.

Examiner Burchmore: That explains the absence of private tap lines?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Tell me a little about that, you run up 50 miles to the forests?

Mr. Kilpatrick: We have a contract with the Missouri and North Arkansas which expires on December 31,1910, whereby we operate

this logging train over their rails for a distance not exceeding fifty miles, and for which we pay them on a basis of three cents per hundred pounds.

Examiner Burchmore: You pay three cents per train mile?

3592 Mr. Kilpatrick: Three cents per hundred pounds for the movement. Out of that three cents, the Missouri and North Arkansas allow 75% for the operation of the train.

Examiner Burchmore: When you say "we pay" you mean the lumber company pays three cents?

Mr. Kilpatrick: The Railroad Company.

Examiner Burchmore: Then they actually only pay 25% of three cents?

Mr. Kilpatrick: No, the Railroad, the Doniphan Kensett and Searcy Railway Company pay the Missouri and North Arkansas three cents per hundred pounds for all logs which the Doniphan, Kensett and Searcy Railway transport over their lines. Then the Missouri and North Arkansas Railway allow the Doniphan Kensett and Searcy Railway 75% of the amount for their engine service—train service—for operation. Then the Doniphan Kensett and Searcy Railway Company charges the Doniphan Lumber Company two cents per hundred pounds for every hundred pounds of logs it delivers to them at their plant.

Examiner Burchmore: Now, you say you pay three cents to the Missouri and North Arkansas, does that cash actually pass?

3593 Mr. Kilpatrick: Actually passes.

Examiner Burchmore: Then you say you are allowed 75% of that? How are you allowed it?

Mr. Kilpatrick: The bill is for the total number of pounds transported each month at three cents per hundred pounds, and then on their bill they set at 75% that amount as a credit and we pay them by actual check the difference.

Examiner Burchmore: 25%?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Well if you are charged by the Missouri & North Arkansas Railway a three cents charge for their trackage right, it would seem that you might properly charge the Lumber Company three cents. Why do you charge less?

Mr. Kilpatrick: We base our charge to the Lumber Company on the rough lumber rate applicable in the State of Arkansas which at that time was two cents? We applied the state rate. The Missouri and North Arkansas, for reasons better known to themselves, files a special tariff covering that situation raising that rate to three cents, and allowing us 75% of the tariff.

Examiner Burchmore: What do you think those reasons

3594 are? Have you any idea?

Mr. Kilpatrick: No I have not. It was the traffic manager's proposition and it is an unusual arrangement, but it is in actual existence.

Examiner Burchmore: Well, is it not in order that other mills

and connections may not be advised on the exact payment that you make?

Mr. Kilpatrick: I think not, I think all of it is of record, and I know a regular tariff is filed with the Arkansas Commission.

Examiner Burchmore: Providing for a 75% allowance?

Mr. Kilpatrick: I am not so sure about that.

Mr. Stocking: May I interrupt? As I understand it, instead of making a trackage contract which would give a certain department of the road the credit—I mean a certain department of the Missouri and North Arkansas the credit in this business, they wanted the credit to go to the traffic department of the road for some reason of their own.

Examiner Burchmore: It was expected to increase some figures or decrease others?

Mr. Stocking: I think for some purpose of their own they wanted to swell the traffic of the road.

3595 Mr. Kilpatrick: That was our surmise, but I don't know that, and for that reason, I did not go into it. I know the traffic manager, and he was trying to build up a record for himself. If the traffic department would get the credit for so much per hundred pounds instead of the operating department getting it, it would appear in his favor.

Examiner Burchmore: Are there private tram lines running from the Missouri and North Arkansas into the woods of the Doniphan Company?

Mr. Kilpatrick: One is just started—seven miles under construction: It is not a private tram, it is a separate branch of the Doniphan, Kensett and Searcy Railway.

Examiner Burchmore: That is seven miles under construction?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Where does it connect with the Missouri and North Arkansas?

Mr. Kilpatrick: At Letona.

Examiner Burchmore: The traffic is actually moving from some points between Letona and the junction?

Mr. Kilpatrick: Letona is the junction. There is nothing moving yet. Our track is still being laid; the grade work

3596 is under course.

Examiner Burchmore: Where do you get your logs now?

Mr. Kilpatrick: Load them on the main line of the Missouri and North Arkansas.

Examiner Burchmore: Which runs through your woods?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Has the Missouri and North Arkansas any other tram lines or tap line connections up with Letona?

Mr. Kilpatrick: Nothing nearer than I think forty miles above there. There they have a connection with a private road un-incorporated—a private road belonging to a cooperage concern.

Examiner Burchmore: Has the Railroad Company any stations? Station buildings, I mean?

Mr. Kilpatrick: One station building at Searcy.

Examiner Burchmore: Is that station building used also by the Missouri and North Arkansas?

Mr. Kilpatrick: No sir, simply by the Doniphan, Kensett and Searcy Railway.

Examiner Burchmore: Where do you meet the Rock Island?

Mr. Kilpatrick: We meet the Rock Island where we cross them.

3597 Examiner Burchmore: The Rock Island terminus is at Letona?

Mr. Kilpatrick: Correct.

Examiner Burchmore: The Rock Island crosses the Iron Mountain at Higginson?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: Did the Rock Island build from Higginson to Searcy to meet your road?

Mr. Kilpatrick: No sir, it did not.

Examiner Burchmore: Why did they build?

Mr. Kilpatrick: I cannot tell you; I think they bought the property from a small line, some several years before.

Examiner Burchmore: A small tap line?

Mr. Kilpatrick: I think there was a short line that was constructed from Searcy through Higginson down there, and below Higginson and finally it was extended to Devil's Bluff itself on the main line of the Rock Island, which at that time I believe was the Choctaw Oklahoma and Gulf.

Examiner Burchmore: That is the main line from Little Rock to Memphis?

Mr. Kilpatrick: Correct.

Examiner Burchmore: Do you know the name of the road
3598 from Devil's Bluff to Higginson?

Mr. Kilpatrick: That was a regular tap line. No, I don't reme-ber the exact name. May I correct that?

Examiner Burchmore: Yes.

Mr. Kilpatrick: I believe the Searcy and Des Arc.

Examiner Burchmore: Do you know who owned that road?

Mr. Kilpatrick: I do not. I think it was sold to the Rock Island or to the Choctaw, or the Choctaw sold it to the Rock Island. It was recently purchased—since our annual report was made.

Examiner Burchmore: What use is made of its cars?

Mr. Kilpatrick: They will be used some for camp cars, and two cars in its construction work on its seven miles and some will be used in the regular traffic as the same develops.

Examiner Burchmore: They are second hand box cars?

Mr. Kilpatrick: Yes, bought from the Chicago and Great Western Railway.

Examiner Burchmore: In good condition?

Mr. Kilpatrick: The cars are in active service today and are on the road loaded with corn and other products.

Examiner Burchmore: Have you any water tanks for the
3599 locomotives?

Mr. Kilpatrick: Yes, sir, one.

Examiner Burchmore: Where do you get the fuel for your locomotives?

Mr. Kilpatrick: We buy it on the open market from the different coal companies?

Examiner Burchmore: It moves interstate?

Mr. Kilpatrick: I think at the present time it is moving intrastate, but it has moved interstate.

Examiner Burchmore: Where do you take delivery of that coal?

Mr. Kilpatrick: Sometimes we take delivery at Doniphan and sometimes at Kensett.

Examiner Burchmore: It also moves in such a way that you get a division out of it. Does it not?

Mr. Kilpatrick: Generally yes. I think we have had a few cars of coal that we have not had a division on.

Examiner Burchmore: How many flat cars have you?

Mr. Kilpatrick: We have twenty one standard flat cars. Automatic couplers entirely equipped with air.

Examiner Burchmore: How many logging cars?

Mr. Kilpatrick: 20 comprise our logging cars. We log on the standard flat cars.

3600 Examiner Burchmore: You do not have additional logging cars?

Mr. Kilpatrick: None whatever.

Examiner Burchmore: Any passenger cars?

Mr. Kilpatrick: No sir.

Examiner Burchmore: Cabooses?

Mr. Kilpatrick: Two.

Examiner Burchmore: Working cars? That includes—you have none in addition to those already described?

Mr. Kilpatrick: Only one, and one of those a caboose—it has a platform and is housed over. It answers for a caboose—for a caboose and for a working car. Answers both purposes.

Examiner Burchmore: Have you any derricks or shovels or pile drivers?

Mr. Kilpatrick: No.

Examiner Burchmore: Any hand cars?

Mr. Kilpatrick: Yes. We had two at the time our annual report was made, and I think we purchased two since.

Examiner Burchmore: Has the lumber company any equipment of its own?

Mr. Kilpatrick: No sir.

3601 Examiner Burchmore: Does it lease any from the Railroad Company?

Mr. Kilpatrick: No sir.

Examiner Burchmore: The number of employees in the different departments of the Railroad, I assume, are given in the annual report?

Mr. Kilpatrick: They are.

Examiner Burchmore: With exactness.

Mr. Kilpatrick: They are:

Examiner Burchmore: How many train crews have you?

Mr. Kilpatrick: Two.

Examiner Burchmore: One for each locomotive?

Mr. Kilpatrick: Yes. One operates the log train, and the other operates our commercial train.

Examiner Burchmore: What general office employees are there?

Mr. Kilpatrick: We have the general agent at Searcy. He has a clerk. At Doniphan, we have an agent who devotes a part of his time to the Railroad and a part of it to the Lumber Company, and who acts jointly.

Examiner Burchmore: How about that agent at Searcy? Exclusively in the employ of the Railroad Company?

3602 Mr. Kilpatrick: Exclusively.

Examiner Burchmore: What other general officers are there to receive salaries? Not by name?

Mr. Kilpatrick: Our auditor receives a salary, but his salary is divided between the Doniphan Lumber Company, the Saline River Lumber Company, the Saline River Railroad Company and the Doniphan Kensett and Searcy Railway Company.

Examiner Burchmore: Is that division of salary supposed to be in proportion to the services rendered?

Mr. Kilpatrick: I presume so. Our President made that division, whatever it was. I cannot answer that absolutely. I received a salary as General Manager.

Examiner Burchmore: You are also an employee of the Lumber Company?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: What is your salary from the Railroad Company alone?

Mr. Kilpatrick: $50.00 per month.

Examiner Burchmore: You devote a substantial part of your time to the Railroad Company?

Mr. Kilpatrick: Yes sir.

3603 Examiner Burchmore: Do you run any regular passenger or mixed trains?

Mr. Kilpatrick: No we do not.

Examiner Burchmore: An irregular service?

Mr. Kilpatrick: Our service is exclusively freight; we have no passenger service.

Examiner Burchmore: Do you run any regular freight trains?

Mr. Kilpatrick: We run a regular local freight train.

Examiner Burchmore: Every day?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: From Searcy to Kensett?

Mr. Kilpatrick: From Doniphan to Kensett and Kensett to Searcy and return.

Examiner Burchmore: One long trip daily?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Do you have any public time tables for them?

Mr. Kilpatrick: We do not.

Examiner Burchmore: You have a time table?

Mr. Kilpatrick: We have an employees' schedule card that they leave at Doniphan at certain times.

3604 Examiner Burchmore: Do you have a telephone or telegraph line for the operation of your road?

Mr. Kilpatrick: We have a telephone line.

Examiner Burchmore: With boxes along the road?

Mr. Kilpatrick: No, we have an instrument in the Iron Mountain station at Kensett, and our phone at Doniphan, and at the station in Searcy.

Examiner Burchmore: Does your logging train operate in a regular way over the Missouri and North Arkansas?

Mr. Kilpatrick: It is somewhat irregular. It *has* handled as an extra train.

Examiner Burchmore: But it makes one trip each way daily?

Mr. Kilpatrick: That is the interstate schedule, but some days we do not go out, as they may be laid up for some cause or another.

Examiner Burchmore: How many cars on that train as an average?

Mr. Kilpatrick: An average of 18.

Examiner Burchmore: I assume you do not carry the mail?

Mr. Kilpatrick: We do not.

Examiner Burchmore: Your annual report shows figures relative to your freight traffic—I presume your annual report for

3605 1910 has been filed with the Commission?

Mr. Kilpatrick: I believe it has.

Examiner Burchmore: Are you familiar with the figures as to the freight traffic?

Mr. Kilpatrick: Not as familiar as our Auditor.

Examiner Burchmore: Well, this contract with the Missouri and North Arkansas? Is it filed with the Commission?

Mr. Kilpatrick: I don't know, but my impression is that it is not. It is strictly an intra-state affair. May I ask you a question outside of the record? Does it need to be filed?

Examiner Burchmore: Why, I think not, that is, if it has no relation whatever to interstate traffic. I am not sure, but I think it does not need to be filed, but the examiners of the commission have access to it?

Mr. Kilpatrick: Oh, yes, we have always been perfectly open to all those things to anyone that comes around.

Examiner Burchmore: Do you publish any tariff of your net issues?

Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Filed with the Interstate Commerce Commission?

3606 Mr. Kilpatrick: Yes sir.

Examiner Burchmore: Reference will be made to the tariff files. Please state in your own way the basis of the joint rates on lumber over your line?

Mr. Kilpatrick: We have joint rates and divisions in connection with the Iron Mountain and Chicago, Rock Island and Pacific, and

the Missouri and North Arkansas to respective territories. The rates are the same and the divisons are the same.

Examiner Burchmore: Over the different roads?

Mr. Kilpatrick: Yes—we get three cents—a division of three cents to points east of the Mississippi river, and north of the Ohio river and on West point shipments we get a division of four cents. We actually handle that tonnage with our own power.

Examiner Burchmore: Are the rates from Doniphan the same as from Kensett over your line, as from Kensett over the Iron Mountain?

Mr. Kilpatrick: I think they are.

Examiner Burchmore: Are they the same from Searcy as on the Rock Island?

Mr. Kilpatrick: Yes sir.

3607 Mr. Kilpatrick: They are carried as a common point.

Examiner Burchmore: There are no milling in transit rates on your line?

Mr. Kilpatrick: None whatever.

Examiner Burchmore: And no possibility of using such rates?

Mr. Kilpatrick: We see no present action of any.

Examiner Burchmore: I ask the latter question because in another case, already heard, it developed that the Iron Mountain had under its power of attorney, given short lines, milling in transit rates, and several short lines were parties to the milling in transit rates without knowing it, and I thought possibly you might discover you were giving milling in transit rates?

Mr. Kilpatrick: Possibly so.

Examiner Burchmore: But you have no opportunity to use it?

Mr. Kilpatrick: No.

Examiner Burchmore: There is no other mill on your line?

Mr. Kilpatrick: No other mill. I want to put in there that there is a coal and wood yard located on our tracks in Searcy into which place we put a switch in for them. There is also a concrete block concern located on our tracks adjacent thereto and we serve them.

3608 Examiner Burchmore: You receive a division of three and four cents. Now, what service do you render for that division?

Mr. Kilpatrick: When a shipment moves by the Iron Mountain we transport the empty to the plant of the lumber company and we transport the load back and deliver it to them a distance of one and a half miles. When a shipment is routed by the Rock Island we perform the same service over a distance of five and a half miles. When a shipment is routed by the Missouri and North Arkansas we transport it six miles.

Examiner Burchmore: On these movements of lumber over the Doniphan Railroad, who issues the Bill of Lading?

Mr. Kilpatrick: The Doniphan, Kensett & Searcy Railway Company.

Examiner Burchmore: Where are they issued as a matter of fact?

Mr. Kilpatrick: At Doniphan.

Examiner Burchmore: By a clerk up there?

Mr. Kilpatrick: By a regular employee of the railroad.

Examiner Burchmore: Do you issue through bills?

3609 Mr. Kilpatrick: We do.

Examiner Burchmore: Which shows your company as the initial line and participating in the haul?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: How do you settle with connecting carriers; by an inter-line settlement?

Mr. Kilpatrick: Yes, sir, monthly.

Examiner Burchmore: That is true of all three connections?

Mr. Kilpatrick: Yes, sir. I have got the October settlement with me. Would you care to examine them?

Examiner Burchmore: I don't think so. You have a full line of stationery and forms, etc.? You have all that for the railroad?

Mr. Kilpatrick: Everything.

Examiner Burchmore: Where are the general offices and financial headquarters?

Mr. Kilpatrick: At Doniphan.

Examiner Burchmore: In the Lumber Company building?

Mr. Kilpatrick: Yes, sir.

Examiner Burchmore: In the same room?

3610 Mr. Kilpatrick: The office is quite commodious and the railroad enjoys a part of it.

Examiner Burchmore: Is it your endeavor to comply with all the Federal and State laws regarding common carriers?

Mr. Kilpatrick: We have done so to the best of our knowledge, both as to accident reports and hours of service—we follow all forms and make strict reports.

Examiner Burchmore: Are you an officer of the Saline River Railroad Company?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: Are you an officer of the Saline River Lumber Company?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: It is your understanding that these companies are also controlled by the Carter interests?

Mr. Kilpatrick: Mr. Carter is the chief executive of all of them.

Examiner Burchmore: Does Mr. Carter control any other lumber interests to your knowledge?

Mr. Kilpatrick: He has one other interest in Canada, but

3611 he is not the controlling member.

Examiner Burchmore: You stated there were no mills on the line?

Mr. Kilpatrick: No sir.

Examiner Burchmore: Is there anyone else who wants to get lumber on your line?

Mr. Kilpatrick: Nobody else that we know of; if so we would welcome them.

Examiner Burchmore: Is there anything else to be cut there?

Mr. Kilpatrick: No, there is no timber.

Examiner Burchmore: Did you testify with respect to the tonnage of the railroad?

Mr. Kilpatrick: No I have not. You had better let Mr. Smythe do that. He is more familiar with the figures.

Examiner Burchmore: Is there anything further?

Mr. Stocking: I want to ask a few questions.

Examiner Burchmore: All right.

Mr. Stocking: How large is the town of Searcy?

Mr. Kilpatrick: Three thousand inhabitants.

3612 Mr. Stocking: It is the county seat of White County?

Mr. Kilpatrick: It is.

Mr. Stocking: What industries are there at Searcy?

Mr. Kilpatrick: Searcy has—do you want me to repeat?

Mr. Stocking: State everything you think of.

Mr. Kilpatrick: An oil mill, an ice plant, a stave factory, and a concrete block concern; it has two wholesale grocery houses one of which does an annual business of $400,000.00.

Mr. Stocking: And it is a pretty good retail point for the surrounding country?

Mr. Kilpatrick: An exceptionally good one. One retail store I know of there does an annual retail business of $250,000.00.

Examiner Burchmore: I presume that company enables the Iron Mountain to get in there?

Mr. Stocking: That is just what I was getting to. In order to make one thing clear that I think was left uncertain, was the Rock Island going into Searcy before the Doniphan Kensett and Searcy Railway was built?

Mr. Kilpatrick: It was.

Mr. Stocking: Now prior to the construction of the

3613 Doniphan Railroad, how were shipments to Searcy over the Iron Mountain *belted*?

Mr. Kilpatrick: In the year 1906, in the early part, there was in existence a merchants' transportation company or mule line which enjoyed rates and divisions in connection with the Iron Mountain on traffic into Searcy. Shortly after we began the construction of the first mile and a half from Kensett to Doniphan and which construction was started prior to the incorporation, the rates and divisions with the mule line transportation company were cancelled. That is history and I wanted to get it in. It is quite important with the construction of the road and if you will bear with me we will go on with it.

Mr. Stocking: Go on.

Mr. Kilpatrick: We approached the parties in Searcy who were interested and owned this transportation company suggesting that our interests would probably be glad to construct a railroad from Kensett to Searcy for commercial purposes. Our advances in this direction were met with favor and we next interviewed Mr. Stith who was then Traffic Manager of the Missouri Pacific—

3614 Iron Mountain system—Mr. Stith advised us to build the road from Kensett to Searcy. He said at that interview

that it was contrary to the policy of his company to enter into any contracts prior to the construction of the road, as such actions theretofore had resulted in some boomerang proposition, casting reflection upon the Missouri Pacific Railroad. Mr. Stith however at that time stated that if we would build this piece of road that they would join us in endeavoring to get the Searcy business and would treat us in the matter of rates and divisions on the same basis as present rates and divisions into Searcy by way of Higginson and the C. R. I. & P.

Mr. Stocking: Right there I want to make it plain. The Iron Mountain runs to Higginson at points south of Kensett does it?

Mr. Kilpatrick: That is correct?

Mr. Stocking: And there it has a junction with the Rock Island?

Mr. Kilpatrick: Yes sir.

Mr. Stocking: And by arrangement with the Iron Mountain and Rock Island the Iron Mountain would give the Rock Island a division on all freight destined for Searcy?

3615 Mr. Kilpatrick: That is correct.

Mr. Stocking: And was there anything said in that conversation between you and the representative of the Iron Mountain about your taking the freight at Kensett if you would build that road, and giving you the division instead of the Rock Island?

Mr. Kilpatrick: That was the verbal understanding and has since been put into effect.

Mr. Stocking: Well then, when you built the road, did they cancel their divisions with the Rock Island and haul all of their freight by your road?

Mr. Kilpatrick: They did.

Mr. Stocking: And you have been carrying that freight ever since?

Mr. Kilpatrick: We have.

Mr. Stocking: All right. Go ahead.

Mr. Kilpatrick: Don't get away from Mr. Stith.

Mr. Stocking: All right, finish that.

Mr. Kilpatrick: In winding up the interview with Mr. Stith he said that if we at any time decided to sell this line, we were about to construct, they desired the first opportunity to purchase.

3616 Mr. Stocking: Then as I understand you, before you constructed this road from Kensett to Searcy, you notified the merchants and shippers of Searcy and were encouraged by them to build it for the purposes of their traffic, and you interviewed the officials of the Iron Mountain and were encouraged by them to build it, being assured that the Iron Mountain would cancel their division with the Rock Island and give you all their Searcy business?

Mr. Kilpatrick: That is correct.

Mr. Stocking: And they actually did so?

Mr. Kilpatrick: Yes, the citizens of Searcy, by way of encouragement to the line, raised the funds to purchase the right of way and station grounds and trackage yards within the corporate limits:

Mr. Stocking: Now, what kind of a road bed is that between Kensett and Searcy?

Mr. Kilpatrick: It is a rock bed and macadamized.
Mr. Stocking: A substantial railroad dump, is it?
Mr. Kilpatrick: Yes sir.
Examiner Burchmore: Does the Missouri and North Arkansas operate over your line? between Kensett and Searcy?
3617 Mr. Kilpatrick: No they parallel us.
Examiner Burchmore: Were they constructed before or after you?
Mr. Kilpatrick: After.
Examiner Burchmore: Do they participate in a traffic arrangement now with the Iron Mountain?
Mr. Kilpatrick: I believe they do have some division with them.
Examiner Burchmore: You have a considerable merchandise movement between Searcy and Kensett on your line?
Mr. Kilpatrick: Yes sir.
Examiner Burchmore: Does any merchandise move between Kensett and Doniphan?
Mr. Kilpatrick: A considerable movement.
Mr. Stocking: You comply with all the safety regulations?
Mr. Kilpatrick: Yes sir.
Mr. Stocking: You have stated that?
Mr. Kilpatrick: Yes sir.
Mr. Stocking: You keep your books as required by the rules of the Commission?
Mr. Kilpatrick: Entirely so yes sir.
Mr. Stocking: You issue not only intra-state but inter-
3618 state Bills of Lading?
Mr. Kilpatrick: We do.
Mr. Stocking: You have issued foreign bills?
Mr. Kilpatrick: Yes, we have shipped to Russia.
Examiner Burchmore: I think that is all brought out in my examination, except Russia.
Mr. Stocking: I wanted to get the foreign bills in there. Now, at the time that this road was projected, it was known that the Missouri and North Arkansas would parallel our line?
Mr. Kilpatrick: It was not.
Mr. Stocking: And the anticipated profits have been cut down by that competition?
Mr. Kilpatrick: Yes sir.
Mr. Stocking: We had reason to believe that we would do a larger commercial business even than we have done, because of the competition that has unexpectedly come in by the Missouri and North Arkansas?
Mr. Kilpatrick: That is correct. In addition thereto, we have never installed any passenger service because of the two lines already serving this town with from 8 to 12 trains per day,
3619 in and out; and we have felt that we could add little or nothing to that service, and to attempt to maintain it would be at a loss, for that reason.

3929 [illegible], was called as a witness and being first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: What is the total capital stock of the railroad—the Dominion Kenova & Searcy Railway Company?

Mr. Smythe: $100,000.00.

Examiner Burchmore: How much of that is issued and outstanding?

Mr. Smythe: All of it.

Examiner Burchmore: Issued for cash, how much?

Mr. Smythe: $25,000.00.

Examiner Burchmore: What dividends have you paid?

Mr. Smythe: None.

Examiner Burchmore: Did I ask you what the surplus was?

Mr. Smythe: No.

Examiner Burchmore: Have you any surplus?

Mr. Smythe: We have.

Examiner Burchmore: Explain that surplus—the amount of that surplus and where it is and what it represents?

Mr. Smythe: On June 30, 1910 we had a credit to surplus account of $13,961.14.

3932 Examiner Burchmore: How long did it take you to accumulate that surplus?

Mr. Smythe: The profits for the fiscal year just ending amounted to $9,961.73.

Examiner Burchmore: The road then is making money?

Mr. Smythe: Yes sir.

Examiner Burchmore: It is indebted, however, to the Lumber Company?

Mr. Smythe: Yes sir it is.

Examiner Burchmore: How that $9,000.00 take account of the interest of the debt.

Mr. Smythe: It is accrued profits after all charges have been made including interest due to the Lumber Company.

Examiner Burchmore: Now, is that a book surplus or cash surplus?

Mr. Smythe: Over half of it was cash on hand at the end of the fiscal year.

Examiner Burchmore: What became of that cash?

Mr. Smythe: At the present time?

Examiner Burchmore: Yes.

Mr. Smythe: The company is building an extension of the road seven miles long.

Examiner Burchmore: They are using that cash in increasing the line?

Mr. Smythe: Yes sir.

Examiner Burchmore: Are the supplies for this company purchased by the lumber company?

Mr. Smythe: No sir.

Examiner Burchmore: Purchased by the railroad company?

Mr. Smythe: Purchased by the railroad company, yes sir.

Examiner Burchmore: Do you perform any inter-change switching?

Mr. Smythe: We do at Searcy.

Examiner Burchmore: At $3.00 or $2.00 a car.

Mr. Smythe: Three Dollars a car.

Examiner Burchmore: Do you have any contract with any of the railroad companies we have referred to providing for rates or divisions aside from the trackage contract already mentioned.

Mr. Smythe: None that I know of.

Examiner Burchmore: Do you know of any, Mr. Kilpatrick?

Mr. Kilpatrick: No, our divisions are covered by open division, so that——

3623 Mr. Smythe: Nothing except what is on file with the commission.

Mr. Kilpatrick: If I may interrupt you we have a new trackage contract with the Missouri and North Arkansas which goes into effect on January 1, 1911 and runs for ten years on the basis of $1.00 a train mile.

Examiner Burchmore: Will you file that train mile contract with the commission?

Mr. Kilpatrick: Yes sir.

Mr. Stocking: You mean a copy of it?

Mr. Kilpatrick: If you feel it is necessary. This is simply for logging purposes.

Mr. Stocking: I can have it copied by the stenographer and handed to you before we close.

Examiner Burchmore: Hand it to the official reporter in the other room. Who are the officers and directors of the railroad company and what is their relation to the lumber company?

Mr. Smythe: The directors are C. J. Carter, W. L. Stocking, H. R. Kilpatrick, C. E. Emmert, A. E. Hartsell. The officers are C. J. Carter, President, C. E. Emmert, Vice-President, H. R. Kil-

3624 patrick, Secretary and Treasurer and also General Manager.

Examiner Burchmore: With the exception of Mr. Kilpatrick, these officers and directors occupy similar positions with the lumber company?

Mr. Smythe: I could not say as to that. Mr. Carter is also President of the Lumber Company; Mr. Stocking, Secretary, Mr. Kilpatrick: Treasurer of the Lumber Company.

Examiner Burchmore: Then I understand that the tap line corporation and the lumber corporation are substantially identical in interest, aside from any legal question of separation?

Mr. Stocking: Yes sir.

Examiner Burchmore: Is there any other statement you would care to make at this time, Mr. Smythe:

Mr. Smythe: Nothing, unless you want to find out about the tonnage—what percentage?

Examiner Burchmore: What percentage of the tonnage is furnished by the Doniphan Lumber Company approximately?

Mr. Smythe: About 73%.

Examiner Burchmore: What percentage of the revenue?

Mr. Smythe: This revenue—I had better correct that—73%

of the revenue is furnished by the Doniphan Lumber
3625 Company.

Examiner Burchmore: What percentage of the tonnage; have you that figured?

Mr. Smythe: 85%.

Examiner Burchmore: Have you given any testimony as to divisions?

Mr. Stocking: Yes sir.

Examiner Burchmore: And as to class and commodity rates?

Mr. Smythe: The tariffs are on file.

Examiner Burchmore: What are the class and commodity divisions? The same as the local rate?

Mr. Kilpatrick: Approximately 20 and 25%; 25% on Memphis territory and 20% on St. Louis territory.

Examiner Burchmore: What does that yield you in cents per hundred pounds in a general way?

Mr. Kilpatrick: You have got me there.

Examiner Burchmore: Do you get five or ten cents?

Mr. Kilpatrick: Yes, we have an arbitrary division sheet up until a very short time ago.

Mr. Smythe: It runs fifteen, twelve and ten cents per hundred weight—about that.

Examiner Burchmore: You are going to file your di-
3626 vision sheets in this case?

Mr. Stocking: I don't know. Does the commission want us to do it?

Mr. Kilpatrick: The Missouri Pacific issue division sheets and I presume they file them.

Examiner Burchmore: They are not ordinarily filed with the Commission. I suppose you need not file them until they are called for. I think that is all. Mr. Stocking may have some questions to ask in the morning. I request this, that you furnish a map of your line drawn to scale and showing this line fifty miles away, if you will, but you can cut out the scale, in between.

Mr. Kilpatrick: You mean this disconnected branch that we are building?

Examiner Burchmore: Yes. You heard this same request made of some other companies for a map?

Mr. Kilpatrick: Yes.

Examiner Burchmore: Please furnish the same kind of map I requested of the other companies?

Mr. Kilpatrick: Blue prints?

Examiner Burchmore: Yes, blue prints will do showing the
3627 mills, towns etc. and also we would like a statement of the tonnage of the road for the fiscal year ending June 30, 1910 to check with the statement showing the total tonnage of lumber for the Doniphan Lumber Company and the total amount of logs for that Company and showing the amount of other freight for that company and the amount of freight for the public. I wish if possible, and if not too much trouble, that you would supply that between the two lines—subdivide it and show the totals. By the two lines,

I mean your line to Doniphan and your line to Searcy. See if you cannot divide it.

Mr. Stocking: Do you understand what is wanted, Mr. Smythe?

Mr. Smythe: Yes, but what details do you wish?

Examiner Burchmore: You can show cotton for instance, and such commodities, but you need not show drygoods or merchandise; coal you might show; the others you can put under merchandise.

Mr. Stocking: You understand what the Examiner wants now?

Mr. Smythe: Yes.

Examiner Burchmore: A substantial compliance with the request is all that is necessary.

3628 *Adjournment.*

Whereupon at 5:30 o'clock p. m., an adjournment was taken until the next day, Wednesday, December 14th, 1910, at 9:30 o'clock a. m.

3629 NEW ORLEANS, LOUISIANA, *December* 14, 1910.

Examiner Burchmore: Mr. Kilpatrick, what is the approximate value of the mill at Doniphan?

Mr. Kilpatrick: Approximately two hundred and fifty thousand.

Examiner Burchmore: That includes the ground upon which it is built?

Mr. Kilpatrick: Everything.

Examiner Burchmore: What is the value of the buildings and machinery?

Mr. Kilpatrick: You mean everything exclusive of the real estate?

Examiner Burchmore: Exclusive of the land, yes.

Mr. Kilpatrick: Probably two hundred and twenty-five thousand.

Examiner Burchmore: Would it be possible to remove that mill to another location?

Mr. Kilpatrick: Part of it, yes; it was done.

Examiner Burchmore: When was that done?

Mr. Kilpatrick: In 1906, the saw-mill, part of it, was removed to its present site.

Examiner Burchmore: What is your impression as to the cost of that removal?

3630 Mr. Kilpatrick: You mean the erection, or just the actual transportation, and so on?

Examiner Burchmore: I mean the cost of removal, exclusive of the freight.

Mr. Kilpatrick: I couldn't give you any figures on that.

Examiner Burchmore: One hundred thousand dollars?

Mr. Kilpatrick: I wouldn't want to guess at it.

Examiner Burchmore: Has the Doniphan Lumber Company contemplated the erection of a mill at Latona?

Mr. Kilpatrick: No, sir.

Examiner Burchmore: What is the explanation for the maintenance of a mill at one point, namely, Doniphan, when the logs have to be brought in fifty miles by railroad?

Mr. Kilpatrick: When that mill was first located there, it was located on the bank of Little Red River. The railroad over which the railroad of the D. K. & S. operates log trains and has trackage rights, was not constructed, and it was contemplated that the mill be logged by river, and it was to a limited extent, and that proved somewhat unsuccessful, and when this railroad was built we established that arrangement and logged by rail.

Examiner Burchmore: As I unlerstand it, logs were
3631 brought by river to the mill?

Mr. Kilpatrick: They were when the mill first started.

Examiner Burchmore: They are no longer?

Mr. Kilpatrick: In limited quantity, they are.

Examiner Burchmore: Where is that from?

Mr. Kilpatrick: From about a hundred miles up the river.

Examiner Burchmore: Is that from the vicinity of Latona?

Mr. Kilpatrick: Not exactly, from that direction, yes, sir.

Examiner Burchmore: Are the timber holdings in the vicinity of Latona sufficient to justify the Doniphan Lumber Company to erect a mill at that point?

Mr. Kilpatrick: It would not be a mill of the capacity of the mill at the other point.

Examiner Burchmore: What is the total timber holdings of the Doniphan Lumber Company?

Mr. Kilpatrick: I would say, in acreage, sixty-five thousand acres, approximately.

Examiner Burchmore: How many feet?

Mr. Kilpatrick: Approximately two hundred and fifty million.

Examiner Burchmore: I think the question of divisions was fully developed yesterday, was it not?

3632 Mr. Kilpatrick: I think it was, yes, sir.

Mr. Duncan: With regard to the removal of the mill at Doniphan. How many houses has the Doniphan Lumber Company at Doniphan?

Mr. Kilpatrick: About seventy-five.

Mr. Duncan: Would it be practicable at all to remove these houses into the forest?

Mr. Kilpatrick: It would not.

Mr. Duncan: As to the cost of moving the mill, I will ask you if as a matter of fact the mill proper, that is to say, the machinery located there, and as you state moved there, the plant cost one hundred thousand dollars and we bought it for ten?

Mr. Kilpatrick: That is correct.

Mr. Duncan: Isn't it a fact that it would be practically ruinous to that two hundred and fifty thousand dollar investment there to undertake to take it up and remove it into the forest now?

Mr. Kilpatrick: Yes, it would be.

Mr. Duncan: One thing I wanted you to explain about your testimony of yesterday. You said yesterday that the railway company charges the mill company two cents per hundred pounds. Is
3633 that right?

Mr. Kilpatrick: It is.

Mr. Duncan: Isn't it a fact that that charge is made in pursuance of the rule made by the Railroad Commission of Arkansas, allowing that minimum charge upon raw material, on the condition that the product of it shall be shipped over the railroad that makes that agreement?

Mr. Kilpatrick: It is.

Mr. Duncan: The railroad company, as you said, pays the M. & N. A. three-fourths of a cent on that same tonnage, so the net earning to the railroad, to the Doniphan, Kensett & Searcy is one and one-quarter cents per hundred pounds?

Mr. Kilpatrick: That is correct.

Mr. Duncan: You stated yesterday that the service which the Doniphan, Kensett & Searcy railway rendered for which it got the divisions from the trunk lines, consisted in the carriage of the manufactured product from the mill to the respective lines. I will ask you if it is not true that it hauls those logs from distances varying from fifteen to fifty miles to the mill to be manufactured, initiating that business, at this low price of one and one-quarter cents, which is not in itself compensatory?

3634 Examiner Burchmore: Do you contend that this division on the lumber is supposed to also cover the expense of moving the logs into the mill?

Mr. Duncan: The fact is that——

Examiner Burchmore: Is that the purpose?

Mr. Duncan: I will say frankly to your Honor, I don't understand the proposition in its full scope. I understood it was.

Examiner Burchmore: There is no milling and transit rates on the line?

Mr. Kilpatrick: We have none, no.

Examiner Burchmore: Well, if a part of these divisions is intended to take care of the movement of the logs in, or if the effect of those divisions is to take care of a part of the expense of moving the logs in, does it not mean that the division — the value of the service rendered?

Mr. Kilpatrick: No, it does not, because the extent of the output is carried five and four and a half miles, and that is not an unreasonable amount to pay for that service. The Court tariff of Arkansas, which is now in effect, I think, allows four and four and a half for the same service.

3635 Mr. Duncan: The Doniphan, Kensett & Searcy has exercised the right of eminent domain in the Courts of Arkansas, has it not?

Mr. Kilpatrick: It has.

Mr. Duncan: Does the agent they have at Searcy solicit freight business from the industries and merchants of Arkansas?

Mr. Kilpatrick: He does.

Mr. Duncan: He obtains it and ships it over the road?

Mr. Kilpatrick: He does.

Mr. Duncan: The Doniphan, Kensett & Searcy is assessed by the State of Arkansas as a railroad?

Mr. Kilpatrick: It is.

Mr. Duncan: And pays those taxes?
Mr. Kilpatrick: It does.
Mr. Duncan: Who loads the logs on the car?
Mr. Kilpatrick: The Doniphan Lumber Company.
Mr. Duncan: The mill company does not perform that service?
Mr. Kilpatrick: The railroad does not.
Mr. Duncan: The railroad company does not perform that service?

Mr. Kilpatrick: It does not.

3636 Mr. Duncan: The road, as you stated yesterday, is rock ballast and of a permanent character?

Mr. Kilpatrick: It is.
Mr. Duncan: There is a public at either end of the line to be served by a common carrier?
Mr. Kilpatrick: There is.
Mr. Duncan: The company holds itself out as willing to serve the public as a common carrier, and does serve them as a common carrier?
Mr. Kilpatrick: It does at all times.
Mr. Duncan: And under the laws of Arkansas, is obligated to do so?
Mr. Kilpatrick: It is.
Mr. Duncan: Taking the character of the road and the towns at the termini of it into consideration, is it in your opinion a railroad and common carrier that will be in existence as a common carrier when the saw-mill itself will have passed away by reason of the exhausting of the timber?
Mr. Kilpatrick: I believe that the railroad will continue in operation regardless of the saw-mill operations.

Examiner Burchmore: Is that true of the line north of

3637 Kensett?

Mr. Kilpatrick: Well, I am not so sure, but there are some indications at this time that it will remain as a railroad.

Examiner Burchmore: Suppose that the Iron Mountain railroad should cancel the divisions with your road on lumber, would the result of that cancellation, in your opinion, be the removal of the mill from Doniphan to Latona?
Mr. Kilpatrick: I don't think it would be; I think it is an impracticable thing to do.
Examiner Burchmore: What is the total volume of logs, approximately, that is floated down the river at the present time, or for the past year?
Mr. Kilpatrick: During the floating or driving season, approximately three million feet.
Examiner Burchmore: What proportion does that bear to the amount of logs brought down by railroad?
Mr. Kilpatrick: About one-eighth.
Mr. Duncan: The amount that would be brought down the river would grow less, and finally disappear entirely, in a short time?

3638 Mr. Kilpatrick: That has been the case.

Mr. Duncan: It has been found impracticable to log by river?

Mr. Kilpatrick: The timber that is coming down the river now is practically inaccessible, and must come that way.

Mr. Duncan: Mr. Examiner, I have our President here. I have nothing to ask him, I submit him to you if you want to ask him anything.

Examiner Burchmore: I don't think there are any further questions that need be asked about this company.

Mr. Duncan: Mr. Kilpatrick, you have a statement there showing the tonnage of the road since our last annual report?

Mr. Kilpatrick: It is our last settlement for October.

Mr. Duncan: I would like to have you read that into the record, it is very short.

Mr. Kilpatrick: Our carload movement in October, we have four cars of coal, four cars of flour, two cars of hay, two cars of cotton bagging, one car of shingles, two cars of potatoes, one car of pickles, one car of corn, one car of emigrant outfit, two cars of cotton ties, one car of hydrants, one car of soda fixtures, one car of ce-

3639 ment, and two cars of brick. We had outbound that month, six cars of cotton, eight cars of livestock.

Examiner Burchmore: How much lumber?

Mr. Duncan: This was the commercial business. I didn't ask the lumber tonnage sheet, your Honor.

Mr. Kilpatrick: Approximately fifty-five cars of lumber outbound.

Examiner Burchmore: Was any of that carload of shingles, the emigrant outfit, or the cement or brick,—were any of those shipments either intended for the use of the Doniphan Lumber Company, or its employés?

Mr. Kilpatrick: Not any of it.

Examiner Burchmore: For whom was the carload of flour?

Mr. Kilpatrick: I think it was for the Searcy Transfer Company.

3640 *Paragould & Memphis Railway Company.*

Examiner Burchmore: I will call the case of the Paragould & Memphis Railway.

Examiner Burchmore: The Paragould & Memphis Railway Company case called, and not present.

Mr. Jeffries: It is so small and so unimportant as far as the Iron Mountain is concerned, I haven't it mentioned on my list.

Mr. Perkins: The Iron Mountain has no arrangements with it at all.

Examiner Burchmore: I think that you withdrew those arrangements, if I am not mistaken. It is Mr. T. N. Vail's road, and is up there in Arkansas.

Mr. Perkins: I think it connects with the Paragould and Southwestern, and they have some kind of connection with the Paragould & Frisco, but not with the Iron Mountain.

3641 *Prescott & Northwestern Railroad Company.*

Mr. McRae: I would like the record to show that this testimony is taken in the case of I. C. 3512, which is consolidated with the general record on the petition of the Prescott & Northwestern Railroad Company and H. M. Stevens, Complainants, against the St. Louis, Iron Mountain and Southern and the Kansas City Southern Railway Company, and upon the separate answers filed before the Commission of the St. Louis, Iron Mountain & Southern Railway Company and of the Kansas City Southern Railway Company. The only issue involved in these pleadings are the general issues raised as to the through rates and tap lines. Nevertheless these petitions were filed and answers made, and we want the record to show that the testimony is submitted upon these pleadings.

W. M. BEMIS was called as a witness, and having been duly sworn, testified as follows:

Mr. McRae: We will try to develop most of the case through Mr. Bemis, in order to expedite the matter, but if there is any question in regard to traffic matters which he cannot answer, we will call Mr. Helbig.

Examiner Burchmore: Are you an officer of the Prescott
3642 & Northwestern Railroad Company?

Mr. Bemis: I am.

Examiner Burchmore: What officer?

Mr. Bemis: President.

Examiner Burchmore: Are you also an officer of the Ozan Lumber Company?

Mr. Bemis: I am.

Examiner Burchmore: What is the geographical location of this line?

Mr. Bemis: It begins at Prescott, in Nevada County, Arkansas, and runs in a northwesterly direction through Nevada, Hempstead and Pike counties, to its terminus at Helbig.

Examiner Burchmore: Helbig?

Mr. Bemis: Helbig, H-e-l-b-i-g.

Examiner Burchmore: Where is that with reference to Little Rock, Texarkana, or some other well known point?

Mr. Bemis: Ninety-six miles south of Little Rock, and forty-eight miles north of Texarkana.

Examiner Burchmore: Your junction with the Iron Mountain is at Prescott?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Has your line a junction with any
3643 other railroad?

Mr. Bemis: It has at Tokio, with the Memphis, Dallas & Gulf.

Examiner Burchmore: Is that the line formerly known as the Memphis, Paris & Gulf?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: When was the name changed?

Mr. Bemis: Several months ago; I don't know just when.

Examiner Burchmore: What is the character of territory served by this line, is it a farming country?

Mr. Bemis: Originally a timber country, very rough, and in the last fifteen or eighteen years has developed to a large area in an agricultural way after the timber was taken off.

Examiner Burchmore: Where is the mill of the Ozan Lumber Company located?

Mr. Bemis: It is on the Prescott & Northwestern, at Dian, about one mile from the Iron Mountain station.

Examiner Burchmore: How far is it from the rails of the Iron Mountain?

Mr. Bemis: The centre of the mill proper is probably sixteen or seventeen hundred feet.

3644 Examiner Burchmore: Well, what is the distance from the eastern fence of the mill yard to the Iron Mountain?

Mr. Bemis: The mill yard is not fenced.

Examiner Burchmore: Well, the eastern boundary.

Mr. Bemis: The eastern boundary is about a thousand feet.

Examiner Burchmore: Is there any private spur-track running from the Iron Mountain into the mill yard?

Mr. Bemis: No, Sir.

Examiner Burchmore: What other lumber industries are there along the line?

Mr. Bemis: H. M. Stevens has a mill at Blevens, Arkansas, E. T. Wells at Wallaceburg, Kilgore Lumber Company at Kilgore, D. Scott at Westbrook, Brooks Reece Lumber Company at Norvelle, W. J. Cantley at Helbig.

Examiner Burchmore: Any industries at Wortham?

Mr. Bemis: No, Sir.

Examiner Burchmore: There formerly were mills there?

Mr. Bemis: I couldn't say, I don't recognize that name.

Examiner Burchmore: Wortham.

Mr. Bemis: Not in a milling way.

Examiner Burchmore: Is there anything at Dotson?

Mr. Bemis: There was a mill at Dotson; whether they are
3645 still operating or not, I don't know, I don't think they are.

Examiner Burchmore: A small mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Do you know whether they have closed down?

Mr. Bemis: I know they have not been running for some time.

Examiner Burchmore: Any other mills or industries on the line?

Mr. Bemis: I think that includes them all.

Examiner Burchmore: Any staves or stave bolts made along the line?

Mr. Bemis: Stave bolts are shipped off the line; staves are made and shipped.

Examiner Burchmore: Are there any private railroad or tram lines connected with the Prescott & Northwestern?

Mr. Bemis: That of the Ozan Lumber Company.

Examiner Burchmore: Where does it connect?

Mr. Bemis: Their main line connects at Helbig, and runs about eight miles northwest to Cox. From points on that line, the logging spurs are run out.

Examiner Burchmore: Is that private tram-road owned by
3646 the Ozan Lumber Company?

Mr. Bemis: The rail fastenings were furnished by the Prescott & Northwestern. The ties and all other things necessary to the construction and operation, are furnished by the Ozan Lumber Company.

Examiner Burchmore: Who operates this private tram?

Mr. Bemis: The Ozan Lumber Company.

Examiner Burchmore: With its own locomotives?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is there any payment for the use of those rails?

Mr. Bemis: They pay the Prescott & Northwestern one dollar per thousand for the haul of logs on the main line between Cox and Helbig; this dollar per thousand also includes the rails that are furnished, the fastenings and cars.

Examiner Burchmore: But I thought the lumber company operated the private tram-road?

Mr. Bemis: The lumber company brings the logs with its own engines up to the main line between Cox and Helbig; the main line then of the Prescott & Northwestern takes these logs and carries them to Helbig.

3647 Examiner Burchmore: We will develop that part of the case later. What is the Pike County Lumber Company?

Mr. Bemis: They were absorbed by the Ozan Lumber Company.

Examiner Burchmore: When were they absorbed?

Mr. Bemis: From the purchase of their stock.

Examiner Burchmore: Recently?

Mr. Bemis: Well, in the last twelve or fourteen months.

Examiner Burchmore: Are there any other private tram roads connecting with your line?

Mr. Bemis: Not at this time.

Examiner Burchmore: There were formerly other connections?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: When was the Prescott & Northwestern Railroad first constructed, and how much of it was built originally?

Mr. Bemis: The Prescott & Northwestern was organized on October 16, 1890, by R. L. Powers, W. B. Waller, and other citizens of Prescott. The road had been completed a distance of eight or nine miles, and the then owners were then either unable or unwilling to make further necessary extensions. They became involved in litigation and sold the road to Benjamin Whitaker, and other citizens of Prescott.

3648 Examiner Burchmore: In what year was this sale?

Mr. Bemis: In January 1892.

Examiner Burchmore: The first eight or nine miles of the road was constructed by contractors hired by these parties?

Mr. Bemis: I don't know.

Examiner Burchmore: When was the mill at Dian first opened?

Mr. Bemis: The mill was constructed,—construction begun about the First of the year 1890.

Examiner Burchmore: Then the mill and the original railroad of the Prescott & Northwestern were opened about the same time?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Were they part of the same enterprise?

Mr. Bemis: No, Sir. The milling company had no interest in the road at its organization.

Examiner Burchmore: When was the road extended beyond this eight or nine miles?

Mr. Bemis: Extensions were made from time to time, I can't say just when, I can't give you just the time.

3649 Examiner Burchmore: When did the line reach Helbig?

Mr. Bemis: I think in 1906, some time in 1906.

Examiner Burchmore: So substantially the whole of the present line was completed in 1906?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: When was the railroad company incorporated as a common carrier?

Mr. Bemis: October 16, 1890.

Examiner Burchmore: How was the Railroad Company originally financed, what was its original capital stock, and how much was sold, and who furnished the money?

Mr. Bemis: The capital stock was one hundred and twenty-five thousand dollars.

Examiner Burchmore: In the beginning.

Mr. Bemis: In the beginning, I know nothing as to the manner nor the method of financing it at that time.

Examiner Burchmore: Please state in your own way the history of the financial side of this corporation, as fully as you can.

Mr. McRae: Let me ask him a question right there. You know in 1902 how much stock was issued, do you know?

Mr. Bemis: In 1902? Yes, Sir, in 1902.

3650 Mr. McRae: State what that was.

Mr. Bemis: Thirty thousand dollars. The railroad was organized by these citizens of Prescott for the purpose of developing the territory lying northwest of Prescott, as I understand it. They induced Bemis and Whitaker to build a mill on their line at Prescott, and under some arrangement of which I have no knowledge, R. L. Powers was to furnish logs. The milling company, or the milling interest, had no interest in the road.

Examiner Burchmore: Direct or indirect?

Mr. Bemis: Direct or indirect, except for some money that was loaned the railroad. Mr. Powers and the railroad were unable to go ahead with their contract with Bemis and Whitaker, were unable to make further extensions and furnish the timber, and in 1892 the road was reorganized, the firm of Bemis & Whitaker taking on a con-

trolling interest in the railroad company. There were at that time some twelve or fourteen local stockholders. The capital stock of the company was reduced at that time to thirty thousand dollars, that being the estimated value of the road at that time.

Examiner Burchmore: Of the eight or nine miles of road?

3651 Mr. Bemis: Yes, sir.

Examiner Burchmore: Bemis & Whitaker were bought out by the Ozan Lumber Company, or, is the Ozan Lumber Company merely the incorporation of the previous owners?

Mr. Bemis: Bemis & Whitaker were bought out by the Bemis interests. That is wrong. The Ozan Lumber Company bought out Bemis & Whitaker.

Examiner Burchmore: And at the same time they bought out Bemis & Whitaker, they bought out the controlling interest of the railroad?

Mr. Bemis: I don't know that the purchases were identical in point of time; I don't know as to that.

Examiner Burchmore: I assume that the Prescott & Northwestern at the present time is substantially controlled, from the ownership of stock, by the Ozan Lumber Company or its stockholders.

Mr Bemis: The stockholders in both companies are identical.

Examiner Burchmore: And hold their shares in proportion?

Mr. Bemis: Exactly.

Examiner Burchmore: How long has that condition maintained?

Mr. Bemis: That has been practically the condition since

3652 the Ozan Lumber Company, or the stockholders of the Ozan Lumber Company, have owned the road.

Examiner Burchmore: How many years, since 1906?

Mr. Bemis: Oh, yes, Sir; that has been since 1901.

Examiner Burchmore: The stock was reduced to thirty thousand dollars in 1892, I believe you say?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Was there any bonded indebtedness at that time?

Mr. Bemis: Not that I know of.

Examiner Burchmore: What increase, or increases, have been made in the capital stock since that time?

Mr. Bemis: None whatever.

Examiner Burchmore: So the present capitalization is thirty thousand dollars?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What bonds have been issued?

Mr. Bemis: No bonds. There is a mortgage for three hundred and fifty thousand dollars that has been given to the Ozan Lumber Company for money borrowed.

Examiner Burchmore: And interest is paid on that indebtedness?

3653 Mr. Bemis: It is charged to them, it is not paid.

Examiner Burchmore: Well, that practically amounts to bonds, it is the same thing in result. And out of this three hundred and fifty thousand dollars, the additional lines have been constructed?

Mr. Bemis: No, Sir; at the time the mortgage was given the Prescott & Northwestern owed the Ozan Lumber Company a little more than the three hundred and fifty thousand dollars.

Examiner Burchmore: That indebtedness has since been reduced out of the surplus earnings?

Mr. Bemis: No, Sir; it has since increased two hundred and twenty thousand dollars.

Examiner Burchmore: What is the present indebtedness?

Mr Bemis: Five hundred and seventy odd thousand dollars.

Examiner Burchmore: Out of that five hundred and seventy odd thousand dollars, these new additions and improvements have been made?

Mr. Bemis: The railroad company has practically no credit, and the Ozan Lumber Company has financed it and furnished
3654 the money from time to time, both for construction and equipment. The railroad has never earned anything, practically.

Examiner Burchmore: Is the vice-president of the lumber company at the present time also vice-president of the railroad company?

Mr. Bemis: No, Sir.

Examiner Burchmore: What officers are common to both companies?

Mr. Bemis: A. C. Bemis is manager of the Prescott & Northwestern, and vice-president of the Ozan Lumber Company.

Mr. McRae: Aren't you mistaken about that, isn't he secretary?

Mr Bemis: I am, he is secretary.

Examiner Burchmore: Of which company?

Mr. Bemis: Of the Ozan Lumber Company. W. M. Bemis is president of both companies. J. W. Bemis is vice-president of the Ozan Lumber Company, and O. H. Helbig is secretary and treasurer of the Prescott & Northwestern.

Examiner Burchmore: The two last named gentlemen are not officers of the lumber corporation?

Mr. Bemis: No, Sir, Mr. Helbig is secretary and treasurer of the Prescott & Northwestern, and has no connection with the
3655 Ozan Lumber Company.

Examiner Burchmore: Are you the Mr. Bemis of the firm of Bemis & Whitaker?

Mr. Bemis: No, Sir, that was my father.

Examiner Burchmore: Aside from the question of legal separation of the two companies, I understand that in a substantial sense the tapline corporation and the lumber company are practically identical in interest, from your statement. Leaving aside any question of the legal separation, the existence of two entirely separate and distinct corporations, they are controlled by the same interests, and substantially the same in interest?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: I think that is a fair statement, Mr. McRae

Mr. McRae: The fact is that with the exception of Mr. Helbig

who has no connection with the Ozan Lumber Company, the stock is held in the same proportion in both companies.

Examiner Burchmore: How did Mr. Helbig acquire his stock in the railroad company?

Mr. Bemis: I think the share was given him for the purpose of qualifying him as an officer of that company.

3676 Examiner Burchmore: What is the mileage of the Prescott & Northwestern Railroad Company at the present time?

Mr. Bemis: Forty-one miles.

Examiner Burchmore: Is that all main line?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Our report indicates forty-four miles of standard gauge road.

Mr. Bemis: Three miles of siding.

Mr. Berlin: I would be glad to see the report, if it is different *to* this.

Examiner Burchmore: No, the figures agree, with that explanation. Are there any extensions at the present time seriously contemplated?

Mr. Bemis: No, Sir, we have discussed at various times possible extensions, but at this time there is nothing contemplated in the way of an extension, unless it be an extension west from Highland, and that would depend entirely upon the results in the next year or two in coal and wood growing.

Examiner Burchmore: What is the nearest approach that you make to the line of the Queen & Crescent?

3677 Mr. Bemis: I can't say; I think it is fifteen or twenty miles.

Examiner Burchmore: Any river between?

Mr. Bemis: I don't know.

Examiner Burchmore: You haven't actively contemplated any connection with that road?

Mr. Bemis: No, Sir; it has been talked of just in a general way, but there has been no serious consideration in that direction.

Examiner Burchmore: Does the Prescott & Northwestern hold any trackage rights over the Iron Mountain?

Mr. Bemis: No, Sir.

Examiner Burchmore: Does the Ozan Lumber Company enjoy any trackage rights over the Prescott & Northwestern?

Mr. Bemis: No, Sir.

Examiner Burchmore: What is the weight of rail of which this railroad is constructed?

Mr. Bemis: Fifty-six and sixty-three pounds, with the exception of about two miles of forty pound.

Examiner Burchmore: Where is that forty pound rail, at the end of the line?

Mr. Bemis: No, Sir; it is between Westbrook and Belton.

3678 Examiner Burchmore: I observe you have two lines that might be described as branch lines.

Mr. Bemis: They have been abandoned, the rails taken up.

Examiner Burchmore: So at the present time there is a single main line between the two termini?

Mr. Bemis: Prescott to Helbig.

Examiner Burchmore: There are no branches?

Mr. Bemis: No, Sir.

Examiner Burchmore: Are there any heavy grades on the line, or is it pretty well graded?

Mr. Bemis: We have some heavy grades on the western end of the line. The character of the country is such as to make a low grade line almost impossible on account of the excessive cost. We have one heavy grade on the western end of the line, but this can be easily reduced, and will be, if we ever get money enough to do it.

Examiner Burchmore: Well, without going into the particulars of ballast, curves, etc., will you say that this road is substantially as well constructed as the branch lines of the principal carriers from the southwest through Arkansas?

Mr. Bemis: I have often heard those that traveled over
3659 both lines say that ours was the best.

Examiner Burchmore: Better than the Iron Mountain main line.

Mr. Bemis: Better than the Iron Mountain branch lines.

Examiner Burchmore: Better that most of the Iron Mountain branch lines?

Mr. Bemis: I wouldn't say that.

Examiner Burchmore: What station buildings have you on the line?

Mr. Bemis: We have a station on building at Dian that is used jointly by the Ozan Lumber Company and the Prescott & Northwestern; we have a station at Blevins, a station at Belton, Tokio, Highland and Norvelle.

Examiner Burchmore: You mean station buildings?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What is the character of these buildings?

Mr. Bemis: They serve the purpose. They were built for that purpose alone, with one exception, that at Highland.

Examiner Burchmore: And that at Dian?

Mr. Bemis: And that at Dian, yes, Sir.

Examiner Burchmore: Well, with the exception of those
3660 two buildings, are the stations a small frame structure?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: With agents in them?

Mr Bemis: No agent who occupies the station all of the time, except at Norvelle and Tokio.

Mr. McRae: And Prescott.

Mr. Bemis: And Prescott.

Examiner Burchmore: Did you mention Prescott as a station building?

Mr. Bemis: And Dian.

Examiner Burchmore: Dian and Prescott are about the same thing?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Have you any track scales?

Mr. Bemis: No, Sir.

Examiner Burchmore: You have warehouses at these stations for the receipt and delivery and storage of L. C. L. freight?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: How many locomotives has the railroad company? And what other equipment?

Mr. Bemis: We have two 8-wheelers weighing 35 tons; one 4-wheeler switch engine weighing 25 tons; two 10-wheelers
3661 weighing 55 tons, and one Mogul weighing 62 tons, and 103 cars of all descriptions.

Examiner Burchmore: Itemize those cars.

Mr. Bemis: 40 flat-cars, 13 coal cars, all of which are being converted into flat-cars, 21 box cars, 20 skeleton cars that are not now in use, 7 gravel cars, 1 caboose and 1 combination passenger and baggage car.

Examiner Burchmore: Those gravel cars, are they used for hauling gravel for the right of way?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: There is no gravel bed on your line that sends out gravel on the Iron Mountain?

Mr. Bemis: There is a gravel bed on our line in connection with the Dallas & Gulf. A large quantity of gravel was delivered to the Kansas City Southern and Frisco.

Examiner Burchmore: Was this sold to these railroads, or transported for the public?

Mr. Bemis: The gravel was used almost entirely by the Kansas City Southern and Frisco, for ballasting purposes.

Examiner Burchmore: Who owned the gravel beds?

Mr. Bemis: They belonged to a party named McMahon, and I think the Ozan Lumber Company is claiming an interest in
3662 forty acres.

Examiner Burchmore: Is the Ozan Lumber Company selling any gravel?

Mr. Bemis: If it is finally determined that they have a right or an equity in that property, I suppose they will sell it, I don't know.

Examiner Burchmore: Are your cars equipped with the necessary safety devices required by the Acts of Congress?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is there any telephone or telegraph service on the road for the dispatching of trains and the transaction of railroad business?

Mr. Bemis: Telephone service.

Examiner Burchmore: With instruments in your various stations?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is that telephone line owned by the railroad company?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Are there any wires leased to the lumber company?

Mr. Bemis: No, Sir.

3663 Examiner Burchard: Does the lumber company use the wires?

Mr. Bemis: Should the occasion arise.

Examiner Burchmore: How many crews, how many section gangs are engaged in track work on the road?

Mr. Bemis: We have four section gangs.

Examiner Burchmore: Do they spend any part of their time at work on the private logging-road of the Ozan Lumber Company?

Mr. Bemis: No, Sir.

Examiner Burchmore: You have how many station agents?

Mr. Bemis: Six.

Examiner Burchmore: Those men devote their entire time to agency work, or are some of them agents located at station towns?

Mr. Bemis: Mr. Helbig can better answer that question.

Examiner Burchmore: You may answer now, Mr. Helbig.

Mr. Helbig: I think they are all merchants in a way, unless it is the one at Tokio, I don't know whether he is engaged in business, or not.

Examiner Burchmore: Are they paid on a commission basis?

Mr. Helbig: Our agent at Tokio is on a salary.

3664 Examiner Burchmore: Are they employed also by the lumber company?

Mr. Helbig: No, Sir.

Examiner Burchmore: The arrangement made with those agents who devote only a part of their time to the railroad service, is substantially the same as the arrangement made by some trunk lines for agencies at small towns?

Mr. Helbig: Yes, Sir.

Examiner Burchmore: How many train crews have you, Mr. Bemis?

Mr. Bemis: We have two.

Examiner Burchmore: Only two train crews for seven or eight locomotives?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What employés are there in the general office? First, let me ask: The general office of the railroad company is in the same rooms and the employés mingle with those of the lumber company?

Mr. Bemis: The general office is in the same building, of which building the Prescott & Northwestern practically occupy three rooms out of five. The rooms are communicating, and, of course, the employés of both commingle.

3665 Examiner Burchmore: How many clerks are there in the general office of the railway company who devote their entire time to the railway service?

Mr. Bemis: There is one.

Examiner Burchmore: And that clerk receives his entire compensation *for* the railroad company?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Are there any joint employés?

Mr. Bemis: Mr. L. P. Beidelman, the Auditor, is an employé of the Ozan Lumber Company, who performs the service for the Prescott & Northwestern but receives no compensation, getting his entire pay from the Ozan Lumber Company.

Examiner Burchmore: Does the railroad company pay the lumber company anything on account of his services?

Mr. Bemis: No, Sir.

Examiner Burchmore: Do you run any passenger trains? If so, what are they? Are they run on regular schedules?

Mr. Bemis: We run a train which is usually a passenger train, but which we at times make a mixed train of when our other train has more than it can take care of.

Examiner Burchmore: The other train being a freight train?

3666 Mr. Bemis: Yes, Sir; a mixed train.

Examiner Burchmore: Well, you have one mixed train and one train that is purely a passenger train at times, and at other times is also a mixed train?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Are these trains run on regular schedule?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Have you a time table?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Will that be filed in evidence.

Mr. Bemis: Yes, Sir.

Examiner Burchmore: How many freight, or logging trains, do you run daily aside from the two trains just referred to?

Mr. Bemis: Our mixed train hauls logs, local freight and carload freight of all classes.

Examiner Burchmore: Do you have any other freight trains?

Mr. Bemis: At times we have to send out extras to clean up if enough stuff accumulates.

Examiner Burchmore: What is the average, or usual, number of cars for this mixed train?

Mr. Bemis: Ten or fifteen cars.

3667 Examiner Burchmore: How many of these are logs?

Mr. Bemis: Usually ten cars.

Examiner Burchmore: That is the extent of the daily movement of logs?

Mr. Bemis: It is at this time.

Examiner Burchmore: Is it the usual extent the year round?

Mr. Bemis: Sometimes, when we are accumulating logs in the pond, we operate an additional train.

Examiner Burchmore: And at other times there is a corresponding reduction?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Do you handle the United States mails?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: You have several post-offices along the line?

Mr. Bemis: We have nine post-offices along the line.

Examiner Burchmore: Does any express operate over your line?
Mr. Bemis: The Wells-Fargo.
Examiner Burchmore: Under a contract?
3668 Mr. Bemis: Yes, Sir.
Examiner Burchmore: Your train conductors are their messengers?
Mr. Bemis: Yes, Sir.
Examiner Burchmore: Your agents act also as agents of the express company?
Mr. Bemis: Yes, Sir.
Examiner Burchmore: What is the extent of your passenger traffic? State it per day, month or year, per train. The annual report shows the total passenger mileage?
Mr. Bemis: Yes, Sir. Our passenger revenue for 1909-1910 was $6,305.04.
Examiner Burchmore: That was for one fiscal year?
Mr. Bemis: Yes, Sir.
Examiner Burchmore: Do the passengers travel on tickets as a usual thing?
Mr. Bemis: We try to have them.
Examiner Burchmore: Do you charge excess cash fare; do you make an extra charge where a cash fare is paid on the train?
Mr. Bemis: I don't think we do; I don't think that under the law we are permitted to.
3669 Mr. McRae: Don't you know that under the law you cannot?
Examiner Burchmore: Are employés of the mill company, or other employés of the Ozan Lumber Company transported free of charge?
Mr. Bemis: No, Sir.
Examiner Burchmore: Suppose they are traveling on lumber company business, is fare paid for them?
Mr. Bemis: It may be possible that there has been some arrangement for the transportation of employés of the Ozan Lumber Company. Mr. Helbig can answer that question.
Mr. Helbig: All the Ozan hands. We do not pass anybody but our own employés.
Examiner Burchmore: I suppose you issue passes to some employés on your line?
Mr. Helbig: Not to employés. We issue sometimes complimentary passes.
Examiner Burchmore: You have a less than carload traffic?
Mr. Bemis: Yes, Sir.
Examiner Burchmore: What is the extent of that traffic, in a general way.
Mr. Bemis: I have the number of passengers carried in 1910.
3670 Examiner Burchmore: You may state that.
Mr. Bemis: Fifteen thousand, four hundred and eighty-seven passengers carried.
Examiner Burchmore: That is for the fiscal year 1910?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: I didn't ask,—it is understood, of course, that any statistics given in the annual report will be referred to by the Commission as there set out.

Mr. McRae: I would like it understood that all facts stated in that report will be made part of the record.

Examiner Burchmore: Any tariff or record on file with the Commission may be referred to by Counsel, as though it was a part of the record.

Mr. McRae: We would like to have it understood that it is now made a part. And Mr. Bemis can give that, if he desires.

Examiner Burchmore: What is that?

Mr. McRoe: The passenger traffic.

Examiner Burchmore: He has given that.

Examiner Burchmore: Now, the less than carload traffic, Mr. Bemis?

Mr. Bemis: I can't give the earnings on less than carload stuff.

3671 Examiner Burchmore: Your annual report shows the total carload traffic, does it not?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Does it not show the total less than carload? Possibly it don't show the total carload traffic, I thought it did.

Mr. Bemis: I don't think it does.

Examiner Burchmore: Well, give me some idea on that subject.

Mr. Bemis: The inbound tonnage last year was 6827 tons; the outbound, other than the tonnage derived from the Ozan Lumber Company, was 34,674 tons.

Examiner Burchmore: That is the total tonnage, carload and less than carload?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Exclusive of the Ozan Lumber Company outbound lumber?

Mr. Bemis: Yes, Sir, and logs.

Examiner Burchmore: Do you know what proportion of that tonnage is less than carload?

Mr. Bemis: No, Sir.

Examiner Burchmore: You handle, however, a substantial

3672 amount of less than carload freight?

Mr. Bemis: Yes, Sir, of all character.

Mr. Helbig: For the year ending June 30, 1910, our merchandise movement, less than carload lots, was 879 tons.

Examiner Burchmore: What were your revenues on that?

Mr. Helbig: I don't believe it shows.

Examiner Burchmore: I don't know that it is important.

Examiner Burchmore: What further information are you able to give with respect to your freight traffic and its character and extent? Make such statement as you can.

Mr. Bemis: The principal movement is logs and lumber, for the Ozan Lumber Company. The movement is general in character,

both of forest products for other people and outbound and inbound merchandise of all descriptions that are raised or used in an agricultural way.

Examiner Burchmore: What proportion of your total tonnage does the logs and lumber of the Ozan Lumber company comprise?

Mr. Bemis: Seventy-one per cent of our total.

Examiner Burchmore: That is, seventy-one per cent of the tonnage?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What about the revenue?

3673 Mr. Bemis: The percentage of revenue from the Ozan Lumber Company business is thirty-nine per cent of the whole; we get sixty-one per cent of our revenues from the general public.

Examiner Burchmore: Well, on about seventy per cent of the tonnage, you get about thirty-nine per cent of the revenues?

Mr. Bemis: Yes Sir. You see the lumber and the logs are really counted twice, the inbound tonnage on the logs, we also include the tonnage on the lumber outbound.

Examiner Burchmore: Some companies have given their statistics in the same way that you have in regard to the traffic, and have also stated them a little different. They have given the total tonnage of lumber out of the mill and then have shown the total tonnage of logs into the mill, and also the difference between the two.

Mr. Bemis: Yes, Sir.

Examiner Burchmore: So as not to count the logs twice, once in the shape of logs and the second time in the shape of lumber. Have you made any such separation of the figures?

Mr. Bemis: The estimated log tonnage, 80,000 tons; the lumber outbound, 23,118 tons.

3674 Examiner Burchmore: Does the lumber company have any commissaries or company stores along the line?

Mr. Bemis: No, Sir.

Examiner Burchmore: Does it receive any considerable quantity of mill supplies?

Mr. Bemis: No, Sir, except such stuff as is used by the Ozan Lumber Company at Prescott, and that comes through the Iron Mountain at Prescott.

Examiner Burchmore: It is not handled by the Prescott & Northwestern?

Mr. Bemis: There may be some commodities on which there is a rate to Dian,—I am not sure of that,—out of which the Prescott & Northwestern derives some compensation.

Mr. Helbig: In most cases the Ozan freight is billed to Prescott proper, but we do have joint rates to Dian, and in such cases we get a percentage.

Examiner Burchmore: Would that percentage be three dollars per car?

Mr. Helbig: Twenty-five per cent of the rate.

Examiner Burchmore: From the river?

Mr. Helbig: From wherever it originated.

Examiner Burchmore: That being less than carload stuff,
3675 I suppose nothing originates east of St. Louis.

Mr. Helbig: Well, I might add that all of our stuff from the east is billed from the river.

Examiner Burchmore: You haven't described the towns along the line have you?

Mr. Bemis: No, sir.

Examiner Burchmore: Just make a brief general statement with reference to the towns, their population and character and the business and industries of each, in a very general way.

Mr. Bemis: The town of Blevins has some five or six stores, population I should guess maybe one hundred people, it has a saw-mill, a gin and a canning factory. The town of Kilgore has a saw-mill; just what the population is I cannot say, as the mill is not now being operated. Belton is a town of some four or five stores and a population of some twenty-five or thirty. Tokio is a new town, the junction of the M. D. & G., has a number of stores and some population. The towns along the line are all small, but, we hope, growing.

Mr. McRae: You have not referred to Highland or Nashville.

Mr. Bemis: We operate a train jointly with the Memphis,
3676 Dallas & Gulf, this train being operated to Nashville.

Examiner Burchmore: Where is Nashville, on the M. D. & G.?

Mr. Bemis: Yes, sir.

Examiner Burchmore: You operate this train jointly from Prescott to Nashville?

Mr. Bemis: Yes, Sir; we operate the train to Nashville on a revenue basis. From Tokio to Nashville, for the use of the track of the M. D. & G., we give them one-third of the passenger earnings.

Mr. McRae: What is the population of Nashville?

Mr. Bemis: I couldn't say.

Mr. McRae: You can't state?

Mr. Bemis: No, Sir, possibly three thousand.

Mr. McRae: It is the County Seat?

Mr. Bemis: Yes, Sir.

Mr. McRae: Highland?

Mr. Bemis: Highland has one store and is the general office of the Arkansas Planting Company, which has a large area planted, something like two thousand acres.

Mr. McRae: Norvelle?

Mr. Bemis: Some five or six houses.

Mr. McRae: Stores?

3677 Mr. Bemis: I think one or two stores.

Examiner Burchmore: Are those last two towns on your line?

Mr. Bemis: Yes, sir.

Mr. McRae: Helbig, what is there?

Mr. Bemis: I don't think there are any stores at Helbig at all.

Examiner Burchmore: What is your tonnage in farm products, in a general way?

Mr. Bemis: We handled 1846 tons of agricultural products, 98 tons of products of animals, and merchandise and miscellaneous 585 tons; that stuff originating on the Prescott & Northwestern. That is from July 1, 1909 to July 31, 1910.

Examiner Burchmore: Not to June 30th?

Mr. Bemis: No, Sir. This statement was made up so as to include the peach movement during July, the fruit movement.

Examiner Burchmore: What is the extent of that peach movement during July?

Mr. Bemis: We handled 68 cars of peaches, and, I think, 15 cars of cantaloupes.

Examiner Burchmore: About what is your revenue on a carload of that fruit?

3678 Mr. Bemis: Mr. Helbig can answer that.

Mr. Helbig: Twenty-five dollars, twenty-five for peaches.

Examiner Burchmore: What is the revenue on the St. Louis & Iron Mountain?

Mr. Helbig: They get seventy-five dollars on the car.

Examiner Burchmore: You publish local passenger tariffs?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Those tariffs are filed with the Commission?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Do you have any local freight rates on carload, or less than carload freight traffic named between points on your line filed with the Interstate Commerce Commission so as to be applicable to Inter-State traffic?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: I will request that you file as part of this record, copies of any tariffs that do not bear I. C. C. numbers.

Mr. Bemis: We have only one, which is known as the Court tariff.

Examiner Burchmore: It is not necessary to file this one.

3679 The other tariffs already being filed, need not be filed now.

Mr. McRae: It is understood in this connection that all of the I. C. C. tariffs which the Prescott and Northwestern has made, or in which it has concurred, are made part of the record in this case.

Examiner Burchmore: Yes, Sir.

Examiner Burchmore: And you also say that the Court tariff is on file?

Mr. Bemis: The Commission has a copy of it.

Mr. McRae: And that may be considered as a part of the record?

Examiner Burchmore: Yes, Sir. As a matter of fact the tariffs on file with the Commission, and our filed copies, are more accessible than those filed in this record.

Examiner Burchmore: Your company has also a number of joint tariffs issued by the Iron Mountain railroad, and perhaps by others?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Are there joint rates to points on your line from Inter-State points applying to class freight?

Mr. Helbig: Yes, Sir.

3680 Examiner Burchmore: And some commodity rates?

Mr. Helbig: Yes, sir.

Examiner Burchmore: On peaches?

Mr. Helbig: Peaches, merchandise, as a matter of fact, practically everything.

Examiner Burchmore: The general basis of the division on class rates is twenty-five per cent of the through rate, or twenty-five per cent of the rate to the river?

Mr. Bemis: Yes, sir; these rates are based on the Mississippi River.

Examiner Burchmore: You are not a party to joint rates to Chicago, or points east of the Mississippi River?

Mr. Bemis: They break at St. Louis.

Examiner Burchmore: Will you testify to a division of rates on lumber, or are those questions to be asked Mr. Helbig?

Mr. Bemis: I can answer.

Examiner Burchmore: What are your divisions?

Mr. Bemis: To Texas, one cent; to all points east of the river, except Missouri Pacific points in Missouri, five cents; to all points west of the Missouri River, and including Missouri Pacific
3681 points in Missouri, six cents; to Rock Island Oklahoma points, three and a half cents.

Examiner Burchmore: Do the joint rates on lumber apply to Dian as a point of origin?

Mr. Bemis: We consider it a milling and transit privilege, and apply from Helbig through, although the lumber is billed from Dian.

Examiner Burchmore: Are there joint through rates from Helbig to Inter-State destinations on lumber the same as the Iron Mountain rates from Prescott?

Mr. Bemis: I think so.

Examiner Burchmore: The junction rate applies back on the line?

Mr. Bemis: Yes, sir.

Examiner Burchmore: What is the service for which this division is paid?

Mr. Bemis: The service we perform consists in the movement of the logs from Helbig to Prescott, a distance of forty-one miles. Inasmuch as it required four carloads of logs to make one carload of lumber, this is equivalent to a lumber movement of one hundred and sixty-four miles. When the lumber is milled, if delivery is to be made to the Iron Mountain, the loaded cars are moved
3682 from the Prescott & Northwestern tracks to a point on the Iron Mountain called the transfer track, a distance of about twelve hundred feet. In the event that delivery of lumber is made to the Memphis, Dallas & Gulf, there is an additional service consisting of the hauling of the empty cars from Tokio to Prescott and the return of the loaded cars to Tokio, making a total movement of thirty miles empty and thirty miles on the load.

Examiner Burchmore: Do you interchange any traffic with the Memphis, Dallas & Gulf aside from this joint train that you spoke of?

Mr. Bemis: Yes, sir, in a general way, on joint stuff.

Examiner Burchmore: What proportion of your stuff moves out over the M. D. & G.?

Mr. Bemis: A very small proportion.

Examiner Burchmore: Is the same proportion of division accorded on that?

Mr. Bemis: We have no rates from the M. D. & G. to the Mississippi River, but to simple freight territory we get the same, and to western trunk lines we get the same.

Examiner Burchmore: The same rates and same division?

Mr. Bemis: The same rates and same division.

3683 Examiner Burchmore: Do you turn over very much lumber to that other road?

Mr. Bemis: Very little.

Examiner Burchmore: How long has there been a connection between the two companies?

Mr. Bemis: I should think perhaps fifteen or eighteen months.

Examiner Burchmore: When that connection was established, was there an increase in your divisions received from the Iron Mountain?

Mr. Bemis: Yes, sir.*

Examiner Burchmore: When you established divisions in connection with the M. D. & G., was there subsequently an increase in the divisions?

Mr. Bemis: No, sir.

Examiner Burchmore: The divisions have remained the same. Just for a matter of information, with what companies does the Memphis, Dallas & Gulf connect?†

Mr. Bemis: With the Kansas City Southern at Ashdown, and with the Iron Mountain at Nashville.

Examiner Burchmore: The Memphis, Dallas & Gulf is a party to this proceeding?

3684 Mr. Bemis: It is a party to this proceeding.

Examiner Burchmore: Your company has a complete supply of stationery forms, bills of lading, way-bills, etc.?

Mr. Bemis: Yes, sir.

Examiner Burchmore: Does it comply with the State and Federal laws regulating railroads, such as the safety appliance acts and the accident laws?

Mr. Bemis: It does, yes, sir.

Examiner Burchmore: Have you posted tariffs at stations where they are accessible to shippers?

Mr. Bemis: You will have to ask Mr. Helbig about that.

Examiner Burchmore: Mr. Helbig, the question was: Do you post your tariffs at stations where they are accessible to shippers?

Mr. Helbig: Well, all of our agents are supplied with tariffs, and, in addition, we have tariffs posted at the office in Prescott.

Examiner Burchmore: What is the valuation of the road, with equipment?‡

---

* "No, sir." See letter P. & N. W. R. R., 3/11/11.

† Also St. L. & S. F. (Record, 4930).

‡ Letter P. & N. W., 3/11/11.

Mr. Bemis: The cost of the road was $547,797.70; the cost of equipment $84,278.29, that is to say, less the reserve for depreciation, making a total of $580,140.16.

3685 Examiner Burchmore: You charge depreciation?

Mr. Bemis: Yes, sir.

Examiner Burchmore: At what rate?

Mr. Bemis: Under the rules of the Interstate Commerce Commission.

Examiner Burchmore: You keep your books in accordance with the requirements of the Interstate Commerce Commission?

Mr. Bemis: Yes, sir.

Examiner Burchmore: Does the right of way upon which this railroad runs belong to the railroad company?

Mr. Bemis: Yes, sir.

Examiner Burchmore: Does it lease any right of way?

Mr. Bemis: No, sir.

Examiner Burchmore: The private tracks of the Ozan Lumber Company which are operated in part by the railroad company, is not considered part of the system, being leased lines?

Mr. Bemis: No, sir.

Examiner Burchmore: You handle no traffic over these lines for the general public?

Mr. Bemis: No, sir.

Examiner Burchmore: Has your road paid any dividends?

Mr. Bemis: No, sir.

3686 Examiner Burchmore: Has it been conducted at a loss, or at a profit?

Mr. Bemis: It has been conducted at a loss.

Examiner Burchmore: That has been its history?

Mr. Bemis: Yes, sir.

Examiner Burchmore: Have you any prospects of its becoming profitable?

Mr. Bemis: We hope so; we have spent lots of money.

Examiner Burchmore: From what source do you look for this improvement?

Mr. Bemis: We believe that we have the finest fruit country in the Southwest, and hope to build up a very large tonnage in peaches, cantaloupes and general truck.

Examiner Burchmore: Do you receive any salary from the railroad company?

Mr. Bemis: No, sir.

Examiner Burchmore: Do any other officers, who are not employed by the Ozan Lumber Company, receive any salary?

Mr. Bemis: Yes, sir; Mr. O. H. Helbig, the Secretary and Treasurer.

Examiner Burchmore: Is he an officer in both companies?

Mr. Bemis: No, sir.

3687 Examiner Burchmore: He receives his entire salary from the railroad?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is the interest paid on this five hundred and seventy odd thousand dollars owed to the lumber company?

Mr. Bemis: No, Sir; it is simply charged; they never earned enough to pay even a small portion of the interest.

Examiner Burchmore: Then the unpaid interest each year is added to the amount of the indebtedness?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Well, a part of this indebtedness, I assume, is accounted for in the purchase of the rail?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What was the cost of that rail?

Mr. Bemis: I don't remember now; it is practically all of it fifty-six pound relay rail.

Examiner Burchmore: Well, did it amount to fifty-six thousand dollars?

Mr. Bemis: Just guessing at the quantity and guessing at the price, I should say there was forty or fifty thousand dollars' worth of rail.

3688 Examiner Burchmore: Have you those figures, Mr. Helbig? Is your estimate about the same?

Mr. Helbig: Yes, Sir; I would think so.

Examiner Burchmore: Now, you said a few moments ago that Dian and Prescott are practically the same place. Tell me a little about that. I understood that Dian was a mile from Prescott.

Mr. Bemis: Well, it is, in one corner.

Examiner Burchmore: Do you use the Iron Mountain depot at Prescott?

Mr. Bemis: No, Sir, but we have entered into a contract, it has been prepared, whereby we use their depot at Prescott, or, I ought to say, their new depot that they are going to build.

Examiner Burchmore: Where do your trains terminate at Prescott?

Mr. Bemis: We bring them up to the junction between the Iron Mountain and the Prescott & Northwestern, the interchange. We have what we call a transfer track, on which the Iron Mountain sets both the loads and the empties. On the stuff that the Prescott & Northwestern delivers to the Iron Mountain, we take that

3689 stuff and put it on what we call the Iron Mountain transfer track. One track belongs to the Prescott & Northwestern, and the other to the Iron Mountain.

Examiner Burchmore: There was formerly operated a saw-mill at Kilgore?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Why was that saw-mill closed down?

Mr. Bemis: It was sold by the Garrettson & Gleason Lumber Company, as I understand it, to some Canadian investors, and my further information is that they have gotten into a legal squabble of some kind, and until that is settled the mill will probably lie idle.

Mr. McRae: Right in that connection, I would like to have you state, if you know, about the holdings of that company.

Mr. Bemis. Only in a general way. I understand they paid something like two hundred and forty thousand dollars for the property there. I may be misinformed about that, but I know they have a large amount of timber.

Mr. Miller. It is hardwood?

Mr. Bemis. Yes, Sir.

Mr. Miller. You don't understand that that mill has been shutdown because it has no holdings to cut, but only until this litigation can be settled. And is it possible, or practicable, without a division of rates, for them to handle that stuff without the operation of your road?

Mr. Bemis. I don't think so.

Examiner Burchmore. How did that company gets its logs to its mill?

Mr. Bemis. They hauled, I think, all that was cut there, by wagon.

Examiner Burchmore. Well, was it possible for them to compete with your mill which has a private tram-road, whereas they have to use mules or horses?

Mr. Bemis. Yes, Sir, they are now in the same situation that we were in, they will have to build a railroad to get the timber.

Examiner Burchmore. Well, they cannot continue in operation by using wagons to get their logs?

Mr. Bemis. No, Sir; there is a physical limit, you understand. A man can haul logs by wagon to a certain limit; beyond that point, a railroad will become necessary.

Examiner Burchmore. They will build a railroad to connect with your line?

Mr. Bemis. That is my understanding.

Examiner Burchmore. Will your company be willing to make that connection with them?

Mr. Bemis. Yes, Sir, we will be glad to.

Examiner Burchmore. Will you operate it for them?

Mr. Bemis. No, Sir.

Examiner Burchmore. They will have to have their own engines?

Mr. Bemis. They will have to have their own engines and their own operation.

Examiner Burchmore. You would not be willing to operate that road on the same basis as you operate the Ozan Lumber Company?

Mr. Bemis. I think we would if the road would get the same revenue that they get from the Ozan Lumber Company.

Examiner Burchmore. If they laid down the track, would you be willing to operate it for the same charge?

Mr. Bemis. I think we would.

Examiner Burchmore. Are there any other saw-mills on your road at this time?

Mr. Bemis. Yes, Sir, small mills. I gave them some time ago in my testimony.

Examiner Burchmore. These mills get their logs by wagon?

Mr. Bemis. Yes, Sir, I think they do.

Examiner Burchmore: From the woods only to the mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Do any of those saw-mills haul their lumber from the mill to the railroad by wagon?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: They do that profitably?

Mr. Bemis: I don't know.

Examiner Burchmore: You don't pay any cartage charges to them for carting the lumber to your line?

Mr. Bemis: No, Sir.

Examiner Burchmore: You charge them the regular rate, and they have to stand the expense?

Mr. Bemis: Yes, Sir; there is no reason why they should not.

Examiner Burchmore: Well, that expense is very much larger than the expense of the Ozan Lumber Company, to get its lumber to your line?

Mr. Bemis: No, Sir; I don't think so. The idea is this, the Ozan Lumber Company performs the same service in moving
3693 their logs from their timber to their tap-line that the small man performs in moving his logs from his timber to his mill. They both have to move the stuff in wagons to some point.

Mr. McRae: You can't take a railroad to every tree?

Mr. Bemis: No, Sir; you can load the logs on the cars without the intervention of wagons.

Examiner Burchmore: Well, these tramroads do run to something very near every tree, you move them around so. I don't think that that question need be gone into any further. You say there is a limit to profitable wagon hauling, and when you get beyond that you have to build a railroad?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And there is a limit to the extent that you can build a private tramroad profitably?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: If your division on lumber were increased, you could go further into the woods with your tram line?

Mr. Bemis: Well, you might increase the division so as to
3694 make anything profitable, provided the business will stand it.

Examiner Burchmore: Just one more line of questions and I will conclude. That is as to the method of handling and billing those logs and lumber. Will you testify as to that, or will Mr. Helbig?

Mr. Bemis: Well, Mr. Helbig can.

Mr. Helbig: The lumber is billed at Dian, and we also issue bills of lading.

Examiner Burchmore: You issue way-bills on the lumber?

Mr. Helbig: Yes, Sir; bill them there to all points on other lines.

Examiner Burchmore: Now, let me see if I understand the practice correctly. The empty logging cars are taken out into the woods along the main line of the private tram-road.

Mr. Bemis: Yes, Sir.

Examiner Burchmore: The locomotives of the lumber company place these logging cars on the short branch of the tram-line?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And they are loaded with logs by the logging employés. When loaded they are taken out by the lumber company locomotives and crews and placed, or assembled on
3695 the main line of the tram-road?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And then over the main line of the Prescott & Northwestern?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And sets them at the mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What compensation does the Prescott & Northwestern get for that?

Mr. Bemis: They get one dollar per thousand feet.

Examiner Burchmore: What per cent does that amount to on the final output of lumber, two cents?

Mr. Bemis: Yes, Sir; a little over that, about three cents.

Examiner Burchmore: There is no billing at all that accompanies the cars to the mill?

Mr. Bemis: No, Sir; except the conductor carries the report out and hands it in.

Examiner Burchmore: Are the logs scaled out in the woods?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Who scales them?

Mr. Bemis: The scaler of the lumber company.

3696 Examiner Burchmore: The railroad company does not scale the logs?

Mr. Bemis: No, Sir.

Examiner Burchmore: When the train reaches Dian, the conductor reports the quantity of logs he has brought in?

Mr. Bemis: The number of cars.

Examiner Burchmore: A bill of lading is then issued to cover those cars?

Mr. Bemis: A record is made, that is all.

Examiner Burchmore: Then subsequently when the lumber is shipped out of the mill, a bill of lading is issued by the Prescott & Northwestern at Dian?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Where is that bill of lading headed?

Mr. Bemis: It is headed Dian.

Examiner Burchmore: The lumber, then, originates at Dian, according to the bill of lading, and not at Helbig?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: The bill of lading does not indicate that the lumber is manufactured from logs that come from beyond?

Mr. Bemis: No, Sir.

3697 Examiner Burchmore: And the same is true as to the waybill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Then the rate that is applied to the lumber is the published joint rate from Dian?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And not the published joint rate from Helbig?

Mr. Bemis: No Sir; but the rate- from Dian to Helbig are the same.

Examiner Burchmore: The cars on which the lumber is loaded for Interstate transportation, are supplied by the Iron Mountain?

Mr. Bemis: Yes, Sir; entirely.

Examiner Burchmore: Disregarding for the moment the question of shipments that go over the M. D. & G., how are those cars set at the mill empty? Are they taken at the Iron Mountain interchange track by the locomotive of the Prescott & Northwestern?

Mr. Bemis: They are delivered at the transfer track at Prescott.

Examiner Burchmore: And there the Prescott & North-
3698 western crew take the empty cars to the mill?

Mr. Bemis: I can show you in a minute how that is done. All cars are set on this track (indicating on map).

Examiner Burchmore: Mr. Bemis, will you state in the record how an empty car furnished by the Iron Mountain gets on to the private track at the saw-mill, where it is loaded?

Mr. Bemis: Well, there is no private track at the saw-mill.

Examiner Burchmore: Well, there is some side-track there.

Mr. Bemis: The cars are loaded at the planing mill.

Examiner Burchmore: All the cars are loaded at the planing mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is there any side-track at the planing mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is that side-track ilentical with the interchange track?

Mr. Bemis: No, Sir.

Examiner Burchmore: How far does the Iron Mountain engine take the empty car?

3699 Mr. Bemis: About twelve hundred feet.

Examiner Burchmore: Where does it place it?

Mr. Bemis: On this transfer track.

Examiner Burchmore: That transfer track is owned by the Prescott & Northwestern?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Well, the Iron Mountain goes on the Prescott & Northwestern track for several hundred feet?

Mr. Bemis: For about twelve hundred, and we, in turn, go on the tracks of the Iron Mountain for the same distance, and consider——

Examiner Burchmore: How far does the engine pull the empty car from the transfer track to the planing mill?

Mr. Bemis: The switching movement would probably take three or four hundred feet.

Examiner Burchmore: The planing mill is not located on this same transfer track?

Mr. Bemis: No, Sir.

Examiner Burchmore: On a different side-track?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Then the car is loaded with lumber?

Mr. Bemis: Yes, Sir.

3700 Examiner Burchmore: The engine of the Prescott & Northwestern, that crew and that engine, take this car from the side-track at the planing mill, and haul it down to the Iron Mountain right of way?

Mr. Bemis: Carry it and place it on the Iron Mountain transfer track.

Examiner Burchmore: Then they go twelve hundred feet over your rails with the empty car, and you go for several hundred feet over their rails with the loadel car?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Now, do you handle any lumber for people other than the Ozan Lumber Company?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Give an example of some other saw-mill.

Mr. Bemis: Well, we handle all of this lumber that originates on the line.

Examiner Burchmore: In the case of lumber that originates on the line, say at Tokio,——

Mr. Bemis: Yes, Sir.

Examiner Burchmore: You haul the car empty from the Iron Mountain railroad up to the saw-mill?

Mr. Bemis: Yes, Sir.

3701 Examiner Burchmore: The car is furnished by the Iron Mountain?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And then you haul it loaded back to the Iron Mountain?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And then you receive the same division that you receive on the Ozan Lumber Company track?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And render a greater service?

Mr. Bemis: We do a greater service on the Ozan Lumber Company track.

Examiner Burchmore: On the lumber itself, you render a greater service on the other mills?

Mr. Bemis: Hauling freight is a matter of tonnage; it costs to haul the tonnage.

Examiner Burchmore: You say you perform a very much greater service on Ozan Lumber Company lumber than you do on lumber for other saw-mills, because you carry the logs into the mill?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Take a car of Ozan lumber that

3702 moves over the Memphis, Dallas & Gulf, you receive a car for that movement from the Memphis, Dallas & Gulf?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: You haul it down to the mill empty?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: It is loaded, then you haul it back to the Memphis, Dallas & Gulf?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: A distance of——

Mr. Bemis: Thirty miles.

Examiner Burchmore: The bill of lading is issued then at Dian, in such a case?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: And the through way-bill is issued at Dian?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Mr. McRae, I suggest that you file with the Commission for its information, a map similar to that which we have called for from other companies, a small sized map drawn to a scale. It may be a rough map or blue print, but should be drawn to scale. Showing the entire line, including side-tracks and
3703 spur-tracks, showing all the saw-mills and interchange tracks with other railroads, and, in brief, showing the entire lay of the land.

Mr. McRae: We will endeavor to do that as soon as practicable, after we get a copy of the testimony to indicate what is wanted.

Mr. McRae: Mr. Bemis, you have a freight depot at Dian?

Mr. Bemis: Yes, Sir.

Mr. McRae: You have an arrangement with one of the defendant carriers, the St. Louis, Iron Mountain & Southern Railway, for the joint use of the freight depot which we have in contemplation?

Mr. Bemis: Yes, Sir.

Mr. McRae: I will ask you to state if the lumber tonnage does not bear a lower rate than any other tonnage except, perhaps, coal?

Mr. Bemis: I think it does.

Mr. McRae: And that, then, is the reason for the disparity between the tonnage and the revenue, as referred to by the Examiner and to which he called your attention.

Mr. Bemis: Well, there is really a double service performed there, we handle in logs what we again handle in lumber.

3704 Mr. McRae: The mill at Kilgore to which you have referred, is that a yellow pine proposition, or a hardwood proposition?

Mr. Bemis: It is a hardwood proposition; they have some yellow pine, but practically all their timber is hardwood.

Mr. McRae: I understand that under the same conditions you would perform the same service for them as you do for the Ozan Lumber Company.

Mr. Bemis: Yes, Sir; I would be glad to.

Mr. McRae: Is the business, outside of transporting forest products, increasing, or decreasing?

Mr. Bemis: Increasing.

Mr. McRae: Do you operate under a tariff published by the different carriers, which provide for a milling in transit privilege, in which you concur?

Mr. Bemis: Yes, Sir.

Mr. McRae: The J. H. Bemis, you stated was your father, a member of the firm of Bemis & Whitaker, has he any interest in either the Prescott & Northwestern Railroad, or in the Ozan Lumber Company?

Mr. Bemis: Practically none; he has a small amount of stock in the Prescott & Northwestern.

3705 Mr. McRae: No interest in the lumber company, and no substantial interest in the railroad company. His interest in the railroad company is simply to provide for the Board of Directors, as provided for by the laws of Arkansas?

Mr. Bemis: Yes, Sir.

Mr. McRae: In speaking of the probabilities of extending your road to the northwest, I will ask you if when you stated that you now have no proposition pending for that, is it not because you were not able to get the money to do it?

Mr. Bemis: Yes, Sir; that is undoubtedly the reason.

Mr. McRae: And not because you do not think with the proper capital it could be developed into a paying proposition if extended?

Mr. Bemis: Beyond any question it could.

Mr. McRae: Have you not also been importuned to build South to connect with what is known as the Beardsley road, on the Cotton Belt, to, I believe, Alexandria?

Mr. Bemis: Yes, Sir.

Mr. McRae: Is that not a practical proposition, if it could be financed?

Mr. Bemis: I think it is.

3706 Mr. McRae: That would require only the building of the road through Nevada County?

Mr. Bemis: Yes, Sir, thirty-five miles.

Mr. McRae: You say that you had no connection with the Prescott & Northwestern Railroad when it was organized, but do you not know that the people of Prescott subscribed a bonus of between eight and ten thousand dollars in order to have it constructed and built?

Mr. Bemis: Yes, Sir, that is my information.

Mr. McRae: Has the construction, since the reorganization and your connection with it, been of a substantial character?

Mr. Bemis: Yes, Sir.

Mr. McRae: And with a view of making it a permanent investment?

Mr. Bemis: Yes, Sir.

Mr. McRae: What has your company done to encourage the development of the country along the line of the road?

Mr. Bemis: We have established an experimental farm and we have spent quite a good deal of money, I expect ten or fifteen thousand dollars on it; we have distributed seeds and plants; we have had the farmers congregate and discuss the various things that

3707 can be produced more profitably than the things they are now producing, and I think that can be.

Mr. McRae: Did you advertise the resources of that country in any newspapers?

Mr. Bemis: Yes, Sir; we advertised in a number of newspapers, and issued our own advertising matter.

Mr. McRae: You issued a folder?

Mr. Bemis: Yes, Sir.

Mr. McRae: Is that one of them?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: It may be filed in the record.

(The paper so offered and identified was received in evidence and thereupon marked Prescott & Northwestern Railroad Company Exhibit No. 1, Witness Bemis, received in evidence December 14, 1910, and is attached hereto.)

Mr. McRae: Were you exhibitors in the land show at Chicago?

Mr. Bemis: I think we had as creditable a booth as any similar proposition.

Mr. McRae: And you incurred that expense because you have faith in that country?

Mr. Bemis: Yes, Sir.

3708 Mr. McRae: If you can get a sufficient number of people——

Mr. Bemis: Yes, Sir. We have a large quantity of clays of various kinds, and a number of things which will offer for transportation.

Mr. McRae: How far does the road run from the diamond fields of that county?

Mr. Bemis: About four or five miles.

Mr. McRae: Is there a bona fide shipping public along that line?

Mr. Bemis: Yes, Sir.

Mr. McRae: How long has it been such?

Mr. Bemis: For the past ten or twelve years.

Mr. McRae: Does, or does not, the management of that railroad give shipping service to that public, to all on like terms and conditions?

Mr. Bemis: Yes, Sir; we try to give them all equal service.

Mr. McRae: What has been developed in the way of the development of the country?

Mr. Bemis: Well, there have been large areas that we denuded a good many years ago, that is, the Ozan Lumber Company, that have been opened up for settlement. There are a good many

3709 farms in that country that was all timber when I first went in there.

Mr. McRae: Through what counties does the road run?

Mr. Bemis: They pass through Nevada, Hempstead and Pike. Pike County, fifteen years ago the folks in that county were about as illiterate a bunch, their principal occupation was making corn enough to feed their hogs and make "Moonshine" whiskey, and they had no schools at all, and their scrip was only worth thirty cents on the dollar, and during that time there have been constructed just three of these lines, and since then the scrip is worth one hundred cents on the dollar, and I think, beyond question, we have seen a wonderful change in that country since we have been there.

Mr. McRae: You say three roads have been built through that county in that time?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: What railroads do you refer to?

Mr. Bemis: The Arkansas & Southwestern, which is not a part of the Iron Mountain, the Memphis, Dallas & Gulf and the Memphis & Southwestern.

Mr. McRae: Have you traveled over it?

Mr. Bemis: Yes, Sir.

3710 Mr. McRae: What does the traffic, both passenger and otherwise, indicate?

Mr. Bemis: I can't say as to that, the portion in Pike County, I can't say what its traffic is.

Mr. McRae: Well, if you have traveled it, you know whether it is great, or small.

Mr. Bemis: It is not very large.

Mr. McRae: Is it not true that the beginning of what is now known as the Guerdon & Fort Smith Branch of the Iron Mountain, was built for the Smithton Lumber Company, incorporators?

Mr. Bemis: Yes, Sir; that is the outgrowth of the railroad that belonged to the Smithton Lumber Company.

Examiner Burchmore: From looking at the map, Mr. Bemis, it appears that by means of your train service from Prescott to Nashville, you have established competition with the Arkansas and Louisiana line, from Hoke to Nashville?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is that a part of the Iron Mountain system?

Mr. Bemis: Yes, Sir.

Mr. McRae: What has been the increase in the population

3711 along the line of your road in Nevada, Hempstead and Pike counties, since you have been connected with it?

Mr Bemis: I couldn't tell you in numbers, but through a country that had practically no one in there, except along certain roads, there have grown up a great many communities and a great many people.

Mr. McRae: Do you not serve as many as twenty thousand people along the line of your road?

Mr. Bemis: Well I don't know that I would care to testify as to that. I don't know, I expect if you take it all in, we do.

Mr. McRae: What does the census returns show the increase in population of these three counties to be?

Mr Bemis: I haven't seen them.

Mr. McRae: Well, if I tell you that it is twenty to twenty-five per cent, would you be willing to express an opinion as to whether the increase in that part of the county is greater or less than in other parts of the county?

Mr. Bemis: I am satisfied that the increase is very much greater in that section than it was in the more settled part of the State.

Mr. McRae: You have been engaged in the saw-mill busi-

3712 ness and the railroad business since 1892. You have some knowledge of what we call short line railroads. Have you

known of any incorporated railroad in that section of the State that has not developed into a road of value to the community in which it is built?

Mr. Bemis: I know of a number that have developed, yes Sir, into roads of that kind. I assume also that there are others that are starting out that will develop into these.

Mr. McRae: Can you name some, in addition to those you have named, that began as short line railroads, that have developed into parts of systems, that operate in Arkansas?

Mr. Bemis: Yes, Sir. The Arkansas Southern, which I think now belongs to the Rock Island, is one; the Texarkana & Fort Smith is another. They both grew out of tap-line propositions.

Examiner Burchmore: The Commission is familiar with the fact that a great many short line roads have become component parts of great systems.

Mr. McRae: I would like to get it in the record. Can you name another, the Louisiana and Arkansas is another?

Mr. Bemis: Yes, Sir; the L. & A. is another.

Mr. McRae: In your opinion, would it have been possible
3713 to build any of these roads, with the sparsely settled population, without through rates, joint rates, and a division thereof?

Mr Bemis: I don't think so; no, Sir.

Mr. McRae: When did you acquire the greater part of your timber holdings for the Ozan Lumber Company?

Mr. Bemis: Well along between the years,—well, we acquired the greater part of them from 1902,—no 1900 up to this time, 1900 to 1907.

Mr. McRae: What, if any, timber holdings did you have when you and your associates acquired the control of the railroad?

Mr. Bemis: We had practically no timber at that time.

Examiner Burchmore: But you were in the mill business since 1892.

Mr. Bemis: Yes, Sir; but we had a railroad and a mill and no timber.

Mr. McRae: How did you get your timber?

Mr. Bemis: We bought the timber as we got to it.

Mr. McRae: Is it not true that at that time there were no great bodies of timber through which this railroad penetrated?

Mr. Bemis: Yes, Sir, except at the extreme western end.

3714 Mr. McRae: Since that time you have built about thirty miles of the main line of the road?

Mr. Bemis: Yes, Sir.

Mr. McRae: And now, where is situated the most extensive of your holdings?

Mr. Bemis: At the extreme west of the line.

Mr. McRae: I believe you stated already, have you, that the original stockholders of the Ozan Lumber Company had no connection with, or interest in the organization of the railroad.

Mr. Bemis: No, Sir.

Examiner Burchmore: I think that question has been gone into fully.

Mr. McRae: Now, Mr. Bemis, I will ask you to state,—have you found what classes of property and what amount of tonnage, the total, that the road transported during the year 1909-10.

Examiner Burchmore: I think he gave the tonnage statistics fully.

Mr. Bemis: The total tonnage, 144,619; the balance of the tonnage has been stated.

Mr. McRae: What did you receive for that tonnage?

3715 Mr. Bemis: $80,463.85.

Mr. McRae: Did he state how many passengers he carried?

Mr. Bemis: Total gross revenue $89,107.11.

Mr. McRae: You have stated that you run two trains a day each way, or a regular published schedule. I will ask you if the company furnishes separate compartments for the white and the colored, as required by the Arkansas law?

Mr. Bemis: Yes, Sir.

Mr. McRae: In connection with the movement of the products of the orchard, does the refrigerator service apply through that orchard country over the line?

Mr. Bemis: Yes, Sir; the movement has to be through refrigerator cars.

Examiner Burchmore: The ice is furnished by the Iron Mountain?

Mr. Bemis: The ice and the refrigerating charges are included in the rate; the A. R. T. people furnish the ice.

Mr. McRae: Does the Prescott & Northwestern carry the mail to Nashville?

Mr. Bemis: Yes, Sir.

Mr. McRae: And haul the business you have named along the line?

3716 Mr. Bemis: Yes, Sir.

Mr. McRae: How long has it had the carrying of the mail to Nashville?

Mr. Bemis: Several months.

Mr. McRae: What road was it carried by?

Mr. Bemis: The Iron Mountain.

Mr. McRae: How did you get it?

Mr. Bemis: Because we were able to give them quicker service by five or six hours than the Iron Mountain.

Mr. McRae: We introduce this proof to show that this railroad is able to take care of the business as a railroad.

Mr. McRae: You have testified about the operation of trains?

Mr. Bemis: Yes, Sir.

Mr. McRae: How many section houses have you?

Mr. Bemis: We have four groups of section houses.

Mr. McRae: One for each section?

Mr. Bemis: Yes, Sir.

Mr. McRae: What will the total receipts and total expenditures for the year 1909-10 show?

Mr. Bemis: Total receipts for 1909-10, $79,210.64; the total expenses $74,817.58, showing a gain of $4393.06, less
3717 taxes $3073.61, showing a net gain of $1319.45.

Mr. McRae: Gain over what?

Mr. Bemis: Operating revenue over expenses.

Examiner Burchmore: Those taxes are quite substantial. Are you taxed on the same basis as other common carrier roads?

Mr. Bemis: Yes, Sir.

Mr. McRae: You are assessed by the Tax Commission as a railroad?

Mr. Bemis: Yes, Sir.

Mr. McRae: On the mileage basis, like the main lines of other railroads?

Mr. Bemis: Yes, Sir.

Mr. McRae: Does your company report to and comply with the regulations of the Arkansas Railroad Commission?

Mr. Bemis: Yes, Sir.

Mr. McRae: Are the books of the railroad company kept separate from that of the Ozan Lumber Company?

Mr. Bemis: Yes, Sir.

Mr. McRae: Bank account separate?

Mr. Bemis: Yes, Sir.

Mr. McRae: Is the railroad company a member of the American Car Association, American Railway Association?

3718 Mr. Bemis: Yes, Sir.

Mr. McRae: Do you pay a per diem for your cars?

Mr. Bemis: Yes, Sir.

Mr. McRae: Do you collect demurrage from the Ozan Lumber Company and other industries that you serve?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: It seems to me we have covered it rather fully, with the exception of one or two questions that perhaps have not been asked. I presume that the Officers of the Prescott & Northwestern, or some of them, enjoy annual passes over the Iron Mountain and other roads?

Mr. Bemis: Yes, sir; Mr. Helbig, Mr. H. E. Bemis and myself.

Examiner Burchmore: These passes are used?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: The Ozan Lumber Company manufactures pine lumber?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: No hardwood?

Mr. Bemis: No hardwood.

Mr. McRae: You sell your hardwood timber to those who manufacture hardwood?

3719 Mr. Bemis: Yes, Sir.

Mr. McRae: In reference to your transportation, I will ask you if you have exchange with the Santa Fe?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: When were divisions on lumber shipments first established with your company?

Mr. Bemis: It has been fourteen or fifteen years ago.

Examiner Burchmore: When all the timber along the line has been finally cut off, will this railroad be taken up, or continued in operation?

Mr. Bemis: We cannot take it up, as I understand it. We are proceeding on the theory that we have a good country and will develop enough transportation to make it profitable.

Examiner Burchmore: How much timber rights does the Ozan Lumber Company own along this territory?

Mr. Bemis: Forty thousand acres.

Examiner Burchmore: About how many million feet in there?

Mr. Bemis: I think there is upwards of two hundred and fifty million.

Mr. McRae: In reference to the probability of taking up the line of the Prescott & Northwestern Railroad, I will ask you if
3720 under the laws of the State of Arkansas, the road is not dedicated to the public and cannot be taken up.

Mr. Bemis: That is my understanding.

Examiner Burchmore: Well, you have already taken up a part of the railroad.

Mr. Bemis: No, Sir. Those were not parts of the railroad; they were shown on the map by the Railroad Commission, but were never claimed as a part of their line, they were simply temporary spurs.

Mr. McRae: In reference to the divisions, I will ask you if before you purchased any substantial timber—you have already stated that at the time you acquired the road you had very little,—you had an agreement with the Iron Mountain people that you would have the usual divisions if you acquired and constructed the road?

Mr. Bemis: Yes, Sir.

Examiner Burchmore: Is that a written, or a verbal agreement?

Mr. Bemis: It is a verbal agreement, which is customary.

Examiner Burchmore: You have no written agreement with the railroad company covering the diivsion of rates, except tariff sheets?

Mr. Bemis: No, Sir.

3721 Mr. McRae: As I understand you to say, that the company would not, and could not have constructed this road without the promise and expectation of through rates and a division of rates?

Mr. Bemis: Yes, Sir. I desire to add that we have spent between eighteen and nineteen thousand dollars in ballasting our line with gravel during the years 1907 to 1910.

BURT JOHNSON was called as a witness, and having been duly sworn, testified as follows:

Mr. McRae: What is your name, residence and business, Mr. Johnson?

Mr. Johnson: Burt Johnson.

Mr. McRae: Upon what railroad do you live?

Mr. Johnson: I live at Highland, located on the Prescott & Northwestern.

Mr. McRae: How long have you resided at Highland, and how came you to settle there?

Mr. Johnson: I located there a little over six years ago. Be-

fore I located I was hunting a location for a commercial
3722 peach orchard, and found the location I was looking for there. I was looking for a peculiar location. When I was going in the peach business, I wanted to go where I could raise peaches every year, and I found that to be the case there.

Mr. McRae: Had a railroad been constructed to that point at that time?

Mr. Johnson: No, Sir; it was located about nine miles from there.

Mr. McRae: Having found this ideal peach orchard land, what did you do before purchasing, with reference to conferring with the complainant carrier, and the defendant, the St. Louis & Iron Mountain?

Mr. Johnson: I first wrote a letter to the Missouri Pacific up in St. Louis, and told them I wanted to locate a commercial peach orchard, and they refefred it to their commercial department, and soon the representative called to see me and told me they were willing to show me anything they had on their lines. I told them what I wanted was if I located there I would have competitive rates.

Mr. McRae: What understanding did you have with the Prescott & Northwestern?

3723 Mr. Johnson: I had a consultation with the Prescott & Northwestern, and had the understanding that they were to maintain their track for a number of years.

Examiner Burchmore: Any given number of years?

Mr. Johnson: Well, yes, I had a written contract with the Prescott & Northwestern for fifteen years, and also the Missouri Pacific sanctioned—while I had no written contract, they gave me to understand—and have to this day carried out their agreement with me.

Examiner Burchmore: Is there any objection to filing this written contract?

Mr. McRae: No objection.

Examiner Burchmore: Is there any information to be derived from it?

Mr. McRae: I don't know.

Examiner Burchmore: Dated what year?

Mr. McRae: About six years ago.

Examiner Burchmore: Did you feel it necessary to tie the Prescott & Northwestern up with a contract so they would not remove their railroad?

Mr. Johnson: We hadn't located there yet, and I wasn't going a long ways back from the Iron Mountain, you under-
3724 stand. The Iron Mountain said they would rather locate me on their land, but I said "You have no fruit land on your line."

Mr. McRae. You had this understanding with the Prescott & Northwestern, before the Prescott & Northwestern had reached that point?

Mr. Johnson: Yes, Sir.

Mr. McRae: And part of the contract was the construction of the railroad to that place?

Mr. Johnson. Yes, Sir.

Mr. Mellen. Can you tell how much you have expended, you and your associates, your company.

Mr. Johnson. We have expended up to this date something like two hundred and twenty-five thousand dollars.

Mr. Mellen. How many cars of peaches did you transport last year?

Mr. Johnson. Sixty-six.

Mr. Mellen. What do you expect next year?

Mr. Johnson. Of peaches something between four and five hundred cars next year. We expect to plant, there will be planted on the line about eight hundred acres of cantaloupes, probably run something like one hundred cars of cantaloupes.

Mr. Mellen. What is your market for those peaches?

Mr. Johnson. North and East.

Mr. Mellen. Is it possible for you to sell them away in competition with other fruit growers without through rates?

Mr. Johnson. No, Sir.

Examiner Hutchinson. You couldn't pay more than one hundred dollars a car?

Mr. Johnson. Not going to compete with other people.

Examiner Hutchinson. You don't care whether it is a through rate or not, as long as you don't have to pay over one hundred dollars?

Mr. Johnson. The way I look at that matter, is that the Prescott & Northwestern will have to give us that service, and unless they get paid for it,—I am one of those fellows that believe in paying for services.

Mr. Mellen. What are the possibilities of the soil for fruit growing?

Mr. Johnson. Take the particular ridge that I am on, I would judge there is forty or fifty thousand acres tributary to this railroad that is what we call perfect air drainage. I mean by that that we will have fruit every year, or nearly so. Now the peculiarities of this is a high elevation and low country. The general elevation of this country is about three hundred and fifty feet, and on the particular ridge it runs from seven to eight hundred feet.

Mr. Mellen. From your knowledge as an expert peach man, you believe you can produce a peach crop every year.

Mr. Johnson. Yes, Sir. I have had it proven so.

Mr. Mellen. And the surrounding country, during the time you have been there, does not?

Mr. Johnson. Does not, no Sir, and other fruits and vegetables the same way.

Mr. Mellen. From your knowledge of that country, is it possible with the present conditions, without joint rates and joint through rates on all kinds of products, for the Prescott & Northwestern to give the kind of service and keep the railroad?

Mr. Johnson. They cannot.

Mr. Mellen. Does the company endeavor to meet the demands of the shipping public?

Mr. Johnson: Yes, Sir.

Mr. McRae: Well, if you know anything special that the
3727 company has done in order to develop the country, you may state it.

Mr. Johnson: Well, they have done a great many things. Now, at our particular point, I have one packing house located nearby, they put in a switch there at their own expense.

Mr. McRae: How long?

Mr. Johnson: That switch, I suppose, is probably three hundred yards long.

Mr. McRae: About how much did it cost?

Mr. Johnson: I don't know, the railroad company put that in themselves.

Examiner Burchmore: That is your packing house?

Mr. Johnson: Yes, sir. We have another packing house located about a little over a mile and a half off the line, to which we are now building a spur. We are building that, though, under the regular terms of railroading, we are building the grade and furnishing the ties, and they are doing the rest.

Mr. McRae: What is the condition of the country from the end of the line where it was when you first entered this country with a view of locating your orchard and now, as compared with
3728 the number of people in it, the condition of the people there, you might call the land I located on run-down country, the part that I took. This railroad was the first railroad that ever crossed that ridge.

Mr. McRae: What is the extent of the orchard?

Mr. Johnson: Something like twenty-two hundred acres.

Mr. McRae: Well, do you expect to plant more?

Mr. Johnson: Yes, Sir; we are still planting.

Mr. McRae: How much more do you contemplate planting?

Mr. Johnson: Well, we will plant about two hundred acres more this Spring, that is, in that vicinity.

Mr. McRae: In all, how much do you contemplate taking in?

Mr. Johnson: Well, there is no telling, we might take in fifty thousand acres.

Examiner Burchmore: It seems to me that you have developed your interest in this country, and shown the extent of the traffic. You have shown that you are interested in continuing the traffic of that road.

Mr. Johnson: Yes, Sir.

Mr. McRae: I want to show that this railroad that runs through this country is susceptible of development.

Mr. McRae: What was land worth then?

Mr. Johnson: Our first land, we bought from five to
3729 fifteen dollars an acre.

Mr. McRae: What are the lands worth now?

Mr. Johnson: They are worth all the way from fifteen to thirty dollars, that is, the raw lands.

Mr. McRae: What are the orchards worth?

Mr. Johnson: All the way from one hundred and fifty to two hundred and fifty. If your Honor will permit me, I can illustrate.

Examiner Burchmore: I think you have fully proved the point. I think that you have proved that the country is being developed.

Mr. McRae: It will take a little time, and unless you deny him the right to make the statement, I would be glad——

Examiner Burchmore: You can take two or three minutes.

Mr. Johnson: I might state further that along the line, the fruit and vegetable and also the peanut industry is growing very largely, they are developing in every way.

Examiner Burchmore: You heard Mr. Bemis' testimony describing the railroad and its physical characteristics and the territory that it serves. You think this testimony is in the main correct?

3730 Mr. Johnson: Yes, Sir, I think so.

Examiner Burchmore: Did you purchase your land from the Ozan Lumber Company?

Mr. Johnson: No, Sir; none of it.

H. M. STEVENS was called as a witness, and having been duly sworn, testified as follows:

Mr. McRae: Mr. Stevens, state your name and residence.

Mr. Stevens: H. M. Stevens. I live at Blevins, Arkansas.

Mr. McRae: Is Blevins situated on the Prescott & Northwestern Railroad?

Mr. Stevens: Yes, sir.

Mr. McRae: How far from Prescott?

Mr. Stevens: Fourteen miles.

Mr. McRae: Are you engaged in the mercantile business at Blevins?

Mr. Stevens: I am.

Mr. McRae: Did you hear Mr. Bemis' statement as to the character of services that he rendered and the character of the road that he had?

Mr. Stevens: Yes, Sir.

3731 Mr. McRae: Do you think this substantially correct?

Mr. Stevens: Yes, Sir.

Mr. McRae: Is this company furnishing shipping facilities to the shipping public along that road?

Mr. Stevens: Yes, Sir.

Mr. McRae: Does the road seek to meet that demand?

Mr. Stevens: It does, yes, Sir.

Mr. McRae: Is there any other way for the products of the neighborhood in which you live to get to market, except over the Prescott & Northwestern?

Mr. Stevens: There is not, no Sir.

Mr. McRae: Do the shippers along the road use it for practically all of their business?

Mr. Stevens: They do.

Mr. McRae: What do you know in your community as to what the management of the Prescott & Northwestern has done toward encouraging the development of the country.

Mr. Stevens: They have done a great deal according to my knowledge; they have encouraged truck growing; also they went so far as

to furnish seed free of charge, shrubbery plants free of charge to the growers throughout the country.

Mr. McRae: You raise and ship potatoes to foreign mar-
3732 kets at the station at which you live?

Mr. Stevens: We do, yes, Sir.

Mr. McRae: How many carloads did you ship last year?

Mr. Stevens: We shipped seven last year, but on account of the freeze; if it hadn't been for the freeze, I expect we would have shipped more than fifty. We had a big crop of potatoes, but the freeze came and killed them, and consequently killed off our crop.

Mr. McRae: You were born and raised in that community?

Mr. Stevens: Yes, Sir; born and raised.

Mr. McRae: Will you tell the difference between the condition of the people before the railroad and now?

Mr. Stevens: I couldn't hardly begin to tell, there is such a big difference. When the railroad first began to head our way, the people were not raising anything but corn and cotton, and hardly making a living, and since the road is coming in there, they are able to raise any kind of produce, cantaloupe, peanuts, and ship it out and get a ready market.

Mr. McRae: Isn't it true that the building of this railroad in and through the neighborhood of Blevins has developed it into
3733 one of the most pro-perous communities anywhere in that part of the country?

Mr. Stevens: It has.

Examiner Burchmore: Judge McRae, I think it will suffice to ask Mr. Stevens if he fully corroborates and confirms the testimony heretofore offered with reference to the development of the country.

Mr. McRae: With the understanding that the Commission is satisfied that the country is being developed, we are willing to stop.

Examiner Burchmore: It seems to me that you have made as strong a record as you can reasonably make on the improvement of the country and the possibilities of the country.

Mr. McRae: We sincerely hope the Commission will take that view of it.

Mr. McRae: You operate a saw-mill?

Mr. Stevens: Yes, Sir.

Mr. McRae: What kind of lumber do you get?

Mr. Stevens: Hardwood, principally.

Mr. McRae: Do you buy that hardwood from the Ozan Lumber Company?

Mr. Stevens: No, sir.

3734 Mr. McRae: Where do you get your timber?

Mr. Stevens: From different parts of the woods.

Mr. McRae: You are satisfied with the rates?

Mr. Stevens: I am.

Mr. McRae: And with the terms you receive from this company?

Mr. Stevens: Yes, Sir; fully satisfied.

Mr. McRae: That is all. We had a witness from Nashville, but he is not present. We want to prove by that witness that the people of Nashville are not only satisfied with the service, but they are

anxious to have it kept up. And I will state in that connection that it is a fact, that we wish that service to be continued to Ashdown.

Examiner Burchmore: You as Counsel state that, the witness would not testify to that effect.

Mr. McRae: Yes, Sir.

Examiner Burchmore: Well, I think that will suffice.

Mr. McRae: I am informed that he would state that the service to Nashville is the best that goes to Nashville at this time.

Mr. McRae: I wanted to file the petition of 7 shippers from Kilgore; 25 from Blevins; 19 from Dotson; 5 from Dixon;
3735 16 from Redlands; 18 from Belton; 33 from Tokio; 39 from Highland; and 2 from Norvelle.

(The papers so offered and identified were received in evidence and thereupon marked Prescott & Northwestern Railroad Company, Exhibit- Nos. 2, 3, 4, 5, 6, 7, 8, 9, 10, received in evidence December 14, 1910, and are attached hereto.)

Mr. Bemis: In addition to the industries already mentioned, there are the following firms getting out ties and piling and staves: Western Tie and Timber Company, St. Louis, Mo.; J. K. Wortham, Belton, Ark.; John Ball, Belton, Ark.; W. L. Nelson, Blevins, Ark.; Gibson & Cunningham, staves, Dallas, Texas; another concern from Chicago; Henry Gund, Lacrosse, Wis.

Mr. McRae: We refer to a letter or communication addressed by the Chairman and his Associate Commissioners, of the Arkansas Commission, to the Interstate Commerce Commission, dated August 27, 1910. You have that letter, and we ask that it be understood as being a part of the record. I will not encumber the record with a copy of it.

Examiner Burchmore: What is the Chairman's name?

Mr. McRae: Falconer.

3736 Examiner Burchmore: It will be understood that the Commission will refer to that letter. We will adjourn until two o'clock.

3737 After Recess.

Saginaw and Ouachita River Railroad Company.

(T. M. Mehaffy, Esq., Attorney representing the Saginaw and Ouachita River Railroad Company, Present.)

FRANK NEIMEYER, was called as a witness, and having first been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: I understand that the Saginaw and Ouachita River Railroad Company is controlled by the stockholders of the Saginaw Lumber Company through stock ownership?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: And that the Saginaw Lumber Company,

in turn, is controlled by the A. J. Neimeyer interest, which control the Neimeyer Lumber Company?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: And who are interested in the lumber and the mills which we refer to?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: What is your position with the Saginaw and Ouachita River Railroad Company?

Mr. Neimeyer: Secretary and Treasurer.

3738 Examiner Burchmore: Are you an officer of the Saginaw Lumber Company?

Mr. Neimeyer: Secretary and Treasurer.

Examiner Burchmore: Mr. A. J. Neimeyer is President of both Companies?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Who is Auditor of the Railroad Company?

Mr. Neimeyer: C. J. Trowbridge.

Examiner Burchmore: Who is the Traffic Manager of the Railroad Company?

Mr. Neimeyer: We have a General Manager, F. N. Van Houten.

Examiner Burchmore: Is Mr. Trowbridge an officer of the Lumber Company?

Mr. Neimeyer: He is not.

Examiner Burchmore: Is Mr. Houten an officer, and if so what office?

Mr. Neimeyer: No office.

Examiner Burchmore: Is he not the General Manager of the Lumber Company?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Then you correct your remark?

Mr. Neimeyer: Yes, he is General Manager of the Lumber

3739 Company—rather Superintendent or whatever you call him. He is not Manager.

Examiner Burchmore: Well, he is an officer or employed?

Mr. Neimeyer: Employed as Superintendent.

Examiner Burchmore: I understand that the Saginaw and Ouachita River Railroad connects with the Iron Mountain System at Saginaw Junction, Arkansas?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: And that from that point it runs on to the east bank of the Ouachita River?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: At a point known as Saginaw?

Mr. Neimeyer: The Post-Office is known as Saginaw—the billing point—is known as Ouachita.

Examiner Burchmore: Does it cross the river?

Mr. Neimeyer: No sir.

Examiner Burchmore: Does this railroad connect with any other main line railroad?

Mr. Neimeyer: No sir.

Examiner Burchmore: What is its total rail mileage?

Mr. Neimeyer: Two and three-fourths miles including switches.

3740 Examiner Burchmore: And how much is the net main line?

Mr. Neimeyer: I think two and a half miles.

Examiner Burchmore: Are there any private tram lines connecting with this Railroad?

Mr. Neimeyer: There are not.

Examiner Burchmore: Are there any other private tram lines in that vicinity which originate traffic for this railroad?

Mr. Neimeyer: Across the Ouachita River on the west side.

Examiner Burchmore: That is the private tram road of the Saginaw Lumber Company?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: What is the mileage of that private tram road?

Mr. Neimeyer: Between 12 and 14 miles.

Examiner Burchmore: How much of that would you describe as being main line?

Mr. Neimeyer: None of it.

Examiner Burchmore: It is all short spurs?

Mr. Neimeyer: Well, it extends into the timber—I suppose you would call it all main line. There are no branches from it that I know of. It is just one line I think.

3741 Examiner Burchmore: How do you cross the river with traffic?

Mr. Neimeyer: We bring our logs in on the west side of the river and unload them and roll them into the river and they are floated across to the saw mill, which is on the east bank of the Ouachita River.

Examiner Burchmore: The river acts as a mill pond?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Are there are industries along the line of the Saginaw and Ouachita River Railroad?

Mr. Neimeyer: There is a saw mill that manufactures furniture stock and hardwood, gum and oak—manufactures furniture stock.

Examiner Burchmore: Where is that mill located?

Mr. Neimeyer: Near Ouachita.

Examiner Burchmore: Well, the road is only two miles long, and it has to be near both ends of its road line?

Mr. Neimeyer: It is much closer to Ouachita than Saginaw Junction.

Examiner Burchmore: Within a few hundred feet?

Mr. Neimeyer: About three hundred yards I would say.

3742 Examiner Burchmore: From the end of the line?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Where does that mill get its logs?

Mr. Neimeyer: Buys them from individuals.

Examiner Burchmore: Where do those individuals get the logs?

Mr. Neimeyer: They haul them by wagon.

Examiner Burchmore: From north and south of the line?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Those logs do not come across the river?
Mr. Neimeyer: No sir.
Examiner Burchmore: Is this hardwood gum and oak timber, cut on land owned by the Saginaw Lumber Company?
Mr. Neimeyer: It is not.
Examiner Burchmore: Nor in which it has stumpage rights?
Mr. Neimeyer: None at all.
Examiner Burchmore: What is the population of Saginaw?
Mr. Neimeyer: Possibly 250.
Examiner Burchmore: How many of that number are employees of the Saginaw Lumber Company, including their
3743 families?
Mr. Neimeyer: 250.
Examiner Burchmore: The entire town is composed of Saginaw Lumber Company people?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Are there any stores there?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: There is a company store at that point?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Is there any other store there?
Mr. Neimeyer: None at all.
Examiner Burchmore: This may be described in common parlance as a Company town?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Any farms along the railroad?
Mr. Neimeyer: Yes sir, there are.
Examiner Burchmore: Well, do they ship anything over the Railroad?
Mr. Neimeyer: Very little. They are so close to the Iron Mountain that they can haul by wagon and only have the one haul. It is cheaper for them.
3744 Examiner Burchmore: Are there any stave makers on the line?
Mr. Neimeyer: No sir.
Examiner Burchmore: Then the only industries that ship over this line are the saw mills of the Saginaw Lumber Company and this small mill near Ouachita?
Mr. Neimeyer: There are some little freights less than car load lots shipped.
Examiner Burchmore: But not by industries?
Mr. Neimeyer: No sir, not by industries.
Examiner Burchmore: When was this railroad constructed?
Mr. Neimeyer: I could not tell you; it has been there fifteen or sixteen years.
Examiner Burchmore: When was the saw mill built?
Mr. Neimeyer: Well, there has been a sawmill there that long, I think, and that one burned down and the new one was rebuilt.

Examiner Burchmore: Well, was the saw mill established and the railroad open about the same time?

Mr. Neimeyer: I rather think so.

Examiner Burchmore: That is your impression?

Mr. Neimeyer: Yes, that is before my time though.

3745 Examiner Burchmore: Well, was this saw mill first established by the Saginaw Lumber Company, or was it purchased by them for prior owners?

Mr. Neimeyer: Purchased by them from prior owners?

Examiner Burchmore: In what year was the purchase?

Mr. Neimeyer: I could not tell you exactly, I think 1895.

Examiner Burchmore: You have been operating the saw mill since that time?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Is it your understanding that the logs for this mill were formerly obtained on the east side of the river?

Mr. Neimeyer: No sir.

Examiner Burchmore: Always have been carried across the river?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Does the Saginaw Lumber Company own any saw mills along the railroad?

Mr. Neimeyer: It does not.

Examiner Burchmore: What is the extent of its timber holdings across the river?

3746 Mr. Neimeyer: At the present time?

Examiner Burchmore: Yes.

Mr. Neimeyer: About 5,000 acres, including agricultural land—6,000.

Examiner Burchmore: How much timber is there in feet?

Mr. Neimeyer: About 24,000,000 acres.

Examiner Burchmore: About Twenty four million?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: When was the railroad Company incorporated if you know?

Mr. Neimeyer: In 1905.

Mr. Mehaffy: Counsel tenders in evidence a certified copy of the articles of incorporation which seems to be dated in June 1905 and under which this corporation is formed as a common carrier railroad under the laws of Arkansas.

The charter so offered and identified was received in evidence, and thereupon marked "Defendant's Exhibit #1, received in evidence December 14th, 1910," page —, and is attached hereto.

Examiner Burchmore: It will not be necessary to file this charter but it will be noted that it was tendered in evidence and the statement will appear on the face of the record.

3747 Mr. Mehaffy: Right at this point? I also tender a certified copy of the order of the Board of Incorporators that was introduced in the other case applying to the other road this morning.

Examiner Burchmore: That was dated in June 1905?

Mr. Mehaffy: I beg pardon.

Examiner Burchmore: That was dated in June 1905?

Mr. Neimeyer: That is the proper date, isn't it?

Examiner Burchmore: Yes, that is correct. The total capital stock of this railroad, as provided for in the charter, seems to have been $25,000.00. Was that amount of stock actually issued in the beginning?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Was it fully paid for?

Mr. Neimeyer: In cash, no sir.

Examiner Burchmore: How was it paid for?

Mr. Neimeyer: It was carried as an asset in the Saginaw Lumber Company's books to the amount of $25,000.00. You understand Mr. Examiner, the road was already built and was incorporated afterwards.

Examiner Burchmore: The stock was issued in exchange for the railroad, in fact?

3748 Mr. Neimeyer: Yes.

Examiner Burchmore: The railroad had previously belonged outright to the Saginaw Lumber Company?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Has the Saginaw Railroad company any bonds?

Mr. Neimeyer: No sir.

Examiner Burchmore: Any other indebtedness?

Mr. Neimeyer: No sir.

Examiner Burchmore: The railroad corporation, therefore and the lumber company, are substantially identical in interest at the present time and have been since the date of incorporation of the railroad, although they are distinct and separate corporations?

Mr. Neimeyer: Well, there is quite a number of stockholders in the Saginaw Lumber Company that own no stock in the railroad company.

Examiner Burchmore: What are the total holdings of those stockholders?

Mr. Neimeyer: In the Lumber Company—the holdings of the lumber company that are not in the railroad company?

Examiner Burchmore: Yes.

3749 Mr. Neimeyer: I would think 60%.

Examiner Burchmore: Then a minority interest in the lumber company owns this railroad?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Then how does this minority interest get to acquire the railroad?

Mr. Neimeyer: I understood that in the begin-ing—that prior to the incorporation, the lumber company owned the railroad. They did in fact.

Examiner Burchmore: Sir?

Mr. Neimeyer: They do in fact.

Examiner Burchmore: They do to-day in fact?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: This railroad is a standard gauge?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Does it hold any trackage rights over the Iron Mountain?
Mr. Neimeyer: None at all.
Examiner Burchmore: Does it accord trackage rights to any other company?
Mr. Neimeyer: No sir.
Examiner Burchmore: What is the weight or rail?
3750 Mr. Neimeyer: 56 pounds I think.
Examiner Burchmore: Who furnished that rail?
Mr. Neimeyer: I could not tell you.
Examiner Burchmore: Is it owned by the railroad company?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Is the right of way on which this road is constructed owned by the railroad company?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: In fee?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: What is the nature of the ballast?
Mr. Neimeyer: Why, it is just a dirt road: I don't think there is any ballast.
Examiner Burchmore: Any grades in the road?
Mr. Neimeyer: None at all.
Examiner Burchmore: Any bridges?
Mr. Neimeyer: A few small ones.
Examiner Burchmore: Any station buildings?
Mr. Neimeyer: None at all.
Examiner Burchmore: Any side tracks other than those at the mill at Ouachita?
3751 Mr. Neimeyer: None at Ouachita, no sir.
Examiner Burchmore: Any inter-change track with the Iron Mountain?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Who owns that inter-change track?
Mr. Neimeyer: The Saginaw and Ouachita River Railroad Company.
Examiner Burchmore: Is the private tram line of the Saginaw Railroad Company west of the river, narrow or standard gauge?
Mr. Neimeyer: Narrow.
Examiner Burchmore: That is built of lighter tails?
Mr. Neimeyer: Yes thirty five pounds.
Examiner Burchmore: Is that private tram road operated by the Railroad Company?
Mr. Neimeyer: No sir.
Examiner Burchmore: Do any engines owned by the railroad Company, or cars owned by the railroad company, move over this private tram road?
Mr. Neimeyer: No sir.

Examiner Burchmore: Then the railroad company has nothing to do with the private tram road?

3752 Mr. Neimeyer: None at all.

Examiner Burchmore: Do the joint through rates purport to apply over that private tram road?

Mr. Neimeyer: I never considered it as such.

Examiner Burchmore: Well, on the face of the tariff, do they so apply?

Mr. Neimeyer: No sir.

Examiner Burchmore: How many locomotives has the railroad Company?

Mr. Neimeyer: One.

Examiner Burchmore: How many cars?

Mr. Neimeyer: One caboose which is used as a passenger accommodation car for passengers, and freight and mail.

Examiner Burchmore: Any other cars?

Mr. Neimeyer: No sir.

Examiner Burchmore: Our reports show one passenger car and one freight car? Is that all the same car?

—: That is the only one I know of.

Examiner Burchmore: Then our record should show one half of a passenger and one half of a freight car.

Mr. Neimeyer: I did not make that report.

3753 Examiner Burchmore: Well I did not make it. I suppose the man looked at the car and filled out both blanks. How many employees are engaged in track work on this railroad?

Mr. Neimeyer: I think there are two or three. It varies, there are not many.

Examiner Burchmore: They only devote a part of their time to the railroad?

Mr. Neimeyer: They do no other labor, only to the road, but they do not work at that in certain seasons of the year—only the dry season.

Examiner Burchmore: You have no station employees?

Mr. Neimeyer: No sir.

Examiner Burchmore: You have no train crew?

Mr. Neimeyer: One train crew.

Examiner Burchmore: How many employees are there in the general office on a salary basis?

Mr. Neimeyer: Only one. You mean in the general office, clerks and bookkeepers?

Examiner Burchmore: Yes.

Mr. Neimeyer: Why, there is not any that devotes his entire time.

3754 Examiner Burchmore: What is the total compensation paid to this general office force by this railroad?

Mr. Neimeyer: Well, we have an auditor who receives $50.00 and the General Superintendent and the Clerks and Bookkeepers, figures $595.83.

Examiner Burchmore: Per month or per annum?

Mr. Neimeyer: Per month.

Examiner Burchmore: The Auditor gets $50.00 per month?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Does the Auditor receive any salary from the lumber company?
Mr. Neimeyer: I don't think he receives any from the Saginaw Lumber Company.
Examiner Burchmore: But he receives some from the Little Rock Maumelle and Western?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Are these salaries amounting to $595.83 paid to the men or to the company?
Mr. Neimeyer: Paid to the lumber company.
Examiner Burchmore: To cover the services rendered by these employees to the railroad company?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Are your trains or any of them
3755 operated on a regular schedule?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Have you any public time table?
Mr. Neimeyer: No sir, we have had a typewritten copy made several times.
Examiner Burchmore: How many trains daily have you?
Mr. Neimeyer: Two.
Examiner Burchmore: Two each way?
Mr. Neimeyer: Yes sir, two each way.
Examiner Burchmore: Do those trains connect with the Iron Mountain train?
Mr. Neimeyer: The passenger trains?
Examiner Burchmore: Yes.
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Does the train consist of one car and one engine?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: How many freight trains do you run daily?
Mr. Neimeyer: It is a combination train.
Examiner Burchmore: Then there is more than one car in train is there?
3756 Mr. Neimeyer: If there is any lumber to be brought out, there are—we have empties to go in.
Examiner Burchmore: Do you carry the United States mail?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Under a regular railroad contract?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: That contract is with the Post Office Department?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Do you carry express?
Mr. Neimeyer: No, no express.
Examiner Burchmore: Do you carry passengers for hire?
Mr. Neimeyer: Yes sir.

Examiner Burchmore: Those passengers purchase tickets?

Mr. Neimeyer: No sir, no tickets; cash fare.

Examiner Burchmore: What were the total receipts during the past year, or during any period that you figure, for passenger traffic?

Mr. Neimeyer: Three hundred and Twenty-nine Dollars and Eighty-five cents.

Examiner Burchmore: For the last fiscal year?

3757 Mr. Neimeyer: Yes sir.

Examiner Burchmore: How many passengers were carried one mile?

Mr. Neimeyer: 3,298 I guess if the figure the way I see it here.

Examiner Burchmore: Then the fare is 10 cents?

Mr. Neimeyer: 10 cents, yes sir; we could figure that out of course.

Examiner Burchmore: That is not the number of passengers carried one mile, but the total number of passengers carried?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: What was your total freight tonnage for any period?

Mr. Neimeyer: Last year—the fiscal year—my figures show 9274 tons. I notice there is a little difference between our annual report and those figures.

Examiner Burchmore: What is that statement?

Mr. Neimeyer: I see that my report shows 9274 tons.

Examiner Burchmore: Is that the total tonnage of freight?

Mr. Neimeyer: Yes, lumber and all commodities.

Examiner Burchmore: Well, that is quite a falling off

3758 from the previous year, isn't it?

Mr. Neimeyer: I had not noticed that.

Examiner Burchmore: For the fiscal year 1909, this report claims approximately 15,000 tons; is that incorrect?

Mr. Neimeyer: I could not tell you.

Examiner Burchmore: Well, do you think it is incorrect?

Mr. Neimeyer: Well, I don't know as it would be; I think we shipped a good deal more possibly in the year previous than we did in the past fiscal year.

Examiner Burchmore: What proportion of this total tonnage was furnished by the Saginaw Lumber Company?

Mr. Neimeyer: Practically all of it.

Examiner Burchmore: Would you say that 99% was a reasonable estimate?

Mr. Neimeyer: Well, 98 or 99—something like that.

Examiner Burchmore: What was the remainder of that tonnage—the nature of the remainder of your traffic?

Mr. Neimeyer: Flour and grain and groceries.

Examiner Burchmore: The major portion of that miscellaneous traffic was intended for the company's store, was it not?

Mr. Neimeyer: Yes sir.

3759 Examiner Burchmore: Did you handle any traffic for other persons than this company's store?

Mr. Neimeyer: Very little I suppose; I am quite sure.

Examiner Burchmore: As much as one hundred tons?
Mr. Neimeyer: No, I would rather think not.
Examiner Burchmore: As much as ten tons?
Mr. Neimeyer: Possibly so.
Examiner Burchmore: You have regular passenger fares?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: And your tariff rate is ten cents per ride?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Do you have any local freight rates published?
Mr. Neimeyer: We have published them, but they have not been approved.
Examiner Burchmore: Published but not approved by the State commission?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Are they on file with the Interstate Commerce Commission?
Mr. Neimeyer: I don't think so, as yet.
3760 Examiner Burchmore: You are a party to joint rates on lumber with the Iron Mountain system?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Is the rate from Ouachita on lumber the same as the Iron Mountain rate from Saginaw Junction? Does the Junction point rate apply back on your line?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: Then you take the same rate from your mill that you would take if located on the Iron Mountain really?
Mr. Neimeyer: Well, everything is billed from Ouachita.
Examiner Burchmore: I mean, the rate in cents per hundred pounds published is the same from your mill as if you were on the Iron Mountain really?
Mr. Neimeyer: I think so.
Examiner Burchmore: What division do you receive on lumber traffic?
Mr. Neimeyer: 7.4 cents.
Examiner Burchmore: Where does the major portion of this lumber go to? Is there any particular territory?
Mr. Neimeyer: To the North Central States.
3761 Examiner Burchmore: The division there is four cents?
Mr. Neimeyer: Well, we have system points—what we call system points. The Iron Mountain and the Missouri Pacific points we get three and four cents to; four to St. Louis and three cents from connected lines.
Examiner Burchmore: Is there any traffic on which you receive only two cents?
Mr. Neimeyer: Not to my knowledge.
Examiner Burchmore: Have you ever received a division exceeding four cents?
Mr. Neimeyer: Not that I know of.
Examiner Burchmore: What service does this railroad Company

render for which it should be paid three or four cents per hundred pounds as a division?

Mr. Neimeyer: The empty cars are switched in on the interchange track of the Iron Mountain and to the train which they operate from Ouachita to Saginaw Junction, and return—goes to the Interchange track and takes those cars to Ouachita and they are loaded with lumber and the lumber is hauled back to this interchange track.

Examiner Burchmore: Who issues the Bill of Lading?

Mr. Neimeyer: The Railroad company.

3762 Examiner Burchmore: The Saginaw and Ouachita River Railroad Company?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: These divisions are not supposed to take care partially of the expense of bringing the logs into the mill?

Mr. Neimeyer: No sir.

Examiner Burchmore: What is the maximum charge that you know allowed by the State Commission of Arkansas for switching movements of two miles?

Mr. Neimeyer: I could not tell you. My recollection is that it is—two miles—did you say?

Examiner Burchmore: Yes.

Mr. Neimeyer: I think the limit is three miles.

Examiner Burchmore: What is the amount?

Mr. Mehaffy: My recollection is that it is $3.00.

Examiner Burchmore: Per car?

Mr. Mehaffy: Yes sir. It is said to be now as high as $8.00, and five miles is the minimum.

Examiner Burchmore: Does this railroad comply with the state and interstate laws governing the conduct of interstate carriers?

3763 Mr. Neimeyer: Yes sir.

Examiner Burchmore: It files the necessary reports with the commission?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Keeps its accounts in the prescribed manner?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Is the road operated at a profit or at a loss?

Mr. Neimeyer: At a profit.

Examiner Burchmore: What dividends has it paid since its incorporation?

Mr. Neimeyer: I don't know as to dividends; it is in the annual report.

Examiner Burchmore: They will be shown in the annual report filed with the Commission?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: How long have these reports been filed—ever since incorporation?

Mr. Neimeyer: I think so.

Examiner Burchmore: What was the purpose of the incorporation of this company?

3764 Mr. Neimeyer: To be able to serve the public as a common carrier.

Examiner Burchmore: Well, it was already there? It did not require to be incorporated to serve anyone did it?

Mr. Neimeyer: Well, to do business as a railroad, and to be run as a railroad, I think it would be better to be incorporated than not.

Examiner Burchmore: Were you advised by the St. Louis and Iron Mountain and Southern Railroad Company to incorporate this railroad?

Mr. Neimeyer: Not to my knowledge.

Examiner Burchmore: When were divisions first accorded to this road?

Mr. Neimeyer: They have been receiving divisions for years. I could not say just when.

Examiner Burchmore: Prior to 1905?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Was this railroad incorporated in order to legalize its divisions?

Mr. Neimeyer: I don't know.

Examiner Burchmore: Well, you don't answer no.

Mr. Neimeyer: No sir.

3765 Examiner Burchmore: Has the railroad a surplus at the present time?

Mr. Neimeyer: Has it a surplus?

Examiner Burchmore: Yes.

Mr. Neimeyer: I think so.

Examiner Burchmore: What is the amount of that surplus?

Mr. Neimeyer: I am not sure whether it has or not.

Examiner Burchmore: If I say that the report dated May 25, 1910, shows net revenue of $4,343.06 from the operation of the road for the fiscal year ending June 30, 1909, during which year the total receipts were $9,153.50, would you say that the figures were substantially accurate and in accord with your impression?

Mr. Neimeyer: I think so.

Examiner Burchmore: This report shows, as to the disposition made of the net revenue, that it is being allowed to accumulate. Is that the usual disposition made of net revenues on your road?

Mr. Neimeyer: I think it is, although I am not familiar with that as I might be.

3766 Examiner Burchmore: It is your understanding, though, that this road is operated at a substantial profit?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Are your division sheets filed with the commission?

Mr. Neimeyer: Yes sir.

Cross-examination:

Mr. Mehaffy: Mr. Neimeyer, this road performs all the services of a common carrier just as any main line does—takes all the property or persons that offer for transportation?

Mr. Neimeyer: Yes sir.

Mr. Mehaffy: I believe you said that it complies with all the regulations and rules of the Interstate Commerce Commission and the Railroad Commission of Arkansas?

Mr. Neimeyer: Yes sir.

Mr. Mehaffy: Do you know how it is taxed by the authorities of Arkansas—whether as other railroads by the same body?

Mr. Neimeyer: Just the same.

Mr. Mehaffy: You are controlled and regulated by the
3767 Arkansas Railroad Commission?

Mr. Neimeyer: Yes sir.

Mr. Mehaffy: Now, Mr. Examiner, there are some three or four general questions I want to ask that do not particularly apply to this railroad, but they do apply to the intervener's contentions?

Examiner Burchmore: Very well.

Mr. Mehaffy: You have been asked by the Examiner about incorporating this road. I will ask you if it is not true that the railroad company—any railroad company—cannot condemn rights of way or exercise the right of eminent domain at all without being incorporated as a railroad company?

Mr. Neimeyer: That is my understanding of the law.

Mr. Mehaffy: As a common carrier?

Mr. Neimeyer: Yes sir.

Mr. Mehaffy: In many of these localities—most of them in fact—the timber on these roads cannot be reached in any other way but by a railroad, can they?

Mr. Neimeyer: That is my understanding.

Mr. Mehaffy: And in order to reach those bodies of timber, it is necessary, of course, to cross tracts of land now and then that
3768 belong to private individuals that you could not cross at all without you had the power to condemn?

Mr. Neimeyer: Yes sir.

Examiner Burchmore: Mr. Mehaffy, what is the application of these questions to this case?

Mr. Mehaffy: I said they did not apply to this case particularly, but the questions were asked by the intervener on yesterday and I had no opportunity to ask any such questions.

Examiner Burchmore: This testimony would be applicable more especially to the Little Rock, Mammelle and Saline? This road has condemned no property?

Mr. Mehaffy: No sir.

Examiner Burchmore: The line across the river was not obtained through condemnation proceedings?

Mr. Mehaffy: No sir; I stated to your Honor that they did not apply to this case.

Examiner Burchmore: I understand.

Mr. Mehaffy: This road was already in operation and owning its right of way, I believe you said, before it was ever incorporated?

3769 Mr. Neimeyer: Yes sir.

Mr. Mehaffy: Of course, there was no necessity for it to incorporate for that purpose.

Mr. Neimeyer: No sir.
Mr. Mehaffy: You charge ten cents a mile on this road?
Mr. Neimeyer: No sir.
Mr. Mehaffy: Ten cents——
Mr. Neimeyer: For the entire distance, two and one half miles.
Mr. Mehaffy: What is the fare?
Mr. Neimeyer: Ten cents.
Mr. Mehaffy: I mean, what is the law—it is three cents?
Mr. Neimeyer: I believe it is about that.
Examiner Burchmore: Two more questions. Do the officers of this railroad company receive any interstate transportation as such officers?
Mr. Neimeyer: Yes.
Examiner Burchmore: I believe you have testified in connection with the —— and Great Western that certain officers of that
3770 corporation receive free interstate transportation?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: In addition to the gentlemen mentioned in that connection, are there any other officers of that company who receive transportation of this company.
Mr. Neimeyer: Only the President and Secretary.
Examiner Burchmore: They receive that as officers of this particular Company?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: They use these passes?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: What is the distance from Saginaw Junction to St. Louis?
Mr. Neimeyer: Three Hundred——
Examiner Burchmore: About three hundred miles?
Mr. Neimeyer: No, three ninety and some odd miles.
Examiner Burchmore: Nearly four hundred miles?
Mr. Neimeyer: Yes sir.
Examiner Burchmore: What is the car load rate on lumber from Saginaw Junction to St. Louis?
Mr. Neimeyer: 18 cents I believe.
3771 Examiner Burchmore: What is your division of the 18 cent rate when applied from Ouachita?
Mr. Neimeyer: Four cents.
Examiner Burchmore: Then, for a haul on the empty car of two miles and a small fraction and a haul of a loaded car of about two miles, you receive four cents per hundred pounds?
Mr. Neimeyer: Yes sir; it is two and a half miles.
Examiner Burchmore: Leaving fourteen cents for the Iron Mountain haul of four hundred miles, approximately.
Mr. Neimeyer: Yes sir.
Examiner Burchmore: In your judgment, is that a fair and adequate division of the rate to be accorded to the Iron Mountain?
Mr. Neimeyer: Yes, I would think so.
Examiner Burchmore: The Iron Mountain has no reasonable right to expect a larger division of that rate?

Mr. Neimeyer: No.

Mr. Mehaffy: Referring back to condemnation, I want to ask you if you do not know that these trunk lines and other railroads cannot condemn land in Arkansas for private industries; in other
3772 words, if it is just to get to a saw mill or other industry, that they are not authorized to condemn?

Mr. Neimeyer: No, that is my understanding, that they are not.

Mr. Riddell: Have you in your experience—can you recall an understanding, or have you ever heard of one, where in the division of rates between a short originating line and a long trunk line, the basis is mileage?

Examiner Burchmore: That is not the Commission's understanding, but that basis obtains.

Mr. Neimeyer: No.

Mr. Riddell: Is it not the general custom to give the originating line a much larger proportion of the relative pro rata because of the fact that it originates the tonnage?

Mr. Neimeyer: Yes sir.

Mr. Riddell: You say you have been getting a division for sometime on this road? How many years was it?

Mr. Neimeyer: I don't know exactly but several years.

Mr. Riddell: Is it as much as seven years?

Mr. Neimeyer: More than that.

Mr. Riddell: Well your division is the same now as it was
3773 originally?

Mr. Neimeyer: I think so.

Mr. Riddell: On the St. Louis rate?

Mr. Neimeyer: I think so.

Mr. Riddell: The rate to St. Louis prior to 1903 was sixteen cents, I believe. Do you know that to be a fact?

Mr. Neimeyer: No I do not.

Mr. Riddell: The point I was trying to make Mr. Examiner was that—and I know this by reason of the fact that the Iron Mountain argued it about a different case before Commissioner Harlan—that when the rate was sixteen cents the said line got the same proportion as then—all of the increase went to the Iron Mountain when the increase was made.

Mr. Neimeyer: I am quite sure that we received the same division ever since we received any; what the rate was at that time I do not know.

Mr. Jeffrey: Mr. Neimeyer, if the Iron Mountain rate was made on the same scale that your divisions are made on, the rate would be on Yellow Pine from Ouachita Junction to St. Louis about $8.00 per hundred, would it not?

3774 Mr. Neimeyer: That would be about the calculation, I guess.

Mr. Jeffrey: You think that is a fair rate?

Mr. Neimeyer: Is it?

Mr. Jeffrey: Yes.

Mr. Neimeyer: I think not.

Mr. Jeffrey: I would like to make a statement for information. I am informed—through my connection with the Iron Mountain and Missouri Pacific—that following a decision of the Vicksburg-Shreveport case, known as the first tap line case, decided by Commissioner Prouty, the Missouri Pacific advised the traffic department that it would be illegal to pay an allowance or a division of any kind to an unincorporated tap line; but that it would be legal to pay a division to an incorporated tap line; and I am informed that following that decision—that opinion of the legal department—that the traffic department advised all lumber interests along their line, wherever they had been giving an allowance, which I believe was the custom at the time, that they would no longer do so unless their lines were incorporated, and new lines they advised that they had to be incor-
3775 porated. I thought I would get that in the record.

Examiner Burchmore: Is there any further statement you desire to make, Mr. Neimeyer?

Mr. Mehaffy: There may be some exhibits we want to file.

Examiner Burchmore: We desire a map of the road drawn to scale, and that map should show the private tram line of the lumber company as well as this railroad itself, and it should show the mill location and refer to the Iron Mountain system, and any other information that will be necessary to make up a complete map of this region.

Mr. Neimeyer: That will all be furnished.

Examiner Burchmore: We would also like a statement for the last fiscal year of the total tonnage of lumber handled on account of the Saginaw Lumber Company and the total tonnage of other freight handled on account of that Company or handled on account of — for persons or firms in which that company is interested, and, separately set out, the figures on traffic for the general public, lumber and merchandise. State those figures in tons and in dollars.

Mr. Mehaffy: What time would you suggest for that?

3776 Examiner Burchmore: At your convenience, in a week or fortnight. They may be mailed to the commission.

3777 Roosevelt and Western Railroad Company.

(Appearances, Charles T. Coleman, Esq. Attorney for the Roosevelt and Western Railroad Company).

J. P. SCHUH, was called as a witness, and having been first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Where do you reside, Mr. Schuh?

Mr. Schuh: Cairo, Illinois.

Examiner Burchmore: Are you an officer of the Roosevelt and Western Railroad Company?

Mr. Schuh: Yes sir.

Examiner Burchmore: You are President?

Mr. Schuh: President.

Examiner Burchmore: Where is the line of the Roosevelt and Western Railroad?

Mr. Schuh: It runs west from a new station called Roosevelt on the M. H. & L. branch about half way between Tallulah and Lake Providence.

Examiner Burchmore: The M. H. & L. Branch of what?

Mr. Schuh: It used to be called the M. H. & L. branch of the Iron Mountai-; it is from McGee to Ferriday.

Examiner Burchmore: Where is that on the map—up
3778 near Ruston?

Mr. Schuh: Here it is (indicating).

Mr. Gutheim: Was formerly known as Stamboul?

Mr. Schuh: Yes sir.

Mr. Gutheim: What lumber company has a mill on this line?

Mr. Schuh: The J. B. Schuh Lumber Company—my own concern.

Mr. Gutheim: Where is that mill located?

Mr. Schuh: 18 miles west of Roosevelt where the junction is—where we meet the Iron Mountain.

Examiner Burchmore: What is the name of the mill or station?

Mr. Schuh: Lynchville.

Examiner Burchmore: What is the total mileage of this railroad?

Mr. Schuh: Eight miles.

Examiner Burchmore: At Lynchville, the road divides into two branch lines?

Mr. Schuh: Yes, but the one going straight out is just now being laid.

Examiner Burchmore: Eight miles are in operation?
3779 Mr. Schuh: Yes sir.

Examiner Burchmore: This road runs through a timber country?

Mr. Schuh: Yes sir.

Examiner Burchmore: Are there any farms on the line?

Mr. Schuch: Yes, three large farms.

Examiner Burchmore. How long have these farms been in operation—a, long period of time?

Mr. Schuh: Well, I don't know how long, but that railroad was built there about nine years ago, I think they started out.

Examiner Burchmore: Are there any other industries along the line besides this saw mill and these farms?

Mr. Schuh: No. sir.

Examiner Burchmore: No small mills?

Mr. Schuh: No sir.

Examiner Burchmore: Any farmers or local inhabitants who cut staves and other small forest products?

Mr. Schuh: No sir, no other forest products that comes off the property.

Examiner Burchmore: When was this railroad constructed?
3780 Mr. Schuh: In 1909—in the spring of 1909, a little over a year ago.

Examiner Burchmore: And the whole of the present line was constructed at that time.

Mr. Schuh: No, not all of it; we have added about three miles to it since that time.

Examiner Burchmore: That three miles is on that southern branch line beyond the mill?

Mr. Schuh: Yes sir.

Examiner Burchmore: When was the mill opened?

Mr. Schuh: In June 1907.

Examiner Burchmore: The mill was opened before the line was built?

Mr. Schuh: Yes sir.

Examiner Burchmore: How do you get your lumber from the mill to the railroad?

Mr. Schuh: We got it out with wooden tram and mule—we tried to—before.

Examiner Burchmore: You had a wooden tram line?

Mr. Schuh: Yes sir.

Examiner Burchmore: Was that tram line incorporated?

3781 Mr. Schuh: No sir.

Examiner Burchmore: Did it have any name?

Mr. Schuh: No sir.

Examiner Burchmore: Or receive any division?

Mr. Schuh: No sir.

Examiner Burchmore: It was just about the same as a wagon haul?

Mr. Schuh: Just a wagon haul.

Examiner Burchmore: Did it have any cars?

Mr. Schuh: No sir. Well——

Examiner Burchmore: Kind of wagon cars?

Mr. Schu-: Yes, sir no wheel trucks—tram trucks.

Examiner Burchmore: When was this railroad incorporated?

Mr. Schuh: The fourth of May 1909.

Examiner Burchmore: About the time the construction began?

Mr. Schuh: Yes sir.

Examiner Burchmore: What was the total capital stock of the railroad?

Mr. Schuh: $50,000.00.

Examiner Burchmore: What was that entire capital stock issued?

3782 Mr. Schuh: No sir.

Examiner Burchmore: How much was issued?

Mr. Schuh: Only $15,000.00.

Examiner Burchmore: Was that paid for in cash?

Mr. Schuh: No sir.

Examiner Burchmore: How much was paid for—paid for or by the lumber company—of this road?

Mr. Schuh: The entire road.

Examiner Burchmore: The right of way and constructing of the railroad?

Mr. Schuh: The constructing of the railroad with the equipment?

Examiner Burchmore: The railroad was at that time completed for the purchase price for the distance completed?

Mr. Schuh: Yes sir.

Examiner Burchmore: Has any additional capital stock been issued since thag original $15,000.00?

Mr. Schuh: No sir.

Examiner Burchmore: That is the present capital stock?

Mr. Schuh: Yes sir.

3783 Examiner Burchmore: How were the extensions of the line financed?

Mr. Schuh: Well, now, when we originally bought that road, we bought it for $10,000.00? I don't quite understand you, I don't believe. Since that there has $5,000.00 in stock more been issued, which makes the $15,000.00 paid up.

Examiner Burchmore: Was this $5,000.00 in stock given to the lumber company, or given at its direction in exchange for the railroad turned over?

Mr. Schuh: Yes sir.

Examiner Burchmore: It was not used in building the road?

Mr. Schuh: No it had already been built then.

Examiner Burchmore: Who furnished the steel rails out of which this road was constructed?

Mr. Schuh: Why, we leased the rails from the Iron Mountain Railroad.

Examiner Burchmore: Was that old rail?

Mr. Schuh: Yes sir.

Examiner Burchmore: What is the rate of payment for the rail?

3784 Mr. Schuh: Six per cent on the valuation per ton—$29.00 a ton.

Examiner Burchmore: That valuation represents the fair market value of the rail?

Mr. Schuh: Yes, $29.00 a ton. I think the contract reads: I have not it here with me but that is the rate.

Examiner Burchmore: You have the privilege of turning it back?

Mr. Schuh: Yes or buying it.

Examiner Burchmore: How long does that lease run?

Mr. Schuh: Eight years.

Examiner Burchmore: This railroad then, was incorporated and constructed subsequent to the first announcement of the commission in the so-called Star Grain and Lumber Company case?

Mr. Schuh: I don't know when that was.

Examiner Burchmore: Did you ever hear of the tap line question?

Mr. Schuh: Yes sir.

Examiner Burchmore: Before you built this road?

Mr. Schuh: Read it in the lumber journal?

3785 Examiner Burchmore: Before you built this road Mr. Schuh?

Mr. Schuh: Just about that time I think.

Examiner Burchmore: Mr. J. M. Kennedy is Vice-President of the railroad Company?

Mr. Schuh: Yes sir.

Examiner Burchmore: Is he an officer of the J. P. Schuh Lumber Company?

Mr. Schuh: He is not; he is not connected with it.

Examiner Burchmore: Is that lumber company incorporated?

Mr. Schuh: No sir.

Examiner Burchmore: It is a co-partnership between individuals?

Mr. Schuh: Just an individual business.

Examiner Burchmore: Lee Shields is Secretary Treasurer of the Railroad Company?

Mr. Schuh: Yes sir.

Examiner Burchmore: Do you receive any salary from the railroad Company?

Mr. Schuh: He has no interest in it whatever; he is in the lumber company.

3786 Examiner Burchmore: Do you receive any salary from the railroad?

Mr. Schuh: No sir.

Examiner Burchmore: Do these other gentlemen receive salaries from the railroad?

Mr. Schuh: No sir.

Examiner Burchmore: The Railroad pays no salaries to its officers?

Mr. Schuh: No sir, it has not got it to pay.

Examiner Burchmore: Do you own the entire capital stock of the railroad company?

Mr. Schuh: Yes, practically so.

Examiner Burchmore: Except directors' qualifying shares?

Mr. Schuh: Yes sir.

Examiner Burchmore: Who owns those?

Mr. Schuh: Mr. Kennedy and Mr. Shields and several other parties.

Examiner Burchmore: They did not buy these for cash did they?

Mr. Schuh: No I gave them the shares of stock for services rendered in helping me get the rights of way and

3787 drawing up the papers etc.

Examiner Burchmore: What proportion of the timber lands or timber rights along this railroad do you own or hold?

Mr. Schuh: We own all of it that the road is now on. I have drawn a lead pencil mark around it—9600 acres.

Examiner Burchmore: These lands are timber holdings enclosed in pencil lines on this sketch which will be received in evidence marked Exhibit # —, are owned by your company?

Mr. Schuh: No, not the lands.

Examiner Burchmore: The land or timber rights?

Mr. Schuh: The timber rights yes sir; we do not own the land.

Examiner Burchmore: Well then, the tap line corporation is substantially owned by yourself—this road at this time?

Mr. Schuh: I expect to have to divide up that ownership later on.

Examiner Burchmore: You hold no trackage right from the Iron Mountain system?

Mr. Schuh: No sir.

Examiner Burchmore: Is this a narrow or standard gauge
3788 system?

Mr. Schuh: Standard gauge.

Examiner Burchmore: What is the weight of the rail?

Mr. Schuh: One and one eighth mile, the main line from Roosevelt to Lynchfield station is 56 pounds: the other is thirty five and forty.

Examiner Burchmore: Is the road graded?

Mr. Schuh: Yes sir.

Examiner Burchmore: Balla-ted?

Mr. Schuh: Not ballasted.

Examiner Burchmore: Do you have any station buildings?

Mr. Schuh: No sir I would not call it a station building?

Examiner Burchmore: How many locomotives?

Mr. Schuh: One.

Examiner Burchmore: Was that purchased second hand from the railroad Company:

Mr. Schuh: No I bought that from some railroad company but not the Iron Mountain I have forgotten who I did buy it from.

Examiner Burchmore: How many cars have you and what
3789 description?

Mr. Schuh: Fourteen.

Examiner Burchmore: Logging cars.

Mr. Schuh: Ten of them are logging cars.

Examiner Burchmore: What are the other four?

Mr. Schuh: Two are box cars and two slab cars—refuse cars I would say.

Examiner Burchmore: What are these box cars used for?

Mr. Schuh: Well, we use them for taking men and almost anything up and down the line to work.

Examiner Burchmore: Work cars?

Mr. Schuh: Work cars.

Examiner Burchmore: Have you any station agent?

Mr. Schuh: One at Lynchville.

Examiner Burchmore: Does he devote his entire time to the station business?

Mr. Schuh: No not his entire time.

Examine Burchmore: He works also for the lumber company?

Mr. Schuh: Yes sir.

Examiner Burchmore: What proportion of his salary does he get from the railroad Company?

Mr. Schuh: He gets half of it.

3790 Examiner Burchmore: You have one train crew?

Mr. Schuh: Yes sir.

Examiner Burchmore: Do they do any work for the lumber Company?

Mr. Schuh: They do not.

Examiner Burchmore: What other employees has the Railroad Company if any?

Mr. Schuh: Besides the agent and the train crew, it has the section foreman and a section gang of five; it varies; sometimes it is three and sometimes eight or nine.

Examiner Burchmore: Do you run your trains on regular schedule?

Mr. Schuh: No sir.

Examiner Burchmore: An irregular service?

Mr. Schuh: Irregular service.

Examiner Burchmore: You carry passengers for hire?

Mr. Schuh: No.

Examiner Burchmore: Do you carry any merchandise for the general public?

Mr. Schuh: Yes sir.

Examiner Burchmore: How extensive is that movement?

3791 Mr. Schuh: Well, it is all that is offered. This year at the present time I think it is about 600 tons, consisting of rice, cotton, cotton seed meal and hay.

Examiner Burchmore: Well, those are farm products?

Mr. Schuh: Farm products, that's all.

Examiner Burchmore: Do you handle anything else but farm products or lumber?

Mr. Schuh: Nothing else.

Examiner Burchmore: You do not carry mail or express matter?

Mr. Schuh: No sir.

Examiner Burchmore: How much lumber does your railroad haul for the Schuh Lumber Company?

Mr. Schuh: This year so far I believe it has hauled about four and a quarter million feet or about fifty five hundred to six thousand tons.

Examiner Burchmore: Does your lumber company haul the logs to the mill?

Mr. Schuh: Yes sir.

Examiner Burchmore: And hauls the lumber out of the mill?

Mr. Schuh: Yes sir.

3792 Examiner Burchmore: The cars are furnished for the lumber shipments——

Mr. Schuh: They are furnished by Iron Mountain; their system cars, and our engine goes out that mile to the station and gets them and brings them back and when they are loaded our crew and engine brings them out to the Iron Mountain main line.

Examiner Burchmore: Does your lumber company have any locomotives?

Mr. Schuh: No sir.

Examiner Burchmore: Any cars?

Mr. Schuh: No sir.

Examiner Burchmore: Then the Railroad Company hauls the logs from the woods into the mill?

Mr. Schuh: Yes sir.

Examiner Burchmore: What is its pay for that service?

Mr. Schuh: They get one cent a thousand for that. I allow them that for the simple reason that our division—the service of making the switch out to the main line and back with system cars take about all the revenue that we derive, which is the division.

3793 Examiner Burchmore: Is there any bill of lading or way bill issued for the movement of logs into the Mill?

Mr. Schuh: My instructions are to issue way bills.

Examiner Burchmore: Then way bills are issued after the logs reach the mill?

Mr. Schuh: No, they are billed out to wherever the camp is.

Examiner Burchmore: You send way bills out before the logs are shipped?

Mr. Schuh: Oh, No, they go with the train crew; they bring them with the train of logs.

Examiner Burchmore: Then the train crew have a way bill with them when the- bring their logs in?

Mr. Schuh: Supposed to have, but I regret to say that they forget it about half of the time.

Examiner Burchmore: That does not affect the promptness of the movement at all, does it?

Mr. Schuh: No.

Examiner Burchmore: The conductor does not hesitate about bringing in logs for which he has no billing?

Mr. Schuh: I don't know whether he hesitates or not.

3794 Examiner Burchmore: Who issues the Bills of Lading on outbound shipments of Lumber?

Mr. Schuh: Our agent at Lynchville.

Examiner Burchmore: He also issues through way bills?

Mr. Schuh: Yes sir way bills and through Bills of Lading.

Examiner Burchmore: Are not the rates from Lynchville to Interstate points the same as Iron Mountain rates from Roosevelt to Interstate destination?

Mr. Schuh: Yes sir.

Examiner Burchmore: What is your division on freight?

Mr. Schuh: Two cents.

Examiner Burchmore: Uniformly two cents?

Mr. Schuh: Uniformly two cents.

Examiner Burchmore: Are you aware that other carriers connecting with the St. Louis Iron Mountain and Southern Railway in many cases receive as high as four and five cents?

Mr. Schuh: I have heard so to-day and yesterday.

Examiner Burchmore: That is the first you knew of it?

Mr. Schuh: That is the first I knew of that.

3795 Examiner Burchmore: Is your division of two cents reasonable and satisfactory or excessive?

Mr. Schuh: It is not satisfactory, but I presume it has to be sufficient.

Examiner Burchmore: You do not file any tariff with the commission yourself, do you?

Mr. Schuh: Yes sir.

Examiner Burchmore: What are those, local tariffs?

Mr. Schuh: Local and interstate tariffs, both.

Examiner Burchmore: You are a party also to the joint tariff published by the St. Louis Iron Mountain and Southern Railway Company?

Mr. Schuh: Yes, concurrent tariff.

Examiner Burchmore: This tariff may be referred to by the commission from its own files.

Mr. Schuh: Yes sir.

Examiner Burchmore: Are there any joint rates published on lumber as applying from points west of Lynchville?

Mr. Schuh: I think so, and also they are published—that is, I know it is on lumber. I am quite sure it is on lumber, and

3796 locally from points west of Lynchville on farm products?

Examiner Burchmore: Well, are there milling in transit privileges in connection with these joint rates from Lynchville?

Mr. Schuh: That is my impression.

Examiner Burchmore: This division accorded by the St. Louis Iron Mountain and Southern Railway is intended partly to pay for the movement of logs into the Mill?

Mr. Schuh: I don't know how they intend it; I would suppose so.

Examiner Burchmore: On the face of the tariff, it purports to cover also log movements into the mill?

Mr. Schuh: That is my impression, yes sir.

Examiner Burchmore: This one cent that you collect from the railroad company for hauling logs into the mill, you do not credit that one cent against freight charges outbound?

Mr. Schuh: No sir.

Examiner Burchmore: It just stands?

Mr. Schuh: That is what I figure is a loss on the movement which I am called upon individually to make.

3797 Examiner Burchmore: Well then, the lumber company actually pays the Lynchville rate to St. Louis for example on the lumber, plus one cent on the logs they have got in?

Mr. Schuh: I don't think I understand you.

Examiner Burchmore: Well, then, the lumber company actually pays the Lynchville rate to St. Louis for example on the lumber plus one cent on the logs they have got in?

Mr. Schuh: If I understand you correctly I think not. They simply get the junction point rate.

Examiner Burchmore: They pay the Roosevelt rate to St. Louis which is eighteen cents?

Mr. Schuh: Yes sir.

Examiner Burchmore: But the shipment is actually billed as originating either at Lynchville or some point west of there?

Mr. Schuh: Yes sir.

Examiner Burchmore: What points are there west of Lynchville?

Mr. Schuh: Two stations, Crooks Spur and Maxwell.

3798 Examiner Burchmore: Does any of your lumber move out under billing reading Maxwell?

Mr. Schuh: I cannot remember that it does.

Examiner Burchmore: Does any move out reading as Crook's ill?

Mr. Schuh: I think not.

Examiner Burchmore: It is all billed Lynchville?

Mr. Schuh: Yes, for the reason I suppose that I have never been dvised different and our agent is there and the office is there, and or that reason, I suppose.

Examiner Burchmore: That is all right. I just wanted to ascer- in the fact. You have regular forms of stationery and way bills nd bills of lading, etc.?

Mr. Schuh: Yes sir.

Examiner Burchmore: You endeavor to comply with the State nd Federal laws regulating Railroads?

Mr. Schuh: We try to and I believe we do.

Examiner Burchmore: Is your car equipped with a safety device?

Mr. Schuh: No sir, it is not.

Examiner Burchmore: You know it ought to be?

799 Mr. Schuh: Well, I don't know. I know we move system cars entirely and they have their own equipment. We have ot got that on the log cars.

Examiner Burchmore: But your combination passenger and reight car?

Mr. Schuh: It is not a passenger car.

Examiner Burchmore: Oh, that is not the road that has the com- ination?

Mr. Schuh: No.

Examiner Burchmore: I was thinking of some other road. Your ocomotive has air brakes?

Mr. Schuh: No.

Examiner Burchmore: Well, I recommend that you look up the afety appliance law.

Mr. Schuh: We have the air brakes there and it originally had ir brakes, but I was there a week ago and the air-brakes broke and n order to get at them they took them off and I gave instructions to ave it repaired and put it on.

Examiner Burchmore: But you did not want to stop the Railroad while you were doing it?

Mr. Schuh: Certainly not.

800 Examiner Burchmore: Has the road paid any dividends?

Mr. Schuh: Positively not.

Examiner Burchmore: Is it making any money?

Mr. Schuh: Positively not.

Examiner Burchmore: Do you think it will make money?

Mr. Schuh: Well, if business picks up it will; it should.

Examiner Burchmore: Well, would the cancellation of the divis- on accorded to that railroad seriously impair its prosperity?

Mr. Schuh: I think it would. It is operating now under a loss of about Fifteen Hundred Dollars a year. Of course, if we take off its only revenue, which is that two cents division, it would naturally ose $2,000.00 or $3,000.00 more.

Examiner Burchmore: Are there any other saw mills on the line?

Mr. Schuh: No sir.

Examiner Burchmore: You spoke of one line that is now in course of construction. Where is that headed for?

Mr. Schuh: It is headed if we can last and hold out, to the county seat in the other parish.

Examiner Burchmore: What is the name of that county seat?

3801 Mr. Schuh: Floyd, in West Carroll Parish.

Examiner Burchmore: What is the distance from Floyd to Lynchville?

Mr. Schuh: About 20 miles—19 miles.

Examiner Burchmore: Is the town of Floyd offering any bonus for the construction of that line to it?

Mr. Schuh: Yes, they have; the individuals composing the Police Jury—what we call in our country County Commissioners—have indirectly through our secretary there sent me word that they would be willing to help on the building of the road, and to vote either a one or two mill tax towards the road going there.

Examiner Burchmore: Now, in going west towards Floyd, what is the distance of the western limits of your timber holdings from Lynchville?

Mr. Schuh: From three to three and a half miles.

Examiner Burchmore: If this projected line then is extended three and a half miles west of Lynchville, the rest of the line will be beyond your timber holdings?

Mr. Schuh: Yes, we have no interest back there.

3802 Examiner Burchmore: What is the extent of your timber holdings within that three and a half miles on this projected line?

Mr. Schuh: We have three sections in there to clean up—about ten or twelve million feet.

Examiner Burchmore: Did you give the distance between Lynchville and the Junction point of the St. Louis Iron Mountain and Southern Railway?

Mr. Schuh: Yes, as one and one-eighth mile.

Examiner Burchmore: Does this railroad perform all of the service on that main line between Lynchville and Junction point?

Mr. Schuh: Yes it does.

Examiner Burchmore: Has the St. Louis, Iron Mountain and Southern Railway an interchange track there at Lynchville?

Mr. Schuh: An interchange track?

Examiner Burchmore: Yes, a side track.

Mr. Schuh: Yes, it has a side track.

Examiner Burchmore: Does the St. Louis, Iron Mountain and Southern Railway train set the empty cars on this side track for delivery to the Roosevelt and Western?

3803 Mr. Schuh: We have a special spur connecting with the side track and it sets them directly on our spur—on our main line; it would be a spur of theirs, but they set them on our main line.

Examiner Burchmore: Then, do the engine and cars of the

Roosevelt and Western perform any service in carrying those empties to Lynchville?

Mr. Schuh: Every bit.

Examiner Burchmore: I think it was all brought out.

Mr. Coleman: And all service bringing them back?

Mr. Schuh: All service bringing them in and taking them out.

Mr. Coleman: Speaking of these agricultural products, what is the prospect of an increase in rice acreage along the Roosevelt and Western if you know?

Mr. Schuh: Well, last year was the first year of the rice industry back there, and they put in about a thousand acres and the party that owned a big lot of land back there says that if we keep our spur in there for him he would put in another thousand this coming year.

Examiner Burchmore: How many cars of rice did you
3804 haul this last year?

Mr. Schuh: I think it was 22 cars we hauled for him—cars of rice.

Mr. Coleman: If that rice is not hauled over the Roosevelt and Western, how does it reach the markets?

Mr. Schuh: Well, he can only haul it, as he says, about two months in the year and then he has got to go 12 miles around.

Examiner Burchmore: This map will suffice for the commission's purposes.

Mr. Schuh: It is not drawn to scale, but I am not an engineer and have no high priced people.

Examiner Burchmore: What proportion of the tonnage at the present time is supplied by your lumber company?

Mr. Schuh: Oh I should say the great majority of it; probably 95%.

Examiner Burchmore: Do you make annual reports to the commission?

Mr. Schuh: Only in part. When they called for their report last year, the fiscal year, you see, I was not operating yet although we were incorporated in May. Then I filed the publication with
3805 the State commission and then got out my tariffs, but it was in November before we operated under their tariff, and under the Commission's ruling; inasmuch as at that time we could only run or operate about five months, we did not have an annual statement to make but I am prepared to make them for this year from January 1st to date.

Examiner Burchmore: Have you filed the report that was due the first of November for the fiscal year ending June 1st, 1910—for the six months that you operated?

Mr. Schuh: No, I did not know they would accept it for six months; I thought they wanted it for a whole year.

Examiner Burchmore: I understand. You are required to render a report for a fraction of a year.

Mr. Schuh: If I remember correctly the Commission answered my letter and said "Very well; wait until you have the year's operation and then report."

Examiner Burchmore: That is sufficient.

Mr. Schuh: If the commission orders me to do so, I will get up a report.

3806 Examiner Burchmore: Will you then, in this case, either send in yourself, or have your counsel do so, a statement showing the total lumber tonnage of the road handled on behalf of the J. P. Schuh Lumber Company and the total traffic handled for other people during a given period?

Mr. Schuh: The tonnage for 1910?

Examiner Burchmore: Any given period that you can give it.

Mr. Schuh: Very well.

Examiner Burchmore: And the revenues as well as the tonnage?

Mr. Schuh: Do you want me to include——

Mr. Jeffrey: What was the first date you got your division?

Mr. Schuh: I am not sure but I think the 27th of November.

Mr. Jeffrey: The 27th of November 1909?

Mr. Schuh: Yes sir.

Examiner Burchmore: The first payment of division?

Mr. Schuh: Yes. No, it went into effect the 27th of October and they settled the 27th of

3807 November for the four or five days in October and from that time on, monthly I get it right along.

3808 *Tioga and Southeastern Railroad Company.*

(Appearances: Walter H. Saunders of St. Louis, Attorney for the Tioga and Southeastern Railroad Company.)

Mr. Saunders: In this case, we have filed no complaint and I would want to know what the record should show on that point.

Examiner Burchmore: It is my understanding that the commission regards it as unnecessary for a tap line road in these southwestern states to file any complaint or petition in these proceedings; my understanding being that all such companies have been made parties to this record, by order of the commission if they had not already been parties in some other form. My understanding is that no tap line is prejudiced by its failure or will be prejudiced by its failure to file a complaint or other pleadings. The issues have been raised on pleadings already filed and the mere appearance of a carrier here would cure any defect that there might be technically in that regard. I do not know that there are any such technical defects. Should it become necessary and be found necessary later on, or advisable for you to file a petition of any kind, I am under the impression that the Commission will entertain your application to file a petition perhaps nunc pro tunc. At any rate I am sure will

3809 not be prejudiced by your failure to file a petition.

Mr. Saunders: That will be entirely satisfactory to us.

O. H. COOPER was called as a witness, and having been first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: You are the General Freight Agent of this Railroad?

Mr. Cooper: I am also Superintendent, in other words, I am the man on the ground.

Examiner Burchmore: You receive your salary from the Railroad Company?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do you receive any salary from the Lumber Company?

Mr. Cooper: Yes, partly from the Lee Lumber Company?

Examiner Burchmore: Is your salary divided half and half?

Mr. Cooper: Not quite. I receive more—the major portion—from the lumber Company.

Examiner Burchmore: Is your salary with the Railroad Company in proportion to services rendered?

Mr. Cooper: Yes sir.

3810 Examiner Burchmore: The Tioga and South Eastern Railroad Company I understand connects with the St. Louis, Iron Mountain and Southern Railway system at Tioga?

Mr. Cooper: Yes sir.

Examiner Burchmore: With the Louisiana Railway and Navigation Company also, at Ems?

Mr. Cooper: Yes sir.

Examiner Burchmore: What is the character of the country through which it runs? It is a timber country along the Tioga and South Eastern Railroad?

Mr. Cooper: The Railroad has no timber for about fifteen miles, except just a little that surrounds the mill at Tioga.

Examiner Burchmore: Are there any farmers on the line?

Mr. Cooper: Yes quite a number.

Examiner Burchmore: I am trying to find out on the map.

Mr. Cooper: It is only six miles from Jackson.

Examiner Burchmore: Then Ems is the terminus of the branch line of the Louisiana Railway and Navigation Company?

Mr. Cooper: Yes sir, we are figuring on building it to Jena in Catahoula Parish.

3811 Examiner Burchmore: Do they stop when they reach your road?

Mr. Cooper: Yes sir.

Examiner Burchmore: Where is the saw mill of the Lee Lumber Company?

Mr. Cooper: Tioga.

Examiner Burchmore: How near is that to the track of the St. Louis, Iron Mountain and Southern Railway?

Mr. Cooper: Right at the track.

Examiner Burchmore: Now, the saw mill is located on the St.

Louis, Iron Mountain and Southern Railway, and the Tioga and Southeastern Railroad?

Mr. Cooper: The tracks go down there and join our tracks in front of the Planing Mill, which is situated near the station of the St. Louis, Iron Mountain and Southern Railroad at Tioga.

Examiner Burchmore: It is understood that you will file a map of this road along the line of our request on other companies?

Mr. Cooper: Yes sir. How long will we have to file it?

Examiner Burchmore: About a fortnight or so.

Mr. Cooper: We want to show the complete holdings of
3812 everybody along the lines?

Examiner Burchmore: Are there any other saw mills along the line?

Mr. Cooper: Not at present.

Examiner Burchmore: Have there been in the past?

Mr. Cooper: There was at the time of the purchase. We purchased the railroad to the mill from another company in 1905, and there was at that time.

Examiner Burchmore: When was this railroad constructed, prior to 1905, it must have been about 10 or 11 miles at the time you made the purchase?

Mr. Lee: About ten miles of the old track when we bought it in 1905.

Examiner Burchmore: Shall I ask you about the financial end of it?

Mr. Cooper: I want to explain why I asked him? I am a stockholder in this company, but until 1907, I was not.

Mr. Lee: He was not connected with it at all then.

Examiner Burchmore: Who are the present officers of this Railroad?

Mr. Cooper: S. R. Lee is the President—S. H. Fullerton, Vice-President, and J. A. O'Shea Secretary and Treasurer.

3813 Examiner Burchmore: Are these general officers also of the Lee Lumber Company?

Mr. Cooper: Identically the same, yes sir.

Examiner Burchmore: Who owns the Lee Lumber Company?

Mr. Cooper: It is a stock company.

Examiner Burchmore: Are the stockholders of these two companies substantially the same?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do they hold their shares in proportion?

Mr. Cooper: Yes sir.

Examiner Burchmore: When did the Lee Lumber Company begin lumbering operations in this region?

Mr. Cooper: When we purchased this plant it was already erected, and its railroad had ten or 11 miles in 1907, I think the latter part of April, I should say.

Examiner Burchmore: Then you purchased the railroad and saw mill, and some timber land properties, all as one going concern in 1905?

Mr. Cooper: We incorporated the railroad as soon as we got hold of the property.

Examiner Burchmore: The Railroad was incorporated in 1905?

3814 Mr. Cooper: It was incorporated in May, 1905—on May 18, 1905.

Examiner Burchmore: What was the capital stock of the railroad Company?

Mr. Cooper: $150,000.00.

Examiner Burchmore: How much of that stock was issued at the time of its incorporation?

Mr. Cooper: $50,000.00.

Examiner Burchmore: How much of it has been issued since?

Mr. Cooper: No.

Examiner Burchmore: Was that $50,000.00 issued for cash or in exchange for the Railroad?

Mr. Cooper: In exchange for the railroad. It was issued as a sort of stock dividend to the stockholders of the lumber company, was it not?

Mr. Cooper: Yes sir.

Examiner Burchmore: Then, in a substantial sense, apart from the fact that they are distinct and separate corporations, the tap line and the lumber company are substantially one in interest?

Mr. Cooper: Yes sir.

Examiner Burchmore: When was the mill built at Tioga?

Mr. Cooper: The present mill was built in 1907.

3815 Examiner Burchmore: Well, was there a mill on the ground?

Mr. Cooper: There was a mill on the ground and it burned and the present one was built.

Examiner Burchmore: When was the old mill built?

Mr. Cooper: Before out time, I think about 1900, though——

Examiner Burchmore: Was there any other mill in this vicinity? Has there been any mill on this road?

Mr. Cooper: On this road, yes sir, at the time we made the purchase, there were two mills.

Examiner Burchmore: You purchased both of these mills?

Mr. Cooper: No sir.

Examiner Burchmore: The mill you purchased then, was the one at Tioga?

Mr. Cooper: Yes sir, at Tioga.

Examiner Burchmore: Who owned it before you did?

Mr. Cooper: The Louis Werner Saw Mill Company Limited of St. Louis.

Examiner Burchmore: Was Mr. Fullerton interested in that corporation?

Mr. Cooper: Which?

Examiner Burchmore: The Louis Werner Saw Mill Company.

Mr. Cooper: No sir.

3816 Examiner Burchmore: Is the Louis Werner Saw Mill Company a going concern to-day?

Mr. Cooper: Yes sir.

Examiner Burchmore: Where are its holdings to-day?

Mr. Cooper: They have several of them, I don't know.

Examiner Burchmore: Do they control any tap line?

Mr. Cooper: I think they do, I think the record in the other room shows that. Mr. S. R. Burcs was on the stand yesterday for this Company, you were asking about.

Examiner Burchmore: The Louis Werner Saw Mill Company as I understand is interested in or controls the Craven, Magnolia and Western Railroad?

Mr. Cooper: Yes. I know that from Mr. Burcs' testimony yesterday and from the advertisements.

Examiner Burchmore: Were the gentlemen who now control the Lee Lumber Company formerly interested in the Louis Werner Saw Mill Company?

Mr. Cooper: No sir.

Examiner Burchmore: What about these other small mills that used to be there?

Mr. Cooper: You will have to ask Mr. Lee. There were two of them. Mr. Lee will explain.

3817 Mr. Cooper: That was before I took charge in 1907.

Examiner Burchmore: What is the mileage of this Railroad?

Mr. Cooper: 15 miles of main line and three miles of switches including two "Y's" that we have. Besides that, we own still several miles of track, some of which is being used in logging operations in the woods.

Examiner Burchmore: These are private tram lines that connect with your road?

Mr. Cooper: Yes, the Lee Lumber Company connection; they do not show on that map, nor on mine. They are movable tracks such as are used for logging.

Examiner Burchmore: What is the extent of these private tracks?

Mr. Cooper: At present about five miles.

Examiner Burchmore: Has the Tioga and Southeastern Railroad any station building?

Mr. Cooper: A small station building at Tioga—just a small freight building.

Examiner Burchmore: How many locomotives has it?

Mr. Cooper: Five.

Examiner Burchmore: You operate all these locomotives for yourself?

3818 Mr. Cooper: No, we operate one on the main line of service, and two I think are idle part of the time, a larger part of the time I should say—and the other two are rented to the Lee Lumber Company for operations of the spurs in the woods.

Examiner Burchmore: What is the basis of that rental?

Mr. Cooper: $10.00 a day.

Examiner Burchmore: Does that $10.00 a day include the pay of the crew?

Mr. Cooper: No.
Examiner Burchmore: Does that include fuel?
Mr. Cooper: No sir.
Examiner Burchmore: Just simply the locomotive?
Mr. Cooper: Yes sir.
Examiner Burchmore: Does that $10.00 in your opinion yield a reasonable profit to the Railroad Company?
Mr. Cooper: Yes sir.
Examiner Burchmore: It takes care of the depreciation on the locomotive and also yields a reasonable profit?
Mr. Cooper: I think so.
Examiner Burchmore: Has the Railroad Company any bonds?
Mr. Cooper: None whatever.
3819 Examiner Burchmore: Any other indebtedness?
Mr. Cooper: No sir.
Examiner Burchmore: Its entire capitalization then is $50,000.00 outstanding?
Mr. Cooper: Yes sir.
Examiner Burchmore: What cars has it?
Mr. Cooper: Fifty two log cars, that is all.
Examiner Burchmore: Does it own these cars and that locomotive?
Mr. Cooper: Yes sir. All the Railroad property belongs to the Railroad.
Examiner Burchmore: It operates these cars?
Mr. Cooper: Yes sir.
Examiner Burchmore: It does not lease them to others?
Mr. Cooper: No sir, it does not lease them.
Examiner Burchmore: How many men are there engaged in track work on this railroad?
Mr. Cooper: They range from 12 to 15.
Examiner Burchmore: How many gangs?
Mr. Cooper: Two gangs a part of the time, and part of the time only one.
Examiner Burchmore: Do these men put in any part of
3820 their time working on the private tram road of the Lee Lumber Company?
Mr. Cooper: No sir.
Examiner Burchmore: Their entire time is devoted to the Railroad track maintenance?
Mr. Cooper: Yes sir.
Examiner Burchmore: Have you any station employees?
Mr. Cooper: None except at Tioga where we have an agent who does the billing and such as that.
Examiner Burchmore: Does he devote his entire time to the Railroad service?
Mr. Cooper: No sir.
Examiner Burchmore: He works also for the Lee Lumber Company?
Mr. Cooper: Yes sir.

Examiner Burchmore: What is his salary from the Railroad Company?

Mr. Cooper: Three quarters of his salary, or do you want to know exactly the amount? $75.00 per month, three quarters of his salary is that amount.

Examiner Burchmore: How many crews are there in the railroad service?

3821 Mr. Cooper: One train crew.

Examiner Burchmore: For Six Locomotives?

Mr. Cooper: Well, wait—you mean on the whole?

Examiner Burchmore: No I mean in the railroad service?

Mr. Cooper: There are only five locomotives. Did I say six?

Examiner Burchmore: Perhaps not.

Mr. Cooper: I think I only said five. Five is all we have.

Examiner Burchmore: The men who operate the locomotives in the service of the private tram road are not carried on the Railroad Company pay roll?

Mr. Cooper: Not at all, no sir.

Examiner Burchmore: How many employees are there in the general offices of the Railroad Company who devote their entire time and receive their whole compensation from the Railroad Company?

Mr. Cooper: None.

Examiner Burchmore: The general office work of the Railroad Company then, is done by the employees of the Lumber Company?

Mr. Cooper: No, the work is done by this man I refer to;

3822 he does the general office work for the railroad Company in connection.

Examiner Burchmore: He is the entire clerical force?

Mr. Cooper: Yes, sir.

Examiner Burchmore: Are the trains run on regular schedule?

Mr. Cooper: No schedule. We make two round trips a day, one in the morning and one in the afternoon.

Examiner Burchmore: Do they carry passengers?

Mr. Cooper: No, sir.

Examiner Burchmore: Freight service purely?

Mr. Cooper: Purely freight service.

Examiner Burchmore: They do not carry mail or express?

Mr. Cooper: No, sir.

Examiner Burchmore: What is the total freight tonnage of the road in amount?

Mr. Cooper: You just want it for the fiscal year ending the year 1910?

Examiner Burchmore: Yes.

Mr. Cooper: The total for the fiscal year ending 1910 on lumber, logs and staves was 44,358 tons; less than car load lots, 464

3823 tons.

Examiner Burchmore: Was there any forest product handled for the Lee Lumber Company?

Mr. Cooper: No, sir, except in the case of five cars of staves which were handled for outside parties.

Examiner Burchmore: Were those staves made from timber cut on the Lee Lumber Company land?

Mr. Cooper: No sir.

Examiner Burchmore: That was timber in which the Lee Lumber Company——

Mr. Cooper: Had no interest.

Examiner Burchmore: Never had any interest?

Mr. Cooper: No sir, we never had any interest. It was farmers' timber who lived in that neighborhood.

Examiner Burchmore: What class of timber does the Lee Lumber Company cut? Yellow Pine?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do they sell that lumber?

Mr. Cooper: Yes sir.

Examiner Burchmore: I mean do they sell it wholesale or retail?

Mr. Cooper: We sell all of our stuff thru wholesalers.

3824 Examiner Burchmore: You have sales agents?

Mr. Cooper: No sir, nothing except from the office. It is sold by letter wholesale unless someone calls there and buys it.

Examiner Burchmore: Was the lumber manufactured at this mill or on the old mill formerly sold by the Colonial Lumber Company?

Mr. Cooper: No sir.

Examiner Burchmore: Did you ever hear of the Colonial Railway system?

Mr. Cooper: Never did, no sir.

Examiner Burchmore: Until this hearing?

Mr. Cooper: No sir. I must admit that it is a new one to me.

Examiner Burchmore: This railroad was not a part of your system?

Mr. Cooper: No sir, not by any fault of ours, not up to date.

Examiner Burchmore: Mr. Lee, did you ever hear of that system?

Mr. Lee: Never until I heard it spoken of yesterday and today. I have heard of the Colonial Lumber Company but never

3825 heard of any system.

Mr. Cooper: I will further state that there has been no lumber sold to these people since I took charge.

Mr. Lee: The Tioga and Southeastern Railroad Company has no connection in any way, shape or form with the Colonial system or Lumber Company in any way. They own no stock with us and we own no stock with them.

Mr. Cooper: I think that is a case where somebody borrowed our tracers.

Examiner Burchmore: Has the Lee Lumber Company any direct or indirect relations to any other lumber company?

Mr. Cooper: No sir.

Mr. Lee: For your information, I have a little stock in some lumber company but the Lee Lumber Company has nothing to do with it.

Examiner Burchmore: Your holdings are minority holdings?

Mr. Lee: Yes, very much so.

Examiner Burchmore: I assume from your statement that almost

the entire tonnage of the road is supplied by the Lee Lumber Company?

Mr. Cooper: From one half to one percent perhaps by out-
3826 side parties.

Examiner Burchmore: Have you published any regular local rates applying over your road?

Mr. Cooper: Yes, we have them on file with the Interstate Commerce Commission. I have a copy here.

Examiner Burchmore: You are parties to the joint rates published by the St. Louis Iron Mountain and Southern Railway?

Mr. Cooper: Yes sir.

Examiner Burchmore: And the Louisiana Railway and Navigation Company?

Mr. Cooper: Yes.

Examiner Burchmore: What proportion of your tonnage moves outbound over the St. Louis Iron Mountain and Southern Railroad and what proportion over the Louisiana Railway and Navigation Company?

Mr. Cooper: I could not say exactly on that, but I would say approximately 90% over the St. Louis Iron Mountain and Southern and 10% over the Louisiana Railway and Navigation Company.

Examiner Burchmore: When did the St. Louis Iron
3827 Mountain and Southern Railway connect with your road?

Mr. Cooper: They have been connected there something like three years, have they not Mr. Lee?

Mr. Lee: Three years approximately.

Mr. Cooper: Three years approximately; I am not sure.

Examiner Burchmore: Did they build up there for the especial purpose of making connection with your road?

Mr. Cooper: Not especially. They have a track from there going in the direction of Jena. They stopped construction because of the so-called panic of 1907, suppose that had something to do with it.

Examiner Burchmore: Are there milling in transit privileges in effect on your road?

Mr. Cooper: Yes, with the St. Louis Iron Mountain and Southern Railroad.

Examiner Burchmore: Does the St. Louis Iron Mountain and Southern Railroad give you the benefit of the same rate in cents per hundred pounds as the joint rate from points of origin along your line, as applies from grouped stations on its own line?

Mr. Cooper: Yes sir.

Examiner Burchmore: What divisions do you receive out
3828 of these rates?

Mr. Cooper: You want the St. Louis Iron Mountain and Southern first?

Examiner Burchmore: Yes, the St. Louis Iron Mountain and Southern first.

Mr. Cooper: We get four cents from Little Rock to Memphis, Cairo, Thebes, Washington Missouri, and east—no, west to Washington Missouri, I should have said, west of Washington Missouri, we get five cents.

Examiner Burchmore: Is there any track on which you receive no division at all?

Mr. Cooper: Where do you mean?

Examiner Burchmore: Over the St. Louis Iron Mountain and Southern Railway?

Mr. Cooper: Yes, some local points on which we receive no division whatever.

Examiner Burchmore: Do you have any earnings at all on which traffic?

Mr. Cooper: The Railroad Company?

Examiner Burchmore: Yes.

Mr. Cooper: The switching yes sir.

Examiner Burchmore: A switching charge of some sort?

3829 Mr. Cooper: I don't quite understand that question.

Examiner Burchmore: When you receive no division, you mean that there is no joint rate?

Mr. Cooper: No joint rate?

Examiner Burchmore: That the division obtains only on shipments to Arkansas—and to points in Arkansas and Louisiana?

Mr. Cooper: Yes sir.

Examiner Burchmore: In a general way?

Mr. Cooper: Yes sir.

Examiner Burchmore: Has there been any material increase in your divisions in recent years?

Mr. Cooper: Yes, I could not state the exact time now from memory.

Examiner Burchmore: About three years?

Mr. Cooper: Since then, about the time we connected with the Louisiana Railway and Navigation Company, that is, the date they published a tariff including this was on March 10, 1910 I think.

Examiner Burchmore: Was that increase in division a direct or indirect result of the new connection with the Louisiana Railway and Navigation Company?

3830 Mr. Cooper: In connection with the published rate, I think so.

Examiner Burchmore: In other words, a little competition there was the life of trade?

Mr. Cooper: Yes sir.

Examiner Burchmore: Did the first overtures with respect to increasing the division come to you from the St. Louis Iron Mountain and Southern Railroad Company or from you to the St. Louis Iron Mountain and Southern Railroad Company?

Mr. Cooper: Mr. Lee can tell you that. I don't know.

Mr. Lee: I will explain that. The increase in our division took effect I think about a year ago, and we have been operating and sending tonnage over the Louisiana Railway and Navigation Company long before the increase in our division took place between the St. Louis Iron Mountain and Southern Railroad Company and the Tioga and Southeastern Railroad Company?

Examiner Burchmore: But that had been a matter of negotiation?

Mr. Lee: No I negotiated it. I negotiated it myself and asked for an increase in the division and told them we were not making enough money.

3831 Examiner Burchmore: Did you use the argument that you had another connection available?

Mr. Lee: I told them we could get other connections if we wanted to, the Chicago Rock Island and Pacific lines are near our railroad, and several others, and we could make a number of shipping points if we wanted to.

Examiner Burchmore: Do you contemplate an estension over to the Rock Island business?

Mr. Lee: No sir, never had any such proposition at all.

Examiner Burchmore: Has there been any material change in your methods and practices in taking the transportation or with respect to the manner of billing or with respect to the rates and divisions since December 1909?

Mr. Cooper: 1909?

Examiner Burchmore: Yes, in last year?

Mr. Cooper: I don't understand that question.

Examiner Burchmore: The point is this. An examination of the affairs of your road was made by the commission about a year ago—by its accounting department. Are the conditions that exist today and the method and practices substantially the same as those then in effect?

Mr. Cooper: Yes sir.

3832 Examiner Burchmore: So that a report rendered then say in a general way, describes the situation?

Mr. Cooper: Yes sir, in a general way.

Examiner Burchmore: Now you receive a division running from four to five cents per hundred pounds from the St. Louis Iron Mountain and Southern Railway? Do you receive the same proposition or basis of division from the Louisiana Railway and Navigation Company?

Mr. Cooper: No sir. Not quite.

Examiner Burchmore: Well, substantially the same?

Mr. Cooper: Yes sir. Substantially the same except that they deliver into the territory of the Missouri Kansas and Texas Railroad, which the St. Louis Iron Mountain and Southern does not.

Examiner Burchmore: Are those division sheets in possession of the commission.

Mr. Cooper: I don't know whether they are or not. I assume that they are, and if not, we will make one.

Examiner Burchmore: If not, a request will be made upon you for one of them.

Mr. Cooper: Yes sir.

Examiner Burchmore: Has your company a supply of

3833 Bills of lading, way bills, printed with its name on them?

Mr. Cooper: Yes sir.

Examiner Burchmore: And other forms necessary for the conduct of a railroad business?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do you comply with the state and Federal laws regarding the safety appliances and accidents and rates, etc.?

Mr. Cooper: Yes sir.

Examiner Burchmore: That is your effort?

Mr. Cooper: Yes sir.

Examiner Burchmore: You keep your system of accounts in accordance with the requirements of the Interstate Commerce Commission?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do you charge depreciation on equipment?

Mr. Cooper: Yes sir.

Examiner Burchmore: At what rate?

Mr. Cooper: Well I would have to refer to the books. I do not keep the books, you understand, but I could get you that later on.

3834 Examiner Burchmore: What is the valuation of this road and its equipment?

Mr. Cooper: For the fiscal year ending June 30, 1910, it was $134,987.62.

Examiner Burchmore:: Your total capital is $50,000.00?

Mr. Cooper: Yes sir.

Examiner Burchmore: Well, how was the rest of this road financed?

Mr. Cooper: By the saving of what we made, that is, the earnings of the railroad Company.

Examiner Burchmore: It never has paid any dividend?

Mr. Cooper: No sir.

Examiner Burchmore: You have used your net earnings and surplus to improving and extending the road?

Mr. Cooper: Yes sir. Except what we have on hand at present.

Examiner Burchmore: What is your present surplus on hand?

Mr. Cooper: Now on hand $20,000.00, between $19,000.00 and $20,000.00.

Examiner Burchmore: On a capitalization of $50,000.00?

Mr. Cooper: Yes sir.

Examiner Burchmore: Have any dividends been author-

3835 ized?

Mr. Cooper: No sir.

Examiner Burchmore: Have you planned any extension of the road to take up this surplus?

Mr. Cooper: Yes sir.

Examiner Burchmore: Through what territory?

Mr. Cooper: In a southeasterly direction, about ten miles.

Examiner Burchmore: Extending your line out from the end?

Mr. Cooper: Yes sir.

Examiner Burchmore: Towards the Mississippi river?

Mr. Cooper: Yes sir, towards the Mississippi river and Marksville, a point on the Texas and Pacific Railroad Company as our prospective destination on the Red River.

Examiner Burchmore: You receive a division of from four to

five cents from the St. Louis Iron Mountain and Southern system? What service do you render for this division?

Mr. Cooper: We haul the logs from Violet, to Tioga, where they are milled in transit.

Examiner Burchmore: Are there any Bills of Lading issued on these inbound movements of logs?

Mr. Cooper: No sir. Only in this way, that the man in charge of the train brings a list of these logs—car loads logs—to this
3836 agent each night.

Examiner Burchmore: Does the conductor of the train report?

Mr. Cooper: Yes sir.

Examiner Burchmore: Will you furnish the commission with a copy of that form?

Mr. Cooper: It is not a report. He writes on a list how many car loads of logs handled to-day.

Examiner Burchmore: Is that not a printed report blank?

Mr. Cooper: No sir. A slip of paper.

Examiner Burchmore: Are these slips filed away?

Mr. Cooper: Yes sir.

Examiner Burchmore: What payment is made by the lumber company to the Railroad company for any inbound movement of logs?

Mr. Cooper: Nothing except the division we receive from the Railroad.

Examiner Burchmore: Don't you pay $4.50 per car load on these in-bound logs?

Mr. Cooper: No sir. Well, let me make that plain to you. We pay $5.00 per car on inbound logs on which we do not receive any division of the through rate.

3837 Examiner Burchmore: $5.00 per car?

Mr. Cooper: Yes, the Lee Lumber Company pays——

Examiner Burchmore: You formerly paid $4.00 per car?

Mr. Cooper: I don't think so. We figured on a basis of four cars. I think there is a mistake there. We figured on four cars to the car load of lumber, and they pay $5.00 per car, which would makeit $20.00 on the carload of lumber. On that, we do not receive a division.

Examiner Burchmore: On lumber on which you receive a division, your division amounts in round number to $24.00 per car.

Mr. Cooper: Somewhere—does it amount to that?

Examiner Burchmore: 60,000 pounds.

Mr. Cooper: They don't average that, Mr. Examiner—they average—they don't average more than——

Examiner Burchmore: Well, $20.00 then?

Mr. Cooper: $20.00 is somewhere nearer to it.

Examiner Burchmore: Just on the basis of your figuring on the logs?

Mr. Cooper: Yes sir.

Examiner Burchmore: Your earnings should be about $20.00 per car?

3838 Mr. Cooper: Yes sir.

Examiner Burchmore: Now the Lee Lumber Company operates its leased engines over the private tram road?

Mr. Cooper: Yes sir. They go out and in. They lease the engines.

Examiner Burchmore: Where does this company receive cars loaded with logs?

Mr. Cooper: At the "Y." At Tioga.

Examiner Burchmore: At the "Y" at Tioga?

Mr. Cooper: That is the terminus of this line.

Examiner Burchmore: It hauls the car load of logs to the mill?

Mr. Cooper: Yes sir.

Examiner Burchmore: Who unloads them?

Mr. Cooper: The train crew of the Lee Lumber Company and the train crew assists in unloading.

Examiner Burchmore: Is the train crew bound to do that?

Mr. Cooper: There is no question about it.

Examiner Burchmore: They would probably be discharged if they refused?

Mr. Cooper: We never have told them that.

Examiner Burchmore: They do that as a matter of course?

3839 Mr. Cooper: Yes they have to make two trips a day, and it is natural they want to get back and make the second trip as early as possible.

Examiner Burchmore: Do they step out and unload the second time?

Mr. Cooper: Yes sir.

Examiner Burchmore: I should think they would be in a hurry to get back to dinner?

Mr. Cooper: Yes sir.

Examiner Burchmore: Well does the Lumber Company pay the railroad company for the time that its employees devote to the unloading of logs?

Mr. Cooper: No sir.

Examiner Burchmore: Then it is just a gratuitous service?

Mr. Cooper: How is that?

Examiner Burchmore: It is just a gratuitous service?

Mr. Cooper: Yes sir.

Examiner Burchmore: Now the mill at Tioga is located directly on the track of the St. Louis Iron Mountain and Southern Railroad?

3840 Mr. Cooper: Well practically. The North "Y" which extends up from the Tioga and Southeastern Railroad and connects with the St. Louis Iron Mountain and Southern Railroad track, where they pick up the loads, is owned by the Tioga and Southeastern Railroad Company up to a point in front of the Planing Mill of the Lee Lumber Company?

Examiner Burchmore: Who furnishes the cars—the empty cars for outbound movements of lumber? The St. Louis Iron Mountain and Southern Railway?

Mr. Cooper: Yes sir.

Examiner Burchmore: I suppose those empty cars at the mill—who places those empty cars at the mill for loading?

Mr. Cooper: The St. Louis Iron Mountain and Southern Railroad Company shoves them in there up to our platform; that is, as far as the rails go.

Examiner Burchmore: And the engine of the Tioga and Southeastern Railroad Company does not touch that empty car?

Mr. Cooper: Not unless it is necessary to make a switch.

Examiner Burchmore: Well, that is unusual?

3841 Mr. Cooper: It is unusual—the switching is unusual for the reason that they have the platform extending nearly one half mile long—from the saw mill and Planing Mill, making quite a long platform to load on.

Examiner Burchmore: The mill employees load that car with lumber?

Mr. Cooper: Yes sir.

Examiner Burchmore: Then how does that car load of lumber go on the St. Louis Iron Mountain and Southern rail? Does the St. Louis Iron Mountain and Southern Railroad move it?

Mr. Cooper: Yes sir.

Examiner Burchmore: Then the lumber practically is not handled by the Tioga and Southeastern in case of shipment moving out over the St. Louis Iron Mountain and Southern Railroad?

Mr. Cooper: What is that?

Examiner Burchmore: Then the lumber practically is not handled by the Tioga and Southeastern in case of shipment moving out over the St. Louis Iron Mountain and Southern Railroad?

Mr. Cooper: No sir.

3842 Examiner Burchmore: I suppose that this division of three or four cents—that is, three or four cents out of the joint rates carries any of the cost of transporting the logs into the mill?

Mr. Cooper: Yes sir.

Examiner Burchmore: Now in case of the 10% traffic that moves out over the Louisiana Railway and Navigation Company, that is not true?

Mr. Cooper: No sir.

Examiner Burchmore: But the divisions they receive are the same?

Mr. Cooper: Yes sir.

Examiner Burchmore: Practically?

Mr. Cooper: Practically.

Examiner Burchmore: Who issues the Bill of Lading on outbound shipments of finished lumber?

Mr. Cooper: Our agent.

Examiner Burchmore: What point is shown as the point of origin on this Bill of Lading?

Mr. Cooper: Violet.

Examiner Burchmore: But the lumber is not loaded out of Violet?

Mr. Cooper: No it is not loaded there, this is to cover the shipment of the log.

3843 Examiner Burchmore: Is there a way bill issued on that movement? a through bill issued on the movement of the lumber?

Mr. Cooper: Yes sir.

Examiner Burchmore: Then the through way bill is also marked Violet?

Mr. Cooper: Yes sir.

Examiner Burchmore: The same as the Bill of Lading?

Mr. Cooper: Yes sir.

Examiner Burchmore: Does your way bill or bill of lading or both of them indicate on the face that the lumber has been milled in transit?

Mr. Cooper: No sir it does not.

Examiner Burchmore: It simply reads Violet or whatever point it may be?

Mr. Cooper: The tariff though refers—the fact that the lumber could be milled in transit.

Examiner Burchmore: I understand it is covered by the tariff: I am simply trying to establish the fact?

Mr. Cooper: It is, yes sir.

3844 Examiner Burchmore: We can read the tariff, but cannot tell from the tariff what the practice is. Of course, there is no extensive milling in transit of the logs coming in?

Mr. Cooper: No sir.

Examiner Burchmore: No lumber manufactured from logs that have not come in from the Railroad?

Mr. Cooper: No sir.

Examiner Burchmore: There is no river near the mill?

Mr. Cooper: No sir.

Examiner Burchmore: You cannot float logs down to the mill?

Mr. Cooper: No sir, we do not buy any put in the pond there.

Examiner Burchmore: This other way bill which is issued by your agent shows the Tioga and Southeastern Railway as the initial carrier and shows that Tioga is the Junction point, I assume?

Mr. Cooper: Yes sir.

Examiner Burchmore: Are not the division rates shown on the face of the way bill?

Mr. Cooper: No sir.

3845 Examiner Burchmore: This is covered by inter-line settlements?

Mr. Cooper: Yes sir.

Examiner Burchmore: Rendered monthly?

Mr. Cooper: Yes sir.

Examiner Burchmore: Do the officers of your company receive any free interstate transportation?

Mr. Cooper: Yes sir.

Examiner Burchmore: What officers receive annual passes?

Mr. Cooper: Mr. Lee, Mr. O'Shea and myself.

Examiner Burchmore: Are those passes actually used?

Mr. Cooper: Yes sir, sometimes.

Examiner Burchmore: Well, do the recipients of those passes ever pay fare over the railroad for which the passes read?

Mr. Cooper: No sir.

Mr. Jeffery: Over the Iron Mountain?

Mr. Cooper: Yes sir. We receive transportation over the Louisiana Railway and Navigation Company, the St. Louis Iron
3846 Mountain and Southern and the Louisiana and Arkansas.

Examiner Burchmore: That is the whole extent of your free transportation?

Mr. Cooper: Yes sir.

Examiner Burchmore: I think that is all. Have you any spur track agreement with the St. Louis Iron Mountain and Southern Railway?

Mr. Cooper: We bought this plant and they tried to get an agreement but we would not go into any because the connections were already made.

Examiner Burchmore: The track was all paid for as far as you know?

Mr. Cooper: Yes sir.

Examiner Burchmore: As a matter of fact there is a private side track connecting your mill trackage with the St. Louis Iron Mountain and Southern?

Mr. Cooper: Yes sir.

Mr. Saunders: Mr. Cooper, you said the company was chartered. Do you know whether or not this is a certified copy of the charter I have here.

Mr. Cooper: That was furnished to us.

Examiner Burchmore: Will you state the facts of it being
3847 incorporated without offering it in evidence?

Mr. Cooper: The Tioga and Southeastern Railroad Company was incorporated under the laws of the State of Louisiana on *June* 7, 1905 as appears by the certificate of the Secretary of State of Louisiana.

Examiner Burchmore: It was incorporated as a common carrier railroad?

Mr. Saunders: Yes sir.

Examiner Burchmore: It describes the route over which the line was to be constructed?

Mr. Cooper: I am looking for it.

Examiner Burchmore: Your statement, I presume, will be sufficient. The record would show that you tendered and we accepted the fact.

Mr. Saunders: This charter was recorded both at the recorder's office at Alexandria and with the Secretary of State's office at Baton Rouge? Now, Mr. Burchmore, you ask if any extension was contemplated. Did you ask that?

Examiner Burchmore: I asked that question.

Mr. Saunders: In what direction do you contemplate this
3848 construction?

Mr. Cooper: A southeasterly direction.

Mr. Saunders: And for what purpose?

Mr. Cooper: For the purpose of supplying the territory with railroad facilities.

Mr. Saunders: What demand is there in that direction for railroad facilities?

Mr. Cooper: It is quite a big farming district and besides there are heavy holdings of timber in there.

Mr. Saunders: Well, belonging to whom?

Mr. Cooper: Not belonging to us; some that does belong to the Lee Lumber Company.

Examiner Burchmore: Other timber which could be acquired?

Mr. Cooper: It is the class of timber that we would not acquire; it is hardwood mostly there.

Cross-examination:

Mr. Saunders: Now, state whether or not any large body of hardwood timber has been sold in that territory within the past few months to a stave company?

Mr. Cooper: Yes the Lee Lumber Company sold to the
3849 Alexandria Stave Company the Oak timber on their land.

Mr. Saunders: What transportation facilities will the Stave Company have?

Mr. Cooper: Over the Tioga and Southeastern Railway only; the only way they have to get it out of there.

Mr. Saunders: Do you know where the Alexandria Stave Company proposes to locate its mill?

Mr. Cooper: On the line of the Tioga and Southeastern Railway at or near Violet. Violet is merely the headquarters of the logging; that is the main camp of the Lee Lumber Company.

Mr. Saunders: Now, you spoke of farmers along the track of the Tioga and Southeastern Railway. State whether or not there has been any colonization scheme put in operation recently.

Mr. Cooper: Yes, the firm of Cook and Alexander, of Alexandria, La., a real estate firm have purchased from the Lee Lumber Company some 16,000 acres. In addition to this they have something like 5,000 acres along the line of the Tioga and Southeastern Railway Company between Violet and Tioga and they have mapped off towns with a view of colonizing.

3850 Mr. Saunders: Do you know whether that scheme is now being actively pushed or not?

Mr. Cooper: Yes, Mr. Alexander was in Chicago last week—I think about 10 days ago—and had just returned from there, where he has arranged for colonizing all these lands.

Mr. Saunders: What is the distance from Violet to Tioga?

Mr. Cooper: Fifteen miles.

Mr. Saunders: Now the timber which is now being cut by the Lee Lumber Company, I understand, is centered at Violet?

Mr. Cooper: Yes sir.

Mr. Saunders: And all those logs were hauled not less than 15 miles?

Mr. Cooper: Yes sir.

Mr. Saunders: Is all the timber cut out between Violet and Tioga?

Mr. Cooper: Practically all of it. There is a little around the mill not being cut—a couple of sections, I would say, of cut over timber around the mill. Outside of that, the land is all cut over.

3851 Mr. Saunders: Do you propose to build to Marksville?

Mr. Cooper: That is our intention.

Mr. Saunders: And there you will connect with what road?

Mr. Cooper: The Texas and Pacific Railway.

Mr. Saunders: At what distance will that be from Violet?

Mr. Cooper: From Violet?

Mr. Saunders: Yes.

Mr. Cooper: At a distance of about 25 to 30 miles.

Mr. Saunders: Now, in earning the division which is accorded you by the Louisiana Railway and Navigation Company, you haul the finished product from the Mill at Tioga back to Ems which is a distance of what?

Mr. Cooper: Nine miles.

Mr. Saunders: Does the Louisiana Railway and Navigation Company assist you in hauling the finished product from the Mill to Ems?

Mr. Cooper: No sir.

Mr. Saunders: And your compensation for that service is the division accorded you?

Mr. Cooper: Yes sir. There is one question you did not ask me.

3852 The Tioga and Southeastern own the right of way of the Tioga and Southeastern Railroad.

Mr. Saunders: Was that right of way deeded to them?

Mr. Cooper: Yes, it is on record in Rapides Parish.

Mr. Saunders: It has fee simple title to it?

Mr. Cooper: Yes sir.

Mr. Saunders: In regard to the rail, what weight of rail has it?

Mr. Cooper: Thirty-five pounds.

Mr. Saunders: What is the condition of that road today?

Mr. Cooper: You mean——

Mr. Saunders: As to physical condition?

Mr. Cooper: It is surfaced up—we have no ballast.

Mr. Saunders: Well can you haul trains over it?

Mr. Cooper: Yes, it is in good condition; the trackage in good condition.

Examiner Burchmore: I do not know that the legal classification of a railroad depends on the state of its road bed or its rail?

Mr. Jeffrey: You say that 10% of your tonnage comes over the Louisiana Railway and Navigation Company, and 90% over the St. Louis Iron Mountain and Southern Railway?

3853 Mr. Cooper: Yes sir, approximately.

Mr. Jeffrey: Is it not a fact that most of your business is north and east of the Mississippi?—is it not a fact that the principal lumber tonnage over the Tioga and Southeastern moves into the north and the east and points on the Great Lakes around Chicago?

I think you get better service by the St. Louis Iron Mountain and Southern to these points than via the Louisiana Railway and Navigation Company?

Mr. Cooper: Yes, but I don't know that the greater part of it goes to that territory.

Mr. Jeffrey: I will ask your traffic man.

Mr. Cooper: I am the traffic man but I don't think it.

Mr. Lee: I will answer that question. The only reason why the majority of the lumber goes over the St. Louis Iron Mountain and Southern Railway track, and not over the Louisiana Railway and Navigation Company's track, is it is sold to St. Louis Iron Mountain and Southern Railway points, you understand, and such stuff only moves over the Louisiana Railway and Navigation Com-
3854 pany as is sold at points where we have divisions with the Louisiana Railway and Navigation Company.

Examiner Burchmore: You ship as far as possible over the St. Louis Iron Mountain and Southern?

Mr. Cooper: Yes sir.

Examiner Burchmore: And you ship over the Louisiana Railway and Navigation Company only when necessary to reach its territory?

Mr. Cooper: That is the idea.

3855 S. R. LEE was called as a witness and having been previously sworn (Mr. Lee and Mr. Cooper were sworn by the examiner at the same time and before Mr. Cooper gave his testimony) testified as follows:

Direct examination:

Examiner Burchmore: You say there was a saw mill formerly on the line that is not here now.

Mr. Lee: Yes, sir, two of them.

Examiner Burchmore: Tell me about those saw mills?

Mr. Lee: I will tell you that all this existed in 1905. It is shown that we incorporated there then. We found the railroad there—a private institution you understand—and also the mill and we incorporated the railroad under the laws of the state as a common carrier and also incorporated the mill plant. There were two small mills located on this little line we bought. The Tioga and Southeastern was the name when we bought it. They had a contract with the Louis Werner Saw Mill Company to handle their sawed timber from their little mill located on this railroad, the Tioga and Southeastern, to the junction of the St. Louis Iron Mountain and Southern at Tioga. When we incorporated this road—and our tariff—
3856 joint tariffs—were filed with the other rates we continued to haul the lumber for these two mills. Under a contract with the Louis Werner Saw Mill Company, we made them a flat rate and they enjoyed the same tariff and the same rates that the mill of the Lee Lumber Company enjoyed, that originated at the junction at Tioga with the St. Louis, Iron Mountain and Southern. In other words, a flat rate.

Examiner Burchmore: How did they come to close up?

Mr. Lee: They cut out their holdings—cut out their timber holdings—exhausted their timber holdings.

Examiner Burchmore: And were unable to acquire other timber?

Mr. Lee: There was none for them to acquire. One of them operated about 2 years and we bought the institution and cut out all the timber they had and there was no more there for them to buy. The old saw mill plant or sites are there yet on the property.

Examiner Burchmore: I don't think I will ask any other questions.

Cross-examination:

Mr. Saunders: Mr. Lee, will you describe the traffic con-
3857 ditions at present and the transportation on that road?

Mr. Lee: The track conditions?

Mr. Saunders: The traffic.

Mr. Lee: The prospect of traffic conditions on our road for an extension is very good, outside of tonnage that may be purchased by the interests of the Lee Lumber Company.

Mr. Saunders: State why.

Mr. Lee: Well for the reason that the Alexandria Cooperage Company located at Alexandria operates several mills all over the south, and hire him, Blow and Company, of Louisville—that is only a branch concern of their general business—it has bought a large tract of oak timber.

Mr. Saunders: Where?

Mr. Lee: Situated near our line and our proposed line, you understand.

Mr. Saunders: Yes.

Mr. Lee: And is developing that territory, we will develop the tonnage they produce there by manufacturing this oak timber into staves. They are stave people and they have arranged to build a mill there on our line and they came to me before they bought this property and asked me if we contemplated developing that
3858 country and if I thought there would be a permanent road there and they could do business there, and I told them yes.

Mr. Saunders: What tonnage will they have?

Mr. Lee: Well, I don't know just what their present holdings will produce, but several thousands of cars, and the prospect is—the probability is—that they will buy a great deal more lumber because it is available in that section of the country that we propose to go through.

Mr. Saunders: Is this a farming country?

Mr. Lee: Sir?

Mr. Saunders: Is this a farming country?

Mr. Lee: Well, in a way it is. It has been largely a timber country of course but there are some farms being operated now on the lands that the timber has been removed from.

Mr. Saunders: Do you know anything about this colonization scheme which Mr. Cooper testified about?

Mr. Lee: I do.

Mr. Saunders: State briefly what the facts are?

Mr. Lee: Well, those real estate agents referred to by Mr. Cooper bought 16,000 acres of land that our road, The Tioga and
3859 Southeastern Railroad Company, runs right through, and Mr. Alexander, a member of that firm, attended a land congress in Chicago and spent ten days there and there arranged to colonize that country and has sold some of it with a view of settling up the territory as the timbers are cut off from it.

Mr. Saunders: How long a cut has the Lee Lumber Company had?

Mr. Lee: I would judge from 7 to 10 years.

Mr. Lee: How many million feet?

Mr. Lee: How many million feet?

Mr. Saunders: Yes.

Mr. Lee: I suppose about two hundred and fifty million feet approximately in that period. That is a mere guess. It is the raw product in the woods and there is no way of definitely measuring it.

Mr. Saunders: You stated that the road had been incorporated as a common carrier under the laws of the State of Louisiana. State whether or not it is taxed under the laws of this state?

Mr. Lee: It is not.

Mr. Saunders: Why not?

3860 Mr. Lee: For the reason that there is a law in the State of Louisiana exempting new railroad projects from taxation.

Mr. Saunders: You mean the constitutional provision of 1898?

Mr. Lee: Yes, sir.

Mr. Saunders: Providing that roads constructed within 10 years should be exempted from taxation?

Mr. Lee: Yes, sir.

Mr. Saunders: And this road was constructed within that time?

Mr. Lee: Yes, sir, and we enjoy that exemption from taxation.

Mr. Saunders: You are subject to the jurisdiction of the commission—the state railroad commission of Louisiana?

Mr. Lee: Yes, sir, absolutely.

Mr. Saunders: They exercise jurisdiction over you?

Mr. Lee: Yes, sir; I will state in that connection that the railroad appraisers or assessors assessed our railroad on one occasion and we took it up with the state authorities—with the attorney general—and he advised the commissioners that we were a railroad and were protected from taxation under the constitutional act
3861 of 1898.

Mr. Saunders: At the time this small mill or the cut of these small mills was hauled, you handled it with that difference that they handled it over their spur lines to the Tioga and Southeastern from their mill?

Mr. Lee: Yes, sir.

Mr. Saunders: Did you take up those spurs?

Mr. Lee: Yes, sir.

Mr. Saunders: Did you obtain permission from anybody to do that?

Mr. Lee: Obtained permission from the Railroad Commission of

Louisiana showing that there was nothing to be performed there and they allowed us to remove the spur track.

Mr. Saunders: Have either you or your company any interest direct or indirect in the Alexandria Cooperage Co.?

Mr. Lee: None at all.

Mr. Saunders: Any interest, direct or indirect, in this colonization scheme?

Mr. Lee: Not a dollar.

Mr. Saunders: The Lee Lumber Company sold the land?

3862 Mr. Lee: We sold the property.

Mr. Saunders: That was the extent of your interest?

Mr. Lee: Yes, sir. Of course, we are interested in having the property built up in the country.

Mr. Jeffrey: When were your divisions increased with the St. Louis, Iron Mountain and Southern Railway?

Mr. Lee: Why were they?

Mr. Saunders: What were they increased from?

Mr. Lee: I think they were increased about a half cent per hundred pounds approximately to some points. I don't recall that quite to memory but I think the figures are about a half cent.

Mr. Saunders: What was the gist of the negotiations?

Mr. Lee: Well, I took the matter up with Mr. Jackson, the Vice-President and Head of the Traffic Department, at St Louis—went to St. Louis to see him—and I told him that with the tonnage originating on our road, that I thought we ought to get a larger division of it; that we originated the freight on our line and I did not think we were getting enough division out of the tonnage on our line. It was not because we had connected with the Louisiana Railway and Navigation Company that I asked for an increase

3863 in divisions. The Louisiana and Arkansas runs within one hundred yards of our railroad, and the Chicago, Rock Island and Pacific cuts across their line within one hundred yards of our railroad, and for a long time——

Examiner Burchmore: Within one hundred yards?

Mr. Lee: Yes, sir.

Examiner Burchmore: Well, does not the proximity of the Chicago, Rock Island and Pacific and your actual connection with the Louisiana Railway and Navigation Company constitute quite a powerful argument when discussing it with the St. Louis, Iron Mountain and Southern?

Mr. Lee: I should think so.

Examiner Burchmore: I should think so.

Mr. Jeffrey: Even though a silent one.

Examiner Burchmore: It would hardly need to be set out.

Mr. Lee: It goes without saying that competition is the life of trade.

Mr. Jeffrey: Did you ever have any negotiation with the Chicago, Rock Island and Pacific? Did they ever want you to connect up there?

Mr. Lee: No, sir, never have had any negotiations. I

3864 have had negotiations with the Louisiana and Arkansas, and they have surveyed a connection with the Tioga and South-

eastern and have sent a civil engineer down there but it has never been put into effect.

Examiner Burchmore: Have you any contract with any railroad?

Mr. Lee: No, sir, none whatever with anybody. We have no contract to deliver any certain amount of tonnage to any railroad or anybody else.

Mr. Saunders: I see the charter provides that you should build a road beginning at or near the town of Tioga on the St. Louis, Iron Mountain and Southern Railway line and thence in a general southeasterly direction, through the parishes of Rapides and Avoyelles, and through the parishes southeast thereof, with such branch lines and connections, upon such course and routes as may be selected and deemed advisable by the Board of Directors of said company?

Mr. Lee: Yes, sir.

Examiner Burchmore: Have you heard the request made to-day for maps?

Mr. Saunders: No, sir, I was not present but we will take pleasure——

3865 Examiner Burchmore: Furnish a map of your road drawn to scale—a blue print or pen and ink sketch—showing the line of road and the forests and the connecting roads and connecting tram lines and all your geography.

Mr. Lee: Yes, sir, we will and we will be able to show the holdings of the Lee Lumber Company in that vicinity and the holdings of other parties that the Lee Lumber Company has no interest in.

Examiner Burchmore: That may properly be included but you may put anything in the map you want if you will put that much. Draw it to a scale and don't make it too large.

Mr. Lee: We want to show the possibilities of the railroad, aside from the Lee Lumber Company who own a very small per cent of the lands in the territory we are developing.

Examiner Burchmore: One other request. Will you furnish a statement of your tonnage for the fiscal year ending June 30, 1910 showing the total logs or log tonnage, stated separately, annually handled for the account of the Lee Lumber Company,—the total amount of their traffic handled for the Lee Lumber Company

3866 or for stores or companies in which it is interested and then show separately the traffic handled for the general public.

Mr. Lee: We will be very glad to do so.

Examiner Burchmore: That latter figure may be divided by commodities, or not; also show how much of your tonnage and which class of it went to the St. Louis Iron Mountain and Southern?

Mr. Lee: That is of record and we will be very glad to do so.

Examiner Burchmore: Kindly show the figures in tons and in dollars and cents?

Mr. Saunders: That will show inbound and outbound?

Examiner Burchmore: Yes.

Mr. Lee: We have no disposition except to show you facts in the case, and anything you want we will give it to you.

Mr. Jeffrey: Your geographical situation is that you connect with the St. Louis Iron Mountain and Southern, and are within ten miles of the Louisiana and Arkansas and of the Chicago Rock Island and Pacific?

Mr. Lee: Yes sir.

3867 Examiner Burchmore: Are there any rivers between these lines?

Mr. Lee: No sir.

Examiner Burchmore: No mountains?

Mr. Lee: No mountains and no rivers.

Mr. Jeffrey: Except the Iron Mountain.

Mr. Lee: I want to make an explanation that we are under no obligations to no railroads, the Iron Mountain or anybody else.

S. R. LEE, recalled, testified as follows:

Mr. Saunders: Mr. Lee, in regard to the Tioga and Southeastern Railroad Company about which you have testified this afternoon, state whether or not it holds itself out to the general public as a common carrier?

Mr. Lee: It does.

Mr. Saunders: State whether or not it takes all business tendered it.

Mr. Lee: It does.

Mr. Saunders: State whether or not under its charter it is now required to operate a passenger traffic.

Mr. Lee: I don't think the charter requires it.

3868 Mr. Saunders: Will you operate a passenger traffic when conditions require it.

Mr. Lee: Absolutely. We stand ready to do it whenever conditions require it. I don't think it is stipulated.

3869 *Victoria, Fisher and Western Railroad Company.*

(Appearances: J. D. Riddell, Esq. Attorney for the V. & F. & W. Railroad Co.)

W. W. WARREN, was called as a witness and having been first duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Mr. Warren, state your office with the Victoria Fisher and Western Railroad Company, and your office if any with the Lumber Company?

Mr. Warren: General Manager.

Examiner Burchmore: Of both companies?

Mr. Warren: Yes sir:

Examiner Burchmore: Do you receive salaries from both companies?

Mr. Warren: The Railroad Company pays the lumber company

$1,000.00 per year which is supposed to be for a part of my salary and a part of the office clerks.

Examiner Burchmore: That $1,000.00 a year pays for your services and the services rendered by these clerks of the lumber company, who perform the entire general office work of the Railroad Company?

Mr. Warren: Yes it is supposed to be.

Examiner Burchmore: Are there any other officers of the railroad company who receive salaries or compensations from
3870 the railroad company?

Mr. Warren: No sir.

Examiner Burchmore: Does the Traffic Manager receive any compensation from the lumber company?

Mr. Warren: From the lumber company?

Examiner Burchmore: Yes.

Mr. Warren: I think not:

Examiner Burchmore: There are other salaried officers however. of the railroad company?

Mr. Warren: None whatever other than what I have said. This $1,000.00 a year is supposed to cover all.

Examiner Burchmore: Is $1,000.00 a year the total salaries of the officers and clerks of the railroad?

Mr. Warren: That is, at the general office at Fisher.

Examiner Burchmore: Then there are other general officers of the railroad located elsewhere who receive salaries from the Railroad?

Mr. Warren: Not as officers. The Traffic manager—I would not call him a general officer.

Examiner Burchmore: He is also connected with the other lumber companies?

Mr. Warren: Yes sir.

3871 Examiner Burchmore: I have been referring to the lumber company. I mean by that the Louisiana Long Leaf Lumber Company which I understands, controls this railroad through ownership or mutual ownership of the capital stock.

Mr. Warren: The stock of the two companies are held by the same stockholders in the same relative proportion.

Examiner Burchmore: This Railroad connects with the Texas and Pacific Railway at Victoria, La., and with the Kansas City Southern at Fisher Louisiana?

Mr. Warren: Yes sir.

Examiner Burchmore: Its outside mileage is what?

Mr. Warren: Thirty-one miles main line and twenty-five miles used in sidings and logging spurs.

Examiner Burchmore: That track is all standard gauge?

Mr. Warren: Yes sir.

Examiner Burchmore: What is the weight of the rail?

Mr. Warren: From forty to sixty pounds; mostly forty.

Examiner Burchmore: It has how many locomotives?

Mr. Warren: Five.

Examiner Burchmore: How many freight cars?

Mr. Warren: Just a minute. There are three box cars,
3872 one flat car and one hundred and five log cars and four caboose cars.

Examiner Burchmore: How long has it owned all this equipment?

Mr. Warren: Since its incorporation and purchase from the Lumber Company some eight years ago, and—well some of it has been acquired since then.

Examiner Burchmore: Are all those locomotives and cars operated by the lumber company, or are some of them leased or loaned to the Lumber Company?

Mr. Warren: The Railroad Company operates all of that property—owns all of that property.

Examiner Burchmore: Operates all of what property?

Mr. Warren: Operates all of the property.

Examiner Burchmore: None of these locomotives are operated by the Lumber Company?

Mr. Warren: No sir.

Examiner Burchmore: Are there any private tram roads connected with this road?

Mr. Warren: No sir.

Examiner Burchmore: No privately owned logging spurs?

Mr. Warren: No sir.

3873 Examiner Burchmore: Where is Fisher, Louisiana relative to some well known city?

Mr. Warren: About 80 miles south of Shreveport.

Examiner Burchmore: In the Long Leaf belt?

Mr. Warren: It is about where one quits and the other begins; it is mixed.

Examiner Burchmore: When was this railroad constructed?

Mr. Warren: Part of this railroad was commenced probably 25 years ago from Victoria Southwest and under a charter, as I understand it, taken out by the Robeline and Sabine Pass Railway.

Examiner Burchmore: Tha- was a connection carrier railroad?

Mr. Warren: I don't know anything about how they conducted their affairs but in the year 1900, the Louisiana Long Leaf Lumber Company purchased that piece of road and continued it on to Fisher.

Examiner Burchmore: A distance of 25 miles?

Mr. Warren: A total distance of about 25 miles.

Examiner Burchmore: How much was this additional construction?

3874 Mr. Warren: About eight or nine miles. Then in 1902 the railroad property was all acquired by the Victoria and Fisher Railroad Company.

Examiner Burchmore: It was incorporated at that time?

Mr. Warren: In November I think 1902. Part of the line was commenced westerly from Fisher in 1900, I think.

Examiner Burchmore: How many mills has the Louisiana Long Leaf Lumber Company, where are they located and how are they designated?

Mr. Warren: There is one pine mill at Victoria, a pine mill at Fisher and a hardwood mill at Fisher.

Examiner Burchmore: What is the distance from Victoria mill to the junction with the Texas and Pacific Railway?

Mr. Warren: From the saw mill?

Examiner Burchmore: At Victoria.

Mr. Warren: There is only one mill, at Victoria.

Mr. Riddell: Most of the lumber is loaded at the Pla-ingg Mill.

Examiner Burchmore: Then, from the Planing Mill?

Mr. Warren: In one direction it is about, I suppose, one hundred yards, but in the direction that the lumber moves, it is probably a quarter of a mile.

3875 Examiner Burchmore: Will you file later with the commission a map of the character heretofore described?

Mr. Warren: Yes sir.

Mr. Riddell: You want that to cover the ejtire line?

Examiner Burchmore: Yes sir.

Mr. Warren: Yes sir. You don't want it made by an engineer; you want it approximately correct?

Examiner Burchmore: I want it drawn to scale and such a map as I might draw if I started to do it myself. It does not need to be on an engineer's form, a blue print or a pen and ink sketch, in order that they may get the information from it correctly, and drawn to scale. Make it of reasonable size. What is the distance from the respective mills at Fisher to the Junction with the Kansas City Southern Railway at Fisher?

Mr. Warren: From the saw mill on past the Planing Mill to the Kansas City Southern Railway transfer, is very nearly a mile. The Saw Mill and the Planing Mill are something like 1000 feet apart.

Examiner Burchmore: Both of the two mills at Fisher
3876 are hardwood mills?

Mr. Warren: No, that is a pine mill. The Hardwood mill —the saw mill—is probably half or three quarters of a mile distant and the Planing Mill is about a mile.

Examiner Burchmore: These are all the mills that the Company owns?

Mr. Warren: Yes sir.

Examiner Burchmore: And none of these mills are located directly on the rails or directly adjacent to the right of way of the Texas and Pacific Railway or Kansas City Southern?

Mr. Warren: No sir, they are all on the tracks of the Victoria Fisher and Western Railroad.

Examiner Burchmore: When were these mills built and open?

Mr. Warren: As I said, the Victoria property was acquired by purchase. There has been a mill there for over 25 years.

Examiner Burchmore: Take that mill. That mill was built—your understanding is that the mill was opened about the time this railroad was first built?

Mr. Warren: The Texas and Pacific?

3877 Examiner Burchmore: No the Victoria Fisher and Western Railroad.

Mr. Warren: My understanding then, is that originally they built a small mill there and probably logged that by team and then that mill burned and they started out with a narrow gauge railroad, after building the present mill, and just what was done, I don't know, only from appearances.

Examiner Burchmore: It appears that originally this railroad, as it originally stood, was largely a logging proposition in connection with one of those mills, in the beginning.

Mr. Warren: I presume so.

Examiner Burchmore: However far it may have gone away from that since?

Mr. Warren: Yes sir.

Examiner Burchmore: Does this railroad have any trackage rights from either of the two railroads above mentioned?

Mr. Warren: No sir.

Examiner Burchmore: Its engines do not go off its own line?

3878 Mr. Warren: No sir.

Examiner Burchmore: What station buildings have you?

Mr. Warren: None.

Examiner Burchmore: You use the Texas and Pacific or Kansas City Southern depot at the point of connection?

Mr. Warren: No, sir.

Examiner Burchmore: Have you any team tracks for the receipt and delivery of car load freight other than those at these mills?

Mr. Warren: Well there are team tracks at the mills and sidings along the main line.

Examiner Burchmore: These sidings are passing sidings and stumpage sidings?

Mr. Warren: Some are only blind sidings with only one end.

Examiner Burchmore: Are the cars and locomotives equipped with safety devices?

Mr. Warren: So far as required. My understanding is that with the skeleton type of logging cars, they are not required to be so equipped.

3879 Examiner Burchmore: How many section gangs are there?

Mr. Warren: Five.

Examiner Burchmore: They devote—do these men work also part of the time for the lumber Company?

Mr. Warren: No sir. On special occasions they might be——

Examiner Burchmore: Independently hired?

Mr. Warren: Yes, they are independently hired?

Examiner Burchmore: How many train crews have you?

Mr. Warren: Four.

Examiner Burchmore: I believe you said your locomotive performed no service off your own rails?

Mr. Warren: I did.

Examiner Burchmore: Do you have any passenger trains or passenger train service?

Mr. Warren: We are not incorporated as a passenger line.

Examiner Burchmore: You carry only freight?

Mr. Warren: Yes sir.

Examiner Burchmore: Do your freight trains run on regular schedule?

Mr. Warren: Yes, sir, only as necessary.

Examiner Burchmore: How many freight trains do you
3880 run a day?

Mr. Warren: From Fisher there are two train crews that make three to four three trips daily and from Victoria there is one that makes two trips daily. The service between Fisher and Victoria is taken care of just as required.

Examiner Burchmore: Have you the figures with respect to the total freight tonnage of your road and how that is divided?

Mr. Warren: I think so.

Examiner Burchmore: Give those figures in your own way. You could examine him briefly regarding the tonnage figures, Mr. Riddell.

Mr. Riddell: I believe you have figures showing the total forest products handled for the Louisiana Long Leaf Lumber Company?

Mr. Warren: Yes sir.

Examiner Burchmore: Will you state what it is?

Mr. Warren: The total tonnage of forest products furnished by the Louisiana Long Leaf Company was 315,496 tons.

Examiner Burchmore: And the revenue?

3881 Mr. Warren: The revenue $116,373.90.

Examiner Burchmore: And what was the tonnage of other freight handled for the Louisiana Long Leaf Company?

Mr. Warren: 245 tons.

Examiner Burchmore: And the revenue?

Mr. Warren: $1,972.96.

Examiner Burchmore: How many tons of forest products did you handle for people other than the Louisiana Long Leaf Lumber Company?

Mr. Warren: 920 tons; revenue $890.49.

Examiner Burchmore: And other freight?

Mr. Warren: 15 tons.

Examiner Burchmore: How much revenue?

Mr. Warren: $44.87.

Examiner Burchmore: As I get the figures, practically 90% of your traffic on a tonnage basis is handled for the Louisiana Long Leaf Lumber Company?

Mr. Warren: I guess so.

Examiner Burchmore: On a revenue basis, what would be the percentage—about the same?

Mr. Warren: Yes or a little more.

Examiner Burchmore: A little more which way?

3882 Mr. Warren: For the controlling interest.

Examiner Burchmore: You participate in joint rates with the Texas and Pacific Railway and the Kansas City Southern Railroads? I refer to joint rates on lumber to interstate destination?

Mr. Warren: We do.

Examiner Burchmore: Are those rates the same in general from both connecting roads?

Mr. Warren: I think generally so. There are exceptions though

Examiner Burchmore: For example, I suppose the local territory —each company reserves that to itself?

Mr. Warren: There is some difference in Texas—quite a little bit.

Examiner Burchmore: You receive divisions out of those joint rates—are those divisions on the same basis from the two connecting lines?

Mr. Warren: Yes sir.

Examiner Burchmore: What are those joint rates? What is their basis? That is to say, are the rates from all of your mills to interstate destination the same as the rates from grouped stations in that vicinity on the Texas and Pacific Railway and Kansas City
3883 Southern?

Mr. Warren: They are generally so. There are no other rates from stations on our line to Sante Fe points and probably other lines, but there are rates from Junction Point.

Examiner Burchmore: But where there are joint rates from points on your line they are the same as junction points.

Mr. Warren: Yes, with the same exception of Texas. There is an arbitrary of one and a quarter cents.

Examiner Burchmore: Are those rates on a milling in transit basis?

Mr. Warren: Yes sir.

Examiner Burchmore: Then they cover the movement of the logs into the mill and the subsequent movement of lumber out?

Mr. Warren: They cover the movement of the log from the junction of the spur track with our main line up to the junction with the trunk line.

Examiner Burchmore: I thought you said there were no spur tracks.

Mr. Warren: I must have misunderstood you. You said
3884 team tracks.

Examiner Burchmore: I asked if there were any private tram roads?

Mr. Warren: Not private, they belong to the railroad Company.

Examiner Burchmore: The rates do not cover transportation from them?

Mr. Warren: No sir.

Examiner Burchmore: What do you charge?

Mr. Warren: $1.50 per thousand feet.

Examiner Burchmore: For moving over this branch line?

Mr. Warren: Yes sir.

Examiner Burchmore: The explanation is that the joint rates do not apply off the main line?

Mr. Warren: Off the main line points only.

Examiner Burchmore: All your stations are on the main line?

Mr. Warren: Yes sir.

Examiner Burchmore: Do you have any joint rates with those other lines on class freight?

Mr. Warren: Yes sir.

3885 Examiner Burchmore: Well, are those rates limited in extent or to all parts of the country—in all directions?

Mr. Warren: Limited.

Examiner Burchmore: What are your divisions out of those joint rates?

Mr. Warren: On classes and commodities?

Examiner Burchmore: Yes.

Mr. Warren: On freight moving from the Atlantic Seaport territory or New Orleans over the Texas and Pacific our division is thirty per cent.

Examiner Burchmore: Thirty per cent of the New Orleans rate?

Mr. Warren: Yes, of the New Orleans rate.

Examiner Burchmore: Have you any other rate?

Mr. Warren: I think there is a rate on oil from Port Arthur, Texas, to Victoria or Fisher—the same division.

Examiner Burchmore: You burn oil in your locomotives?

Mr. Warren: No sir.

Examiner Burchmore: Do you have any joint rate on the coal you use in your locomotive?

Mr. Warren: We do not use any?

3886 Examiner Burchmore: Wood burning locomotives?

Mr. Warren: Wood burning.

Examiner Burchmore: That is you use the waste from your saw mill operations?

Mr. Warren: Part of it. The railroad buys it from the saw mill.

Examiner Burchmore: Now what divisions do you receive on lumber?

Mr. Warren: From three fourths of one cent to four cents.

Examiner Burchmore: Those divisions are in a general way uniform for both carriers?

Mr. Warren: They vary.

Examiner Burchmore: They vary with the territory, or does it make any difference to your railroad company whether the lumber moves out over the Texas and Pacific Railway or the Kansas City Southern Railroad?

Mr. Warren: It makes a difference in a good many cases, as I understand it.

Examiner Burchmore: Which road is more liberal or allows a larger division, or is it sometimes one way and sometimes the other?

3887 Mr. Warren: That is pretty hard to answer Mr. Examiner.

Examiner Burchmore: Well, tell me what you can about it.

Mr. Warren: We receive the highest division from the Kansas City Southern Railroad.

Examiner Burchmore: On their traffic to Kansas City?

Mr. Warren: Local traffic.

Examiner Burchmore: That is at six cents division?

Mr. Warren: I did not say six cents, I said four cents as a maximum.

Examiner Burchmore: Now you receive a division of four cents on this lumber traffic supplied by the Louisiana Long Leaf Lumber Company. What service do you render for which you are paid four cents?

Mr. Warren: The milling in transit service and placing and switching of empty and loaded cars, weighing of loads and delivery to our mill.

Examiner Burchmore: You handle the logs to the mill and the lumber out?

Mr. Warren: Yes sir.

Examiner Burchmore: Is there any billing covering an
3888 inbound movement of logs, other than on conductor's reports such as have been mentioned here this evening?

Mr. Warren: We have a conductor's report on a special form showing the lade of each car.

Examiner Burchmore: And that is the only billing that accompanies the car in?

Mr. Warren: That is all.

Examiner Burchmore: Have you got a copy of that form which you can file with the commission?

Mr. Warren: I can file one.

Examiner Burchmore: You might send one in. Now, when the lumber has been manufactured, it is loaded into empty cars that I assuje, are supplied by the Texas and Pacific Railway or the Kansas City Southern as the case may be? They furnish the equipment?

Mr. Warren: Yes sir.

Examiner Burchmore: Who sets the cars at the mill?

Mr. Warren: We do.

Examiner Burchmore: The Railroad company?

Mr. Warren: The Victoria Fisher and Western.

Examiner Burchmore: They are then loaded by the mill em-
ployees, switched by the Victoria Fisher and Western or
3889 moved by the Victoria Fisher and Western over to the trunk line?

Mr. Warren: They are.

Examiner Burchmore: What billing is the lumber handled on?

Mr. Warren: Bill of Lading.

Examiner Burchmore: Who issues that Bill of Lading?

Mr. Warren: It is taken out in the case of shipments moving from Victoria,—it is taken out on the Victoria Fisher and Western Bill of Lading, and, if delivered to the Kansas City Southern, it is taken out on Kansas City Southern Bill of Lading.

Examiner Burchmore: Now, Victoria is a junction with the Texas and Pacific. Now, as the Victoria Mill, I understand the Victoria Fisher and Western railroad agent issues the bill of lading covering the lumber, and that bill of lading is dated Victoria, or dated along the line somewhere?

Mr. Warren: Along the line.

Examiner Burchmore: At the point of origin?

Mr. Warren: Supposed to be.

Examiner Burchmore: As a matter of fact it makes no
3890 difference because the receipts are the same.

Mr. Warren: Yes sir, and we use one point for convenience.

Examiner Burchmore: The agent also issues a way bill which corresponds to the bill of lading?

Mr. Warren: No sir, we do not issue any way bills.

Examiner Burchmore: Just simply switch the car over to the Texas and Pacific Railway?

Mr. Warren: Yes sir.

Examiner Burchmore: How does the Texas and Pacific know where the car is going?

Mr. Warren: The Bill of Lading is delivered to their agent.

Examiner Burchmore: Whoever executes the Bill of Lading?

Mr. Warren: No, the bill of lading is executed by the Victoria Fisher and Western; in some cases the shipments are turned over on transfer bills with advanced charges.

Examiner Burchmore: On a transfer bill?

Mr. Warren: That is a kind of a bill a belt road issues in big cities. I have had no experience in big cities.

3891 Examiner Burchmore: I think the commission know what that means. Now take the case of lumber originating at Fisher and moving on the Kansas City Southern—manufactured at Fisher. The Kansas City Southern executes the bill of lading?

Mr. Warren: Yes sir.

Examiner Burchmore: And shows the point of origin as *as* Fisher?

Mr. Warren: Cane.

Examiner Burchmore: Where is Cane?

Mr. Warren: That is the name of the line west.

Examiner Burchmore: That is the junction with the Kansas City Southern railroad?

Mr. Warren: No that is the junction with logging spurs with the main line of the Victoria Fisher and Western Railroad. Runs six miles west of Fisher.

Examiner Burchmore: Crosses the Kansas City Southern?

Mr. Warren: Yes sir.

Examiner Burchmore: He shows the point of origin as Cane. That is not on his line?

Mr. Warren: Our line.

Examiner Burchmore: The Kansas City Southern—you
3892 said the Kansas City Southern executes the Bill of lading?

Mr. Warren: The Louisiana Long Leaf Lumber Company write their bill of lading and show this point of origin and deliver that shipment to the Kansas City Southern and deliver the Bill of Lading to the Kansas City Southern.

Examiner Burchmore: You are familiar with the Bill of Lading?

Mr. Warren: Yes sir.

Examiner Burchmore: You know what it looks like?

Mr. Warren: Yes sir.

Examiner Burchmore: Don't you know that a bill of lading reads

something in this wise or to this effect: Received by the Kansas City Southern Railroad Company, from so and so, consignor, at a certain point? That is the way it starts out? It is a receipt for property? and then it continues, That is it agreed that it shall be transported to some destination. How can it acknowledge receipt of lumber at Cane when it is on its line?

Mr. Warren: I may be a little mixed.

Mr. Riddell: Is it not a fact that the Kansas City Southern says that the property was received at Fisher, but originated at
3893 Cane?

Mr. Warren: Yes sir, that is the idea.

Examiner Burchmore: This Bill of Lading is dated at Fisher?

Mr. Warren: Yes sir.

Examiner Burchmore: As a matter of fact, have the logs come from Cane in every case?

Mr. Warren: Yes, because Cane is the junction of all the logging spurs west of Fisher.

Examiner Burchmore: The Fisher mill manufactures lumber exclusively from logs coming in from the west?

Mr. Warren: As a general thing. Once in a while they come from the east.

Examiner Burchmore: Does any lumber move from the Fisher mill over your main line and out over the Texas and Pacific?

Mr. Warren: Yes sir.

Examiner Burchmore: Any great volume of lumber?

Mr. Warren: At times quite a great deal.

Examiner Burchmore: Does any move in an opposite direction from the Victoria mill over the Kansas City Southern?

3894 Mr. Warren: Not so much, some.

Examiner Burchmore: You don't wish to make that statement any more definite?

Mr. Warren: I think not.

Examiner Burchmore: You get the same five cents division for lumber moving over the entire line?

Mr. Warren: We don't get five cents?

Examiner Burchmore: Well, four or three cents?

Mr. Warren: We get the same division on lumber shipped from the mill by the opposite junction as if it was shipped out at the junction nearest the mill.

Mr. Riddell: In other words, you don't get additional compensation for the increased service?

Mr. Warren: No.

Examiner Burchmore: You get the same division no matter what service you perform?

Mr. Warren: Yes sir.

Examiner Burchmore: Do you file a tariff of your own issuance with the Interstate Commerce Commission?

Mr. Warren: Yes sir.

Examiner Burchmore: You are also a party to the joint
3895 tariff.

Mr. Warren: Yes sir.

Examiner Burchmore: It would be unnecessary to explain these tariffs; file them in these proceedings and they will be ref-rred to by the Commission. The Victoria Fishe- and Wester- Railroad Company has forms of bills of lading and way bills represented?

Mr. Warren: Yes sir.

Examiner Burchmore: It complies with the state and federal statutes regulating common carrier?

Mr. Warren: Endeavors to do so.

Examiner Burchmore: Do you keep your accounts in accordance with the system prescribed by the Interstate Commerce Commission?

Mr. Warren: Yes sir.

Examiner Burchmore: Do you post at your station—you have no station—do you—where do you post your tariff for the information of the public?

Mr. Warren: They are at our office. They are not posted, however.

Examiner Burchmore: Well, did anybody ever come and ask to see this tariff?

3896 Mr. Warren: Any shippers?

Examiner Burchmore: Yes.

Mr. Warren: Possibly so; I don't recall any instance now.

Examiner Burchmore: Have you stated the value of this road with its equipment, or without its equipment?

Examiner Burchmore: What is that valuation?

Mr. Warren: The motive power, $27,378.96, and the rolling stock $53,799.54.

Examiner Burchmore: And the road itself?

Mr. Warren: $258,851.98.

Examiner Burchmore: What is the total capitalization of the road?

Mr. Warren: $300,000.00.

Examiner Burchmore: That is the capital stock?

Mr. Warren: Capital stock?

Examiner Burchmore: Is that actually issued?

Mr. Warren: Yes sir.

Examiner Burchmore: Actually paid for?

Mr. Warren: It represents a dividend on the capital stock of the Long Leaf Lumber Company paid to its stockholders.

Examiner Burchmore: Has this railroad company ever

3897 paid any dividend, and if so, what is the extent of this dividend?

Mr. Warren: No sir.

Examiner Burchmore: Has it accumulated a surplus?

Mr. Warren: I think so, if I can find it.

Examiner Burchmore: Well, that surplus is shown in your annual report, but I would like this record to show in some general way its extent and whether it is a book-keeping surplus or an actual surplus?

Mr. Warren: It represents an actual surplus and is re-invested.

Examiner Burchmore: Surplus that has been invested in betterments and additions?

Mr. Warren: Yes sir; on June 30, 1910, it appears to have been $13,509.17.

Examiner Burchmore: How long had it taken to accumulate that surplus?

Mr. Warren: We were incorporated in 1902.

Examiner Burchmore: What is the extent of the betterments and additions that have been paid for out of the net operating
3898 revenues of this railroad Company since its incorporation?

Mr. Warren: The purchase of additional equipment and improvements on the roadway and widening of cuts and some grades and ballasting with some rocks and with sand. It is an ordinary dirt road though.

Examiner Burchmore: What does it all amount to in dollars—$50,000.00?

Mr. Warren: I would not like to venture a guess; I hardly know.

Examiner Burchmore: Haven't you any impression about it? This road makes $10,000.00 a year, does it not?

Mr. Warren: This road makes $10,000.00 a year, sometime; I think it did better than that last year.

Examiner Burchmore: I think so too, but I made it moderate at $10,000.00. What was the net operating revenue last year?

Mr. Warren: I know we have to pay an income tax. The net earnings were $66,374.79, but fro- that is to be deducted $47,655.88, which represents the abandoned spur tracks and depreciation on rolling stock and other property. I believe we are required to carry an accrued depreciation account and get permission of
3899 the commission before we can charge any of that into income account, so that the actual net income was about $16,000.00 or $17,000.00.

Examiner Burchmore: The next year it will be very much larger than that because you won't have all this depreciation—what else did you call it?

Mr. Warren: Abandoned spurs?

Examiner Burchmore: Abandonment of property account.

Mr. Warren: I believe we will. That goes on always.

Examiner Burchmore: Do those abandoned spurs all belong to the lumber company—don't they?

Mr. Warren: Yes sir.

Examiner Burchmore: What timber holdings has this Louisiana Leaf Lumber Company in the territory served by the Fisher and Western Railroad? By timber holdings, I don't mean ownership of land in fee, but I mean such ownership, plus stumpage rights?

Mr. Warren: There is about 95,000 acres uncut.

Examiner Burchmore: How much cut?

Mr. Warren: 75, or 80,000.

Examiner Burchmore: How much land do other people own around there? Any?

3900 Mr. Warren: Not a great deal no. There are other lumber companies that own timber that adjoins us on either

side and in the m-ddle, but not that would be served by our railroad, or that could be served by our railroad.

Examiner Burchmore: Are there any towns on the line?

Mr. Warren: No sir.

Examiner Burchmore: Has the Lumber Company any commissaries on the line?

Mr. Warren: At Victoria and Fisher.

Examiner Burchmore: Their supplies move over the line don't they?

Mr. Warren: Some.

Examiner Burchmore: What passes do the officers of this company hold from other railroads?

Mr. Warren: Oh, over the Iron Mountain and the Texas and Pacific and the Kansas City Southern.

Examiner Burchmore: There are a number of such exchanges?

Mr. Warren: A number of such exchanges made.

Examiner Burchmore: And they are actually used?

Mr. Warren: I use mine.

3901 Examiner Burchmore: You never pay a fare where you have got a pass?

Mr. Warren: I don't think I ever forgot that I had one. I have paid when I did not have one though.

Examiner Burchmore: Who owns the right of way on which this railroad is constructed?

Mr. Warren: The Company.

Examiner Burchmore: You referred to a $1.50 charge per thousand feet for taking the logs off those private spurs—branch spurs—and taking them to the main line.

Mr. Warren: I would like to explain that that covers the cost of the construction of those spurs and the operating of those spurs and removing of them when no longer needed.

Examiner Burchmore: Is that charge published or filed?

Mr. Warren: We consider that as a purely local movement within the state.

Examiner Burchmore: Do the trains stop at all when they reach the main line? Don't they keep on going?

Mr. Warren: Sometimes they keep on but as a rule we have to stop and throw the switch.

3902 Examiner Burchmore: Is it not merely an indivisible part of the whole haul from the tree to the mill?

Mr. Warren: We never considered it was a part of the through movement.

Examiner Burchmore: All the tracks belong to the railroad Company?

Mr. Warren: Yes sir.

Examiner Burchmore: The engine goes the whole way from the tree to the mill?

Mr. Warren: Yes sir.

Examiner Burchmore: Then, what substantial reason is there for drawing this line at the junction between this spur track and

the main line and requiring the Long Leaf Lumber Company to pay up to this invisible line, and not requiring it to pay beyond?

Mr. Warren: They are temporary tracks that are constructed solely for the purpose of bringing logs to the main line.

Examiner Burchmore: Then, the common carrier accommodates its patrons by building temporary spur tracks off in the woods to get that timber?

Mr. Warren: Yes sir.

3903 Examiner Burchmore: Do you accommodate any other patrons besides the Louisiana Long Leaf Lumber Company?

Mr. Warren: We would, and we have put in sidings for the benefit of other people on which to load their lumber. If they had enough lumber to justify the construction of a spur, we would build it.

Examiner Burchmore: Are there any small mills along this line?

Mr. Warren: One between Fisher and Victoria, ten miles from Victoria.

Examiner Burchmore: Is that in operation?

Mr. Warren: Not right now; it burned recently; but we have no timber there.

Examiner Burchmore: Are they going to rebuild?

Mr. Warren: I don't know.

Examiner Burchmore: They cannot compete with your lumber mill without getting the same rate?

Mr. Warren: Oh, they have to bring their logs in by team, but we have to haul ours by team to our spurs.

Examiner Burchmore: But a much less distance?

Mr. Warren: Sometimes as far; as a rule it is not so.

3904 Mr. Riddell: I believe you said the road was incorporated—I am not certain?

Mr. Warren: Yes sir.

Examiner Burchmore: It holds itself out to the public as a common carrier?

Mr. Warren: Yes sir.

Examiner Burchmore: That is all the public there is to that?

Mr. Warren: Yes sir.

Mr. Riddell: You are recognized by the state railroad commission of Louisiana as a common carrier?

Mr. Warren: Yes sir.

Mr. Riddell: You own your own rail?

Mr. Warren: Yes sir.

Mr. Riddell: The same as your other property.

Mr. Warren: Yes sir.

Examiner Burchmore: You are taxed as a common carrier?

Mr. Warren: Yes sir our valuation is assessed by the State Board of Railroad appraisers.

Mr. Riddell: Do you operate any track scales for weighing of car load freight?

Mr. Warren: We do at Fisher.

3905 Examiner Burchmore: One?

Mr. Warren: Yes, at Fisher, Louisiana.

Cross-examination:

Mr. Riddell: Is Victoria just east of the terminus of that line, in close proximity to Natchitoches, Louisiana?

Mr. Warren: About 12 miles distant.

Examiner Burchmore: What is the population of Natchitoches?

Mr. Warren: Between 3,000 and 5,000.

Examiner Burchmore: Have you ever been approached by the people of Natchitoches with a view of having your line extend there?

Mr. Warren: We have.

Examiner Burchmore: Have you ever been offered any substantial encouragement to do it?

Mr. Warren: We were offered $30,000.00 I think about two years ago and the Natchitoches people told me to-day that they believed they would give me $50,000.00.

Mr. Riddell: Well, do you imagine that they were prompted to do that by a desire to have your line build further so that
3906 the Louisiana Long Leaf Lumber Company could ship its lumber to Natchitoches?

Mr. Warren: I did not get the question.

Mr. Riddell: I say, do you imagine that the consideration that prompted them in making that offer was a desire to enable the Louisiana Long Leaf Lumber Company to ship its lumber to Natchitoches?

Mr. Warren: I hardly think so.

Examiner Burchmore: Where is Natchitoches? Is the junction of the two lines—of the Texas and Pacific Railway with the Louisiana and Northwestern Railway?

Mr. Warren: Yes, sir.

Mr. Riddell: Now, Natchitoches is served already by two railroads, is it, the Texas and Pacific Railway and the Louisiana and Northwestern?

Mr. Warren: Yes, sir, it is.

Examiner Burchmore: Each of those lines is more important as to length anyhow, than the Victoria, Fisher and Western?

Mr. Warren: Yes, sir.

Examiner Burchmore: Is it the intention to make the Victoria, Fisher and Western Railroad a part of a through line with
3907 the Louisiana and Northwestern?

Mr. Warren: None in the world.

Examiner Burchmore: The conclusion you reach from the Natchitoches people is that it was an advantage to them to have the Victoria, Fisher and Western in the town?

Mr. Warren: Yes, and they are anticipating that there would be a through train service over our line, and the Louisiana and Northwestern.

Examiner Burchmore: The Victoria, Fisher and Western Railroad does not have through rates on forest products to all territories of destination?

Mr. Warren: It does not.

Examiner Burchmore: In the absence of through rates—take for instance the tonnage, moving through the Kansas City Southern to

Texas points, you have the same revenue on that, probably, do you not?

Mr. Warren: We charge our legal interstate rate.

Examiner Burchmore: And that legal rate is materially in excess I believe of your proportion of the through rate?

Mr. Warren: Yes, sir.

3908 Examiner Burchmore: You would charge from four to six cents a hundred pounds on shipments going through the medium of the Kansas City Southern into Texas, whereas your proportion of a through rate, where there is a through rate to Texas in connection with the Kansas City Southern, varies from one-quarter of a cent to two cents per hundred pounds, does it not?

Mr. Warren: Yes, sir.

Examiner Burchmore: Did I ask you for a map?

Mr. Warren: Yes, sir, you did.

Examiner Burchmore: Did I ask you for a statement of the tonnage such as I have asked other railroads?

Mr. Warren: I think the stenographer has it in the record.

Examiner Burchmore: If I did not, I wish you would furnish such a statement.

Mr. Riddell: We have read it into the record, as far as products and other freights handled for the controlling interests and the other interests.

Examiner Burchmore: Has there been any material change in your manner of taxing transportation or in your rates and

3909 divisions in the last year?

Mr. Warren: No, sir.

Examiner Burchmore: The road is conducted substantially as it formerly was?

Mr. Warren: Yes, sir.

Examiner Burchmore: So that a report rendered to the commission by examiners in the field would probably describe the present condition and operation of the road about as accurately as it described conditions existing at that time?

Mr. Warren: The report was made by the examiner of the Commission?

Examiner Burchmore: Yes.

Mr. Warren: I should think so.

Examiner Burchmore: That is, if the report was true then, it would be true now?

Mr. Warren: I think so.

Examiner Burchmore: In a substantial sense?

Mr. Warren: Yes, sir.

Whereupon, at 5:30 o'clock P. M. an adjournment was ordered by the Examiner until the next day, at 9:30 A. M., in the main room.

3910 At 9:30 o'clock A. M., pursuant to announcement,

Special examiner George P. Boyle opened the hearing in the case of The Gould Southwestern Railway Company in an adjoining room, where the following proceedings were had:

Gould Southwestern Railway Company.

Examiner Boyle: We will now take up the case of The Gould Southwestern Railway Company.

H. L. ROSENTHAL was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Boyle: State your name, residence, and official position, Mr. Rosenthal?

Mr. Rosenthal: H. L. Rosenthal, Chicago, Illinois; Traffic Manager.

Examiner Boyle: Of what railroad?

Mr. Rosenthal: The Gould Southwestern Railway Company.

Examiner Boyle: Located where?

Mr. Rosenthal: In Lincoln County, Arkansas.

Examiner Boyle: How long is that line?

Mr. Rosenthal: 25½ miles.

Examiner Boyle: And extends between what places?

3911 Mr. Rosenthal: Between Eastman and Star City.

Examiner Boyle: Have you a map of your railroad, or something that will represent it to assist us in locating it?

Mr. Rosenthal: Yes, sir.

Examiner Boyle: Do you offer this as an exhibit?

Mr. Rosenthal: Yes, sir.

Examiner Boyle: It will be received and filed as "Exhibit Rosenthal 1."

Mr. Gutheim: Just where does your road lie, so we will be able to locate it on the map?

Mr. Rosenthal: It starts from a point 74 miles southeast from Little Rock on the Valley Division of the St. Louis, Iron Mountain & Southern Railway and runs in a southwesterly direction.

Mr. Gutheim: Is this road a standard or narrow gauge?

Mr. Rosenthal: Standard gauge.

Mr. Gutheim: The main line mileage is what?

Mr. Rosenthal: The main line mileage is 19½ miles, I be-

3912 lieve.

Mr. Gutheim: And your connection is the St. Louis, Iron Mountain & Southern Railway,—that is your only connection?

Mr. Rosenthal: Yes.

Mr. Gutheim: At Gould?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: Now, what particular industry does your line serve, and what furnishes the majority of your tonnage?

Mr. Rosenthal: There are about eight or ten mills along the line, in addition to which there is the town of Star City, which town has around a dozen stores, several of them being more or less wholesale stores.

Mr. Gutheim: Star City is southwest of Gould in the timber?

Mr. Rosenthal: Yes.

Mr. Gutheim: And the principal industry on the road is at Esterbrook—the lumber company?

Mr. Rosenthal: No, sir.

Mr. Gutheim: What is the name of the lumber company
3913 that furnishes the larger proportion of your tonnage?

Mr. Rosenthal: There is not only one company that furnishes the majority of the tonnage; the biggest individual shipper on the road is Mr. R. E. Muse.

Mr. Gutheim: R. L. Muse—What is the—the Newhouse mill and lumber company's plant?

Mr. Rosenthal: The Newhouse mill and lumber company's plant are not operating any plant whatsoever on the line of the Gould Southwestern Railway now.

Mr. Gutheim: How long since they have operated?

Mr. Rosenthal: About—I don't think they have operated since May, 1908.

Mr. Gutheim: Have the Newhouse Mill & Lumber Company any relation as far as community of interest goes, with the Esterbrook Lumber Company?

Mr. Rosenthal: There are several stockholders of the Newhouse Mill & Lumber Company, who also own stock in the Esterbrook Company.

Mr. Gutheim: Did the Newhouse Mill & Lumber Company succeed the Esterbrook Lumber Company in its operations on this line?

Mr. Rosenthal: They succeeded in the operation of mill
3914 out or in this territory during the year 1906.

Mr. Gutheim: So that the Esterbrook Lumber Company has not operated since 1906?

Mr. Rosenthal: No, sir.

Mr. Gutheim: And the Newhouse Mill & Lumber Co. has not operated since May, 1908?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: To what extent are the Esterbrook Lumber Company, or the Newhouse Mill & Lumber Company interested in the railroad, directly or indirectly, that is except as shippers?

Mr. Rosenthal: There is not—I should like——

Mr. Gutheim: That is, did the Esterbrook Lumber Company, or its successors, the Newhouse Mill & Lumber Company control the railroad by reason of direct or indirect stock ownership?

Mr. Rosenthal: Yes, sir, in this way: That the owners of the Newhouse Mill & Lumber Company, are more or less identical with the Gould Southwestern Railroad Company.

Mr. Gutheim: Is it not a fact that they are identical
3915 that the stockholders are the same?

Mr. Rosenthal: No, not identical.

Mr. Gutheim: How much stock of the Gould Southwestern Railroad Company is owned by individuals who have no interest whatever in the Newhouse Lumber Company?

Mr. Rosenthal: I really don't know how much.

Mr. Gutheim: Well, about how much?

Mr. Rosenthal: Well, I cannot say, because I am not familiar with it; it is comparatively little.

Examiner Boyle: You are not qualified to testify on that, are you?

Mr. Rosenthal: I am not qualified to testify on that.

Examiner Boyle: Is there any witness who can tell these things? That it is a small proportion?

Mr. Gutheim: Will you make a statement as counsel?

Charles T. Coleman: I understand that the majority of the stock in the Gould Southwestern Railway Company is owned by stockholders of the Newhouse Lumber Company; just what the
3916 exact proportion is, I am not informed.

Mr. Gutheim: To state it in another way: Does the Newhouse Mill & Lumber Company or its stockholders own anything, except what is necessary to qualify them as directors?

Mr. Rosenthal: No, sir; I can answer that.

Mr. Coleman: I will state that we have had the financial man here for a week, but he was called away, and he can state the exact status of the stock holdings if it is desired to submit it.

Mr. Gutheim: You may file the statement as part of the evidence, and show the list of stockholders and their respective holdings, and the extent to which each of these stockholders are interested in the Newhouse Mill & Lumber Company.

Mr. Coleman: Yes, we will do it.

Mr. Gutheim: Is the suspension of operation of the Newhouse Mill & Lumber Company a temporary suspension, or is it permanent on account of the exhaustion of the timber?

3917 Mr. Rosenthal: It is a permanent suspension, but not on account of the exhaustion of the timber, and it really is in this way. The Newhouse Mill & Lumber Company has disposed of practically all of the timber with the exception of a little over a thousand acres, and it is only a question of a short time when they will dispose of that timber.

Mr. Gutheim: Has the timber that has been disposed of, been purchased by one individual or one company or corporation?

Mr. Rosenthal: No, sir it has been disposed of to several, I understand.

Mr. Gutheim: What is the name of the largest purchaser?

Mr. Rosenthal: I don't think I know.

Mr. Gutheim: Do you know whether or not the purchasers are those small mills along the line you have spoken of?

Mr. Rosenthal: Yes, sir, some of them.

Mr. Gutheim: About what is the total acreage that has been disposed of actually or presumably.

Mr. Rosenthall: You mean that has been disposed of, these
3918 outside interests?

Mr. Gutheim: To the various interests.

Mr. Rosenthal: About 617 acres.

Mr. Gutheim: That is substantially all of the remaining timber to be cut, the product of which will be shipped over this road?

Mr. Rosenthal: No, that is a very small proportion of the standing timber along the road.

Mr. Gutheim: Well, as a matter of fact we seemed to have reached a point where there is a large amount of timber remaining to be cut, but owing to some stand of the Newhouse Lumber Company which controls the road; but these owners are not operating and presumably do not intend operating the mill.

Mr. Rosenthal: That part is true; they don't intend to operate a mill.

Mr. Gutheim: So that you wish us to infer, the road is not to be operated or built by the Newhouse Mill & Lumber Company, out of the territory through the ones interested in the railroad so far as the active operation was concerned?

Mr. Rosenthal: That is true.

Mr. Gutheim: What other industries are there along the
3919 line outside of the lumber industries that furnish the traffic?

Mr. Rosenthal: There are several large plantations growing cotton and other agricultural products, and in addition to that, practically the whole of Lincoln County and its inhabitants there, are more or less contiguous to the road, and more or less dependent upon the road for transportation and supplies.

Mr. Gutheim: What is the population? First, for instance, at Star City?

Mr. Rosenthal: Yes, that is——

Mr. Gutheim: That depends entirely on the Gould Southwestern Railway Company for railroad service.

Mr. Rosenthal: Between there and Gould.

Mr. Gutheim: Gould is the southwestern terminus of the line?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: What population is there, giving the names of the communities and the population of each, between Gould and Star City?

Mr. Rosenthal: Why, there is between Gould and Star
3920 City, three or four towns.

Mr. Gutheim: Name them.

Mr. Rosenthal: Would amount in population approximately—Champerico, Arkansas, about fifty or seventy-five I believe; that is the only real settlement that is directly on the line of the road, but Lincoln County is one of the oldest settled counties in the State of Arkansas, and scattered all through it are small towns and villages, which we do not directly run through; that is, through the villages, but whom we cater to.

Mr. Gutheim: Well, what is the approximate population of the villages dependent on the Gould Southwestern Railway—what is it?

Mr. Rosenthal: Between five and ten thousand.

Examiner Boyle: That is the city located at that eastern terminus, is what?

Mr. Rosenthal: Gould.

Examiner Boyle: I notice the road extends beyond Gould?

Mr. Rosenthal: Yes, sir, to Benners.

3921 Examiner Boyle: What is the population of that place?

Mr. Rosenthal: I don't think there are any permanent residents there.

Mr. Gutheim: About what is the population?

Mr. Rosenthal: I don't think there are any people living there. It's just a station.

Mr. Gutheim: Nobody at all?

Mr. Rosenthal: Yes, there are several people immediately around.

Mr. Gutheim: The population is less than one hundred?

Mr. Rosenthal: Yes; you mean around——

Mr. Gutheim: In Benners?

Mr. Rosenthal: There are no people in Benners at all; it is just a station—a lumber mill, and forest products.

Mr. Gutheim: Is that the only station east of the St. Louis Iron Mountain & Southern Railway?

Mr. Rosenthal: No, west Arkansas is also a station.

Mr. Gutheim: What is the population of that place?

Mr. Rosenthal: That is a mill point.

Mr. Gutheim: What is the population?

3922 Mr. Rosenthal: That is a mill town, the people don't live there; they live over at Gould.

Mr. Gutheim: What sort of a mill is there?

Mr. Rosenthal: It is a big saw mill.

Mr. Gutheim: What is its capacity?

Mr. Rosenthal: About 20,000 feet per day.

Mr. Gutheim: It runs pretty regularly?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: Who owns the mill?

Mr. Rosenthal: That mill is operated by R. L. Muse.

Mr. Gutheim: Was this town of Star City a settled community when the Gould Southwestern Railway built into that country?

Mr. Rosenthal: Yes, sir; it has been in existence since before the Civil War.

Mr. Gutheim: Where is the mill that was formerly operated by the Newhouse Mill & Lumber Company?

Mr. Rosenthal: At West Arkansas.

Mr. Gutheim: Where is West Arkansas on your line?

Mr. Rosenthal: It is a mill that is now operated by Mr. R. L. Muse, just east of Gould.

Mr. Gutheim: Just how far east of your St. Louis & Iron

3923 Mountain Railway is it?

Mr. Rosenthal: I should judge it to be about one-eighth of a mile.

Mr. Gutheim: And the service on the product of the mill, and West Arkansas, to the St. Louis Iron Mountain & Southern Railroad has been performed during the operation of the saw mill by the Gould Southwestern Railway?

Mr. Rosenthal: Entirely.

Mr. Gutheim: The St. Louis Iron Mountain & Southern Railway, does not handle the traffic?

Mr. Rosenthal: No, sir.

Mr. Gutheim: Was this railroad constructed by the Newhouse Mill & Lumber Company, or the Esterbrook Lumber Company that preceded it?

Mr. Rosenthal: Well, I think I had better give you the history of the transaction.

Mr. Gutheim: Go ahead.

Mr. Rosenthal: During the latter part of 1906.

Examiner Boyle: Well, just state when the road was built.

Mr. Rosenthal: Yes, sir, the Esterbrook Lumber Co., built the mill, and they controlled some money—during that same
3924 summer——

Examiner Boyle: What summer?

Mr. Rosenthal: Summer of 1906; the Newhouse Mill & Lumber Company, they took over all the interests of the Esterbrook Lumber Company, and then the Newhouse Lumber Company proceeded to build a track running from the property at Benners there is a station called Weber, about three miles west of Gould—southwest, and in November of that year, owing to the fact that two parties had asked us—in fact, more than two had asked us to extend the road so as to handle their product, the railroad was incorporated and took over the line formerly owned by the Newhouse Mill & Lumber Company; that was about three miles. And since that time the Gould Southwestern Railroad Company has extended it from Weber to its present length.

Mr. Gutheim: So that, the railroad practically was built contemporaneously with the mill proper?

Mr. Rosenthal: Yes, sir, the first section was.

Mr. Gutheim: And the rest of it has been built in parts since the operation of the mill.

Mr. Rosenthal: No, sir.

3925 Mr. Gutheim: Not at all.

Mr. Rosenthal: No, sir.

Mr. Gutheim: Do you mean it was all built, this twenty-one miles of the main line at the solicitation of parties living along that main line?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: As a matter of fact has the whole twenty-one miles of line been used for the handling of logs for the Newhouse Mill & Lumber Company?

Mr. Rosenthal: No, sir; the line was not completed into Star City at all, until after the mill had ceased operation.

Mr. Gutheim: Do you mean that the construction went on after the mill had ceased operations?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: It went on to Star City presumably for local tonnage, not the tonnage of your people at all?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: As a matter of fact, have the Newhouse Mill & Lumber Company done any cutting to the southwest of the St. Louis Iron Mountain & Southern Railway.

3926 Mr. Rosenthal: To the southwest.

Mr. Gutheim: That is the line I understand which runs in a generally southwesterly direction from the St. Louis Iron Mountain & Southern, or have all their timber operations been to the eastward of the St. Louis Iron Mountain & Southern Railway?

Mr. Rosenthal: Their timber operations at the time the mill was running extended all the way to Benners, and up to Weber.

Mr. Gutheim: All east of the St. Louis Iron Mountain & Southern Railway?

Mr. Rosenthal: No, Weber is west of the St. Louis Iron Mountain & Southern Railway. I might add at that time—you will notice that Weber is right here; we formerly had a line running from one mile west of Evans to Champion, through Weber, but that line has been taken up since, and we built this cut-off.

Mr. Gutheim: So that your use for logging no one line, except that east of the St. Louis Iron Mountain and Southern, and for a distance of three miles west of the St. Louis Iron Mountain & Southern Railway?

3927 Mr. Rosenthal: It has been used for logging.

Mr. Gutheim: I am referring to the logging of the Newhouse Mill & Lumber Company.

Mr. Rosenthal: No, sir.

Mr. Gutheim: Does the Newhouse Mill & Lumber Company own any timber west of the St. Louis Iron Mountain & Southern Railway beyond that three mile limit?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: How extensive are their holdings there?

Mr. Rosenthal: Eleven or twelve hundred acres.

Mr. Gutheim: Eleven or twelve hundred acres?

Mr. Rosenthal: I think it is less than that; I don't know how extensive it is; but the holdings are compaaratively small.

Mr. Gutheim: Was the railroad constructed by the lumber company itself,—that is, operating for the railroad, or was it constructed by some regular railroad construction company?

Mr. Rosenthal: It was constructed by the railroad company itself.

Mr. Gutheim: That is by the Gould Southwestern Railroad Company?

3928 Mr. Rosenthal: Yes, sir, by the Gould Southwestern Railroad Company.

Mr. Gutheim: Now, about the financing of the original construction; that was money furnished by the Esterbrook Lumber Company, originally?

Mr. Rosenthal: No, by the Newhouse Mill & Lumber Company —that is, the original three miles?

Mr. Gutheim: Yes.

Mr. Rosenthal: Yes, sir, the Newhouse Mill & Lumber Company.

Mr. Gutheim: The Newhouse Mill & Lumber Company. And they also furnished the money for the construction of the road I take it, you say, twenty-one miles?

Mr. Rosenthal: They did it in this way; they lent money to the Gould Southwestern Railroad Company on the Gould Southwestern Railway Company's notes.

Mr. Gutheim: What is the outstanding capital stock at the present time?

Mr. Rosenthal: Fifty-one thousand dollars.

Mr. Gutheim: What other indebtedness is there over and above that?

3929 Mr. Rosenthal: Do you mean bonded indebtedness?

Mr. Gutheim: Yes, bonded indebtedness.

Mr. Rosenthal: There is no bonded indebtedness.

Mr. Gutheim: What portion of the indebtedness is it that is applicable to construction account?

Mr. Rosenthal: Well, the indebtedness of the Gould Southwestern Railway Company—I believe the only indebtedness about one hundred and ten thousand dollars which they owe the Newhouse Mill & Lumber Co., on notes.

Examiner Boyle: Those notes represent what?

Mr. Rosenthal: They represent money that the Gould Southwestern Railway Company borrowed from the Newhouse Mill & Lumber Company.

Examiner Boyle: For what purpose?

Mr. Rosenthal: The Gould Southwestern Railway Company used the money for the construction and equipment of the road.

Mr. Gutheim: Now, that money was used for the original construction. Is it also a fact that the financial transaction of the railroad company had been done through the Newhouse Lumber Company's running account kept between both companies, so that

3930 the amount now due from the railroad company represents the net balance that is due, to date, both for construction and operation of the road.

Mr. Rosenthal: No, I don't think so; in other words, what you mean is, that the Newhouse Mill & Lumber Company paid the bills of the Gould Southwestern Railway and charged them up with it?

Mr. Gutheim: Yes, and got credit for what service the Gould Southwestern Railway Company performed for them.

Mr. Rosenthal: No; the accounts are handled as separate corporations.

Mr. Gutheim: So, the fifty thousand dollars of stock outstanding, and the indebtedness amounting to one hundred and seventy thousand dollars represents nothing but the cost of the road, and the equipment?

Mr. Rosenthal: Practically.

Mr. Gutheim: That would be at the rate of about ten thousand dollars per mile?

Mr. Rosenthal: Yes, sir, about it.

Mr. Gutheim: And that indebtedness is due the Newhouse Mill & Lumber Company. What interest is paid by the Gould

3931 Southwestern Railway Company?

Mr. Rosenthal: Six per cent.

Mr. Gutheim: At the present time, are the officers of the Gould Southwestern Railway Company the same as the officers of the Newhouse Mill & Lumber Company?

Mr. Rosenthal: Well, I should judge they are practically the same.

Mr. Gutheim: They are substantially the same?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: What weight of rail is there on this line?

Mr. Rosenthal: I think fifty-six pounds.

Mr. Gutheim: Throughout?

Mr. Rosenthal: No, with the exception of a very small section which is lighter weight, and which will be replaced within the coming six months, I believe.

Mr. Gutheim: Are there any bridges?

Mr. Rosenthal: Eleven.

Mr. Gutheim: Are they substantial bridges?

Mr. Rosenthal: Yes, sir.

3932 Mr. Gutheim: Are any of them iron or steel?

Mr. Rosenthal: No, sir, they are all wooden structures.

Mr. Gutheim: Are there any station buildings on your line?

Mr. Rosenthal: Two.

Mr. Gutheim: Where are they located?

Mr. Rosenthal: At Gould and at Star City.

Mr. Gutheim: Gould is the junction with the St. Louis Iron Mountain & Southern Railway; is that the St. Louis Iron Mountain & Southern Railway Company's depot also?

Mr. Rosenthal: No, sir, they have a separate depot.

Mr. Gutheim: There is a post office at Star City?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: And also at Champion?

Mr. Rosenthal: Yes, sir, so I understand.

Mr. Gutheim: And your line carries the mails for both places?

Mr. Rosenthal: No, sir, not yet; there was an application made, and I know an inspector was over the road about sixty days ago, and he passed favorably on it, and recommended giving the

3933 Gould Southwestern Railway Company a mail contract.

Mr. Gutheim: Have you any facilities for weighing carload shipments on your line?

Mr. Rosenthal: No, sir.

Examiner Boyle: You have no track scales at all?

Mr. Rosenthal: No, sir.

Examiner Boyle: Has the lumber company any track scales?

Mr. Rosenthal: No, sir.

Examiner Boyle: You rely upon whom for your weights?

Mr. Rosenthal: Our rates are, as far as local rates are concerned, *are* practically card rates, and when the stuff goes off the line, then we use the per hundred pounds rates, and depend on the St. Louis Iron Mountain & Southern Railway for our weights.

Mr. Gutheim: What equipment do you operate at the present time?

Mr. Rosenthal: Two locomotives and one combination coach and baggage car, one wrecking train; and there are four cars that are principally used for the—we have no use for them except the work train.

Mr. Gutheim: Have you any regular freight cars?

Mr. Rosenthal: We use foreign line equipment entirely.

3934 Mr. Gutheim: Is all of your equipment, equipped with safety devices as required by the Federal Acts?

Mr. Rosenthal: Yes, sir, with the exception of these four cars which are used for work train purposes entirely, and do not go off the line; as a matter of fact, I don't think these four cars have been used in the last six months; I think they are out of commission.

Mr. Gutheim: What facilities have you for dispatching trains, have you any telegraph or telephone lines?

Mr. Rosenthal: We have a telephone line.

Mr. Gutheim: And are your trains so dispatched?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: About how many employees do you have on the road work?

Mr. Rosenthal: Two section crews, of six men each. With one foreman; we have train crews of three men each, and we have one or two others whom I do not know.

Mr. Gutheim: Have you any agency employees?

3935 Mr. Rosenthal: Yes, sir, we have one at Gould, and one at Star City.

Mr. Gutheim: Is the Gould agent a joint agent with the St. Louis Iron Mountain & Southern Railway?

Mr. Rosenthal: He is not.

Mr. Gutheim: Do the men—the railroad employees, work for the railroad solely, or do they work also for the Newhouse Mill & Lumber Company?

Mr. Rosenthal: They are railroad employees solely.

Mr. Gutheim: How many trains do you run daily?

Mr. Rosenthal: Four, two each way.

Mr. Gutheim: Both of them passenger and freight trains?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: Do you observe the hours of service?

Mr. Rosenthal: Yes.

Mr. Gutheim: These trains run on regular schedules, connecting with the St. Louis Iron Mountain & Southern Railway trains, I suppose?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: Do you have any arrangements for handling express business?

Mr. Rosenthal: We handle all express business.

Mr. Gutheim: As a railroad?

3936 Mr. Rosenthal: As a railroad, yes, sir.

Mr. Gutheim: And not under an express contract?

Mr. Rosenthal: No, sir, not under an express contract?

Mr. Gutheim: About what is the extent of the passenger traffic?

Mr. Rosenthal: Between eight hundred and one thousand per month, and constantly increasing.

Mr. Gutheim: You know about the special statement that has been called for to give in full the rates showing the total tonnage, the total revenue for the fiscal year ending June 30, 1910, and showing

the division of the tonnage and revenue, so that we may know what accrues on the business of the Newhouse Mill & Lumber Company, and what accrues on the business of the outside general public.

Mr. Gutheim: As a matter of fact, just what does your total tonnage handled for all parties other than the Newhouse Mill & Lumber Company consist of?

Mr. Rosenthal: Of lumber and forest products, cotton and grain, agricultural implements; all merchandise etc.

Mr. Gutheim: Do you have through rates with the di-
3937 visions allowed to your company on lumber and forest products?

Mr. Rosenthal: We do.

Mr. Gutheim: And on classes and commodities generally?

Mr. Rosenthal: We do.

Mr. Gutheim: What division is allowed to the Gould Southwestern Railway on the lumber and forest products?

Mr. Rosenthal: Before replying to that, I would like to make this statement, that our lumber rates and forest products from off our stations, are not predicated upon the division of the rates applying within a radius of a mile of Gould, which includes the station of Benner and Grandt inclusive; further on we add an arbitrary running from two cents per hundred pounds to five cents per one hundred pounds over the Gould rates; and in the division of these rates we get two cents per one hundred pounds, plus the arbitrary.

Mr. Gutheim: Now, as I understand it, the junction point or Gould rate applies to all points within a radius of one mile from Gould?

Mr. Rosenthal: Practically.

3938 Mr. Gutheim: Now, what mills are located within that radius?

Mr. Rosenthal: The mill at West Arkansas, and the mill at Grandt.

Mr. Gutheim: Who owns the mill at West Arkansas?

Mr. Rosenthal: R. L. Muse operates the mill; that is his mill.

Mr. Gutheim: For whom?

Mr. Rosenthal: For himself.

Examiner Boyle: What is its capacity?

Mr. Rosenthal: I think it is a twenty thousand foot mill.

Mr. Gutheim: He does not own the mill?

Mr. Rosenthal: It was leased to him by the Newhouse Mill & Lumber Company under a three year lease.

Mr. Gutheim: Right here I want to say that in this statement of tonnage you are to show particularly the tonnage of R. L. Muse as the tonnage of the controlling interest, and show it separately from all the other tonnage.

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: What is the mill at Grandt?

Mr. Rosenthal: It is a mill owned by Mr. A. J. Keller.

3939 Mr. Gutheim: Has Mr. Keller any connection with the Newhouse Mill & Lumber Company?

Mr. Rosenthal: No, sir.

Mr. Gutheim: As a matter of fact is not the preponderance of the tonnage furnished by this mill which is now operated by Mr. Muse?

Mr. Rosenthal: No, sir.

Mr. Gutheim: I understood you to say in the beginning of the examination, that that was the largest mill?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: And that Mr. Muse was the heaviest shipper?

Mr. Rosenthal: I said the heaviest individual shipper.

Mr. Gutheim: That is what I mean, the heaviest individual shipper?

Mr. Rosenthal: Yes, sir, he is the heaviest individual shipper.

Mr. Gutheim: Out of these rates from these two mills, you get a division of what?

Mr. Rosenthal: Two cents per 100 pounds on interstate traffic.

3940 Mr. Gutheim: Two cents for all stations on interstate traffic?

Mr. Rosenthal: Yes, sir.

Examiner Boyle: Don't the card rate apply?

Mr. Rosenthal: The card rate was on local shipments between points on our line.

Mr. Gutheim: From the mills outside of the one mile radius, you have a rate which is made up by adding your arbitrary to the junction point rate?

Mr. Rosenthal: Yes sir, the division we get is that arbitrary plus two cents.

Mr. Gutheim: Yes, and the fact is, that all shippers outside of this one mile radius have to pay your local arbitrary over and above the junction point rate in order to reach their market?

Mr. Rosenthal: They can——

Mr. Gutheim: And all of the arbitrary accrues to your company together with the two cents allowed out of the junction point rate?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: None of these mills that are outside of the one mile radius are controlled by the Newhouse Mill & Lumber Company?

3941 Mr. Rosenthal: Not that I know of.

Mr. Gutheim: So that the Newhouse Mill & Lumber Company, the lessor of the Newhouse property, in any case, pays more than the junction point rate?

Mr. Rosenthal: He pays—that is on the finished product shipped out of his mill?

Mr. Gutheim: Yes, on the finished product shipped out of his mill.

Mr. Rosenthal: He does pay the local freight rates on everything shipped into the mill.

Mr. Gutheim: We will get to that on the matter of divisions again; is the division of the junction point rate, based on the milling in transit theory?

Mr. Rosenthal: I should judge it is.

Mr. Gutheim: Well, do you know that as a matter of fact from your knowledge of the tariffs?

Mr. Rosenthal: Yes, sir; I should judge it is.

Mr. Gutheim: What is the haul from the timber to the mill, out to the west—to west?

Mr. Rosenthal: Well, the haul is anywhere from three miles to twenty miles.

Mr. Gutheim: And what is the rate? Is it paid per thousand feet or per logging car, taking the haul on the logs, and the
3942 lumber, being the differential of the mill to the railroad company.

Mr. Rosenthal: It runs from five to twelve dollars and a half per car, according to the tariff.

Mr. Gutheim: That is the tariff published on the authority of the Arkansas State Railroad Commission?

Mr. Rosenthal: Yes, sir, published and filed with the Arkansas State Railroad Commission.

Examiner Boyle: Is there any lumber consumed locally at Gould?

Mr. Rosenthal: Practically none.

Examiner Boyle: It is all shipped out?

Mr. Rosenthal: Yes, sir. Very little lumber is consumed at other points on the Line.

Examiner Boyle: It is more or less a negligible quantity?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: The service that the Gould Southwestern Railway Company performs on the lumber is a one-eighth of a mile haul at most?

Mr. Rosenthal: Yes, sir, on the finished product.

Mr. Gutheim: On the finished lumber.

3943 Mr. Rosenthal: Yes, sir.

Mr. Gutheim: The general offices of the company are also at Gould?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: You are complying with the Federal law in regard to the publication of tariffs?

Mr. Rosenthal: We do.

Mr. Gutheim: And also filing all monthly and annual reports?

Mr. Rosenthal: We do.

Mr. Gutheim: Does the road operate on a paying basis?

Mr. Rosenthal: There has been a deficit for the last two years.

Mr. Gutheim: Well, what is the net profit and loss account at the present time? Does it show a surplus or a deficit?

Mr. Rosenthal: At the present time?

Mr. Gutheim: Yes.

Mr. Rosenthal: I think there is a slight surplus; very slight however.

3944 Mr. Gutheim: Have you ever paid any dividends?

Mr. Rosenthal: No, sir, all of our money that ever comes in is turned right back into the company for betterments.

Mr. Gutheim: When you made the statement at the opening of the examination, that the Newhouse Mill & Lumber Company would

not probably operate again, you meant that they would not run their mill proper? That the property would be operated by a lessee, as a matter of fact?

Mr. Rosenthal: Part of the timber has been sold by the Newhouse Mill & Lumber Company——

Mr. Gutheim: Has it been sold by the Newhouse Lumber Company and taken by Mr. Muse?

Mr. Rosenthal: I don't think so.

Mr. Gutheim: Have you any knowledge of his timber holdings in the vicinity that are still served by that railroad?

Mr. Rosenthal: Sometimes he is in the habit of buying logs; I don't think he owns very much timber land himself, but he is in the habit of buying logs—is in the habit of buying them within
3945 a radius of forty or fifty miles of Gould and some logs come from points on the St. Louis Iron Mountain & Southern into his mill, and some are hauled in by wagons, and sold by various people at Gould.

Mr. Gutheim: That is all Mr. Examiner at this time, except that it should be definitely understood, that traffic that is handled by this road for account of Mr. Muse, is to be considered as traffic for the controlling interest.

Mr. Rosenthal: The Gould Commission Company, you don't want to have——

Examiner Boyle: That is a matter for argument.

Mr. Gutheim: For the purposes of the commission when these industrial industries are taken into consideration.

Examiner Boyle: Just a moment. We are getting into an argument on this, and I presume that counsel should interpose an objection.

Mr. Gutheim: The proposition is this, when this industrial railroad examination started working, the Commission requested the Examiners to ascertain how much traffic is controlled directly or indirectly by the interests controlling the railroad, and in-
3946 asmuch as the Newhouse Mill & Lumber Company control this railroad and own the mill, and control the operation of the mill, the Commission will take the stand in this examination, that they are the controlling interest, and the fact that you have been requested to prepare the statement showing the business of Mr. Muse separately will enable them to take it if they so desire, and see what is the business for the general public.

Mr. Coleman: I object to the fact stated; I would not object to signing it if it is agreed that this shall be considered traffic furnished by the community interests.

Examiner Boyle: You could not afford to do that at present. I just want to ask you one question. When this Gould Southwestern Railway Company built this road, how did they get the right-of-way? Did they own the property, or get it through condemnation proceedings.

Mr. Rosenthal: They bought the property.

3947 Examiner Boyle: Outright?

Mr. Rosenthal: Yes, sir; outright. No, part of it they

received as a donation from the people at Star City, and some people along the line, which consisted partly of right-of-way would not sell a piece on which they started condemnation proceedings, but for which they finally paid $100.00 and bought the right-of-way; all other right-of-way was bought outright or donated.

Examiner Boyle: Do they own any more, or did they buy any more than enough for the actual roadbed; did they buy any acreage on either side?

Mr. Rosenthal: In the country, as far as the main line is concerned, all they own is just the right-of-way, which I think is something like fifty feet wide.

Examiner Boyle: The statement which the Examiner has asked you to submit, will show the proportion of through traffic as compared to lumber traffic, will it not?

Mr. Rosenthal: Yes, sir.

Examiner Boyle: That should be made distinct. Can you
3948 now give approximately about what your proportion is?

Mr. Rosenthal: I can state as far as——

Examiner Boyle: I just want it approximately.

Mr. Rosenthal: As far as the twelve months ending November 30th this year are concerned—do you want the tonnage itself?

Examiner Boyle: The total tonnage for the twelve months.

Mr. Rosenthal: The total tonnage for the twelve months was about ninety three million pounds; the merchandise was about seven million pounds.

Examiner Boyle: Being eighty-six million pounds about, of timber and lumber?

Mr. Rosenthal: No, there was about two million pounds of cotton and cotton seed; that would be about nine to ten million pounds; other than forest products.

Examiner Boyle: Which would leave about eighty-three million pounds of forest products?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: What arrangements do you have regarding car interchange to and from the mill now operated by Mr.
3949 Muse? Are your cars handled on a per diem basis with the railroad company, or are they handled by the St. Louis Iron Mountain & Southern Railway on a demurrage basis with the Newhouse Mill & Lumber Company.

Mr. Rosenthal: All cars are handled on a per diem basis by the Gould Southwestern Railway in connection with the St. Louis Iron Mountain & Southern Railway Company; that is a regular per diem agreement.

Mr. Gutheim: How long has that agreement been in effect.

Mr. Rosenthal: That agreement has been in effect I believe for about a year. The Gould Southwestern Railway was on the industrial basis.

Mr. Gutheim: That is, you had a regular free time allowance for switching?

Mr. Rosenthal: No, we had a blanket allowance of three days' free time on cars going on our line.

Mr. Gutheim: What was the occasion for the change in the method of handling the cars interchanged, in the settlement thereof.

Mr. Rosenthal: We found it more economical to use a per diem basis than a three day basis.

3950 Mr. Gutheim: That is, you mean that you had to pay too much per diem on the old basis?

Mr. Rosenthal: Exactly so.

Mr. Gutheim: As a matter of fact, was all of the demurrage paid when the change was made?

Mr. Rosenthal: It has nearly all been paid. The rest, a small balance due, which will be paid some time within the next month or two.

Mr. Gutheim: How much was paid, or how much accrued prior to the change from the demurrage to the per diem basis?

Mr. Rosenthal: I think about five or six hundred dollars.

Mr. Gutheim: That amount was in dispute, was it not?

Mr. Rosenthal: It was.

Mr. Gutheim: And the entire amount has not yet been paid to the St. Louis Iron Mountain & Southern Railroad, but will be shortly: Was there any settlement?

Mr. Rosenthal: In what way?

Mr. Gutheim: On the basis of allowance on additional free time, or cutting down the amount that is due?

Mr. Rosenthal: No, the only allowance- made were on

3951 certain cars which were in dispute on which we proved our statement, and they withdrew the demurrage from all those particular cars.

Mr. Gutheim: You stated that the agent at Gould was not a joint agent. How long has the agent there been the agent solely of your road?

Mr. Rosenthal: About two years, I believe.

Mr. Gutheim: Prior to that time was he a joint agent?

Mr. Rosenthal: Partly—part of the time he was, and part of the time we had separate agents.

Examiner Boyle: Just distinguish that a little more definitely.

Mr. Rosenthal: When we first started we had a joint agent, and then we had a separate agent, and then we had a joint agent again; we had several disputes with the St. Louis Iron Mountain & Southern Railroad regarding the proportion of salaries and other minor items, and we withdrew from the joint agent proposition, and then we went back, and finally withdrew about two years ago.

Mr. Gutheim: What was the date that the mill property —

3952 leased to the present operators?

Mr. Rosenthal: About a year and a half ago, I believe.

Mr. Gutheim: And at that time was any of the timber of the Newhouse Mill & Lumber Company, the owner, leased for cutting?

Mr. Rosenthal: Some of the timber was sold outright to him.

Mr. Gutheim: Have you a copy of the lease that shows the nature of the operation at the present time?

Mr. Rosenthal: I have not with me.

Mr. Gutheim: Is there anything in the lease that provides for logging operations by the railroad company in connection with the present operations of the mill?

Mr. Rosenthal: Not that I know of, simply a lease of the business.

Mr. Gutheim: Will you furnish us with a copy of the lease under which the mill is presently operated?

Mr. Rosenthal: I think we can do it—we will do that.

Examiner Boyle: Are there any other questions for this
3953 witness?

Mr. Coleman: Yes, I want to ask some.

Mr. Coleman: The Newhouse Mill & Lumber Company went out of business, and abandoned all of its operations in that territory in 1908?

Mr. Rosenthal: Practically, yes, sir.

Mr. Coleman: And leased the mill to Mr. Muse?

Mr. Rosenthal: It did.

Mr. Coleman: How about their timber holdings—put them on the m-rket?

Mr. Rosenthal: I think they did.

Mr. Coleman: And since then this timber has been sold to a large extent to various parties, except about one thousand acres—it is down to a thousand acres.

Mr. Rosenthal: Yes, sir.

Mr. Coleman: Are the rest of their holdings still on the market for sale?

Mr. Rosenthal: They are, and they expect to have them disposed of within a comparatively short time. As a matter of fact I am informed that the Newhouse Mill & Lumber Company is
3954 practically in a state of liquidation.

Mr. Coleman: Now, they operated a store did they not, when they were operating the mill?

Mr. Rosenthal: They did.

Mr. Coleman: Did they sell that store?

Mr. Rosenthal: They did.

Examiner Boyle: What sort of a store was it?

Mr. Rosenthal: A commissary store.

Examiner Boyle: For the logging people?

Mr. Rosenthal: For everybody around there; it was a store in Gould—there were only two stores in Gould.

Examiner Boyle: Did they pay the employés off in commissary checks?

Mr. Rosenthal: No, paid them in cash.

Mr. Coleman: That was a general merchandise store?

Mr. Rosenthal: Yes, sir, a general merchandise store.

Mr. Coleman: Did they dispose of that at the same time?

Mr. Rosenthal: Yes, sir, they did.

Mr. Coleman: Now, at the time that this road was ex-
3955 tended, and filed the articles of incorporation, what bonus was offered and paid by the citizens of Star City?

Mr. Rosenthal: A bonus of approximately twenty thousand dol-

lars was offered by the citizens of Star City, and has practically all been paid to date.

Mr. Coleman: Star City is the county seat of Lincoln County?

Mr. Rosenthal: Yes, sir.

Mr. Coleman: Has it any railroad facilities except this Gould Southwestern Railway?

Mr. Rosenthal: It has not.

Mr. Coleman: This map which you have filed as exhibit Rosenthal 1, does it show the ownership of the land contiguous to this railroad?

Mr. Rosenthal: It does.

Mr. Coleman: And those are the cleared farms now being cultivated by the people?

Mr. Rosenthal: It does, almost all of them.

Examiner Boyle: When you say these are the cleared farm lands, Mr. Rosenthal, to what do you refer?

Mr. Rosenthal: All this land along the line on either side of the Gould Southwestern Railway.

3956 Examiner Boyle: All this land along the line of Gould Southwestern Railway, how far back does it extend?

Mr. Rosenthal: Oh, practically two, three, four, or five miles, across there, I think.

Examiner Boyle: The extent of the lands—it is about three or four inches?

Mr. Rosenthal: It must be further than that, because the scale is small.

Mr. Coleman: As a matter of fact, is not the territory from Gould to Star City well settled territory, that has been settled for a great many years?

Mr. Rosenthal: Yes, sir.

Mr. Coleman: Are there numerous farms on either side of the track within a radius of four or five miles of the track?

Mr. Rosenthal: There are.

Mr. Coleman: Has the Newhouse Mill & Lumber Company any interest in the operations of Mr. Muse?

Mr. Rosenthal: They have not.

Mr. Coleman: They had no part in these operations or disposition of these products?

Mr. Rosenthal: Absolutely not.

Mr. Coleman: These arbitraries that you spoke of,

3957 have they been arranged according to a distance from Gould?

Mr. Rosenthal: They have, on a graded scale, in accordance with the mileage.

Mr. Gutheim: That is in accordance with the Arkansas Railroad Commission's tariff?

Mr. Rosenthal: No, sir; they are lower than the Arkansas Railroad Commission's regulations.

Mr. Coleman: How is the property of the Gould Southwestern Railway assessed by the authorities in Arkansas, as railroad, or as private property?

Mr. Rosenthal: As railroad property, by the Board of Assessors.

Mr. Coleman: By the State Board of Assessors?

Mr. Rosenthal: Yes, sir.

Mr. Coleman: Are there any wholesale merchants at Star City?

Mr. Rosenthal: Three, I think.

Mr. Coleman: Are they dependent entirely on the Gould Southwestern Railway for their merchandise?

Mr. Rosenthal: Yes, sir.

3958 Mr. Coleman: Can you tell about what territory is supplied in a general way from Star City?

Mr. Rosenthal: Practically—well, ten miles every way from Star City, and as a matter of fact the Gould Southwestern Railway cuts into Lincoln County, practically splitting the whole county; the St. Louis Iron Mountain & Southern Railway as you will notice just tips the corner of it. The Gould Southwestern Railway starts from that corner and cuts diagonally into the county; practically takes across the entire county.

Mr. Coleman: Has Star City received any new growth since the completion of the road into it?

Mr. Rosenthal: They have; there have been quite a number of expensive improvements, including a sixty thousand dollar courthouse, and quite a number of new people from outside; an increase in the amount of general merchandise business, and a much bigger and better town since the Gould Southwestern Railway Company has gotten into it—a much more progressive place.

Mr. Coleman: In handling your passenger traffic, do you sell tickets?

Mr. Rosenthal: We do.

3959 Mr. Coleman: State how the employees of the Gould Southwestern Railroad Company are paid, and by whom?

Mr. Rosenthal: The employees of the Southwestern Railway are paid by the Gould Southwestern Railway itself.

Mr. Coleman: I believe that you stated the books of the railroad company are kept in accordance with the rules of the Interstate Commerce Commission?

Mr. Rosenthal: They are.

Mr. Gutheim: Does the Gould Southwestern Railway Company own the rails that it uses?

Mr. Rosenthal: It does not; it has leased them from the St. Louis Iron Mountain & Southern Railroad.

Mr. Gutheim: The entire rails?

Mr. Rosenthal: Yes, sir.

Mr. Gutheim: And what is the consideration that is paid to the St. Louis Iron Mountain & Southern Railroad?

Mr. Rosenthal: It pays it on the basis of six per cent. according to the valuation.

Mr. Gutheim: And the valuation is what?

3960 Mr. Rosenthal: Twenty eight dollars, I believe, per ton, f. o. b. Gould.

Mr. Gutheim: Now, the fifty thousand dollars of capital stock; was that capital stock paid for in cash or issued in the shape of bonus?

Mr. Rosenthal: Fifty-one thousand dollars.

Mr. Gutheim: Well, firty-one thousand dollars.

Mr. Rosenthal: It was issued in consideration of the value of the property turned over to it by the Newhouse Mill & Lumber Company, and distributed among the stockholders of the Newhouse Mill & Lumber Co.

Mr. Coleman: I should like to tender in evidence the contract between the Gould Southwestern Railway, and the St. Louis Iron Mountain & Southern Railway for the lease of those rails.

Examiner Boyle: Do you offer that in evidence?

Mr. Coleman: I think we have it here; at any rate I will supply it.

Examiner Boyle: It will be received in evidence.

The contract so offered and identified, was thereupon received in evidence, and marked "Defendants' Exhibit Rosenthal No. 2", received in evidence December 15, 1910, page 51, and is at-
3961 tached hereto.

Mr. Coleman: I might add that our rails are covered by four leases, and this is the latest; the terms are exactly the same in all of them.

Mr. Gutheim: Do you know what the total valuation is, on which you pay six per cent?

Mr. Rosenthal: I should judge it to be about one hundred thousand dollars; I can get the exact figures and give them to you later. In fact it covers all of our twenty-five and one-half miles of rail.

Mr. Gutheim: Do you know what the actual property was that was conveyed to the Gould Southwestern Railway in consideration of the fifty thousand dollars of stock to the Newhouse Mill & Lumber Co.

Mr. Rosenthal: It consisted of the right-of-way and equipment; in fact, everything they owned.

Mr. Gutheim: At that time?

Mr. Rosenthal: At that time.

Mr. Gutheim: There was no built railroad?

Mr. Rosenthal: There was no built railroad.

Mr. Gutheim: You mean just the bare right-of-way?

3962 Mr. Rosenthal: Yes.

Mr. Gutheim: At the time it was built from this place called Benners over about to Weber.

Mr. Rosenthal: It was built from there over this way, but that has been taken up since, and the line extended further east.

Mr. Gutheim: The total mileage was what, then?

Mr. Rosenthal: I should judge it was about five to six miles—I should judge five to six miles.

Mr. Gutheim: That is to say you paid them about ten thousand dollars per mile for the railroad line, the rails you do not own?

Mr. Rosenthal: That is it; yes, sir.

Examiner Boyle: Are there any further questions, gentlemen?

Mr. Coleman: What is the character of the country in which this road is constructed with reference to the cost of constructing it?

Mr. Rosenthal: It has to cross a great many bayous.

Mr. Gutheim: You gave the number of bridges you have?

Mr. Rosenthal: Yes sir.

Examiner Boyle: All that is in the record I think.

3963 Mr. Coleman: How about the grades?

Mr. Rosenthal: Furthermore, the soil is a gumbo mud, and it is a very expensive proposition to handle it, because it generally happens in Arkansas, once you build on that gumbo mud it has to be re-built.

Mr. Coleman: What do you mean by gumbo mud?

Mr. Rosenthal: A sort of clay that seems to absorb water.

Mr. Coleman: It requires constant attention and repair?

Mr. Rosenthal: It is very treacherous; we have had to re-build our entire road two or three times.

Mr. Coleman: On either side of these bayous, is it a very rich level country—buckshot land?

Mr. Rosenthal: Yes, sir, very rich country.

Mr. Coleman: What is the largest bridge you have?

Mr. Rosenthal: Bayou Bartholomew, I believe.

Mr. Coleman: What's the length of that bridge.

Mr. Rosenthal: Two hundred feet.

Whereupon at 11 o'clock A. M., on the 15th day of December 1910, the hearing of the above entitled matter was closed.

3964 *The Liberty White Railroad Company.*

For the defendant: W. B. Mixon, Esq.

Mr. Mixon: I wish to state that we have a sworn historical and statistical statement along the lines of those questions that have been asked the witnesses here, that will, I think, facilitate the handling of this matter.

Examiner Boyle: We will have to examine the witness, and you may have the witness introduce it as an exhibit.

Mr. Mixon: It gives a great deal of testimony that you desire.

W. M. WHITE, was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Boyle: What is your name, address, and official connection with The Liberty White Railroad Company?

3965 Mr. White: W. M. White; Address, McComb, Mississippi; President and General Manager of The Liberty White Railroad Company.

Examiner Boyle: You may let the witness introduce this document if you wish.

The statement so offered and identified was received in evidence, and thereupon marked "Defendant's Exhibit No. 1", received in evidence December 15, 1910, and is attached hereto, page 2.

Examiner Boyle: How long have you been president and general manager of the Liberty White Railroad?

Mr. White: A year and a half.

Examiner Boyle: How long has the road been in existence?

Mr. White: It has been in operation since July 20, 1904.

Examiner Boyle: Who was your predecessor?

Mr. White: The president was J. J. White; I have always been General Manager, and I was formerly General Manager.

Examiner Boyle: What relation was J. J. White to you?

Mr. White: He is my father.

3966 Examnier Boyle: You have offered this historical outline of your railroad in evidence, Mr. White?

Mr. White: Yes, sir.

Mr. Gutheim: The Liberty White Railroad runs from McComb, Mississippi, on the Illinois Central Railroad to Liberty, Mississippi, with another branch line from McComb City to New Holmesville, Mississippi, is that right?

Mr. White: Our main Line extends from New Holmesville, Pike County, Mississippi, to Liberty in Amite County, Mississippi.

Mr. Gutheim: Have you a copy of your rate sheet that you could offer in evidence?

Mr. White: Yes, sir, I offer it in evidence as L-B No. 2.

The rate sheet so offered and identified, was received in evidence, and thereupon marked "Exhibit L-B No. 2", received in evidence December 15, 1910, page No. 3, and is attached hereto.

Mr. Mixon: The Liberty White Railroad Company has not only a connection with the Illinois Central Railroad, but an inter-section; that is to say, its main line extends across the Illinois Central Railroad?

3967 Mr. White: Yes, sir, our main line crosses the Illinois Central Railroad at McComb.

Examiner Boyle: How long is the Liberty White Railroad?

Mr. White: Our main line is 33 and 6-10ths miles.

Examiner Boyle: When you say "main line" then you necessarily suggest that there is a branch line; what is that?

Mr. White: There is a branch line owned by J. J. White Company, which extends from Irene, a point on the main line of the Liberty White Railroad 7 & 6-10ths miles west of McComb City, to a point known as Keith, Mississippi, in Amite County.

Examiner Boyle: What is that distance?

Mr. White: Ten miles over this branch line.

Examiner Boyle: How long did you say your main line was?

Mr. White: 33 & 6-10ths miles.

Examiner Boyle: That would make your entire mileage about forty-three miles?

Mr. White: Forty-three and six tenths miles up to the time of our last report.

Mr. Gutheim: Now, Mr. White, what is the nature of the
3968 traffic furnished by the various locations along your line, principally?

Mr. White: The nature of the traffic is the same as that generally done by any common carrier.

Mr. Gutheim: What are the commodities which furnish the largest proportion of the tonnage?

Mr. White: The largest proportion of the tonnage at present is forest products.

Mr. Gutheim: What are the principal industries shipping forest products?

Mr. White: Well, the various mills located along the line. We would like to offer in connection with the industries, a list of industries which was gotten out prior to any knowledge of this hearing, and we would like to offer this exhibit which will show a list of those industries.

Examiner Boyle: Have you got it with you?

Mr. White: Yes, sir. It was gotten up——

Examiner Boyle: You have already offered in evidence as exhibit 2 the map of your railroad, have you not?

Mr. White: Yes, sir.

3969 Examiner Boyle: Mr. White you now offer as exhibit 2 a pamphlet which shows on the back the line of your railroad, with the industries shown therein, to which you now refer?

Mr. White: Yes, sir.

Mr. Gutheim: What is the largest shipper of forest products on your line?

Mr. White: The largest shipper is the J. J. White Lumber Company.

Mr. Gutheim: To what extent is the J. J. White Lumber Company interested in the Liberty White Railroad Company?

Mr. White: The J. J. White Lumber Company as an organization is not interested in the Liberty White Railroad Company or its operation; practically the same stockholders owning the J. J. White Lumber Company, own The Liberty White Railroad Company.

Mr. Gutheim: The holdings being in substantially the same proportion in each company?

Mr. White: Yes, sir, practically.

Mr. Gutheim: Now, you stated there were a number of other mills—these mills are all shown in the list of other industries

3970 which are shown in this exhibit 2?

Mr. White: Yes, sir.

Mr. Gutheim: When was this road built?

Mr. White: This road was built—that is the part that is shown in the statement.

Examiner Boyle: That will be sufficient then to avoid any question of this character.

Mr. Gutheim: I think you said the road was originally constructed by Mr. J. J. White or in his interest?

Mr. White: No, sir, not what is known as The Liberty White Railroad; that is also answered in the statement.

Mr. Gutheim: The Liberty White Railroad, we understand, is the successor of the road originally located by the J. J. White Lumber Company interests?

Mr. White: The Liberty White Railroad Company is the successor to a part of that road.

Mr. Gutheim: That is such part of the road as remains permanent?

Mr. White: It is now that part of the road which extends from McComb to Irene; that was their right-of-way formerly occu-
3971 pied by the J. J. White Lumber Company's private narrow gauge logging road.

Mr. Gutheim: Now, was the road built contemporaneously with the lumber industry by Mr. J. J. White?

Mr. White: The road—the narrow gauge railroad which is not used, and never was used by The Liberty White Railroad Company, was built of course as a logging road to bring in logs to his saw mill.

Mr. Gutheim: But that was the original property which was taken over by The Liberty White Railroad as a corporation?

No, sir; thirteen and one-half miles of this narrow gauge right-of-way is now used by The Liberty White Railroad; this thirteen and one half miles of narrow gauge railroad was sold by J. J. White to The Liberty White Railroad.

Mr. Mixon: We have it all here.

Mr. Gutheim: What was the consideration paid?

Mr. Mixon: We have the deed here which will show the consideration.

Mr. White: I don't remember the consideration, the deed
3972 will show that; I think it was one hundred thousand dollars.

Mr. Gutheim: That was for thirteen and odd miles of narrow gauge construction?

Mr. White: No, sir; no equipment. We never took the narrow gauge equipment.

Mr. Gutheim: Was the construction originally and subsequently of The Liberty White Railroad itself proceeded with as the needs of the White Lumber Company demanded, or was the road built upon the solicitation of citizens of settled communities?

Mr. White: This road was built upon the solicitation of the citizens of Liberty principally; about twelve miles of railroad was built through a country that the timber had been removed from.

Mr. Gutheim: From Irene to Liberty?

Mr. White: From a station known as Glading.

Mr. Gutheim: Just beyond Irene?

Mr. White: Yes, sir.

Mr. Gutheim: And from Glading to Liberty, was that portion of the road built at the solicitation of the residents of Mississippi?

3973 Mr. White: Yes, sir, and the people living along the line.

Mr. Gutheim: At that time, that was cut-over country?

Mr. White: Practically all, yes, sir.

Mr. Gutheim: Did the White interests have any timber remaining to be cut in that section?

Mr. White: They had no timber remaining to be cut between Glading and Liberty, with the exception of some little timber that they acquired in the vicinity of Liberty, that was cut within the first few months of the railroad's operation.

Mr. Gutheim: Was that constructed by the railroad corporation itself, or by a railroad construction company upon contract?

Mr. White: By the railroad corporation itself.

Mr. Gutheim: And was it paid for by money received from the sale of its securities, or out of the lumber?

Mr. White: At the time the Liberty White Railroad was built, Mr. J. J. White owned the present lumber interests as an individual, and he of course, furnished the money for the building of the road, and afterwards took this in stock.

3974 Mr. Gutheim: Now, the line from McComb, east to New Holmesville; what was the occasion for the construction of that road?

Mr. White: The occasion of the construction of the road from New Holmesville was the traffic, perhaps with the expectation of extending this part of the road to some other railroad connection on the east.

Mr. Gutheim: The New Orleans & Great Northern Railroad?

Mr. White: Well, possibly yes.

Mr. Gutheim: You did not get to the New Orleans & Great Northern or any other line, did you?

Mr. White: We have made no connection with the New Orleans Great Northern Railroad, but we have made a survey, and I have a plat here to show that survey.

Mr. Gutheim: But the building of that branch was primarily to get another outlet for the tonnage of the J. J. White Lumber Company, and not at the solicitation of parties served along the line?

By Mr. White: It was intended as shown in our statement.

Examiner Boyle: You can answer the question "yes" or

3975 "no."

Mr. White: Will you read that question, Mr. Stenographer.

(Question read by stenographer). But the building of that branch was primarily to get another outlet for the tonnage of the J. J. White Lumber Company, and not at the solicitation of the parties served along the line?

Mr. White: No, sir, not as far as the Liberty White Railroad Company is concerned; its operation and management are entirely separate from the J. J. White Lumber Company, and the J. J. White Lumber Company is known to it as a shipper, the same as any other shipper on its line.

Mr. Gutheim: Well, the construction cost was financed in the same way, as the construction from Glading west, to Liberty, by Mr. White?

Mr. White: Yes, sir.

Mr. Gutheim: And he took in exchange for the cost of construction, securities of the Liberty White Railroad Company?

Mr. White: No, sir.

Mr. Gutheim: It is represented by floating indebted-

3976 ness?

Mr. White: Yes, sir, the cost of the road from McComb to New Holmesville stands as an indebtedness to Mr. J. J. White; I would like to explain in this connection, that Mr. J. J. White has retired from any active connection with any of his interests.

Mr. Gutheim: What is the outstanding indebtedness of the Liberty White Railroad, stocks and bonds, and floating indebtedness at the present time?

Mr. White: That is shown in the annual report.

Mr. Gutheim: Give it to me, will you?

Mr. White consults the annual report and says: Capital stock oustanding three hundred thousand six hundred dollars.

Mr. Gutheim: Now, are there any bonds outstanding?

Mr. White: There are no bonds outstanding; bonds have been issued, but have never been placed upon the market.

Mr. Gutheim: The debt that is due to Mr. J. J. White——

Mr. White: It is approximate one hundred and thirty-four thousand dollars.

3977 Mr. Gutheim: That shows there, the entire indebtedness?

Mr. White: Yes, sir.

Mr. Gutheim: The stock outstanding is at the rate of approximately ten thousand dollars per mile for the whole line?

Mr. White: Yes, sir.

Mr. Gutheim: I understand the debt that is due to Mr. White represents money that was used in the construction of the road from McComb east to New Holmseville?

Mr. White: Yes, sir and a small indebtedness that was left over, that he did not take in stock in the original construction, as I recall it.

Mr. Gutheim: So that the whole outstanding indebtedness applicable to the construction of the Liberty White road is, approximately, $434,600.00?

Mr. White: Yes, sir, approximately; of course I would not give the exact figures, because the exact figures are shown in our report.

Mr. Gutheim: The exact figures are with the report?

Mr. White: Yes, sir.

3978 Examiner Boyle: And contains further in the exhibit which you have offered in evidence?

Mr. White: Yes, sir, contained further in the exhibit which I have offered in evidence; it is $464,608.6 that is the cost of the road and equipment of the road up to June 30th 1910; that is the actual cost.

Mr. Gutheim: What rate of interest, if any, is paid upon the indebtedness due to Mr. J. J. White?

Mr. White: Nothing.

Mr. Gutheim: Are the officers of the Liberty White Railroad at the present time, the same persons who serve as officers of the J. J. White Lumber Company?

Mr. White: No, sir.

Mr. Gutheim: Are any officials of the J. J. White Lumber Company, connected as officials of the railroad?

Mr. White: Yes, sir, but not in any active capacity.

Mr. Gutheim: In what capacity?

Mr. White: Mr. J. W. Johnson, for instance, the vice-president of the railroad company, is also vice-president of the lumber company. Mr. Johnson is only active—he is not active in his official capacity to the railroad company, except during the absence of myself.

3979 Mr. Gutheim: The road is standard gauge throughout, at the present time?

Mr. White: Yes, sir.

Mr. Gutheim: It has what weight of rails?
Mr. White: Sixty pounds.
Mr. Gutheim: Are there any bridges to speak of?
Mr. White: Yes, sir, quite a number—one bridge across the Amite river. The bridge is about thirty-four hundred feet long.
Mr. Gutheim: Now, what sations have you with station buildings, and with agents for these towns on the statement, you may say?
Mr. White: Yes, this town in the statement—we would like to introduce in the evidence as exhibit here, photographs showing the stations and depots—I would simply like to exhibit these to the Examiner so that it will go in the record that we did exhibit them.

(The witness hands to Mr. Gutheim a number of photographs of depots and buildings along the line of The Liberty White Railroad.)

Mr. Gutheim: These are sufficient to show that the build-
3980 ings are substantial buildings.
Are there any special grades on the road?
Mr. White: Our maximum grade is two per cent.
Mr. Gutheim: The ballast is the natural ballast of the country?
Mr. White: No, sir, we have part of our track that is ballasted with cinders, and a little that is with gravel, but very little with the gravel.
Mr. Gutheim: Do you have any team tracks, or tracks for the weighing of carloads—scale tracks?
Mr. White: We have team tracks at all of these stations.
Mr. Gutheim: What equipment do you operate at the present time?
Mr. White: We show the equipment in this exhibit No. 1.
Mr. Gutheim: And is the equipment all equipped with regard to the Federal Act with safety appliances?
Mr. White: Yes, sir.
Mr. Gutheim: Do you have any working equipment?
Mr. White: That is also shown in exhibit No. 1; yes,
3981 we have a wrecking train, a pile driver, and a general run of equipment.
Mr. Gutheim: What service have you for the dispatching of trains?
Mr. White: We dispatch by telephone, and by the regular train dispatcher system.
Mr. Gutheim: How many road crews have you, and the number of men in them?
Mr. White: That is also stated in Exhibit No. 1.
Mr. Gutheim: And the same is true as to the station employees, and the train employees?
Mr. White: Yes, sir.
Mr. Gutheim: You may state as a matter of fact, outside of exhibit 1, how many agency stations you have on the line?
Mr. White: Well, I will name them; at New Holmesville we have an agent, and at McComb City.
Mr. Gutheim: Is the McComb agent joint with the Illinois Central Railroad?

Mr. White: The McComb agent is not a joint agent so far as freight business is concerned.

Mr. Gutheim: He is a joint ticket seller?

3982 Mr. White: Yes, sir, he is a joint ticket seller, but entirely under the control of The Liberty White Railroad.

Examiner Boyle: If any one else offered a shipment, would you sign for it?

Mr. White: No, sir, not over the Illinois Central; he is not joint agent over the Illinois Central.

Mr. Gutheim: Who would sign for the Illinois Central?

Mr. White: The Illinois Central agent.

Examiner Boyle: He is separate and distinct, Mr. White?

Mr. White: Yes, sir.

Mr. Gutheim: What other agency stations are there?

Mr. White: Glading, Robinson, Marshallton and Liberty.

Mr. Gutheim: At none of these points named, with the exception of McComb, has any other railroad facilities, except what are offered by the Liberty-White Railroad Company?

Mr. White: No, sir.

Mr. Gutheim: Are all of these agents, agents solely and

3983 employees of the Liberty-White Railroad Company?

Mr. White: No, sir, none of our employees have any connection with the J. J. White Lumber Company.

Mr. Gutheim: What passenger and freight train service do you run?

Mr. White: We operate two passenger trains per day, and a local freight train each day, and such other freight trains that are necessary.

Mr. Gutheim: Are the passenger trains straight passenger trains or mixed?

Mr. White: Straight passenger trains.

Mr. Gutheim: Do you run a Sunday service?

Mr. White: Yes, sir, two round trips per day.

Mr. Gutheim: Do you handle the United States mail for the United States Post Office at those towns named?

Mr. White: Yes, sir.

Mr. Gutheim: Under a regular Government contract?

Mr. White: Yes, sir.

Mr. Gutheim: Do you have an Express service?

Mr. White: Yes, sir, American Express service.

Mr. Gutheim: You have the usual basis of earnings there, about forty per cent?

3984 Mr. White: I think it is about forty-five per cent.

Mr. Gutheim: You think it is about forty-five per cent?

Mr. White: I think that is what it is.

Mr. Gutheim: About how much is your passenger traffic?

Mr. White: That is shown on the statement; I think it will run seventeen to eighteen thousand dollars per year.

Mr. Gutheim: Now, if the statement does not contain all the data asked for as to tonnage and revenue; that is the total tonnage and total revenue for the last fiscal year, showing separately that accruing on the business of the J. J. White Lumber Company, and

that accruing on the business of the general public, that statement should be filed with the Interstate Commerce Commission?

Mr. White: I would like to say in that connection that the way our business is run, we have not known the J. J. White Lumber Company in the handling of its logs, any more than the handling of any other company's logs, they being billed and charged on a regular published tariff on file with the Interstate Commerce Commission.

3985 Examiner Boyle: Just before we get off this question, Mr. White, is the statement for which the Examiner has asked you, in the statement which you have filed as exhibit 1?

Mr. White: No, sir.

Examiner Boyle: You will file it?

Mr. White: Yes, sir, but it will be necessary for us to go through all of our records; for the reason all of these logs are way-billed.

Examiner Boyle: We anticipate that you will have to go through your way-bills, Mr. White.

Mr. White: There was no reason for us to separate it.

Examiner Boyle: You will separate them and file the statement, please?

Mr. White: Yes, sir, I will do so.

Mr. Gutheir: That statement will be for the last fiscal year?

Mr. White: Yes, sir, we will be very glad to furnish it.

Mr. Gutheim: Does the forest products produce the preponderance of your tonnage?

Mr. White: Well, yes, the general run of tonnage—cot-

3986 ton and cotton seed.

Mr. Gutheim: The cotton and cotton seed make up the greatest quantity of tonnage outside of forest products?

Mr. White: Yes, sir, and fertilizer and that class of stuff.

Mr. Gutheim: About what proportions are they?

Mr. White: We will show that in the statement.

Examiner Boyle: Can you state it off-hand, just approximately, if you haven't it handy, don't bother.

Mr. White: I cannot state it for the mill company as I have said.

Mr. Gutheim: That can be shown in the statement, Mr. White. Now, your business is conducted all on rates contained in the tariffs filed with the Interstate Commerce Commission?

Mr. White: Yes, absolutely.

Mr. Gutheim: Is the log haul for the J. J. White Company performed upon a tariff basis or upon a contract basis?

Mr. White: It is performed upon a tariff basis.

Mr. Gutheim: Are logs hauled locally for other producers other that the J. J. White Company?

3987 Mr. White: Yes, sir.

Mr. Gutheim: Who pay upon the same tariff?

Mr. White: Upon the same basis exactly as the J. J. White Lumber Company.

Mr. Gutheim: Now, on shipments outgoing, of forest products, you have through rates in connection with the Illinois Central Railroad?

Mr. White: Yes, sir.

Mr. Gutheim: Also on classes and commodities?

Mr. White: We have no divisions on classes; our through rates on classes are made up on a combination of locals, and on a great many commodities we have; yes.

Examiner Boyle: What is the local up to junction point—a blanket rate covering the entire line?

Mr. White: No, sir, it is on a mileage scale.

Examiner Boyle: And varies just about how much?

Mr. White: Our first class rate for instance, from McComb to Liberty, 25 miles, is fifty cents per 100 pounds.

Mr. Gutheim: Now, does the junction rate—the McComb rate on forest products shipped over the Illinois Central Railroad
3988 apply back to points back on your entire line?

Mr. White: No, sir, we add two cents to this rate.

Mr. Gutheim: And what division do you get out of the through rate on the business?

Mr. White: On the business originating at McComb we get a division of two cents.

Mr. Gutheim: On business originating at McComb, you get a division of two cents applying to all destinations?

Mr. White: Not all destinations, no, sir; only to central and eastern territory.

Examiner Boyle: No matter what the point of origin on your line?

Mr. White: It does not make any difference at the point of origin, as I stated we get two cents from the junction.

Mr. Gutheim: Out of the junction point rate?

Mr. White: We add two cents to make the rate from the other point.

Mr. Gutheim: You might term that a sort of blanket rate
3989 on traffic moving over your line?

Mr. White: No, we get four cents up to the junction point.

Mr. Gutheim: Where is the mill of the J. J. White Lumber Company?

Mr. White: At McComb.

Mr. Gutheim: Is the product of that mill handled out by the Liberty-White Railroad Company?

Mr. White: No, sir, not in the main.

Mr. Gutheim: That is, the largest proportion of the tonnage shipped by the J. J. White Lumber Company's mill is taken out by the Illinois Central Railroad?

Mr. White: Yes, sir.

Mr. Gutheim: How much is there on the haul of those logs that are brought to that mill by the Liberty-White Railroad?

Mr. White: Well, the logs they are now getting, are being hauled by the Liberty-White Railroad, a distance of seventeen and six-tenths miles, practically.

Mr. Gutheim: That is from the timber now on the branch that runs from Irene south, through Irene to McComb?

3990 Mr. White: Yes, sir.

Mr. Gutheim: And for this service the Liberty-White Railroad receives what compensation?

Mr. White: Five dollars per car.

Mr. Gutheim: Plus a two cent division out of the McComb rate when the shipment goes out?

Mr. White: Yes, sir.

Mr. Gutheim: You said that in some instances the product of the J. J. White mills is handled by the Liberty-White Railroad?

Mr. White: That is instances where they load on The Liberty-White track, and the cars are moved by The Liberty-White Railroad through the Liberty-White interchange.

Mr. Gutheim: And what proportion of the product of the mill is so handled?

Mr. White: It is quite small.

Mr. Gutheim: And the haul is how much by the Liberty-White Railroad Company to reach the Illinois Central Railroad interchange?

Mr. White: Well, it won't run over five hundred or six hundred feet.

3991 Mr. Gutheim: On these other lumber companies' business, do you get the same rate of five cents on the logs, plus four cents per 100 pounds out of the through rate?

Mr. White: Well, for instance, the rates as I remember it from Chicago to McComb is twenty-four cents; the rate then from Irene, a point on our line, at which there is a mill located, would be twenty-six cents. The Liberty-White Railroad Company gets five dollars per car for hauling the logs to the Irene mill, plus four cents out of the twenty-six cent rate.

Mr. Gutheim: And in the case of the J. J. White Lumber Company's shipments, the Liberty-White Railroad Company then would get five dollars per car to McComb, plus four cents per 100 pounds out of the twenty-four cent rate?

Mr. White: Yes, sir.

Mr. Gutheim: But it would perform no haul on the finished product, whereas in the case of the mill at Irene, it would perform the haul from Irene to McComb?

3992 Mr. White: Yes, sir; it would perform the haul from Irene to McComb—a seven and a half mile haul in that case, and of course it would also be necessary, if we had no tonnage or rather in loading to have an empty at Irene, it would be necessary to haul this empty to Irene, and pay a per diem on it.

Mr. Gutheim: Now, are there any other mills at McComb, besides the mill of the J. J. White Lumber Company?

Mr. White: No, sir.

Mr. Gutheim: So that, the J. J. White Lumber Company is the only mill on your line that ships on the junction point rate?

Mr. White: Yes, sir.

Mr. Gutheim: All other mills pay a two cent arbitrary above the

junction point rate, in consideration of which you perform a haul on the mill product to the junction point?

Mr. White: Yes, sir.

Mr. Gutheim: It is your understanding, that the Illinois Central Railroad's allowance of two cents to you out of the McComb rate, is on account of the milling in transit basis?

Mr. White: Yes, sir.

3993 Mr. Gutheim: It being arranged for by the same statement that has been made in most of the Illinois Central Railroad's tariffs applicable on business from this territory?

Mr. White: Yes, sir.

Mr. Gutheim: Are the general offices of your railroad—the Liberty-White Railroad Company in McComb?

Mr. White: Yes, sir.

Mr. Gutheim: Do you use the same offices with the J. J. White Lumber Company, or have separate offices?

Mr. White: We do not use the same offices; we use the same building; the general offices of the Liberty-White Railroad Company occupy the entire second floor of the building which is occupied by the two interests.

Examiner Boyle: Who owns the building?

Mr. White: The J. J. White Lumber Company.

Examiner Boyle: Does the Liberty-White Railroad pay any rental for that office?

Mr. White: It has not paid any rental so far, because the building has only been put up recently.

3994 Mr. Gutheim: At the present time you are making monthly reports to the Interstate Commerce Commission?

Mr. White: Yes, sir.

Mr. Gutheim: Are you acting in compliance with the safety appliance Act?

Mr. White: Yes, sir.

Mr. Gutheim: And the Car Service Act?

Mr. White: Yes, sir.

Mr. Gutheim: Is your road being operated at the present time on a profitable basis?

Mr. White: The Liberty-White Railroad has made some slight profit, yes, sir.

Mr. Gutheim: Have you ever paid dividends?

Mr. White: We paid our first dividend during the last annual meeting; we paid a dividend of two per cent.

Mr. Gutheim: And what are you carrying in your surplus account?

Mr. White: Our surplus up to that time was about nine thousand dollars; this dividend of course, will be deducted from it.

3995 Mr. Gutheim: Do the officials of the Liberty-White Railroad,—you spoke of some inactive officials, do they receive any compensation from the railroad company?

Mr. White: The only other active official that I spoke of, and he is the only one that is active at times.

Mr. Gutheim: That is the vice-president?

Mr. White: Yes, sir.

Mr. Gutheim: And his compensation is fixed from time to time according to his services?

Mr. White: Yes, sir.

Mr. Gutheim: Does the road own all of its equipment outright?

Mr. White: Yes, sir.

Mr. Gutheim: Does it rent any?

Mr. White: No, sir.

Mr. Gutheim: Now, this branch track?

Mr. White: I want to change that: it does not lease any: of course we have an equipment truck—an equipment mortgage made up in the form of a lease, which is shown in the annual statement.

3996 Mr. Gutheim: These do not run in favor of the J. J. White Lumber Company?

Mr. White: No, sir, not any one.

Mr. Gutheim: This branch that runs from Irene into the timber is operated under trackage rights for the J. J. White Lumber Company?

Mr. White: This branch extending from Irene to Keith, as a traffic proposition, is operated by a trackage right, and serves any industry located on this line.

Mr. Gutheim: What other industries are there on the line?

Mr. White: Well, that will be shown by the list of industries there; there are a number of saw mills, and lessees, that handle the general run of merchandise into these points.

Mr. Gutheim: That line is owned by the J. J. White Lumber Company is it not?

Mr. White: Yes, sir.

Mr. Gutheim: What consideration do you pay for the trackage privilege?

Mr. White: Three hundred dollars per month.

3997 Mr. Gutheim: And they maintain the track?

Mr. White: Yes, sir.

Mr. Gutheim: Do you operate on the logging spurs at the end of the track?

Mr. White: No, sir, the J. J. White Lumber Company owns no equipment except two Shay locomotives which are used on their logging spurs. Our empty cars, are just the ordinary run of flat cars which we deliver to them at Keith, and their locomotives take these flat cars out of their own spurs, and load them, and deliver them back to the Liberty-White Railroad Company at Keith.

Mr. Gutheim: So that the entire logging spur operation is done by the locomotives of the J. J. White Lumber Company, and by the employees of the J. J. White Lumber Company?

Mr. White: On the logging spurs?

Mr. Gutheim: Yes, at its spurs?

Mr. White: Yes, sir.

Mr. Gutheim: These locomotives are loaned outright, and not leased by the J. J. White Lumber Company from the J. J. White Lumber Company?

3998 Mr. White: No, sir, they are the property of the J. J. White Lumber Company.

Mr. Gutheim: The rails of the road are owned outright, and not leased from the Illinois Central Railroad Company?

Mr. White: Twelve miles are leased by the Illinois Central Railroad, on a twelve year contract, based on a valuation, I think, of about twenty-one dollars per ton, for which we pay six per cent interest.

Mr. Gutheim: With the privilege of purchase at any time?

Mr. White: With the privilege of purchase at any time, and in the nature of a traffic agreement for the use thereof.

Mr. Gutheim: Is that ten miles of rail laid on the main line from New Holmesville, or from McComb to Liberty, or is it used on the branch from Irene down to Keith?

Mr. White: No sir, it is not laid on the Irene branch; it is distributed at various points on the main line.

Mr. Gutheim: Do you know what the total compensation or total valuations are, on which you pay a rate of interest on that
3999 rail?

Mr. White: Why, it is approximately twenty-two thousand dollars; those are not exact figures however.

— Examination:

Mr. Mixon: Mr. White, I will ask you what business you have been engaged in solely since going into business, since leaving school?

Mr. White: Oh, well, of course up to the time the Liberty-White Railroad was built, and since, my business has been entirely with the operation and management of the Liberty-White Railroad.

Mr. Mixon: Have you ever been connected in any official capacity or active employment with the J. J. White Lumber Company?

Mr. White: No, sir; I have not been in active employment of any kind with Mr. J. J. White.

Mr. Mixon: Have you ever studied the lumber business with a view of engaging in its manufacture?

Mr. White: No, sir, I know no more of the manufacture of lumber than any one not at all familiar with it.

Mr. Mixon: I will ask you, if upon leaving school and the commencement of the construction of the Liberty-White Rail-
4000 road Company, did you begin to devote your entire time to the railroad business, and railroad operations?

Mr. White: Yes, sir.

Mr. Mixon: I will ask you if you attend meetings of railway officials?

Mr. White: Yes, sir, I do.

Mr. Mixon: I will ask you what railroad association you are a member of?

Mr. White: Well, that is all stated in our exhibit No. 1.

Mr. Mixon: I will ask you if other railroads on application or otherwise, grant you transportation as a railroad president?

Mr. White: Yes, sir; I have never since my connection with the

Liberty-White Railroad Company been considered any other than a railroad man.

Examiner Boyle: Did they also grant transportation to your predecessor?

Mr. White: No, sir; Mr. J. J. White who was formerly president of the Liberty-White Railroad Company, and who owns the J. J. White Lumber Company interests, never travelled on a pass of any kind.

4001 Examiner Boyle: Did he have a pass?

Mr. White: No, sir; I mean Inter-state passes; of course, on some of these small local railroads he may have probably; I can't say as to that.

Mr. Mixon: Now, Mr. White, I will ask you if, prior to the organization of the Liberty-White Railroad, which you have stated Mr. J. J. White owned and operated, as a logging road, were they ever operated as common carriers?

Mr. White: No, sir.

Mr. Gutheim: You mean that the common carrier operations never started until you went west of Liberty?

Mr. Mixon: Yes, sir.

Mr. Mixon: You stated awhile ago that the timber had been practically all cut over from Glading to Liberty, and that that was a farming country; is not that the fact also from Irene to Liberty, that there is practically no timber shipped from Irene; that the J. J. White Lumber Company had cut the timber.

Mr. White: Well, of course in answering that question, I
4002 had particular reference to the new construction from Glading to Liberty. But it is a fact, that at the time of the building of the Liberty-White Railroad the timber had not only been cut out from Irene to Liberty, but it had been cut practically from McComb to Liberty.

Mr. Mixon: I will ask you to state whether the organization and the beginning of operations of the Liberty-White Railroad was proposed for the aid and assistance of the J. J. White Lumber Company.

Mr. White: Of course, the J. J. White Lumber Company was not in existence at the time, as a lumber proposition——

Mr. Mixon: I mean, was it proposed as a lumber proposition, or as a railroad proposition?

Mr. White: Entirely as a railroad proposition.

Mr. Mixon: I will ask you whether or not there has been a survey from New Holmesville to Tylertown—I believe you said there had.

Mr. White: Yes, sir.

Mr. Mixon: That has been recently?

Mr. White: Yes, sir, it has been recently made.

Mr. Mixon: Was it not made prior to any knowledge of this hearing?

4003 Mr. White: Yes, sir; it was made prior to any knowledge of this hearing; when I say recently, I say it has been made within the last year.

Mr. Gutheim: Do you know of any effort being made to finance any part of the new construction?

Mr. White: Yes, sir; efforts have been made, and considerable of the right-of-way has been obtained.

Mr. Gutheim: That will give you a connection with the New Orleans & Great Northern?

Mr. White: Yes, sir.

Mr. Gutheim: And also your connection with the Illinois Central Railroad which you already have?

Mr. White: Yes, sir.

Mr. Mixon: I would ask you, Mr. White, if the abolition of these divisions—these joint or through rates—whether or not that would tend to cripple your railroad proposition, or tend to retard it in its development of the country?

Mr. White: Yes, sir; there could be no doubt of that.

4004 Examiner Boyle: What is the proportion of traffic that moves on the joint rates, as compared with that which moves on the combination rates?

Mr. White: Could you give the exact proportions.

Examiner Boyle: Will you show that in the statement which you are to file?

Mr. White: Yes, sir.

Mr. Mixon: Mr. White, here is another question: You spoke about carloads of logs for the several milling companies or individuals on your line, further out on a basis of five dollars per car: upon what grounds did you make the basis of five dollars per car?

Mr. White: It is based on an arbitrary, or a participation in the shipments.

Examiner Boyle: Mr. White, if the joint through rates were cancelled, and divisions with your line were cancelled, would there be any likelihood of a petition for reduction on the rates from junction points to final destination?

Mr. White: A petition for reduction of rate?

Examiner Boyle: Yes, or an application for reduction.

4005 Mr. White: From whom?

Examiner Boyle: From the industries on your line, or from any one at all.

Mr. White: Well, we are likely to get a petition for a reduction in rates at any time.

Examiner Boyle: I don't mean the rates on your own road, but would there be any application for reduction of rates from junction points; that would leave the situation one whereby you would charge your own local rate up to the junction point, plus the other rate beyond?

Mr. White: Well, of course, if we were not enabled on shipments, for instance, originating at points out on our line, if we were not able to get these divisions out of the McComb rate it would be necessary in the actual operation of the proposition to raise our rates and naturally our shippers would be dissatisfied, of coure, as to what action they might take, I cannot say.

4006 Mr. Mixon: Have you a rate for logging purposes where you do not participate in the arbitraries, but participate in the joint rate?

Mr. White: Yes, we have a published rate as shown in our tariff on file with the Commission, which is ten dollars per car applying on logs hauled from points beyond our line in which we do not participate in any way in the re-haul or re-shipment of joint rate.

Examiner Boyle: Your road then, you say, would be under a disadvantage if the joint through rates were cancelled, and you were left only to charge your locals to junctions?

Mr. White: I don't think there would be any doubt about that as a general proposition.

Examiner Boyle: But you are not operating just along that situation; that is, you charge in some instances, local rates up to junction points.

Mr. White: As I said, on classes the joint rate is made up by a combination of locals, but there are a great many commodities, which is heavy tonnage, such as the lumber business or logging business on which there are joint rates; in some instances the same as the junction rate, and in other instances the
4007 same as the junction rate, out of which we get a division.

Examiner Boyle: I think we won't go into that any further. I think your statement will show just the commodities moving on this combination of rates, and the commodities moving under the joint through rate?

Mr. White: Yes, sir.

Mr. Mixon: I would like for you to give approximately the cost of the depot at McComb—the cost of construction.

Mr. White: Well, I don't remember the exact cost of that depot.

Examiner Boyle: Give it approximately.

Mr. White: About twenty-five hundred dollars.

Mr. Mixon: And the one at New Holmesville?

Mr. White: The depot at New Holmesville would run from fifteen hundred to eighteen hundred dollars; that is simply the cost of construction, and it would be alike on the depot at Glading, Robinson and Marshallton; the depot at Liberty, is similar to the structure at McComb.

Mr. Mixon: It cost about twenty-five hundred dollars?

4008 Mr. White: Yes, sir.

Mr. Mixon: And at those places you maintain permanent agents who devote their entire time to the business of the railroad?

Mr. White: Yes, sir; that has been brought out.

Mr. Mixon: And you also stated that your employees are not employed by the J. J. White Lumber Company?

Mr. White: Absolutely none.

Mr. Mixon: In regard to the indebtedness of the J. J. White Lumber Company for the construction of your line of railroad east of McComb, I will ask you to state what was the understanding at the time that Mr. J. J. White advanced this money?

Mr. White: The understanding is, that Mr. J. J. White will take this indebtedness to him in stock, and of course, it will be distributed among his children as has been done with his other stocks.

Mr. Mixon: Mr. J. J. White is about eighty years old?

Mr. White: Yes, sir.

Mr. Mixon: And has retired from active business?

Mr. White: Yes, sir.

4009 Mr. Mixon: And owns no other industries, other than stock in other industries which he owned?

Mr. White: He did own a controlling interest in these other industries, up to the time be distributed his stock among his children.

Mr. Mixon: At one time he owned an interest in a cotton mill?

Mr. White: A controlling interest, yes, sir.

Mr. Mixon: Who owned that cotton mill?

Mr. White: Mr. J. J. White Jr.

Mr. Mixon: A son of J. J. White Sr.?

Mr. White: Yes, sir.

Mr. Mixon: Did he have any connection with the lumber company?

Mr. White: No, sir.

Mr. Mixon: That cotton mill has been sold?

Mr. White: Yes, sir.

Mr. Mixon: Now, you have testified you were engaged in the railroad business?

Mr. White: Yes, sir.

Mr. Mixon: Your other brother in the cotton mill business?

Mr. White: One of them.

4010 Mr. Mixon: How many other brothers have you?

Mr. White: I have one other brother.

Mr. Mixon: There are three boys?

Mr. White: Yes, sir.

Mr. Mixon: And the third brother; what business was he engaged in?

Mr. White: He is in active charge of the J. J. White Lumber Company.

Mr. Mixon: I will ask you if you have been instrumental in promoting any business enterprises or anything like that along your line of road?

Mr. White: Yes, sir; we have a regularly organized land and industrial department, devoted at this time to the establishment of small farmers on the line.

Mr. Mixon: That is stated in exhibit No. 1. I will ask you if you are individually or personally connected with any business enterprises at Liberty. Are you not the president of the bank there?

Mr. White: I am president of the Liberty bank, yes, sir.

Mr. Mixon: Was that bank organized after the Liberty-White Railroad was built?

4011 Mr. White: That bank was commenced with the construction of road to Liberty.

Mr. Mixon: In contemplation of the road being constructed through?

Mr. White: Yes, sir.

Mr. Mixon: Had there been a bank there before?

Mr. White: Not to my knowledge.

Mr. Mixon: The town is 117 years old; is there anything else you want to state?

Mr. White: Nothing, except I would like to file as an exhibit our time-tables, and rate sheets and time sheets, from the beginning of the operation.

Examiner Boyle: They will be received and filed.

Thereupon, the Time-tables, etc., so offered and identified, were received in evidence, and marked "Defendant'- Exhibit L-B-3" received in evidence December 15th 1910, page 48, and are attached hereto.

Mr. Mixon: Can you sell tickets from any point on your line to other points—interstate points?

Mr. White: We sell inter-line tickets from any of our agency stations to points on other lines, and check their baggage ac-
4012 cordingly, and in turn tickets are sold from points on other roads to points on our road, and baggage is checked accordingly. We also issue a mileage book by order of the Mississippi Railroad Commission—joint mileage book—and issue our own individual mileage books.

Mr. Mixon: Do you pay a privilege tax as a railroad exclusively as such, in Mississippi?

Mr. White: Yes, sir, we pay a privilege tax of ten dollars per mile.

Mr. Mixon: Are you assessed by the Mississippi Railroad Commission?

Mr. White: Yes, sir.

Mr. Mixon: Have you ever been sued as a railroad company?

Mr. White: Yes, sir; a number of times.

Whereupon, at 12:30 O'clock P. M., on the 15th day of December, 1910, the hearing of the above entitled matter was closed.

Recess was taken at 12:30 o'clock until 2 O'clock P. M.

4013 After Recess.

NEW ORLEANS, LOUISIANA,
December 15, 1910—2:15 p. m.

Zwolle & Eastern Railroad Co.

Examiner Boyle: We will now take up the case of the Zwolle & Eastern Railroad.

C. W. TORNEY, was called as a witness, and being duly sworn, testified as follows:

Examination:

By Mr. Gutheim: Where do you live?

Mr. Torney: At Zwolle, Louisiana.

Mr. Gutheim: What is your occupation?

Mr. Torney: Agent of the Zwolle & Eastern Railroad.

Mr. Gutheim: Just where is that located?

Mr. Torney: Sabine parish.

Mr. Gutheim: And it has a junction with what other line?

Mr. Torney: With the Kansas City Southern Railroad Company.

Mr. Gutheim: It runs from the Kansas City Southern
4014 Railroad, west?

Mr. Torney: Yes, sir.

Mr. Gutheim: In the direction of Blue Lake?

Mr. Torney: Yes.

Mr. Gutheim: Which is the terminus, and what is named as Blue Lake Station.

Mr. Torney: Yes, sir; Blue Lake Station.

Mr. Gutheim: Just what is there at Blue Lake station?

Mr. Torney: There is a "Y," where the products are received for transportation.

Mr. Gutheim: The "Y"—in other words, Blue Lake station is the location temporarily of the logging operations of the Sabine Lumber Company?

Mr. Torney: No, sir.

Mr. Gutheim: Are your logging operations on beyond Blue Lake?

Mr. Torney: No, sir, at the present time they are several miles this side.

Mr. Gutheim: This timber up to Blue Lake is cut out?

Mr. Torney: Yes, sir, the pine timber is.

4015 Mr. Gutheim: You have no other connection, except with the Kansas City Southern Railroad Company?

Mr. Torney: No, sir.

Mr. Gutheim: What is there along the line of the Zwolle & Eastern Railroad going west from Zwolle in the line of community?

Mr. Torney: Well, there is a station known as Gibson; one mile from Gibson is the Hull, Gibson & Driver Company, manufacturers of hardwood.

Mr. Gutheim: They have a hardwood mill there?

Mr. Torney: Yes, sir, at a point one mile from Zwolle; then six miles from Zwolle is a station known as Red, the camps of the Sabine Lumber Company, and near the station at Blue Lake is the camp of the Hull, Gibson & Driver Company.

Mr. Gutheim: This Hull, Gibson & Driver Company is taking out the hardwood?

Mr. Torney: Yes, sir.

Mr. Gutheim: It is cut and taken down to the mill at Gibson?

Mr. Torney: Yes, sir.

Mr. Gutheim: The pine is being taken out at the camp of
4016 the Sabine Lumber Company, and taken down to the mill of the Sabine Lumber Company at Zwolle?

Mr. Torney: In their camp——

Mr. Gutheim: The mill of the Sabine Lumber Company is at Zwolle, is it not?

Mr. Torney: Yes, sir.

Mr. Gutheim: Does all of the timber that is being milled at Gibson, by the Hull, Gibson & Driver people, come off the holdings of the Sabine Lumber Company?

Mr. Torney: No, sir.

Mr. Gutheim: Is the hardwood that still remains—has that been sold to them on the stump?

Mr. Torney: Only a small portion of the hardwood in that section has ever belonged to the Sabine Lumber Company.

Mr. Gutheim: Well, what is the community at Gibson. Is it simply a community of ordinary dwellings, and the erection of the hardwood mill, or was it there before the mill was there?

Mr. Torney: Yes, sir, practically the dwellings of the hardwood mill.

Mr. Gutheim: Is there a Post Office there, or are they dependent upon Zwolle?

4017 Mr. Torney: They depend on Zwolle.

Mr. Gutheim: The community at the logging establishments of the Sabine Lumber Company is merely a temporary community that goes along with the logging operations?

Mr. Torney: Yes, sir.

Mr. Gutheim: And what is the community at Blue Lake?

Mr. Torney: It is practically the same as at the railroad, and at the hardwood camp.

Mr. Gutheim: Are there any farms along the line of the railroad?

Mr. Torney: Yes, sir.

Mr. Gutheim: Do they conduct extensive operations in so far as they deliver products to your line for shipment, or receive shipments over your line?

Mr. Torney: Yes, sir, it is an extensive business to some extent.

Mr. Gutheim: Merely in connection with what comes to your line?

Mr. Torney: Yes, sir.

Mr. Gutheim: About when was the Zwolle & Eastern Railroad built?

4018 Mr. Torney: I have been connected with the road only for a short time—something over two years.

Mr. Gutheim: It was built before that time?

Mr. Torney: Yes, I have endeavored to obtain that information, and as well as I can find out, the road was organized in connection with the Sabine Lumber Company, or by the Sabine Lumber Company about 1899.

Mr. Gutheim: And the road was built practically contemporaneously, or started with the erection and beginning of operations by the mill?

Mr Torney: Either by them or by their predecessors.

Mr Gutheim: That is to say, it was practically one operation at the start?

Mr. Torney: Yes, sir, at the beginning.

Mr. Gutheim: Was it separate-y incorporated from the beginning?

Mr. Torney: No, sir.

Mr. Gutheim: When was it incorporated?

Mr Torney: In 1904.

Mr. Gutheim: And upon incorporation, the property was

4019 taken over from the Sabine Lumber Company, I take it?

Mr. Torney: Yes, sir.

Mr. Gutheim: What consideration was given to the Sabine Lumber Company by the Zwolle & Eastern Railroad Company for the railroad property?

Mr. Torney: Somewhere between ninety and one hundred thousand dollars.

Mr. Gutheim: Cash or stock?

Mr. Torney: Part cash, and the balance was on demand.

Mr. Gutheim: Well, at the beginning the lumber company either put up the money or built the railroad, or else built the railroad itself as part of its logging operations?

Mr. Torney: Yes, sir.

Mr. Gutheim: And by its sale of the railroad to the corporation, was there merely a transfer of the securities of the railway company to the lumber company, together with a note for the balance?

Mr. Torney: I am not certain about that transfer.

Mr. Gutheim: Well, at the present time, does the Sabine Lumber Company own any security of the railroad company, or do
4020 the stockholders of the Sabine Lumber Company own the securities, or a majority of the securities of the Zwolle & Eastern Railroad Co.?

Mr. Torney: Since the incorporation of the Zwolle & Eastern Railroad Company it has paid out its obligations to the Sabine Lumber Company.

Mr. Gutheim: So that the only outstanding indebtedness now, is represented by the stock?

Mr. Torney: The stock has also been paid off.

Mr. Gutheim: Paid off by the lumber company, but it is held by the lumber company, is that a fact?

Mr. Torney: No, sir.

Mr. Gutheim: Do you mean there is no stock outstanding?

Mr. Torney: It is in the hands of the owners.

Mr. Zwiebold: The stockholders of the Sabine Lumber Company are identical with the exception of one with the stockholders of the Zwolle & Eastern Railroad Company—a small portion of stock only.

Mr. Torney: Something like two hundred—the amount of stock that is not held.

Mr. Zwiebold: The amount of railroad stock is held in proportion to that?

4021 Mr. Gutheim: That is held by a stockholder not interested in the Sabine Lumber Company?

Mr. Torney: It is two hundred dollars.

Mr. Gutheim: Now, at the present time, do the same individuals hold the same official relations to both the Sabine Lumber Company, and the Zwolle & Eastern Railroad Company?

Mr. Torney: I believe so.

Mr. Gutheim: And the operation of the railroad company is looked after by the mill superintendent?

Mr. Torney: The mill has a manager, and the railroad company has a superintendent.

Mr. Gutheim: Does the railroad superintendent devote all of his

time to the railroad, or does he also act in a supervising capacity for the lumber company?

Mr. Torney: He has duties attached to the lumber company.

Mr. Gutheim: Woods superintendent?

Mr. Torney: Yes, sir.

Examiner Boyle: Who pays his salary?

Mr. Torney: The railroad pays a proportion, approximately, that he devotes to the time of the railroad duties.

4022 Examiner Boyle: How much time does he devote—what proportion to the lumber company, and what proportion to the railroad company?

Mr. Torney: I think approximately half and half.

Mr. Gutheim: How many miles of main line are there?

Mr. Torney: Thirteen.

Mr. Gutheim: And of spurs and sidings?

Mr. Torney: About four miles.

Mr. Gutheim: Is it all standard gauge?

Mr. Torney: Yes, sir.

Mr. Gutheim: What is the weight of rail?

Mr. Torney: Some thirty-five, and some forty-five pounds.

Mr. Gutheim: Is the road ballasted with anything but the natural ballast of that section?

Mr. Torney: No, sir.

Mr. Gutheim: Are there any bridges to speak of?

Mr. Torney: Yes, there is one bridge, which is, I should judge about three-eighths of a mile in length.

Mr. Gutheim: Is there much of a grade?

Mr. Torney: No grades; no grade at all.

4023 Mr. Gutheim: Have you any station buildings along the line?

Mr. Torney: No, sir.

Mr. Gutheim: What is there at Zwolle: a joint building with the Kansas City Southern Railway?

Mr. Torney: No, sir, the building of the Sabine Lumber Company is occupied by the Zwolle & Eastern Railroad Company's business.

Mr. Gutheim: How much equipment have you—locomotive and cars?

Mr. Torney: Three locomotives, between fifty and sixty logging cars, one box car, and one combination passenger and baggage car.

Mr. Gutheim: Are you using that passenger car in regular passenger service?

Mr. Torney: Yes, sir.

Mr. Gutheim: I take it that the logging cars are not equipped with air brakes?

Mr. Torney: No, sir.

Mr. Gutheim: Are the trains run on regular schedule?

Mr. Torney: Yes, sir.

Mr. Gutheim: Are they dispatched by telegraph or tele-

4024 phone?

Mr. Torney: No, sir.

Mr. Gutheim: Is your equipment all owned, or part leased from the lumber company?

Mr. Torney: It is all owned by the railroad company.

Mr. Gutheim: Do you lease any of it to the lumber company for its operations?

Mr. Torney: No, sir.

Mr. Gutheim: Who conducts the operations on the logging spurs; the Sabine Lumber Company?

Mr. Torney: The railroad company; the Sabine Lumber Company owns no logging spurs.

Mr. Gutheim: It owns no locomotives and cars?

Mr. Torney: No, sir.

Mr. Gutheim: It owns no rail equipment?

Mr. Torney: No, sir.

Mr. Gutheim: These logging spurs—the material for the equipment of the logging spurs is owned by the Zwolle & Eastern Railroad Company?

Mr. Torney: Yes, sir.

4025 Mr. Gutheim: Who constructs the logging spurs and tracks over which your company transports the logs down to the mill?

Mr. Torney: The Zwolle & Eastern Railroad.

Mr. Gutheim: What compensation does the Zwolle & Eastern Railroad get for that service?

Mr. Torney: It handles the rough and finished product of the enterprise.

Mr. Gutheim: You mean it gets one hundred per cent of the product of the Sabine Lumber Company?

Mr. Torney: Yes, sir.

Mr. Gutheim: Do you have any station employees at Zwolle?

Mr. Torney: Yes, sir.

Mr. Gutheim: Is he employed jointly with the lumber company there?

Mr. Torney: Yes, he is a joint employee.

Mr. Gutheim: Does the railroad maintain a regular railroad crew, or are all employees of the lumber company?

Mr. Torney: Regular railroad crews.

Mr. Gutheim: How may men in a crew?

Mr. Torney: One crew of about five men, and another crew

4026 of from eight to ten men.

Mr. Gutheim: Are the train employees solely railroad men, or do they also perform lumber services in the freight department?

Mr. Torney: Railroad men only.

Mr. Gutheim: The general office employees are all men connected with the lumber company?

Mr. Torney: With the exception of the men in the woods.

Mr. Gutheim: Are they joint with the Kansas City Southern Railway?

Mr. Torney: No, sir.

Mr. Gutheim: How many men have you in the general office who devote their entire time to the railroad company's service?

Mr. Torney: None of them.

Mr. Gutheim: You have just said with the exception of the freight men, in answer to a question as to whether the general office employees were all general with the lumber company. Do you have any men in the general office who perform nothing but railroad service, or do they all act jointly with the railroad company, and the lumber company, performing services for both?

4027 Mr. Torney: All of the employees at Zwolle are in the general offices, performing services for both the railroad company and the lumber company.

Mr. Gutheim: And their compensation is divided between both companies?

Mr. Torney: Yes, sir.

Mr. Gutheim: Are they paid direct by both companies, or does the lumber company pay the entire charge, and charge a portion to the railroad company?

Mr. Torney: Some are paid direct, and some are handled the other way.

Mr. Gutheim: Your passenger service is all on mixed trains?

Mr. Torney: Yes, sir.

Mr. Gutheim: Is there any Sunday service?

Mr. Torney: No, sir.

Mr. Gutheim: You stated that the trains run on regular schedules?

Mr. Torney: Yes, sir.

Mr. Gutheim: Are there any published time-tables, other than in the official guide?

4028 Mr. Torney: I did not know that our time table was published in the official guide.

Mr. Gutheim: Are there general time tables published?

Mr. Torney: Yes, sir; we have a local time table.

Mr. Gutheim: How many trains do you run daily?

Mr. Torney: Two trains each way.

Mr. Gutheim: Do they connect with the Kansas City Southern Railway Company?

Mr. Torney: Yes, sir.

Mr. Gutheim: About how many carloads do you handle out of the woods with your logging train in one train?

Mr. Torney: Eighteen cars is considered a full train.

Mr. Gutheim: Do you carry any United States mail?

Mr. Torney: No, sir.

Mr. Gutheim: Have you any express service?

Mr. Torney: No, sir.

Mr. Gutheim: About how much does your passenger traffic amount to?

Mr. Torney: About sixty dollars per month.

Mr. Gutheim: How many passengers, about, does that

4029 mean?

Mr. Torney: About two hundred.

Mr. Gutheim: Is that passenger traffic done on a regular ticket basis, or is it all done on the basis of cash fares?

Mr. Torney: We have two ticket agencies that sell tickets; and parties boarding the trains at other points pay cash fares.

Mr. Gutheim: One of the agents of course, is at Zwolle; where is the other?

Mr. Torney: At Red.

Mr. Gutheim: That is a point beyond Blue Lake?

Mr. Torney: No, sir; it is the point where the Sabine Lumber Company camps are located.

Mr. Gutheim: There is no passenger traffic to speak of beyond Red?

Mr. Torney: Yes, sir, there is some little passenger traffic beyond there.

Mr. Gutheim: At this point, Mr. Zweibold, the Commission would ask you to furnish a statement showing the gross tonnage, the gross revenue for the fiscal year ending June 30th 1910, divided between the gross tonnage, and the gross revenue accruing on business
4030 of Sabine Lumber Company, including forest products, and merchandise for its commissary, if any; and the tonnage and revenue accruing on the other business of the general public.

Mr. Zwiebold: Mr. Torney has those figures.

Mr. Gutheim: If he has them, they may be submitted now.

Examiner Boyle: They may be submitted regularly. You understand that you are to submit this information.

Mr. Torney: Yes, sir.

Mr. Gutheim: Something over ninety-five per cent of the total tonnage is handled for the Sabine Lumber Company?

Mr. Torney: No, sir.

Mr. Gutheim: You say "no, sir"; about what percentage is handled for the Sabine Lumber Company?

Mr. Torney: Approximately seventy per cent; and the greater part of the balance is the business of the Hull, Gibson & Driver people—hardwood timber, going down to the hardwood lumber mill, and coming from Gibson over to the Kansas City Southern Railway —the greater portion of the remaining thirty per cent.

4031 Mr. Gutheim: And that hardwood timber as a matter of fact, about all of it comes from cut-over lands of the Sabine Lumber Company?

Mr. Torney: No, sir.

Mr. Gutheim: A good part of it does?

Mr. Torney: No, sir.

Mr. Gutheim: I believe you said you left your hardwood timber there when you operated at Blue Lake.

Mr. Torney: We own two hundred and forty acres of hardwood timber.

Mr. Gutheim: Do you mean that the Hull, Driver & Gibson people is cutting off of its own holdings?

Mr. Torney: Yes, sir.

Mr. Gutheim: Is there any pine on those holdings?

Mr. Torney: None that I know of.

Mr. Gutheim: Is there any relation that you know of between the Hull, Gibson & Driver Company and the Sabine Lumber Company?

Mr. Torney: No, sir.

Mr. Gutheim: Do you publish any local tariffs?

Mr. Torney: Yes, sir.

Mr. Gutheim: Do you file them with the Interstate Commerce Commission.

4032 Mr. Torney: I take it for granted that they are.

Mr. Frazer: They are filed with the Louisiana Rail-Road Commission?

Mr. Gutheim: You may submit those.

Mr. Gutheim: You are a party to the various tariffs published by the Kansas City Southern Railway Company?

Mr. Torney: To some of them.

Mr. Gutheim: You are a party of course to the rate on lumber, and articles taking rates?

Mr. Torney: I think we are.

Mr. Gutheim: Do you have joint rates on classes and commodities with the Kansas City Southern Railway?

Mr. Torney: No, sir.

Mr. Gutheim: That is, everything except forest products moves on a combination of locals?

Mr. Torney: Yes, sir.

Mr. Gutheim: What division do you get out of the rates from Zwolle out of forest products, I mean?

Mr. Torney: Here are the division sheets.

Mr. Gutheim: Will you file with the Commission the division sheets showing the divisions allowed your line?

4033 Mr. Torney: Yes, sir. I want also to file the Time-Tables which I showed you a minute ago.

Mr. Gutheim: Very well.

The time tables so offered and identified, were received in evidence, and thereupon marked "Defendant's Exhibit 1", received in evidence December 15, 1910, page 21, and is attached hereto.

And the division sheets, so offered and identified were received in evidence, and thereupon marked "Defendant's Exhibit No. 2", received in evidence December 15, 1910, page 21 and are attached hereto.

Mr. Gutheim: Will you indicate the general run of divisions in cents per 100 pounds that accrue to your line?

Mr. Torney: From nothing to four cents per one hundred pounds.

Mr. Gutheim: And the average division per one hundred pounds would be about what?

Mr. Torney: I would judge it would be about one and a half or one and three-quarter cents.

4034 Examiner Boyle: On what shipments do you get nothing; is that shown in your division sheet?

Mr. Tor-ey: Yes, sir.

Mr. Gutheim: Are these divisions to your road made on a Milling and transit basis?

Mr. Torney: I understand so.

Mr. Gutheim: So that on the basis of service performed by the Zwolle & Eastern Railroad for the average division of one and three-

quarter cents, it is a log haul from a point known as Red at the present time, to the mill at Zwolle, who takes care of the lumber haul from the mill at Zwolle to the Kansas City Southern Railroad.

Mr. Torney: The Zwolle & Eastern Railway handles part of it, and furnishes the loading track where the balance of it is loaded.

Mr. Gutheim: How much of a haul does the Zwolle & Eastern Railroad perform on the portion that it handles?

Mr. Torney: Approximately half a mile.

Mr. Gutheim: Can you say what proportion it does so handle?

Mr. Torney: As a rule, I should judge approximately
4035 twelve per cent of the Sabine Lumber Company's shipments.

Mr. Gutheim: Now, does the Zwolle & Eastern Railway handle logs for the Hardwood Lumber Company?

Mr. Torney: Yes, sir.

Mr. Gutheim: And what charge does it make for that haul?

Mr. Torney: Two dollars per one thousand feet, log scale.

Mr. Gutheim: Well, do the rates on hardwood lumber apply from Gibson on the milling and transit basis?

Mr. Torney: Yes, sir.

Mr. Gutheim: And notwithstanding that, you make a charge for the log haul in case the Hardwood Lumber Company, but made no charge against the Sabine Lumber Company in the case of pine?

Mr. Torney: I do not remember having so stated.

Mr. Gutheim: I understand you to say that no charge was made for the local log haul performed for the Sabine Lumber Company?

Mr. Torney: If I said so, it was not correct.

Mr. Zwiebold: What the witness said was, there was no
4036 separate charge for services on moving the logs which were being loaded up out on the spurs, but not on main line; that was included with the charge for carriage from the spur to the main line.

Examiner Boyle: What Mr. Zwiebold says is correct, Mr. Torney, is it not?

Mr. Torney: Yes, sir; that there is a charge on hauling the pine logs to the mill.

Mr. Gutheim: Now I would like to ascertain the total outstanding capital stock that is applicable to the cost of the construction, and to equipment on the thirteen miles of main line, and the four miles of spurs and sidings of the Zwolle & Eastern Railroad?

Mr. Torney: I don't quite understand that question.

Mr. Gutheim: What is the outstanding capital stock at the present time?

Mr. Torney: I don't understand that; I understand the meaning of the word "outstanding" to be——

Mr. Gutheim: What is the amount of capital stock that is in the hands of the stockholders?

4037 Mr. Zwiebold: In the certified copy of the articles of incorporation of the Zwolle & Eastern Railroad on file, showing the capital stock to be twenty thousand dollars.

Mr. Gutheim: Is that all outstanding?

Mr. Zwiebold: Yes, the stock is at a large premium, because the plant is worth much more.

Mr. Gutheim: I understand you to say that the *depth* of the rail road company to the lumber company had all been paid out?

Mr. Torney: Yes, sir.

Mr. Gutheim: So that at the present time the only indebtedness is this twenty thousand dollars of the capital stock?

Mr. Zwiebold: That is a fact; there is only twenty thousand dollars of capital stock. Originally the consideration for the transfer was something like ninety-five thousand dollars, of which twenty thousand dollars was paid by capital stock issued, and for the balance, there was a debt which has since been paid, of seventy-five thousand dollars. Why they are carrying it on such a small capitalization, is something I don"t know. The stock is at sev-

4038 eral times the premium.

Mr. Gutheim: The general offices of the road are at Zwolle?

Mr. Torney: Yes, sir.

Mr. Gutheim: You are complying with the Federal laws as to safety appliances, accident reports, and all that?

Mr. Torney: Yes, sir, with the exception of the safety appliances which as I understand it do not apply to our equipment.

Mr. Gutheim: Does the road pay dividends, or has it paid dividends?

Mr. Torney: No, sir.

Mr. Gutheim: The surplus I take it has been applied from time to time in settlement of this debt, which was due to the lumber company?

Mr. Torney: Yes, sir.

Mr. Gutheim: When was the last of that debt paid?

Mr. Torney: I am not certain; but I think it was only about two years ago.

4039 Mr. Gutheim: Since the payment of that debt, has there been a reduction in the rate of the log haul?

Mr. Torney: No, sir.

Mr. Gutheim: Do any of the general officers of the Zwolle & Eastern Railroad company receive salaries?

Mr. Torney: Yes, sir.

Mr. Gutheim: What salaries are paid to them, and to whom?

Mr. Torney: The secretary and treasurer receives, I think, twenty-five dollars, per month; the auditor receives twenty-five dollars per month; the timekeeper receives twenty-five dollars per month, and the general passenger and freight agent receives ten dollars per month.

Mr. Gutheim: In view of the fact that the debt due to the Sabine Lumber Company upon the construction of the road has been entirely wiped out, and that the outstanding indebtedness up to the present time consists only of twenty thousand dollars of stock, will you say if it is not a fact that the timber holdings of the Sabine Lumber Company in and about Zwolle, are pretty nearly cut out?

4040 Mr. Torney: No, sir.

Mr. Gutheim: They are not?

Mr. Torney: No, sir.

Mr. Zwiebold: What length of time have you, about, to continue cutting?

Mr. Torney: I should say about four to five years on that.

Mr. Zwiebold: How much has the Hull, Driver & Gibson Company to cut?

Mr. Torney: Five to six years yet.

Mr. Zwiebold: Five to six years?

Mr. Torney: Yes, sir.

Mr. Zwiebold: Now, in addition to the service you rendered to the Sabine Lumber Company, and the Hull, Gibson & Driver Company, do you haul any other traffic?

Mr. Torney: Yes, sir.

Mr. Zwiebold: What is it?

Mr. Torney: Any general freight that offers for transportation.

Mr. Gutheim: That will appear on the statement, Mr. Zwiebold.

Mr. Torney: It is covered by ties, piling, staves, etc.

Mr. Zwiebold: Do you have bills of lading?

Mr. Torney: Yes, sir.

4041 Mr. Zwiebold: And printed tickets?

Mr. Torney: Yes, sir.

Mr. Zwiebold: Have you specimens with you?

Mr. Torney: Yes, sir.

Mr. Zwiebold: Will you produce them?

Mr. Torney: Sure; here they are.

(The witness here produced a number of printed forms of bills of lading, way bills, expense bills, tickets, etc.)

Mr. Zwiebold: Indicate what you have in your hand there.

Mr. Torney: These are——

Examiner Boyle: Just get him to state what they are, Mr. Zwiebold.

Mr. Zwiebold: What are they?

Mr. Torney: Stationary of the Zwolle & Eastern Railroad, consisting of letterheads, blank checks, expense bills, bills of lading (uniform blanks).

Examiner Boyle: Uniform Bills of Lading?

Mr. Torney: Yes, sir, both straight and shippers' order notify, and export also; blank way bills, and tickets.

Examiner Boyle: Do you issue inter-line way bills?

4042 Mr. Torney: No, sir.

Examiner Boyle: How do you bill freight from these points on the Zwolle & Eastern Railroad to destinations beyond your line?

Mr. Torney: To the junction point.

Examiner Boyle: Locally?

Mr. Torney: Yes, sir, locally.

Mr. Zwiebold: You also have printed forms of tickets as they are in use by your company?

Mr. Torney: Yes, sir.

Mr. Zwiebold: Look at this paper which I hand to you, and state what it is?

Mr. Torney: That is a blue print of the Zwolle & Eastern Railroad Company's main line.

Mr. Zwiebold: Showing the location of the stations, mills and etc.?

Mr. Torney: Yes, sir.

Mr. Zwiebold: And of the Hull, Gibson, Driver Company's mill?

Mr. Torney: Yes, sir.

4043 Mr. Zwiebold: And of the "Y" you spoke of?

Mr. Torney: Yes, sir.

Mr. Zwiebold: And also the proposed extension of the line under the charter into Texas, which is yet unbuilt?

Mr. Torney: Yes, sir.

Mr. Gutheim: Do you mean, Mr. Zwiebold, that you are going to cross the Sabine River?

Mr. Zwiebold: Yes, that is what we intended to do, but we concluded that the bridge construction would be so terrific that it would not justify us in so doing.

Mr. Gutheim: I thought that was the situation of the Long-Bel people, when they proposed to the Sante Fe to build down there.

Examiner Boyle: Do you issue through passenger tickets to points on your lines, and to points on other lines?

Mr. Torney: No, sir.

Examiner Boyle: You only issue local tickets from your various points up to the junction points?

Mr. Torney: Yes, sir.

4044 The map so offered and identified, was received in evidence, and thereupon marked "Defendants' Exhibit No. 3," received in evidence December 15, 1910, Page 31, and is attached hereto.

Examiner Boyle: Are there any further witnesses?

Mr. Zwiebold: I have no further witnesses.

Mr. Frazer: The tariff sheet reference and division sheets, that is all in.

Whereupon, at the hour of 3 o'clock on the 15th day of December, 1910, the hearing of the above entitled matter was closed.

4045 *The Blytheville, Leachville & Arkansas Southern Railroad Company.*

NEW ORLEANS, LOUISIANA,
December 15th, 1910—3 p. m.

Examiner Boyle: We will now take up the matter of the Blytheville, Leachville & Arkansas Southern Railroad Company; are you ready?

Mr. McClelland: Yes, sir.

R. L. MCCLELLAND was called as a witness, and having been duly sworn testified as follows:

Direct examination:

Examiner Boyle: What is your name, residence, and official connection with this road?

Mr. McClelland: R. L. McClelland, Chicago, Illinois, Traffic Manager of the Blytheville, Leachville & Arkansas Southern Railroad Company.

Examiner Boyle: How long have you been so?

Mr. McClelland: Ever since it was organized.

Examiner Boyle: Just where does this particular railroad lie?

Mr. McClelland: In Craighead County, Mississippi
4046 County, Arkansas, and Dunklin County, Missouri.

Examiner Boyle: How long is it?

Mr. McClelland: Very close to fifty-two miles; fifty-one and a fraction miles.

Examiner Boyle: What main lines of railroads do you strike?

Mr. McClelland: We have three junction points.

Examiner Boyle: Where?

Mr. McClelland: At Leachville, Arkansas, we connect with the Frisco, and the Jonesborough, Lake City & Eastern Railroad; and at Jonesborough, with the Paragould Southeastern Railroad, which is a part of the Cotton Belt Line, and at Blytheville, with the St. Louis & San Francisco Railroad.

Examiner Boyle: What is that line of railroad at Leachville—at Albard?

Mr. McClelland: That is the Frisco.

Examiner Boyle: Does your road operate over that?

Mr. McClelland: We do.

Examiner Boyle: Do you lease that line?

Mr. McClelland: We have a trackage privilege.

Mr. Gutheim: You said you had connection with the Frisco, and the Jonesborough, Lake City & Eastern Railroad, at what
4047 point?

Mr. McClelland: At Leachville; yes, sir. At this point, Mr. Examiner, if it is your pleasure, I could facilitate this hearing by giving the history of this company from the organization down to the present time.

Examiner Boyle: That is what we are after.

Mr. McClelland: Well, you can follow it from there. The Blytheville, Leachville & Arkansas Southern Railroad Company was incorporated in May, 1908, under the laws of the State of Arkansas as a common carrier. The capital stock is two hundred and fifty thousand dollars, of which one hundred and fifty thousand two hundred dollars was paid in, in cash. Shortly after this railroad was organized they purchased from the Chicago Mill & Lumber Company certain railroad properties in Mississippi County, Arkansas, together with the railroad equipment owned at that time by the Chicago Mill & Lumber Company.

The consideration of this purchase was one hundred and fifty thousand dollars, of which one hundred and twenty-six thousand dollars was right-of-way, rails and fastenings, and the balance was to cover the purchase of personal property, rolling stock, engines,
4048 water tanks, etc.

The Chicago Mill & Lumber Company immediately ceased to operate any part of this railroad, and as I recall now, on June 27th, 1908, the railroad company started operations.

We have a line extending from Blytheville, Arkansas, in Mis-

sissippi County, to Glenco, and Littleton, Arkansas, that is a distance of approximately two and one-half miles from Glenco.

We have a line extending to a point called Chickasawba, Arkansas, where we connect with the Paragould Southeastern Railroad, which is really a branch of the Cotton Belt system.

We have a branch road from the Paragould Southeastern Railroad to Arbyrd, Missouri, and from Arbyrd, Missouri, we have trackage rights to Leachville, Arkansas, over the Frisco system. At that point we connect with our own line, which extends in a general southern direction, a distance of about twenty miles, due south, and a trifle west.

We have joint through rates and through routes in connection with the Frisco system at Blytheville; with the Paragould
4049 Southeastern Railroad at Chickasawba, and with the Frisco system at Leachville, Arkansas.

The divisions allowed our company on division "C" as provided in through tariffs, is two cents per 100 pounds.

On all traffic we have milling in transit rates on our line. All of our rough material is brought into the milling point on local interstate rates, covered by tariff duly filed with the Interstate Commerce Commission. The receiver of the raw material can ship the manufactured product over any line that he may desire; there is no restriction whatever, with the exception of one producing point on our line, all of our stations are competitors with the Jonesborough, Lake City & Eastern Railroad, a short line independent road, but a line which has never been considered by the Commission as being a tap line or having any lumber affiliations.

Out of the divisions which we receive from the Frisco system, and the Paragould Southeastern Railroad which are the same as the divisions which are allowed to the Jonesborough, Lake City & East-
ern Railroad for performing the same identical service as
4050 we do in point of mileage and everything else.

We also have filed with the Railroad Commission of Arkansas, Arkansas local tariffs, covering purely State business which moves from points in Arkansas to points in Arkansas, involving intra-State movement.

We now have passenger service installed, which was inaugurated from Leachville to all points south of our line. We have four trains per day with passenger service, and the equipment which we utilize in giving this service, is gasoline motors, with passenger coach as a trailer. The passenger business that we now have is very limited, but we were compelled to inaugurate this service, due to the fact that we had been advised unofficially by the Arkansas Railroad Commission, that complaints had been filed, and that some action on our part was necessary.

Our trains at Leachville connect with the Frisco system passenger trains at that point, and also with the Jonesborough, Lake City & Eastern Railroad passenger trains.

Our company has complied, ever since its incorporation with all the provisions of the Interstate Commission, or orders of the
4051 Commission in reference to accounting, in reference to safety appliances, and in reference to hours of labor.

We have always been compelled to comply with the Arkansas law relative to equipping our locomotives with electric headlights, and various other features which they insist upon.

We have exercised the right of eminent domain in one instance only. Our line owns its own right-of-way, much of which has been purchased at a very high price, especially in and about the town of Blytheville, Arkansas.

We have fifteen stations on our line, beginning at Blytheville, Chickasawba, Glenco, Littleton, Leachville, Clearwater, Springfield, Orr, Wallace, Rockey, Hancock, Wiedeman, Lepanto Junction, and Shaw. All of which towns we serve.

The population of the city of Blytheville is five thousand. There are a number of industries—lumber industries in the town, among which are the American Handle Company, the Cord-Morrow Package Manufacturing Company, and the Blytheville Lumber Company.

Examiner Boyle: You say you serve Lepanto?

4052 Mr. McClelland: Lepanto Junction.

Examiner Boyle: Do you serve Lepanto?

Mr. McClelland: Lepanto Junction; Lepanto is further south.

Examiner Boyle: You have not completed your line to Lepanto?

Mr. McClelland: That is eighteen miles south. At Blytheville we now serve these industries which I have just named.

Our line does not reach these industries *along;* the foreign lines, the Frisco, Cotton Belt and Jonesborough, Lake City & Eastern, can perform such service, and switch deliver to us.

The so-called community of interest in this case—the Chicago Mill & Lumber Company have no ownership, and are not represented in any way in any of these industries which I have named.

Examiner Boyle: State where the Chicago Mill & Lumber Company is located.

Mr. McClelland: At Glenco, Arkansas.

Examiner Boyle: And that is where there is a switch?

Mr. McClelland: No, sir, not yet. At Chickasawba we

4053 do not serve any of the industries, because there are none.

At Glenco, we serve a population of about two hundred, and that is the point where the Chicago Mill & Lumber Company's plant is located. At Littleton, we serve approximate- one hundred and fifty people, and at that point is located the mill of the Little Lumber Company, and the storage yards of the E. Sondheimer Lumber Company. We have no interest whatever in any form or fashion with the E. Sondheimer Lumber Company and the Little Lumber Company. In fact, they are competitors of the so-called community of interests,—the Chicago Mill & Lumber Company.

At Leachville, owing to our trackage contract which I will explain in detail later, we have no industries.

At Clearwater, the first station south of Leachville, or close to that point, we serve the plant of the P. B. Cowan Saw Mill Company. In this industry we have no interest whatever. I am speaking now of the community of interests.

Proceeding on down the line, the next industry that we reach,

is located at Shaw, Arkansas. It is the plant of the Chap-
4054 man-Dewey Lumber Company. The Chapman-Dewey Lumber Company owns very large holdings in and about the country through which we traverse, upwards of sixty thousand acres of land.

The Chicago Mill & Lumber Company,—our so-called community of interest,—owns approximately fifty thousand acres of land, which can be served by this railroad.

In addition to these two owners, whom I have mentioned, the Boynton Land & Lumber Company also owns large tracts of land; and various other small holders whom I cannot now recall.

The community of interest is in no way connected with the Chapman-Dewey Lumber Company, nor with the Boynton Lumber Company, in fact they are competitors of the community of interest.

It is our intention to construct our line to the point which is now marked on the map called Truman. At Truman there is now being constructed a very large veneer and saw mill plant, which is owned by the same interests which owns the Singer Manufacturing Company—in other words, the Singer Sewing — Manufacturing Company. I do not recall the name under which they are
4055 operating.

At Truman, most of the material which will be manufactured in this plant at Truman, is for their manufactury at Cairo, Illinois.

The interest of the Chapman-Dewey Company in this semi-raw material to Cairo, the Frisco Railroad con not serve the Singer's interests in this particular traffic, for the reason that they have no line to Cairo, and the nearest point which they reach to Cairo, is Thebes, Illinois, and the lines extending from Thebes to Cairo demand an arbitrary of three cents from Thebes, that, under ordinary conditions being the Ohio crossing rate, which is the same as Cairo; consequently the tonnage which we will soon be able to avail ourselves of after extending the line, can be carried by our line up to Poinsett, Craighead County, Arkansas, where it will be delivered to the Paragould Southeastern; this is part of the Cotton Belt system, and it can be built direct to Cairo, their line extending to that point, at a lesser rate than the Frisco can possibly carry it.

The line when first taken over by the Railroad Company, that is after it was purchased from the Chicago Mill & Lumber Com-
4056 pany consisted of the following pieces of track; there was about ten miles of track and right-of-way extending due south and west on the Jonesborough Lake City & Eastern Railroad, called Big Lake, Arkansas; this line of track extended a distance of a little over ten miles. They also had a piece of track extending due south from Leachville, extending a distance of about five miles. They also had a piece of track extending from Glenco, Arkansas, to Blytheville, altogether approximating seventeen or eighteen miles.

The track which was purchased, and the right-of-way which was purchased on the line extending south and west from Big Lake has since been abandoned. In fact it was the purpose of the railroad company immediately after purchasing the same, to take it up

and utilize it elsewhere, and there was a provision in the deed of transfer, which provided, that we were to secure—the railroad company was to secure the same area of right-of-way as had been deeded to us on this Big Lake line; that has all bee taken up and abandoned, and the property reverted back to its original owner, and we have used the rail in extending our own line.

Our line is constructed practically, of fifty-six pound
4057 steel.

Our line is equipped with five locomotives, one Baldwin consolidated, 65-ton locomotive, three Rod engines of approximately thirty tons each, and one Shay improved engine of approximately forty tons; also one switch engine; we also have eighty——

Examiner Boyle: That makes six locomotives?

Mr. McClelland: We have got six—only five in commission, one is abandoned; it is beyond repair. I would like to make that correction.

We have eighty-six flat cars—standard flats, two caboose cars, one box car and two coal cars.

The Examiner will please note on the map that on all business which we handle from points south of Leachville to Glenco, Littleton, Chickasawba, and Blytheville, that we perform a distinctly interstate service, from point of actual physical construction, and as I have previously explained, that movement is provided for by local Interstate tariff duly filed with the Interstate Commerce Commission.

At Glenco, we have a railroad track scale,—a standard Fair-
4058 bank track scales, and we are members of the Western Railway Weighing & Inspection Bureau, and have a duly sworn weigh master at that point, where all business destined to interstate points—and where all traffic destined to interstate points via the Paragould Southeastern Railroad, or Chickasawba, via the Frisco, or Blytheville is weighed.

At Leachville, we have no track scale, and the Frisco system performs the service of weighing. Corrections issued as is customary between connecting carriers.

I would like to have the privilege of filing later as an exhibit, a statement showing the community of interest tonnage, and the outside tonnage etc. I have got figures here in the rough, but I want the figures to be absolutely correct—we will furnish that later.

Examiner Boyle: That would have been asked for anyhow, and you will have that privilege.

Mr. McClelland: For the ten months from January 1st, 1910 to October 31st, 1910, the community of interest tonnage was 96.60
per cent, and the outside tonnage 3.40 per cent.

4059 During the last ten months our outside tonnage in which we have no interest whatever has increased over the corresponding last year over 131 per cent, or at the rate of 157 per cent per annum.

This large increase is explained in this wise: When our line was first constructed, we did not reach the foreign tonnage producing port which we had in view when the railroad was incorporated; since that time, and particularly so during the last year, we have extended our road approximately sixteen miles.

Our line south of Leachville is built, or rather constructed on the line of survey which was originally made by the Frisco system.

You will note from the map that Leadville is the terminus of the Frisco system, and the Frisco system branches stop at Leachville, Arkansas.

The purpose at the time the Frisco made this survey, at my own solicitation, — to connect up their line from Leachville to Lepanto, Arkansas,which is shown on the map. Lepanto, Arkansas, is on what used to be known as the Tyronza & Central Railroad, which is now part of the Frisco system. The Frisco system before
4060 making this survey, sent parties out, who made a very careful investigation of the territory over which this line was proposed to be built and their reports were so flattering as to prospective tonnage, that they immediately had a survey made of the line, and an estimate of the cost was made. The Frisco system up to this time fully intended to construct this line, but financial conditions came about, which made it impossible for them to raise the money so to do.

We received, as I have previously stated, two cents per 100 pounds as a division of the through rate on lumber and forest products, from all our connections, with the exception of the Jonesborough, Lake City & Eastern Railroad. This line finds it impossible to make a similar arrangement with us, for the simple reason that they were allowed by the Trunk lines the same divisions as we ourselves received.

Our line in handling the manufactured products through the interchange at Leachville, Arkansas, with the Frisco system, performs actual service on the manufactured product of approximately twenty miles.

At Blytheville our line performs a service of almost two
4061 and one half miles, and at Chickasawba a service of one and one-half miles; at Littleton, a service of approximately two miles, which we feel is compensation only commensurate with the service that we actually perform on the community shipments.

That is all, Mr. Examiner.

Mr. Gutheim: The mill of the Chicago Mill & Lumber Company is at Chickasawba?

Mr. McClellan: No, sir.

Mr. Gutheim: Where is it located?

Mr. McClellan: At Glenco, Arkansas.

Mr. Gutheim: How much difference is there, geographically speaking, between Chickasawba and Glenco?

Mr. McClellan: About one and one-half miles; that is Chickasawba on our road is over the route that we must travel in order to deliver the business to the Paragould Southeastern Railroad at Chickasawba.

Mr. Gutheim: Our record shows that the whole trackage of this road, in and about Glenco, Littleton, Chickasawba and Blytheville, is one and a half miles.

Mr. McClelland: That is incorrect.

Mr. Gutheim: What is the actual mileage?

4062 Mr. McClelland: I think I gave you that out of my mind, but I wil give it to you absolutely correct. Glenco is 4,661 feet, and Blytheville, 4,911 feet.

Mr. Gutheim: That is the total trackage in feet in and about that point?

Mr. McClelland: That makes it a little over two and one half miles?

Mr. Gutheim: No, is not 9,572 feet but one and three-quarter miles?

Mr. McClelland: I didn't say 9,572 feet?

Mr. Gutheim: You said 4,661 feet, and 4,911 feet.

Mr. McClelland: I beg your pardon, you are right; this two and one-half mileage—I didn't just catch you.

Mr. Gutheim: 4,661 refers to the mileage sheet?

Mr. McClellan: No, sir, to the mile.

Mr. Gutheim: 46.61 miles, is that it?

Mr. McClelland: No, sir. That distance is 2.51 miles.

Mr. Gutheim: You mean taking the difference between the mile posts?

Mr. McClelland: Certainly so.

4063 Mr. Gutheim: Now, from Chickasawba you go over the Paragould Southeastern Railroad to Arbyrd—the Paragould Southeastern or Cotton Belt proper?

Mr. McClelland: Yes, sir.

Mr. Gutheim: You have a contract providing for your traffic rights, have you?

Mr. McClellan: Yes, sir.

Mr. Gutheim: Will you file a copy of that with the Interstate Commerce Commission?

Mr. Coleman: We now tender the contract, as evidence, which is a joint contract with both lines, and may be introduced for both parties.

Examiner Boyle: By both lines, you mean the Paragould Southeastern Railroad and the Frisco system?

Mr. McClelland: Yes, sir; it is a tri-party agreement.

Examiner Boyle: It will be received and filed.

The agreement so offered and identified, was received in evidence and thereupon marked "Defendants' Exhibit A-1," received in evidence December 15th 1910, page 19, and is attached hereto.

Examiner Boyle: Then from Arbyrd, you go south from Leachville on the Frisco system?

4064 Mr. McClellan: Yes, sir.

Mr. Gutheim: That is covered by this same package contract?

Mr. McClellan: Yes, sir.

Mr Gutheim: The Frisco gets into Blytheville by an entirely different line does it not?

Mr. McClellan: It does, sir.

Mr. Gutheim: The manufactured product of the Glenco mill is delivered largely to the Frisco system at Leachville?

Mr. McClellan: No, sir.

Mr. Gutheim: It is all delivered at Blytheville?

Mr. McClellan: Yes, sir.

Mr. Gutheim: Where you have a two and one-half mile haul?

Mr. McClellan: Yes, sir, on the business now for the Frisco.

Mr. Gutheim: Where do you make deliveries to the Cotton Belt?

Mr. McClellan: At Chickasawba.

Mr. Gutheim: How much of a haul is it from the Glenco mill to Chickasawba?

Mr. McClellan: Approximately one and one-half miles—
4065 very close to it.

Mr. Gutheim: Now, you are familiar with this tri-party contract?

Mr. McClellan: Yes, sir.

Mr. Gutheim: Does that contract permit you to take any local business off of the Paragould Southeastern Railroad on the Blytheville, Leachville & Arkansas & Southern Railroad Company?

Mr. McClellan: Most assuredly not, sir.

Mr. Gutheim: It does not permit you to take any local business off the Frisco from Arbyrd and the Frisco?

Mr. McClellan: No, sir.

Mr. Gutheim: So, when you speak of business going over that line south of Blytheville, you refer entirely to what originates on your line south of Leachville?

Mr. McClelland: I do, sir.

Mr. Gutheim: That is your own line?

Mr. McClellan: It is, sir.

Mr. Gutheim: How much trackage do you own in and about Glenco; that is not used within the limits of your mill proper, or is not used to get the products of your mill to the Frisco system, or the Jonesborough, Lake City & Eastern?

4066 Mr. McClellan: The whole, sir?

Mr. Gutheim: Well, primarily——

Mr. McClellan: Well, of course within the plant limits——

Mr. Gutheim: Particularly the part of the track used as plant facilities?

Mr. McClelland: Why, I should say offhand possibly five or six hundred feet.

Mr. Gutheim: How large a mill is it; what is the capacity; what is its capacity?

Mr. McClelland: It is a large mill with a capacity of sixty-five thousand, to seventy-five thousand feet per day.

Mr. Gutheim: And it has only about five or six hundred feet of track to serve it?

Mr. McClelland: I did not say so, sir.

Mr. Gutheim: You said that was the track used exclusively for mill service?

Mr. McClellan: It is not used exclusively for that service.

Mr. Gutheim: How much is used primarily for the mill in addition to the five hundred or six hundred feet so used exclusively?

4067 Mr. McClellan: I should double it, sir.

Mr. Gutheim: Blytheville, you stated, was a town of about five thousand people?

Mr. McClellan: Yes, sir.

Mr. Gutheim: Do you have any connection with any other industries in Blytheville?

Mr. McClellan: No, sir.

Mr. Gutheim: Does the Frisco, under the package contract permit you to do any business in Blytheville?

Mr. McClellan: There is no such provision in the contract one way or the other.

Mr. Gutheim: Do you, as a matter of fact, take any business out of Blytheville, that is not going to some local point on your line?

Mr. McClellan: Up to the present time we have taken very little, if any.

Mr. Gutheim: Now, does this trackage arrangement with the Paragould Southeastern Railroad and the Frisco system, permit you to haul anything but logs?

Mr. McClellan: Yes, sir.

Mr. Gutheim: But nothing except what is handled south of Leachville?

Mr. McClellan: It does not so provide, and I can state very quickly if the Examiner desires, just what that provision

4068 is.

Mr. Gutheim: We can pass that; it is in the contract. Now, does the Cotton Belt R-ilroad get into your mill and load direct at Glenco?

Mr. McClellan: No, sir.

Mr. Gutheim: All of the tracks by which any other carrier can get into your mill at Glenco are owned by your own road?

Mr. McClellan: No, sir.

Mr. Gutheim: What other carrier gets in on its own tracks?

Mr. McClellan: The Jonesborough, Lake City and Eastern Railroad.

Mr. Gutheim. Does it get any of the business?

Mr. McClellan: Yes, sir.

Mr. Gutheim: Even the other carriers in order to get that business, they all give the Jonesborough, Lake City & Eastern Railroad a division, as well as give you a division also?

Mr. McClelland: That is not so, sir.

Mr. Gutheim: How much business did you send out over the Jonesborough, Lake City & Eastern Railroad during last year?

4069 Mr. McClelland: The Chicago Mill & Lumber Company to whom I presume you refer——

Mr. Gutheim: Yes.

Mr. McClelland: It shipped out approximately three hundred or four hundred cars over that road.

Mr. Gutheim: This Frisco line from Arbyrd down to Leachville—where does the Frisco line go from Leachville?

Mr. McClelland: Nowhere; it stops there.

Mr. Gutheim: Where do they go from Arbyrd?

Mr. McClelland: From Arbyrd, their line extends up into Missouri.

Mr. Gutheim: Over the joint track?

Mr. McClelland: I do not understand the question, Mr. Examiner.

Mr. Gutheim: Over the joint track, or does it go up here in this direction; there is no division on the map.

Mr. McClelland: Their line extends directly north.

Mr. Gutheim: It is projected on the map?

Mr. McClelland: Yes, sir——

Mr. Gutheim: This Chapman-Dewey Lumber Company, is a Kansas City concern?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Is not part of their land cut over?

Mr. McClelland: Very little of it, sir.

4070 Mr. Gutheim: Are they not trying to dispose of their entire lands, because they don't want to cut any more timber out down there?

Mr. McClelland: No, sir.

Mr. Gutheim: Now, was this Paragould Southeastern Railroad ever owned by the Chicago, Mill & Lumber Company?

Mr. McClelland: No, sir, it used to be owned by a Mr. Hasty.

Mr. Gutheim: Was it not owned by a predecessor of the Chicago Mill & Lumber Company?

Mr. McClelland: No, sir.

Mr. Gutheim: Was the line from Leachville south constructed by the Chicago Mill & Lumber Company originally?

Mr. McClelland: They had about five miles which has since been re-built since we took over the track .

Mr. Gutheim: And at that time was the Frisco in that country between Arbyrd and Leachville?

Mr. McClelland: At that time, they were.

Mr. Gutheim: And from the very start the Chicago Mill & Lumber Company began logging over the Frisco system and the Paragould Southeastern system to Glenco?

Mr. McClelland: No, sir.

Mr. Gutheim: How did they get their logs to Glenco.

4071 Mr. McClelland: The logs moved previous to the construction of our road, the incorporation of it, via the Jonesborough, Lake City & Eastern Railroad.

Mr. Gutheim: But it was never owned by the Chicago Mill & Lumber Company?

Mr. McClelland: No, sir.

Mr. Gutheim: And never controlled in any way by them?

Mr. McClelland: We loaned them fifty thousand dollars, and had very hard work getting it back.

Mr. Gutheim: Didn't you ever have any stock in that concern?

Mr. McClelland: We had one share.

Mr. Gutheim: At the present time, what is the total owned mileage of your company?

Mr. McClelland: Almost twenty-two miles.

Mr. Gutheim: That is the owned mileage?

Mr. McClelland: Yes, sir.

Mr. Gutheim: And your outstanding stock is, $157,700.00?

Mr. McClelland: Yes, sir.

Mr. Gutheim: And the amount that is due the Chicago Mill & Lumber Company in bonds, was $150,000.00?

Mr. McClelland: I have said nothing of that kind, sir.

4072 Mr. Gutheim: What was it you said whereby there was $126,000.00 used for right-of-way, and $124,000.00 issued for equipment on the same?

Mr. McClelland: That is incorrect in toto; I never made such a statement.

Mr. Gutheim: I have the figures which I put down.

Mr. McClelland: I can explain that if you will permit me.

Mr. Gutheim: All right.

Mr. McClelland: The capital stock was $250,000.00, of which $150,700.00 was paid in cash; we purchased the railroad company—purchased it from the Chicago Mill & Lumber Company for $126,000.00—well, I was a little bit wrong, the company paid for the right-of-way, and the rails, track, and fastenings, $127,360.09, for which a deed was issued by the Chicago Mill & Lumber Company. In addition to that they paid the difference between that amount $150,000.00 for the personal property consisting of locomotives, water tanks, cars, and various other railroad equipment.

Mr. Gutheim: Then, what is the total outstanding indebtedness at the present time?

Mr. McClelland: To whom?

Mr. Gutheim: Of the company—of the railroad company.

4073 Mr. McClelland: I could not give that, except in round figures. I presume we probably owe thirty thousand or forty thousand dollars.

Mr. Gutheim: Let us know the term of the indebtedness; is it bonds?

Mr. McClelland: There is no bonds outstanding.

Mr. Gutheim: You said the outstanding stock is one hundred and fifty thousand dollars?

Mr. McClelland: I do not understand you; you say outstanding; I don't get you.

Mr. Gutheim: What I mean by outstanding——

Mr. McClelland: That has been sold?

Mr. Gutheim: That is the question identically, the stock that is outstanding?

Mr. McClelland: That is one hundred and fifty thousand seven hundred dollars, outstanding.

Mr. Gutheim: Am I correct in the figure of twenty-two miles of railroad which you own?

Mr. McClelland: Yes, sir.

Mr. Gutheim: What I am getting at now is just what you have

charged to the cost and construction on that twenty-two miles of road?

Mr. McClelland: I cannot give you that exactly, sir—I
4074 can give it to you, the total cost of new equipment and every appurtenance necessary for the operation of the road, $252,-884.74.

Mr. Gutheim: Then, how was the difference between that figure and the stock that was issued, financed?

Mr. McClelland: We have earned during the first year ending June 30, 1909, which was our first fiscal year according to the Interstate Commerce Commission's rule—our net earnings were $13,-149.00 and covering the period for the year ending June 30th 1910, the net corporate earnings were $18,961.00.

Mr. Gutheim: Now, let us get back to the other question. I want to find out how the difference between the $252,000 expended for the cost of the road, equipment and capital stock outstanding was financed?

Mr. McClelland: The money was borrowed from the bank.

Mr. Gutheim: That is what I want to know.

Mr. McClelland: You never asked the question before.

Mr. Gutheim: I beg your pardon; what bank was the money borrowed from?

Mr. McClelland: I could not give the name of the bank; it was a St. Louis bank where we keep *out* bank. I can, if necessary, furnish the name if it is desired.

4075 Mr. Gutheim: Do you know who was on the paper, besides the railroad?

Mr. McClelland: No, sir, I do not know who was on the paper.

Mr. Gutheim: Does not the Chicago Mill & Lumber Company figure on the paper in any way?

Mr. McClelland: Not to my knowledge; I am quite sure they did not, sir.

Mr. Gutheim: To what extent are the officials of the Chicago Mill & Lumber Company, connected with the railroad company at the present time?

Mr. McClelland: As far as stockholders are concerned?

Mr. Gutheim: To what extent are the officials of the Chicago Mill & Lumber Company connected with the railroad as officials?

Mr. McClelland: Mr. Whitman, the vice-president of the Chicago Mill & Lumber Company is president of the railroad. Mr. A. C. Lange, the secretary of the railroad company is general superintendent of the Chicago Mill & Lumber Company; I think that is all of the officers that are officers of the other company.

4076 Mr. Gutheim: I believe in your general statement you spoke of the community of interest referring to the Chicago Mill & Lumber Company?

Mr. McClelland: Yes, sir.

Mr. Gutheim: You are expected to file a statement showing the extent of the stock holdings in the railroad by the Chicago Mill & Lumber Company?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Well, that is as definitely as you can put to what extent is the interest of the Chicago Mill & Lumber Company in the Blytheville, Leachville, Arkansas & Southern Railroad Company?

Mr. McClelland: I could not advise you definitely sir, as to that—as to the identity of interest in both companies, as far as stockholders are concerned, but we can and will furnish a statement showing the exact status of the stock holdings—each one of the stockholders in the railroad, as compared with the stockholders in the Chicago Mill & Lumber Company. We do not deny the community of interest in any of its features.

Mr. Gutheim: One point I want to be sure about. Does any other mill company, as such own any — the stock?

4077 Mr. McClelland: No, sir.

Mr. Gutheim: Your track is all standard gauge is it not?

Mr. McClelland: Yes, sir.

Mr. Gutheim: You mentioned the weight of the rail. Is it ballasted with anything other than the ordinary ballast of that country?

Mr. McClelland: Sand.

Mr. Gutheim: I take it from your map that it is a pretty wet country; that you have a number of bridges?

Mr. McClelland: Yes, we have a number of bridges and trestles.

Mr. Gutheim: This proposed extension that you are building down here seems to go into what is known as "the Sunk Lands"? Is that being put down as a permanent railroad in The Sunk Lands?

Mr. McClelland: The road does not go into the Sunk Lands.

Mr. Gutheim: It goes over very nearly in that water section.

Mr. McClellan: It is just on the other side of the so-called Sunk Lands, to the west; a very thickly timbered country, as well

4078 as an agricultural country, way above water level.

Mr. Gutheim: Is your line being put down from Lepanto south, upon a permanent basis?

Mr. McClellan: At Lepanto Junction?

Mr. Gutheim: Yes.

Mr. McClelland: Yes, sir.

Mr. Gutheim: You have no—that is, save the Chicago Mill & Lumber Company, you have no mill operation of any sort at Leachville?

Mr. McClelland: No, sir, absolutely none.

Mr. Gutheim: At Springfield or Clearwater?

Mr. McClelland: No, sir.

Mr. Gutheim: At Orr?

Mr. McClelland: No, sir.

Mr. Gutheim: At no other point down to Lepanto Junction?

Mr. McClelland: No, sir.

Mr. Gutheim: What kind of a country was that before you went in there; was it settled?

Mr. McClelland: No, sir, the country as far fown on the line as you have gone, was not settled; there is a very large settlement

however—an old settlement called Clinton settlement along the St. Francis River, which has been there for many years.

4079 Mr. Gutheim: That is down almost to Lepanto?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Now, there are seven settlements between Leachville and Lepanto?

Mr. McClelland: Yes, sir.

Mr. Gutheim: And that was an unsettled country before the railroad went down there?

Mr. McClelland: Yes, sir.

Mr. Gutheim: What is the nature of those communities at the present time. What population is there at Clearwater?

Mr. McClelland: It is a very small hamlet of about thirty or forty people.

Mr. Gutheim: Is it the remains of a logging community?

Mr. McClelland: A logging community was originally there, yes, sir.

Mr. Gutheim: How about Springfield?

Mr. McClelland: Just the same.

Mr. Gutheim: How about Orr?

Mr. McClelland: The same.

Mr. Gutheim: How about Walters?

Mr. McClelland: The same.

4080 Mr. Gutheim: How about Rockey?

Mr. McClelland: The same.

Mr. Gutheim: How about Hancock?

Mr. McClelland: About one hundred people there.

Mr. Gutheim: Is that the remains of a logging community also?

Mr. McClelland: Why, a logging community was there, yes, sir.

Mr. Gutheim: And how about Weideman?

Mr. McClelland: The same.

Mr. Gutheim: Lapanto Junction is the present situation that you are logging at?

Mr. McClelland: No, sir.

Mr. Gutheim: What is the present situation at Lepanto Junction?

Mr. McClelland: That is the present situation of the Chaoman-Dewey Saw Mill; all of the employees of the saw mill live in and about there; there is also quite a large agricultural community which gets into Shaw.

Mr. Gutheim: There is not very much population along that line from Leachville to Lepanto Junction all told?

4081 Mr. McClelland: I should say not to exceed three to four thousand, sir.

Mr. Gutheim: Three or four thousand in the community there that are the remains of logging communities?

Mr. McClelland: I didn't say that.

Mr. Gutheim: I asked about the various communities; I spoke along the country that you went through?

Mr. McClelland: I wish to strike out the answer because I misunderstood you. No, that is the general population, about as given to you.

Mr. Gutheim: Then there are no industries in those towns that

could produce any outbound traffic, except what is incidental to such communities?

Mr. McClelland: Why, yes; the Standard Basket & Veneer Manufacturing Company of Cape Girardeau, Missouri, bring out timber along that line.

Mr. Gutheim: Is that manufactured along your line, or does it go to Cape Girardeau?

Mr. McClelland: Absolutely the raw material is handled at Leachville, and shipped out as lumber.

Mr. Gutheim: Does the Chapman-Dewey Lumber Company's product go out over your line?

Mr. McClelland: It does, sir.

4082 Mr. Gutheim: You spoke I believe of a very large increase one hundred and thirty-one per cent in ten months, and one hundred and fifty seven per cent for the year?

Mr. McClelland: Yes.

Mr. Gutheim: In the last year's business from provisions hauled for the general public.

Mr. McClelland: Yes, sir.

Mr. Gutheim: On a tonnage basis about how much would that make in the general public business?

Mr. McClelland: That would bring up the outside tonnage to about 21,000,000 pounds.

Mr. Gutheim: To twenty-one million pounds?

Mr. McClelland: Yes; I think that would be about the increase; that increase of one hundred and fifty-seven per cent, as I presume it will be.

Mr. Gutheim: Our record to June 30, 1909 shows, that out of 5,607 carloads, four-tenths of one per cent was handled for the general public, and out of a total revenue of $43,040.40, forty-two thousand four hundred and nine, ninety-six dollars was on traffic furnished by the Chicago Lumber Company.

Mr. McClelland: That is undoubtedly true sir, at that time.

4083 Mr. Gutheim: So that the difference has all come up in your estimation, out of the extension of the line from Leachville?

Mr. McClelland: And the location of the E. Sondheimer Lumber Company at Littleton, and the securing by our company of the tonnage of the Little Lumber Company.

Mr. Gutheim: Does the E. Sondheimer Lumber Company have the Jonesborough Lake City & Eastern Railroad outlet?

Mr. McClelland: They do, sir.

Mr. Gutheim: How long has it been at Littleton?

Mr. McClelland: Why, they have purchased, and had also shipped in,—purchased a great deal of lumber; the Little Lumber Company manufactured it at Littleton; it has a yard there, and they make direct shipments to the mill from Littleton.

Mr. Gutheim: How long has it been at Littleton? That is, with the Jonesborough Lake City & Eastern connection.

Mr. McClelland: I should say that their first location there was about the middle of July, or the first half of July, of this year.

Mr. Gutheim: But I understood you to say they had been there for some time?

4084 Mr. McClelland: The Little Lumber Company people have.

Mr. Gutheim: Does the Jonesborough Lake City & Eastern Railroad get any traffic whatever from the E. Sondheimer & Company?

Mr. McClelland: The E. Sondheimer Company is not a mill.

Mr. Gutheim: What is it?

Mr. McClelland: It buys principally from the Little Lumber Company, and also ships a little in there; he is not a mill, he is a distributor; I did not answer your question very well in my answer.

Mr. Gutheim: Very well, go ahead.

Mr. McClelland: The Santa Fe Railroad was unable to furnish cars, and that has been very frequent of late; and the Jonesborough Lake City & Eastern could not furnish cars so they could get the business over the roads; they can reach it the same as ourselves.

Mr. Gutheim: Now, are the card distances that are mentioned on this tariff providing for traffic rights on which the compensation is based, the actual distances or arbitrary distances, assumed for the purposes of the contract?

4085 Mr. McClelland: I don't think a survey was made, but they are the distances according to the mile post and time table; they are supposed to be accurate.

Mr. Gutheim: And part of the consideration for the use of the tracks by those two companies—did you make any arrangement as to the division of the tonnage?

Mr. McClelland: The contract has a provision whereby we are to divide in so far as we can, the local tonnage which originates on our line destined to points on their lines, equally between the cotton belt—or the Paragould Southeastern, and the Frisco systems.

Mr. Gutheim: Now, you pay fifty cents per mile on your trackage right, do you not?

Mr. McClelland: Yes, sir.

Mr. Gutheim: I suppose you carry some business for the general public and get a revenue on it; does that revenue stay in your treasury entirely, or part given for consideration of your trackage rights, to those two companies?

Mr. McClelland: We were forced to enter into a contract with them to give up ninety per cent of the tonnage which originates on our line, and moves over their roads.

4086 Mr. Gutheim: You said ninety-five per cent of the tonnage?

Mr. McClelland: Ninety-five per cent of the gross revenue; pardon me.

Mr. Gutheim: When you take the E. Sondheimer Company's business out of Littleton, where do you deliver it to your connection?

Mr. McClelland: It depends on the way altogether how it is routed.

Mr. Gutheim: Do you take it to Leachville?

Mr. McClelland: No sir, we get——

Mr. Gutheim: Where do you take it?

Mr. McClelland: If it is routed via the Frisco we handle it via

Blytheville, and if it is routed via the Cotton Belt—The Paragould Southeastern Railroad, we handle it to Chickasawba.

Mr. Gutheim: Just how much goes out by the Cotton Belt—is there much?

Mr. McClelland: Why, it depends entirely on the market conditions and has been so for months.

Mr. Gutheim: Your revenue, as a matter of fact, the revenue which accrues, is on a switching service, on that business, is
4087 it not?

Mr. McClelland: No, sir.

Mr. Gutheim: If you have some business in Blytheville or Glenco that is going to Leachville or beyond, you take over that tonnage at the regular rate, how much revenue does your company get out of the rate; what percentage of the rate accrues to your company as revenue?

Mr. McClelland: On all freight which moves over the lines of the parties to the package contract, we must give them ninety-five per cent of the gross revenue.

Mr. Gutheim: So that, for the purpose of doing a little common carrier business, you are giving up ninety-five per cent of what you would ordinarily earn on ordinary or all other business on your line?

Mr. McClelland: Exactly so.

Mr. Gutheim: Does the Fris- system or the Paragoul- Southeastern Railroad perform any service over that line?

Mr. McClelland: Over our line?

Mr. Gutheim: No, over that joint track.

Mr. McClelland: They each involve a division of the serv-
4088 ice over it, and they are protecting their interests solely, when they insist upon that being made a part of the contract.

Mr. Gutheim: Well, that contract means you are prohibited from doing any business over there unless you want to do it for nothing.

Mr. McClelland: No, sir; we have connections with the Frisco at Leachville.

Mr. Gutheim: Well, the Frisco would not give you much business going to Leachville, if they can give it to you at Blytheville if it is originating around there.

Mr. McClelland: You misunderstood me; if we get a carload of live stock, or cotton, or anything of that sort, we can haul and deliver to the Frisco at Leachville; the volume of tonnage from Blytheville and south is very small.

Mr. Gutheim: But what I am getting at is this: the Frisco does not go south of Leachville?

Mr. McClelland: No, sir.

Mr. Gutheim: If you are going to take it to Blytheville and give it to the Frisco system at Leachville—are going to take it from Blytheville, Leachville, Chickasawba or from Arbyrd and
4089 Leachville, and there give it to the Frisco, the Frisco is going to have the pleasure of hauling it back to Arbyrd in order to get it out?

Mr. McClelland: What tonnage are you referring to?

Mr. Gutheim: I refer to tonnage—you say given to your road at Leachville and comes from Glenco?

Mr. McClelland: I said that our arrangement was such that we could deliver it that way; you can see for yourself that it would be utter folly to perform any such service.

Mr. Gutheim: That is the reason I wanted to have it, to find out what your company performs.

Mr. McClelland: The reason we have just an arrangement, and joint arrangement into Leachville, is to take care of the business which originates south of Leachville.

Mr. Swacker: Where is this Singer business going to originate, south of Leachville?

Mr. McClelland: Yes, sir.

Mr. Swacker: Now, supposing some of that wanted to move on the Cotton Belt, would you have to give up ninety-five per cent of that too?

4090 Mr. McClelland: No, sir.

Mr. Swacker: Why not?

Mr. McClelland: For the simple reason that that arrangement whereby we pay, it would all be billed through direct, and provides that on business originating on our line, destined to points on the other lines, that we shall receive our share; there is nothing in the contract which would in any way affect that.

Mr. Gutheim: Did you include in your general statement anything in reference to the number of men which you have out on the road?

Mr. McClelland: I do not believe I did, sir.

Mr. Gutheim: About how many road crews do you have?

Mr. McClelland: I can tell exactly; I can tell you what we have.

Mr. Gutheim: All right.

Mr. McClelland: About twenty-seven section men; three crews, as I recall it.

Mr. Gutheim: Have you any station employees?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Solely in your own service or joint?

4091 Mr. McClelland: At Leachville we have a joint agency with the Frisco, and with the Jonesborough Lake City and Eastern; at Glenco we have our own agent.

Mr. Gutheim: Have you any other agency

Mr. McClelland: No, no other agency.

Mr. Gutheim: The Leachville depot is a joint building?

Mr. McClelland: Yes, sir.

Mr. Gutheim: How about Glenco; do you have an agent there?

Mr. McClelland: Yes, sir.

Mr. Gutheim: That is at the freight depot?

Mr. McClelland: No, sir, we have a freight platform there, and the agent's office is in the building occupied by the Chicago Mill & Lumber Company, but it is boarded off entirely free from the mill office.

Mr. Gutheim: Is there anything in the line of stations buildings on the line between Leachville and Lepanto Junction.

Mr. McClelland: Nothing at all except platforms, and cinders and such.

Mr. Gutheim: And at Glenco is your employee, also an employee of the Chicago Mill & Lumber Company?

Mr. McClelland: I don't think so; I don't think he per-
4092 forms any service for the Lumber Company; it is possible though that he does.

Mr. Gutheim: You don't know whether his compensation is received from the Lumber Company?

Mr. McClelland: He is presumed to work entirely for the railroad company.

Mr. Gutheim: In your statement, did you say anything with reference to the train service?

Mr. McClelland: Yes, sir, I covered that, I believe.

Mr. Gutheim: Logging for the Chicago Mill & Lumber Company is now being performed south of Lepanto Junction entirely, is it not?

Mr. McClelland: No, sir.

Mr. Gutheim: Is it along the line between Leachville and Lepanto Junction?

Mr. McClelland: As far as our railroad is concerned, yes, sir.

Mr. Gutheim: Now, do you get logs in from other directions over your line?

Mr. McClelland: Yes, sir.

Mr. Gutheim: How about the spur operations connected with the line of this road; is that attended to and conducted by the
4093 Chicago Mill & Lumber Company

Mr. McClelland: We have no logging spurs whatever.

Mr. Gutheim: You log direct from your main line?

Mr. McClelland: No, sir; if you will allow me I will explain.

Mr. Gutheim: Go ahead.

Mr. McClelland: Where there are no spurs—we run those spurs out into the roads; we run spur sidings, which we place along the right-of-way of the railroad.

Mr. Gutheim: They just run off every thousand feet or so?

Mr. McClelland: No, every mile or two on the right of way to different extent—the siding does not extend off the right of way, and the mill company perform their own services with logging teams and contractors hauling the timber in as to all other shippers on our line.

Mr. Gutheim: So it is merely an industrial side-track parallel with your main line to hold the business?

Mr. McCleland: That is the idea.

Mr. Gutheim: The actual logging operations are done on vehicles which do not run on rails?

Mr. McClelland: Yes, sir.

Mr. Gutheim: So that the Chicago Mill & Lumber Company as such, is not operating any railroad property in this
4094 vicinity?

Mr. McClelland: With this exception, the Chicago Mill & Lumber Company as well as any other shipper of forest products on our line, have the privilege and do lease from us from time to time a switch engine to handle the log loader which belongs to the

Mill Company up and down the line, for which they pay a daily rental of fifteen dollars a day, which includes the engine crew etc. That is the only connection the Chicago Mill & Lumber Company has with the railroad.

Mr. Gutheim: The small operators of forest industries along the line, particularly in and about Glenco, do that to get in all their timber or raw material over the line of the Chicago Mill & Lumber Company?

Mr. McClelland: No, sir.

Mr. Gutheim: Do you handle any passenger service—was that in your statement?

Mr. McClelland: Yes, sir.

Mr. Gutheim: The United States mail also?

Mr. McClelland: No mail.

Mr. Gutheim: Any express?

Mr. McClelland: Yes; will you allow me to make a little
4095 explanatory note?

Mr. Gutheim: Yes.

Mr. McClelland: The express business is handled on the basis of less than carload freight rates, and taken care of in the motor cars.

Mr. Gutheim: Have you an express contract?

Mr. McClelland: No, sir, no express contract.

Mr. Gutheim: What is the division that you get in cents per one hundred pounds from your connections to whom you deliver fifty per cent of your traffic?

Mr. McClelland: Two cents per one hundred pounds.

Mr. Gutheim: That comes out of the junction point rate?

Mr. McClelland: Yes, sir.

Mr. Gutheim: How about the Chapman-Dewey Lumber Company's mill; what do they pay over and above the junction point rate?

Mr. McClelland: They pay the junction point rate at Leachville, sir.

Mr. Gutheim: Out of them you get the same two cents?

Mr. McClelland: Yes, sir.

Mr. Gutheim: In the case of the Chapman-Dewey Lumber
4096 Company, you perform a haul of some fifteen miles?

Mr. McClelland: Twenty miles.

Mr. Gutheim: Well, say twenty miles.

Mr. McClelland: Yes.

Mr. Gutheim: And you get the same two cents there that you get on the hauls from Glenco for the Chicago Mill & Lumber Company?

Mr. McClelland: Yes, sir.

Mr. Gutheim: What consideration or rate does the Chicago Mill & Lumber Company pay for the local lumber haul to the Glenco mill?

Mr. McClelland: That varies, sir; it is an interstate mileage tariff, which is used by all shippers on our line, and is graded from two cents upwards, according to the distance.

Mr. Gutheim: You mean all shippers of logs on your line?

Mr. McClelland: Yes, but it is a regular mileage tariff; classes and commodities are also provided for in the mileage tariff.

Mr. Gutheim: In your passenger business, do you handle it on regular tickets or on a cash fare basis?

4097 Mr. McClelland: We have only had passenger business——

Mr. Gutheim: You spoke of that.

Mr. McClelland: —for a very short time; I believe everything is in order, and tickets are being issued to my knowledge.

Mr. Gutheim: Your line publishes regular local tariffs and files them with the Commission?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Do not the Chapman-Dewey Lumber Company run an industrial railroad, unincorporated, that serves Lepanto Junction plant?

Mr. McClelland: They are at Shaw's.

Mr. Gutheim: That is their road shown in white on the map?

Mr. McClelland: They have no road whatever.

Mr. Gutheim: They did have a road?

Mr. McClelland: They never had a road, sir. The reason the road shows as it does, was that at that point we have all of our construction stuff located there on this siding, to take care of construction work; the Chapman-Dewey Lumber Company provide for their logging in the same manner as the Chicago Mill & Lumber Company does, by hauling two to three miles by team.

4098 Mr. Gutheim: Is your road being operated on a paying basis?

Mr. McClelland: Yes, sir.

Mr. Gutheim: Have you paid any dividends at all?

Mr. McClelland: No, sir.

Mr. Gutheim: The surplus has been handled in what way?

Mr. McClelland: It has gone into betterments.

Mr. Gutheim: Used in the construction of this road south of Leachville.

Mr. McClelland: Yes, sir.

Mr. Gutheim: Now you said that you had borrowed more or less money from a bank for the construction of your road also. Where did you get the rail for your road south of Leachville; at least for part of it that was built most recently?

Mr. McClelland: We purchased it sir, in the market, from any place we could.

Mr. Gutheim: It was relay rail?

Mr. McClelland: It was used rail, yes, sir.

Mr. Gutheim: Did it come from Cairo-Memphis South Railroad Transportation Company?

Mr. McClelland: No, sir.

4099 Mr. Swacker: You spoke of the Boynton Land & Lumber Company.

Mr. McClelland: Yes, sir.

Mr. Swacker: They have a private industrial road there, haven't they, not incorporated?

Mr. McClelland: They have a plant on our line, sir.

Mr. Swacker: They just bought on your line, is that the idea?

Mr. McClelland: They own stumpage and timber on our line; they have a plant as I understand it, at Paulding, Missouri; I know nothing about their operations.

Mr. Swacker: I suppose you know very little about the affairs of the Chicago Mill & Lumber Company also?

Mr. McClelland: Why, I know something of their affairs, yes.

Mr. Coleman: You say there are no milling in transit privileges on your line?

Mr. McClelland: No, sir.

Mr. Coleman: Are there any milling in transit privileges on that part of the Jonesborough Lake City & Eastern Railroad which competes with yours?

4100 Mr. McClelland: There are, certainly.

Mr. Coleman: Can you name the points at which those privileges are allowed by their tariff?

Mr. McClelland: Yes, sir, the privileges are allowed at all points providing the shipper wishes to take advantage of the milling in transit provision, and signs a contract guaranteeing that he will ship out-bound a certain percentage of the logs in-bound; that is covered by regular tariff. Certain percentages is prescribed.

Mr. Coleman: What is the western terminus of the Jonesborough Lake City & Eastern Railroad?

Mr. McClelland: Jonesborough, Arkansas.

Mr. Coleman: That is an old town, isn't it?

Mr. McClelland: Yes, sir.

Mr. Coleman: What connecting carriers connect with the Jonesborough, Lake City & Eastern Railroad at that point?

Mr. McClelland: The Frisco and Cotton Belt systems.

Mr. Coleman: What is the first station on the Jonesborough, Lake City & Eastern Railroad, east of Jonesborough?

Mr. McClelland: As I recall it, Nettleton.

Mr. Coleman: What connecting carriers are at Nettle-

4101 ton?

Mr. McClellan: The St. Louis, Iron Mountain & Southern.

Mr. Coleman: What is the eastern terminus of the Jonesborough, Lake City and Eastern Railway?

Mr. McClelland: On the Mississippi River, at Barfield, Arkansas.

Mr. Coleman: Do you know the length of that line?

Mr. McClelland: I think it is about sixty miles—sixty-two or three, something of that sort.

Mr. Coleman: I think it is eighty-five; I want you to be sure.

Mr. McClelland: That provides for the branch which runs from Dale to Osceola; I did not include that in my calculation.

Mr. Coleman: Has the Blytheville, Leachville & Arkansas Southern Railroad Company exercised the right of eminent domain?

Mr. McClelland: Yes, sir.

Mr. Coleman: By proceedings in court?

Mr. McClelland: Yes, sir.

Mr. Coleman: Will you identify the map which has been referred

to as a correct map drawn to scale, and file it as exhibit 2 in your testimony?

4102 Mr. McClelland: I do, sir.

The map so offered and identified was received in evidence and thereupon marked "Defendants' Exhibit No. 2", December 15th 1910, received in evidence, page 57, and is attached hereto.

Mr. Coleman: I would like to offer in evidence the deed from the Chicago Mill & Lumber Company to the Blytheville, Leachville & Arkansas Southern Railroad Company, and also the bill of sale, both of which have been referred to.

Examiner Boyle: Well, you may have the witness offer them.

Mr. McClelland: I have the originals here, and I will have copies made as soon as I reach home, and send them to the Interstate Commerce Commission.

Mr. Coleman: I ask leave for the witness to prepare copies and file them.

Examiner Boyle: To be properly certified?

Mr. McClelland: Yes, sir.

Mr. Coleman: You have a joint depot at Leachville?

Mr. McClelland: Yes, sir.

Mr. Coleman: Was that depot constructed by the owners

4103 under an order from the Arkansas Railroad Commission?

Mr. McClelland: Yes, sir.

Mr. Coleman: They issued an order compelling you all to build a depot there?

Mr. McClelland: Yes, sir.

Mr. Gutheim: That is the depot of the three lines there?

Mr. McClelland: Yes, sir, the old depot burned down.

Mr. Coleman: I want to make it clear about the right-of-way of the original ten miles of track, which was afterwards taken up; is it not a fact that the contract provided that when that track was taken up, the right-of-way should revert to the Chicago Mill & Lumber Company, and in consideration of that they were to deed to the Blytheville, Leachville & Arkansas Southern Railroad Company an equivalent right on this land as finally extended?

Mr. McClelland: That is true.

Mr. Coleman: And that was afterwards done?

Mr. McClelland: Yes, sir.

Mr. Swacker: Was the timber all cut out on that line then?

4104 Mr. McClelland: I think it was, sir.

Mr. Coleman: You spoke of the Chicago Mill & Lumber Company owning one share of the Stock of the Jonesborough Lake City & Eastern Railroad?

Mr. McClelland: Yes, sir.

Mr. Coleman: Is it not a fact that the Chicago Mill & Lumber Company loaned the Jonesborough, Lake City & Eastern Railroad, fifty thousand dollars, at the time that they extended their line from Barfield, on the Mississippi?

Mr. McClelland: Yes, sir.

Mr. Coleman: And they gave as part security for that loan—the railroad company issued to the Chicago Mill & Lumber Company one share of stock so that the Lumber Company could have a member on the board of directors as security?

Mr. McClelland: That is true.

Mr. Gutheim: Do the officials of your company receive any exchange transportation—free transportation from connecting carriers?

Mr. McClelland: They certainly do, yes, sir.

Mr. Gutheim: And you issue free transportation to them in exchange?

4105 Mr. McClelland: Yes, sir.

Mr. Gutheim: What carriers favor you with such transportation?

Mr. McClelland: Practically all carriers in the country, sir.

Mr. Gutheim: What arrangements are there at Glenco providing for the interchange of cars; are settlements made on a per diem or demurrage basis?

Mr. McCleland: Our interchange is all after Leachville, Jonesborough, and Blytheville,—but I will say for these points we have no interchange; at Glenco at the present time there is no arrangement for it between our connections; we insisted upon being placed upon the per diem arrangement, and in the interval the charge are being packed up against us; I don't know just what adjustment will be made of them.

Mr. Gutheim: They are being packed up against you, you mean the charge is being made on a demurrage basis?

Mr. McClelland: At the present time, no, sir.

Mr. Gutheim: How long has that arrangement been going on?

4106 Mr. McClelland: I could not tell you offhand; some considerable time.

Mr. Gutheim: Since the operation of the railroad as a corporation?

Mr. McClelland: No, sir.

Mr. Gutheim: This contract provides that the party of the second part, which is the Blytheville, Leachville & Arkansas Southern Railroad, shall not transport any passengers on its trains, and that the *agreement* shall not transport any freight on its trains, except that which originates on its own rails, destined to points on its own rails: that absolutely prohibits you doing any business which originates here, unless it is going over here to the line south of Leachville.

Mr. McClelland: That is true sir; I never knew a trackage contract between traffic—trunk line carriers that have any other provision.

Mr. Swacker: Referring to the exchange of transportation, were any of the recipients of it—had any of them any duties connected with the Chicago Mill & Lumber Company?

Mr. McClelland: Yes, sir.

4107 Mr. Swacker: They used them in the business of the Chicago Mill & Lumber Company?

Mr. McClelland: Not in selling business; they used it personally, generally; they make general use of the transportation.

Examiner Boyle: Does this Blytheville, Leachville & Arkansas Southern Railroad assess demurrage against the Chicago Mill & Lumber Company?

Mr. McClelland: They certainly do, yes, sir; against every shipper on our line. That is provided by a tariff covering it.

Mr. Coleman: Is the Blytheville, Leachville & Arkansas Southern Railroad assessed by the State Railroad Board of Assessors as a railroad, or as private property?

Mr. McClelland: By the State Board of Railway Assessors.

Mr. Swacker: Is there any other contract in existence between the Chicago Mill & Lumber Company and the Blytheville, Leachville & Arkansas Southern Railroad Company, other than this bill of sale and the transfer of the old line?

Mr. McClelland: Absolutely none.

Whereupon, at the hour of 4:30 o'clock P. M. on the
4108 15th day of December 1910, the hearing of the above entitled matter was closed.

4109 *The Mississippi Valley Railway Company.*

NEW ORLEANS, LOUISIANA, *December 15th*, 1910.
4 p. m.

Examiner Boyle: We will now take up the case of the Mississippi Valley Railway Company.

J. H. MCFARLAND, was called as a witness, and being duly sworn, testified as follows:

Direct examination:

Mr. Gutheim: Where do you live?

Mr. McFarland: Caruthersville, Missouri.

Mr. Gutheim: Your occupation is what?

Mr. McFarland: At the present time I am general manager of the Tyler Land & Timber Company.

Mr. Gutheim: Have you any official connection with the Mississippi Valley Railway Company?

Mr. McFarland: I am manager of the road.

Mr. Gutheim: Have you a map of your line that will show us the general geographical location?

Mr. McFarland: Yes, sir.

Mr. Gutheim: Will you offer it in evidence?

Mr. McFarland: Yes, sir, here it is.

4110 The map so offered and identified, was received in evidence, and thereupon marked "Defendant's Exhibit No. 1", received in evidence, December 15th 1910, and is attached hereto.

Mr. Gutheim: Will you indicate on this map the location of your road?

Mr. McFarland: This is it here.

(Witness indicates on the map.)

Mr. Gutheim: It runs from Tyler on the Mississippi river in a general westerly direction through junction, Cooter, Steele, where it has a connection with the Frisco, and thence through Denton to a termius called Dolphin.

Mr. McFarland: Yes, sir.

Mr. Gutheim: And the total mileage is, Mr. McFarland——

Mr. McFarland: I think it is fifteen and forty-one hundredths miles.

Mr. Gutheim: What is the nature of the territory that is served by this road? What are the industries that are located thereon, and furnish traffic for it?

Mr. McFarland: It is a farming country at the present time, and has a number of cotton gins at the industries, and one stave mill.

4111 Mr. Gutheim: What industry furnishes the majority of the tonnage that the road handles?

Mr. McFarland: No one industry furnishes a majority of the business. The independent business will amount to about two-thirds of the business of the road—independent outside business—outside of the Tyler Land & Timber Company, will amount to about two-thirds of the business along the road.

Mr. Gutheim: The Tyler Land & Timber Company, of which you speak, is the concern which controls the railroad, is it not?

Mr. McFarland: Yes, sir.

Mr. Gutheim: Is that control exercised through stock ownership?

Mr. McFarland: Yes, sir.

Mr. Gutheim: Has the stock actually been issued?

Mr. McFarland: Not to my knowledge; my information is that it has not been issued.

Mr. Gutheim: So, there is no indebtedness represented by stock; is there any bonded indebtedness?

Mr. McFarland: Yes, sir.

Mr. Gutheim: About how much in bonds is outstanding?

4112 Mr. McFarland: Ninety thousand dollars.

Mr. Zwiebold: The stock is supposed to have been issued, but the records of the former owners and stockholders have been mislaid. We are trying to locate them, but have been unable to do so, and we are arranging to issue the stock, in case we cannot locate the prior stock issue. We are trying to locate through a man named Tyler.

Mr. Gutheim: Do I understand that the books of the company show no liability on account of a stock issue?

Mr. McFarland: Not so far as we can locate the record.

Mr. Zwiebold: That is it, Mr. McFarland.

Mr. McFarland: Well, there has not been any stock issued.

Mr. Zwiebold: There are no separate books of record of the railroad company, but separate items of account in the books of the Tyled Land & Timber Company, indicate the timber company's busi-

ness, and the railroad company's business; that is the situation is it not, Mr. McFarland?

Mr. McFarland: Yes, sir; no separate books have been kept by the railroad company.

4113 Mr. Gutheim: Do you know who holds the outstanding bonds of the company?

Mr. McFarland: William V. Colley of Liberty, Missouri.

Mr. Gutheim: Is there any other indebtedness at the present time?

Mr. McFarland: Yes, as of the Tyler Land & Timber Company's books, it furnished a part of the money for building that road; it will be thirty-seven thousand dollars.

Mr. Gutheim: So at the present time there is a debt of about one hundred and twenty-seven thousand dollars—an indebtedness which was used originally in the construction of the railroad.

Mr. McFarland: That is my information; yes, sir.

Mr. Gutheim: The railroad owned, is about how long?

Mr. McFarland: It is now about fifteen and forty-four one hundredths miles long.

Mr. Gutheim: Was this railroad constructed about the time the Tyler Land & Timber Company began operating in this country?

Mr. McFarland: Yes, sir.

Mr. Gutheim: How was it constructed——

4114 Mr. McFarland: Let me qualify that a little bit. The railroad was built before the organization of the Tyler Land & Timber Co.

Mr. Gutheim: By the predecessor of the Tyler Land & Timber Company?

Mr. McFarland: Yes, sir.

Mr. Gutheim: And the predecessor of the Tyl*and* Land & Timber Company was engaged in the same business as the Tyler Land & Timber Company?

Mr. McFarland: No, sir, they were engaged in the lumber business.

Mr. Gutheim: What was the name of that company, do you know?

Mr. McFarland: Seller & Tyler; that was a brother of Walter Tyler, and J. A. Seller; then J. A. Seller & Company.

Mr. Gutheim: When the property was owned by Seller & Tyler, and then by J. A. Seller & Company, was it a separately incorporated railroad?

Mr. McFarland: They built and incorporated the railroad company, just prior to selling the entire business out.

Mr. Gutheim: The land through which it runs is largely cut over?

4115 Mr. McFarland: No; part is farm land; nearly all of it is cleared up at the west end, tha tis different land, cut over land.

Mr. Gutheim: Where is the mill of the Tyler Land & Timber Company?

Mr. McFarland: Here at Tyler.

Mr. Gutheim: On the river?

Mr. McFarland: It is not on the river; the levee runs along the river there, about a quarter — from the river bank.

Mr. Gutheim: The railroad, so far as you know, was originally built as a part of the development of the timber industry by the original owners, and built with their money, and held by them and so used?

Mr. McFarland: Yes, I guess that is about correct.

Mr. Gutheim: How far do you go from Tyler along the road before you strike any timber which is now being cut for the purposes of the Tyler Land & Timber Company?

Mr. McFarland: On the main line we would have to go to the end of the line; there is a spur that runs down here, (Witness indicates on map), where we have been getting logs and timber off the tract: we have no saw mill.

4116 Mr. Gutheim: Well, at the present time, are any officers of the Tyler Land & Timber Company officers also of the railroad company?

Mr. McFarland: Yes, sir.

Mr. Gutheim: All of them?

Mr. McFarland: Yes, they are officers, but they don't hold just the same offices; we don't have them listed or named as the same officers.

Mr. Gutheim: But the same individuals?

Mr. McFarland: The same individuals, yes, sir.

Mr. Gutheim: These branches that you speak of that run off here from junction south to Arkansas, a little distance west, are they owned by the railroad company?

Mr. McFarland: Yes, that has been taken out.

Mr. Gutheim: This branch running to the south has been taken out?

Mr. McFarland: Down to about the state line; there is then another lumber line, that is about—another line on that run out, which runs into their timber, which was built to haul logs.

4117 Mr. Gutheim: Proceeding west from Tyler, is there any settlement at Junction?

Mr. McFarland: No, sir, there is a settlement *there is a settlement* at Forks, going over there on the train.

Mr. Gutheim: Is there any settlement at Cooter?

Mr. McFarland: Yes, there is a little settlement there.

Mr. Gutheim: Have you an agency at Cooter?

Mr. McFarland: Yes, we have a man there to deliver freight and take receipts?

Mr. Gutheim: Have you a station building?

Mr. McFarland: We have a building at Cooter.

Mr. Gutheim: What is the situation at Steele; do you have an agent at that point?

Mr. McFarland: At Steele, yes; we pay the Frisco to run over their track over to their depot, and have the services of their agent, and whatever services their agent renders us, we adjust the total with them.

Mr. Gutheim: How much of the Frisco tracks do you use?
Mr. McFarland: Only a few steps.
Mr. Gutheim: Then at Denton is there a community
4118 there?
Mr. McFarland: Yes, two stores, and a man who takes receipts and delivers freight for us.
Mr. Gutheim: How about the situation at Dolphin?
Mr. McFarland: There is no settlement there.
Mr. Gutheim: About what population would you say is served by your line, to which you render railroad service?
Mr. McFarland: Well, that would be a pretty broad statement to make; in this country—a farming country, I could hardly estimate what it amounts to.
Mr. Gutheim: Is it five thousand people?
Mr. McFarland: No, sir, there would not be that many. I should think two thousand would be pretty close to it.
Mr. Swacker: How much do you pay the Frisco at Steele for the use of its tracks?
Mr. McFarland: Four hundred dollars per annum.
Mr. Gutheim: Your road is a standard gauge, is it not?
Mr. McFarland: Yes, sir.
Mr. Gutheim: What is the weight of rail?
Mr. McFarland: Sixty pounds.
Mr. Gutheim: Have you any bridges?
Mr. McFarland: Four trestles — three trestles and one bridge.
4119 Mr. Gutheim: What equipment do you have?
Mr. McFarland: Two locomotives and about forty logging cars; flats, they call them.
Mr. Gutheim: Have you any passenger cars?
Mr. McFarland: We have a combination car; one end is used for baggage and the other end for passengers.
Mr. Gutheim: Is this equipment all fixed up with safety appliances as required by the Federal law?
Mr. McFarland: Well, I am not familiar with what is required by the Federal law.
Mr. Gutheim: Well, logging equipment does not have to have air brakes, but are your locomotives taken care of, or equipped with safety appliances?
Mr. McFarland: The large one has the equipment that you speak of, I think, but I don't believe the smaller one has. We don't use the small one, except in cases of emergency.
Mr. Gutheim: Have you a telephone or telegraph line?
Mr. McFarland: A telephone line has just been put in.
Mr. Gutheim: Is it used in dispatching trains?
Mr. McFarland: No, sir.
4120 Mr. Gutheim: About how many men have you employed in the railroad operations—for the use of the railroad altogether?
Mr. McFarland: The operating crew on the train, section men and all?
Mr. Gutheim: Yes; train crews, section men, and all?

Mr. McFarland: About twenty-seven all the time, and then we use what we call the "log loading crew" part of the time; when not in use loading logs.

Mr. Gutheim: Are your general offices at Tyler?

Mr. McFarland: Yes, sir.

Mr. Gutheim: In the offices of the Tyler Land & Timber Company?

Mr. McFarland: Yes.

Mr. Gutheim: The general office work is performed by employees —for the joint account of both companies?

Mr. McFarland: Yes.

Mr. Gutheim: Who pays their compensation?

Mr. McFarland: The Tyler Land & Timber Company.

Mr. Gutheim: The Tyler Land & Timber Company simply charges on this account on its books, the railroad company with the fixed proportion due for their services?

Mr. McFarland: We have never undertaken to separate
4121 or determine what proportion the railroad ought to be liable for.

Mr. Gutheim: The railroad is not charged at all?

Mr. McFarland: Not with any salaries.

Mr. Gutheim: What train service do you have?

Mr. McFarland: The train runs out to Steele twice a day.

Mr. Gutheim: That is from Tyler?

Mr. McFarland: In fact it goes to Dolphin once a day, and then to Steele in the evening.

Mr. Gutheim: Does it run on regular schedule?

Mr. McFarland: Yes, sir.

Mr. Gutheim: Have you any published time tables?

Mr. McFarland: No, sir; we have published no time table; of course sometimes there may be a little delay, but pretty nearly always on time.

Mr. Gutheim: Do you handle any mail?

Mr. McFarland: Yes.

Mr. Gutheim: To Steele and what points?

Mr. McFarland: To Cooter entirely.

Mr. Gutheim: Nothing west of Steele?

Mr. McFarland: No, sir.

Mr. Gutheim: Have you any express business?

4122 Mr. McFarland: No, sir; the only express comes at Steele, and the agent gets it for our road, and the conductor will bring it out; that is the only express business.

Mr. Gutheim: About how much passenger service do you have?

Mr. McFarland: What it amounts to in dollars?

Mr. Gutheim: Yes, and the number of passengers say per month.

Mr. McFarland: Well, I would have to figure that out; it runs from three thousand to thirty-six hundred dollars per year; they average about twenty cents apiece, I suppose about sixteen thousand passengers or something like that per year.

Mr. Gutheim: At this point, Mr. Zwiebold, will you have the witness prepare the usual statement of tonnage and revenue, show-

ing the tonnage and revenue accruing on the business of the Tyler Land & Timber Company, and that accruing on business from the outside general public?

Mr. Zwiebold: Yes, sir.

Mr. Gutheim: You have through rates in connection with the Frisco at Steele?

4123 Mr. McFarland: We have had until recently, and they cancelled out everything, except the rates on timber and timber products; that is really what I suppose it amounts to.

Mr. Gutheim: Does all of your product go out via the Frisco, or do you ship some via the river?

Mr. McFarland: We don't exactly ship any by the river, but we bring in logs by the river; we have a contract, but we don't do any shipping that way.

Mr. Gutheim: Do you have a local freight tariff?

Mr. McFarland: We have never published any local freight tariff.

Mr. Gutheim: What charges do you make for the hauls locally on your line?

Mr. McFarland: For merchandise and such stuff as that, we have to handle, we have always undertaken to charge about ten cents per one hundred pounds, and for what few carloads we have had, they have been paying less than five dollars from Steele; we have always charged five dollars per car on grain and cotton seed and cotton, from Cooter and Denton and one or two points. We have to haul these things—it is eight dollars from Cooter, and ten dollars from Tyler.

4124 Mr. Gutheim: That covers practically all of the commodities which you move, I suppose?

Mr. McFarland: Yes, about all.

Mr. Gutheim: And the rates on staves that are put on a connection with the Frisco via Steele, what division does your line get?

Mr. McFarland: Two cents per one hundred pounds.

Mr. Gutheim: When you have rates on merchandise and classes and commodities, what did you get out of those rates?

Mr. McFarland: We got twenty-five per cent of whatever the Frisco rate was; twenty-five per cent of their haul.

Mr. Gutheim: Is the two cent division on the staves, a division of the milling in transit business?

Mr. McFarland: I don't know that I understand that. Going entirely over the Frisco road, as I understand it; we had the same rate we do to Steele, and Carruthersville.

Mr. Zwiebold: The division you receive from the Frisco, does not include any payment for the hauling of the logs?

4125 Mr. McFarland: Oh, no; no, sir. The Tyler Land & Timber Company simply pays the railroad company five dollars per car for blocks and logs.

Mr. Gutheim: Do you handle any ticket business or passenger business on regular tickets, or on cash fares?

Mr. McFarland: On cash fares and some ticket business.

Mr. Gutheim: Do you have any way bills and bills of lading of your own?

Mr. McFarland: Yes, sir.

Mr. Gutheim: Do you bill staves through from Tyler to destination?

Mr. McFarland: Yes, sir.

Mr. Gutheim: And haul them locally to Steele? You bill them locally on Steele?

Mr. McFarland: No, entirely through to destination.

Mr. Gutheim: Is the railroad a paying proposition?

Mr. McFarland: No, sir; it has never paid expenses.

Mr. Gutheim: Who finances the deficit?

Mr. McFarland: The Tyler Land & Timber Company.

Mr. Gutheim: And that deficit is a part of the amount that stands on your books as due them?

Mr. McFarland: No, sir; no part of it.

4126 Mr. Gutheim: How is it handled then?

Mr. Ziebold: Do you charge it to profit and loss?

Mr. McFarland: The interest—we simply have the interest upon the bonds, and it is charged to that account; that interest account. The Tyler Land & Timber Company—it is charged off, and that is put on the books; these two items have not been carried separately; if they were the road would be away behind by reason of the fact that the Tyler Land & Timber Company simply pays the deficit; that is all there is to it.

Mr. Gutheim: Are you filing monthly and annual reports with the Interstate Commerce Commission?

Mr. McFarland: No, sir.

Mr. Swacker: On this business—this spur extending down toward Arkansas; that is moved over to the river and forwarded by car from Tyler?

Mr. McFarland: No, sir; there has been no business over that spur; that went to the river. That all went up to Steele.

Mr. Swacker: That all went up to Steele?

Mr. McFarland: Yes, sir

Mr. Swacker: And then out via the Frisco?

Mr. McFarland: Yes, sir.

4127 Mr. Swacker: You say you have no published tariff?

Mr. McFarland: No; that was a local haul; it was a contract that Mr. Franklin made.

Mr. Swacker: That is an interstate haul?

Mr. McFarland: Yes, it would be; they do come out of Arkansas into Missouri.

Mr. Gutheim: That is, the spur from the plant runs through junction south?

Mr. McFarland: They own all in Arkansas.

Mr. Gutheim: Do you operate it for them?

Mr. McFarland: Well, we take cars down and deliver them, and we pull back to Steele.

Mr. Gutheim: You take them down as far as the track goes?

Mr. McFarland: Yes, sir, down to the end of the track; to their timber.

Mr. Gutheim: They do the operation on that basis?

Mr. McFarland: No, sir; we ship down on their track, and they

load the cars, and then we go down and hitch on and pull them back.

Mr. Gutheim: Do the officers of your company get any free transportation from connections?

Mr. McFarland: Two of them.

4128 Mr. Gutheim: Whose?

Mr. McFarland: Some from the Frisco, or something beyond the Frisco; we have had C. & D. I.

Mr. Gutheim: Who are the two officials that receive them?

Mr. McFarland: Mr. Franklin and myself.

Mr. Gutheim: What is Mr. Franklin's position with the Stave Company?

Mr. McFarland: Vice-President of the Stave Company, and he always calls himself president of the railroad company.

Mr. Zwiebold: Do you run passenger trains on Sunday?

Mr. McFarland: Yes, it is a mixed train that delivers freight, every day in the year.

Mr. Zwiebold: Including Sunday?

Mr. McFarland: Yes, sir.

Mr. Zwiebold: Among the outside industries on the line, is this about a correct list, W. A. Green, E. M. Mackey, the Cooter Supply Company, etc.?

Mr. McFarland: Those are about all of the industries with which the Tyler Land & Timber Company, or any of the stockholders of the company have no interest.

Mr. Zwiebold: Yes.

4129 Mr. McFarland: The Tyler Land & Timber Company has no interest, but one of the stockholders holds a little in the stores of the Cooter Supply Company there at Cooter; I don't know how much, but he owns a small interest in it.

Mr. Zwiebold: The others are entirely independent?

Mr. McFarland: Yes, sir.

Examiner Boyle: They are competitors of your company?

Mr. McFarland: We have no interest in them in any way; I don't know about their being competitors;

Examiner Boyle: They are in the stave and lumber business?

Mr. McFarland: No, sir.

Examiner Boyle: What are they?

Mr. McFarland: Cotton gins and stores.

Examiner Boyle: You said the traffic of the Tyler Land & Timber Company is about one-third of the traffic of your road?

Mr. McFarland: Yes, sir.

Examiner Boyle: The other two-thirds is represented by independent tonnage?

Mr. McFarland: Yes, sir.

4130 Mr. Swacker: That is not one-half of the output of the mill, but such as agricultural products; is that included in the one-half?

Mr. McFarland: They don't handle any agricultural products.

Mr. Swacker: Don't they own farms?

Mr. McFarland: There are some rented — farmers; they haul to

Cooter and Steele; we have never had anything to do with the product of that road; the ordinary hauls for the Tyler Land & Timber Company, logs to the mill, and staves, away from it occasionally, some lumber around to build a house perhaps.

Mr. Gutheim: You are not keeping separate books for the railroad company?

Mr. McFarland: No, sir.

Mr. Gutheim: Still you have a separate account on the Tyler Land & Timber Company's books?

Mr. McFarland: Yes, that is the way it is carried.

Mr. Gutheim: Does the country which your company runs over, hold out pretty good prospects for farming?

Mr. McFarland: In and adjacent to Tyler, it has just been put into farms.

Mr. Zwiebold: You are now arranging to separate your accounts and keep proper book accounts and reports and statistics
4131 and data, as soon as you can understand their requirements?

Mr. McFarland: Yes, I am ready to do it if it is necessary.

Examiner Boyle: You have not considered it necessary?

Mr. McFarland: I simply didn't know whether it was necessary or not.

Mr. Zwiebold: Look at that blue print of your line which has been marked Exhibit No. 1, and which is marked "Mississippi Valley Railroad", and which represents a map of the Mississippi Valley Railway Company located in Missouri, and connecting with the Frisco Railroad at Steele, Missouri.

Mr. McFarland: Yes, sir.

Mr. Zwiebold: What is the name of your railroad?

Mr. McFarland: The name of our railroad is, The Mississippi Valley Railway Company; this legend on Exhibit 1, is an error.

Mr. McFarland: Relative to the logging from Hull, Arkansas to Steele, I want to say that logging has been completed entirely, and we will have no more of that.

4132 Mr. Zwiebold: You will have no more haul on that traffic?

Mr. McFarland: No, sir.

Mr. Zwiebold: Your company owns the right-of-way which was acquired by purchase or otherwise,—and part acquired by condemnation out to junction?

Mr. McFarland: Yes, sir.

Mr. Zwiebold: When you run home, you want to ascertain and furnish definitely the information which has been requested?

Mr. McFarland: Yes, sir.

Mr. Zwiebold: And furnish the information to be furnished to the Commission?

Mr. McFarland: Yes, sir.

Whereupon, at the hour of 4.30 O'clock P. M., on the 15th day of December 1910, the hearing of the above entitled matter was closed.

4133 *The Black Bayou Railroad Company.*

NEW ORLEANS, LOUISIANA, *December* 15, 1910,
4:30 P. M.

Examiner Boyle: We will now take up the case of the Black Bayou Railroad Company.

W. H. WELCH, was called as a witness, and after being duly sworn, testified as follows:

Direct examination:

Mr. Gutheim: What is your name?
Mr. Welch: W. H. Welch.
Mr. Gutheim: Where do you reside?
Mr. Welch: Myrtistown, Louisiana.
Mr. Gutheim: And your occupation is what?
Mr. Welch: I am the President and General Manager of the Southern Lumber Company, and the President and General Manager of the Black Bayou Railroad Company.
Mr. Gutheim: Have you a map of the Black Bayou Railroad Company?
4134 Mr. Welch: I did not bring one with me; I can furnish one later, if you want it.
Mr. Gutheim: Will you do so?
Mr. Welch: Yes, sir.
Mr. Gutheim: Will you describe the general geographical location of the Black Bayou Railroad Company?
Mr. Welch: Yes, sir; the Black Bayou Railroad begins at Myrtistown, Louisiana—the postoffice is called Myrtistown, but the town is called Myrtis, and runs in a southwesterly direction about seven miles, and we are building now——
Mr. Gutheim: Where is Myrtistown?
Mr. Welch: Myrtistown is half way between Texarkana and Shreveport; on the Kansas City Southern Railway—exactly half way; thirty-five miles to each place.
Mr. Gutheim: This line running from Myrtistown, seven miles across—southwest into Texas?
Mr. Welch: Yes, sir.
Mr. Gutheim: How much of your line is in Texas?
Mr. Welch: About three miles.
4135 Mr. Gutheim: What is the terminus in Texas?
Mr. Welch: Do you mean where we are headed to?
Mr. Gutheim: No, where you are building to.
Mr. Welch: Well, right out in the middle of the woods at the present time.
Mr. Gutheim: There is no locality or community there of any consequence?
Mr. Welch: No, sir, just in the woods.
Mr. Gutheim: What does the Black Bayou Railroad serve principally?

Welch: Well, at the present time on account of the Black Railroad being a new road, the only commodity it hauls at esent time, is logs.

Gutheim: Logs for what company?

Welch: Logs for the Southern Lumber Company.

Gutheim: To what extent is the Southern Lumber Company sted, or the stockholders interested in the Black Bayou Rail- Company?

Welch: The Black Bayou Railroad Company is a separate ration organized under the laws of Texas as a common carrier; e reason that I ascertained, as I ascertained when I took out the Charter, that you cannot get a charter in Texas, unless you agree to become a common carrier.

Mr. Gutheim: Did you take out a charter to become a on carrier, or did you take out a charter so as to qualify to e divisions?

Welch: Well, I will answer that question by stating, that course built the road to have it make money, and the only we could get anything—any earnings on the road, would be gh divisions.

Gutheim: Well, when was the road built?

Welch: Well, I want to make a little explanation as we go there.

ck Bayou Railroad was in existence for a number of years e our road—called the Black Bayou Railroad. The parties who d it originally, sold out to another company, and this party during the panic.

bought out the old railroad; we took up the old tracks; at any we did along places, and built in the swamp, and we have re- the road, and are building it now, from Myrtistown in a westerly direction. We are building it in first-class shape. 't know of any other line of road that is built any better than this one.

Mr. Gutheim: When you say "we bought the old Black Bayou Railroad", do you refer to the Southern Lumber any?

Welch: The Southern Lumber Company bought the Black u Railroad and the other assets, including the Black Bayou ber Company, which was very small, and amounted to prac- y nothing.

Gutheim: It was a chartered company?

Welch: We bought it for the rails and equipment. Then count of this old company being in trouble during the panic, charter was forfeited, and they got out a new charter—we got new charter early in this year under which we are now oper-

e have no connection whatever with the old Black Bayou oad Company, except that we use the steel and equipment they

Gutheim: Well, it practically amounts to this then, that

you bought the steel and fastenings and ties of what was formerly called the Black Bayou Railroad Company?

Mr. Welch: We never used any of the ties, no, sir.

Mr. Gutheim: Who now owns the stock of the present Black Bayou Railroad Company?

4138 Mr. Welch: The stockholders of the Black Bayou Railroad Company.

Mr. Gutheim: And they are the stockholders of the Southern Lumber Company?

Mr. Welch: Practically, yes, sir.

Mr. Gutheim: Practically—to what extent are there any holdings in the Black Bayou Railroad Company not held by the stockholders of the Southern Lumber Company?

Mr. Welch: It is necessary, in order to conform to the laws of the State of Texas under which we are organized to have so many directors in the State of Texas, and consequently we have two or three small stockholders who are not stockholders in the Southern Lumber Company.

Mr. Gutheim: That is an arrangement, simply to properly qualify directors under the requirements of the State of Texas laws?

Mr. Welch: Yes, sir, practically speaking.

Mr. Gutheim: So that the stock ownership of the Black Bayou Railroad is really identical with that of the Southern Lumber Company?

Mr. Welch: Practically so, but not entirely so.

4139 Mr. Gutheim: Is the mill of the Southern Lumber Company situated at Myrtistown?

Mr. Welch: Yes, sir.

Mr. Gutheim: So that the property of the company—that owned by the Black Bayou Lumber Company——

Mr. Welch: I could not say that the mill is at Myrtistown; we have built a new plant, you understand; I can say that it was owned by the Black Bayou Railroad and the Black Bayou Lumber Company.

Mr. Gutheim: Your building of the present railroad, was practically contemporaneous with the beginning of milling operations by the Southern Lumber Company, at this time?

Mr. Welch: Yes, sir.

Mr. Gutheim: And has extended today—the construction of the present road is done by the Southern Lumber Company?

Mr. Welch: Yes, sir.

Mr. Gutheim: Was the completed road sold to the present railroad corporation in exchange for its securities?

Mr. Welch: The Southern Lumber Company built the

4140 railroad, furnished all of the money to build it—and the stockholders of the Black Bayou Railroad Company have stock in the same proportion that they have stock in the Southern Lumber Company.

Mr. Gutheim: Now, is there any indebtedness of the railroad, outside of the stock?

Mr. Welch: Nothing except what they owe the Southern Lumber Company.

Mr. Gutheim: How much does that indebtedness amount to?

Mr. Welch: It amounts to a little over the amount of the capital stock.

Mr. Gutheim: And the capital stock issue, was what?

Mr. Welch: Fifty thousand dollars.

Mr. Gutheim: And there is an indebtedness of about fifty-five thousand dollars?

Mr. Welch: About a little over fifty thousand dollars; I don't think it is quite fifty-one thousand dollars altogether.

Mr. Gutheim: Then, as it stands, you have about one hundred thousand dollars of indebtedness?

Mr. Welch: No, you misunderstand me. The stock amounts to fifty thousand dollars, while the railroad costs about fifty-one
4141 thousand dollars; not quite fifty-one thousand dollars.

Mr. Gutheim: What you mean then is, that the indebtedness of the railroad to the Southern Lumber Company, is the extent of that cost, over fifty thousand dollars?

Mr. Welch: Well, I haven't the exact figures right with me.

Mr. Gutheim: So that, the road and equipment cost on that basis, say a little over fifty thousand dollars?

Mr. Welch: Yes, sir.

Mr. Gutheim: And the present officers of the road are also the officials of the Southern Lumber Company?

Mr. Welch: Not entirely so, no, sir.

Mr. Gutheim: To what extent are they the same individuals?

Mr. Welch: I hold the same offices in both companies.

Mr. Gutheim: President and General Manager of both companies?

Mr. Welch: Yes, sir.

4142 Mr. Gutheim: What other railroad officers hold offices in the Southern Lumber Company.

Mr. Welch: The second vice-president, and the assistant general freight agent of the railroad, is also secretary and treasurer of the Southern Lumber Company; that is the only other office I think held by them in both companies.

Mr. Gutheim: You said the railroad was seven miles long—about three miles in the State of Texas; is it standard gauge?

Mr. Welch: Yes, sir.

Mr. Gutheim: What weight of rail is used?

Mr. Welch: The first two miles, thirty-five pound steel; all the balance, sixty pound steel rail, and we are going to take up the light steel, which as has been said, is about two miles, and re-place it with sixty pound steel.

Mr. Gutheim: You have no station buildings?

Mr. Welch: No, not yet; you understand we are simply going out where we have nothing but timber; we will have that as a department when we have business to justify it.

Mr. Gutheim: What equipment have you?

4143 Mr. Welch: One locomotive and twenty-six logging cars; one steel car and two hand cars.

Mr. Gutheim: The steel car is used in the reconstruction of the so-called logging spurs?

Mr. Welch: Yes, sir.

Mr. Gutheim: Is that logging spur construction done by the railroad company?

Mr. Welch: The spur construction is done by the railroad company, yes, sir.

Mr. Gutheim: Is there any payment by the Lumber Company for that service?

Mr. Welch: I want to explain to you that we have just practically started operations; I have all the figures, and I am going to make the proper charges and get all the figures on the books; I just simply have not put them on the books; we expect to make a charge and put it all down one day.

Mr. Gutheim: That logging spur work, is solely for the logging by the Southern Lumber Company?

Mr. Welch: The log haul is included in the spur; that is what we call expense money.

Mr. Gutheim: That means including the construction of the spur?

4144 Mr. Welch: Yes, sir; these figures—I understand it is an arbitrary, just making the road show an earning; we may change that a trifle just one way or the other.

Mr. Gutheim: You have no telegraph or telephone service?

Mr. Welch: No, not yet; no, sir. It is not necessary yet.

Mr. Gutheim: Is there any independent operation of the railroad, with an independent corps of employees, or is the work done by the Southern Lumber Company's employees?

Mr. Welch: Employees of the Lumber Company?

Mr. Gutheim: Yes.

Mr. Welch: Do you mean all of the work?

Mr. Gutheim: Yes.

Mr. Welch: All of the work is done by the railroad company's employees?

Mr. Gutheim: You have a regular corps of railroad men—train men?

Mr. Welch: Yes, we have a section crew, and a construction crew, and then we have a train crew.

4145 Mr. Gutheim: What office facilities have you at Myrtistown?

Mr. Welch: The Southern Lumber Company have offices there.

Mr. Gutheim: Are the railroad employees at that point general employees of the railroad company and of the Lumber Company?

Mr. Welch: Practically—well, practically two of them.

Mr. Gutheim: Are they compensated by the Lumber Company solely?

Mr. Welch: They have not done any work—what work has been done in the office has been done by myself: on account of we handled nothing but logs, it was very easy to keep track of it so far.

Mr. Gutheim: You are not in passenger service at all?

Mr. Welch: Not yet; we are not running any passenger trains at all.

Mr. Gutheim: How many log trains do you run daily, and about how many cars in a train?

Mr. Welch: We run about four trains per day, and have been hauling about eight cars to the train, which we will increase very much in the future.

Mr. Gutheim: You handle no mail or express, I take it?

4146 Mr. Welch: We have no place to go to; we haven't got that far along.

Mr. Gutheim: Such passengers as are carried, are carried free?

Mr. Welch: Well, we carry no passengers, except when they get on of their own free will, you understand.

Mr. Gutheim: The entire tonnage at the present time, consists of logs going into Myrtistown, and general camp supplies, going from Myrtistown out, I take it?

Mr. Welch: Yes, sir.

Mr. Gutheim: And that is all for account of the Southern Lumber Company?

Mr. Welch: Yes, that is—of course, like I explained to you, we expect a railroad company to get proper compensation for doing the work.

Mr. Gutheim: In this instance it will not be necessary to furnish a statement of tonnage and revenue.

Mr. Welch: Yes, sir.

Mr. Gutheim: Have you published a local tariff?

Mr. Welch: No, sir, we concur with the Kansas City Southern Railway in their tariff.

Mr. Gutheim: On lumber and forest products only?

Mr. Welch: Anything we haul.

4147 Mr. Gutheim: How is it on your classes and commodities; do you have any through rate in-bound to your logging camps?

Mr. Welch: In-bound where?

Mr. Gutheim: In-bound to your logging camps.

Mr. Welch: Not yet, no, sir; when we get ready to do business, of course we will make this little local tariff.

Mr. Gutheim: What division does the Kansas City Southern Railway allow you on shipment of lumber and forest products?

Mr. Welch: I have not their contract with me, but it ranges as I recall it, from one cent to four cents.

Mr. Gutheim: Will you file with the Interstate Commission a copy, a copy of your contract with the Kansas City Southern Railway Company which provides for these divisions?

Mr. Welch: Yes, sir; where do you want this file sent?

Mr. Gutheim: Just address it to "Edward A. Mosely, Secretary Interstate Commerce Commission, Washington, District of Columbia.

Mr. Gutheim: Does the Kansas City Southern Railway

4148 take out the product of your mill direct, or is it handled by the Black Bayou Railroad Company's equipment?

Mr. Welch: I don't know as I quite understand that.

Mr. Gutheim: Does the Black Bayou Railroad Company's locomotives take your lumber from where it is loaded at the mill, to the

Kansas City Southern Railway's interchange, direct, or, does the Kansas City Southern Railway, with its own power, go right to the Southern Lumber Company's mill?

Mr. Welch: The Kansas City Southern Railway Company goes in and takes out the lumber itself.

Mr. Gutheim: So that the entire service that is performed by the Black Bayou Railroad Company is, the log haul to the mill.

Mr. Welch: At the present time, yes, sir.

Mr. Gutheim: The division therefore is, presumably on a milling in transit basis?

Mr. Welch: Yes, sir; we get a division of the freight rate on the milling and transit arrangement.

Examiner Boyle: Applying from where?

Mr. Welch: Where the logs originate on our road.

Mr. Gutheim: The railroad has not paid any dividends
4149 yet, has it?

Mr. Welch: No, sir; it has not been in business long enough.

Mr. Gutheim: Do any of the general officers receive any salary from the railroad corporation?

Mr. Welch: No, sir; none have done any work but myself, and I have not felt like asking for any yet; I expect to do so soon.

Mr. Gutheim: Does the Kansas City Southern Railway furnish transportation?

Mr. Welch: Yes.

Mr. Gutheim: Does more than one individual of your company get such transportation?

Mr. Welch: Yes.

Mr. Gutheim: How many of them?

Mr. Welch: I believe there is three.

Mr. Gutheim: Yourself and two others?

Mr. Welch: Yes, sir.

Mr. Gutheim: Do you have any free transportation, other than transportation over the Kansas City Southern Railway?

Mr. Welch: I have not personally. I have not personally, and I don't know of the other officers if they have; I don't know.

4150 Mr. Gutheim: Are you keeping separate accounts for the railroad corporation—that is, do you intend to?

Mr. Welch: I have statistics covering everything that we have done up to date—construction and handling these logs; I have them in shape for being put in the books—to make these entries, just like the Interstate Commerce Commission requires; but I will ask you now if I will have to *ask you if I will have* to write them the kind of accounts they want kept?

Mr. Gutheim: Well, if you will address the Secretary of the Commission, I will see that you are furnished with and kept supplied with all the publications of the Commission, on the matter of uniform classification of accounts.

Mr. Welch: All right, sir; I wish you would.

Mr. Swacker: You say that the old Black Bayou Railroad was taken up?

Mr. Welch: Yes, sir; we took it up ourselves.

4151 Mr. Swacker: Well, was the timber all cut out where it was?

Mr. Welch: All that went along; some of the timber out there—on account of all being such small stuff; it was not enough to justify fixing up the track; I would like to state the fact, our road is now going toward a country that has been largely settled up; it was an old country—we are going towards Jefferson, one of the richest towns in Jefferson, and Jefferson gets all of this farming products, cotton, etc, that our road is going to traverse; There is an in-land town between Myrtistown and Jefferson, called Smithland, and I have been informed that Smithland handles about five thousand bales of cotton per year that they have to haul in there by wagons to Jefferson, as well as haul the other farm products. I have been also informed by merchants of Smithland, that they do a large merchandise business with these little points of about one and a half million dollars per year.

Mr. Gutheim: Your line as now constructed, runs through the timber country?

4152 Mr. Welch: We *we* have it built now?

Mr. Gutheim: How far is Jefferson?

Mr. Welch: From Myrtis to Jefferson is twenty-seven miles.

Mr. Gutheim: How far from your terminus in the woods, is it to Jefferson?

Mr. Welch: I think it is twenty-two miles—twenty miles.

Mr. Gutheim: And Smithland is between the present terminus of the railroad and Jefferson?

Mr. Welch: Yes.

Mr. Gutheim: Do you own any of the timber between the present terminus of the railroad and Jefferson?

Mr. Welch: We own the timber——

Mr. Gutheim: Has Jefferson any railroad facilities?

Mr. Smith: We own the timber within three miles of Jefferson; they have connections with the Texas & Pacific Railway, and the Missouri, Kansas & Texas Railway, and the Jefferson & Northeastern Railroad.

Mr. Gutheim: How far is Smithland from Jefferson?

Mr. Welch: It is either fourteen or fifteen miles.

Mr. Gutheim: So that it is about five or six miles from

4153 your present end of track?

Mr. Welch: No, it is seven or eight miles from our present end of the track.

Mr. Gutheim: What time does your road begin operations?

Mr. Welch: Do you mean when we got the charter out?

Mr. Gutheim: No, when you began operations.

Mr. Welch: Why, I should judge it was about March or April in this year.

Mr. Gutheim: 1910.

Mr. Welch: Yes, we began building it then, I believe, before we bought this old Black Bayou Railroad Company, we entered into a contract with the Kansas City Southern Railway. On account of

us building this railroad and doing business with them, they were to give us this division; a copy of this contract is what I am going to submit to the Interstate Commerce Commission.

Mr. Gutheim: That contract was entered into prior to the construction of your railroad, and on the strength of it, you engaged in the construction of your railroad and in the operation of
4154 the saw mill?

Mr. Welch: Yes, sir.

Mr. Welch: I would like to tell you another thing about our road, and that is this: That we are in what is called "The Caddo Oil Field", and we have no doubt but what they will strike oil along our road in different places. Another thing I wish to tell you is, our road is headed in the direction of the Iron Ore Fields which lay on our line.

Whereupon, at the hour of 4:45 O'clock P. M. this day, December 15th 1910, the hearing of the above entitled matter was closed.

Final adjournment, of principal hearing, December 17, 6:30 p. m., without date.

4155 ST. LOUIS, MO., *January* 23, 1911.

Met pursuant to notice in the Hotel Jefferson, at 10:00 A. M. Before John S. Burchmore, Special Examiner.

Appearances:

S. H. Cowan, Esq., (Fort Worth, Texas),
Frank Andrews, Esq., (Houston, Texas) and
W. T. Hancock, Esq., (Houston, Texas), for the Miller Lake Lumber Company, et al., intervenors.

F. C. Dillard, Esq., (Chicago, Ill.) and
J. P. Blair, Esq., (New Orleans, La.) for Morgan's Louisiana & Texas Railroad & Steamship Company, and Louisiana Western Railroad Company.

F. C. Dillard, Esq., (Chicago, Ill.) and
H. M. Garwood, Esq., (Houston, Texas) for the Texas & New Orleans Railroad Company; Houston, East & West Texas Railway Company; Houston & Texas Central Railway Company; Gulf, Harrisburg & San Antonio Railway Company; and also with
H. W. Seaman, Esq., (719 Rookery, Chicago, Ill.) for the Tremont & Gulf Railway Company, and the Groveton, Lufkin & Northern Railway Company.

4156 J. S. Hershey, Esq., (Chicago, Ill.) and
James L. Coleman, Esq., (Railway Exchange, Chicago, Ill.) for the Santa Fe System Lines.

James C. Jeffery, Esq., (Chicago, Ill.) for the Missouri Pacific Railway Company, and St. Louis, Iron Mountain & Southern Railway Company.

Thomas C. McRae, Esq., (Prescott, Ark.) for the Prescott & Northwestern Railroad Company; H. M. Stephens; Western Tie & Timber Company; Caddo & Choctaw Railroad Company; Dorcheat Valley Railroad, and Louisiana Railway Company.

Charles F. Ziebold, Esq., (St. Louis, Mo.) for the Zwolle & Eastern Railway Company; Mississippi Valley Railway Company.

John A. Sargent, Esq., (Kansas City, Mo.) Vice-President and General Manager, Missouri & Louisiana Railroad Company.

George C. Greer, Esq., (Beaumont, Texas) and
H. M. Garwood, Esq., (Houston, Texas) for the Beaumont Transportation Company.

J. D. Riddell, Esq., (Kansas City, Mo.) for the Salem, Winona & Southern Railroad; Victoria, Fisher & Western Railroad Company, and the Ouachita & Northwestern Railroad Company.

4157 N. S. Brown, Esq., (St. Louis, Mo.) for Mangham & Northeastern Railroad Company; Luehrman & Western

Railway Company; and Natchez, Ball & Shreveport Railway Company.

Luther M. Walter, Esq., (Chicago, Ill.) and

T. J. Gaughan, Esq., (Camden, Ark.) for Fordyce & Princeton Railroad Company; El Dorado & Wesson Railroad Company, and Ouachita Valley Railway Company.

Luther M. Walter, Esq., (Chicago, Ill.) for Arkansas Southeastern Railroad Company; Galveston, Beaumont & Northeastern Railway Company; Mansfield Railway & Transportation Company; Peach River & Gulf Railroad Company; Riverside & Gulf Railroad Company; Trinity Valley & Northern Railroad Company; Nacogdoches & Northeastern Railroad Company; Gideon & North Island Railroad Company; Homan & Southeastern Railroad Company; Louisiana & Pine Bluff Railway Company; Fourche River Valley & Indiana Territory Railway Company, and Lake Charles Railway & Navigation Company, et al.

Thomas C. McRae, Esq., (Prescott, Ark.) for Beirne & Clear Lake Railroad Company.

4158 Walter H. Saunders, Esq., for the Warren, Johnsville & Saline River Railroad Company; Gulf & Sabine River Railroad Company; Little Rock, Sheridan & Saline River Railway Company; Tioga & Southeastern Railway Company; Mill Creek & Little River Railway and Navigation Company, and Bernice & Northwestern Railway Company.

W. R. Thurmond, Esq., (Kansas City, Mo.) and

J. Walter Farrar, Esq., (Kansas City, Mo.) for the Louisiana & Pacific Railway Company; Sibley, Lake Bisteneau & Southern Railway Company, and the Woodworth & Louisiana Central Railway Company.

Martin Walsh, Esq., (Nashville, Ark.) for Memphis, Dallas & Gulf Railway Company.

D. B. Holmes, Esq., (Kansas City, Mo.) and

H. M. Garwood, Esq., (Houston, Texas) for Louisiana Central Railway Company.

Henry Quellmalz, Esq., for the Brookings & Peach Orchard Railway Company.

James W. Orr, Esq., (Atchison, Kansas) for Beaumont & Great Northern Railroad Company.

John T. McKay, Esq., (Kennett, Mo.) for the Paragould & Memphis Railway Company.

4159 Howard Coles, Esq., (Blissville, Ark.) for the Mississippi, Arkansas & Western Railroad Company.

J. C. Rich, Esq., (Mobile, Ala.) for the Washington & Choctaw Railway Company.

Messrs. Blair, Drayton & Hillyer (Washington, D. C.) by Charles H. Bates, Esq., and

Charles S. Hillyer, Esq., for the Timpson & Henderson Railroad Company.

Samuel D. Snow, Esq., (Chicago, Ill.) and

Edgar A. Bancroft, Esq., (Chicago, Ill.) for the Deering Southwestern Railway Company.

Luther M. Walter, Esq., (Chicago, Ill.) and
J. D. Barksdale, Esq., (Ruston, La.) for the North Louisiana & Gulf Railroad Company.
Fred H. Wood, Esq., (St. Louis, Mo.) for the New Orleans, Texas & Mexico Railroad Company; Orange & Northwestern Railroad Company.
Henry M. Armistead, Esq., (Little Rock, Ark.) for the Perla Northern Railway Company, and Malvern & Freco Valley Railway Company.
J. T. Burlingame, Vice-President and General Manager, for the Washington & Choctaw Railway Company.
4160 George A. Keyes, Esq., (Kentwood, La.) for the Kentwood & Eastern Railway Company.
Messrs. Andrews, Ball & Streetman, (Houston, Texas) for Burrs Ferry, Browndell & Chester Railway Company.
W. M. Burrow, Esq., (New Orleans, La.) for the Louisiana Railroad Commission.
Sidney F. Andrews, Esq., (539 Pierce Building, St. Louis, Mo.) for the Arkansas Eastern Railroad Company.
Samuel H. West, Esq., (St. Louis, Mo.) for the St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas, and Paragould Southeastern Railroad Company.
E. K. Voorhees, Esq., (St. Louis, Mo.) General Freight Agent, for the St. Louis & San Francisco Railroad Company.
O. E. Perkins, Esq., (St. Louis, Mo.) for the St. Louis, Iron Mountain & Southern Railway Company.
C. J. McPherson, Esq., (St. Louis, Mo.) for the Missouri Pacific Railway Company.
C. L. Marsilliot, Esq., (Memphis, Tenn.) for the Crittenden Railroad Company; Helena & Parkin Railroad Company, and Tyronza & St. Francis River Railroad Company; and also, with
4161 J. F. Gautney, Esq., (Jonesboro, Ark.) for the Manila & Southwestern Railroad Company.
Messrs. Saner & Saner, (Dallas, Texas) by
(Jno. S. Saner, Esq.), for the Caro Northern Railway Company.
W. Q. Church, Esq., (Kansas City, Mo.) for the Louisiana Central Railroad Company.
Edward B. Peirce, Esq., (Chicago, Ill.) and
W. F. Dickinson, Esq., (Chicago, Ill.) for the Chicago, Rock Island & Pacific Railway Company.
E. A. Frost, Esq., (Shreveport, La.) for the Mansfield Railway and Transportation Company.
N. S. Brown, Esq., (St. Louis, Mo.) and
F. R. Pierce, Esq., (St. Louis, Mo.) for the Southern Pine System: Enterprise Railroad Company; Griffen, Magnolia & Western Railway Company; and Saline Bayou Railroad Company.
N. S. Brown, Esq., (St. Louis, Mo.) and
H. E. Hardtner, Esq., (Urania, La.) for the Natchez, Urania & Ruston Railway Company.
N. S. Brown, Esq., (St. Louis, Mo.) and
Thos. W. Frye, Esq., (St. Louis, Mo.) for the L'Anguillo Railway Company.

4161*a* S. W. Moore, Esq., (Kansas City, Mo.) for the Kansas City Southern Railway Company.

Messrs. Moore & Moore, (Texarkana, Ark.) by (Henry Moore, Esq.) for Homan & Eastern Railroad Company, and Louisiana & Arkansas Railway Company.

W. S. Hobbs, Esq., (Warren, Ark.) for Warren & Ouachita Valley Railway Company.

John S. Kirkpatrick, Esq., (Kansas City, Mo.) for the De Queen & Eastern Railway Company, and Sabine & Eastern Railway Company.

T. J. Gaughan, Esq., (Camden, Ark.) for the Crossett Railway Company; Louisiana & Pine Bluff Railway Company; and El Dorado & Wesson Railway Company.

4162 Examiner Burchmore: Gentlemen, the Commission has assigned for further hearing today at this place the case commonly known as the Tap Line proceeding, in which a number of separate complaints and proceedings have been consolidated. I assume that the nature of the proceeding is understood by all. I am instructed to announce this morning that we will take up the cases of individual roads here with the probability that we can complete that phase of the case by Thursday night, and the intervenors' testimony will be taken thereafter. Commissioner Harlan is expecting to reach here Thursday morning, and Thursday night an adjournment will be taken to Chicago, and the hearing will be completed at Chicago. That is the present plan; of course, this plan may be subject to some variation as the necessities require.

Mr. Garwood: Would it be safe to assume, then, that the witnesses as to the interventions may not appear before Thursday?

Examiner Burchmore: I think it is certain we cannot get through the individutal lines before Wednesday night. It is possible the intervenors may put in some testimony on Thursday. We will expedite the hearing as much as possible. It is my purpose
4163 to call first a list of the roads that have not as yet been heard. This list is possibly incomplete, and if counsel representing the several lines will respond when their roads are called, we will know what companies we have yet to hear, and during the noon hour we can make up a list of the cases in the order in which they will be called, so that by afternoon we will be able to indicate the order of the individual cases. For this morning we have listed five companies.

The Beaumont & Great Northern is present, represented by Judge Orr of Atchison. The hearing with respect to that road will not be in connection with the present case, but really in connection with a formal complaint they have had on file for some time and in which the record has been closed but is re-opened for the purpose of taking this further testimony. That case is No. 1984 on our docket.

The Arkansas Southeastern, is that road ready?

Mr. Walter: Ready.

Examiner Burchmore: El Dorado & Wesson Railway?

Mr. Walter: Resady.
Examiner Burchmore: Fordyce & Princeton Railway?
Mr. Walter: Ready.
4164 Examiner Burchmore: Ouachita Valley Railway?
Mr. Walter: Ready.
Examiner Burchmore: The Natchez, Ball & Shreveport Railway?
Mr. Brown: Ready.
Examiner Burchmore: Paragould & Memphis Railway?
Mr. McKay: Ready.
Examiner Burchmore: Any counsel who are present and have not already filed appearances in the case at New Orleans will kindly hand their appearance to the reporter during the morning, otherwise they will not be noted as having appeared in the case.
Portland & Southeastern?
Memphis, Dallas & Gulf.
Mr. Walsh: Here.
Examiner Burchmore: Galveston, Beaumont & Northeastern
Mr. Walter: That, with the other two Peach River lines, will be ready for Wednesday. The witnesses will be here that morning.
Examiner Burchmore: The Gulf & Sabine River Railroad?
Mr. Garwood: I think Mr. Saunders represents that road. If you will hold that open for a little while. That is a Louis-
4165 iana Line, I believe.
Examiner Burchmore: The Mansfield Railway & Transportation Company.
Mr. Walter: Ready.
Examiner Burchmore: The Sabine & Eastern Railway?
(No response.)
Examiner Burchmore: The Peach River & Gulf, and Riverside & Gulf will go over until Wednesday.
The Timpson & Henderson?
Mr. Hillyer: We are ready.
Examiner Burchmore: The Trinity Valley & Northern?
Mr. Walter: Ready.
Examiner Burchmomre: Nacogdoches & Northeastern?
Mr. Walter: Ready.
Examiner Burchmore: Gideon & North Island?
Mr. Walter: The same.
Examiner Burchmore: Round Pond Terminal Company?
(No response.)
Examiner Burchmore: Wyandotte & Southeastern?
(No response.)
Examiner Burchmore: The Newport Packet Company?
(No response.)
Examiner Burchmore: Dardenelle, Ola & Southern Railway?
4166 (No response.)
Examiner Burchmore: Antoine Valley Railroad?
(No response.)
Examiner Burchmore: The Beirne & Clear Lake Railroad?
(No response.)
Examiner Burchmore: The Brookings & Peach Orchard?

Mr. Quellmalz: Here.
Examiner Burchmore: Elmore & Southwestern?
(No response.)
Examiner Burchmore: The Greenfield & Southeastern?
(No response.)
Examiner Burchmore: Helena, Parkin & Northern?
(No response.)
Examiner Burchmore: Homan & Southeastern?
Mr. Walter: Ready.
Examiner Burchmore: The Kearney & Sheridan?
(No response.)
Examiner Burchmore: Lester & Ouachita Valley Railway?
(No response.)
Examiner Burchmore: Louisiana & Pine Bluff Railway?
Mr. Walter: Ready.
Examiner Burchmore: Luehrmann & Western Railway?
4167 Mr. Brown: Ready.
Examiner Burchmore: Mississippi, Arkansas & Western Railway?
Mr. Coles: Here.
Examiner Burchmore: The Englewood, Alexandria & Southwestern?
(No response.)
Examiner Burchmore: The Norman's Southeastern?
(No response.)
Examiner Burchmore: Poplar Bluff & Dan River?
(No response.)
Examiner Burchmore: Prescott, Reader & Fordyce?
(No response.)
Examiner Burchmore: Scott County Railroad?
(No response.)
Examiner Burchmore: Schwartz & Ouachita City?
(No response.)
Examiner Burchmore: Tyronza & St. Francis River Railway?
(No response.)
Examiner Burchmore: West Point Railroad?
(No response.)
Examiner Burchmore: Williamsville, Greenville & St. Louis?
(No response.)
4168 Examiner Burchmore: Wills Point?
(No response.)
Examiner Burchmore: Anderson & Saline River Railway?
(No response.)
Examiner Burchmore: Bodcaw Valley Railway?
(No response.)
Examiner Burchmore: Durham Transportation Company?
(No response.)
Examiner Burchmore: England & Clear Lake Railway?
(No response.)
Examiner Burchmore: Martindale & Ouachita Railroad?
(No response.)

Examiner Burchmore: Rison & Mount Elba?
(No response.)
Examiner Burchmore: In connection with that road there is a letter filed in the record dated September 21st, and written by the manager, E. W. Farrar, which says in part "Has been discontinued since about the 1st of June. We are in no way using this road and the track is being taken up and disposed of."
Washington & Choctaw?
Mr. Garwood: J. C. Rich is here, and myself, and we are ready.
4169 Examiner Burchmore: Kendall & Sulphur Springs Railway?
(No response.)
Examiner Burchmore: This company advised the Commission on September 21st, 1910, as follows: "We got these rates when we were cutting pine, but were denied them when we went into hardwood, and on this account were forced out of business We have surrendered our charter and gone out of business." So of course they will want no hearing.
Pollok & Angelina Valley Transportation Company.
(No response.)
Examiner Burchmore: Loring & Western Railway?
(No response.)
Examiner Burchmore: Louisiana & Eastern Railway?
(No response.)
Examiner Burchmore: Louisiana Central Railroad?
Mr. Garwood: That is ready.
Examiner Burchmore: Lake Charles & Northern Railroad?
Mr. Garwood: That must be a mistake, that is not a tap line.
Examiner Burchmore: I think that is perhaps a mistake. Shreveport, Noble & Southern Railroad?
(No response.)
4170 Examiner Burchmore: Kingston Railway Company?
(No response.)
Examiner Burchmore: Osceola, Little River & Western Railroad?
(No response.)
Examiner Burchmore; Tyronza & St. Francis River Railway?
(No response.)
Examiner Burchmore: St. Francis River Railroad?
(No response.)
Examiner Burchmore: Beaumont & Saratoga Transportation Company?
Mr. Garwood: It is ready.
Examiner Burchmore: Livingston & Southeastern?
(No response.)
Examiner Burchmore: Mangham & Northeastern?
Mr. Brown: Ready.
Examiner Burchmore: Jefferson & Northwestern?
(No response.)
Examiner Burchmore: Shamrock & Western?
(No response.)

Examiner Burchmore: Houston & Brazos Valley?

(No response.)

4171 Examiner Burchmore: Meto Valley Railway?

(No response.)

Examiner Burchmore: Onalaska & Northwestern?

(No response.)

Examiner Burchmore: Bay Shore Lumber Company?

(No response.)

Examiner Burchmore: We will take up first the Beaumont & Great Northern.

Mr. Walter: You did not call the North Louisiana & Gulf; that is a Rock Island connection.

Examiner Burchmore: I had intended to inquire if there were any other roads which had been omitted. Are there any other roads?

Mr. Snow: The Deering Southwestern is represented here; S. D. Snow.

Examiner Burchmore: Is the Alabama Central Railroad present?

Mr. Walter: Mr. Childs will be here, I think, on Wednesday.

Mr. McRae: I was not present when you began the call, and did not quite understand the purpose of it. Was it simply to ascertain who was present?

Examiner Burchmore: Yes.

4172 Mr. McRae: Did you call the Beirne & Clear Lake?

Examiner Burchmore: Yes.

Mr. McRae: That is represented and present.

Examiner Burchmore: Any other companies?

Mr. McRae: No other that I represent. May I inquire the order in which the hearing will be proceeded with?

Examiner Burchmore: That will be announced this afternoon. Have counsel any inquiries or motions?

Mr. Saunders: The Gulf & Sabine River is ready.

Mr Jeffery: Your Honor, at the last hearing of the Tap Line investigation a request was made on the St. Louis, Iron Mountain & Southern Railway to furnish certain exhibits, contract agreements with various lumber companies, and I will hand to the reporter for filing in this investigation spur track agreement between the St. Louis, Iron Mountain & Southern Railway Company and the Farrell Lumber Company; spur track agreement between the St. Louis, Iron Mountain & Southern Railway Company with the Farrell Lumber Company; there are two separate agreements, I think one is supplemental to the other; spur track agreement between Farrell Miles Lumber Company, and St. Louis, Iron Mountain & Southern.

4173 There are still two spur track agreements that have been requested by the Commission that I will file during the course of the day. I have not had copies made yet.

(The papers above referred to were marked filed, of January 23rd, 1911, and are attached hereto.)

Examiner Burchmore: I intended to ask also whether any of the roads that were heard at New Orleans had any further statements to put in in connection with their cases?

Mr. Garwood: For the Tremont & Gulf and the Groveton, Lufkin & Northern, we wish to file contracts for each of those lines. Your Honor may possibly remember that the witnesses testified in those cases that there was a contract which had been practically consummated but had not been formally signed and reduced to writing, and during the day we would like permission to introduce those contracts.

Examiner Burchmore: They may be filed.

Mr. Saunders: The Warren, Johnsville & Saline River Railroad Company would also like to file a statement with regard to the authorization of the road and certain details which were requested.

Mr. Farrar: Could an ex parte affidavit be filed with reference to certain figures?

Examiner Burchmore: In connection with a case already
4174 heard?

Mr. Farrar: Yes.

Examiner Burchmore: What is the company?

Mr. Farrar: The Louisiana & Pacific. I simply heard of some evidence this morning in the nature of information and figures, perhaps, but it has not come from our own people, but would be from an outside shipper. It is too late to get him here now.

Examiner Burchmore: If you will forward that to the Commission with a letter requesting it to be filed, it will have an examination and will be ruled on then.

Mr. Cowan: Let us have a copy of it, of course.

Mr. Farrar: Yes.

Mr. McRae: In the case of the Prescott & Northwestern, a shipper and owner of a considerable lot of timber on that road has indicated that he would like to submit a petition or statement or ex parte affidavit showing how the cancellation will affect him. He is not here today. He is a citizen of La Crosse, Wisconsin, and he may not be able to get the statement here during this hearing. If he does, he would like to submit it, and if not, he would like to file it with
the Commission. It does not affect the Prescott & North-
4175 western except on the general proposition, but it affects the shipper, and I would ask that he be allowed to do that.

Examiner Burchmore: That will be taken in the same way.

Mr. McRae: Henry G. Gund, I think is his name.

Mr. Coleman: I would like to ask if there is any objection to having these people brought here to be cross examined?

Mr. McRae: None whatever.

Mr. Coleman: I think that would be preferable to any affidavits. We might want to cross examine them.

Mr. McRae: I do not know how long the Commission will be here, but there is no reason why they would not be willing to submit to examination if they can get here. I am not certain they can get here during this sitting.

Mr. Coleman: I think if it is anything material we would insist upon the right to cross examine. We all had to come here.

Examiner Burchmore: The nature of this statement is that a certain shipper wishes to state to the Commission that he proposes

to ship so many carloads of something during the next year and if that witness appears here during the course of the trial we will expect you to mention the fact, Mr. McRae.

4176 Mr. McRae: Certainly. The nature of the statement will be this, that he purchased a large holding of hardwood timber on the line of the Prescott & Northwestern Railroad with the understanding that he would have the same rate from his mill as on the main line, and that he would not have bought this timber and he could not handle it if he has to pay the local rates into Prescott and from thereon, and it will show the effect of the purchase and the extent of it.

Examiner Burchmore: It will be understood if the witness comes to St. Louis during the pendency of this trial, you will produce him in court?

Mr. McRae: Certainly.

Examiner Burchmore: And if not, you can send his affidavit to the Commission and they will examine it and see whether it can be received.

Mr. McRae: Yes.

Examiner Burchmore: We will take up now the Beaumont & Great Northern Railroad with the Arkansas Southeastern and the El Dorado & Wesson and the Fordyce & Princeton, and the Ouachita Valley listed in the order they are called, all being Rock Island connections, and having been postponed from New Orleans.

4177 WILLIAM CARLISLE was then duly sworn, and the testimony given by him will be found in the record in Docket No. 1984.

After which, at 12:15 P. M., a recess was taken until 1:30 P. M.

4178 After Recess.

1:30 P. M.

Arkansas Southeastern Railroad.

F. G. RICE was called as a witness, and having been duly sworn, testified as follows:

Examiner Burchmore: You are the General Freight Agent of the Arkansas Southeastern Railroad Company?

Mr. Rice: Yes, sir.

Examiner Burchmore: You are also the General Passenger Agent?

Mr. Rice: Yes, sir.

Examiner Burchmore: The line of your company connects with the Chicago, Rock Island & Pacific at Randolph, La?

Mr. Rice: That is right.

Examiner Burchmore: And in what direction does its line extend from that point?

Mr. Rice: Southeasterly to Farmerville, La.

Examiner Burchmore: Where a connection was made with the Iron Mountain?

Mr. Rice: Yes, sir.

Mr. Walter: You do not mean that a connection now exists?

Mr. Rice: The connection proper is not made; the grading is up to the Iron Mountain. We are not operating into Farm-
4179 erville at present.

Examiner Burchmore: How far from Farmerville are you at present?

Mr. Rice: About two miles.

Examiner Burchmore: What is the total main line mileage of the road?

Mr. Rice: 27.72 miles approximately.

Examiner Burchmore: How many miles of spurs and sidings have you?

Mr. Rice: 20.6 we report as main line, which includes about 3 miles of sidings.

Examiner Burchmore: Have you sold any part of your line in recent months?

Mr. Rice: Yes, sir—no, we have not sold any; previous to the 1910 reports, we reported mileage that did not belong to the Arkansas Southeastern Railway, that is lumber line that was not operated.

Examiner Burchmore: That was all branch line mileage?

Mr. Rice: Branch line mileage.

Examiner Burchmore: Logging spurs?

Mr. Rice: Logging spurs.

Examiner Burchmore: Of the Summit Lumber Company?

Mr. Rice: Of the Summit Lumber Company.

4180 Examiner Burchmore: In what part of the state is this road situated?

Mr. Rice: The Northeastern part of Louisiana. I have a profile here, your Honor, if you would like to lay it before you, showing our mileage to Farmerville and the underneath one is the proposed extension to Monroe.

Examiner Burchmore: What is this road that is marked on the first map as the "F. S. Railroad?"

Mr. Rice: The Farmerville Southern, which is a part or a branch of the Iron Mountain System.

Examiner Burchmore: Is it your purpose to offer these as exhibits?

Mr. Rice: Yes, sir.

Examiner Burchmore: We will have them marked at this time.

(The papers so offered and identified, were received in evidence and thereupon marked Arkansas Southeastern Railroad Exhibits Nos. 1 and 2, Witness Rice, received in evidence January 23, 1911, and are attached hereto.)

Examiner Burchmore: The Summit Lumber Company has mills on your line?

Mr. Rice: They have.

Examiner Burchmore: More than one mill?

Mr. Rice: One mill located at Randolph.

4181 Examiner Burchmore: What is the distance from that mill to the right of way of the Rock Island Railroad?

Mr. Rice: Approximately 150 yards, the mill itself.

Examiner Burchmore: Is there any private switch track or Rock Island switch track which connects that mill with the Rock Island right of way?

Mr. Rice: No.

Examiner Burchmore: The only means of getting from the loading platform at the mill to the Rock Island is over the rails of the Arkansas Southeastern?

Mr. Rice: Not the only way, no, but all interchanges are made over the Arkansas Southeastern; but there is one loading track which connects with the Rock Island.

Examiner Burchmore: You have one loading track on this railroad and one on the Rock Island?

Mr. Rice: No, the loading track is properly the property of the Arkansas Southeastern, but as I stated, it makes a connection with the Rock Island, but it is not used as an interchange track.

Examiner Burchmore: Is that shown on the map?

Mr. Rice: No, it is not shown in detail. At the extreme left, it is not shown on that profile.

4182 Examiner Burchmore: Will you kindly prepare and send to the Commission a map of the town of Randolph and vicinity, showing the tracks of the two roads and the mill and the loading track, and a large map of the terminal?

Mr. Rice: I will.

Mr. Cowan: And the other track which he says is not used by the road.

Examiner Burchmore: Yes, showing all the tracks.

Mr. Rice: All the tracks at Randolph, yes, sir.

Examiner Burchmore: When was the mill of the Summit Lumber Company opened for operation?

Mr. Rice: I could not answer that definitely; something like ten years.

Examiner Burchmore: The Summit Lumber Company built that mill itself?

Mr. Rice: No, I believe not; I believe they bought it and added to it.

Examiner Burchmore: They bought it ten years ago?

Mr. Rice: Approximately.

Examiner Burchmore: When was this railroad incorporated?

Mr. Rice: November 15th, 1904.

Examiner Burchmore: Was that previous to the construc-

4183 tion of the road?

Mr. Rice: Previous to some of it.

Examiner Burchmore: There was a railroad there at that time?

Mr. Rice: There was.

Examiner Burchmore: And that railroad extended from the present junction with the Rock Island over a part of the distance traversed by the present line?

Mr. Rice: That is true.

Examiner Burchmore: When was that railroad first constructed?

Mr. Rice: Well, I have not the date, other than prior to 1900.

Examiner Burchmore: At the same time the mill was opened?

Mr. Rice: I think so; I cannot answer definitely.

Examiner Burchmore: Your impression is however, that when the sawmill was opened for operation at Randolph, there was a logging road built or available for bringing in the logs?

Mr. Rice: Yes, sir.

Examiner Burchmore: And several years later this logging road was incorporated as a railroad?

Mr. Rice: That is true.

Examiner Burchmore: What was the purpose of the in-
4184 corporation of the railroad, if you know?

Mr. Rice: In order to get through rates and divisions and conduct the railroad as a common carrier, and handle whatever shipments were tendered us.

Examiner Burchmore: Were there at that time any other saw mills in that vicinity?

Mr. Rice: I think not at that time.

Examiner Burchmore: Were there are any other shippers whose traffic promised to be considerable in amount?

Mr. Rice: Well, not dated that far back, possibly not.

Examiner Burchmore: What was the total capitalization of this railroad when first incorporated?

Mr. Rice: $500,000.

Examiner Burchmore: Was that whole amount issued?

Mr. Rice: All issued.

Examiner Burchmore: Do you know what they paid for the railroad that they then acquired?

Mr. Rice: They paid $254,597.73.

Examiner Burchmore: How many miles of road did they acquire for that sum?

Mr. Rice: 20.6 miles.

Examiner Burchmore: Then the whole of the present line
4185 was then in operation?

Mr. Rice: Of the present line, yes, sir.

Mr. Walter: Exclusive of the Farmerville extension.

Mr. Rice: Well, that is not included in that 20.6 miles.

Mr. Walter: That is the length of the extension.

Examiner Burchmore: I do not believe I quite understand that. What is the extent of that extension?

Mr. Rice: 9.72 miles.

Examiner Burchmore: That has been built within the last two years?

Mr. Rice: Well, within the last four years.

Examiner Burchmore: That is a part of the present main line?

Mr. Rice: That is true.

Examiner Burchmore: When the railroad was acquired therefore by the present corporation in its mileage so acquired, there was included some logging road that has since been taken up?

Mr. Rice: Yes, sir.

Examiner Burchmore: How was this extension of the line financed?

Mr. Rice: It was financed by the Messrs. Silverthorne.

Examiner Burchmore: Do you mean they borrowed
4186 money on notes, or how did they finance it?

Mr. Rice: They put up the money or advanced the money for the construction of the road.

Examiner Burchmore: For the construction of the road or the extension?

Mr. Rice: Well, the extension and construction of the Farmerville extension.
